Deadline Set For Summer Enrollment

The deadline for filing graduation applications is July 29 for those students completing degree requirements at the end of the summer quarter, 1967.

Graduation application forms may be obtained from the Registrar’s office and must be returned to that office after the graduation fee is paid. The $17 graduation fee is payable at the time of application.

Students whose tuition fees are paid by a Teacher Education Scholarship, a General Military Scholarship, or public law 904 do not pay the graduation fee.

Students completing an approved teacher-education program may also obtain the forms to obtain a teaching certificate in Illinois.

Summer Student Worker Totals Remain Constant

The number of students working for SIU during the summer remains almost the same as the number working during the regular school year, according to William T. French, coordinator of Student Work and Financial Assistance.

French said and estimated total of 4,000 students are employed each quarter.

French estimated that this summer 250 openings remain.

"The total number of students employed was the most difficult area to fill," he said, "but most of them have been filled.

"Among the students employed are 607 students from Illinois, 209 from Missouri, 309 from Indiana, 215 from Kentucky, 231 from Ohio, 109 from Indiana, 121 from Wisconsin, 38 from Iowa, 160 from Missouri, 15 from Tennessee, and 40 from other states.

"The total number of students employed is 4,000, and the majority of them are employed in the summer months.

State Fair Role To Be Discussed

SIU’s role in the 1967 Illinois State Fair will be discussed at the meeting next week in Springfield.

Rex D. Karnes, assistant director of communications, said that SIU representatives will discuss the role of the state university in the fair.

Karnes said the state institutions’ exhibits probably include a large display of state schools, display at the fair of the State Board of Higher Education, and photographs of student life on campus, charts and programs of courses.

The Illinois Joint Council of Higher Education, composed of presidents of the state system, said that SIU representatives will be appointed from each state school.

The state fair will open Aug. 17 and run through Aug. 21 at the State Fairgrounds in Springfield.

Karnes said that students who reside in Springfield are hired to staff the schools’ exhibits, and that no SIU students are expected to participate this year.

UST WAITING—While Rick Carlson, a senior in Industrial Education, was waiting for his wife Thursday, he dipped his line in the Lake-on-the-Campus. So luck Wednesday's heavy rains may have washed too much fishfood into the lake.

Sigma Bet 3 Gamma Installs New Officers, Initiates Dozen Members

Sigma Beta Gamma, SIU's honorary broadcasting fraternity, has initiated 12 members. They are Phil Davidson, Don Zolke, Russ Hayburn, Mark Edwards, Ron Adams, Larry Pepper, Linn Block, Rick Korte, Bob Brunner, Jack Marquis, Charles Harris and Gene Camfield.

Membership is restricted to radio-television majors who are chosen by the members on the basis of academic achievement and service to both WSIU Radio and WSIU-TV.

The purpose of the organization is to serve the University Broadcasting Service and to aid in the betterment of American broadcasting in general, both as a business enterprise and as an art form.

Also included in the new membership are the following honorary members: Mrs. Robert W. Allen, Midlothian; Mr. and Mrs. William L. Cook, Rockwood; and Mr. Robert W. Allen, Alton.

YMCA Plans Dance

The Carbondale YMCA will sponsor a dance from 8:30 to 11:30 p.m. Saturday at the Oakland Avenue tennis courts. Music will be provided by Bob Kahan and the In Men, co-art director for WSIU-TV. Carbondale Mayor David Keene spoke at the organization's initiation banquet.

The new officers for the coming year include H. William Haines, president; Steven S. Martin, vice president; Tony Willems, treasurer; Gary Willis, secretary. Bob Brunner was elected social chairman.

"Mud Maps" Common

"Mud maps" are a common sight in Australia's Outback. To direct travelers through the lonely region, ranchers often scratch out maps in the hard-baked soil.

More Acts Needed for Follies; Rehearsals to Start July 12

The Southern Follies still need acts to fill the bill, according to Cora Hilliard of the Student Activities Office. Application so far have been turned in for oral interpretation, folk singing, and piano. However, any talent category will be accepted. Interested persons may see Miss Hilliard in the Activities Office of the University Center. Rehearsals will begin at 6 p.m., July 12 at Davis Auditorium.

Materials Exhibit To Feature Latest Educational Aids

Teachers and administrators of area public schools are invited to attend the 10th annual Educational Materials Exhibit which will be held July 11-13 at the University Center. More than 90 materials suppliers and manufacturers will send representatives to the meeting, and a number of equipment demonstrations are scheduled.

Among the numerous types of educational adjuncts to be shown are such items as maps, globes and charts; art supplies; filmstrips and other audio-visual aids of all kinds.

The Follies, an annual free-admission event which uses the talent of students on campus, is scheduled for 8 p.m., July 15 at Davis Auditorium.

A University of Missouri emeritus professor of agricultural economics, Frank Miller, has been appointed visiting professor in agricultural industries for the summer term. Miller replaces William Herr, now completing a year's leave for research and post-doctoral study at Washington, D.C.

Miller, a native of Cove, Ark., was professor of agricultural economics at the University of Missouri, Columbia, from 1949 until his retirement in 1965. Previously he was a high school teacher and school superintendent in Nebraska schools.

In addition to teaching a summer term course on Economic Analysis of the Agricultural Policies of the United States, Miller will be a consultant to some graduate students in the department of Agricultural Industries.

MAHESH K. PODAR
Student Selected
For UISTA

An SIU student from India has been selected for training in a war on poverty program, according to the International Student Office. Mahesh K. Podar, a senior majoring in economics from Kanpur, U.P., India, is one of 50 foreign students who have been selected for training in the VISTA (Volunteers in Service to America) Associates New York City summer program.

Podar will work in high-tension summer trouble areas of New York City during the two-and-a-half month training period.

Trumpeter Swan, Spaceship
Featured on WSIU-TV Today

A journey on an imaginary Einstein spaceship, folk music in Burma and a study of the rare trumpeter swan are the subjects on "What's New" at 4:30 p.m. today on WSIU-TV, Channel 8.

Other Programs:
5 p.m. Friendly Giant: If You Talked to a Boar.
5:15 p.m. Industry on Parade: Film.
6 p.m. The French Chef: Roast Leg of Lamb.
6:30 p.m. News in Perspective: (Repeat).
7:30 p.m. What's New: (Repeat).
8 p.m. Passport: 8, Bold Journey: The Haunted Fort.
8:30 p.m. A Discussion of the Film "Ulysses".
LBJ Again Sounds Like '68 Candidate

All of a sudden, President Johnson is campaigning for re-election, taking credit perhaps from a rise in his poll ratings and basking in a friendly reception by Democratic Governors in St. Louis, Seattle, and Chicago — along with the Middle East crisis and his meeting with Premier Kosygin. It has improved standing with the voters, he made three major speeches in a week, all of them sounding very much like campaign orations.

Any explanation for his prospects 16 months before the election should, however, be tempered with awareness of the great intangible posed by the Vietnam war, if the country approved of the Administration's handling of the Middle East crisis, it must have been because this was one war which, thanks in part to Israel's swift victory, the Administration stayed out of. If the Glassboro summit talks won general acclaim, it must have been because they held out hope of an improved relationship with the Soviet Union that will minimize the dangers of future war.

Can the President expect to capitalize politically on these clear yearnings for peace if at the time of election he is still conducting in the Vietnam war? In American history? We doubt it very much. Not only would the fact of a Vietnam war clash with any peace-maker's portrait Mr. Johnson drew of himself, it would also remind the voters most forcibly of the harsh language of casualty lists and separated families and draft calls, that in 1964 Vietnam war.

Can such a striking discrepancy between the policy promised and the policy carried out be forgiven in Oral Contraceptives Thinking Improves

The United States has taken a major step forward in the recent discovery by foreign aid authorities to ship oral contraceptives to needy nations requesting them.

Observers should not be deceived by the quiet tone of the discussion. Mr. S. G. S. G. Starna, administrator of the Agency for International Development, said the United States has moved a long way from the era when former President Eisenhower declared birth-control aid help abroad was not in keeping with the sensibility — an opinion, incidentally, which Eisenhower himself once held.

It is significant that among the first countries to request contraceptives to control their exploding populations are the Latin American countries, where Catholic opposition was once militant. No doubt the majority opinion by Pope Paul VI's birth control advisory panel urging a more liberal contraceptive law has helped to shape new thinking on this subject around the world.

Resumption of Hostilities May Be Inspired by Arabs

The minor differences across the Suez Canal if it continue to m the Arab-Israeli cease-fire are more perplexing than alarming.

There is no indication that the shattered Egyptian army

Joint Panama Canal Control Certain to Aid Both countries

Canals and straits have been shown this month to be of great importance. And with the Suez Canal and the Strait of Tiran likely to remain critical international flash-points for some time, Americans should welcome word that new agreements promise better relations where the Panama Canal is concerned.

Both the American and the Panamanian Governments are high marks for the outcome of the two-and-a-half-year-long negotiations. Washington recognized va changed world demands changed international agreements and acted accordingly and in time. Panama recognized that any successful operation of the canal still required partnership with the United States.

Until the treaties the United States will give up its 64-year-old sovereignty over the 10-mile-wide Canal Zone, although the original treaty conceded such power forever.

Thus a continual and worsening affront to the Panamanian patriotism, foreign control of the canal results in the invasion of its ability to resume large-scale war against the unscailed Israeli forces. Nor is there any reason to believe that Israel, having achieved every major military goal in the slashing, six-day victory has any interest in further tormenting or maiming the beaten foe.

Why then, are repeated truce violations taking place? Each side has accused the other of instigating the incidents. But following established international protocol in such matters, a United Nations investigation of the truce violations may some day clear up all doubts and provide positive answers.

Meanwhile, a reasonable answer may be deduced.

The Israelis have nothing to gain from the flareup of fighting. Israel has solved its immediate military problems. The task it faces now is the translation of the fantastic military victory into a diplomatic victory which will produce some measure of security in the years ahead.

The Egyptians, on the other hand, may have something to gain. Two things, to be exact. First, by keeping up pressure on the Suez front, they may delay the mobilization of a large part of the Israeli armed forces. Second, the threat of shooting serves to strengthen the Russian-Arab position in the United Nations debate and to give urgency to the resolution demanding the withdrawal of Israeli forces from all conquered Arab territories.
Erhard Stills Opines on World Politics

By Ray McHugh

(Daley News Service)

Bonn, Germany -- Ludwig Erhard says he has retired from politics, but the former chancellor of West Germany and the man who engineered her postwar recovery still is a voice to be reckoned with in German, European and Atlantic affairs.

In an exclusive interview, the chubby, 70-year-old Bavarian economist appealed for the closest cooperation between the peoples of Europe and America, questioned the credibility of Russia's aloofness about a certain "drifting apart," and said the alleged independence of her satellites, and admitted with regret that Western Europe is "still far removed from political unity.

"Any weakening of the West at different points and at the same time in Moscow," Erhard said, "Any anti-Vietnam action, (an) negative attitude towards Western, especially American policy, plans to destroy bridges between our hands and is deliberately fomented by the Soviets."

The former Christian Democratic leader, pushed out of office about 18 months ago, says he has not seen "credible signs" of the much ballyhooed future in the Soviet Union.

"Tension in Europe may generally have abated," he said, "but as far as the Federal Republic is concerned, there has certainly been no relaxation."

The lessening of tension is credited by German political leaders to the strong American military force in Europe and to the conventional strength of allied forces in Europe, not to change in America's role in the world.

"As for the 'independence' of the nations of the 'East Block,' Erhard said, "there is no difference between the various countries as is evident, for instance, when the policy of Poland is compared to that of Romania."

"But in all Eastern bloc nations, the identity of the Communist leadership constitutes a highly effective bond."

Despite the German-American political storm and the accompanying speculation about a Bonn last fall, Erhard insists that there has been no significant change in relations between Bonn and Washington.

President Johnson has invited Erhard to meet with him at the White House Tuesday, a week before the United States is due to receive an honorary degree at the University of Michigan.

Erhard told friends that he is going to German President to convince President Johnson that Germany could no longer continue to offset American military costs--Europe with the aid of U.S. arms and other materials.

Secretary of State John Foster Dulles of the United States, Britain, and Germany negotiated an agreement calling for a reduction of 35,000 men in the 275,000-man American North Atlantic Treaty Organization force. Substantial cuts also are planned in the British army of this size.

Erhard said he discussed German-American relations with President Johnson who 'the chief executive was somewhat astonished at a funeral and that he also had had a recent contact with Ambassador John J. McCloy when the.so-called 'debt' and with Gen. Lucius D. Clay, former U.S. military governor of Germany.

"I, too, have from time to time expressed my concern about a certain 'drifting apart,'" Erhard said, "But I did not refer so much and not only to German-American relations, What I am concerned about is the relationship from East to West, from Europe, to the United States."

The old ex-chancellor, who still carries the World War I wounds suffered at Ypres, declines to estimate the military impact of the NATO cuts, "That is for the experts." He said but the danger of a political and psychological weakening of the Atlantic Alliance does exist, he said.

To avoid such a weakening, Erhard called for "a development of the cooperation and standing-together of the continents and the peoples on many levels.

He said such steps in a broad range of political, economic and cultural areas "are urgently required. If insecurity is not to spread or distrust to be surmised."

Noting suggestions that Germany might also reduce its armaments, Erhard said "the whole situation is hardly propitious for such a decision."

There is a note of regret when the economist describes Western Europe's economic and political unity. In the Erhard World it would warrant that wreck­ed his plans to join his father in the family dry­ goods business at Furth, Instead, he studied eco­ nomics and became a lawyer. Hitler's Nazis blocked his hopes for an academic career and he worked in a small re­ publican group in the Rhine area. In 1933 he joined the Nazi, but somehow escaped destruction. In the late stages of World War II, Erhard left 15,000 men in France to rebuild Germany after defeat. Had the Rhine River flows, Erhard would have been ar­rested and probably executed, Goerdel was ar­rested and hanged for his part in the abortive 1944 attempt to halt Hitler.

Instead of the Nazi's, it was the occupying Ameri­ can Army that found Erhard's plan and took him to Chicago to discuss its feasibility.

His appreciation of U.S. interests in Europe and the Atlantic Alliance, as well as his own, have been in that plan, have remained unshaken. The position put him at odds with the independent-minded Pres­ ident and Charles de Gaulle of France, but as Erhard once said, "No responsible politician in Germany can pursue a policy of the American Atlantic Community and against small European countries.

Erhard admits that Germany still is divided between "Atlanticists" and "Gaullists," as is the relationship between the two superpowers.

Illinois Sales Tax Hits National High

(St. Louis Post-Dispatch)

Illinois now has the questionable distinction of having a retail sales tax as high as any in the nation. 5 cents on purchases between 93 cents and $1.15. The 1-cent increase--of which 2 1/2 cents go to the cities and counties--will produce slightly more than half of $685,000,000 in additional annual revenue. Illinois has the country's highest sales tax--and this is going to be more equitably distributed while the sales tax is the only known tax, which is most burdensome to those least able to pay it.

Certainly, then, broadening the sales tax base would have been preferable to increasing its rate. But the latter was the only way to bring in the levy to its apparent limit, it is going to be confirmed the next time with what Governor Ogden Mills has called a "penny-per-dollar" income tax, or both.

Only 14 states have no income tax and of these only four—Michigan, Pennsylvania, Ohio and Texas—are comparable to Illinois in terms of revenue produced. The tax is income tax—and this includes the state's Dem­ ocratic governor as well as the Legislature's GO P leadership—say the state constitution prohibits it, but others say it does not. In either case the fact remains that if the tax burden is to be more equitably distributed while the state's revenue needs are being met the income tax is as inevitable as death and taxes.
Higher Than Ever

Enemy Troops Rank 295,000;
Hiked Commitment Hints

SAGONAP—More enemy troops were reported in South Vietnam, with a total of 296,000—were officially estimated to be operating in the country, according to Defense Secretary Robert S. McNamara. The increased estimate was headed toward Friday for his first-hand look at the war.

The apparently steady rise in Communist rolls, which intelligence officers six years ago figured at 30,000, is a major factor to be weighed by McNamara in considering a possible increase in the commitment of American fighting men beyond the current projected level of 470,000.

The U. S. Command reckoned that, due to combat losses and the bombing of supply lines, recruiting and inflation provided a net increase of 1,000 in the ranks of the Viet Cong and North Vietnamese in the month from June 25 to July 1. This came a week in which reports of the enemy were reported killed in action. The fighting cost the lives of 161 Americans and 159 of the other allies.

81-Year Marriage

Broken by Death

FERGUS FALLS, Minn. (AP) — Death ended the world's most enduring marriage.

Ole M. Sholberg, a Norwegian immigrant, died at his home in this west-central Minnesota city Monday night. He had been bedridden the past year.

Sholberg observed his 105th birthday on June 1, in the same day his wife, Orella, was 103 years old.

The couple observed their 81st wedding anniversary last Jan. 5.

On his 70th wedding anniversary, Sholberg recalled that, "The pastor gave a very good sermon. It must have been good, it lasted 70 years." Mrs. Sholberg told newsmen on their 80th wedding anniversary, "I have never had a serious quarrel. He has been a good man, and we have had a happy life. We still have a happy life."

The Sholbergs raised six daughters and two sons on their small farm. Ole was also a carpenter and built their first two-room home. In 1941, the Sholberg's retired and moved to Fergus Falls. Ole was 80 when he helped build and modernize one-story white frame house where he lived until his death. Ole never spent a day in a hospit.

New Theory Jobs Evolution;
Lies in Realm of Religion

NEW YORK (AP) — Scientists, concentrating on physics and chemistry in trying to explain man's development, still face many puzzling question marks—and a noted British zoologist maintains the answers may lie in the realm of religion.

He suggests that telepathy, or thought transference, may provide a clue to new, revealing lines of inquiry into the human makeup. He calls for vigorous research into "the nature of religious experience" and into the "psychic side of man."

And he predicts the salts would "show the way to a re-establishment of the idea of God as both a philosophic and a scientific reality."

Those striking views, citing gaps still looming in Darwin's evolutionary theory of natural selection, are advanced by Sir Alexander Fraser, recently head of Oxford University's zoology department and a renowned exponent himself of the natural selection theory.

Presenting his case in a new book, "Living Stream," issued by spon & Bow, he says: "If only one percent of the money spent upon the physical and biological sciences could be spent upon investigations of religious experience and upon psychical research, it might not be long before a new age of faith dawned upon the world."

Sir Alistair, knighted for his biological research and investigations into sea life and other species in various parts of the world, says science has dwelt on only a tiny fraction of the deeper implications of the human animal; and that the neglect of other influences.

He says that while he is not religious himself, he is convinced that "some power we call God" is involved in the processes.

Sailors' Drug Usage Doubles

WASHINGTON (AP) — Navy figures show drug use among sailors has climbed at a rate more than double that of last year. The hallucinatory drug LSD has been involved in 28 cases resulting in administrative discharges since February.

The figures, as well as a new anti-LSD directive issued last month, seem to indicate more and more Navy men are taking psychedelic trips on LSD-trips that in most cases are not permanent psychological effects.

In a campaign aimed at preventing use of LSD, the Navy has directed commanding officers to stress to all hands that the drug, while non-addictive, can cause serious if not permanent psychological effects.

War Causes Upped Rates, Money Lack

WASHINGTON (AP) — A congressional study committee said Thursday the administration badly underestimated Vietnam costs last year, thus contributing to a money shortage and high interest rates.

"Total spending on the war in Vietnam during the fiscal year just ending will double the administration's original estimates," the Democratic-dominated committee said. "And there are already signs that actual spending on the war in the upcoming fiscal year may again appreciably outrun first estimates."

Administration officials have repeatedly insisted their policies last year were correct and stressed that the build-up in Vietnam was accomplished without the waste and price controls which marked World War II and the Korean War.

But they also have emphasized the uncertainties of war and the possibilities of increased spending if combat operations or troop strength should escalate significantly above levels assumed in the budget.

They contend President Johnson's proposal for a tax increase this year is designed not only to lift pay for the war but also to void the cycle of tight money and inflation which marked last year.

“Our ideas center around you!”
Photographed by David Luan

The usual surroundings for the month of July is water... and usually on weekends you'll find Senny Sandquist near the warm surroundings of our beaches and waterways. Senny lives in Skokie, Ill., but decided she would devote this summer to her academic career. Her main ambition is to work in special education for mentally retarded children. She already has worked at the University School doing special work in this field. Although only 19, Senny has shown great interest and has definite potential in the work she has been doing with children.

PHARAOH'S FEMME FATALE!
RESEARCH PROJECT—George H. Gass, (left) director of the endocrinology laboratory, gives directions as two students, Nick Bukva of Westfield, N.J., and William Allaben of Rockton, perform an experiment. One of the current research projects is a study of cancer in mice.

Tests Begin on Mice

Research on Cancer Among Projects

Being Carried Out in SIU Laboratories

By Candy Dean

Research does bring discoveries, as George H. Gass, director of Endocrinology and Pharmacology, is proving with experiments performed in the Endocrinology Laboratory. "Small Laboratory Animal Care" is the name of a research project which was granted to Charles A. Buntin by Maryland Plastic. Buntin worked with product design and Gass worked with utilization in terms of research.

Research is carried out on approximately 2,000 mice caged in the laboratory and most of these creatures are being used for cancer experiments, mammary carcinomas, in particular. It has been found that female sex hormones, estrogens, do cause this type of cancer but the scientist has not discovered how. Results of research do show that estrogens administered periodically are less carcinogenic than if given daily.

The animals are fed the cancer-producing hormones in their food. Eventually a lump becomes visible on the animal's chest. The animal is then sent to the pathologist where he removes and analyzes the growth.

One problem has been the accurate measurement of the amount of food and therefore hormones, the mice eat, scattering much of the food around the cage.

Recently Gass invented a mouse feeding device which gives the mouse only enough room to stick his head in the container to get food. The scientists, therefore, can accurately measure the amount of food consumed.

This mouse feeding device is part of the work accomplished with the grant. The cancer research is being done on a grant from the National Cancer Institute.

The mouse is the first in the hierarchy of experimental animals. The scientist begins by running tests on a mouse then rats and then mammals, Gass said.

Other research experiments are run at the Endocrinology Laboratory. One of these, a NASA project, is just concluded. Since man, while in space, can't move for a long period of time, it is important to find out how prolonged confinement and restrictions of movement will affect him. Rats were restricted and their life span was shortened to 25 weeks. This corresponds to a human's life in that it would be about 1/4 of the normal life span.

The animals' death rate increased and the longer the rats were restrained the less weight they gained, which made them smaller and puny.

Gass, who came to SIU in 1950, has had only one major setback in his lab experiments. A fire struck the laboratory in 1962 and 1 1/2 years of research, 3,500 animals and $50,000 of equipment were destroyed.

Gass will have a paper published soon in Cancer Chemotherapy, on his success in being able to inhibit cancerous growth.

Brush Towers To Be Completed By Next Summer

Brush Towers, the new high-rise dormitory will be completed next summer quarter, according to C.T. Wright, architectural superinten-

The new 17-story buildings, which required 250 men and about $1 million to construct, are tentatively designed to serve one boy's and one girl's dormitory. Capacity of the building is about 840 people each.

Wright said the dual high rise is "a duplication of university Park." The only difference, he said is, "Brush Towers has two high rises and no triplexes."
Activities Board Plans Excursion To Grand Tower

The SIU Activities Programming Board is planning a Sahara Safari to the Grand Tower area Sunday.

Students wishing to attend should sign up by noon today at the information desk in the University Center. Return will be about 8 p.m.

The trip is free and a picnic lunch will be provided.

3 SIU Professors Attend Symposium

The symposium is held every two years to exchange current information among the chemists.

Bunten to Take Monday to Resume His

Charles Bunten, associate professor of industrial education, has resigned to become chairman of the industrial education department at Miami University.

Bunten has been a member of the SIU School of Technology faculty since 1959. Before that he taught at North Texas State University and Ball State University.

He has been engaged in product research, has developed many animal care and laboratory equipment items, including a small-animal metabolism unit which has been patented.

Bunten is a graduate of Eastern Illinois University with a master's degree from Florida State University and a doctor of philosophy from the University of Missouri. He is native of Cleves, Ind.

Drama Festival Includes Members From Other Schools

Twenty-six collegiate students of theater from across the nation and two foreign countries are members of SIU's 1967 summer Lincolnland Drama Festival Company.

Sixteen are graduate students, seven of them candidates for the doctoral degree in theater. They come from eight states, Canada and Brazil. Nineteen are men, seven are women.

During the summer quarter the company is spending full time in activities of theater production, presenting three plays on the campus moving July 17 for a month's "on location" performances at New Salem State Park.

The company opened its season with three performances of Tennessee Williams' "Streetcar Named Desire" June 29-27, July 1. The following week, "Much Ado About Nothing" July 6-8 and "The Drunkard" July 12-13.

A four-court production, "Stary, Stary" will be staged July 25-29 by other students in the Department of Theater. The festival company will present W. P. Conklee's "Life and Death, Prologue to Glory," at New Salem, with performances scheduled at 8 p.m.

Tolle to Direct Junior College Teacher Preparation Project

Donald J. Tolle has joined the SIU College of Education faculty as an associate professor in the joint venture of SIU and the Junior College District of St. Louis and St. Louis County and is designated to give enrollments both classroom and teaching experience. It has been described by Dean Elmer J. Clark of the College of Education as a most promising development in the adequate preparation of junior college teachers and administrators.

The project, of which Charles Hill of St. Louis is director, was started this year through a joint venture from the Ford Foundation. It has established three master's degree programs as follows: a one-year program for teachers of a single courses for occupant, all students, such as communications, social science and technical mathematics; a one-year program for teachers of occupational courses, such as data processing, secretarial science, and technology; and a three-year program for graduates of two-year, high-school occupational programs with associate degrees or similar awards.

Tolle, whose field of specialization is the program, administration, and operation of the community junior college, will be involved in the selection of candidates who will enter the program and will teach classes in the junior college field. A hundred students are expected to go through the program by the end of 1970, he said.

Born in Roslyn, Kan., in 1918, Tolle has lived in Florida the past 43 years. He obtained his doctorate from Florida State University at Tallahassee and served five years as a dean of men and eight as dean of instruction at St. Petersburg (Fla.) Junior College.

The 38th of a series...

Ted's Girl of the Week

Ted's thirty-eight girl of the week is twenty-one year old senior Linda Day from Henderson, Kentucky. An interior design major Linda loves to dye, knit, paint, and sew.

In shape for the summer sun, Linda chooses one of the many bikini styles in swimwear available at Ted's in famous Moss hoods and all priced so low.

"The Place to go for brands you know!"
NEW PAVEMENT FOR OLD-A bulldozer rip-ups asphalts pavement on Campus Drive east of the new Physics Building. The section, roughened by traffic, will be repaved shortly as part of the campus maintenance program.

Weekend Activities

Kiss Me Kate Takes the Stage

Friday

Parents Orientation will be held from 30 a.m. to 2 p.m. in the University Center Ballroom B.

The Educational Policies Committee of the Graduate Council will meet from 10 a.m. to noon in the Keokuk Room, with lunch at 12:15 p.m.

The New Programs Committee of the Graduate Council will meet from 10 a.m. to noon in the Missouri Room, with lunch at 12:15 p.m.

The Department of Music will present "Kiss Me Kate," with performances at 7:30 p.m. in the Eichelberger Auditorium of the Performing Arts Center. The show is directed by William C. M. Baker. Student tickets are $1.50, guests $2.50.

Sunday Night's Play Sold Out

The Sunday evening performance of "Kiss Me Kate" has been sold out, according to Alfred Erickson, business manager of the production. Erickson said there are still a few tickets left for the Friday and Saturday night performances.

Mr. and Mrs. Bruce Johnson, Alumnae House... Have a "Kiss Me Kate" souvenir program, which will be available at the door of the University Center Ballroom B.

Sunday Night's Play Sold Out

The Sunday night performance of "Kiss Me Kate" has been sold out, according to Alfred Erickson, business manager of the production. Erickson said there are still a few tickets left for the Friday and Saturday night performances.

Mrs. Wakeland Returns

Asia, Mideast Trip Beyond Fondest Dream, Expectation

"It was far beyond my fondest dream and expectation," said Mrs. Mary Wakeland, who has been on the Mideast tour for six weeks. "I dreamed of a dream," she said. "I dreamed of seeing the people of the Mideast and Europe, including, such countries as Canada, New York, and England. She returned home on June 6, "I was not a tourist," she emphasized. "My primary purpose was to improve my background in the culture of the Mideast, to contact foreign students and people and to learn from them what services of our offices (the International Student Center) have been useful to them."

She was pleased to see many new housing available at Southern Hills.

Housing Available at Southern Hills

Efficiency and one-bedroom apartments are available now at Southern Hills for this summer, according to James Nugger, supervisor of family housing. The apartments are ready for occupancy.

For more information on the housing, interested persons may call 835-2301 or come to the Family Housing Office at Washington Square, building 10.

No Returns Are Exaggerated

Forest Opening in Fall '68
Foresters to Get New Facilities

By the fall of 1968 federal foresters expect to move out of the old Agriculture Building on the University of Illinois Campus and into a new two-story, 25,000-square-foot Forest Service Lab, named for the North Central Forest Experiment Station's Carbondale unit.

The $609,000, two-story, 25,000-square-foot laboratory will contain offices for the North Central Forest Experiment Station's Carbondale unit and six experimental plots with a variety of experimental forest and farm types.

The structure will contain offices for the North Central Forest Experiment Station's Carbondale unit housed in the Ag. Building.

The construction comes from a $609,000 appropriation to the University of Illinois for the purpose of a Chemistry Building. The agreement calls for the building within 35 days after receipt of permits. Plans are by Fischer-Kocher-Bowden, Carbondale architect.

Football Salukis to Hold Training at Little Grassy

The Football Salukis will have a home on the hill this fall. They will move into a training camp and hold their pre-season two-a­day practice sessions, according to coach Dick Towers.

"We'll house and feed the boys at Little Grassy and the only thing the boys have to do is train and work out," Towers said.

The Salukis previous practice site was the Miami Beach east of the Arena. But the main practice field is being resodded and the new training camp will give the coach more privacy and an atmosphere conducive to the task at hand, preparing for the opening of the 1967 camp.

In preparation for the camp, Towers and assistant coach Naughton will be guests of the Green Bay Packers, professional football's No. 1 team, this Friday night.

"It has a standing invitation from Coach Lambech, who is a very good friend of mine, to visit the Packers' camp"

and we'll probably utilize that opportunity into summer before the All-Star game," Towers said.

He is hoping to gain a few tips and ideas for the SIU training camp.

Towers said the coaching staff would issue invitations to several faculty members and administrators to visit the camp for a day or two and observe drills.

Towers would like to climax the drills with an intra­school game and a barbecue.

Bob Bendon, a sophomore and Joe Lente appear to have gone the way of Agnew.

Saunders will retention for readmission this summer. Larry Cox, a defensive backfield starter, and Terry Cottham, at tackle, will have to make grades this summer in order to remain eligible.

"It is very important to us that these two boys remain eligible," said Towers.

Ed Wallser, another sophomore, is also in summer school outside of necessity. Towers and his staff have constructed several large charts to keep track of the incoming freshmen, this year's recruiting crop. They make sure every athlete enrolled properly and has taken care of all his requirements with the University before he rep for practices.

Kristoff Wins in Pan-Am Trials

Larry Kristoff is set at it again in the world of wrestling. Kristoff, former SIU heavyweight wrestler and a member of the 1964 United States Olympic team, defeated Cerley Culp 7-4 in their opening match. At No. 1, U. S. Pan American Games team.

The win is from Arizona State and is the NCAA heavyweight championship as the green hand of Culp Friday night in St. Cloud, Minn., to win the berth on the team.

The two starred a best two out of three series for the berth Wednesday night in Minnesota. A victory by Kristoff.

Quarterback

‘On the Look’ For Ace Deal

MIAMI, Fla. (AP) — George Mura, the disconsolate quarterback of the San Francisco 49ers, still has hopes that the National Football League club will deal him off to a team that will have a better chance of making a Super Bowl appearance.

General Manager Jack Whipple, who is the 49ers left town Tuesday with his mission, the signing of Mura, still unconfirmed.

"I'm thinking of going to camp unsigned and see what happens," Mura said. "There are three quarterbacks and I think they might trade one of us. I don't want to sit around again, I want to play."

For about six years, Mura, former All American from the University of Oklahoma, has been an undeserved of John Brodie. Now the 49ers also have the Heisman Trophy winner, Florida quarterback, Steve Spurrier.

"I've never had a real shot at the No. 1 job," Mura said. "I played least last year than the year before."

White said he thought Mura 'was among the best, but we don't think we can have the possibility of a quarterback trade.

Boxer to Defend Title

NEW YORK (AP) — Carlos Ortiz will defend the world lightweight boxing championship held in the former champion Ismael Laguna of Panama in New York's first outdoor fight of the season, Wednesday, Aug. 16 at Shea Stadium.

Harry Markson, managing director of boxing at Madison Square Garden, said Thursday that Ork, the 30-year-old champion who was born in Puerto Rico, but lives in New York, will receive a guarantee of $55,000, the largest guarantee ever given a fighter in the 133-pound division.

We'll house and feed the boys at Little Grassy and the only thing the boys have to do is train and work out," Towers said.

PGA, Professional Golfers Settle Dispute

INDIANAPOLIS, Ind. (AP) — The touring pros and the Professional Golfers Association Thursday settled a dispute that had threatened the annual PGA tournament.

Dan Sikes, chairman of the touring pro committee, said the executive committee on the PGA agreed to give up its veto power over any action taken by the tournament committee at a meeting attended by all eight members.

The tournament committee is made up of four players and four PGA executives.

Sikes said the PGA will retain the veto power only where the tournament committee acts with fewer than eight members present.

In view of all this, the players agreed to honor commitments for the balance of the 1967 season, including the PGA and Ryder Cup matches.

The agreement also was announced in Palm Beach, Fla., by PGA President Max Elbin.

Sikes said the executive committee will not overrule any decision by the advisory committee, which will be appointed to arbitrate any ties on the tournament committee.

"However, the players still are not completely satisfied with the present arrangement concerning their phase of the tournament," Sikes said in a statement "and will go to the national convention in January to work out the remaining areas of executive committee veto power.

"Further," he added, "the players will take up consideration of the membership of the tournament committee at their meeting. They reiterated they will abide by the present league contract on the tournament committee for the balance of this year only. They have made no commitment for next year or pending the annual convention and whatever action is taken there.

The tournament players had threatened to pull the Hope Classic, a tournament at Denver July 20-21 unless the executive committee gave up its veto power.

The executive committee turned down the request by the players of a proposed Frank Sinatra $175,000 tournament, saying it too closely resembles the Bob Hope Desert Classic.

Off-Season Tasks Keep Coaches Busy

By Tom Wood

Does an entire intercollegiate program close shop for the summer when the athletes head for home or some non-school competition? No, at least not at Southern. SIU coaches may not be as busy as they were during their particular sport's season, but they don't gather much moss either.

Most of the coaches are kept busy during the summer months by full-time teaching assignments, Each has an assignment within his particular sport also.

Some coaches, like Bill Meade, gymnastics, and Ray Essick, swimming, are training athletes in one-a-day workouts for the Pan American Games or some other summer competition in sight, or just to keep them in shape until fall.

Women's gymnastic coach Herb Vogel has his team working out twice daily, six days a week. Several of the girls Salukis have a shot at a Pan Am position. Vogel will travel to Minneapolis this month for the trials along with his girls.

He will also join Meade and basketball Coach Jack Hartman on the clinic and training camp tour. Meade and Vogel will be instructing.

Activities Board to Sponsor Summer Tournament

This year for the first time SIU will hold a Summer Tournament Week. Unlike regular tournament weeks, it is not sponsored by the Association of College Unions-International, according to Wayne Ericson of the Student Activities Office.

Events for the week, July 16 through 21, will be bowling, bridge, billiards, chess, table tennis, and ping-pong.

This tournament is open to all interested SIU students who have at least a three-point grade average. The purpose of the tournament is to provide an opportunity for students to compete. Girls are invited, and there will be men's and women's divisions, Ericson said.

The games will be run according to Association Tournament Rules. The tournament, however, will not have regional or sectional eliminations as did previous tournaments, he continued. All games will be played in the Olympic Room of the University Center except bowling, which will be in the bowling alley.

Speaking of keeping in touch, football coach Dick Tower said he and his assistant write the members of the 1967 Saluki grid squad weekly and have set up an extensive workout program utilizing the mails to chart progress on the athletes.

"Each boy tabulates his routine and the weight he has gained or lost during the past week. We keep in touch with them all, even the incoming freshmen, on a weekly basis," Towers said.

Assistant Ron Marciniak is in charge of the program. Another assistant, Pat Naugh, is in charge of equipment orders and inventory, in addition to planning the upcoming events for fall with the other coaches.

Track coach Lew Hartzog is preparing Oscar Moore for the Pan Am trials in the three-mile event and finishing up his recruiting program. Hartzog also admitted to "a lot of horseback riding and keeping the farm in shape, and even a little golf now and then."

Low Quake Toll

Eartquakes in the United States have claimed only 1,500 persons since settlement. Almost half the victims perished in the 1906 San Francisco disaster.
