

**Senate Tables Cycle Rules**

The Student Senate voted to hold for further study the Senate Welfare Committee's recommendations against motorcycle propulsions put forth by the Southern Riders Association.

The committee's recommendations advised against the association's proposal that students be required to wear helmets and opposed passage of a proposed law in Carbondale banning side-saddle riding by bicycle passengers.

The senate committee based its recommendations on the well-being and safety of students without restricting their freedom, according to Ray Lenz, committee spokesman.

"We don't think it necessary to put such restrictions on the students," Lenz said, "but a student wishing to engage in such an activity would be free to do so without harming anyone else."

A rating system that would establish standards to judge cycle noise was found by the committee to be a feasible proposal set forth by the association.

The committee report, Lenz said, could not include a mandate on the proper attire and conduct of cyclists. The committee could only issue a formal suggestion as a proposal to the students.

The senate committee voted to ask the committee to draw up a formal recommendation so senators could study the proposals before the next meeting.

25 Cycle Riders Injured in Week

Dr. Walter H. Clarke, acting director of the University Health Service, said about 25 SIU cyclists have been treated by the service in the past week.

While less frequent than earlier this year, injuries resulting from cycle accidents have been more severe.

Two of the cyclists have broken clavicles, and at least three students were treated for fractured legs.

**REMEMBER WAY BACK**-In the good old summertime when the temperature stayed in the 80s and often the 90s and campus cuties such as the one above made a trip to the beach well worth the effort even if you didn't plan to go in swimming? We thought the summer scene would be a welcome change from all the snow we've been seeing lately.

**Reception Will Follow**

30-Voice Norman Luboff Choir to Give Concert at 8 p.m. Today in the Arena

The 30-voice Norman Luboff choir will perform at 8 p.m. today in the SIU Arena.

The choir, directed by the bearded Luboff, will be backed by four instrumentalists. The program is being sponsored by the University Center Programming Board and the Male Glee Club.

The choir, which began its concert tours in 1963, has recorded about 30 songs, each of which has the distinction of being a best-seller.

Luboff began his music career teaching theory and singing "pops" on the radio in Chicago. He moved to Hollywood where he composed and arranged the music for more than 80 films. Among them are "Giant," "Island in the Sun," "Search for Paradise," "Cinerama South Seas," and "The Miracle." "Highland Fling," a musical fantasy about Robert Burns, was written by Luboff last year as his first attempt at writing musical shows.

An informal reception will be held for the choir in the University Center following the concert. The reception is open to the public.

Tickets for the concert may be obtained at the University Center. All seats are reserved. Prices are $1.50, $1.25 and $1.

**First U.S. Try Not Before May**

MOSCOW (AP) — A Soviet space station made history's first soft landing on the moon Thursday, Moscow announced. British scientists in England said the unmanned capsule, Luna 9, sent pictures back to earth from the moon's surface.

A Tass announcement said the landing was made at 9:45:30 p.m. Moscow time — 1:45:30 p.m. EST — after the ship, launched Jan. 31, had hurried through space for more than three days.

Sir Bernard Lovell, director of the radiotelescopic observatory at Jodrell Bank, England, said the feat "puts the Russians ahead in the space race." The first American attempt at a soft landing, a key step in putting a man on the moon, is not expected before May.

A soft landing means bringing an instrument package down on the surface slowly enough so that there is no crash and resultant destruction.

Lovell said the information Luna 9 was radioing back to the Russians makes a manned landing on the moon a possibility within this decade.

**Gus Bode**

Gus says he has just about finished his research project which will show that State Highway Department snowplows work better in summer than in winter.
International Students Council
To Discuss Activities Sunday

The Council of International Student Club Presidents will meet at 2 p.m. Sunday in the International Student Center at 1012 S. Forest Ave.

All club presidents are asked to attend. Each should have a list of dates for his club's activities for the remainder of the quarter.

At this meeting an attempt will be made to set up a foreign student activities calendar to prevent conflicts in the scheduling of events.

A discussion of last year's activities and a study of this year's program will also be conducted.

Heart Operation

'B' Blood Sought

Barnes Hospital, St. Louis, has requested a minimum of 16 pints of blood for Harold M. Banks Jr., area head of Thompson Point, who will have open heart surgery Monday.

Banks, who has been hospitalized for the past three months, needs a B positive blood type.

Anyone wishing to donate blood must meet the following requirements:

- Must have B positive blood type; age 21 or have written parental permission; cannot currently have a cold or flu; cannot have had or been in close contact with hepatitis, jaundice or mononucleosis within the past six months.
- Men may not have donated blood within the past six months. Women currently have blood must meet the following requirements:
  - Must have B positive blood; age 21 or have written parental permission; cannot have had or been in hospital for the past three months; needs a B positive blood type.

Army Wannan Controllable

Advisement Accepted This Excuse Gladly; Enrollee in Berlin Missed Appointment

What's an acceptable excuse for missing an academic appointment?

Some will insist that there isn't any, but not John E. Seiler, a freshman from Ferguson, Mo.

He had an appointment for 8:30 a.m. Dec. 1 and he couldn't make it, and the Advisement Center was only too happy to accept his excuse.

After all, many students have written from Berlin, Germany, saying they couldn't keep their appointment because the crisis in Viet Nam delayed their release from service.

Usually, the excuse is that "My grandmother just died," or "I had to rush home to donate one of my kidneys to my ailing father."

Seiler, who had made his appointment by mail after he had been accepted as a student by SIIU, sent a second letter on Nov. 1 explaining why he couldn't make it. It said in part:

"Due to circumstances beyond my control I will not be able to keep my appointment . . . . However, I will receive my discharge from the Army in time to register for classes on Jan. 3 . . . ."

Seiler, who said he felt fortunate to be stationed in Intramurals Canceled

Intramural basketball games scheduled for 1:15 p.m. and 2:15 p.m. Saturday in the Arena have been cancelled, according to a spokesman from the Intramural Office.

Today's Weather

SUNNY

Shine and a little cloudiness today with a high of 62. The record high for today is 73 set in 1910, and low of 42. Today's wind will be out of the south at 15-20 mph, according to the National Climatic Data Center.
Meetings, Play, Dance, Films Top List Today

Counseling and Testing will give the general educational development test at 8 a.m. today in Morris Library Auditorium.

Inter-Varsity Christian Fellowship will meet today from noon to 12:30 p.m. and 7 to 9 p.m. in Room G of the University Center. The Student Senate Association will meet at 2 p.m. in Room E of the University Center.

Women's Recreation Association house basketball will begin at 4 p.m. in the Large Gym. Alpha Delta Sigma, advertising fraternity, will meet at 5 p.m. in Morris Library Auditorium.

Opera Workshop rehearsal will begin at 5:30 p.m. in Shryock Auditorium. The Aqueatess will meet at 5:45 p.m. in the University School Pool.

Movie Hour will feature "The Reluctant Saint" at 6, 8 and 10 p.m. in Furr Auditorium in the University School. The Faculty Playreading Group will meet at 7 p.m. in Morris Library Auditorium.

Intramural co-recreational swimming will begin at 7 p.m. in the University School Pool.

The Sociology Club will meet at 7 p.m. in the Seminar Room of the Agriculture Building.

The International Relations Club will meet at 7 p.m. in French Auditorium in the Life Science Building.

The Southern Player will present "Lysistrata" at 8 p.m. in the Southern Playhouse. The Norman Luboff Choir will perform at 8 p.m. in the Arena.

Interpreters Theater will meet at 8 p.m. in the Agriculture Building Auditorium and Arena.

A University Center Program Board-sponsored record dance will begin at 8:30 p.m. in the Roman Room in the University Center.

The UCPR educational and cultural committee will give a reception for the Luboff Choir at 9:30 p.m. in Ballrooms A, B and C in the University Center.

The cast members are Jean Phillips, learn; a former junior majoring in government. Presently, he is a resident fellow at Allen Dormitory, University Park.

Greek Week and fraternity rush were also discussed at the meeting. Greek Week will be held April 19-23. There is a possibility of the Greek Sing coming again being competitive.

The main issue concerning rush was that of improving relationships with independent groups in order to develop a better rush program.

Excerpts of Visitors’ Talks

Will Be Broadcast by WSIU

“Voices on Campus”- excerpts of talks by visitors on campus about prominent persons in various parts of the world will be broadcast as 8 p.m. today on WSIU Radio. Other programs:

Play Reading Club

To Perform Tonight

"Don Juan in Hell," a portion of "Man and Superman" by George Bernard Shaw, will be presented by the faculty play reading group at 8 p.m. today in Morris Library Auditorium.

The cast members are Jean Phillips, learn; a former junior majoring in government. Presently, he is a resident fellow at Allen Dormitory, University Park.

Greek Week and fraternity rush were also discussed at the meeting. Greek Week will be held April 19-23. There is a possibility of the Greek Sing coming again being competitive.

The main issue concerning rush was that of improving relationships with independent groups in order to develop a better rush program.

Operac Giovanni

Will Be Telecast

"Don Giovanni," a dramatic piece during Austria's Salzburg Festival, the opera "Don Giovanni" will be telecast by WSIU-TV's "Festival of the Arts" at 9:30 p.m. today. The production stars Cesare Siepi in title role. Other programs:

3:30 p.m. Industry on Parade.

5:30 p.m. Film Featurette.

8 p.m. Passport to "Safari Camp."

9 p.m. The President’s Men: The last of the series about the key men around the President.

Activities

Official Soapbox Areas Designated

Students now have four official places where they can set up their soapboxes on campus and express their opinions freely.

The administration has designated four places as "Student Forum" areas to provide students a place of "free inquiry and free expression of ideas."

The areas are Area H in the University Center, the grassed area and bicycle area immediately south of Browne Auditorium, the playground area between the tennis courts and the SIU Arena, and the island area of the parking lot south of the Arena.

Policies governing the use of the areas are to be developed by the Campus Senate and recommended to the dean of students.

Neutral Block to Meet

The neutralist bloc of the Model United Nations Assembly will meet from 3 to 5 p.m. today in Room D of the University Center.

2 - SHOWS 6:30 and 8:30 P.M.
**Line Cutting Eliminated With Addition of Sand?**

To the editor:

I would like to commend Frank Mesersmith for his article, "Egyptian" on Jan. 27, concerning cutting into the lines in a cup of coffee.

I think that everyone would recognize that the cup of coffee mentioned on that point. Certainly none of them could be published last week. It is difficult to believe that any coffee in that long to bring (in reference to the lines in the cup) should be served in a cup of coffee.)

Frank Mesersmith advocates a better approach may be taken concerning this problem than the one Mr. Mesersmith has suggested.

Certainly one of the objectives when dealing with the "coffee-cutters in" is that many people come to the union eat, and still others are

merely coming for a quick in-between-class cup of coffee.

Filling a glass of water to have and walk for others to get lemonade or hamburgers when one simply wants a cup of coffee is wasteful, and one can readily sympathize with Mr. Mesersmith that he and others have long walked to wait for the coffee drinkers.

Wouldn't much of this problem be solved by placing a coffee stand somewhere else in the student center? (The coffee stand serving only coffee in the morning rush.) I believe that this would eliminate much of the waiting lines, and would also increase the business somewhat in the Oasis.

Arthur L. Sobey

**Daily Egyptian Editorial Page**

**Good, Bad Guys Show Up in Winter**

Snow, ice and rain can cause a lot of problems for students, but to drivers in Carbondale they are more of a threat to themselves.

First, heavily traveled streets become more congested. The traffic wears ruts for two lanes, but the sides of the roads still stick and traffic must move at a crawl.

Second, less traveled residential streets in town are more of a threat to pedestrians. It sometimes takes weeks for traffic and snow to even travel from one side to the other. This makes it difficult for people to get around. In the meantime pedestrians and bicyclists ride slip and slide to work or school the best way possible.

**Visitation Issue**

**Stirs Wildcats**

The burning question on the Northwestern University campus these days is whether male and female students should be allowed to visit each other in their dormitory rooms.

The student senate has unanimously approved the plan, and the Council on Undergraduate Life, composed of 11 faculty members and students, will vote its views on the dormitory visitation this week.

The Daily Northwestern, student newspaper, answering criticism that such allowances might encourage sex, said in an editorial: "Nothing more is likely to happen in a closed room than what is already happening in the rooms of the western suburban movie houses. That's probably true. And if bars were installed in dormitories, the students probably wouldn't drink any more than they are doing in their off-campus taverns. It's the same kind of negative argument.

Since a university's primary task is to develop well-rounded people, we wonder about the soundness of the decision. We don't for a moment think students would take advantage of these changes. We think they would get any studying done.

Chicago's American
Unspoiled Natural Parks

Tanzania Mania Forecast

As Tourist Lodges Rise

By Malcolm C. Payne
Copley News Service

DAR ES SALAAM, Tanzania—the opening of the $3 million, 240-room Kilimanjaro Hotel here can be likened to the sudden appearance of an oasis in a desert.

For the first time, Tanzania can handle large tourist groups without splitting them up among three or more of the capital's smaller hotels. The shortage of hotels has depressed Tanzanian tourism more than anything else can be gauged by the sudden emergence of interest in the country, especially the capital, by large U.S. and Canadian tourist organizations. The Kilimanjaro has advance bookings stretching into 1967.

But the Kilimanjaro is only the first step in a master plan to boost Tanzania to the top of the tourist world.

Three new lodges are to be built at the Serenera, Ngorongoro and Mikumi game parks. A new beach hotel is planned for Dar es Salaam and a tourist hotel in Zanzibar. Discussions also are in progress with the Hilton organization for an additional hotel in the capital.

At present about 24,000 tourists come here each year. It is hoped to increase this to 80,000 in 1968, whether the country could cope with that number is debatable. Lack of an experienced staff in the hotel field is a sore point here.

The Kilimanjaro has had more than its share of teething troubles but some of the top executives expect matters to settle down in time for the main tourist season.

Once the visitor arrives here—there are flights from all parts of the world into the airport and regular connections with Nairobi—what will be left for him?

It depends on what he wants. Tanzania has 360,000 square miles of palm-fringed sandy beaches, enormous game parks, snow-capped mountains and great lakes. There is sophistication and also the splendor of the unspoiled Africa.

The great number of tourists at present entering the game parks in the north of Tanzania do not come from Nairobi in Kenya, which is nearer to them than Dar es Salaam, Nairobi has culled most of the money from tourism because of the better standard of hotels there.

But this should change with the emergence of higher standards in Tanzania, for there are many things to see near this capital.

The small islands off Dar es Salaam are likely to be developed soon. Beautiful Seronera.

view from Lake Manyara Hotel in Tanzania extends over hundreds of square miles

The only inhabitant of which is bearded Scotman John Brown, famous sea-fishing equal to that anywhere in the world.

The island is visited mostly by small parties for picnics. They are taken out in Brown's boat but have to bring their own food. Plans are being made for a small hotel which could cater for short-stay visitors.

The gorge is just off the main route to Seronera Lodge in Serengeti National Park and can be reached easily in a day from Lake Manyara Hotel and the Ngorongoro Crater Lodge.

South of Iringa in the Southern Highlands is the site of Isimila where Old Stone Age axes and other tools lie where they were excavated. At Kolo, 115 miles from Dodoma, the Konda Irangi tourists pause to watch giraffe in Lake Manyara Park 70 miles west of Arusha in Tanzania

The fishing club at Mafia Island may be revived. This used to provide deep-sea fishing in the Mafia Channel and in the ocean where some fine sailfish, marlin, shark and barracuda can be caught. The best season for fishing is between October and March.

Good inland fishing is available in the lakes. There are bass and Nile perch in Lake Duluti near Arusha in northern Tanzania, and tiger fish in Lake Tanganyika.

Tanzania is rich in the remains of ancient civilizations. Perhaps the most famous spot is Olduvai Gorge where L. B. Leakey, the anthropologist, discovered the earliest known remains of man going back as much as 1,750,000 years.

But many tourists want most of all to see animals when they come to Africa. Tanzania has the richest display of wildlife left in the world today.

There are nine game reserves covering a total area of 27,300 square miles where all wildlife is protected. The best known of the national parks is Serengeti, the only area left in Africa where the vast migration of animals can still be seen.

During January to May, when fresh grazing and water are available in the southeast area on the open plains, wildebeest, zebra, gazelle, topi and eland, always accompanied by Serengeti's black-maned lions, follow the rain.

There are more than 280,000 wildebeests, 600,000 gazelles, 150,000 zebras, 700 elephants, 5,000 impalas and other animals over 1,000 species in Serengeti. The accommodation for the park is at Seronera, a few miles from Serengeti and 70 miles west of Arusha. Lake Manyara Park, where hundreds of thousands of flamingoes, pelicans and other water birds congregate.

There are many herds of elephant at Manyara and the lions provide unusual opportunities for the photographer because they spend a lot of their time in the higher branches of trees.

At the very edge of the West Rift Wall is the Lake Bogoria hotel, which provides a staging view over hundreds of square miles. The hotel is extremely comfortable and has its own swimming pool.

Ngorongoro Crater Park, 23 miles from Arusha, is the smallest of the parks and is considered the most beautiful. It contains a crater 1.5 miles in diameter, with a forest rim rising 500 to 1,000 feet above the crater floor.

Elephants, rhinos, giraffes and magnificent views of Mount Kilimanjaro and Massai land are there for the visitor.

Momella Game Lodge adjoins the park and drives by the lakes will provide the photographer with a chance to capture the hippo at play.

Lastly, Ngorongoro Crater, adjoining Serengeti, is the second largest caldera in the world and large herds of plains game can be seen within its forest walls, which rise majestically in places to 2,250 feet. There is yet again a safari lodge which provides full facilities for the tourist.

Hunting safaris can be arranged for many of the game controlled areas. Taking out a license will often provide the hunter with exclusive rights to the particular area he chooses while here.

Hunting is expensive—average cost per day is around $275—but it is always possible to arrange a record trophy would cover the cost of the trip. Licenses vary according to the animal chosen.

For example a license to shoot an elephant costs $85.

Cost of hotels and lodges varies but around the $15 a day mark is a fair average for the whole of the country.
Objective English Exam Set For Undergraduates Saturday

The objective portion of the undergraduate English qualifying examination will be given at 9 a.m. Saturday in Farr Auditorium in University School.

All students who plan to graduate from the College of Liberal Arts and Science, the College of Education, the School of Business, the School of Technology and all students who plan to practice must pass the examination.

Exemptions from the exam will be made for students who have a 4.0 average or better in Freshman English Composition (English 101, 102 and 103, or GSA 101a and 101b), or their equivalent for transfer students.

Students in the College of Liberal Arts and Sciences and the School of Technology may satisfy this requirement by substituting a grade of “C” in the undergraduate English qualifying examination.

Students electing GSA 110 during the spring must complete the sequence by taking GSA 110 by the summer quarter of 1966. Spring and summer will be the only terms these courses will be offered. Each course is worth four credit hours.

The eight hours of credit received from these courses are sufficient to meet the GSA requirements in the 100 level. GSA 101a, b and c will not be needed.

Earth Science Is New GSA Series

Experimental Earth Science, a new two-term course in General Studies Area A, has recently been announced. The course, GSA 110A and 110B, is open to any student who has had chemistry in high school.

Students electing GSA 110A during the spring must complete the sequence by taking GSA 110B by the summer quarter of 1966. Spring and summer will be the only terms these courses will be offered. Each course is worth four credit hours.

The objective portion of the undergraduate English qualifying examination in place of English 300 or 391. These students may take the examination only once.

Students in the School of Business must pass the examination. There is no limit to the number of times these students may take the examination.

Students are required to bring their student identification cards to the examination.

Alton Firm's Education Program Launched by Former SIU Student

The first graduate of Alton Box Board Company's cooperative education program was appointed the firm's coordinator of personnel three months after his graduation, and supervisor of personnel 14 months later.

James D. Handley, who graduated from SIU in 1964, is the company's personnel supervisor.

Established in 1962, the company's cooperative education program allows students to work full time part of the year and continue their education the remainder of the school year.

Students participating in the program are carried as full-time employees and placed on an educational leave of absence without pay when they return to their studies. The program is usually completed in five years, depending on the university's system of quarters or semesters.

Handley, a former resident of Carlin, now lives in Alton. He joined the cooperative program at the end of his sophomore year and was assigned to the quality control laboratory.

Of his first training phase, Handley said, "A student interested in sales, personnel, engineering or any other area in the company receives invaluable basic knowledge of its operations during his initial working term." The student advances in employment according to the company's needs and the student's ability.

Any student with a minimum average of 2.5 on a 4-point system may enroll after completion of his freshman or sophomore year in college.

After graduation, the student is given a brief training period before he meets the company's executives who decide on the area in which he will work. The company is not obligated to employ the student and he is not obligated to accept the job. "Whether or not a student is employed," Handley said, "the program gives him invaluable experience."

Any students majoring in engineering, liberal arts, business administration or the sciences is welcome to join the program.

This term there are 19 SIU students participating in the program and five who are attending school after working in Alton.

Besides Handley, one other student, Gary Ashby, is now permanently employed by the company. According to Bruno W. Bierman, supervisor in student work, three to five students will be finishing the program in the spring and may decide to work for the company permanently.

Approximately 80 SIU students have participated or are now participating in the program. Three to eight students are added to the program each term.

The program has attracted students from other universities and colleges. They are University of Cincinnati, University of Illinois, University of Missouri at Columbia, University of Missouri at Rolla, Northwestern University, Purdue University, and Rockhurst College at Kansas City, Missouri.

Of 26 students currently enrolled in the program, 16 are working at Alton Box Board while the rest pursue their studies on their respective campuses.

J&J's are open seven days.

GRADUATE PROMOTED—James D. Handley (left), first graduate of the Alton Box Board cooperative education program and presently supervisor of personnel of the company, discusses a personnel assignment with Thomas H. Young, manager, industrial relations, of the company.

Jobs Available

For Camp Work

Interviews for sophomore, junior, senior or graduating student members interested in summer camp work will be conducted Wednesday of campus by Mr. and Mrs. Jerry Black, of Chicago, Ill.

The interviews are for positions with the Birch Tree Camp located in Minnesota. The camp caters to girls between the ages of 11 and 16. Counselors are needed in the following areas: tennis, sailing, gymnastics, camp craft and waterfront.

Interested students should contact Bruno W. Bierman, Leonard L. Lukaski or Robert D. Johns at the Office of Student Work and Financial Assistance before Tuesday.
Clark to Be Chairman
At Education Meeting

The annual meeting of the National Society of Teachers of Education will be held Feb. 16-19 in Chicago. Elmer J. Clark, dean of the College of Education, and president of the society, will preside.

The theme of this year's meeting, which will be broken into three general sessions and nine section groups, is "The Role of Teachers of Education in International Education."

Clark will preside over the opening of the Feb. 17 session, and will introduce the main speaker, R. Freeman Butts, associate dean of international studies at Columbia University.

Dorothy S. Ainsworth, president of the International Council of Health, Physical Education and Recreation, will be the speaker at the second session. Edward J. Shea, chairman of SIU's Department of Physical Education for Men, will preside over the session.

Shea has also prepared a special program, "Rhythmic Physical Activities Around the World," which will be presented by 80 children of Chicago public schools.

The third session will be held Feb. 19 in cooperation with the John Dewey Society. The speaker will be Robert Schaefer, dean of Teachers College at Columbia University.

Five hundred professors of education from all sections of the United States, including 35 SIU faculty members and graduate students, will be in attendance at the meeting.

Spanish, French

Offered Faculty

The English Language Center is prepared to offer French or Spanish instruction to members of the faculty, faculty wives, and staff members on both the Carbondale and Eldorado campuses.

Alfred J. Juzo, assistant dean of the Division of International Services, said students may set up their own flexible schedule of courses, although a minimum of six hours per week is recommended, and they may proceed at their own pace. The centers are open at 8 a.m., 10 a.m., 2 p.m. and 4 p.m. weekdays and on Saturday mornings.

Interested persons at Carbondale will meet at 7:30 p.m. Monday in the Fl Laboratory, when questions on the programmed instruction will be answered and other information given.

MAX SAPPENFIELD

Joan limit. Several technical amendments adopted brought the bylaws of the local union into conformity with recent changes in the Illinois Credit Union Act.

Crosby Elected To Scientist Group

Herbert A. Crosby, associate professor in the School of Technology, has been elected to membership in the Association Internationale pour le Calcul Analogique, a world organization of scientists and engineers concerned with analog computers.

The organization, headquartered in Brussels, Belgium, includes membership from the United Kingdom, France, Russia, Japan and Spain. Crosby will join with other members in an international exchange of scientific computer information.

Crosby is an electronics and computing specialist on the engineering and technology faculty. A native of St. Louis and a former research engineer for the McDonnell Aircraft Corp., he holds three degrees, including doctor of science from Washington University. He also has worked with the Lockheed Aircraft Corp., Burbank, Calif., and the Los Alamos, N. M., Scientific Laboratory.

Geologists to Hear Crime Discussion

Joseph Nicol, Joliet, superintendent of the Illinois State Bureau of Criminal Identification and Investigation, will speak at a geology meeting at SIU Feb. 11, according to Frank Bell, SIU geology seminar program chairman.

The meeting, open to all interested persons, will be at 8 p.m. in the University Center River Rooms.

Nicol will discuss how techniques in mineralogy are applied to investigating crimes, such as using X-ray and other instruments used in geology for identifying samples of broken glass, mud, or other substances connected with a criminal act.

Kraft Publishes Article
On Student Teaching

Leonard E. Kraft, assistant director of student teaching in the College of Education, has published an article in the January issue of the National Elementary Principal quarterly publication.

Entitled "You're Getting a Student Teacher," the article discusses the principal's role in working with the student teacher.
WASHINGTON (AP) — Permanent education and loan benefits for men and women who serve in the armed forces would be provided under a bill approved Thursday by the House Veterans Committee.

The Johnson administration has proposed that such benefits be limited to veterans who served in dangerous areas. It objects to the cost of the House committee bill, estimated at $335 million during the first year of operation.

About 31,200 non-veterans would be affected immediately, since it would cover servicemen who were in uniform since early in 1955, when the Korean War GI benefits program ended.

The Senate last year passed an even more costly version, estimated at $400 million in its first year.

First U.S. Try Not Before May

Soviet Luna 9 Sending Back Pictures From the Moon

(Continued from Page 1) Lovell also said the Russians had been shrewd in picking the landing spot for Luna 9. The rocket landed in a region that will be in full daylight for 14 days, he said, and solar power could continue to replenish its batteries. He said he had no idea when it would happen after the area went into darkness.

From Washington, President Johnson sent a personal message to the Soviet Union on the achievement, saying "all mankind applauds" the landing.

Vice President Hubert H. Humphrey, chairman of the National Aeronautical and Space Council, said "particularly do I compliment the Soviet authorities and experts on their stamina and persistence in attaining this lunar goal."

Four previous soviet attempts at a soft landing had failed. Jodrell observatory scientists said Luna 9 had sent facsimile pictures back to earth from the moon's surface. This aspect was not immediately announced in Moscow.

The brief Tass announcement on the landing—the first official word on the progress of the flight since it was launched Monday—gave only spotty details.

Nothing was said about the size, shape, construction or weight of the scientific instrument package. It is thought likely to be more than 3,000 pounds. Nothing was said immediately about the kind of data being beamed back to earth.

Soviet commentators soon beam out thousands of words in praise of the accomplishment.

One commentator asked how soon would a manned landing be made on the moon, 238,000 miles from the earth, follow. "American specialists believe that they will be able to send their fellow countryman to the moon until (sic) 1970. Soviet scientists prefer not to tie their hands by precise deadlines, bearing in mind the entire complexity of pilot flight to another heavenly body."

At Cape Kennedy, Fla., U.S. officials conceded that the landing gives Russia a lead in this important phase of the moon race, but does not necessarily give it the over-all edge.

The United States has the ability to lead in other areas—total man hours in space, longest space, manned flights, demonstration of maneuverable spaceships, rendezvous of two manned ships, and medical data.

The soft landing was the greatest Soviet space success since March 18, 1965, when cosmonaut Alexei Leonov became the first man to walk in space.

This was the last Soviet manned space flight and American astronauts have since taken the lead in length and sophistication of manned flights. Soviet cosmonauts have yet to rendezvous in space.

Since Leonov's flight the Russians have been concentrating—albeit so far as their announcements have disclosed—on a soft lunar landing so that they may step toward a manned flight to the moon on a softer basis.

The Russians have had more luck with their moon probes than the Americans. They were the first to land a rocket on the moon in September, 1959, and the first to send their fellow countryman to orbit around the Earth.
Private Talks Open on U.S. Bid
For U.N. Debate on Viet Nam War

UNITED NATIONS, N.Y. (AP) — After two days of debate on Viet Nam, the U.N. delegates Thursday began a round of intensive private talks that the United States regards as part of a new peace offensive.

The public debate may be resumed later, but informed quarters said President Johnson's primary objective in bringing the Viet Nam problem before the U.N. Security Council was to help stimulate further peace moves. The informal talks said this has been achieved.

The president was understood to have acted on a recommendation by Ambassador Arthur J. Goldberg and Secretary of State Dean Rusk after the administration had concluded last weekend that North Viet Nam's President Ho Chi Minh had slammed the door on the December-January peace offensive.

There are indications that the United States may be content to keep the U.N. negotiations on a private basis—at least for the present.

Future public debate in the Security Council, however, has not been ruled out. If agreement can be reached, for example, council members might decide it was desirable to formalize the accord.

Goldberg himself in participating in a round of consultations with members of the 15-nation council, he expects to talk with each member, including Soviet Ambassador Nikolai T. Fedorenko, informed quarters said he will be urging that the talks certainly will lead to new contacts with North Viet Nam and Red China.

A U.N. spokesman said Secretary-General U Thant also is engaged in private discussions. The spokesman said Thant "still feels that the discussions between the two neutral countries could contribute significantly toward a peaceful settlement" of the Viet Nam conflict.

Goldberg was reportedly to see at least a few signs that things are moving in the right direction. Informed sources said he had noted with interest his statement that a new Geneva conference is the proper agency for dealing with the Viet Nam problem.

Some U.N. diplomats, including French Ambassador Roger Seydoux, have placed stress on the importance of the Geneva group to deal with the issue. If agreement could be reached on convening the conference again, the United Nations might be satisfied.

Blaze Sweeps
Historic Hotel

METROPOLIS (AP) — Flames swept through the upper floors of a historic Illinois hotel Thursday forcing members of about 20 families to flee in 30-degree weather.

The three-story Julian Hotel is a brick and frame structure made popular in the late 19th century by riverboat passengers traveling the Ohio River.

Program Offered To Area Bankers

The School of Business and the Small Business Institute are now offering to local bankers an eight-session program on the legal aspects of credit and collecting as it concerns their daily creating, securing and collecting of debt.

Coordinators for the program, which began Jan. 26, are Michael P. Litka, assistant professor of management, and R. Ralph Bedwell, director of Small Business Institute.

A class of 50 bankers is attending the sessions which are held every Wednesday in room 308 of the Wham Education Building. Litka instructs the class and a guest speaker is featured at every meeting.

‘Open House’ Visits Replace Coeducational Living at SIU

By Margaret Perez

This doesn't look like SIU will get coeducational housing, at least in the near future, so students are attempting the next best thing—coeducational visits to dormitory rooms.

The attempt so far have been on a small scale in a form residents call "open houses." These open houses consist of a two to four-hour period, usually on a Saturday or Sunday afternoon, when students can make supervised visits to rooms of members of the opposite sex.

Northwestern University (Evanston) deans disagreed recently on whether students should be allowed to make the same type of visits, but on a regular basis, on that Illi­nois campus.

James C. McLeod, dean of students at Northwestern, said rooms are for studying and sleeping. "The rooms are clean, the beds are made, the student is not at home," he said.

The dean, who is also a professor of economics, argued that Northwestern has less open houses than SIU.

Taking a different viewpoint was Otis L. Walter, dean of men at Northwestern.

"It's nonsense to think these visits would turn into furtive sex trysts," Walter said.

"Northwestern has no student union, so it's very hard for the students to find a private place where they can study and talk," he said.

Walter said he would much prefer it if they were alone in univer­sity housing than in cars or bars, as is added.

The proposal was brought before the Northwestern University Student Senate and a modified arrangement, similar to SIU's, was adopted.

Thompson Point residence halls have been participating in open house for several years, according to Thomas P. Dardis, assistant to the area head.

The open houses are initiated by the individual halls and then cleared through the Student Activities Office. Exact rules and restrictions governing the conduct of the open houses have been left up to the discretion of the hall. At Warren Hall the residents are on the honor system, according to Michael G. Peck, president of Thompson Point.

"If a girl is in a guy's room, the dorm must be opened and the resident fellow must be somewhere on the floor," Peck said.

"Most of the guys enjoy the open houses and they don't get out of hand," he said. "In fact, at the last open house the girls all wound up in the R.F.'s room playing monopoly."

In other halls the door to the rooms does not have to be opened all the way. The rule was revised after male students began using matchsticks and toothpicks as wedges. Some female residents of Thompson Point take a dim view of these visits.

When a proposal to have an open house for Valentine's Day came up at a floor meeting, one voiced her disap­proval by saying, "How don't get me wrong, it's not my guy that I'm worried about; I have characters; my roommate will bring in."

Marion Trip Set

For Skating Party

A roller skating party will be held Feb. 19 at Poe's Skate Inn in Marion.

The party, sponsored by the recreation committee of the University Center Program­ming Board, is open to all students and staff.

A bus will leave the Uni­versity Center at 7 p.m. and leave the rink at 9 p.m. Any­one wishing to go must sign up in the Activities Office before noon Feb. 18. Cost for the trip is 50 cents.

Student Pleads Guilty To Intoxication Charge

Sam M. Jones, a student from Nashville, III., has pleaded guilty before Magis­trate Robert Schwartz, on a charge of public intoxication.

Cardonald police arrested him about 1:20 p.m. Jan. 22. Jones has been given a report as President by University of­ficials.

HONDA

PARKING TICKET

That's Honda. Just the ticket for parking on crowded campus lots and, in fact, anywhere at all. Ride your Honda right up to your class, if you like. If the teacher gives you a funny look it's because he'd like to have one.

Call your campus repres­entative now.

Two Major Housing Projects Await Board Action Feb. 24

Transactions involving two major campus housing projects are scheduled for the agenda of SIU’s Board of Trustees when it meets in Chicago Feb. 24.

One will be a contract delegation on a multiple-unit apartment project for married students and staff members. The other will be $12 million revenue bond sale covering construction of two 17-story residence halls and a commons building for 1,500 single students.

Bids were received Tuesday on the apartment project, which also be funded through a $4 million loan to the SIU Foundation from the Federal Housing Agency. It was the second call on proposals, earlier ones having been called off by the Board for other projects.

Willard Hart, associate university architect, said four bids have been received with a recommendation that the bids be approved for the Feb. 24 Board meeting.

Subtracting FHA fees, taxes, legal fees, and other items from the total $4 million, SIU set a $3.43 million on construction funds available for the apartments. Bidders competed on a "one set of variables"—the number of units to be built and the per-unit construction cost of each. Factors to be weighed in the award will be type of construction (within minimum FHA standards), extra furnishings available, and "lifetime expectancy of the buildings."

Bids received (number of apartments and cost per unit) were:

Midland Developers, Harrisburg: 280 units at $11,714 each.

Scholz-Consumers Construction Co., Chicago: 204 units at $11,580.

National MCI Construction Corp., Urbana: 348 units at $9,923.80.

McCarthy Brothers Construction Co., St. Louis: 270 units at $12,114.66 apiece.

The apartments will be built southwest of the main campus near the city reservoir and park.

Of the bonds to be sold for Brush Towers, up to $5.1 million will be purchased by the Federal Housing and Home Finance Agency at a 35/8 percent interest, according to Controller Robert Gallagher. Bids have been asked for the remaining $4.9 million. The bonds are anticipated to be sold on the commercial bond market.

VISTA to Wind Up Recruiting; Response Here Called Good

Three recruiters for VISTA (Volunteers in Service to America), or the domestic Peace Corps, have been active in the Carbondale area, and have been involved in the recruitment activities of the program.

The program, which is one year old, now has 1,193 volunteers in service and 200 more in a six-week training program. VISTA’s goal is 4,000 volunteers by June.

Dorothy McCall, one of the recruiters on campus, said the main thing that is looking for in its voluntary program, and understanding so they can deal with local political situations.

Miss McColl stressed the points that VISTA candidates are outside volunteers when they are called for. It does not send money with its volunteers. Communities or areas using VISTA volunteers must apply for funds under some other portion of the Equal Opportunity Act of 1964, the legal basis for VISTA.

Because the agency works only in areas where it is asked for, Miss McCall said that it must be careful not to antagonize established social agencies or local political candidates.

VISTA does work in many areas. Among them are urban projects in places like the North (Colo.) Juvenile Court, the Henry Street Settlement House in New York City and a youth employment program in New Rochelle, N.Y.; rural projects in Virginia, Tennessee and Arkansas; work with migratory workers in New Mexico, New York and Texas; work on Indian reservations; and work with the mentally handicapped.

A VISTA volunteer assigned to the Job Corps summed up his job with these words: "I am a public relations man, chauffeur, banker and pawn shop operator. I am a tailor, medic, friend, buddy, information man. I am Public Enemy No. 1 and the greatest pal in the world."

There are few requirements for VISTA volunteers. The main ones are 18 years of age (there is no maximum age limit), and a willingness to work and communicate with people.

Miss McCall said one of the main questions has been asked by students in "What about the draft?"

Her answer is that draft status is up to local draft boards. She said many draft boards have been very cooperative in granting deferments for VISTA volunteers.

According to her, SIU student responses in the first day and a half was very good. Twenty-three students had signed up to take final applications for VISTA.

Miss McCall said also that student awareness of the program seems to be very high here, although there were some who came up and wanted to know just what VISTA was about.

VTI'S Aviation Program Accredited

The SIU Vocational Technical Institute's two-year aviation technology program has been granted full accreditation by the Federal Aviation Agency.

The program is one of eight university-affiliated in the nation. Final accreditation was given following a two-day inspection last week by the FAA, according to E.J. Simon, head of the Division of Technical and Adult Education.

Students are trained for jobs in aviation maintenance, general aviation, repair stations, and service of corporation aircraft. They receive their training at recently completed facilities at the Southern Illinois Airport.

Graduates of the two-year program receive an associate in science degree. They are prepared for the FAA airframe and power plant license, student's degree, a 2,000-volume reference library and teaching equipment valued at $1.5 million are available to them.

VTI AVIATION SCHOOL APPROVED—Federal Aviation Agency inspectors Edward Pontarelli and Henry Dierksman, Springfield, and Edmund A. De Kosa, coordinator of the VTI aviation program, talk with students during FAA final inspection of a two-year aviation technology program. Accreditation was given following a two-day inspection last week.

Nancy's Lists for Fall Quarter

Luke, L. "Nancy's Lists for Fall Quarter"

Do not hallucinate.
The Salukis remained on top of the small college basketball polls of both wire services this week for the sixth straight time.

The Salukis got 31 of a possible 35 first-place votes and finished only eight points short of a perfect 350 points in the United Press International poll. The Associated Press, meanwhile, gave Southern eight of a possible 15 first-place votes.

North Dakota, which suffered its third loss in 19 games last week, is still in second...

...and unranked by AP and UPI, neither is rated.

Salukis to Face Olethorpe Saturday Night
Stormy Petrels Ranked 10th in Nation by United Press Poll

The Salukis close out the current three-game home stay with a 9-0 win over Tennessee State on Saturday night when they meet highly regarded Olethorpe College. It will be Southern's last home engagement before taking to the road Monday against Tennesse State. The home series started earlier this week with an 83-72 victory over Central Missouri, followed by a 71-67 squeaker over Missouri. The two victories increased Southern's home string to nine in a row this year and to 25 straight going into the Arena a year ago. The only loss was to Evansville in the last game last season.

The Salukis could need all their home-court luck against Olethorpe. The Stormy Petrels of Indiana are coming North this week to United Press International after a strong showing against Chicago State. The reason for the drop is two recent losses to Valdosta State and Florida. The Petrels are ranked sixteenth in the nation for the best won-loss percentage among active coaches. Olethorpe has lost three straight games, but they have seven lettermen back from last year. Three of those lettermen are reserves.

Since Olethorpe's rise to prominence in college ranks they have had Coach Garlan Pinholter. When he came to Olethorpe 10 years ago, the team had been on a losing streak before the Atlanta YMCA team. Since then, however, his teams have won 173 and lost only 63 games to place them 18th in the nation for the best won-loss percentage among active coaches.

The starting forwards will probably be Doug Alexander, a 6-1 sophomore, and either 5-11 Bill Garrison or 5-9 Wayne Johnson. These three are in excellent condition, but Earl Blair, a highly touted 6-1 freshman, could also have a shot at starting.

Winning has got to be quite a habit at the little Atlanta, Ga., college of fewer than 700 students. Last year's 11-12 finish was one of the few losing seasons the Petrels have had in the last decade. Their best year was 1963 when they finished third in the NCAA college division with an overtime victory over Southern.

One of the main reasons for Olethorpe's rise to prominence in college ranks is the way the freshmen and sophomores, although he has seven lettermen back from last year. Three of those lettermen are reserves.

The Petrels will probably be led by either Walker Heard, Bill Phillips or Paul O'Shahe at point guard. Heard, a muscular 6-7, 210-pounder, is one of the returning lettermen from last year when he averaged 11 points a game. O'Shahe and Phillips are both 6-7 freshmen.

The starting forwards will probably be Jerry Sams and Paco TIllo, both 6-5 lettermen. Sams, a sophomore, averaged five points a game last year as a reserve. TIllo is a junior returning after a year in the nation's best playing 6-7 forward, and the other starting forwards will probably be Doug Alexander, a 6-1 sophomore, and either 5-11 Bill Garrison or 5-9 Wayne Johnson. These three are in excellent condition, but Earl Blair, a highly touted 6-1 freshman, could also have a shot at starting.

ROGER LITTELL

FRESHMEN HIT 100-POINT MARK

In Defeating Junior Billikens

It was homecoming for St. Louis University's Tommy Thomas, but the SIU freshmen did most of the celebrating, handing the junior Billikens a 100-79 loss.

The freshman game was preliminary to the SIU-Southwestern Missouri State varsity game Wednesday night in the Arena.

Thomas, who starred for nearby Carthage High School, had his own cheering section, but in the end it was Southern's Rich Hacker, who was getting the cheers.

By 57 seconds left in the game Hacker covered the bench, his free throw putting the Salukis fresh at the Sears Tower for the first time this season.

Six Salukis scored in double figures with forward Will Griffin leading the way with 18. Griffin was followed by guard Creston Whitaker and center Chuck Benson, both of whom scored 9.

Other scorers in double figures for SIU were 14 points by 6'10 1/2 freshman Walt Anderson and 12 and 10 from Anderson and 6'6' 1/2 Bison.

SIU fans were基本 Riders Association.

To Draw Schedule

"Southern Riders," Association of SIU fans, will meet at 2 p.m. Sunday in Dickey Hall at the Southern Illinois University campus to select the schedule for the Salukis to travel in the coming season.

The group will meet to set the schedule for Southern Illinois University fans and to select their favorite items for the Eastern Illinois University game.

Education Sessions To Begin Monday

The World Book complete educational plan, a two-week session which was scheduled for this week and next, has been postponed until Monday because of bad weather.

Salukis to Take On Birds in Track

A javawb is a fictitious bird with a big beak used as an emblem in Kansas, but there's nothing fictional about the powerful Jayhawks that the SIU track squad will be meeting today in Lawrence, Kan.

A 19-man squad from SIU will travel to the University of Kansas, but Coach Lew Hartzog feels that only one man, shotputter George Woods, has a sure chance of winning.

Woods set a mark of 60 feet, 3 inches at the Illinois Open meet last week.

Oscar Moore also set a record at that meet, which was dominated by SIU, but he will be in Philadelphia, Pa., Saturday for the Inquirer Games.

Moore will be running against a select group of six international distance runners.

Indoor meet, the Jayhawks outscored the second-place Salukis 90-26.

SIU enters into today's meet:

Pole vault: Rich Ellison
Long jump: Incharte, John Vernon and Darrell Stein.
High jump: Tom Ashman and Mitch Livingston.
Shot put: George Woods, Joe Janacek and Ralph Galloway.
Mile run: Al Ackman and Jeff Duxbury.
60-yard dash: Ross Mackenzie, Robin Coventry and Ed Richards.
600-yard run: Jerry Fendrich and Janacek.
440-yard dash: Gary Care, Mackenzie and Robin Coventry.
100-yard high hurdles: Frank Whitman, Richards and Livingston.
60-yard low hurdles: Liv-

Advanced Study in Reading Provided in $52,000 Grant

A $52,000 grant has been awarded to the SIU Reading Center to support an institute for advanced study in reading for elementary school teachers, June 27 to Aug. 5.

The grant was provided under the National Defense Education Act, according to Margaret Kenner Hill, professor of education and director of the Reading Center.

Enrollment for the institute will be limited to 30 participants who are teachers of reading in elementary grades in either public or private nonprofit schools. Graduate credit will be offered.

Southern received the grant by submitting a proposal to the U.S. Office of Education. Experts in reading judged the proposal and Southern was selected as one of six American schools to establish a reading institute.

Mrs. Hill, director of the institute, will be assisted by J. Lawrence F. Hafner, assistant professor of education. Coordinators are Phyllis W. Smith, SIU doctoral candidate, and Alberta Hazel, reading consultant in the Clinton (Iowa) Community Schools.

Wilma Boswell and Shirley Woodrome, elementary teach-
ers from Dr. Andy Hall School in Mount Vernon, will be demonstration teachers and resource consultants.

Final applications for participants must be submitted to the director by March 21.

SIU Group Aids Chapter at WIU

Seven members of SIU beta chapter of Alpha Zeta, national agricultural honorary fraternity, recently took part in the installation of an Alpha Zeta chapter at Western Illinois University, Macomb.

The Alpha Zeta Chapter was established at SIU five years ago.

The seven members were Brian E. Bremer, Metropolis; Donald L. Paulson, Caledonia; Raymond R. Roescker, Mount Carmel; Bernard K. Colvis, Chester; Donald I. Knepp, Washington; John M. Hough, Athens; and Robert Miller, Oregon.

Walter J. Wills, chairman of the Department of Agricultural Industries, accompanied the student delegation.
