Black faculty, staff meet

Group claims itself black representative

By John D. Towns
Daily Egyptian Special Writer

The Black Faculty and Staff Council adopted a resolution Thursday declaring itself representative of the University’s black teachers, staff members and employees.

The resolution was adopted at a meeting of about 80 black faculty and staff members and non-academic employees.

It came in response to a request by Chancellor Robert G. Layser that the GFC provide evidence of the scope of its representation of black people on the campus. Members of the council’s ad hoc executive committee had met with the chancellor last week.

After the meeting, Richard Hayes, chairman of the GFC, said the University has 108 black faculty and staff members and 106 non-academic employees. Hayes explained that all blacks on the faculty and staff employed by SIU are members of the council, which was organized in April. GFC member G. Edward Garrett, professor of history, is serving as chairman of the executive committee.

The resolution reads, “Whereas there exists a need on the Carbondale campus of SIU for representatives of the University for the betterment of the campus among the members of the black community of said institution since no campus constitutes a black community, and whereas it is necessary to demonstrate that there exists general support among the non-black students in order that the Black University Community may actively participate in the decision making of said institution, and whereas the stated general policy of the Black Faculty and Staff Council of the Carbondale campus of Southern Illinois University, in order to serve as a vehicle to provide black representation, influence, and input into the University system on behalf of the Black University Community, “Be it resolved that the Black University Community assembled this date, June 3, 1971, grants the Black Faculty and Staff Council the authorization to address itself, in behalf of the Black University Community toward the goals of the general policy statement.

In other council business, five additional members were selected to serve on the ad hoc executive committee increasing the membership to 17. A meeting was scheduled for the council’s operational papers committee.

The council agreed to design a comprehensive program for supportive services for black students in response to the University’s request. According to Hayes, James King and Abdul Makk residents of Carbondale, originally submitted the request to the University.

A primary concern in this regard is the ongoing dissemination of funds through the Student Activities and Financial Assistance Office.” Hayes said.

Hayes said all meetings of the Black Faculty and Staff Council and its committees will be announced in the Daily Egyptian and are open to the public.

Student Senate accepts proposal to allocate campus groups $325,000

By Chuck Hutchcraft
Daily Egyptian Staff Writer

The Student Senate Wednesday accepted Finance Committee’s proposal for allocating $325,000 among 55 campus organizations.

The proposal, although amended, still met with opposition from some campus organizations which held that they were not given enough money.

Final action on the Senate’s proposal will come upon the IRS Board of Trustees. President Robert G. Layser’s proposal fee structure which lowers the Activity Fee from $50.50 to $12.50.

Onge Layser’s proposal is approved, a joint committee composed of the Senate and the Graduate Student Council (GSC) will work on a joint budget to present to the board.

This committee, outlined in Layser’s proposal, will be chaired by a representative of the senator and the Black Student Union (BSU) representatives, which had requested $20,000, said the Senator’s allocation of $2,000 to the BSU did nothing but further alienate black and white students from each other.

The Senate amended the proposal later to increase the BSU allocation to $32,500 after cutting appropriations to some other groups.

This amount was still short of the $32,750 which the BSU representatives said they would agree to.

Cuts that were made were $1,000 from Intramurals, $1,000 from Forensics and the Parachute Club, and $2,000 from Mirror, a student evaluation program of teachers.

Louis Martin, a BSU representative and Eastside dorm senator, said the BSU’s $32,750 request was “realistic in light of the student government’s financial crisis.”

Separate grad student budget possible by fall

By Chuck Hutchcraft
Daily Egyptian Staff Writer

The BSU, Martin said, was asking for a “greater commitment of the University community” to its black students.

Allusion between black and white on campus, he said, was not getting better. Suggestions by some senators saying the BSU’s second request would make the organization more autonomous from the student government “not true,” Martin said.

“Are giving anyone $32,500 make them autonomous?” Martin asked.

“The $1,000 will,” he said.

Martin said the BSU needed more money for service projects it has planned. The projects he mentioned were counseling, tutoring and self-help services, and entertainment programs for black students.

He refuted several senators’ arguments that such entertainment could be attained through the Student Government Activities Council, saying the SGAC programs has not been appealing to black students in the past and that he couldn’t see that they would in the future.

Blame aimed at blacks for not joining SGAC is unjustified, Martin said.

Separate activities budget for grad students may begin fall quarter

By Rich Davis
Daily Egyptian Staff Writer

There is a distinct possibility that graduate students will have a separate budget for activities beginning fall quarter.

The budget would probably be in the general range of $32,000 to $56,000, according to Joe Vinovch, president of the Graduate Student Council (GSC).

The Fee Study Committee has recommended that the student activity fee be lowered from $38.50 to $36 for students carrying six or more hours, with the Student Senate allocating undergraduate student activity fees and the GSC handling allocation of graduate student activity funds.

Vinovch says the recommendation has the endorsement of all campus constituencies and the change would be his first step in taking care of graduate students.

Vinovch said that with the Student Senate allocating funds for all student activities, there are some activities in which graduate students do not participate. There are also funded activities for graduate students that are not open to undergraduate students, he said.

The change in allocating the funds would be "more equitable," Vinovch said. The change would go into effect next year for both undergraduate and graduate students.

Vinovch did not say what this "new sense of responsibility and authority" would be, saying that he would be able to provide more information to students and graduate students by the time that he took office.

Committee proposal okayed

55 campus groups to receive funds

(Washington, D.C.) - Tough negotiations between Hoffa and McCarthey may be headed for a 14-year end if Hoffa retires as teamster boss.

Hoffa kept up his union's grudge during his last four years in prison, general vice president Frank E. Fitzsimmons, 61, announced on Thursday and said he would run next month to succeed Hoffa with the backing of the union's ruling top echelon.

Hoffa's tempestuous role was marked by simmering with Congress, federal courts, the late President John F. Kennedy, and other labor chieftains from 1957 until jury tampering and mail fraud charges behind bars in 1966, where he had sullen mien and worked out his phenomenal muscularity with years of weightlifting and other physical exercise in the Leavenworth penitentiary gym. The prison terms total 13 years.

Fitzsimmons, a union veteran, said Hoffa was a good man, a good union boss, and a good union leader.

"Unofficial reports had said that a number of groups have been approved for funding," Vinovch said, "and 55 groups requested a total of $600,000. Projected Activity Fee funds will be available for next year are $325,000."

After the Senate voted against the Hoffa second request, a GSC representative told the Senate that since it had already been rejected unknowingly, the same treatment could be expected in return.

Police say no suspects found in shooting incident

District Attorney Leo R. S. Peters said that although a student was arrested Wednesday, he was being held for violation of the Motor Vehicle Anti-Trust Act and was not a suspect in the shooting.

"The bullet found on the floor after the incident came from a .22-caliber automatic, police said."

SFPD Capt. John Garber later said that the investigation was apparently an attempt to frighten someone in the classroom and was not intended to hurt anyone.

No expected delays seen for hearing

(San Francisco) - Hoffa retires as teamster boss.

Police say no suspects found in shooting incident

Police said that although a student was arrested Wednesday, he was being held for violation of the Motor Vehicle Anti-Trust Act and was not a suspect in the shooting.

"The bullet found on the floor after the incident came from a .22-caliber automatic, police said."

SFPD Capt. John Garber later said that the investigation was apparently an attempt to frighten someone in the classroom and was not intended to hurt anyone.

Inquest date into death of student still undecided

Jackson County Coroner Barry A. ? Flynn said Thursday that a man who died in March will be considered as having been arrested in the shooting Wednesday.

"The investigation is continuing," Flynn said.

"The investigation is continuing," Flynn said.

WASHINGTON (AP) - Congress approves new Action agency

WIDB general manager charges investigators with 'muckracking'

WASHINGTON (AP) - Congress gave its approval Thursday to a new, consolidated volunteer agency, Action, that will be the closest the legislators will watch closely the Nixon administration's treatment of its two largest programs, Peace Corps and VISTA.

The legislation is any attempt to emasculate or otherwise downgrade the programs which are being included under Action, and in an attempt to substitute quantity for quality in the number of the workers chosen, and the type of work they do, the Congress will be quick to notice and to call upon the agency to fill its promises...said Sen. Harrison B. Williams, D-N.J. Williams said the committee's approval of the proposal in the Senate to President Nixon's proposal to merge the Peace Corps, Volunteers in Green programs to America and six other volunteer service agencies into the new Action agency.

The Senate voted 54 to 49 Thursday against a Wilson resolution to kill the legislation during its consideration of the proposal. Later, House voted 224 to 131 to approve the plan.

The reorganization plan goes into effect July 1.

Suspect in U-Pa. robbery arrested

DFOR (AP) - A fellow Team­

sters Union vice president once

remarked of Frank Edward Fitzsim­

mons: "If you were going to look for a

sly grifter, this fellow is...lively, con­

genial, very warm—you'd pick a

big, but without the giant's presence, the peace is all that is left. Fitzsimmons said "Absolutely none." But others in the union hierarchy say there has been at least one major conflict, and a local has been looser and more informal than under Hoffa. At the Fitzsimmons has a round face,

and gray hair, grey eyes, and bot­
toned by a decided limp. His walk is graceful. He wears glasses. His image of a fellow union leader may have slipped a little at a news conference at the convention, but has maintained the image of a capable, tough and efficient executive.

A reporter suggested in a question that the Fitzsimmons had made the mistake, Hoffa still was running the union from jail.

The union as general vice president in the event Hoffa went to jail. Fitz has been in charge since mid-1966.

Assembled at that time if there would be any union policy changes under him. Fitzsimmons said "Absolutely none." Campus safety officer tries to stop accidents

By Keith Kreupper
Student Writer

Oliver K. Halderson has a tough job at SIU. He is the University Safety Officer. His job is to prevent accidents.

Halderson has been at the University since 1973 and knows how and where accidents happen. According to Halderson, "The biggest problem we face is that most students believe all construction sites on campus are safe." He said, "There are always so many things being built or torn down that this is an endless problem."

Halderson has the responsibility to prevent and correct fire hazards, traffic hazards, and other dangers that could injure the inattentive student.

"When I go to the fire marshal's office, he tells me most accidents and hazardous obstacles on campus are caused by students who are not on sidewalks," Halderson said.

Women Demos to meet Monday

The first summer meeting of the Jackson County Democratic Leadership Organization will be held at 7:30 p.m. Monday in the County Court House in Maple Hill.

The speaker at the meeting will be George E. King, Jackson County Democratic chairman.

By W. W. Smith

The convicts who have spent several years in prison might find it difficult to adjust to society if a worse fate for therapy programs used in the penal system.

One correction and rehabilitation program, known as "Asklepiades," named after the Greek god of medicine, has been in the development stage since 1969 at the Federal Penitentiary in Marion.

It is designed to help the inmate recognize the potential and learn to deal with life as he can even- tually make it better.

Under the supervision of Dr. Martin O. Gruder, staff psychiatrist and chief of health programs, the program aids the men at Marion an opportunity to learn better ways of relating to others.

One method of psychotherapy used in the "Asklepiades" program is known as Transactional Analysis (TA), a quickly employable set of concepts and techniques for motivating constructive and rational behavior.

"Asklepiades" program also provides training in psychology or rehabilitation. Some are members of Rehabilitation 101 which is taught at SIU by Dr. Gruder, associate professor of rehabilitation.

Transactional Analysis identifies those emotional and behavioral states through which people deal with or transact with each other.

A person may act as he or his parents acted to those acting on him. As he acted as a child or as an adult.

One major characteristic of TA is that it emphasizes treatment through education.

"We have a total learning environment which is a human situation that is directed toward the growth, maturation, and increased knowledge and competence of all the members in the TA group," Dr. Gruder said.

Another major method used in the "Asklepiades" program was adapted from the "System Games." A dozen people, for $2 or less, get together to play this game.

The game, Dr. Gruder said, "is a form of extremely vigorous confrontation in which sanity is the only defense.

"There is total involvement. All members of the group are participants and are observed. Transac- tional analysis between them occur within every possible context and moment."

"Any high-level violence, threat of violence or mind-altering chemicals (drugs) are allowed," said Dr. Gruder. "It is used regularly for therapy. It helps to settle arguments, relieve tensions and in- crease the emotional strength of the inmates, according to Dr. Gruder."

When a person first enters the "Asklepiades" program, he is made to realize he is a "loser" and will continue being a "loser" until he begins mastering the world by developing new patterns of behavior.

The inmate who becomes interested in "Asklepiades" participates in several of the "System Games."

As the individual learns about himself and his emotions from the games, and if he so desires, he may continue in the program. He would then be moved to the special cell block.

Those members in the program who achieve the most knowledge, competence and status serve as "role models" to those beneath them, according to Dr. Gruder.

A complete training program is available for those men who desire to become members of professional transactional analysts on a professional level.

The effectiveness of the "Asklepiades" program has been determined by several psychological tests.

The results of these tests, taken every six months, have shown the marked decreases in anxiety levels and marked in-
Grad school releases names

57 students seek Ph.D. degree

Fifty-seven doctoral students at IU are candidates for the Ph.D. degree at the spring commencement program June 1 at the IU Arena.

The IU Graduate School, in releasing names of candidates, emphasized that the degree in education, eight in speech, five in chemistry, four in each of journalism, physiology and psychology, three each in geography and government, two each in mathematics and economics, and one each in botany, English, home economics, education, sociology, microbiology and philosophy.

The candidates include:

Chemistry—Cari Anthony Jensen, Enfield; Terrence Richard Johnson, Green View Springs, Fla.; James M. Semdrey, Madison City, Ind.; Burton Philip Kostenskys, Cincinnati, Ohio; Ashar Saray, Hasid, Israel.

Journalism—Michael B. Shelly, Bloomington; Paul Michael Ryan, San Angelo, Texas; Gary Raymond Call, Oskosh, Wis.; C. Edward Wilson, London, Ontario.

Philosophy—Larry Valene Gabriel, Marion; Manchelle; Margaret Jean Spraggins, Bloomington; Robert S. Jakupcak, West Chicago; John M. Black, Jr., Paris, Ky.; Gerald Wendell Runts, Sussex, Ore.

Geography—Raymundo Apolinar Yelpeja, Caledonia, Calif.; James C. Alberich, Portland, Ore.; Paul Clyde Bartter III, Memphis, Tenn.

Government—Jonne M. Miller, Murphysboro; Richard Lawrence Baldman, Valparaiso, Ind.; Selinda Jakubek Villon Bean, Prairie View, Texas.

Mathematics—William Frederick Lindgren, Rapid City, S.D.; John Spencer Shaw, Tampa, Texas.

Economics—Abele Akther Zuberi, Alhag, India; Salvador Cruz Umana, Sahaba, Bahamas; Baldrand, Philippines.

Botany—Donald Gene Rhodes, Kinston, La.

MOVE to honor volunteers

MOVE Mobilization of Volunteer Effort is inviting student volunteers to participate in a similar to student volunteers at a Volunteer Recognition Picnic from 1 to 5 p.m. Sunday at Lake-on-the-Campus near area six. According to David  

Rayfield, coordinator of MOVE  

Rayfield said it is MOVE's way of staying thanks to the students who have worked in various projects throughout the year. Food, various recreational activities and prizes are being organized for the picnic.

"All kinds of things including working as an electronic assembler in someone's home and driving in a taxi," she said. She received unemploy-  

ment insurance and disability  

and I just freaked out.

"I can't do the anything because of my emotional state. I'm going to the Mental Health Service in Santa Rosa almost every day, but it doesn't help me much.

"I don't eat right. I don't even feel like it, so I'm always tired and work, and the welfare people give a very small amount to eat and get my medications.

"The only money I get is 82  

from County Aid. I can't  

exist on this much, but no one cares if I should fade away, she added. Move officials declined to say whether she was on welfare or not.

"I should probably put a cap on the letter to the San Francisco Chronicle.

Her father, reached in Newport Beach, said, "She was born around the first of the year. She was sick with hepatitis and then she went back to San Francisco and I haven't heard much about her since.

"I guess she's had some problems, he said, "I think she's had her own problems and she's going to have to solve them.

Nixon's 'freaked out' cousin  

writes him for welfare aid

COTATI, Calif. (AP)—President Nixon's 24-year-old second cousin, Kathy Timblelake has written a letter to the chief executive asking if he can help her with welfare money.

"My life is becoming harder and harder to bear. I'm not sure I can go on much longer. I need help with welfare money," she wrote.

Miss Timblelake is the daughter of Mrs. George Timblelake of Cotati, a first cousin of the President on the Milhoun side of the family.

About six months ago, she said, she came to Cotati, a small town in the Sonoma County wine country north of San Francisco, after doing

D.E. Classified Ads.

Dear Student:

Congratulations to you who are completing your education. Your achievement exemplifies sacrifice and determination and the wisdom of a favorable decision. As you weigh your future and new career, one of your major decisions will be dependable and economical transportation.

We at Epp's would like to be a part of your future. Arrangements have been made with a local bank to provide a new Volkswagen for you for a modest down payment. We believe we can lend financing for any graduate who has a firm job offer or a signed contract. Also, this may include a 90-day deferred first payment thus permitting you to drive until your income starts.

What are the benefits? As a graduate your funds will be needed for transition. Our plan will help meet your needs by providing dependable and economical transportation in the interim. This is particularly important to new teachers who do not start on the job until September.

Also, Volkswagen still has the two year. 12,000 mile warranty.

For complete details, visit us. Ask for one of our salesmen, Chuck Bryant, Lee Jones or Sam Ritch.

In closing, we would appreciate the opportunity to serve you. We offer our congratulations and our best wishes for continued success in your future endeavors.  

-Sincerely and sincerely,

May 1971
What happened to the party?

Where was the party this spring? Did someone forgot to mail the invitations for the downtown bash?

Remember the days when some people decided a gaid affair in the Carbondale streets would be the "in" thing.

But that was a year ago. Spring, 1971, says goodbye to an era.

Disorder and chains were no longer prevalent. Learning and order appear to have converged on a better way could be seen in the sun overwashed, art-hung, stairway conceptual design of Alternative 71.

Alternative 71 would celebrate and explore the potentials of the University and the community, its steering committee had said. It was a series of smaller gatherings put together in a constructive manner.

Alternative 71 is now history, in case you were unaware of the happenings. The 17-day fest ended May 22.

If you listened to the festivities it will say it accomplished very little, many events were poorly attended and the financial... deficits were not worth the spiritual gams.

Opponents of the activities will say that softball games proved only that SLU would fare better with a 12-inch softball and Freks play better with a 16-inch hat.

Opponents won’t mention that this evented an outlet by which the Carbondale and SIU police forces battled constrictively with students. It was a worthwhile attempt to humanize members of the two sides. Anyone wanting to abolish Alternative 71 before it gets started will contend that the great majority of instructors and townpeople-in addition to the apathetic students-simply refused to further the cause by participating.

If you want to abolish future alternatives will fail to point out that the University is a diversified community and many of those who didn’t take part this year didn’t last year either.

One fact cannot be overlooked, however.

This is the final week of scheduled spring classes and SIU has remained open in 1971. It’s early June and school is continuing as it should. Trouble has been at a minimum.

Alternative 71 can’t be given complete credit by any means. Maybe it accounted for the results in only a very minute way.

But two things should not be overlooked when judgment is passed on spring quarter, 1971—the campus remained peaceful and SIU did provide an alternative (for us).
Roth says yes, Lonergan disagrees

By Teresa Hass
Daily Egyptian Staff Writer
Last of three parts

Several management programs and protections could be used in Thompson Woods to improve regeneration of present oak and hickory species—
and keep the woods from being turned into a building or parking lot.

Paul Roth, assistant professor in forestry, said "forestry personnel have been under a lot of fire lately because people think managing a stand of trees means ignoring it. They call not doing anything management.

"You couldn't run any other business that way, and we can't do forestry practices that way either," Roth said. "In Thompson Woods we must start making definite plans for removal of some of the large, dying trees and let some of that regeneration develop. Otherwise, it's all going to come down around our ears at the same time."

"I would like to see them undertake some definite type of management program. In other words, begin to cut and remove some of these larger trees," Roth said. Some planting would be done to replace the trees being cut down.

Roth said he would like to see plant materials native to the area being planted in Thompson Woods, instead of creating a "Frankenstein or a zoo" of trees. This would help keep the woods in its natural state.

Lonergan rejects management

John Lonergan, associate university architect, disagreed. "I don't think a management program should be instituted..." he said. "It is used only to make money, he said, and it isn't natural.

Roth said a complete clear cut would not be necessary in Thompson Woods. Clear cutting involves removing the old trees as a new stand can regenerate.

"The idea of walking into Thompson Woods and do this all at once," he said. "The woods could be divided into four or five sections and one section at a time forested back, perhaps every five years."

"We've run ourselves pretty close to the end of the scale. We should have started a long time ago," Roth said. White oaks and red oaks outlive the black oak, but the black oaks live much longer than the black oak, it might be a good idea to include higher proportions of these species, he said.

"By manipulating the composition of species, we could make it a better woods in the long run," Roth said.

An overpopulation of squirrels has eaten the acorn crop which would let the oak regenerate naturally. Thompson Woods, three and four inch diameter trees could be planted to replace the trees which are cut out, Roth said. The University has the equipment and the facilities to relocate these large trees. He said the squirrels could be trapped and moved to other areas.

Work could be done in sections

Roth suggested working on Thompson Woods in sections. This wouldn't give the impression that the woods was being wiped out. "If we were to go in there and take out all of the large trees within a relatively short period of time, we would see a lot of agitation for cleaning up the whole thing off and that would be the end of Thompson Woods," Roth said.

When asked who would do the managing in Thompson Woods—the forestry department or persons outside of the University—Roth said he assumed the counsel or advice of the forestry department would be used but another unit, such as the Physical Plant, would do the actual work.

"We don't have the equipment to do that kind of work," he said. The physical plant has a landscape crew on campus.

Roth said some of the old decaying trees that have fallen in Thompson Woods do contain merchantable wood. "I guess a forester it's always kind of painful to see good wood rotting on the ground."

Persons studying art could use the wood for sculpture, he said, or it could be burned in some of the fireplace campus. Roth also suggested making a cross section of the stem and tracing it chronologically, dating the history of the tree on it.

Lonergan, however, said that dying trees become food for the remaining trees. He would prefer to see the wood used to improve soil conditions, rather than as firewood.

Red, white oaks deserve help

Another thing that can be done in Thompson Woods, Roth said, is to play with the so-called natural fires. Since the red oak and white oak live much longer than the black oak, it might be a good idea to include higher proportions of these species, he said.

"By manipulating the composition of species, we could make it a better woods in the long run," Roth said.

Most trees in Thompson Woods are approximately the same age, Roth said. "We probably should convert the stand to an uneven-aged forest in an uneven situation every few years we might lose a tree or two, here and there, but we wouldn't be faced with what we now have." Thompson Woods also has an established growth of hickory and many of the upland forest poison ivy, Roth said. This underbrush can easily suppress young trees trying to establish themselves.

One way to get rid of the honeysuckle and poison ivy would be to spray with roundup. "Some of the herbicides are very specific. They don't harm mammalian life of any kind. They only kill certain plants. It was put them on at the right time and in the right concentration, it's like having your toenails out. There is no hazard at all."

Newer trees provide shade

Planting trees two, three and four inches in diameter and 15 to 25 feet tall would also get rid of the underbrush, Roth said. Within a few years the trees would be tall enough to shade out a lot of this "undesirable" competition.

Another measure Roth said could be taken would be to mix in more of the native flowering species like dogwood and redbud with the larger trees now in the woods. This, he said, could be done without threatening the "naturalness" of the woods.

Roth suggested that perhaps a section of Thompson Woods could be left untouched to see what would happen.

"But I can't see letting the whole woods do that because I'm afraid we're going to lose it," Roth said. "We have talked to President Etherton, Delyw W. Morris and Morris' assistant Paul Morrell about the problems which are leading to a "crisis situation."

Morrell said he doubted that the people who are worried about trees being cut down in Thompson Woods have even thought about the consequences of some trees not being cut down.

"You have to look at tree removal there as a possibility and not a negative approach to solving the situation," Roth said.

Morriss seems amenable

Roth said he thinks Morris and particularly Morrell seem willing to listen to some ideas. It might be a good idea, Roth said, to set up a committee to work on a plan for Thompson Woods. The committee would include persons from the administration, the architect's office and the forestry department plus some students.

Roth said that when he talked to Morrell about restrictions on Thompson Woods, Morrell only comment was to the effect that there was an additional agreement that the woods would be preserved in its natural state.

"Morris is very interested in forestry, conservation and preservation," Roth said. "I think I look at him as much of a preservationist than as a conservationist."

"I think it would be very convincing President Morrell that we should go out and do very much cutting in Thompson Woods unless we build a really strong case in which I think we probably could," Roth said.

"I would say that the original landowners and President Morrell are the reasons we have Thompson Woods right now. Otherwise, I'm sure it would be gone," he added.

 Lonergan puts protection plan

Lonergan said he is trying to get the Board of Trustees to accept a "green belt" master plan, which would include Thompson Woods and the natural areas around Lake-on-the-Campus. This plan would show that the "green belt area" is not to be invaded by any person in building without approval of the Board of Trustees. He said this would be done to protect the woods from the development and parking list.

Lonergan said he has three priorities in Thompson Woods. The first one is to protect the area from becoming a building or a parking lot. The second priority is to extend the area. The third priority is to protect the woods or let nature take its course.

"I'm sure that the people who owned the woods to the University originally would much rather see us do something with it that would preserve the woods—
or work at least some protection in there than see it deteriorate to a point where we might lose it altogether," he said.

"I think a lot of people take trees for granted," he added. "But when you realize that a tree has gone through four or five generations of people, then it means something."

Books sought for S. Korea

How would you like to help self-defense measures with their educational programs? It's very easy and important--you can give any money.

The World Service Organization, headed by John D. Anderson, a professor of political science at the University of Georgia, has a current project to help the University of Korea meet the immediate need of gaining 16,000 books for their libraries.

Any books— classics, recent textbooks, obsolete textbooks are longer needed—can be brought to the University of Korea within June 11, according to Dr. C. Horton, dean of the College of Commerce. The contributions are unable to be brought in person because of the current arrangements will be made to pick them up.

For further information call the Speech Department, 4607.

Autocross run set for Sunday

The Grand Touring Auto Club will sponsor an autocross Sunday in the SUA parking lot, according to John B. Brennan, chairman of the group.

Registration for the event will begin at noon, with the autocross starting at 1 p.m. The event will conclude at 5 p.m. The registration fee is $2 per car, and the autocross is open to anyone. The event will be held rain or shine.

Schipps bold honor reception

Professor and Mrs. Paul Arthur Schipps will hold a reception Friday in their home at 931 North Drive to honor Professor and Mrs. W. M. Frels. Frels, who is chancellor of the University of Texas, will be the guest of honor.

The reception, for all members of the University, will be held from 3 to 5 p.m. The reception is open to all guests.

New way found to repair organs

HUNTSVILLE, Tenn. (AP) — Researchers at the University of Alabama at Huntsville have developed a technique that can repair damaged organs using a laboratory mill—sawing through the damaged area and then replacing it with new tissue grown in the laboratory.

The technique, called tissue-engineering, is being tested on pigs and may one day be used to repair human organs. The researchers say the method could revolutionize medicine by providing a way to repair damaged organs.

The researchers, led by Dr. Michael Gurtner, say they have successfully used the technique to repair damaged hearts in pigs. They have also used the method to repair damaged tracheas and bladders.

The researchers say the technique could be used to repair organs that have been damaged by disease or injury, such as heart, liver, and kidney.

The researchers say the technique could one day be used to repair damaged organs in humans, but more research is needed to determine its safety and effectiveness.

The researchers say the technique could be used to repair damaged organs in humans, but more research is needed to determine its safety and effectiveness.

MINUTES OF THE MEETING OF THE PROVISIONAL UNIVERSITY SENATE

Carbondale May 17 1971

The meeting of the University Senate (Provisional) was called to order at 10 a.m. on May 17, 1971, in the Board Room of the University Center. The meetings of the University Senate (Provisional) were called to order at 10 a.m. on May 17, 1971, in the Board Room of the University Center. The following members were absent: Larry Judson, Joe Knox, Raymond Yarbrough.

Agenda Item No. 1: Minutes of the meeting of May 10, 1971

William Simonson opened the meeting by calling for the approval of the minutes of the meeting of May 10, 1971. After lengthy discussion, the minutes were approved.

Agenda Item No. 2: Report of the Internal Affairs Committee

Earle Stilts, chairman of the University Senate, reported that the committee had reviewed and approved the minutes of the previous meeting. The meeting was recessed.

Agenda Item No. 3: Report of the Governance Committee

Mr. Nallness, chairman of the Governance Committee, reported that the committee had reviewed and approved the minutes of the previous meeting. The meeting was recessed.

The meeting adjourned at approximately 9:15 p.m.
Hilliard collects beer cans but can 'barley' keep up

By Dale Frilka
Staff Writer

Sam Hilliard, whose hobby is collecting beer cans, says that if you are really serious about collecting beer cans it can be a life-time hobby.

Hilliard, an assistant professor in the Department of Geography, began collecting different beer cans as a graduate student at the University of Wisconsin in Madison after seeing a collection of a fellow graduate student. That was in the fall of 1981. His collection now totals over 400 cans.

The collection includes cans from across the United States, Canada, Mexico, Puerto Rico, Germany, Japan, Australia, and South Africa. Although Hilliard has been to many of these places and has picked up cans himself, many of the cans have been brought back or sent to him by friends.

Each can is different. The majority pertain to a certain beer or brewery, some of which are now defunct. Numerous cans, however, reflect changes in the cans, labels or even ownership.

Hilliard had collected to the point where two cans may look exactly the same in color, style and name, but differ because the name of the brewery or its location is different. "This shows that the beer has been sold to another company and is helpful in deducing the approximate age of the can," he said.

The oldest can in the collection is Memmimnie, a can type can, which dates back to before World War II, Hilliard said.

Hilliard mainly collects 12-ounce cans, but does have a number of other sizes which range from eight ounces to the 16-ounce "Tall Boy."

Adviser named to help plan new SIU law school

An adviser has been appointed by the Association of American Law Schools (AALS) to assist SIU in planning its new law school at Carbondale.

Edward L. Barrett, Jr., dean of law at the University of California at Davis, has been named by Ronald H. McNeil, chairman of the AALS accreditation committee, to serve on continuing basis as adviser until SIU's first law class is graduated.

Barrett's experience in overseeing the establishment of law schools in Davis, which opened in 1965, should be especially helpful to SIU, according to Robert H. Dresher, SIU's legal education program development committee.

Dresher said Barrett was appointed last fall when the SIU system was just beginning to work on the problem of how to sponsor a law school. This spring, after a two-week visit to SIU, he concurred that SIU was ready to proceed with a law school.
Summer Theater to show both dramas and musicals

By Cathy Spenel
Daily Egyptian Staff Writer

Summer theaters of SIU will be treated to a combined season of dramas and musicals by the Summer Theater this year.

For the first time in Summer Theater history, the Summer Theater will sponsor both the Summer Music Theater and the Southern Players, which will perform separately on alternate weekends through the summer.

The Southern Players, an acting group of SIU students, will be under the direction of Archbald McLeod, chairman of the Department of Theater. Williams Taylor, associate professor of music, will direct the Summer Music Theater Company, a group of students and professionals.

Carole Richardson, publicity director for the Summer Theater, said all productions will be staged in the University Theater in the Communications Building.

A new show will be presented on each of eight weekends. The playbill includes "Tobacco Road" (July 8-11), "Fiddler on the Roof" (July 15-18), "The Crucible" (July 22-25), "Street Scene" (July 30-August 1), "You Can't Take It With You" (August 5-8), "Guys and Dolls" (August 13-16), "Pajama Game" (August 20-23), and "Camelot" (August 28-30).

"Tobacco Road," a drama based on the novel by John O'Hara, and "Fiddler on the Roof," a Broadway musical set in Tsarist Russia, are two of the most popular plays included in the summer season.

Summer Theater tickets will be available through theSIU Department of Theater.

SAIGON (AP) - A cease-fire went into effect Friday along a section of the demilitarized zone south of Saigon. Nineteen American prisoners were wounded North Vietnamese prisoners, it said, and 21 were going on to South Vietnam for medical treatment.

There was no certain that North Vietnamese prisoners were going to cease fire. It is known by South Vietnam's claim that only 150 of 250 prisoners questioned by the American forces were released from the demilitarized zone.

The North Vietnamese prisoners were from the first group of 160 eligible to cease fire. The operation was not affected by the cease-fire, as the North Vietnamese prisoners in the demilitarized zone were waiting for the cease-fire to be announced.

State Senate blocks election coverage bill

SPRINGFIELD, Ill. (AP) - The Illinois Senate blocked efforts Thursday to discharge from committee legislation to permit newsmen to cover elections, counting, and tabulating of votes in any election.

The measure, defeated and held over by the Senate Rules Committee, would have permitted the media to cover elections. It was defeated, 15-23, on a cloture vote to end debate.

SIU seeks help

Firm to recruit chancellor

A Chicago firm specializing in recruiting academic executives has been hired to find a chancellor for the Carbondale campus, according to Richard Qualman, chairman of the Board of Trustee chancellor selection committee.

The firm, Richard Qualman and Associates, will act as consultant to high education institutions. The president of the firm, Richard Qualman, is a new campus conferring with SIU personnel.

Elliott said the work of the chancellor selection screening committee is appreciated, but "we feel it is necessary to carry the search further before making a final decision." He said although Qualman has been hired to assist the Board's decision, the University's faculty, students and nonacademic personnel will be "heavily involved in the selection process."

The committee retained Qualman in order to take advantage of his experience in university executive personnel recruitment and in order to move the selection process along as rapidly as possible, Elliott said.

"The selection committee, with concurrence of the Board of Trustees, is extending the search for a new chancellor in order to make certain that SIU has the kind of superb leadership which it needs and deserves," Elliott said.

Members of the selection committee include Dr. Martin Van Brown of Carbondale and William W. Allen of Bloomington, and Elliott.

Qualman was formerly with the law faculty at Indiana University and with the law school at Indiana University and with the law school at Indiana University.

5 plead guilty to drug charges

Five persons, three of them SIU students, have pleaded guilty and been fined Wednesday totaling $2,500 resulting from Jackson County Circuit Court grand jury indictments. The indictments came from the large-scale drug raid conducted by the Illinois Bureau of Investigation April 30.

All five pleaded guilty to reduced charges.

Philip D. Weaver, 21, was fined $500 and put on one-year probation. He pleaded guilty to the charge of sale of stimulant drugs.

Lawyer, an SIU senior from Champaign, was acquitted for sale of a non-narcotic drug as a narcotic drug. Violation of the drug abuse control act and sale of a stimulant drug.

Paul Pitzer, 21, was fined $500 plus costs and put on two years' probation. He pleaded guilty to the charge of possession of less than 2.5 grams of narcotics.

Pitzer was indicted for sale and possession of narcotic drugs.

Mark R. Bolender, 31, was fined $500 plus costs and put on two-year probation. He pleaded guilty to the charge of possession of less than 2.5 grams of marijuana.

Horsley’s efforts on campus bill are turned back

SPRINGFIELD, Ill. (AP) — The Illinois Senate Thursday turned back an effort by Sen. G. William Horsley, R-Springfield, to discharge from committee a bill he said was aimed at bringing campus drinking under more control.

Horsley attempted to turn from the Judiciary Committee a bill which would grant authority to public and private universities to regulate or refuse to register organizations which used university facilities such as student groups. Without registration, groups could not come on campus.

The legislation failed to come out of committee after it appeared to testify in support of it and after a motion to end debate did not get a second. Under its provisions, organizations would have to adhere to rules over view of the government or violent disruption could not be registered.

Before his move to discharge the Democratic-dominated committee, he proposed, Horsley was asked by senators if college presidents in the state did not, in fact, oppose his bill. ."Of course college presidents opposed this," Horsley answered quietly. "It's the kind of people who don't have enough backbone anyway," Horsley said.

The Springfield senator went on to say that the "mostly-mad, wholly-white people who don't have the backbone (the disruptive) to get in line."

Senate President Pro Tem George C. McManus, D-Chicago, and the Horsley measure pass an increase in freedom of assembly.

Republicans supported the Horsley motion, but could muster only a slender selection. Horsley's motion was turned back by a 33-15 vote.

Cigarettes rolled in style

New York (CNN) — Homemade cigarettes are rolling on a line that's a far cry from the usual cigarette factory. A new machine, designed to mimic the rolling of handmade cigarettes, was unveiled today at a press conference in New York City.

The machine, which was developed by a team of engineers and designers, is unlike any other tool currently available. It allows users to create custom-rolled cigarettes with ease and precision, offering a unique and personalized smoking experience.

The technology behind the machine involves a series of rollers that work together to create the desired shape and size of the cigarette. The machine is user-friendly, allowing individuals to adjust the settings according to their preference, ensuring a consistent quality of smoke.

The homemade cigarette rolling machine is designed to promote a healthier and more enjoyable smoking experience. It is a safe and convenient alternative to traditional cigarettes, offering a unique and personalized smoking experience.

Kennedy aides enlist in political campaigns of other candidates

WASHINGTON (AP) — Longtime Kennedy political aides are involved in the campaigns of nearly every Democratic presidential candidate, convinced that Sen. Edward M. Kennedy believes he has a better chance for the nomination if he runs on his own.

The head of Sen. Harold E. Hughes' fledgling political organization is a veteran of President John F. Kennedy's 1960 campaign, as is the Southern regional coordinator for Sen. Birch E. Bayh. The political worlds are so full of other former Kennedy aides who are starting to choose up sides in belief Edward M. Kennedy means his repeated statements he won't seek the Democratic nomination in 1972.

Despite missing funds

Chicago Plan operations continue

CHICAGO (AP) — The acting director of a program to bring minority gay workers into the Chicago building industry said Thursday that the operations would continue despite $36,300 missing from the fund's bank.

John Smith, acting head of the Chicago Plan for Equal Opportunity, Inc., in place of the missing director, Fred Hubbard, said the contract with the Labor Department will expire June 30 and the money remaining in the Chicago Plan account is sufficient to continue operations and pay salaries to that date.

Hubbard, a Negro alderman, has been missing since early May when it was reported that money was missing from the Chicago Plan account.

Hubbard has been charged by the federal and county governments with issuing and cashing forged checks.

A Labor Department spokesman said the Chicago Plan, implemented in January 1976—was originally funded for $640,132 and later was raised to $633,228. The fund has a balance of $112,497.

Smith said that "representatives of the Chicago Plan and Labor Department are negotiating to draw up a new contract to replace the old one."

Annexation, water rates questions unanswered

An SU Board of Trustees meeting that ended early Wednesday night in a closed meeting with Carbondale and Herrin, the board decided to make no announcement on annexation questions. Water rates and student unrest.

"Several questions were put forth for both sides to think about," Brown said. "I still have an open mind on the annexation question."

Although no agreement was made for the officials to meet again, Brown said there probably will be another meeting, but no date has been set.

The Board committee was formed at the May 21 Board meeting in Edwardsville.

Revenue sharing in trouble

WASHINGTON (AP) — The Nixon administration is planning to digout hopes for revenue sharing on testimony still to come about states and city needs.

"We've got to keep in mind that the hearings have just started," Secretary of the Treasury John B. Connally told newsman after two days of testimony by a predominantly critical House Ways and Means Committee.

Connally to the spokesman for President Nixon's proposal to distribute $5 billion in new shared revenue to states and localities.

Committee chairman Wilbur D. Mills, D-Ark., said of Connally: "It's his responsibility to be optimistic."

Fulbright applicants may get assistance

By University News Services

Students and faculty members wishing to take advantage of Fulbright-Hays Scholarships for their studies abroad, may now get some assistance and guidance in preparing their applications and research proposals.

A Campus Fulbright Committee has been formed to encourage prospective applicants, and to serve as an information source on the program.

John O. Anderson, dean of international education at SIU and a member of the State Fulbright Committee, said the University "should be more active in taking advantage of possibilities for professional advancement offered under the Fulbright program."

The newly-formed committee will "encourage all faculty members to keep an eye open for outstanding scholars and students who might profit from such experiences," and where enough interest is shown, it will "assist applicants in preparing good, strong proposals," Anderson said.

"Competition now is so stiff in all Fulbright programs that it is to the affirmative interest of both students and University to file a strong application," Anderson said.

Two SIU students have received the Fulbright scholarship awards to study in France and in Germany for 1972-73.

The committee is presently served by Walter Wilbs, agriculture specialist; Carroll Rawley, anthropology; Henry Piper, English; D.L. Canfield, foreign language, and Allan Lange, president's scholar program. Campus Fulbright adviser is Frank Sehnert at the International Center to the Fulbright Committee.

Radio program to honor teacher

By University News Services

The contributions of SIU's George S. Counts to education and society will be discussed by SIU faculty members and graduate students in a special program on WBN-TV (Ch. 3) Harrisburg) at 8 a.m. today. Taking part will be two education professors, Arthur E. Loin and Malvern Moore, and three doctoral students in education, Jerry Lacey, Arnold Oliver, and C. Kimmaranat.

Counts, author of 30 books and a driving force in education since the Hills, is retiring from teaching at the end of the current academic year. He is a professor in the College of Education's Department of Educational Administration and Foundations.

2 boa constrictors for pets: just what every girl needs

By Roland Hoiliday

Student Writer

Who said that girls are afraid of monsters and other wild creatures! This may be true for some women, but not Susan Taylor, 21, a graduating senior in biology from West Frankfort who keeps two boa constrictors for pets in her Carbondale apartment.

As far as Susan is concerned, the snakes are fun to have around her apartment. "I remember handling snakes in my high school biology class, she said with the enthusiasm most girls show relishing the excitement of their high school prom. "And I thought they were absolutely fascinating," she added.

The snakes are named Cosmos and Eggo, or Egger for short, because most people have trouble pronouncing Egger, Susan said. They were bought from an exotic animal dealer in Hialeah, Fla. by mail order.

The boa was imported from South America, their natural environment.

Egger was ordered about a year and a half ago and was kept in a cage in Susan's apartment. No months later he got out of his cage.

"I looked everywhere," Susan explained, "but somehow Egger couldn't be found."

In the meantime Susan ordered Cosmos who arrived about three weeks ago. Egger disappeared, Susan put Cosmos in the last Egger's cage and decided to take a nap. About 10 minutes later when she woke up, Egger was sitting on top of the cage, introducing himself to the newcomer.

One of Susan's neighbors, June Salvador Moreno, a senior from Monticello N. L. Montin, became interested in her snakes and ordered one for himself. When the snake arrived he named it Sophia Sentitha.

Everything went well with Sophia until she decided recently to leave her cage. Moreno looked high and low in his apartment but could not find Sophia.

Thinking perhaps if Cosmos and Egger were invited to spend some time relaxing in their cage at his apartment, Moreno has hoped Sophia will come out of hiding soon, at least before he graduates next week.

After Egger's escape last year, Susan decided it was time to make some improvements on her pets. And, with the help of some friends, a new cage was built.

Things went along smoothly until Susan noticed Cosmos and Egger had lost their tags on their scales. Scales are similar to tags and, of course, their presence had an adverse effect on the snakes.

To tackle this problem Susan gave the boa bath in her tub for about a month until all the metal disappeared.

"I'm not sure where they picked up the tags, but I suspected it may have been from the new wood used to build their cage," Susan reflected. "The cage was painted and disinfected and there haven't been any problems since."

"Other than that, Cosmos and Egger haven't needed any special attention. They are fed once or twice a month, as they don't require food as often as other animals and water is provided in their cage," Susan noted.

Susan has always enjoyed animals and as a little girl had a natural appreciation for them which has endured.

Her mother has an extensive in sect collection and both her mother and brother raise hooded rats which often find their way to the dinner table for Susan's two snakes.

"I wouldn't order another 'exotic' animal again," Susan said, "planning that due to the nature of transshipment methods used by the exporters, many of the animals die in transit."

Susan graduates next week and is looking for a teaching position. She said wherever she goes, both Cosmos and Eggo will be with her.

Concert changes location

The location for the Southern Illinois University Student Concert has been changed for the Friday performance.

The concert which consists of a totally student organized program will be held at 8 p.m. in the University Theater of the Communications Building. A $500 donation is asked by the program.

The program had been scheduled for Fair Auditorium but a recent zoning conflict forced the change.

"PLANNING FOR A GREAT DAY"
Police make summer camp reality for Carbondale boys

Eighteen Carbondale boys, who otherwise would not have the opportunity, will go to camp this summer through the efforts of the Carbondale Police Department.

According to Patrolman Larry Davis, coordinator of police-counseling relations and juvenile officer, three underprivileged boys will be attending Camp Illinois, near Springfield, from June 13 to 18.

This program is sponsored by the Police's Benevolent and Protective Order of Elks, and is open only to the Carbondale Police Department in Carbondale. Davis said that the boys will be taken to Springfield in squad cars.

Five more boys will get to go to summer camp from July 12 to 18 at Sherwood Youth Camp, 20 miles west of Galesburg. Davis said that 18 of the boys will be from northeast Carbondale, the other free from the rest of the community. He said that the reason for this is that the opportunity for going to camp as they are in the rest of the city. Davis will be assisted by Henry Carter, youth director of the Boys Club of Carbondale.

Like the week at Camp Illinois, Sherwood sponsored by the Illinois Police Association will cost the police department nothing. Davis said that this is the first year that any boys have been sent from Carbondale, even though the opportunity has been available before.

He explained that Carbondale has never before had a juvenile officer and that the boys are not delinquents, but underprivileged with no other camping opportunities available.

New student activities planned for summer

Special activities for Summer: New Student Orientation and counseling students who will remain in Carbondale over break have been planned by the Student Activities Office.

Joel Banke, chairman, for fall quarter's orientation program, said Thursday that free events will be held on June 23 and 24 for these students.

On Monday, June 20, two films will be shown in the University Center Ballroom at 2 and 6 p.m. and 'The Great Race' will run at 8 p.m. A light show and rock concert by Coal Kitchen will start at 7 p.m.

Officials declassify house

A house at 600 S. University Ave. has been accepted living area effective May 30 according to Jim Osberg, staff assistant in the office of off-campus affairs.

Osberg said the declassification was the result of the apparent failure of the landlord. Farmer Frank Karasyanna, to reply to a complaint of a former resident alleging an improperly held damage deposit, and from an apparent failure of the landlord to correct six deficiencies in the facility.

He said the complaints included a lack of proper fire protection, improper lighting, a faulty gas stove and a lack of kitchen tables and chairs without wheels.

Karasyanna has given no evidence that the deficiencies have been corrected, Osberg said.

The declassification proceedings gave the current 17 residents the option of leaving the facility with no penalty. Osberg said.

Davies said that he thinks the experience will be beneficial to the students.

A boy reared in an impoverished area has more potential for being delinquent than those in the so-called middle class neighborhoods.

'Through these summer camps, boys may be taught that there is a life out there other than the kind they are now leading. These kids have been shot down all of their lives. I don't think we're harnessing them on anything on a silver platter. We're helping to show them it is a decent world,' he said.

Little’s big horn a favorite with inmates at penitentiary

By University News Service

Just another graduate assistant who grades papers and takes final? Not for Steven Little, a graduate assistant in SIU’s School of Music. He teaches inmate classes and is a favorite with prisoners.

Little has an opportunity to teach in a prison. Every Monday night he brings music alive for about 40 inmates of Menard Correctional Center where he teaches a course in music appreciation as a part of the University Extension Service’s educational programs.

It’s a gas, Little says, when he talks about the experiences he has had in teaching at the prison. His class consists of inmates (the “college gang”), as well as prison staff members. The “college gang” is the prison term for inmates who take college courses either because they want to learn or just to avoid the boredom of prison life.

Enrollment is voluntary, and Little finds that his class has had a consistent growth. A native of Hanover, Pa., Little joined the U.S. Navy upon graduation from high school in 1962, and was assigned to Croaker Destroyer Frigate number 4 as a trumpeter.

Discharged in 1964 with a classification of musician III, he enrolled at SIU because he had heard about the School of Music and about Phillip Olson, associate professor of trumpet and new assistant dean of the College of Communications and Fine Arts.

Unsure of what he wanted as a career goal, Little does want to teach at least until his two children grow up. “Then I might form a band and travel on the road.” On the other hand, because of his work at the prison, this past year, he might consider a career in correctional work developing educational programs.
Seat belt may still be best lifesaving device

By Jeff Coughing
Coplay News Service

LONDON — White Detroit is hard at work on a new seat belt device. The idea, in the earlier concept, there is continuing opposition to the use of seat belts in some recent industry studies have shown that perhaps the best belt is the best lifesaver after all.

Nearly all safety experts agree that if the 215 belt does become mandatory, it should be used as conjunction with seat belts. As the so-called "passive" belt is expected now the installation of an airbag device would negate the need for seat belts and shoulder harnesses now required in all cars sold in the United States.

Ford Motor Co. recently completed a survey which indicated that if 90 per cent of all drivers and passengers wore seat belts in 1980, nearly 10,000 lives could have been saved.

But the problem, of course, has always been to get people to wear the safety belts in the first place. Current statistics show that less than 10 per cent of all motorists wear belts with any regularity.

The device, the air bag, was based on the premise that if a person were to be thrown from a vehicle, they would need to be thrown from it, and not thrown against it. The device, as the air bag, is intended to be used in conjunction with a standard seat belt.

Told on the basis of the premise that if a person were to be thrown from a vehicle, they would need to be thrown from it, and not thrown against it. The device, as the air bag, is intended to be used in conjunction with a standard seat belt. In addition, the air bag is not the only protective system that engineers have been able to come up with. Some devices, like belts that encase an automobile in the event of a collision, or an articulated dashboard that breaks away from the interior, are possibilities. But they were too complicated and expensive to be used in a retail environment.

One system that shows promise has been developed by Kangol Magic Ltd., which manufactures a wide variety of seat belts for many European auto manufacturers.

The Kangol seat belt, which has the advantage of being able to be used in any car, has been designed to be used in conjunction with the air bag. The Kangol seat belt is a standard lap and shoulder belt with an additional feature. The belt is designed to be used in the event of a collision, or an articulated dashboard that breaks away from the interior, are possibilities. But they were too complicated and expensive to be used in a retail environment.

Cobden Museum offers look at past

By Don Frost
Headline Writer

A museum is a place where people see a part of their lives when they were young, and where today's youth may see things they have heard or read about, according to C. J. Thomas, co-owner of the Cobden Museum.

He said that the relics and antiques in the Cobden Museum are a conglomeration of things.

The whole thing began about 1890, Thomas said. "My brother Charles and I began to collect relics from local sites as amateur archaeologists.

As we accumulated things, we found that people were interested in seeing them," he said. "I kept the collection in my basement, but after a while we began running out of room.

The idea for the museum was conceived in the mid-1960's, Thomas said.

"Charles, Conrad Baggett, who is the third co-owner, and I began to work on the project," Thomas said.

"First, we had to fix up the building," he said. "Bill Johnston at the University Museum helped us a little but we finally took over the complete operation.

Thomas said that there are no University pieces in the Cobden Museum. He added that the museum was in no way connected with the University.

We invited people to loan items to the museum," Thomas said. "They responded much better than we ever dreamed. People seemed to be glad to find a place for their antiques where they could be enjoyed."

Thomas said that the three men wanted to start the museum for educational reasons.

"But mainly it's just something we enjoy," he said. "There is absolutely no profit involved.

He said that the museum is located in July of 1961.

Items in the museum include old textiles. Early American household items and black, an American Indian burial display with skeletons and several natural history displays.

The Cobden Museum is open to the public on weekdays and there is no charge for admission.

Infrared camera used to improve fiberglass tires

GRANVILLE, Ohio — Researchers at the Owens-Corning Fiberglass technical center here are examining a test tire with an infrared camera to find better ways to use their firm's product in tire construction. By 1973 it is expected that new tire cord sales will be double what they are at present.

Democrats force temporary license fee bill withdrawal

SPRINGFIELD, Ill. (AP) — Illinois House Democrats insisted on a temporary withdrawal of a license fee bill by labeling it a tax for a "tax-issuing" Republican state administration.

The bill would have increased the $10 annual fee for a non-operated amusement device to $17.50 on the grounds that it was insufficient to recover costs of supervision.

Under the Democratic attack, the bill was referred to the Labor and Revenue committee. The sponsor, Rep. Edward Madigan, R-Lenox, withdrew it to avoid a vote.

White House chef in stew over Tricia, 'mushy' cake

WASHINGTON (AP) — White House chef Henry Haller told today he's going to "mush it" — to make the bescamp version of Tricia Ford's evening meal. President Gerald Ford and First Lady Betty have complained and inquiries about it. Haller, the henpecked chef requested of the public as he promised to take the cake again Thursday.

Haller made the decision after the New York Times story. Journalist Jean Howard, who made a pest of Haller's recipe for the mushroomed-down version of the cake and reported it, Rep. much on the outside the layer and snap in the inside.

About part of the proposed 15-by-2 inch layer burned even before the sugared, 1000-layer cake time was over," she said, adding: "The oven was a mess." She said the trouble was that "the cake didn't overbake the past" and Haller's recipe, converting the wedding cake plan to serve 600 down to a home-size version for 25 guests, "simply calls for too many eggs.

REPORT TO NDSL DEPARTMENT!
U.N. report urges family planning for Latin America

By Ruth Pearson
Capley News Service

UNITED NATIONS, N.Y. — Sures, family planning may be the most important development to benefit the human race. To the man and woman involved, it is nobody's business but their own.

Governments are beginning to look around and see all these millions of people. They want their countries to prosper. Many leaders view family planning as the key to population control and in some cases the only way to make economic progress.

For just as many children in one family can hold down an everyday standard of living, too many people in one nation seems to hold back the whole nation—at least in some cases.

The United Nations Economic Commission for Latin America has issued a report on "Population Trends and Policy Alternatives in Latin America," which advocates family planning for most Latin American countries. The research was carried out by the Latin American Demographic Center (CELADE).

The report states only one reason of family planning has been greatly employed in the area: abortion.

"It is well known that up to the present, abortion has been the most widely used means of fertility limitation in the Latin American urban population, as in many other parts of the world," the report states.

According to CELADE, the percentage of women admitting to one or more induced abortions in Latin America reached 18.3 in Rio de Janeiro, 8.6 in Buenos Aires and 7.1 in Mexico.

It is mainly the poor who curb their families by abortion. The upper and middle strata of women in Latin America have abortions only as a last resort, when contraception fails.

The CELADE report disagrees on legal prohibition of abortion. "The legal prohibition of abortion, as long as it cannot be effectively enforced, has justifiably been criticized as a form of discrimination against the poor," CELADE says.

"Women who can pay high fees can obtain abortions under safer conditions. The remainder also obtain abortions when they want them, but under conditions that produce an unpleasant amount of suffering and sickness, and many avoidable deaths."

Family planning is being given more importance these days in Latin America as governments attempt to plan future economies based on present population trends. These factors determine a country's over-all rate of population growth, how many children will be born, how many people will die and how many migrate to other countries.

With better health care, people live longer.

According to the CELADE report, the average life span in Latin America as a whole has increased markedly and this increase is expected to continue. For the region as a whole, the expectancy of life at birth is expected to rise from 60.2 years in 1960-1969 to 66.7 years. The life expectancy rate in 1980 is 66.3 years less than that projected for the high-income countries taken together.

The life expectancy rates projected for Guatemala, Honduras, Nicaragua, and El Salvador range between 46.8 and 52.9 years, with Bolivia and Haiti at 50.0 and 53.3, respectively.

Brazil's life expectancy rate is expected to reach 66.8 in 1980. Colombia 69.5, Mexico 68.8, Peru 67.8 and Venezuela 70.2.

As for immigration, that has dwindled in the area for some years now. Of the three ways to determine a country's over-all rate of population growth, the number of children be born within a certain amount of time is the least predictable.

Two countries in Latin America—Argentina and Uruguay—have not shared in the regional pattern of accelerated population increase. Also, Chile and Cuba are well along the way to population stability.

Chile seems to be a special case. That country's birthrate fell from 27.1 per thousand inhabitants in 1952 to 17.8 in 1960. In both Chile and Cuba, as well as Argentina and Uruguay, the youthfulness populations—now far below the region's average—will rise considerably.

Actually, about 67 per cent of the population of Latin America lives in only five of the larger countries—Brazil, Colombia, Mexico, Peru and Venezuela.

The CELADE report states that while these five countries have the largest populations, they also have the widest inequalities between urban and rural areas and between economic sectors.

About 16 per cent of the population of the region lives in two countries, Argentina and Uruguay, in which the birthrates and mortality have fallen to levels similar to those of the highly urbanized and industrialized countries of other regions.

About nine per cent of Latin America's population lives in seven small countries—Ecuador, El Salvador, Guatemala, Honduras, Nicaragua, Panama and the Dominican Republic—all of which together had no more than six million inhabitants in 1950. They have very high rates of population increase and incomes and educational levels that are among the lowest in the area.

About seven per cent of Latin America's population lives in two countries, Chile and Cuba, where fertility and mortality rates have dropped to those comparable to the more industrialized nations.

Three per cent of Latin America's population lives in Bolivia and Haiti, in which the highest mortality rates of the region limit population increase to moderate rates in spite of high fertility. In these countries, levels of income and education are the lowest in the region.
County health department completes survey

By Dale Pelham
Student Writer

The Jackson County Health Department has recently completed "Survey 400," the department's comprehensive health survey taken by a local and in the U.S. Last summer, health educator of the Jackson County Health Department announced Thursday that the purpose of the survey is to get an indication of the health status in Jackson County and to form a basis to plan programs that will enable the health department to be more effective in serving the needs of the people," Sorromen said.

"It was an opportunity for people to tell us what they wanted," said Dr. John B. Sorromen, administrator of the Health Department.

"Most people in Jackson County do not know what the health department does," Sorromen said. "There is a great need for education so that the whole statement is done for the people."

"Our survey was quite comprehensive," Sorromen said. "It included questions on sanitation, nursing, accidents, illness episodes, nutritional patterns, and certain demographic data, such as water supply, sewage, and trash disposal and the number of people living at each residence."

"Survey 400" consisted of three sections of questionnaires. The first section was an updated version of the 1971 questionnaire. "The results of this survey will be compared to those of 1971 so as to indicate change over the nine-year period," Sorromen said. The second section is concerned with community attitudes about health problems.

The third section was the mail-in portion. This included questions concerning drugs. The Mental Health Clinic and the Family Planning Clinic of the Health Department helped in furnishing questions. Unlike the two previous sections, this was sent by mail.

So far approximately 60 per cent of the residents who received the mail-in portion returned it. Only 20 per cent of the smallest population used in the survey have returned it.

According to Sorromen, "Survey 400" consisted of four populations of 100 persons each. The four populations were Marshfield residents, Cambreale residents, rural area residents, and SIU students.

In mid-February Sorromen began researching and designing the survey. Trained interviewers were assembled. They consisted of University graduate students—five.

Officials at Woodside Junior High School said Margaret was repeating the ninth grade and at the start of the year had been going to class regularly but since November had been absent more than she was present.

Principal Solomon Elliman estimated that less than one per cent of the school's 1,200 students were involved with drugs.

The Guloggas have three other sons and another daughter, ranging from 7 to 27 years in age.

Scratched on the pavement on the front door of their apartment are the words, "They said they are leaving. Krafft's family could not be reached immediately. His father, John, of Huntington Station, said authorities have not had an address.

They’re Trying To Get Rid Of

Douglas Allen Again

BRIEF SUMMARY OF THE PROCESS OF HARASSMENT

1) March 10, 1971: Stauberg charged that Doug Allen

couraged disgrace abroad a lecture by 1 Milton Sacks

2) April 1, 1971: Chancellor Ley seen publicly announced

that the charges against Allen should be dropped, according to his representative. Ed Hammond, who had attended the lecture, the no disruption had occurred.

3) April 29, 1971: Stauberg, responding to a request from

Dean Beyer, submitted a second set of charges against Allen.

4) May 7, 1971: Dean Beyer of L.A.S. announced that a

hearing would be held on Allen, even though Chancellor Ley had stated that Allen’s charges were unjustified and the mat

5) May 12, 1971: Hearing committee set up consisting of

3 members of the 2 of the 3 had served on Villier Center com-

mittees (Beatty and Vernon Anderson), the third had

settled on behalf of the Villier Center at the Blue Ribbon

Heard (Hargreaves). Allen was denied the right to challenge the choice of committee members.

6) May 24, 1971: After meeting twice, the hearing

committee recommended that the matter be dropped, 

agreed to proceed if even Allen or Stauberg requested

that they do so.

7) May 25, 1971: Stauberg submitted a third version of

charges they were calling into question Allen’s ability to judge in general at the university. He recommended that if

Allen was found guilty of his charges that Allen be

immediately fired from the university.

8) May 28, 1971: Allen was notified that a hearing

would be held on Allen. At the base Allen, however, Allen

was never consulted as to the committee of the hearing date, whether there was sufficient time to prepare a

defense, etc.

Relay team’s NCAA hopes may rest with wind today

By Ken Stewart

High winds could blow away hopes for this season and records at the Central Collegiate Relays Friday and Saturday in Bowling Green, Ohio.

“Such track is for records,” said Bob Reeves, sports information director at Bowling Green State University.

“We have good weather now and it should be that way for the meet,” he said.

A record 32 teams and 475 athletes will converge on the Robert Whitlatch Track, site of the follow-up to a massive track—adjacent to the university’s stadium in northern Ohio.

SUI will have a mini team there of four men—Ivy Crockett, Stan Patterson, Bob Reeves, and head coach Lew Hartung who would love to have them stay down.

If the Sahki 440-yard relay team can get below 48.4 seconds, it will be on its Seattle Games weeks for the NCAA championships.

Crockett and Herb Washington of Michigan State carry the 220- and 440-yard dash. Both have been timed in 22.2 seconds. These two plus the 100 and 220 100-yard sprinters to contend with including Mike Klein

By Mike Klein

Second Thoughts

Dwyer had bad luck

Every time a sport selects its All-Star team, somebody deserving of recognition is left forgotten.

Dwyer is unhappy, his teammates are unhappy, and his manager is unhappy.

Everybody’s favorite local guy who made the team in his place.

When the NCAA D-I first team was announced this week, SIU had only one player, catcher Bob Sedik who hit .334, and had a fantastic defensive year.

Coach Richard “Ricky” Jones is disappointed in the selections, especially since the Salukis are district champs.

“Without mentioning anyone’s name,” he said, “we had a number of players here who had tremendous years and might have been overlooked in the team selection,” said Jones.

Let’s be blunt, SIU center fielder Jim Dwyer really is a good, fast player who was left off the All-District squad.

A fourth-year player and a sophomore, Dwyer will carry a .417 mark into the College World Series June 11-17 in Omaha, Neb.

426 slugging mark

His .75 bats exceed by eight the mark SIU managed in 1968.

More impressive, Dwyer has amassed a slugging percentage better than his batting average. Thirty-two of the 75 hits he has batted in are a .435 mark. Dwyer has 17 doubles, a record 12 triples, another record, and three home runs.

Jones, who also has 31 stolen bases and 45 runs batted in, is a better outfielder than his much publicized teammate.

Sedik has been on the varsity four years but until last season did the Highland Park, Ill. native grab the No. 1 catching chores. He responded with a good year, but nothing outstanding.

In fact his .334 batting average was lowest among the Saluki team. And when the current campaign began, Jones figured Sedik would bat around .350.

Last year it was always interesting to see where a Dwyer throw to second would end up, center field, in the runner’s back to the wrong side of the base on the bag.

This year, it was on the bag, every time. In the recently completed District Four Playoffs, not once did he make a second against Sedik.

The 185-pound catcher had one bellwether year, deserves the recognition he’s received and just might find his name in the major leagues after a draft June 8-9.

If Dwyer wound up to have company from his teammates in that elite group.

Six in draft?

We’ve just warmed our kids not to let it affect them as far as the tournament is concerned.

Jones could lose his two junior inners, Bob Sedik and Dan Shimp, along with junior pitcher Dick Langhofer.

Kramer is batting .372, Eden .369 and Langhofer has won 13 games.

Dwyer, another junior, has already said he’ll probably sign if the Salukis will lose senior Bob Blakley, another draft prospect.

“Anybody who can put that big a crop in Jones’ plans but he doesn’t feel the athlete’s talent,” Jones said.

“A young man must do what he thinks is right for himself,” Jones said.

“If they make up their minds to tear down their senior, he has my blessings.”

In other words, he hardly ever had a senior in the lineup.

Crockett Most Valuable SIU athlete, McAndrew given to ‘Abe’ Martin

By Mike Klein

Daily Egyptian Sports Writer

An old athlete—Glenn “Abe” Martin—and a young one—Ivy Crockett—received the most prestigious awards to highlight Wednesday night’s Athletic Banquet.

Martin received the McAndrew Award for 42 years of service to SIU athletics, and Crockett was named Hinkley Award recipient as Southern’s Most-Courteous Football Player.

Ex-SIU athlete, coach, athletic director and current director of men’s intramurals, Martin was featured speaker for the dinner which drew approximately 300 persons.

In his speech, Martin reminisced his years at Southern, beginning with his days as a student in 1929. He mentioned the first SIU road trip made by bus and the six flat long ways to the way Southern’s undefeated 1938 football team, a 1946 NAIA national basketball champions he coached and finally, one of his football teams that got beat up by the girls in a pants raid.

Ending his speech, Martin said, “I hope you’ll pray that I will live to see the day when Southern Illinois University will be a member of the Big Ten athletic conference.”

Martin has gained fame throughout the country for his athletic achievements.

In 1931, he starred with the Chicago Cardinals’ football team. As a coach, he has been named to the Heisman Hall of Fame basketball coaches. NCAA baseball coaches Hall of Fame and was named the Chicago Baseball Coach of the Year.

It’s easy to see why Donald Boydston, athletic director, said, “Any of you that were fortunate to have played for him will know what I mean when I say he is an American man.”

The evening was climax on Martin’s acceptance of the William McAndrew Award. McAndrew was SIU’s first football coach and athletic director. He is remembered by the football stadium bearing his name. Vainly surprised when Boydston awarded him the plaque, Martin said, “This is probably the greatest award I’ve ever received. It’s one I’ll cherish as long as alive.”

It was named after a man who has tried to shape my life after, the principles and philosophies he stood for and I can hardly believe I’m the recipient of this award.

“Tn the years I have ahead,” Martin said, “I will try to carry on as he would like me to and I thank you.”

Biggest share of the remaining spotlight went to Crockett, the Rosemount AAU 100-yard dash champion and sparkling of Southern’s sprouts and relay teams this year.

Crockett received the Harley Award from Sigma Pi fraternity which annually honors Southern’s outstanding athlete.

All athletes vote to determine the award’s recipient in honor of Harley, ex-SIU athlete killed in World War II. The award was insubstituted in 1947.

Other special awards went to Ted Schoch and Bob Blakley.

Schoch received the Harry Bobbitt Memorial Award, given to Southern’s most courageous football player. Schoch played the entire season last fall with a badly damaged knee.

Bobbitt, an outstanding defensive back in 1932 died two years later following abdominal surgery.

Blakley received the Alumni Association Scholar Athlete Award, given to a senior in good academic standing.

Crockett mentioned four-time All America Bruce Stennier and Vern Dutsch, three-time All-Americans Bob Schoch, Midwestern conference champion Henry Hays and Cliff Andrews in a short speech recapitulating the season. All are seniors.

Daily Egyptian Sports Writer

Mike Miller and Mike Goodrich of Indiana.

Crockett will be joined in the 100 and 220 by teammates Sutton and Patterson. Erickson will in the 440.

The meet will draw several champions from the Midwestern (SUI), Big Ten (Indiana), Mid-American (Western Michigan), and Big Eight (Kansas) as well as many other top teams from the country.

Several Midwestern Conference members—Northern, Ball State and Indiana State—and all others will compete. Cross-state rival Illinois will not be there.

Indiana is favored to take the team title, mainly due to the presence of its team. Western Michigan and Tennessee, both with whole teams, are also strong.

Rutgers and Army will also compete.

Kansas, NCAA champion, isn’t expected to be a threat to the title since, like most of the schools, will only have a mini team competing.
