Salary Increases Scheduled Despite Appropriations Cut

He continued that where commitments have been made for services, some appointments may be made by President Morris, pending board approval.

The next scheduled meeting of the Board of Trustees is in August. At that time recommendations made by the administration will be presented to the Board. He added that a special session may be called sometime this month to consider additional pressing measures.

Japanese Film Set For Showing Tomorrow Night

A movie that was twice banned in Japan will be shown tomorrow night in Morris Library Auditorium at 7:30.

The Men Who Tread on a Tiger's Tail," the third event in the summer lecture and film series sponsored by the Committee on Asian Studies, was banned in 1945 by the Japanese wartime government and in 1946 by the Occupation government.

The satirical film, misunderstood as pro-feeding by the government, tells of a 12th century lord forced to escape with only six dedicated retainers to guard him.

The hour-long film has English subtitles and will be shown free to the public.

Construction Division At New Location

The Construction Division of the University Architect's Office has moved to 1016 S. Forest St. The office's new telephone numbers are GL 7-2785 and GL 7-4314.

However, the first order of business being undertaken by Southern officials is revamping the salary schedule, according to Clarence Stephens, University budget officer.

Stephens stated that he hopes the salary increases can be made by July 1, 1961, since that is when the new budget technically went into effect.

Salary increases are made on a merit basis; raises may also be given to new and salaried staff who have been promoted. The budget officer said he anticipated no delay in issuing paychecks for those of July 1 are due Aug. 1.

Work on the internal budget will begin when the salary in­

Unclassified students will meet this afternoon at 2:30 in Browne Auditorium.

Attendance will be taken at the meeting which will give concern­ing unclassified status and answer any related ques­

Anouncements pertaining to new policies governing unclassified students and to pre-registration for the fall quarter will also be made.

Who's Who Lists Thirty From SIU

Approximately 30 faculty members and administrators of Southern are listed in the current edition of Who's Who in America.

Topping the list of "South erners" who are nationally rec­

Among the other faculty members listed are Rev. W. C. Fullen, director of a master's degree program in education; Dr. John E. Grinnell, vice president for academic affairs; and Prof. T. W. Abbott, dean of academic affairs.

Also listed are Graduate School Director Willis Schwartz, Dean of the School of Agriculture; Wendell Keeper, Business Mgt. Department; Dr. Henry Rehn and Arnold Marmoret, a member of the board of trustees.

The summer session at Southern is comprised of students from 46 states and 32 foreign countries. Of the 825 students on campus, the record-breaking summer enrollment of 4,999 includes scholars from all over the U.S., South America, Europe, and the Far East.

The neighboring state of Miss­

Next in line is Pennsylvania and Michigan each with 20 students, followed by Illinois, Missouri and New York with 21 students.

**Liberal Egyptian Policy Criticized**

**Dear Editor:**

The Egyptian crisis is such a threat to our country and the American way of life, it is impossible for us to neglect the communists and communist sympathizers in order to safeguard the defensive. The John Birch Society, which is so strongly stemmed against the "Reflecchiz" in the July 11 Egyptian, is one of the most effective organizations in this country for exposing communism and communism sympathizers. This article is typical of this paper's and the liberal movement's apathy toward the Communist threat.

Also, I would ask, what was so bad about "the terrible days of the past under the Eisenhower Administration as they were published in this article. In the period of the Eisenhower Administration, it is of the utmost importance that the defense industry rose to new heights of production and prosperity and our standard of living steadily went up. He did not do a thing to keep people from being accustomed to the things of people, as Mr. Kennedy has already done to try.

The ex-ai of the government in the ill-fated Ca-

be sorry that I couldn't hire a profes-

and some of the problems of our constitu-

tion. Their work is tre-

unsatisfactory. We are bound to straighten itself out for these days now.

In working on these two lines the book is not mentioned again, for it is not subject by philosophizing if peace could be attained, the income spent for defense should be diverted to slump cleaning, health and other humanitarian acts. If peace could be obtained, I propose we keep our money instead of letting the govern-

and one another.

Gerald H"efler has been pretty bad, with its at-

The control of the editorial page should be taken away from the administration and given to the readers.

Inside Mexico
Summer Study Group Visits Ancient World

The summer study abroad group of students that left Carbondale June 25 arrived in Guanajuato, Mexico for a tour under supervision of R. C. Redick, assistant director of the SIU Latin American Institute. Spanish classes, scheduled for eight weeks, have started at the University of Guanajuato. Two of the youngest members have a tutor.

Different Worlds
One of the travelers, Frank Chamberlain, coordinator of Spanish for the Ridgeway, Ill., school system, wrote friends that the journey of a few days transported their party into a different world; a world that is older than the one they had left.

Chamberlain explained that because much of Mexico is desert or semi-desert, cities and towns are many miles apart. The vast open spaces in between, he said, are inhabited by a few Indians and mixed breeds; they live in the same hovels or huts that their ancestors inhabited.

Most of the dwellings are made of grass and poles, commented Chamberlain, and the rest of adobe, generally without windows glass.

Trees and Goats
In describing this ancient civilization, he said that there has been little change in the peoples’ lives in the past 2,000 years. Donkeys are found everywhere, pulling the carts and carrying burdens on their backs. Hundreds of goats and cows are found near the highway or grazing in the poor rock fields near it. He cautioned that it is necessary to slow down occasionally to avoid the animals crossing the road.

Guanajuato is entirely different from any city or town found in the United States, said the “American abroad.” He added that a love of antiquity would find himself in a paradise; there is no modern high-rise building in the city.

When the traveler enters the town, he finds himself confronted with a very narrow passageway. His car always seems to be scraping the walls of the old houses on both sides. Since the advent of the automobile, many of these streets have become one-way passageways.

Recalling that the old town was established in 1534, Chamberlain said he finds many of its structures to be three or four hundred years old with narrow streets paved with one-foot square stone blocks. He said that he saw only one street with asphalt topping.

69 Cosmetologists Here For Annual School
Sixty-nine cosmetologists began intensive training at the seventh annual School of Advanced Cosmetology here yesterday.

The cosmetology school is the first of its kind in the world, and includes some of the foremost names in the field as instructors. Included on the faculty are Louis Schmidt, internationally known hair stylist; and Dr. Wilard, inventor of the cold permanent wave method.

Students must attend the school for three summers in order to graduate. In the two-week period from July 17 to 29, they will study such things as hair coloring, styling, public relations, laboratory sciences in color mixing, shampoo chemist­

WSIU Sends Sounds Daily

The largest structure at Southern sends sounds over a 10-mile radius from 1 p.m. to 12 midnight six days per week and to 11 p.m. on Sundays.

The 336-foot radio tower for the campus FM station—WSIU—disseminates news and music to the campus, to a normally receptive area measuring 90 miles in radius, frequently to Fort Leonard Wood, Mo., and occasionally to such distances as New Jersey. The station recently received a letter from a listener in New Jersey who had heard WSIU all afternoon the previous day.

Programs each day offer a wide variety of entertainment including live broadcasts of special events, such as commencement exercises, and sporting events. Many musical programs are also presented daily.

Preparations for the morning news, the station has a UPS leased wire service 24 hours a day. National and international news is transmitted directly to the station’s news room on a tele­

type receiver.

Cliff Holman, operations manager of the station, indicated that broadcast time may be extended to 17 hours a day by Nov. 15. Broadcast frequency is 91.9 megacycles.

The radio station serves the dual purpose of providing students in the broadcasting field with experience while also informing and entertaining a large audience. Students receive no pay, but do obtain college credits.

Tom Lynch is the student manager of the station. Scott Harrington is program supervisor, Dick Campbell is continuity supervisor, Joyce Simon acts as the women’s program supervisor, Joan Lash is music librarian and Connie Haerrrger is assistant music librarian.
**Play, Movies, Top Week’s Activities**

This week, activity-wise, starts off with a bridge game this afternoon and winds up with an Off-Broadway Party Friday night. Students are sure to find something in between to fill in their spare time.

**TODAY:**
- Bridge: 2 p.m., Bowyer Hall Lounge
- Pop Concert: 8:15 p.m., Patio, University Center

**TOMORROW:**
- Movie, "The Who Tread on a Tiger’s Tail": 7:30 p.m. Morris Library Auditorium
- Sing and Swing Club: 7:30-9:30 p.m., Square Dancing at the Boat Docks

"Candida." 8 p.m., Playhouse
- Movie, "Red Badge of Courage": 8:30 p.m., McAndrew Stadium (Browne Auditorium in case of rain)

**THURSDAY:**
- Cultural Center: 10 a.m., Bowyer Hall Lounge
- Children will have supervised play.

"Candida." 8 p.m., Playhouse

**FRIDAY:**
- "Candida." 8 p.m., Playhouse
- Off-Broadway Party (Talent Show and Dance): 8 p.m., Roman Room, University Center
- Dance Band will play.

**SOUTHERN ANTHROPOLOGISTS TO STUDY PREHISTORIC MEXICO**

SIU has been awarded $51,600 for a two-year archaeological research program in Mexico, according to Alan T. Waterman, National Science Foundation director.

The program is entitled "Studies of the North Central Frontier of Mesoamerica." A three-man team of SIU anthropologists will supervise a five-phase project to study fluctuations in the prehistoric frontier separating the barbaric and early civilized cultures in north central Mexico.

Heading the studies will be Charles Kelley, SIU museum director; Walter T. Wofey, chairman of the SIU anthropology department; and Pedro Armillas, SIU museum curator of Mesoamerican archaeology.

All are authorities on the archeology of Mexico and the southwestern United States.

During the next two years, beginning about Sept. 1, each will spend approximately one-third of his time in field work in Mexico, and two-thirds on campus for teaching duties and for processing and analyzing the field-gathered material and data in the Museum laboratory, Miss Ellen Abbott, supervisor of the research, will direct the program.

A number of graduate student assistants will be hired for field and laboratory work, Kelley says.

Kelley expects to spend the fall terms of 1961 and 1962 in field work in areas south of the Durango area where SIU Museum summer field sessions have been held. Kelley will concentrate on field studies of the nature and extent of the barbary cultures that occupy the central Chichimec cultures north of the Durango area during the spring months of 1962 and 1963.

Armillas will be in Mexico during the next two summers working in the area south of the state of Oaxaca where early civilizations of Mexico advanced and receded during the period from about 1 to 1500 A.D.

**SALUKI GRIDDER WILL REPORT TO PRO-LIONS**

Houston Antwine, the 1960 most valuable Saluki football player, will report to the Lions early in August for that professional team’s opening training camp.

"Twelve," who was also drafted by the Houston Oilers, chose the Lions when he was offered a contract estimated at $9,000 last February. He was a three-time letterman at Southern.

"I talked to the Detroit Lion scout only once," said the 245-pound guard from Memphis, Tenn. "That was after our last game at Athens. The scout asked me if I would like to play for them and I told him that I would."

The Oilers offered Antwine a trip to a Houston - Buffalo game last winter, but he was forced to decline since the reserve money would have classified him as a professional and he would have lost his collegiate eligibility for wrestling.

Antwine was a three-year wrestler while at Southern.

Antwine will be among 33 all-college gridiron stars who will challenge the world-champions Philadelphia Eagles Friday 1 in Philadelphia, Pa. He has made the all - conference team offensive and defensive units in the past two years, and was named to the second AP Team Little All-American last year.
