Residents oppose plans to close U-Trailer Court

By Gene Charleton
Jeanne de Fiebre
and Linda Liptanes
Daily Egyptian Staff Writers

The University Housing Office sent a letter to trailer court residents Aug. 1, giving information about local trailer parks. In the letter, 15 trailer parks that are eligible for a housing office survey indicated the extent of their facilities, vacancies and any special assistance that may be provided.

One woman said because the private courts are willing to remove a property, "the University won't give a penny to help out."

John Wang, a doctoral candidate in theater, said he sees the problem as a conflict between human and property rights.

"In China we believe in physical realities, culturally speaking," he said. "To us, to convert a trailer court into a parking lot without trying to find other arrangements is absurd.

"However, human rights are in conflict, human rights should definitely prevail," he added.

Contrary to the future of the trailer courts, first appeared in spring 1972 when plans for construction of a parking lot on the trailer court site were made public. At that time, court residents protested the planned construction, but were told the lot would be built.

In June, 1972 trailer court rental contracts specifying that the court would be vacated by Sept. 1, 1972 were signed by residents.

Approval of parking lot construction plans was given by the board in July 1972, over protests of trailer court residents who attended the board meeting and presented their case to the parking lot proposal has been placed on the agenda for the board's meeting Friday in Edwardsville.

Gray insists he warned Nixon about improper staff actions

WASHINGTON (AP)—L. Patrick Gray III insisted Monday he alerted President Nixon three weeks after the Watergate break-in that he felt some White House aides were acting improperly and illegally. But he said the President asked no questions.

The former acting director of the FBI said he then concluded he had been an alarmist.

Gray concluded his testimony before the Senate Watergate committee, leaving only Gov. Richard G. Kleindienst and Asst. Atty. Gen. Henry H. Peterson to be questioned before the tired panel goes into a month's recess with the rest of Congress.

Under questioning, Gray maintained the FBI's investigation of the June 1972 Democratic headquarters burglary and wiretapping had been "very, very, very good," even though it didn't turn up those now alleged to have been involved in the Watergate.

Top officials of the FBI didn't believe that former Nixon campaign deputy Jeb Stuart Magruder and other high administration officials could have been involved in such a "world affair."

Gray said, and added that that belief persisted as late as last March. He said FBI officials even suspected a Democratic double agent, out to embarrass the Republicans, might have been responsible for the bungled foray into the Democratic inner sanctum.

Gray recalled his July 1972 telephone call to Nixon when he said to the President: "people on your staff are trying to mortally wound you," and added: "Frankly, I expected the President to ask me some questions."

His recollection of that call differed somewhat from the President's.

Gray said he called then-campaign director Clark MacGregor to tell him he felt that people on the White House staff were careless and indifferent in their use of the CIA and the FBI. He said MacGregor told Nixon and that 25 minutes later the President was on the phone.

Nixon, Gray said, responded to his statement with: "Pat, you just continue to conduct your aggressive and thorough investigation."

U-Senate creates unit to form grievance board

By David C. Miller Jr.
Daily Egyptian Staff Writer

A committee to establish a Library Fine Grievance Board was voted into existence by the University Senate Monday afternoon.

The move was recommended by the senate's Ombudsman Report Review Committee. The board will work with the ombudspersons, Dean of Library Affairs Ralph McCoy and others.

The senate also set up a committee to study the advisability and feasibility of forming departmental grade review committees.

The Ombudsman Review Committee weighed the recommendations made to the senate by the Ombudsman Advisory Panel. The panel's charge was to review problems coming before ombudspersons and suggest solutions to them.

The initial panel reported complaints about unfair library fines made up of about six per cent of the ombudspersons' 1972-73 caseload.

There was some discussion as to whether grade review committees were necessary, since some departments have machinery for channeling grade or instructional complaints. The discussion ensued despite the report that more than 10 per cent of the ombudsperson cases involved grievances over grades or instruction.

The study committee will only be looking at the potential need for such departmental review committees, explained John Hawley, president. He said the senate will not discuss implementing grade review systems unless the committee reports they are needed.

The third recommendation to the senate involved establishing a student handbook containing non-academic information about the University and campus organizations. Although the senators were friendly to the idea, an hour-long discussion ensued. The matter came to a vote but by that time several senators had left and the lack of a quorum was discovered.

Most of the debate centered around which offices would have jurisdiction in coordinating and planning the handbook's content. Hawley urged the remaining senators to think the matter over, indicating it would be on September's agenda.

In other business, the Senate was told:

The committee studying possible drinking policy changes has reached no conclusion. Hawley mentioned there is a one-year-old request for senate input on the matter from President David H. Derge.

The committee to check on Derge's record in dealing with campus senators and councils has not been formally organized.

A committee to form recommendations for action on SIU's censure is seeking censure documents from the American Association of University Professors.

Gus

Gus says he needs a committee to help him keep track of all the U-Senate committees.
Gray says he warned Nixon about staff
spent fixing Nixon homes

WASHINGTON (AP) — About $10 million
spent fixing Nixon's White House over the
years was reported Monday, since 1969 for security
and communications installations and other projects,
officials said.

Nixon's staff and his family's purchases were
made as part of the $1.7 billion White House renovation
project, a top White House official said Monday.

As the administration gave its
fulfillment of the $1.7 billion
budget, the White House
promised to make public a
within a month all details of its
purchases, a top White House
official said.

In the secret report to the
of the Watergate scandal,
General Services Administrator
in the Nixon administration
were reported.

Nixon's staff said much of the data on
the projects was kept secret
because it would compromise the
security of the President.

A White House official in front of
him is compromising his security,
he said, gesturing toward large charts
and aerial photographs of the
White House.

"Anyone who wants to do him
damage to the President now
has more information than he had
before." he said.

This series of announcements
Monday stripped much of the secrecy from taxpayer-financed
projects at Nixon's out-of-town
homes and offices and the
residences of his daughters.

FBI agents in White House
Press Secretary Gerald L. Warren said
more than $100 million was
spent for similar equipment at
San Clemente, Calif., and
Belleau Wood, a privately
owned island in the Bahama Islands
where Nixon has a vacation
home.

Nixon and his family had
previously received the services
of top White House officials for
similar equipment at San Clemente,
Calif., and another island in the
Bahama Islands equipped
by the $1.7 billion White House
project.

Nixon's staff said much of the
data on the projects was kept secret
because it would compromise the
security of the President.

He said the Secret Service, that in the
addition to the work, financial
for the President's aides, the
amount of the project was
about $300,000 from its own funds.

Nixon's staff said the Secret Service is
to provide a congressional
on similar projects during the
Johnson and Kennedy administrations.

Warren said Nixon had ordered a
private auditing firm to prepare
a complete, detailed accounting of
the acquisition of the homes and
property in San Clemente and Key
Biscayne.

At a news conference, he
decided a decision was made four
years ago by White House, Secret Service,
and the government officials "to reveal
nothing" about the government
work at San Clemente and Key
Biscayne.

The total federal funds actually
spent on the President's California
home itself has been $65,148, less
2 per cent of the total $2.7
million San Clemente expenditure,
Sampson said.

At Key Biscayne, he said, about
10 per cent of all GSA
expenditures — $222,150 — has been
spent on the President's two homes there.

Virtually all of this, he said, was for
bullet-resistant glass doors and
windows.

Since Nixon took office, Sampson
reported, the GSA has spent about
$90,000 for private, government
owned apartments and houses
occupied by the President's daughters,
Julie and Tricia Cox, in Maryland,
Massachusetts, New York,
Connecticut, New Jersey, and Florida.

He said the funds were not
Government funds, but private
residences and offices in Key
Biscayne.

In 1973 Olubelk to be mailed

Graduating seniors who have pur-
chased a 1973 Olubelk and are
in attendance at the 1973 Commi-
ion Friday may have their
home and mail the letterhead of
the Olubelk office, Communications
120.

Another official said delivery of the
yearbook is expected by October 1.

Muster is a member of the
environ 1972 Olubelk and $1, and
the Centennial Supplement and the
1973 Olubelk and the SUU 100-year history for $2
cash.

Student arrested in marijuana case

An SIU student was arrested early Saturday and charged with possession of marijuana, SIU security police have reported. James Parks, 20, of 708 East Grand, was arrested while walking along South Illinois Avenue near Baskin Robbins. Police said they noticed Parks was carrying something in a plastic bag as they passed him on the street.

They said they saw Parks drop the bag when they stopped.

A test of the substance in the bag showed it was marijuana. Parks was arrested with possession of marijuana less than 2.5 grams.

The police also reported three thefts over the weekend.

A 5000 motorcycle belonging to Paul McAdams, III, was taken from the Neely Hall Circle Drive early Friday morning, police said.

McAdams, who had come from Decatur to visit friends, said his motorcycle was stolen between 2 and 4 a.m. Friday.

A Motorola valued at $750 and belonging to Roberts, 20, was stolen while it was parked in a lot near the Student Center. Saturday, police said.

Roberts said his motorcycle was gone when he left the Center about 4:30 p.m. A brown, leather purse containing $300 in traveler's checks was lost in the vicinity of the Wham Building Friday afternoon, police reported.

Debbie Wolfson, 20, said she misplaced her purse either inside or in front of the building around 3 p.m.

The weather:

Partly sunny and warmer

Tuesday: Partly sunny and warmer with the high temperature in the upper 80s. Probability for precipitation will be 30 per cent. Wind will be from the S to SW at 8-15 m.p.h. and a relative humidity of 50 per cent.

Tuesday night: Partly cloudy and warm with the low temperature in the middle to upper 60s. Chances for precipitation will decrease to 25 per cent.

Wednesday: Mostly sunny and humid with the high around the upper 80s to lower 90s. Monday's high on campus 86. 4 p.m., low 64. 6 a.m.

Information supplied by SIU Geology Department weather station.

Psychology major wins masters chess tofner

First place in the open section of the SIU Masters Chess Tournament went to Jon Latvick, senior majoring in psychology, who received a trophy and a cash prize of $100. The tournament, first to be held at SIU, took place Saturday and Sunday with almost 40 participants, Victor Turner, tournament director, said.

Second and third place in the open section were shared by Ron Manning, Carbondale, and Victor Pagan, Harrisburg. They also shared $50 in prize money.

"Manning and Pagan tied for second place," Turner said. "But there are no playoffs in a chess tournament so they shared both spots.

Mark Daniel, Granite City, took first place in the unrated division of the open section and received a trophy.

Another Granite City citizen, Paul Cooke, took first place in the novice section and received a $25 cash prize and a trophy.

Ron Allen of Harrisburg and Alan Davenport of Granite City, shared $25 and second place in the novice section.

In the unrated novice section, Kelly Woodward of Cuba, Mo., took first place, with no cash prize.

Brewing tips at Lunch

The art and science of "Brewing Your Own Beer" will be explained at Lunch and learn at noon Wednesday by Robert Russell, professor of health education.

Speakers for the Mississippi Room of the Student Center, Russell will list the equipment and ingredients needed to whip up a batch of beer and where to get them. He will discuss techniques and waiting periods of the brewing process.

Reservations for the $1.85 a plate Lunch will be placed for noon Tuesday by calling 453-2395.

Free seats, without lunch, will be available.

GAINESVILLE, Fla. (AP)—An FBI informant testified Monday a defendant in the Gainesville Eight trial told him he was training political assassination squads and trading dope for guns.

William Lemmer, a former Special Forces trooper and ex-member of the Vietnam Veterans Against the War, and Scott Camil, then Florida coordinator for the anti-war group, told him at a VVAW meeting in 1971 he was organizing the squads and calling them "Phoenix II."

Lemmer, of Texarkana, Ark., said the code word referred to a similar CIA-backed political elimination program once used against suspected Communist sympathizers in South Vietnam.

Defense attorneys asked U.S.

District Court Judge Winston Arrow to declare a mistrial, saying Lemmer's testimony was inflammatory, prejudicial and irrelevant.

Arrow refused, on the ground that the material was necessary to show the intent of the defendant.

The eight VVAW members are charged with plotting violence during 1972 Republican National Convention in Miami Beach. The indictment specifies meetings among defendants in which the alleged conspiracy was hatched.

Lemmer said that during the November 1971 meeting in Kansas City, Camil "made the statement he was conducting training operations on a farm, he didn't say what farm, but that his people were developing into what was referred to as political assassination squads."

The Summer Symphonic Band

Under The Direction Of

MEL SIENER and

NICK KOENIGSTEIN

Will perform on the south patio of the Student Center

TUES: AUGUST 7 at 7 p.m.

With Special Guest: Mrs. Michæl Harris; singing selections from the musical hit "Oliver"

Soccer club deserves recognition

On June 20 of this year, the SIU International Soccer Club again failed to get recognition from the athletic department. While this may not bring a lot of commotion from the campus or community, it is a shame that one of the most successful and hard-working organizations must again scrape for money that is becoming more and more difficult to fine.

But this year’s meeting with athletic director Doug Weaver has brought some hope for recognition, the ultimate goal of the soccer club. Weaver, a strong fan of soccer, would like to see the soccer club get recognition as a varsity sport. But like so many universities across the country, SIU is experiencing budget difficulties, having to cut back on many of the activities to reduce the budget.

The soccer club, established in 1967, has been seeking recognition chiefly to eliminate the difficulties it has had in securing enough funds to play a season of soccer. While several of the sports at SIU cost a small fortune to operate, many times without a winning or respectable team to show for it, the soccer club is asking for $3,000 a year. Most of this money would go for transportation, since the team has been unable to travel.

Basically, the soccer club has four reasons for deserving recognition. The first is that 95 per cent of the team’s members are now eligible under NCAA rules. This is amazing considering the fact that only about five or six per cent were eligible under NCAA rules when the club was established seven years ago. The three remaining reasons are the club’s objectives: 1) To stimulate campus interest in soccer as a sport; 2) to put SIU in a leading position for soccer; 3) to encourage cultural exchanges through soccer. The first reason or objective has been achieved by getting more and more American students to come out and participate. At the beginning, there were no American players for the club. Now, only seven years later, 40 per cent of the players are American, including an American captain.

The soccer club has put SIU on the map as far as soccer competition goes by giving 100 per cent performances wherever they play. While they may not win a great majority of their games, their sportsmanship and play have led to continual praise from their competitors.

Finally, the soccer club has encouraged cultural exchanges through the continual help and sponsorship of the International Student Services. Foreign students and Americans get together and learn from each other, both soccer and their different backgrounds and cultures.

All in all, if you add up the contribution made by the soccer club, not only athletically but socially and culturally as well, the soccer club certainly deserves recognition. The soccer club is more than a bunch of jockeys. We have three reasons to be satisfied. The images and experiences shown by the soccer club have demonstrated that the club may not be the best, but they are always the most fighting certainly winners off the field.

Would you buy a used tape ...

By Arthur Hoppe
Chronicle Features

Dear Mr. President: I. Joe" Siksipak, American, take pen in hand to stick a couple of ears in the fire. I see where you are not going to let nobody listen to your private tape collection.

Like you say, you been over those tapes with a fine-combed tooth just to see if you done something wrong that might have escaped your memory. And sure enough, by George, you didn’t.

Only, like you say, there’s always a couple of suspicious types who might hear the tapes different. So, in the interest of getting at the truth, we got to take your word for it.

Well, that’s okay by me. If you can’t trust you, who can you trust? And now all you got to do is convince Houlihan. Ever since Houlihan bought a used car from Honest Anastasia, he hasn’t trusted man or beast.

+++ What happened, see, is Houlihan reads this ad in the paper: “A steal! 73 registered Goliath-8 $800 down to earth price.”

Editorial

Make it safer for bikes

Carbondale has a temporary 4½-mile bikeway system. It is being studied for the improvement and construction of bike routes.

Sunset Drive and Poplar street have eight-foot wide lanes painted on the roadways. These lanes permit two-way bike traffic. Parking on the one side of the streets is eliminated for the bike lanes.

The other bike lanes are not designated by painted lanes. These routes are marked by signs only.

Painted bike lanes are needed to make the bikeway system realistic. Painted lanes show motorists where the bike routes are.

Young cyclists know where the bikeways are if there are painted lanes. Painted lanes keep them out of the path of speeding motorists.

Eliminating one of the parking sides of the street is well worth the safety provide by a bikeway.

Within the bike lanes, there should also be a dotted dividing line for two-way bike traffic. This eliminates head-on bike collisions.

More bike lanes could be used downtown and near the campus. Lanes on Illinois Avenue and University Avenue would make access to the campus and downtown more convenient for cyclists facing the traffic on these routes.

An increase in the number of the cyclists in Carbondale and on the SIU campus makes a bikeway system very much needed.

A bikeway system is safe and convenient could be a big help to cyclists and motorists alike.

Cyclists would be safe in the bike lanes and motorists would not have to worry about cyclists riding the streets.

So Houlihan calls up Honest. “What’s wrong with it?” says Houlihan.

Honest is offended. “I have personally test driven that beautiful car for twelve hours and it is absolutely perfect. It was owned by little old ladies who could not operate a motor vehicle and thus used it as a gasho. Therefore, it has only 78.3 miles on the speedometer.”

“Crimpy nittles,” says Houlihan, “78.3 miles?”

“Why quibble?” says Honest. I’ll make it $48.2.”

“I’ll be down in ten minutes to tool it around the block,” says Houlihan eagerly.

“First,” says Honest, “kindly send me your check for 500 clackers making you the proud owner. When it clears the bank you can come in and sign the papers.”

“I don’t get to test drive it?” says Houlihan.

“Told you I already test drove it,” says Honest indignantly, “and it is perfect.”

“If it’s perfect,” says Houlihan, “how come I don’t get a crack at it?”

“Because,” says Honest, “you may be one of these suspicious types. You hear a normal little plink or clunk and you would attack my integrity. This I cannot afford. Don’t you trust me?”

“Not much,” says Houlihan.

“Okay,” says Honest with a sigh. “Mail me an extra ten bucks and I’ll toss in a money-back guarantee.”

“What can I lose?” says Houlihan. So he sends Honest $10 and goes down to get the car, which is a 1958 wreck.

“Toward earth,” says Houlihan.

“Where else?” says Honest. “But I take it you are not satisfied with your $10 money-back guarantee.”

“Okay,” says Honest. “Here’s you $10 back.”

+++ So, like I say, President, while I’d trust you any day of the week over Honest, Houlihan’s a better man. He’s not going to buy any used tapes from you without checking out the plinks and clunks.

After all, he says, you’re not even handing out money-back guarantees.

Truly Yours,
Joe Siksipak, American

Letter

All too true

To the Daily Egyptian:

After reading recent articles on beef shortages in the papers—I’m beginning to wonder just how soon the recent Charlton Heston movie "Soylent Green" is going to move from fiction to fact!!!!

Debbi Easvold

Vice President and Provost
Perseverance pays for grad with idea

By Diane Minallo
Daily Egyptian Staff Writer

Jean Cochran, SIU graduate student, has mastered the art of creative problem-solving.

Taking an idea, a camera and a tape recorder, Ms. Cochran has come up with a student recruiting aid for SIU and with an assistantship and a combination graduate major for herself.

Last spring, while looking around for a graduate assistantship, Ms. Cochran went to the top with her ideas for a master's degree project - a slide and tape presentation about SIU's opportunities for graduate students.

She envisioned the presentation as an aid to recruiting "academically excellent" graduate scholars just as universities recruit athletic stars.

Ms. Cochran, whose undergraduate degree is in cinema and photography, approached various campus offices with her idea. The persons Cochran approached were interested, she said, but they all wanted to restrict the show to their own areas.

I wanted an overall view" Ms. Cochran said, so she wrote a letter to President David R. Derge, explaining what she wanted to do and why.

Eventually, Ms. Cochran's idea got through the administrative works and Loretta Ott, associate dean of student affairs, went to bat for it.

"Mrs. Ott was extremely nice and she liked my idea very much," Ms. Cochran said. Eventually, funding for the project was channeled through Learning Resources Services; Ms. Cochran had her assistantship, and the project was underway.

Ms. Cochran has completed the script for the presentation. She has been pleased that no "censorship" interfered with writing the script. "Whatever I wanted to put into it went in," she said.

The visual segment of the presentation, which will amount to 130 slides when completed, is about two-thirds finished, Ms. Cochran said. But Aug. 18, all the work should be done and ready to go on its way to potential graduate students.

Ms. Cochran believes the sound-and-sight package will be sent to individual graduate school applicants and to schools for viewing by groups.

The show, Ms. Cochran said, attempts to cover every aspect of SIU for potential graduate students. This includes scholarly research opportunities, SIU's important resources, such as Morris Library; the nature of graduate classes, and what all this might cost. The slide show also will deal with recreational opportunities, living conditions and the community atmosphere around Carbondale.

Her work has led Cochran to put together a special graduate major. Her degree will probably be in both student personnel and in guidance, she said.

Cochran said she'd like to find a position that combines student counseling and photography after she graduates.

Judge upholds disclosure order to state employs

SPRINGFIELD (AP) - A Circuit Court judge upheld Gov. Daniel Walker's executive order requiring drastic disclosure of economic interests of state employees Monday.

The order, issued in February, was challenged by the Illinois State Employees Association and other groups of highway engineers and state police as unconstitutional.

In his decision, Ackerman said the ethics order is "the most sweeping in the country and exceeds the requirements of any state or federal statute, federal executive order or model statute."

The judge said he recognizes the right of privacy is basic in a free society, but held that the public interest must be given preference to help to assure honest government and confidence in that government.

"While generally affirming the order and Gov. Walker's power to issue it, I have done so qualitatively and with certain exceptions, so that individual liberties are protected as much as possible," he said.

The ethics order, which applies to employees under the governor who earn $50,000 per year or more, to persons in positions subject to undue influence, and persons appointed to boards or commissions by the governor, requires the filing of complete financial disclosure.

RARE BIRD HANDLERS WANTED

You need a certain touch. A special drive. Whatever comes up in Navy air, you have to handle it. Jackeving a hot jet off the deck in foul weather. Hunting through snow, where even the wind gets lost. Or toasting the little black bag with the big punch. Whatever you do, you learn it and do it right. You learn the difference between fanning a falcon and a wren.

I think you can handle the job, let us know. Our birds are ready when you are. Lieutenants Ray Fisher, George Gwaltney, and Keith McCar-lick will be in the Iroporis Room of the Student Union on Tuesday, Wednesday, and Thursday, August 7,8,9, 1973.

If you're going to be something, why not be something special.
It's your move,

Astronauts carry out experiments

By Paul Steer
AP Aerospace Writer

SPACE CENTER, Houston—Two spacewalking astronauts repaired and rerouted cabin Monday to install a new door to shield the Apollo command module from problems striking the troubled Skylab.

"Boy, what a view," said Jack R. Lousma, who spent 27 days in orbit and Dr. Owen K. Garriott floated through a hatch to begin several hours of work outside, protected only by their white space suits and bubble helmets as they orbited 271 miles above the earth.

Skylab 2 commander Alan B. Shepard jr. assisted during the space walk, relaying instructions from Mission Control and helping to assist his crewmates if needed.

The first job for Lousma and Garriott was to install a 23 by 34-foot white awning to shade the root of the orbiting laboratory.

Three problem areas were to be inspected. These included wires that ground experts believe may have been damaged in transit.

The astronauts planned also to install and photograph two steering rockets on the Apollo command ship that were developed to take off. Of vitals hope the astronauts can find a solution to the problem.

A final troubleshooting job was to be performed on a television camera which may be leaking coolant. This problem was discovered Sunday evening.

Lousma and Garriott also were to remove the existing Apollo 7 television camera, replace it with fresh film, and then perform space experiments.

The space walk originally was scheduled last Tuesday but was postponed four times because of illness among the astronauts.

"Everything's going smoothly," said Garriott during the unusual deployment.

In inspection of the sunshade index revealed locking 22 Rolls to make two 32-foot poles. The poles clamp to a spacecraft strut, creating a split mast. A white painted, aluminum coated awning rests over the mast, shading the spacecraft roof.

An orange parasol style shade is installed on the Apollo 7 spacecraft, and the Skylab astronauts are covered by the new awning.

Both shades protect the space station from the heat of the sun, replacing a metal shield which ripp ed off when the station was launched.

Skylab 2 has been peppered with problems from the beginning.

A steering rocket on the Apollo command ship, which ferries the astronauts between earth and the Skylab, developed a leak shortly after launch on July 28. A second leak occurred later in another of the four steering rockets, leaving only two intact.

Officials said they have less than total confidence in the remaining two steering rockets, but still hope they would work well enough for the astronauts to return to earth aboard the Apollo craft on Sept. 25, when their 38-day mission is scheduled to end.

As a precaution, however, launch preparations started around the clock at Cape Kennedy, Fla., to prepare the Skylab 3 rocket and Apollo spacecraft for a possible rescue mission. The emergency mission will be ready for launch on Sept. 15.

The space walk finally got underway Monday after the astronauts suffered from motion sickness for three days and fell behind schedule.

Don't miss the Dances on July 29th and 30th.

Send Tuesday afternoon and evening programs scheduled on WSUI-FM.

WASHINGTON, D.C.—Tuesday afternoon and evening programs scheduled on WSUI-FM.

Russian-English television is being broadcast between 2 p.m. and 6 p.m. daily.

Readers who wish to be pre-registered for the pre-printing to act quicker to complete the application process remains to be seen.

The advantage of the pre-printed application lies in its nearly total preparation, which eliminates the need for multiple registrations when processed in banks over the counter.

Nearly half of these were processed in banks in February. Last year the deadline for display of 1973 plates on autos was Feb. 15.

Activities

Tuesday, Aug. 7

Placement & Proficiency Testing: 8 a.m.-2 p.m., Morris Library Auditorium.

New Student Orientation: 9:30 a.m. Student Center; Bus Tour leaves from front of Student Center 11 a.m. & 1:30 p.m.

Summer Playhouse, "The Dan- cing Class," Laboratory Theater, Com- munity Building.

Recreation & Intramurals: 8-10 p.m. Palladium pool, gym, weight room & activity room; 1-4 p.m. WSUI-FM Studio; 3-5 p.m. WSUI-FM Studio, Vulpius Hall.

Evening Student Class, 7 p.m.

Eagle Heights Chess Club: Meeting, 7 p.m., closing, Student Activities Room, Community Building.

Crisis Intervention Service: Got a problem? Lonely? Need to rap? Call us for help, 10 a.m.-6 p.m., 249-5396.

School of Music, F-310, 8 a.m.-8 p.m. Home Auditions.

Irequis Room.

WSUI-TV

Thursday afternoon and evening programs scheduled on WSUI-FM.

7-2 p.m. "Daily Evening with Kathy McFarland; 6:30-7 p.m.-Weather Hearings (subject to change): 7-8 p.m. "Shrinkin' World" with Dr. John B. Watson; 8:30-9 p.m. "A Lesson from the Podium: 10:30-11:30 News; 11:30 p.m.-"Night Song".

The advantage of the pre-printed application lies in its nearly total preparation, which eliminates the need for multiple registrations when processed in banks over the counter.

Nearly half of these were processed in banks in February. Last year the deadline for display of 1973 plates on autos was Feb. 15.

Brigadier general starts program

Early athletic surge aided by ‘Mac’

Editor’s note: This is the first of four articles dealing with SIU’s athletic history. Today’s story is concerned with the development of its sports program and its successes and failures over the past 80 years.

By Jim Brown

Daily Egyptian Sports Writer

It all started innocently enough.

Filled with a curriculum of geography, science, grammar and arithmetic, Robert Allyn, first president of Southern Illinois Normal University (SINU), sought to teach the 100-odd student body in the “anatomical aspects.” When Allyn took over at the school’s baptism in the summer of 1874, he set up a Department of Physical Exercises and Vocal Music. Athletics, Allyn thought, would be taught the same way that the ancient Greek sports—as a method of enriching the students of the cultural aspects of education, like “school picnics and college plays.”

The students’ pride in athletics ballooned towards the end of the century, however, and calisthenics in the Old Normal Building on campus was no longer as popular as a new rough-and-tumble sport called football.

In 1908, despite a ban by the faculty, football was christened at SINU, under certain rules, with the following announcement:

“The membership of the Normal team or teams must consist of benefit students of the Normal—no game shall be played without the presence of the supervisor. Although football and basketball were played on the streets of Carbondale, intercollegiate competition didn’t begin until 1913. In that year, SINU athletes took its first great athletic leap—caused by a publicity campaign. Upon grasping the presidency reins from Daniel Parkinson in 1913, Henry Shrock sought to raise Southern’s standing among sister institutions. There were five immediate objectives, which included “a recognized status of college athletics.”

Shrock, unlike the majority of university officials, felt that competitive intercollegiate athletics was a determining factor in establishing college recognition. So he brought in William McAndrew to build an athletic program while “inculcating the highest ideals of clean sportsmanship.” It proved to be a good choice. McAndrew, a Southern Illinois native, had headed the Department of Physical Education for 14 years, and was also a lawyer and a brigadier general in the National Guard.

“Mac (as his friends called him) was an excellent organizer,” recalled Glenn “Abb” Martin, who succeeded McAndrew as athletic director in 1943. “He understood the psychology of the students, so when he gave an assignment, he expected you to do it. But, most important, Mac was a well-liked person and people trusted him.”

He had a great approach to life and he always thought positively,” Lynn Holder, former SINU athlete and now Saluki golf coach, said. “He spent most of his salary for students. I remember when he spent 600 dollars of his own money to a kid.”

Mac also assumed head coaching duties in football and basketball. But he enriched the athletic program by adding sports like track, tennis and gymnastics. Baseball was played in 1922 and 24 but dropped until 1942.

Southern became a member of the Illinois. Intercollegiate Athletic Conference (I-IAC) in 1913. In that year, the basketball team was victorious in its first game, defeating the alumni 33-28.

By 1930, the I-IAC had expanded to nineteen institutions and, until 1937, the conference was known as the “Little Nine.”

SINU became a perennial contender in every sport it entered at the state meets. The 1930 football team placed first in the conference with a 9-0 record, the only unbeaten Southern football team in history. The track team, inaugurated in 1927 under Leland Lingle, won two Little L championships in 1929-30 and didn’t lose a dual meet during a six-year stretch. The tennis team won a Little L championship in 1929.

But with widespread success in the conference, athletics did have some shortcomings in those early years. There was no cinder track and a dirt track had to be made around the old football field east of McKendree Stadium. When it rained, however, meets had to be conducted on old Harvard Avenue.

Temporary bleachers allowed only 3,500 people to watch football games and former Jake Starteg held basketball games from the Women’s Gym.

“Tickets for basketball games were allotted then,” Holder said. “People were able to see only every third or fourth game.”

Wednesday, Southern’s athletic program gradually expanded and with it, the reputation builds throughout the Midwest.

Tearful Hall of Fame ceremony as Clemente, Spahn inducted

By Dick Joyce

Associated Press Sports Writer

COOPERSTOWN, N.Y. (AP)—“This is Roberto’s last triumph,” said Vera Clemente, filing with emotion during baseball’s Hall of Fame induction ceremonies Monday.

“If he could be here he would have dedicated it to the people of Puerto Rico, the people of Pittsburgh and fans throughout the United States,” said the wife of Roberto Clemente, the former Pittsburgh Pirates star who died last New Year’s Eve in a plane crash off his native Puerto Rico.

Clemente’s three sons and his mother, Lucilla Walker, as well as the Pittsburgh Pirates and club officials, were on hand.

“Robbie,” the winningest left-handed pitcher in history, Monte Irvin, also in both the Negro and major leagues; George “Highpockets” Kelly, a first baseman with the New York Giants in the 1920s; Mickey Welch, a 300-game winner before the turn of the century, and Billy Evans, a former American League umpire and baseball executive, also were inducted.

Bowie Kiner, the commissioner of baseball, presided at the 34th annual ceremonies, unveiling the plaques of the inductees which bestowed the Hall of Fame list to 142.

Many of Spain’s relatives were on hand, including his father, Edward, whom the left-hander credited with helping get him started in the major leagues.

Irvin, who broke into the majors with the Giants in 1914, after playing in the Negro leagues for many years, said:”Nothing can equal the great feeling I have now. It’s the greatest feeling I’ve ever had.”

“I hope this helps ease the pain of those who didn’t get the chance.”

He was referring to baseball’s earlier ban on Negroes.

Kelly, who had a .297 lifetime batting average, held back tears as he thanked all those who helped him gain the honor. “It’s the finest thing that ever happened to me.”

Both Evans and Welch are deceased. Evans’ grandson, William C. Evans, and Julio Wells, a daughter of Welch, accepted on their behalf.

Spahn, who won 306 games, mostly with the Boston and Milwaukee Braves, was elected to the Hall of his first try by the Baseball Writers Association of America.

The normal five-year waiting period for SIU’s Clemente, a .327 lifetime hitter and rifle-armed outfielder who was killed while on a mission to earthquake victims in Nicaragua.

IM Field narrows

The number of teams remaining in the intramural softball playoffs was reduced to six Monday afternoon when intramural sports director Bob Bobish announced Bobish’s 15-in the 12-inch game.

Buffalo Bob’s then outslugged Merlins 11-10 while Bonapartes defeated Bobish’s 15-in the 14-inch game.

In the 12-inch bracket, Hey Now beat Yuba City Honkers 18-10.

All games are of the double-elimination type. The first team to capture the 12-inch championship today.

It’s the third straight year, Yuba City Honkers at 5 p.m. on Field 3.

In other games Tuesday, Merlins meets Hey Now in the 12 by 6 bracket at 5 p.m. on Field 1. Buffalo Bob’s plays Bonapartes at 4 p.m. on Field 4, while the winner of Game 2 meets the loser of Game 3 at 6 p.m. on the same field.

The championship contest is slated for 5 p.m. on Field 1.

You’re out!

The tension mounted Monday as the intramural softball playoffs began. Here Buffalo Bob’s Robert Bobish tags Vet’s Club runner James Ross for the first out in the first inning as umpire Lloyd Haims looks on. Playoff games will continue Tuesday afternoon. (Photo by Tom Porter)
