Troop withdrawal is issue

U.S. still rejects Communist peace plan

PARIS (AP) - The United States on Thursday rejected Communist demands for a quick withdrawal of American forces from South Vietnam but made moves to negotiate the first phase of a U.S.-backed peace plan in private talks.

The Communist delegations turned down the bid for private sessions. A Viet Cong spokesman said after the 12th peace talks session the form of meetings could be discussed at the United States' request to be held in U.S. private talks.

U.S. Ambassador David Bruce and South Vietnamese Ambassador Pham Dang Lam poured cold water on much of the seven-point Viet Cong peace package submitted last Thursday.

However, they said they are willing to explore it more deeply to clarify obscure issues.

Bruce said although there were "new elements" in the plan, basic Communist demands seemed unchanged. He said the United States agreed to get out of South Vietnam by the year end of 1972 and that an agreement would be agreed upon for the "release of the totality of military and civilians captured in the war, including American pilots captured in North Vietnam, so that they may return home to their homes. These two operations — withdrawal and prisoner release — will begin on the same date and will end on the same date."

Bruce asked in his speech if agreement on "modestities" was not merely a "variation of your previous statement that the parties will engage

at once in discussion on prisoner release."

This was a major sticking point in previous Communist proposals on prisoner release. They gave no indication how long such discussions would continue.

Bruce also said the Communists must release prisoners they hold in Laos and Cambodia — not only in Vietnam as stipulated in the new peace plan.

Both Bruce and Lam raised the issue of a political settlement as laid down by the Communists.

"You continue to insist that the present government of the Republic of Vietnam must be replaced by one which fulfills your own criteria," Bruce said. "We will not impose any government on the people of South Vietnam, who must determine for themselves their own future."

U-Council requests more revamping time

By Sue Reil
Daily Egyptian Staff Writer

The University Administrative Council recommends that the period of reorganization of SU be extended to June 30, 1972, and that a permanent president for SU not be appointed during that time. These proposals came in a report to the Board of Trustees which was released Thursday.

The report states that all remaining central operating units can and should be decentralized and that the University should have operational autonomy by no later than June 1972.

The report states thatÃ¢ÂÂthe period of reorganization for the University had been scheduled for completion on September 1, 1971. The council was established by the Board last summer followed by the recommendation."

The council will attempt to reassess many responsibilities of the UAC chairman as possible to the chancellors and the chief of board staff by August 31, 1971.

The report states that the question of a permanent president or system of officers will depend upon the determination of a need for centralized functions and activities by the council.

The council expects the roles of the chancellors and the chief tenant staff to become clearer as operational autonomy for the campuses is established. This also could affect the necessity of the position of president in the University. The report suggests.

Two sections of an appendix in the report dealing with the chief administrative authority of the University are still under revision and will be released at a later date, according to William Lyons, information officer for the Board.

Harrison inquest date set

An inquest into the death of SIU student Hubert W. Harrison, whose body was found in the University School on April 3, will be held July 5, Jackson County Coroner Harry A. Flynn announced Thursday.

The body of 23-year-old sophomore from Kirkwood, Mo., was found in the shallow end of the pool in Pullman Hall shortly before 1 p.m.

Flynn said the hearing to determine the cause of Harrison's death will begin at 7:30 p.m. and will be held at the University School.

The coroner said witnesses will include Edward J. Shie, chairman of the Department of Physiology Education for Men; Irvin Spige, associate professor of instructional materials, and Edwin E. Legg, instructor of a swimming course in which Harrison was enrolled.

Flynn said an autopsy report from Dr. L. J. Rombauer, pathologist at Carbondale Clinic, will also be read into the record.

The autopsy report was delivered June 28 to Flynn, who had said earlier the inquest would be delayed until the report was completed and the witnesses were available.

Shie and Spige were swimming in the pool when the time Harrison's body was discovered.

The swimming pool in which Harrison was enrolled was dismissed at 17:45 p.m. and another class occupied the pool for half an hour before his body was found.

Country complainer

Gus Bode

Gus says if the Administrative Council is doing a good job as president, why don't we appoint a committee instead of a chancellor?
**Summer Theater opens with zany 'Tobacco Road'**

---

**State seeks Powell estate**

SPRINGFIELD, Ill. (AP) — The state of Illinois has filed suit against cereal maker Joseph G. Powell, who's a resident of Illinois, to establish the executor of the estate. John B. R. Stead, a lawyer with the office of the Illinois Attorney General, said he was appointed by the attorney general as a special agent to investigate the Powell estate.

---

**Grandma Lamont**

The old lady creeps about the place, alternately kicked and mistrusted by the rest of the family. Nobody really cares when she is sent off to get her groceries and doesn't return by the next morning. The farming cast is rounded out by David Miller, Daniel Crane, and Ralph Geyene in small supporting roles.

Gray is assisted in the production by Albert Heinz, assistant director, Larry Connor, stage manager, and a hard-working technical crew of some 30 people. The beaten-up costumes are particularly effective, with torn overalls and beat-up boots for the older ladies. Kaden to Gray for establishing the mood of the play so thoroughly in both direction and the details of production. The use of a dirty, broken-down stage set, country music in between acts and a "live" auto-ontage add to the surprising reality of the play. Gray's use of a film made in an actual Tobacco Road area shows his flair for the unusual. It climaxes the production perfectly and poignantly.

Family Recital 8 p.m., Home Economics Auditorium.

City to discuss reservoir funds

How will the money to meet bond sale requirements for Cedar Lake Reservoir be met?

This will be the issue which the Carbondale City Council will deal with at their special meeting at 7:30 Tuesday night.

Assistant City Manager Jerry Maxwell said Thursday the city is "very close" in meeting its 1.3 bond rate coverage factor. If the amount is not met, however, Maxwell said "anything it takes to build Cedar Lake is going to be given serious consideration."

Under the current rules and regulations governing utility system, Maxwell said, "the city has the right, but not the ability to charge water users outside the city limits up to one and one half times the city rate. He added, to this time, the billing capabilities have not been such as to allow the computation of two different rates, but future Carbondale is now in the initial stages of computer billing, the different rates are a possibility."

An additional way to raise revenue if the bond sale factor is not met, is an over-all hike in city water rates, said Maxwell. He added, however, this rate would probably not be more than five or six percent. A five percent hike in the minimum water bill would amount to 15 cents monthly, he said. According to Maxwell, decisions can be voted on Thursday night since it will be a formal Council meeting.

C.E.E.B. Exam, 8 a.m.-4 p.m.

Letters to the editor

Stauber's wild charges attract criticism

To the Daily Egyptian

To recommend Prof. Leland Stauber's wild charges have become more and more ridiculous. Recently he has been attacking Edward Hammond, apparently Hammond, utilizing normal administrative channels, not agreeing with Stauber's charges concerning disruption. Stauber has attacked Hammond and questioned his capacity to carry out his University responsibilities. Obviously Hammond, who attended the Milton Seeks lecture, is incapable of perceiving the evil as evil. Stauber, however, seems to consider the possibility that he may be wrong.

Stauber also attacks Chancellor Robert Layser. Not only does he question the Chancellor's basic character, he suggests that the chancellor may be lacking in the necessary courage and in such a case, should consider resigning. Of course, it is not possible that Stauber is wrong.

Next, Stauber attacks the Hearing Committee, which recommended that charges against Allen be dropped, for not facing up to its responsibilities. The committee clearly lacked integrity because it was looking for a "way out" and finally found its "excuse." Obviously it never occurs to Stauber that his charges may be defective.

Finally, Stauber attacks the whole University structure for its inability to deal with his kind of complaint, when in fact the University keeps dealing with his complaints and finds them suspect again and again and keeps finding Allen innocent of Stauber's charges. This means to Stauber that the University structure is defective. It is clear that Stauber demands a perception, courage and responsibility of which most at the University are incapable. In fact, I have the feeling that his dogmatism and self-righteousness would be more fitting for Spanish Inquisitions or Salem Witch Trials than for SU.

Hoppe looks at declassification

By Arthur Hoppe

The Supreme Court's landmark decision on freedom of the press has the government in a lather. Henceforth, it will be most difficult to prevent the newspapers from embarrassing the government by publishing classified documents - of which the government has zillions.

But never underestimate the government's ingenuity. Trygymnizing the press in its efforts to publish more classified documents, the government's now declassifying documents as fast as it can.

It's no easy job. Newsweek reports the Defense Department alone has enough classified papers in "files," we should be aware, to "fill six million cubic feet of file cabinets."

But a start has been made. The first declassification hearing has already been held with top-level representatives of all departments present.

A transcript follows.

Mr. Kissinger. Speaking for the White House, gentlemen, we strongly support the people's historic right to know - especially since they're going to find out anyway. Government secrecy, we feel has never been the American way. What's the first document for our consideration?

General Zapp. I have it here: sir: It concerns plans for an amphibious assault.

Mr. Kissinger. On North Vietnam?

General Zapp. No, on Trenton, N.J. Perhaps if I read it aloud. "To: All personnel from: G.H., Classification: Eyes only subject: Amphibious assault on Trenton, N.J. Date: 31 December. All personnel will prepare to embark at 2300 hours to cross the ice-logged Delaware River. Intelligence reports the Hessin enemy are filled with Christmas cheer and should easily fall victims to a surprise attack. I shall take my place standing erect in the lead

Clerk. Excuse me, sir, what shall I do with this transcript?

Mr. Kissinger. (frowning): Stamp it, "Classified," of course, and lock it up.
Goldwater deserves apology

By Jeffery St. John

I saw this nation risking war the way it is going. Sen. Barry Goldwater stated in Los Angeles on May 17, 1964: "It not only risks, but has a war in Vietnam—and with no plan to end the fighting."

The publication of secret Pentagon papers by the New York Times documents the degree to which President Johnson deceived the American public on Vietnam, as Goldwater had maintained throughout the 1964 presidential campaign. From one, however, is that documentation should come from a newspaper that endorsed LBJ in 1964 and said of Goldwater that he was a man totally unfit on the basis of his views and votes to be president.

The Pentagon papers, according to the Times, reveal that the Johnson administration "intensified the covert warfare against North Vietnam and began planning in the spring of 1964 to wage overt war a full year before it publicly revealed the depth of its involvement. Such deception is supported by a close analysis of the numerous public comments LBJ made during 1964."

"More than one million American men in uniform are now stationed outside the United States... LBJ's March 19, 1964, foreign and message to Congress stated: "As insurance to avoid involving them and the nation in a major conflict we propose to spend through our aid program."

In April 11, 1964, Chicago speech, Goldwater accused Johnson of deception and "turning out the lights of world leadership; of conscience, honesty, of strength and courage."

Later at a May 13, 1964, rally in New York City, Goldwater asked: "How about a foreign policy so mysterious, and so hard to understand, that Johnson had to offer us secret briefings to explain it? I say we need less secrecy in our foreign policy, not more."

Later in August, shortly after the Gulf of Tonkin incident, Goldwater was asked at a Newport Beach, Calif., press conference about the clash between North Vietnam PT boats and U.S. destroyers. He replied: "I think the American people are entitled to ask some questions of their own in this regard. Does the presence of American destroyers in the area signify the possible landing of larger American ground forces? Does it mean medium bombers are going to be used to interdict supply lines? Does it mean a change is taking place in foreign policy at the White House and State Department levels?"

Now revealed in the published Pentagon papers is a series of cables and memorandums that shows throughout August, 1964, that LBJ was gearing up the nation for war after the 1964 presidential campaign. Yet, Johnson told a crowd at his Texas ranch on Aug. 29, 1964: "If I had had the advice to load our planes with bombs and drop them on certain areas that I think would curtail the war and escalate the war, and result in our committing a good many American boys to fighting a war I think ought to be fought by the boys of Asia."

As must know, the 1964 landslide victory of LBJ was due almost exclusively to the characterization of Goldwater as "trigger happy" and a person who would plunge the country into war.

"It was too bad the president would not level with the American people," Goldwater said when the Times published the Pentagon papers. "It would have been better for the American people to have known about it."

And better for them to have been able to make an honest choice in voting for a president. (St. John is a CBS Radio Network "Spectrum" commentator and is seen fortnightly on the NBC-TV "Today" Show.)
Genetic defects studied

Yeast provides cancer clues

Editor's note: This is the second in a series of articles on cancer research at SU.

By University News Services

The Yeast Research Group at SU's Carbondale campus, which won one of several major awards on cancer by University researchers, is concentrating its attention on several studies based on the idea that the development of cancer may involve a hereditary genetic alteration and a consequent change in the regulation or control of cellular metabolism.

"Yeast cells," Director Maurice Ogur explained, "often display the same kind of genetic defects or lesions that are found in humans and should provide good laboratory models for the study of genetic defects, including cancer. If genetic defects arise from errors in the DNA tape and cancer arises from certain DNA changes in body cells, then we may expect yeast research to contribute to cancer research. DNA—short for deoxyribose nucleic acid—is the chemical substance which "programs" the cell to carry out all its functions."

Ogur and his students are studying metabolic control mechanisms "which we find very similar in yeasts and animals," he said. Dan O. McClary, another member of the group, is carrying out electron microscope studies of cells with genetic lesions in regeneration, while Richard A. Gilmore, molecular geneticist, is attacking problems dealing with gene suppression mechanisms.

"We are hoping that out of this multiphase approach will come practical means for repairing or circumventing genetic lesions and helping patients with such problems well again," Ogur said. "In some microorganisms, we can already put in a new piece of DNA which gives the correct signal, and the cell will repair itself, or we can insert a virus which has a piece of a gene attached to it to accomplish the repair."

Ogur's research has received support from the American Cancer Society for 10 years.

Office merger by Graphics and Publications

SU formerly had an Office of Publications and another office called Graphics. Now there's only one, according to A.B. Muffin, coordinator of Graphics and Publications.

March was the official date of the merger of the two offices, but it wasn't until the move to 600 W. Freeman in May that the office took on the combined titles of University Graphics and Publications, Muffin said.

He said that his office has an agreement with the University Book Store to be sole distributors of the 1971 undergraduate catalog. Although students still come to 600 W. Freeman, he explained that it might be more convenient for them to get the catalogs at the centrally located book store in the University Center.

Part of cancer research

Director Maurice Ogur of the Yeast Research Group shows two graduate students how to read the data from the Giflord 2000 instrument. Lasilma Cheung (center) from Hong Kong and Irene Philisvildis of Chicago watch the mechanism used to determine protein concentration and enzyme activity in yeast cells. Enzyme deficiencies or excesses cause gaps in the genetic code which may produce lesions in yeast cells similar to certain human cancers (University News Services photo)

School's out, kangaroos still wait for bus

KENDALL, Calif. (AP) — There is no school these days, as in the past, to hold back 10,000 or 15,000 students who may choose to hear the kids calling them by name.

Rooftop-people says he has only the name of the first school of a country.

I guess you want to make them do something else, and I have 10 acres of lovely land here which is simply right for them, and I can do it.

Rooftop-people 16-year-old sports show manager, says he started this and

you're not far out of Rooftop-people's 12-year-old kid, who has been hanging around the Moon for 15 years with "Original Deli.

The neighbors are used to them and the kids make the school bus wait until they come when called.

Rooftop says: "What brings strangers is the sight of Sydney sitting in the station wagon, and we are sure he is part of Rooftop," and he says he is the bus driver.

The following members were absent: Hupe Beckett, Lonnie Johns, Williams Davis, and Ramsey Davis.

The loving, living Lesters

"Tobacco Road", the season opener for SIU's Summer Theater, is visually rich in its treatment of the down-and-dirty Lester family and their misadventures. Upper left: Lov Boseny (Debra Book) struggles with his wife-in-name-only, Pearl (Peggy McGrath), to persuade her to return to him. Upper right: Sister Beauss Rice (Sandra Taylor, center) leads the Lesters in a prayer session. Kneeling with her are (l to r) Lester Lester (Bob Zay), Grandma Lester (Brenda Verrilli) and Ada Lester (Gina Swain). Lower left: Sister Beauss offers a special message to the Lord for her husband-to-be, Dude Lester (Bill Ganey). "Tobacco Road" opens at 8 p.m. Friday in the University Theater with additional showings on Saturday and Sunday night. (Photos by Mike Klein)

South Viets in new Cambodia drive

SAIGON (AP) - South Vietnamese forces launched a new drive into Cambodia Thursday, with 40 U.S. helicopters landing 1,300 men in the old battleground of the Parrot's Beak.

The landing took place from 10 to 20 miles inside Cambodia and the troops headed toward Svay Rieng, a provincial capital about 45 miles northwest of Saigon near the western edge of the beak.

Simultaneously, 1,500 South Vietnamese who had been operating around the Cambodian town of Kompong Thrach began moving south toward Svay Rieng 30 miles away.

Lt. Gen. Nguyen Van Minh, commander of the 3rd military region around Saigon, who is directing the new operation, hopes to trap a 400-man North Vietnamese supporter battalion believed to be in the area.

Other objectives are to disrupt enemy supply lines, uncover arms caches, and to slow North Vietnamese infiltration toward the Saigon region.

The drive is centered in flat marshlands straddling Highway 1 in a section of eastern Cambodia put into South Vietnam. It has been used by the Communist forces as a staging area for operations against the Saigon region.

The Parrot's Beak was one of the first areas invaded by U.S. and South Vietnamese troops in the big offensive into Cambodia in May and June last year.

In South Vietnam, the battlefront had persisted another day. The allied commanders reported only small patrol skirmishes.

B-52 bombers resumed their pounding of North Vietnamese positions just before the demoralized enemy awoke from a one-day pause.

Four waves of B-52s hit the northern sector, three of them within a five-mile radius of Piro Base Fuller, a South Vietnamese outpost four miles south of the DMZ.

The other raid hit in the northwest corner of the country, some 50 miles from the Laos border. Targets for the raids were suspected North Vietnamese troop concentration, bunkers, mortar sites, antiquated gun positions and storage depots.

Only two miles south of the DMZ, South Vietnamese infantrymen took over control from American troops of Can Tho, a stronghold on the allied defense line which has been renamed Piro Base Alpha 4.

Students talk
in programs

By University News Services

More than 60 international students participated in 24 programs and speaking engagements in 12 communities during the first three months of the year, according to a quarterly report released by the Visiting International Student Association (VISIA).

The non-profit, non-political organization, comprised of some 60 universities, provides a speakers' bureau to provide lectures and other programs for international students.

Requests for speakers and performers come from TV and radio stations, grade schools, churches and organizations ranging from the Rotary Club to Know Your Troops, according to the report.

Immunity given
theft witness

CHICAGO (AP) - Camille Landy, 36, of Chicago, was granted immunity from prosecution in connection with the theft of more than $1,000 from the Chicago Flames, which was agreed to in connection with a plea-bargain indemnity.

Miss Landy andabroadman Fred Hudson have been charged with both as co-conspirators with the Illinois State Police.
Extension requested by Council

(Continued from Page 1)

Presently the council members include Carbondale Chanceller Robert G. Leyer, Edwardsville Chancellor John E. Bendleman, System Vice Presidents Isaac P. Bracht of Carbondale and Ralph R. Ruffner of Edwardsville, Clarence F. Ruml, president; and James M. Brown, chief of board staff, a non-voting member.

The report recommends that beginning September 1, the council be composed of the two chancellors, one system vice president, a chairman and the chief of board staff. Under the system the chairman and the system vice president would be given administrative and coordinating responsibility for the remaining central sector of the University until decentralization is effected.

They would also have joint responsibility as agents for the development or further decentralization and evaluation recommendations of the council.

Onced the continuing existence of the UAC, all council members will continue to report directly to the Board of Trustees. The report states that an evaluational decentralization mode toward completion, relationships with the state government and Illinois Board of Higher Education are expected to become increasingly the responsibility of the chancellors and the chief of board staff.

The primary responsibility for communication and coordination in this regard would continue to rest with the chief of board staff.

The council reports that 34 units have been decentralized and transferred to the chancellors and six units have been retained for further study but had been tentatively assigned.

Areas remaining to be decentralized include nine units and seven functions of the University.

These units include alumni services, SUU Foundation administration, administration of the AID grant for Vietnam studies, broadcasting services, international services division, international education, budget office, data processing and computing, Fuller projects, institutional research, treasurer, auditing and international program development.

The seven remaining system functions include records management, University calendar, recommended revisions of Board of Trustees bylaws and bylaws responsibilities of the UAC chairman.

Mercury control regulations possibly violated by SIU

By Courtland T. Milhay Jr.
Daily Egyptian Staff Writer

After studying about 270 samples of sewage produced by SIU the Committee on Pollution Control (CPC) believes that, at certain times, mercury control regulations are being violated by the University.

Though SIU does not deposit large concentrations of mercury in the sewers, regulations state that no more than 6.5 parts per million mercury per one billion parts sewage be permitted, he said.

The sampling revealed that daytime mercury concentration in the sewers was higher than at night. "This was probably due to the increased day operations of those facilities using mercury," he said.

These preliminary findings are a part of a study by CPC to determine whether SIU is releasing mercury as a pollutant in its sewage.

Because all the figures, graphs and standard deviations have not been completed, the extent of the mercury concentration is not known. (Cayley stated, however, that SIU's mercury deposit was not high and it appeared to exceed the permitted standard only at times.

The three-month study by the CPC was prompted by the adoption of stricter mercury control standards and regulations by the Illinois Pollution Control Board.

The new regulation stated that mercury is a toxic substance which has not been recognized as an environmental hazard in the United States since March, 1979. Mercury poisoning can cause death or severe damage to the nervous system and kidneys.

The regulation requires that every person within the United States who uses mercury or any of its compounds in excess of 15 pounds per year or who discharges mercury or its compounds into waters of the U.S. must file with the Environmental Protection Agency. Also, a list of type and quantity of mercury used and what measures are being taken to reduce or eliminate mercury discharge must be submitted.

Cayley said all individuals using mercury on campus should familiarize themselves with the regulations. The University, he said, had been directed by law to follow them.

Civil servants close dollar gap

WASHINGTON (AP) - The poor civil servant of legend, hanging on to a government job only because of the security it gave him, has graduated into the affluent society.

Over the past decade federal employees have closed the gap on private industry, riding a high-speed escalator that has produced five salary increases since 1982, when the government launched a program to upgrade federal pay.

Among the results of that program:

- The average federal employee covered by civil service earned $1,000 during the last fiscal year, and a 6 percent raise in January guarantees this year's figure will be higher.

- The annual average pay for the government's version of a middle management junior executive has increased $6,000, pay for the top grade under civil service, GS-15, has doubled to $38,000.

- The federal payroll also has doubled, to more than $8 billion a year, including $20 billion for uniformed members of the armed forces.

- Ration has become automatic under a formula based on a sampling of wages paid by private industry, if wages in the private sector go up, so goes government pay.

- Going steadily by this fixed formula, which follows inflation like the tail of a kite, another 6 percent raise for civilian employees of the government is virtually certain next year.

System 80, an audio-visual method of self-instruction, is one of many educational materials exhibited Wednesday and Thursday at the Educational Materials Exhibit in the University Center. John Ingers, a Yorkville Junior High School student, practices answering one of the prescribed lessons. Missed answers are recorded on computer card at night and the question frame is repeated. (Photo by John S. Bur-Aingham)

(Photo by John S. Bur-Aingham)

This pocketbook book was achieved deliberately under a program begun by the Kennedy administration to make government pay competitive with private enterprise.

The object was to recruit and retain better talent to run the government. That the salary gap has narrowed is beyond question. The professional chemist who traded his counterpart in private business by almost $3,000 in 1962 now earns $85,174 a year, or about $7,600 less than the private industry man. With the fact that government fringe benefits generally exceed those of private industry, the government man probably is ahead in securing on the general economy and on wages in the private sector.

merely by becoming competitive the government has put pressure on private employers to meet the competition. Local government, on the other hand, finds itself struggling to keep up with both.

CARBONDALE
Leland B. Stanford won a wager in 1872 proved photographically that a galloping horse lifts all four feet off the ground at the same time. Using a battery of cameras with electrically controlled shutters, Maybridge was able to analyze all kinds of movement. In 1879 he invented the stop-frame camera to project these images on a screen, thus laying the way for the later development of motion pictures.

Primitive, lost tribe located in mountains of Philipines

MANILA (AP) — The discovery of a tribe of people living in the style of the Stone Age and cut off from the outside world for hundreds of years was announced Thursday by a Philippine government official.

The tribe promises to provide "one of the most fascinating enigmas in the study of primitive man," says the man who found it.

The isolated forest clearing to make contact. Fox made the second trip and said he gathered all the data he could.

Fox and Elizalde speculate that the Taanday were separated from the rest of society at least 400 to 500 years ago and possibly as long as 2,000 years ago.

Fox described them as healthy looking but timid. He said when he fed sugar one man was actually frightened and feared it was poisonous.

Fox said the people generally became friendly and showed a willingness for more contact with civilization. They presently rely on stumps and bamboo for sticks and forage for wild vegetables.

Tax break may be illegal

WASHINGTON (AP) — Consumer advocate Ralph Nader and Common Cause joined Thursday in a long-planned legal attack on President Richard Nixon's multibillion-dollar tax break for the nation's banks.

Nader and Common Cause, a nonpartisan group headed by John Gardner, a former secretary of the Department of Health, Education and Welfare, alleged in a federal court suit the government overpaid its military service tax break for the nation's banks.

The administration formally approved last month a three-bank of new regulations permitting businesses to write off taxes for depressed equipment at a 35 percent faster pace than before.

Britania commissions
Kuo to write three articles about China

Ping-chia Kuo, chairman of the
Committee of Writers, has been
commissioned to write three ar-
ticles on China for the En-
cyclopedia Britannica.

Two of the articles deal with
Yunnan Province, the Kwangsi
Chang Autonomous Region, both of
which have been called "strategic
locations" in relation to Burma and
Nanjing.

"They are historically separatist,
with important non-
Chinese minorities. Yunnan
was the Kwangsi
Chang Autonomous Region. Militarist
warlord Sun Yat-sen during
the rule of Chiang Kai-shek."

"Conditions are better now under
the central government," Kuo says.
He considers Yunnan Province
strategically important because of
development in industry and tran-
sport, and as a buffer state between
the Communist
region. There are also highways there
now where there were none before."

The Kwangsi Chang Autonomous
Region has been the site of Com-
mander Kao to write
under the Chinese
government. The region was
also an area of land reform
irrigation projects and the
transformation of farmland into
communes.

The third article covers Kwangsi:
The Chinese University of Central China.
"Kwangsi Province is the cradle of
the Communist revolution," said
Kuo. "Mao Tse-tung started his
political life here in the '30s and '40s."

Each of the articles is to be 5,000-
6,000 words long and deals with the
history, geography, population,
government, economy and social
conditions of the region.

Bright skies, no rain, may save
British weathermen from
tomorrow's drizzle.

LONDON: July's bright
beginning after too many rainy
days and dampening chills has
taken a break. Some call it a "weatherman.
At least for the time being.

No one has gotten up in the House of
Commons the past few days to
demn the RAP's long-range forecasts
to call for an overhaul
of the weather forecasting system.

Predicting British weather has
always been a bit of a Disney
as they say here in the land of the
every week was relatively dry, but the past
June has been an almost record
disaster, forecast-wise.

The ships with the automonos
and barometers predicted a hot, dry
spell for Britain's main areas
throughout the month of the year, and June turned out
to be a "torer."

The skies were on Wimbledon. The
tennis matches begin against Pakistan was played in a
deluge. Royal Ascot could have been
missed for Hanley. And there was the real tragedy off

Free Clinic to get

Proceeds from a fund raising
drive held spring quarter will be
presented to the Free Clinic at 6 p.m.
Friday, according to a spokesperson.

Given Blackstone, deputy exec-
mander of Arnold Air Society, said
his organization has been
around Carbondale asking for either

Downtown Task Force meeting set

The first meeting of the Down-
town Task Force is scheduled for
7 p.m. on Aug. 10 at the Chamber
of Commerce building. The meet-
ing will be to discuss recent
arrangeable donations or for
the Free Clinic. They raised about
500 by this method, he said.

The Free Clinic was a community
service project for the two groups in
be tied to the Free Clinic, which
provide free or low-cost medical
care, "The presentation will be at
the Free Clinic," 104 E. Jackson.

I enjoy writing the articles
because they encompass the
history as well as the technology
of the region," Kuo said.

Born in China, Kuo was
graduated from Kwang Hua Uni-
versity, Shanghai, in 1938. He came to
the United States on a Boxer
Scholarship and did his graduate
work at the University of
Washington.

"I am a citizen advisor to
Chang Kai-shek from 1946. He
was a part of the Chinese
delagation to the San Francisco
Conference that organized the United
Nations and worked for
the Security Council until
1948. He was the United Nations
and Chinese government in 1949 to
write and teach part-time at San Fran-
cisco State College and Mills College
in California.

Kuo came to SU as professor
in 1969 and has been chair-
man of the History Department
since 1967. He plans to give up the
chairmanship in September to
return to full-time teaching,
research and writing at SU.

Kuo is the author of a book,
"China New Age And A New
Lookout."

"We knew the present govern-
ment was capable of inducing acute
economic depression, but we did not expect
that would be accompanied by
acute climatic depression."

A few days later the Daily
Telegraph released a study by its
weather correspondent claiming
that the Meteorological Office
failed to live up to its own
about-long predictions.

In January the month
studied, the weatherman
serves on only six out of 31 days in his
daily forecast.

18 of faculty
hold law degrees

A survey issued from the Chan-
cellor's Office on May 13 has deter-
mined that 18 SU faculty members
hold law degrees in the areas of
criminal and common law with
four other faculty members having
some legal education.

According to Robert H. Drewer,
an attorney and member of the
SU Legal Education Program Develop-
ment Committee, the survey was
taken to provide information regar-
ding faculty resources for the
proposed law school at SU. Drewer
said full disclosure of the results of
the survey will not be available un-
til next week, pending review by
Chancellor Robert G. Layser.

Test comes this weekend

Morava making comeback after injury

By Ken Stewart
Daily Egyptian Sports Writer

This has been a comeback year for SIU gymnast Gary Morava. His gymnastic career was nearly ended last Dec. 31 when a rushed car carrying him and six teammates overturned on an icy highway in Iowa.

Bad weather forced their plane to land in Des Moines, 25 miles from home. After being on their way to the Iowa Invitational in Ames when the plane suddenly bit the ground and flipped over.

Morava suffered an eye injury and bruised shoulder.

Injuries were confined to cuts and bruises for five others but it was the big trip for Arnie Morava that ever made.

Arnie was crushed under the car.

Morava, 1970 Illinois state prep all around champ, saw limited action the remainder of season.

How successful his comeback has been is being decided in gymnastics in the Mid-Summer's Gymnastics Festival Friday and Saturday at Penn State.

The top seven gymnasts chosen will represent the U.S. this August in Europe.

Morava qualified for the meet at the Pan American Games tryouts in early June at Temple University. He was in the second seven top finishers.

The first seven— including SIU's Tom Lindner—won spots on the U.S. Pan Am team which will compete in the Games this summer in Cali, Colombia.

Morava's shoulders still give me problems when I work on rings," Morava said in a practice session Wednesday in the SIU Arena.

"It has taken me the longest to get back into the rings, they are my weakest area," he said.

The coach Bill Meade has me on a pretty fluid schedule and my shoulders are getting better every day with the practice.

"Three months ago, I wasn't doing anything but exercising and vaulting,"

The competition will be very tough.

Many of the nation's top 1971 Olympic hopefuls will be there, but the SIU freshman said he has a very good chance of making the European team.

"Four or five guys that I have been beaten by have all been here and I doubt if I can beat them," Morava said.

"About 12 of us will be vying for the three lower spots," he said. "The bottom 12 are of my caliber."

"If I blow along the line, I'm not going to make it."

Penn State gymnastics coach Gene Wettstone predicts the compulsories will decide who goes to Europe. "There is a very strong group in the gymnast who masters the compulsories. They are probably the most challenging exercises," Wettstone said. The compulsories exercises are routines designed by the International Gymnastics Federation utilizing movements unfamiliar to the general pattern of the floor exercise.

"Compulsories for me are new," Morava said. "They are mainly European compulsories that are new for Americans."

The Prospect Heights product added that he has been doing surprisingly well in them.

"Coach Meade was the national champion in compulsories," he said. "This should help Tom (Lindner) and me,"

The U.S. team will compete in Rotterdam, The Netherlands, Poland, Spain and Switzerland.

Morava said he wants to go on the tour because he believes the way of thanking Meade for his coaching efforts.

"I want to go for the coach," he said. "Meade will be one of the coaches for the men's European team."

A women's team will also go, which could be another reason for going.

---

Sports

Soldier Field explored as 'new' stadium site

CHICAGO—Mayor Richard Daley said Thursday that he is exploring the possibility of using the present site of Soldier Field for a new stadium.

Daley's remarks at a news conference represent a shift from his previous determination to build a stadium on the lakefront immediately southwest of Soldier Field.

Daley announced July 1 that a $55 million football stadium would be built.

He said Thursday that although "the stadium committee has recommended a site, we were not set in the blueprint stage. Before we reach that stage we must explore the possibility of using Soldier Field as a basis for a new stadium."

Daley's announcement of a $55 million football stadium was criticized in many quarters.

Asked whether the study of the present Soldier Field meant the mayor was considering other sites, Daley said, "No. It means we're exploring in a little depth the possibility of the present Soldier Field."

Criticism of the new stadium was based on the plans which would provide only a football field. This meant that only George Halas' Chicago Bears of the National Football League would be a regular tenant.

Daley, in discussing possible renovation of Soldier Field, said "If we talked to Mr. Philip Wrigley and Arthur Waiter, the owners of the Chicago White Sox, you could put a baseball team at the north end of Soldier Field."

Neither Wrigley nor Allyn has expressed interest in moving his team from its current ballpark to a municipal stadium.

AL completes all-star team

BOSTON—Al Kaline of the Detroit Tigers and Stan Musial of the St. Louis Cardinals were named to the American League All-Star team for the 17th time and Harmon Killebrew of the Minnesota Twins is in his 14th All-Star game as manager Earl Weaver completed his squad for next Tuesday's game with the National League in Detroit.

Catcher Bill Freehan of the Tigers was voted in by the American League coaches and Life Magazine's Frank Howard was picked for the fourth appearance as the American League representative.

Weaver provided only a couple of minor surprises as he notified league headquarters of his 11 reserve choices to round out the 28-player squad. For instance, he did not take right fielder along with last season's all-star pitcher.

Others added were catcher Thurman Munson of the New York Yankees, infielder Lee Cardenas of the Twins, Cookie Rojas of the Kansas City Royals and Bill Mollett of the Chicago White Sox and outfielder Bobby Marucci of the Yankees. Atom Otto of Kansas City and Ted Fordham of the Baltimore Orioles.

Melton was overlooked in the voting, but was chosen as the Chicago Cubs' American League representative.

He joins among AL leaders with 18 homers and 59 runs batted in through Wednesday night games.

Big league standings

Tie in British Open

SOUTHPHUND, England (AP)—Victory-hungry Lee Trevino knocked in a 10-foot putt on the final hole Tuesday and tied bright young Briton Tony Jacklin for the lead in the British Open Golf Championship.

Trevino, a 30-year-old winner of the U.S. and Canadian Open titles, tossed his cap in the air and threw back his head in celebration in the lengthening shadows on the Royal Birkdale links.

---

Scale

Gary Morava is doing a compulsory scale similar to the one he will do Friday and Saturday at Penn State. The SIU freshman will be trying out for a spot on the U.S. gymnastics team which will tour Europe this summer. Morava is still making a comeback from an automobile accident last December (SIU photo)

Golf tourney winds up

Coed softball this weekend

The SIU women's softball team will carry a 5-1 record into a game against a Murray State 4-1 club at 6:45 p.m. Saturday at Oakdale Field in Carbondale.

A's beat Chisos, 4-2

CHICAGO (AP)—Undefeated Chuck Dolson, backed by a fine defense and a four-run second-inning rally, passed his eighth victory Thursday by pitching a five-hitter as the A's defeated the Chicago White Sox 6-2.

Whitey Ford limited the White Sox to just five hits, two of them were solo homers which kept Chicago in contention. Harry Caray in his first homer in the second inning and Bill Melton connected for his 10th in the fourth.

Thursday's scores

California 7, Minnesota 4

Moranda 5, Philadelphia 3
