War's end demanded

Student Senate endorses ‘Peace Treaty’

By Chuck Hichekraft
Daily Egyptian Staff Writer

The Student Senate has endorsed the "People's Peace Treaty" which is demanding an immediate end to the Vietnam War and has accepted a proposal calling for more student control of the Daily Egyptian's news operation.

The two endorsements were approved at the Senate meeting Wednesday.

John McCaffrey, student body vice president, presented the "People's Peace Treaty" to the Senate at the request of the Southern Illinois Peace Committee (SIPEC). This proposal passed by a 12 to 4 vote. Five senators abstaining.

The Senate endorsed the peace treaty despite arguments from the floor, saying that such an endorsement could discredit the senate, and that it would also be detrimental to possible approval of the treaty by the Provincial University Senate.

Dennis Kostman, Eastside nonform senator, objected to the endorsement, saying the senate's recommendations would hurt the treaty's chance of approval by the University Senate.

It was further argued that actions planned by the May Day Collective of Students and Youth for a People's Peace obtain Congress' ratification of the treaty could turn into violence and therefore the endorsement would discredit the senate.

The part of the treaty in question says, "An Americans ratifying this agreement, we pledge to take whatever actions are appropriate to implement the terms of the joint treaty of peace and to ensure its acceptance by the government of the United States."

The treaty, as presented to the senate, calls for the United States and the Vietnamese people to reach agreements towards total withdrawal of troops and the release of military prisoners.

It calls for the U.S. to end its "imposition" of the Thieu regime on the South Vietnamese, and for the Vietnamese to form a provisional coalition government to organize democratic elections.

The treaty also demands that Americans and Vietnamese agree to respect the frontiers, peace and neutrality of Laos and Cambodia.

However, members of the SIPEC, asking for the senate's approval of the treaty, said the Collective's actions would not in any way be violent, but, rather nonviolent, civil disobedience.

After 30 minutes of debate the motion was made to call the issue to question and the endorsement was approved.

The Senate also endorsed an experimental proposal (ExPro) which is designed to restructure the Daily Egyptian's newsroom and involve more students in the news-gathering process.

The proposal, as presented by Bob Carr, said his purpose is to enable the Daily Egyptian to make improvements from within.

It also said more journalism students could take part in the paper's operation giving them added experience for their careers.

The Daily Egyptian, the proposal said, "has attained the reputation of being one of the finest University news gathering operations in the United States."

The complaints directed at it are "minimal," the proposal said.

John McCaffrey, student body vice president and chairman of the senate, further recommended to the finance committee that the Daily Egyptian be required to implement such a proposal before it will review any increase in subscription fee money.

The endorsement was granted by a voice vote.

In other action the senate passed a bill to investigate whether or not anti-pollution devices controlling smoke emissions are being used in the Carbondale area.

Professor tells symposium

Ecology problems require new values

By Sue Ral
Daily Egyptian Staff Writer

The problems of ecology and preserving mankind can only be solved through changing people's values, Paul B. Sears, emeritus professor of conservation at Yale University, told an SIU audience Thursday.

"The answers to man's problems do not lie in legislation and technology," said Sears, who spoke at a symposium on "Life Sciences and Society's celebrating the opening of the $10 million Life Science II Building.

The symposium, an SIU Centennial event, continues Friday at Shryock Auditorium with lectures at 9 a.m. by William Kuhlbeck, University of Minnesota Medical School, at 10 a.m. by Gunther S. Stent, University of California, Berkeley and 11 a.m. by O. Hobart Moeurer, University of Illinois.

An open house and displays of research exhibits at the new building located south of Lawson Hall are scheduled from 1 to 3 p.m.

Sears, one of the country's pioneer ecologists and one who favors local action for direct solving of problems, said ecological problems are "too big for the blanket solutions hatched out of the capital."

Concerning industrialization and subsequent pollution, Sears said man has been working on the faulty assumption that "just because something is possible it is ethically justified."

The more dependent man becomes on elaborate technology, the more vulnerable he is, Sears said.

The economic boom's disruption of rural life has caused cities to be filled with refugees from a way of life that is no longer tolerable," he said.

"So far, the open house is being held in conjunction with the celebration of the Centennial Year at SIU's campus (Photo by Dave Fitch)

Watching the world go by

After two days of heavy snowfall, two SIU students, Mike Sutton, a junior majoring in English from Carlin, and Ann Carroll, a freshman majoring in administration of justice from Pana, sit along the Lake-On-campus while the weather lasts. (Photo by Fred Ploton)

Visitors to the new $10 million Life Sciences II Building were able to view the scenic research laboratories of the Department of Microbiology nestled behind these doors without fear of injury during an open house Friday from 1 to 3 p.m.

Gloria classroom, U.S. to play ping pong

NAGOYA, Japan (AP) — American Ping-Pong players were welcomed to Red China.

It developed into a visit to Red China.

Red China walked off with the men's team mixed doubles, women's doubles and women's singles championships at the Nagoya tournament, while the Americans were eliminated early.

Graham B. Sheehan, U.S. delegation president, said he did not think the Americans were invited so they could be humiliated before Chinese audiences.

"The Chinese extended us the invitation for goodwill and good sportsmanship," he declared, adding that many Chinese honored as evil intent because "I think they are good sportsmen."

"If the Americans would visit Peking and see other cities, which he did not name. Sing and Sheehan vowed the itinerary will be decided when the Americans reach Peking. The British and Canadian teams earlier in the tournament were invited to play in Red China and accepted.

Both nations, however, have diplomatic relations with Peking.

Student group collecting books

by Cindy Key

Service Organization, a newly established student group at S.U., has begun its first service campaign with collecting books to be sent overseas.

The group's purpose is to continue the development of university-sponsored volunteer activity related to international relations.

Mr. Anderson, dean of the Office of International Education, said "Our first project under the Service Organization is the collection of books and educational material to donate to institutions abroad that are in their formative stage as well as in need of much resources." Anderson and Frank Kline, secretary of government, are the advisors to the new organization.

With both American and international students at S.U. working together, the student group plans to collect material books at the end of spring quarter, and send them to a university in Korea.

They have gathered some 200 books so far, through cooperation of E. Dorothy Vassar, English, and the University Bookstore.

SIU curator granted award for site survey

By University News Service

Frank Rackley, curator of North American archaeology at SIU, has been awarded a $12,000 grant from the Illinois Historic Sites Survey for a four-month survey of such sites in Pope and Massac Counties.

The award was approved at a meeting of the Survey's Advisory Council held March 20 at the University Center.

Of six sites nominated for surveying, only one was given immediate unconditional approval: Fort Massac at Metropolis, according to Dan Malovich, state coordinator of the program.

Two others—Governor Duncan's Mansion at Jacksonville and the Rine Hotel (McFarlin's Tavern) at Elizabethtown—were deferred, and the G. M. & O. Railroad Station at Alton was tentatively approved, subject to determination of whether the structure is to be demolished.

Sites which are given final approval are to be submitted to the National Park Service for approval to be included in the National Register of Historic Places, under the National Historic Preservation Act of 1966, Malovich said.

Sites (buildings, structures, objects, districts) not deemed of national importance may be designated of statewide significance or of local importance, Malovich said.

The Illinois State Department of Conservation is conducting the inventory of sites in this state and developing plans for continuing preservation efforts, he said.

The advisory council for the Survey is composed of five professional archaeologists, all of whom were present at the March 20 meeting. They are Ed Thornton of Ottawa, president; Prof. Alan K. Lang of Urbana, architectural historian, University of Illinois; William K. Alderfer of Springfield, Illinois State historian and executive director, Illinois State Historical Society; George M. Irwin of Quincy, president, Illinois Arts Council, and Stuart Starner of Chicago, archaeologist, Northwestern University.

Also attending the meeting were William Fawer of Benton, Survey director; Lowell E. Anderson of Springfield, historic sites curator; Illinois State Historical Library, and Survey consultant, Tom Yamot of Chicago, a member of the Survey Staff, and Rackley.

New teachers union elects interim officers

The SIU chapter of the American Federation of Teachers (AFT) elected temporary officers and gave itself an official name at a meeting Thursday in Morris Library Auditorium.

The official name of the local chapter is the Carbondale Federation of University Teachers.

Jonathan Selden, assistant professor in mathematics, was elected temporary president of the group, which organized last week. Dan Drew, assistant professor in psychology and Herb Donow, assistant professor in English, were elected secretary and treasurer, respectively.

The next meeting of the chapter is scheduled for 7:30 p.m. Wednesday. A meeting place is still unasrranged.

According to Selden, the chapter has 27 members who have signed the charter.

The AFT is an autonomous union with chapters in all educational sectors. It is affiliated with the AFL-CIO, but each chapter works out its own membership restrictions and formulates its own goals.

The SIU chapter has yet to write a constitution and set its goals, although members have cited the need for a bargaining agent for faculty members and improvements in education and working conditions as possible goals.

Graduate assistant explains Fishel trip

To the Daily Egyptian:
In regard to the letter by Francine Carl, March 16, Dr. Wesley H. Fishel and I left for two months of research so that he may finish a project which he began three years ago. This project is now partly supported by the United States government, and is in progress. The remainder has been funded by Prof. Fishel himself.

Finally, Prof. Fishel has not been in residence in Carbondale this year; he is on sabbatical from the University of Illinois. I am in no way involved in this venture.

Washington protest gains local support

To the Daily Egyptian:
We, the undersigned, wish to voice our strong opposition to the United States' attempt to build a military installation on the outskirts of the city. The construction of this base has been met with fierce opposition from the local community. We demand that the government rescind its decision and seek alternative solutions that respect the rights and well-being of the local people.

Washington protest gains local support

Railpax deserves long needed chance

To the Daily Egyptian:
This is in response to the column "April Fools" written by Janice Jones Johnson.

Next month, when Railpax begins its task of running passenger service through the city, its job is faced with much greater scrutiny. In my opinion, I am one of the "hard-core" devoted train riders who admits to falling in. I believe in the beginning, support Railpax as the only answer to a rather serious problem that has to be corrected. Last week, when the government released the schedules, routes and equipment for the semi-public corporation, I was dismayed and disappointed. Many promises were broken, hopes destroyed and common sense lost. Their decision to run the Chicago-New Orleans route as an all coach streamliner was a breach of promise made back in October. They guaranteed all passengers the opportunity to ride between two rail points, of more than 800 miles, and overnight trips, trains with sleepers and full diners. This schedule does not provide this.

I can understand Mr. Jones' pessimism about this task, and I regret to say that I share this same pessimism. But we must give Railpax a chance, a chance that has been needed for so long. In comparison to train travel today, Railpax cannot do much worse, outside of a couple exceptions, to provide the American people the service they have been waiting for. Before we condemn Railpax, let us give it a chance to be worth its plans and ideas.

While we broadcast horrendous statistics of traffic deaths, our highways are overcrowded and air terminals congested, we are deriding the American people the right to have decent rail service. Before we condemn Railpax, let us give it a chance to be worth its plans and ideas.

On what other passenger transportation mode can one find good restaurants, with changing views, and see their country for the first time? Railpax can work if we shall give it the opportunity, with our support. If we do not, we shall be a very deprived nation, and a lot of rainyday buffs, like myself, shall be left with only fond memories.

House residents 'look better'

Volunteers hope to upset poverty's effect on family

By Steve Brown
Daily Egyptian Staff Writer

The project progressed during the next four weekends. Each Saturday the house seemed a little improved and the family seemed a little happier. What had seemed a rather hopeless task on that first Saturday began to show signs of progress.

The basic painting work was finished on the second Saturday. The volunteers also worked outside the house, cleaning, raking and burning the accumulated trash. The family members themselves painted several rooms and undertook other projects between our visits.

Once the painting was finished, the volunteers helped the family lay linoleum on all the floors in the house. Next came some new furniture—second hand, but certainly sturdier and more plentiful than what the family had lived with before. The volunteers also brought a kitchen table with enough chairs so that the whole family could sit down for a meal at the same time.

The house looked a bit different inside and out. It was certainly far from perfect. By some measures it was still probably substandard. The only source of water was still an outside well which malfunctioned several times a year but the group did help the family replace the pump on the well.

By the end of that fourth Saturday, many of the tenants or tenants who had made the trip from Carbondale and Murphysboro every week felt they had known the family for a long time. The girls brought a bunch of last two Saturdays, and the family and the volunteers gathered to eat together.

There are other sides to this story, but child and family welfare workers have to be realistic. Resources have to be withheld in an effort to protect the family and its dignity. The small group of volunteers, who came 'almost like invaders, left with the feeling they were accepted as friends.

The last things the volunteers did were to rebuild several sections of the tottering front porch and hang some bright curtains in the freshly-painted rooms.

The volunteers had done everything the limited help budget would allow. All the equipment was donated and the volunteers declined to accept mileage or lunch money which would have been paid by the state. The family involved is not on welfare. In fact, one of the professional social workers said most of those in his care load in the area lived in similar conditions.

The house is in a little better shape than before the volunteers came. The residents of this house seemed to have a little brighter outlook on life. Maybe this was the impression the volunteers had because they wanted to feel they had accomplished something. But generally the group felt the family looked better. The family seemed intent on maintaining the improvements that had been made during the project.

As the volunteers left, most of them said they thought their efforts had been worthwhile. But certainly, the group hoped it had been able to jolt the poverty cycle the family was in.

Maybe now, one of the volunteers said, the family will be able to cope with the other problems—lack of education, low quality medical care and unemployment—lived by poverty and partly responsible for dragging them into the present situation.

Economic laws hard to repeal

By Jenkin Lloyd Jones
Los Angeles Times Syndicate

When a worker's compensation rises faster than his production, the profit from what he makes must drop or child and family welfare workers have to be realistic. Resources have to be withheld in an effort to protect the family and its dignity. The small group of volunteers, who came 'almost like invaders, left with the feeling they were accepted as friends.

The last things the volunteers did were to rebuild several sections of the tottering front porch and hang some bright curtains in the freshly-painted rooms.

The volunteers had done everything the limited help budget would allow. Illinois House, Senate slow, say legislators

BY MICHAEL ROBINSON

SPRINGFIELD, Ill. (AP) — Illinois legislators acknowledge sometimes grudgingly and with some sighs that they have waded through the first 18 weeks of the current session.

Epitomizing a stack of tough, controversial issues such as education, welfare and reapportionment, they say the pace must quicken when the House and Senate reconvene next Tuesday after their Easter recess.

"The backing is going to catch up with us one of these days," Sen. Robert Cushion, D-Wabashan, acting majority leader, said. "These bills are going to become urgent.

Rep. Clyde Choate, D-Danville, House minority leader, said in one of a series of interviews with key lawmakers that the current term "has been the slowest to that point that I've seen in my legislative tenure.

So far, Gov. Richard B. Ogilvie has signed into law 12 bills, several of them providing stopgap money to hard hit state agencies, compared to 33 at the same time in the previous session.

But House and Senate leaders said their work is far behind that of last year, with much key legislation yet to be passed. A major issue is the fate of the 1981 state budget and its impact on the state's economy.

This was denied by Sen. Cecil Kaloustian, D-Elgin, president pro tem of the Senate.

Voted his pledge to uphold the Democratic legislative program next week meant he was waiting until after the election, Kaloustian replied, "I don't see any real correlation between the elections and the program they're two totally different things." 

Democrats also reported that key spending bills have been late in arriving from the governor's office.

Although about $40 of the $55 billion as promised last week, the legislature plans to sub-

Related festivals coincide this year

By George W. Coman AP Religion Writer

NEW YORK (AP) — In a rare concurrence, Christians and Jews this weekend simultaneously celebrate these related, but contrasting events, that mark redemption from bondage.

The celebration of the two occasions, in mood and concept, symbolize the "God-ordered favorable bonds" which have linked the faiths, says Rabbi Marc Tanenbaum.

It is the only time in this decade when the Jewish observance of Passover coexists with the Christian observance of Christ's crucifixion, as was the case when it occurred.

Ordinarily, because of subsequent differences in ways of calculating the dates, the two festivals come at separate times, often weeks apart. But both are springtime events. Both breathe a spirit of joy, hope and new horizons of life. Both are volved great personalities, Moses and Jesus. Both commemorate God's intervention in man's behalf.

Basically, both also celebrate

marvelous liberation by God from the shackles of destructive powers. "The Lord is my strength and song, and He has become my salvation," sang an exultant Israel on that first Passover of old, as recorded in Exodus 15. "Then had I in Thy coffin laid the people whom Thou hast redeemed." "Passover commemorates mankind's first great struggle for freedom, and victory over tyranny through the exodus of the Jewish slum

"Let my people go," demanded Moses, and through a miraculous

stream of events, the captive, ragged people broke free from the domi nant military power of the era.

The climax of the Christian celebration comes Sunday-gin Easter, marking Christ's resurrec tion from death and the promise it holds out for man's ultimate future.

Passover is observed for eight days by Orthodox and Conservative Jews, and seven days by Reform and

Committee proposed

Group to hear complaints

By Dave Butler Student Writer

A plan calling for a blue ribbon committee to hear complaints against the administration was suggested Wednesday by John Robinson, SIU Security Police cap

tain.

Robinson's plan was presented to C. Eugene Pellehill, assistant to the chancellor, at a seminar for Security Police and Carbondale Police supervisors. The plan called for the committee to be comprised of members from all segments of the University community.

Thomas Leffler, Security Police chief, hailed the plan as another avenue or vehicle of com

munications.

Pellehill spoke to the seminar on the financial crises facing university. He emphasized budget cuts made by the Illinois Board of Higher Education. Richard F. Ogilvie will "have a long range impact on schools like SIU.

The proposed 800,000 Security Office for the Carbondale campus was listed as near the top of the priority list of new buildings, according to Pellehill. The structure has been approved by the higher board and is on SIU's 1971-72 budget recommenda
dations.

Pellehill told the seminar that the

Grad application

deadline set

The deadline for graduation appl

ications has been set by the Office of Admissions and Records.

According to Pellehill, assistant to the Office of Admissions and Records, "any student who plans to receive a degree at the June 13 Commencement, must apply for graduation no later than May 16.

Application forms may be picked up at the Office of Admissions and Records in the North Wing of Woody Hall.

Mass Cuneo also said that students who plan to teach in the state of Illinois should apply for Entitlement Cards at the Dean of the College of Education Office in the Union Building.

Daily Egyptian, April 9, 1971, Page 7
Nixon has new economic strategy

Washington—The Nixon administration announced yesterday that it will propose today a new full-employment budget concept called for achieving full employment, which it described as the "economics of the 1970s." The administration also said it would ask Congress to increase the national minimum wage, which is $1.60 an hour, to $2.20 an hour.

The announcement was made by H. R. Haldeman, director of the Office of Economic Affairs, who said the administration had decided to set the minimum wage at $2.20 an hour, which he called "the lowest common denominator." He also said the administration would propose a new full-employment budget concept that would result in a "two-tiered minimum wage" of $2.20 an hour for workers earning less than $400 a week and $2.40 an hour for workers earning more than $400 a week.

The administration said it would also propose a "full-employment tax" of 5 percent on all earnings, which it said would be "less than 5 percent of total income" and would be "less than 5 percent of total payroll." The administration also said it would propose a new full-employment budget concept that would result in a "two-tiered minimum wage" of $2.20 an hour for workers earning less than $400 a week and $2.40 an hour for workers earning more than $400 a week.

The administration said it would also propose a "full-employment tax" of 5 percent on all earnings, which it said would be "less than 5 percent of total income" and would be "less than 5 percent of total payroll." The administration also said it would propose a new full-employment budget concept that would result in a "two-tiered minimum wage" of $2.20 an hour for workers earning less than $400 a week and $2.40 an hour for workers earning more than $400 a week.

Economics professor to quit liquor board

C. Addison Hickman, Vandercook professor in SIU's Department of Economics, has resigned as a member of the mayor's Liquor Advisory Board, effective April 30, the last day of Mayoral David Kenne's term in office.

Kenne said Thursday that the resignation comes as no surprise. He said that it was difficult to get Hickman to agree to serve in the first place, and that he was asked only to serve through Kenne's term as mayor.

In his letter of resignation, Hickman said that he leaves the Board "with some regret," because he will be unable to work any further with Kenne, who he praised for his "ability, courage and selflessness."

Hickman said, "It (Carbondale) will literally be a better place, in so many ways, because you (Kenne) have given sacrificially of yourself during those past four years."

Hickman also praised his colleagues on the Board as "fine and conscientious men."

They are: Dr. Donald Darling, Robert Bahr, Robert Palmer, Robert Stahl and Tom Bevitt.

In his reply to Hickman, Kenne said, "You already know how much I depended on your advice and example so I will not repeat myself on that, but speaking for the citizens of Carbondale, I say thank you."

Tuition debated

Ogilvie, students, meet to discuss

Gov. Richard B. Ogilvie has agreed to meet with students representing three state universities and the chairman of the Illinois State Board of Higher Education's Student Advisory Committee to discuss tuition increases Friday.

According to Tom Busch, graduate student in the Office in Student Services of the campus who will represent SIU, Student Advisory Committee chairman Richard Jackson requested the meeting.

Students Robert Winter of the University of Illinois and Ken Rapp of Eastern Illinois University will also be present.

Busch said Thursday that Ogilvie agreed to the meeting so he could clearly the intent of his budget message presented earlier this year.

Busch said that Ogilvie wants to make clear that his recommendation to raise tuition is not a "zero-sum" policy against students for last May's decreases.

Busch has prepared a position paper outlining the recommendations of the ISBE's Tuition and Financial Aid Study Group in which he says the ISBE should "constitute a contagious tax force" involving students, faculty, student personnel administrators and staff to study the tuition problem.

Several reasons given by the committee for raising tuition are not justified, Busch said.

Marketing students win Ford contest

A study conducted by SIU marketing students under the direction of Richard H. Lamey, Department of Marketing, has won an Illinois Regional competition for Ford Division's "Pinto Project" for the Academy Awards.

As one of 58 regional winners, SIU students will receive a check for a $1,000 grant. In addition, the school qualifies for consideration for a national prize of $5,000.

SIU's approach consisted of brand image and product knowledge of the Pinto compared with the Volkswagen by means of a survey questionnaire administered to 188 students at the University.

Haiti head remains inactive

PORT-A-PRINCE, Haiti (AP) - The fate of Dr. Francois Duvalier, still being held in the name of France, is still being debated by his strong-willed daughter, Marthe, Thursday, as the island's missions.

The 28-year-old Marie Denise, the oldest of the president's four children, holds the title of executive secretary to the president. Reports abroad that she has virtually become the chief executive since her father's mysterious disappearance.

Marylin, who has a masters degree in law, was appointed this spring by her father to represent Haiti at the United Nations.

Scientist discounts fear of genetics

By Cathy Spengle
Daily Egyptian Staff Writer

Threats of genetic engineering and the production of "test tube babies" have been overstated, a noted geneticist said Thursday at SIU.

David R. Stadler, a professor of genetics at the University of Washington, said genetic research would help ease human suffering.

Stadler spoke at a symposium on "Life Sciences and Society," being held Thursday and Friday, in celebration of the opening of the new Life Science II Building. He addressed approximately 400 people.

Stadler said it is doubtful that results of genetic research could be used for antinatal ends, such as producing people with identical genetic makeups.

"The product would be of doubtful outcome," Stadler said. "How would you know if the people produced would do the expected?"

Stadler said that evil powers would need a long-range plan and have to wait many years for the products of research to formulate their plans.

"Nuclear, biological and conventional weapons should be of more immediate concern than genetic ones," Stadler said.

Stadler said there has been little change in man's genetic makeup as it was feared several decades ago by proponents who thought genes would deteriorate as man created a more complex and technical environment.

Professor sees a need for biology redirection

Larvey Bales
Daily Egyptian Staff Writer

"The field of biology should be more concerned with ways to solve the problems of human living rather than "an idle curiosity stewed in research," Paul Hard, Stainhard Distinguished Professor, said at the close of the first day of the symposium on Life Sciences and Society Thursday.

Hard said there has been a "gigantic effort in the last ten years to improve the teaching of science from kindergarten through graduate school at universities. It now seems that a crash of our time is a piling of crises upon crisis in economics, social issues, education and the environment."

Hard said that for years scientists in biology and other fields have enjoyed an "easy rider" position.

"Now they are being put before the general public to guide research activities for the common good and add a dimension of social responsibility to science," Hard said.

According to Hard, technology, which has been previously considered a great advantage to the modern world, is now seen as the "menace of mankind to destroying the natural environment."

Hard said where "specialization has made it possible for the individual to cope with the knowledge of life and its problems, it has also isolated him from other areas of scientific and social endeavor."

Hard sees the main problems of life and living as being "relatively untouched by science." He indicated that this is what disturbs the non-scientist the most.

The educational curriculums of this century, he continued, is that we teach students about the real achievements of science, the potential research goals for the intellectual and material welfare of mankind and these deny the modern student an insight into the social arrangements through which they might realize these goals.

Hard said as a result of science being research oriented, it is viewed as a kind of information, names of things, formulas, weights and measures with little meaning to the whole of science.

Science and technology have produced the world with many essential ingredients for a better society and for increased human potential, he continued, "but as long as the system of education at any level in science does not enable man to understand and solve contemporary and future problems of living in a scientific and technological society, that potential will not be developed."

Hard indicated that a new method of teaching biology is needed in American universities.

The biology curriculum we might build is already reflected in the problems and issues of today, he said. We now emphasize that students study RNA and DNA but we do not emphasize the quality of life.

Hard said science can no longer be considered divorced from the economic, social and political world.

Biology teachers need to spend more time teaching where we are going and spending less time how we got here in the first place. The young students he said are concerned with how to make some of life and living here now and with less concern for the there and then.

British official to speak here

The Honorable S.G. Stout (above), British consult-general at St. Louis will speak on "Some Thoughts on Britain in the Seventies," at 7:30 p.m. Tuesday in Morris Library Auditorium, St. Louis. He has been designated to St. Louis since November, 1970. He previously served in Singapore, India and Australia and was British deputy high commissioner in Karachi, Pakistan before coming to St. Louis. His appearance is sponsored by the International Relations Club at SIU.

Illinois group seeks Lindsay as President

CHICAGO (AP) -- A group of Illinois citizens announced Thursday formation of a committee to coordinate efforts in the state to elect Mayor John Lindsay of New York as President in 1972.

A statement issued by the committee said: "We believe that John V. Lindsay is capable of winning the election if nominated, and the only man in the country capable of unifying the nation if elected."

"We believe with many others across the nation that Lindsay's decision as to his future must be resolved by strong grass roots expressions of support for his candidacy," the statement added.

The speaker is the author of "The Theater of Bertolt Brecht" and "Brecht on Theater." The lecture is sponsored by the SIU theater department and is open to the public.

"We believe in the election of a man the nation can unite behind," the statement added.

Interpretations vary

Scholars disagree on Viet Center resolution

By Sue Roll
Daily Egyptian Staff Writer

Interpretations vary concerning a resolution on the relationship of Asian Studies (AAS) regarding the Center for Vietnamese Studies at SIU.

A resolution passed at the business meeting of the AAS council held recently in Washington, D.C., indicates that the convention disagreed with the interpretation of the resolution by the University of Texas, Austin, and the resolution was discussed at the University of Chicago.

Richardton pointed to a fundamental problem with the resolution, "It is based on an interpretation that is both vague and ambiguous."

Jahnsky later added that this statement is based on the interpretation of the resolution by the University of Texas, Austin, and the resolution was discussed at the University of Chicago.

In a letter to Allen, Mrs. Stardevant said that the resolution "could possibly be construed as supporting the center's absolutely unacceptable resolution." The letter was signed by Mrs. Stardevant and the University of Chicago.

Scholars perform tonight

"Their Own Thing Plus Four," a production by the Southern Dancers, is composed of 16 unscripted works, which the students themselves choreographed, according to "I can't believe the group has ever done this," a statement made by the University of Western Ontario. A profuse to the resolution is an extension of the situation in the Vietnam Studies Council and the University of Texas, Austin, as well as the resolution in the AAS action by H.B. Jacobson, director of the Center.

Jahnsky said that the resolution would be passed and will be submitted to the general membership of the AAS for a vote.

Jahnsky said he was gratified by the AAS action and saw it as a victory for the Center.

Mrs. Stardevant said the resolution had not been rejected but rather amended to include not only SIU but all institutions. She said this does not indicate approval of SIU, pointing out that the fact that the AAS would vote on this "shows how seriously it regards the SIU case."

This "attempt to set guidelines for the conduct of universities was because of the AAS subcommittee's report on SIU," she said. Allen said the broadening of the resolution was not dissatisfactory because SIU is not the only example of "university community" and other institutions need to be involved.

However, SIU was the only institution singled out in the convention.

School Board elections set

By David Maine
Daily Egyptian Staff Writer

In this season of elections, Carbondale voters are kept busy, and School Board elections in the city will be no different because there will be not one, but two school board elections in the city. The Board of Education will cast their ballots at the same polling places; the Carbondale Charter School Board, and the other for the Carbondale Community High School Board.

Two special elections will cast their ballots at the same polling place. The School Board elections are two distinct elections.

Seeking to be the next two board members in the Carbondale Charter School Board are candidates, Fred Nolan, an employee with the Illinois Department of Public Safety, the Rev. Albert Harrem, pastor of the St. Andrews Episcopal Church, Jacob Gor, manager of Seiler's Flowers in Carbondale, and Charles E. Richards, a former police chief in Carbondale.

Nolan, who has been a member of the Board since 1980, has said that his primary concern as a Board member is to be aware of the Board's educational needs and to be aware of the many educational advantages.

Rev. Harrem said that he favors 

Schools set Pitts for Saturday

Pitts for both elections will be open from noon to 6 p.m. on Saturday.

Pitts for both elections will be open from noon to 6 p.m. on Saturday. Voting places for Carbondale voters will be at the Carbondale Charter School, 418 E. Main St. for voters residing on the east side of the University's Central Railroad tracks, and Bayer Gymnasium, 400 S. Spring St. for voters residing on the west side of the tracks.

Pitts for both elections will be open from noon to 6 p.m. on Saturday. Voting places for Carbondale voters will be at the Carbondale Charter School, 418 E. Main St. for voters residing on the east side of the University's Central Railroad tracks, and Bayer Gymnasium, 400 S. Spring St. for voters residing on the west side of the tracks.
Conference will explore mankind in universe

A national organization that wants to start human colonies in outer space has scheduled a conference at SIU this month to explore the possibility.

"Mankind in the Universe" will be a four-day "think-in" expected to draw students, scholars and scientists from across the U.S. attending its sponsors, the Committee for the Future.

The group's premise is that the future of life as we know it may depend on our ability to find new habitats in space.

The Committee for the Future's chief counsel and spokesman, space philosopher-author Earl Hubbard, is to be one of the conference speakers and panelists. Hubbard wrote "The Need for New Worlds. A Declaration of the Right of Mankind to Have a Future," the keynote document in the Committee's philosophy.

Other panelists to attend the SIU conference will include Gene Ogle, a government official, and Robert Waack, executive producer of special events for CBS News. Fred Ward, director of the CBS Television series, "The 20th Century: National Aerospace and Space Administration executive James Reek and Robert Smith III, National Aeronautics and Space Administration executive vice president of the McDonald Douglas Corp. Richard Hargrave, science writer for the Chicago Tribune and other newsmen will be among the panelists.

The conference will be held April 26-28 in the University Center and Shocker Auditorium.

Will read Dina please sit down?

Easter sunrise service will feature talks, music

An Easter sunrise service at 6:30 a.m. Sunday at First Church of the Nazarene, South Poplar and Monroe streets, will feature three talks by members of the church and special music.

The Rev. Clarence Dulan, pastor, said the laymen's talks will be made by: Norman J. Williamson, an "Eggspectation of the Resurrection," by James Mayhugh, on "Logical Meaning of the Resurrection," and by Cheuster Nelson, on "Christ, Resurrection and Our Resurrection."

A question-and-answer session will be conducted by the pastor.

The public is invited.

This cooperative mixed media entry of three figures won three student painters a $100 prize in the 1971 Undergraduate Art Show at SIU. Supplied as one entry, the work is by left to right: Jane Weeks, St. Louis; Barbara Gould, Chicago, and Carol Ann Hennphill, Roanoke, Va.

New Soviet buildup is reported in Egypt

By the Associated Press

The Soviet Union is sending more than 400 jet fighters and armed vehicles to Egypt, and a new missile buildup is suspected, Western diplomatic sources in London report.

Increased air shipments were first detected 10 days ago, they said, and Soviet military man-power in Egypt has increased lately by 2,000 men. The authoritative British Institute for Strategic Studies reported about 40,000 were there last year.

The report came Wednesday from diplomats whose governments are represented in Cairo. Informants said it gave these other details:

The number of surface-to-air missiles, SAMs and SAMs, has increased, although by how much is not certain. Last month the institute estimated Soviet forces were making up to 80 SAM sites and an unspecified number of SAMAs.

Now a vast new anti-aircraft defense complex has been detected along the Nile Valley from Cairo to the Aswan Dam and along the Mediterranean seaboard as far west as Lybia.

Soviet jet fighter deliveries have been increased along with anti-aircraft and other equipment. The institute estimated Soviet planes were making up to 100 MIG-21 jets at six Egyptian airfields last December.

President Anwar Sadat of Egypt said recently that April will be a decisive month for the Middle East and warned that fighting could resume if Israel refused to respond favorably to Egypt's peace proposals.

Egypt released last month to extend the cease-fire that went into effect last August. But it has continued on a de facto basis.

Meanwhile, a British Foreign Office spokesman reported that Soviets and Egyptians have met unofficially in London last Friday to discuss the Middle East crisis. The meeting was presumably called by the Britons. The Foreign Office sought to stress that the meeting was a routine affair even while making it clear it was the first of its kind.

Bicycles repaired

By Vera Palmer  
Daily Egyptian Staff Writer

There is a special area about 18 feet by 35 feet in a wing of the Marion State Penitentiary. It's special because that's where some prison inmates spend six hours a week renovating old bicycles which are then turned over to needy youngsters in Marion.

The bicycle renovation program was started at the prison in January, 1977, after prison officials, inmates and Marion Jaycees expressed interest in continuing the program which was begun by the Marion Jaycees last year. 

Last year the Jaycees contacted the Marion Police Commission and asked to take the program over, said Charles Fenton, a special assistant at the prison.

According to Fenton, bicycles are brought to the prison by the Jaycees. After the men finish appropriate repairs, the bikes are distributed to needy youngsters in the community through the Marion Police.

But why would prisoners get involved with a voluntary program like this?

There are a several reasons for bringing the project to the prison. 

According to Fenton, the prisoners enjoy the work and get a kick out of doing it for the kids. Most of the prisoners at Marion are not there for crimes of a federal nature, according to Fenton. However, some are serving sentences for such offenses as passing bad checks, counterfeiting and drug-related crimes.

"These guys aren't causing trouble, and this place is geared to rehabilitation," Fenton said.

Indeed, the prison officials at Marion have made it common knowledge that the prisoners who so far have undertaken the program have been better conditioned than most who have been out on parole.

Fenton sees several advantages to having such a project at the prison. He says the project can only work in the bike shop during their free time, since there is nothing to do with idle time. It also provides training for men who will someday leave the confines of the prison.

"A job is the way out," said Fenton. "It's training." 

According to one of the prisoners, taking part in the project is helping him more than is helping the kids who are supposedly getting the bicycles.

"It's helping us identify with something good," he said. "This is a program that everyone enjoys." 

Twenty-three bicycles have been delivered to the prison to date, and the prisoners are hoping that more will be donated.

"We are about 30 men involved in the program now," one inmate said, "but there's a waiting list of about 100 others who want to work here. We need kids in a program like this and everyone wants to work on it," he added.

Ron Presno, a city councilman in Marion and a chief organizer of the prisoner bike project, says the original idea behind the program was to find a way of providing bikes for deprived youngsters in the community.

"But the perspective has changed," Presno said. "It seems to have done a lot of good in the prison. It's given the inmates a purpose.

Because the project seems to be working so well, Presno is trying to carry it a step further.

A lot of the kids who get the bikes are delinquents, he added. I've talked to some of the prison administrators about bringing the boys around and getting them into the community, where they would be around the bikers.

Presno feels that this kind of contact with the inmates would help the kids and continue the program's interest in the project. "It'll let the prisoners know who they are fixing the bikes for," he said.

All financing for the bike project at the prison is provided by Youth, Inc., a Marion organization.

Presno said that the repairs are made during the inmates' free time, and tribal officers are needed to oversee the prisoners activities. Because of the extra work taken on by some 13 staff members at the prison alone, the program has been able to operate at free time to supervise the bike shop to keep it running.

"This project is expected to continue as a permanent basis," one inmate said. "A couple of Chicago backwoods prisoners have asked if we could repair bikes that they provide," he added.

The men involved in the bike project at Marion prison seem to be very active.

"This is a maximum security prison, and the officials have gone out of their way to help this program succeed," the bicycle project coordinator said. "And we like helping kids," he added.

Bike's behind bars

A disassembled bicycle is given a new cycling life as an inmate of Marion State Penitentiary (above) selects a fender for it. The bicycle is one of many repaired in a bike renovation program carried on by inmates for the benefit of (deprived) youngsters in Marion. The bicycles are stripped and repaired in a small shop area (left) within the prison. About 300 bikes are repaired each week on the time on the bikes, and 130 others are on a waiting list to join the program. Prison regulations prevent the revealing of names and faces of prisoners. (Photos by Nelson Brooks)

Daily Egyptian Sports Writer

"...we are making too many defensive mistakes," said SIU
head football coach Harry Jones.

"I'm not satisfied."

With the University of Tulsa coming to Carbondale this week, if SIU had made even fewer of its current 23 errors, Jones would still probably not be satisfied.

That's because Tulsa has the kind of pitching needed to kill a team that makes too many errors. And with Tulsa, one error may be too many.

So the big question of the SIU-Tulsa football game will be: Can the Salukis defensively handle all the difficult passes that Tom Eshed of the Chicago Tribune predicted the Salukis will be forced to attempt to pass the ball tonight?

Jones had fielded some of Eshed's written words in the Saluki defense the past few weeks as he designed his own defense.

Eshed said his defense would have to attempt to cost the Salukis fielding advantage (at least third base) the losers of the regulars. His performance is a question mark but he is a seasoned football player and he can also hit.

He led the Cret Club league in that department although his 361 batting average was not as strong as the team leaders.

At shortstop in former first baseman Dan Kaufman. He leads the league in fielding average. He is being called the "Tom Eshed" of the Saluki defense.

With SIU fielding a switch," said Jones, "and Danny was the only player on the team who was ever cut out for the role of running backs."

He played shortstop in high school and he didn't walk into that position blindly and I think he will do a good job as short at least for a short time.

His college transfer Duane Kuppler stepped in at second when veteran Ken Kirkland was injured seriously enough to the point for the rest of the season, and the SIU coaching staff is giving him a lot of praise for the younger infielder.

"He's really done a good job for us," said Jones. Kuppler is 5'10" at 170 for the plate on a 4.2 batting average and he owns a .566 fielding average going into Friday's game.

Jones has been alternating freshman Dan Marham and veteran Jim Macriagin at first Thomas in a team that is coming eastward from Columbia, Ill. and is currently breaking the leaders in batting with a .444 average even though he dropped out of high school.

Said Jones: "I'm sorry for the major league position in the SIU. I don't think that he should have a great chance in the major league position."

Thomas' position opens the door for the last year. He has accumulated that his batting average is still above the .400 mark at .400.

This should add to the winning defense since the first of the week and there will be no way of telling the difference between the team's work."

JONES: Too many errors

Is SIU defense good enough for Tulsa?

The SIU teams team defeated the University of Kansas City 29-14 opening day action Thursday at the Oklahoma City Invitational Tournament which was held in Oklahoma City this week. Oklahoma City defeated Missouri 9-4 and adv. on Friday action against North Texas State.

The tournament finals will be held Saturday and SIU coach Dick Faver does not expect his team to be victorious despite the 15-0 victory over Kansas City.

The Chiefs are favored for the title.

SIU's Jorge Ramirez opened the game scoring for Southern in the No. 1 victory over Central. When he defeated Jayhawk Jay Ballinger 44-6, 6-4, 4-6, 6-4.

Greenwood Smith, No. 2 SIU singles player, then lost to Cal Simmon 4-6, 6-4, 6-4. Four consecutive Saluki singles victories followed.

Chris Greenwade stopped Jom 6-4. 3-6, 6-4. Mike Beeter defeated Mark 6-4, 6-3. Mike Beeter defeated Mark 6-4, 6-3. Mike Beeter defeated Mark 6-4, 6-3.

Tom Carter eliminated in straight sets.

In the doubles competition, the Salukis defeated three matches Ramirez and Smith defeated Ballinger and Henry. 6-1, 6-2.

Greenwade and Bruce were victorious against Simmons and Williams. 7-6, 6-2.

The only doubles loss came when Clayton and Tuttle were defeated by Wik and Carlson. 4-6, 6-4.

Coach quits NBA
to join ABA team

DENVER (AP)—Alex Hannum has been chosen as head coach of the Denver Rockets of the American Basketball Association unless he resigns his post as the Denver Nuggets general manager. Paul Lobman, who has been coach of the Denver Nuggets of the National Basketball Association this season, informed his new job to the ABA Rockets open arrival at Hampton International Airport early today. In a telephone call, he answered questions when asked about the rumored job this week.

Hannum, here for a 5:30 p.m. during the week, said it was not determined what would happen to general manager, management, including coach Stab Abrak.

Indianapolis State is foe

‘Phantom’ trackmen return home tonight

By Ken Stewart

Daily Egyptian Staff Writer

It’s been 11 months since SIU fans have seen the ‘phantom’ track team.
Its performances have been read of but not seen. Lack of an indoor facility for the winter season has kept SIU away from Carbondale since last spring.

Now the Salukis are home again as they face Indiana State Friday evening in McAndrew Stadium.

Field events will begin at 7 p.m. and running events will start at 7:30 p.m.

The home opener wasn’t to occur for another 11 days when Murray State visited McAndrew Stadium April 20, but Indiana State requested this week’s meet be moved from Terre Haute to Carbondale.

Injuries and illness cut Southern down to the Scythes’ size.
A basketball game that was to run off with the Midwestern Conference indoor track crown while Indiana State trailed five to meet last February.

Saturday, Ralph Kneiser, a hurdler, has been out of action for two weeks with an illness. Then distance man Glen Linje became ill as others joined the injury list.

Eddie Sutton, a key link in the relays, turned an ankle on an icy pavement this week and handler Ron Frye also pulled a leg muscle.

“We have to do a wonderfully good job to beat them,” said head track coach Lew Hartwig. “If Ronnie (Frye) can’t run in the hurdles we’ll be hurting badly.”

It stacks up a real tough track, he added.

The Salukis have also lost the services of high jumper Rich Lienhazer, long and triple jumper Dan Miller and shot putter and discus thrower Bill Blackinston, they are ineligible for the spring quarter.

Blackinston was SIU’s only shot putter and discuss thrower and he set McAndrew Stadium record against Indiana State by throwing the discus 164-1 last year.

The old record of 164-9 was set by him in 1969.

The Salukis have “borrowed” four football players—Bill Sharpe, Dick Smith, Charles Davis and Nat Shabot—to replace Blackinston in the discus. Southern was at 203-1, 198-45, in a dual meet last year after taking first place in 14 of 17 events.

Indiana State has an outstanding sprinter—Tom Case—who finished third in the 440-yard dash at the conference indoor meet two-tenths of a

Salukis face Tulsa here; Hurricane 12th ranked

By Fred Weisberg

Daily Egyptian Sports Writer

If SIU’s baseball team is presently entertaining any thoughts of getting into the College World Series come June, it had better forget them and concentrate on this weekend’s three game series with the University of Tulsa starting with a 3:30 p.m. single game Friday.

Tulsa has been rated 12th by the Collegiate Baseball News, and at last year’s Missouri Valley championships, they are rated a national contender.

The Golden Hurricane is 14-4 on the season with a 1-4 and 6-2 doubleheader sweep of Oklahoma State Tuesday.

The first game was a one-hitter and the second a two-hitter which gives something of an indication of the kind of pitching strength Tulsa owns.

A good pitchers duel could be shape-up jump at the point, again make SIU’s Obed Gardiner. The Scythes outpitched Gardiner by about two feet to take the title.

What can a two-time All-America and reigning national champion do for an encore?

Charles Roperquet joined the Peace Corps. “It’s my cop-out.”

He also set a list of priorities for himself which includes winning the Panasda National Invitation rings championship this weekend and getting a university education.

Another is “to stay in shape but I’m burning out a little right now,” said the collegiate rings champion. “I can feel it coming. I’m getting tired. I’ve been working out since August pretty hard. Some people can pick it back up for years before it’ll start taking a toll. But you have to work on your points have to start getting botched up. My shoulders are really bad right now,”

I climax at nationals and I’m sort of tapering off right now as far as being able to do stuff in school because I’m just past tired.

I had developed a保存 that helped Roperquet to a national rings championship and will go into action this weekend when he and teammate Mark Davis will be two of 90 invited gymnasts competing in the Panasda Invitational.

The next big meet for the 1970-71 All-America might be the Amateur Athletic Union championships, May 7-8 in Cedar Rapids, Iowa. But that could be a long way off for Roperquet.

Won’t work all-around

The high school non-peak turned collegiate champion doesn’t work all six events which means he is ineligible for the 1972 Olympic gymnastics team.

And once a gymnast gets out of college, there are offerments to the United States except training for the olympics.

“If I really wanted, and if I wanted to be a graduate student, I’m not going to do it. I could start working all-around and pick up a few events but I don’t think I have the skills in all events necessary to make a team and excel,”

It took him four years to be the best in one event, much less five more events.

Gymnastics in the United States is unique in its kind. There aren’t enough colleges in the Midwest where a gymnast doesn’t use specialists which has cut this country’s chances of doing much in international competition.

Here they allow you to work as a specialist because this is the way things are in other countries, a real disadvantage in international competition.

They allow you to work as a specialist because this is the way things are in other countries, a real disadvantage in international competition.

There are more and more international meets all the time. Roperquet said, and thus working all around will just make you worse because there is an international factor involved.

“That’s why the United States is going to improve so much. We’ll do much better in the next Olympics than we did in the last.

In the 1968 Olympics, America finished seventh as a team and the highest individual finisher was Dave Thor of Michigan State, 24th.

Title ended jinx

Roperquet’s national championship in his final collegiate competition ended a long string of second place finishes when the salmon was high that began at last year’s NCAA championships.

He was favored for the title but fell on my ass.

“I was so prepared and I didn’t realize how psyched I was,” Roperquet recalled. “And I pulled so hard I didn’t realize how high I jumped to do the double bar and overspan, falling on my ass.”

Seven months later, he followed second at last November’s Midwest Open. It was my fault I just wasn’t in shape.

Then came the Midwestern Conference championships in February and he choked the final routine. I had a few seconds left, you know. The final could have been repeated in last week’s nationals. Indiana State’s Dave Seal had him beat in all events.

A week or two weeks before the nationals, I started getting into a mental groove where I knew I wasn’t going to be on top. I worked the out and that really helped me.

In all events, I won at the first meet.

Black, who has continued as my performances yesterday afternoon and night. I felt very objective about what he was doing because I knew he was here, sitting milk from a beer mug.

“I have to watch a lot of young people, and the older people, and I have to watch them very closely, but I always have a better eye on them because of the way I’d be able to tell you what the other team had in the way of the team meet.”

Could I mentally handle a loss now?

“I’m not going to lose.”

Charlie proved he was the last but凡特 that’s out there. There was no reason why he can’t do it again.
