Walkers Overcome Obstacles

The proposed two year construction period for the new Life Science building has already created pedestrian traffic problems and more are expected to arise.

Throughout the construction of the new building, which will be located directly west of the existing Life Science building, several wooden fences have been built to enclose the area from the traffic of students walking to classes. Several of the fences cross side-walks leading to the Agriculture and Communications buildings. Presently, students are able to pass these areas by climbing over or through the constructed fences. But with the entire area of construction fenced off, all traffic will have to use either Loop drive or go around the east side of the present Life Science building.

The new building, which is being constructed by J. L. Simmons Inc. of Decatur, will have four floors and a basement and cost $9,777,700. The exterior of the building will be buff brick and precast concrete paneling with narrow vertical windows of tinted glass.

Laboratories and offices in microbiology, physiology, botany, zoology and psychology will be housed in the new building. Storage, holding and special research quarters for live laboratory animals will be on the basement floor.

A Look Inside

The new building will contain approximately 100,000 square feet of floor space, including 34,000 square feet for four new laboratories.

A basement floor will be added to the Science building, which will house a new Zoology department. A new Biology laboratory will also be added.

Construction on arteries awaits contract letting

Construction of permanent connector routes between Illinois and University Sts. since the one-way system went into effect in August.

Highway engineers decided to convert Illinois and University to one-way routes to ease congestion caused by the heavy amount of auto traffic moving to and from the SIU campus. At that time, Oak and Mill Sts., were designated as temporary connectors until funds for permanent connecting routes would be available.

Under the temporary set-up, motorists travelling south through the city or to the campus have had to make a series of right angle turns and stops to hook up with Illinois St., which runs one-way north between Oak and Mill.

The new connectors will bear gradually westwardly from Illinois to University at the north couple and east.

(Continued on Page 2)
**Students Held in Drug Charge**

One SIU student has been charged with sale of narcotics and another has been charged with possession of narcotics in Circuit Court in Murphysboro.

Richard A. Greco, 20, of Chicago, was charged with sale of narcotics and Joseph V. Kerk, 21, of Murphysboro, was charged with illegal possession of narcotics.

Police list both men as residing at 301 W. Willow St., Carbondale.

Capt. Carl Kirk, SIU Police, said the narcotics involved in the charges is marijuana.

Ray Darnell, Carbondale police, and agents of the state Bureau of Narcotics arrested the two at their residence Tuesday evening.

Both men were being held.

**Construction Awaits Contracts**

(Continued from Page 1)

...wardly from University to fill the Cackle, 701 S. University, and the southerly connector to begin near the Technical Tape Corp. building, 420 N. Illinois St., and jog at a slight angle westwardly until it joins yesterday in the county jail with bail set at $10,000 each. A hearing has been set for Jan. 15 for both men.

**Tickets on Sale**

For ‘Clear Day’

Ticket orders are being accepted for the SIU Celebrity Series presentation of the Broadway musical “On a Clear Day You Can See Forever,” to be given twice Feb. 2 in Shryock Auditorium.

Tickets have not arrived from the printing company, but order placements are being made.

The ticket orders went on sale Monday, and the actual tickets are expected to arrive within two or three days.

Prices for the presentation are $1, $1.50 and $2.50 for students at the matinee and $1.25, $2 and $3 for the evening performance.

General public prices are $1.25, $2 and $3 for the matinee and $1.50, $2.50 and $3.50 for the evening performances.

The matinee will be presented at 3:30 p.m. and the evening presentation at 8 p.m.

Peace Corps Tests Set Today

Peace Corps testing will be held from 8 a.m. to 5 p.m. today in the University Center.

Convocation will feature Robert Ettinger, author of "Prospects of Immortality," at 10 a.m. and 1 p.m. in Shryock Auditorium.

Free School will hold recruting from 5 a.m. to 5 p.m. in Room H of the University Center.

Convocation coffee hour will be held from 11 a.m. to 1 p.m. in the Ohio Room of the University Center. VISTA recruiting will be from 9 a.m. to 5 p.m. in Rooms E and H of the University Center.

Southern Illinois: Regions of Opportunity Lecture Series presents "Legends and Lore of Southern Illinois" by John Allen at 7 p.m. in the Studio Theatre.

Probe will feature "The Death Penalty" from 8 to 11 p.m. in the Library Auditorium. Student Council and Faculty Conference Period of the School of Agriculture will be from 9 to 11:30 a.m. in the Agriculture Seminar Room.

The Western District Boy Scout Council Dinner meeting will be held from 6:45 to 9 p.m. in the University Center. Pi Sigma Epsilon Conference Period of the University Center.

The College Student Personnel will meet from 4:30 to 5 p.m. in Room E of the University Center.

Young Democrats will meet from 9 to 10 p.m. in Room D of the University Center. The Check Room staff will meet at 7 p.m. in the Lake Room of the University Center.

Spleunking Club will meet from 7-9 p.m. in Room B of the University Center.

University School will be open for recreation from 4 to 6:30 p.m.

Block and Bridle Club will meet at 7:30 p.m. in the Agriculture Seminar Room. Pan American Organization will meet from 7-8 p.m. in Room C of the University Center.

The Student Personnel will meet from 4-5 p.m. in Room E of the University Center.

Architect (office), luncheon will start at 12:15 p.m. in the University Center Renais­sance Room.

University High School Gym will be open for recreation from 4 to 6:30 p.m. Singers, dancers and musicians in the Latin American numbers of International Night will meet at 7 p.m. in Room C of the University Center.

At Health Service

The Health Service has reported the following admis­sions and dismissions:

A d m i s s i o n s : Lawrence Deady, Pierce Hall, and Den­nie Moneateller, Wilson Hall, Jan. 10, Dismissed: Vivian Turner, 308 W. Cherry, Jan. 10.

SIU, Kentucky Wesleyan Game To Be Aired Tonight on Radio

The SIU vs. Kentucky Wesleyan basketball game will be broadcast at 7:55 p.m. today on WSIU Radio.

Other programs:
8:55 a.m., Morning News.
10 a.m., Pop Concert.
12:30 p.m., News Report.
1 p.m., SIU Convocation; Robert Ettinger, author of "Prospects of Immortality."
2:30 p.m., The London Echo; Poet George MacBeth discusses the London Poetry Secretariat.
3 p.m., News Report.
3:10 p.m., Concert Hall.
4:55 p.m., News.
5:30 p.m., Music in the Air.
6:30 p.m., News Report.
8 p.m., A Question of Art.
8:30 p.m., News.
11 p.m., Moonlight Serenade.
12:25 p.m., News.

Channel 8 to Look At Motion Pictures

The evolution of motion picture will be traced on "The Movies" at 4:30 p.m. today on WSUI-TV, Channel 8.

Other programs:
5 p.m., The Friendly Giant: "Eat Like a Rabbit."
5:30 p.m., Underway for Peace; "Mission Mediterranean."
6:30 p.m., Spotlight on Southern Illinois.
8 p.m., Passport: "Islands in the Sun," "Fashionable Hong Kong."
10 p.m., Film Classics: "The Mark."

Shea Coauthors

Activities

SIU chairman of men's physical education, Edward J. Shea, is co-author with E.E. (Tad) Wieman of "Administrative Policies for Intercollegiate Athletics."
**Center Overcrowded**

Students showing common courtesy towards their fellow men is the only solution to the overcrowded situation of the Roman and Oasis rooms in the University Center, according to Ronald Rogers, manager of the food service.

It is important that "sitters" do their sitting, sitting or studying at times other than breakfast, lunch and supper rushes. Although the "sitters" who have paid their activity fees have as much right to sit as anyone, they still must keep in mind the object of the cafeteria.

Students who are seeking to be treated as a whole when it comes to housing and social rules must accept the responsibility of an adult in showing custody to his fellow students.

Throughout the hours of the day when the cafeteria is located at the sea with hungry persons, there is no objection to prolonged studying, lounging or talking.

But, once again, during the peak hours of breakfast, lunch and supper the cafeteria should be restricted to eating.

—John Durbin

**The Negro And History**

Recent riots in city high schools highlight the lack of communication between the races even where integration exists. Fear, distrust, and hatred galvanize tempers and obliviousness as the cutting force of the minority group's pride in the future.

In the case of Englewood high school, a Negro student put into the Chicago public schools was astounded to find when he took a Negro history course that he was taught written out of our Negro history.

Washington Carver were the only Negroes who have contributed to our accomplishments if he doesn't know about it to feel he is a part of the country.

Parents might also be enlightened by such readings.

**Nobody Likes an Organizer**

By Arthur Hoppe
San Francisco Chronicle

There's an organization you may have heard of called Mensa. It's rather exclusive. It has to test out two, maybe even three per cent of a certain group in intelligence in order to get in.

Personally, I've never applied. Not me. I'm too smart to join an organization like that.

It isn't that I have anything against Men­san, although I'm not sure I'd want my daughter to marry one. Heck, a very few of my best friends are Mensans. And they have a minority group's pride in their heritage.

"I'm really just a social organization," they'll tell you, somewhat defensively, "like to get together with our own kind."

And you can imagine the good times they have.

"Hi, there, George. The square of the hypotenuse equals the sum of the squares of the other two sides."

"And ain't, cos and tan to you, Al."

So there was Mensa, a happy little in-group, united in the common purpose of any organization—which is, of course, to keep everybody else out.

Only now a terrible schism is rocking Mensa to its very foundations.

"It's the fault of the top one per cent. They've now formed an even more in-group inside Mensa called Internet, it's living like the top one per cent. Therefore it's twice as intelligent an organization as Mensa and twice as exclusive.

Naturally, Mensans who are too stupid to get into Internet are pretty sore about the whole thing. A bunch of intellectual snobs, is the way they generally refer to Internet members, 'I wouldn't join Internet even if I could.'

And you certainly can't blame them. How'd you like to know you were too stupid to get into some exclusive club?

But you can envision what's coming next: I see where you test out in the top one-half per cent, George, just like me. Now Internet may be all right for the masses, but I feel we top one-halfers should get together and form our own group.

Eventually, of course, there will be an in­in-in-in group composed exclusively of George and Al. And when Al tests out one millihundred of a percent higher, he'll form the most exclusive organization of all, consisting of the smartest man in the whole wide world.

And he won't have a friend to his name.

Well, that's the way it goes with organi­zations, from Cub Pack 100 to the Hell's Angels. The more exclusive they are, the more superior their members feel, and the more widely they're hated.

Who wants to be hated? With that in mind, I hereby offer you a lifetime mem­bership in the only organization worth belonging to —

We don't exclude anyone on the basis of religion, color, age, intelligence, morality, nationality, but twice as exclusive as the most exclusive.

Naturally, Internet is the only organization whose members are exclusively black.

What the heck, we'll even let the Mensans in.

**Our Man Hoppe**

By John Lerner

New York Times

Mensa to its very foundations.

Mensa called Internet, it's living like the top one per cent. Therefore it's twice as intelligent an organization as Mensa and twice as exclusive.

Naturally, Mensans who are too stupid to get into Internet are pretty sore about the whole thing. A bunch of intellectual snobs, is the way they generally refer to Internet members, 'I wouldn't join Internet even if I could.'

And you certainly can't blame them. How'd you like to know you were too stupid to get into some exclusive club?

But you can envision what's coming next: I see where you test out in the top one-half per cent, George, just like me. Now Internet may be all right for the masses, but I feel we top one-halfers should get together and form our own group.

Eventually, of course, there will be an in­in-in-in group composed exclusively of George and Al. And when Al tests out one millihundred of a percent higher, he'll form the most exclusive organization of all, consisting of the smartest man in the whole wide world.

And he won't have a friend to his name.

Well, that's the way it goes with organi­zations, from Cub Pack 100 to the Hell's Angels. The more exclusive they are, the more superior their members feel, and the more widely they're hated.

Who wants to be hated? With that in mind, I hereby offer you a lifetime mem­bership in the only organization worth belonging to —

We don't exclude anyone on the basis of religion, color, age, intelligence, morality, nationality, but twice as exclusive as the most exclusive.

Naturally, Internet is the only organization whose members are exclusively black.

What the heck, we'll even let the Mensans in.

**Dry Hope for the WCTU**

You may have missed it, what with the flutter of peace feelers from Hanoi, bowl game scores and political jockeying for position, but the dedicated Christian Temperance Union had a year-end report, like everybody else, and it saw 1968 as a very good year for the cause.

The national president of the old pro­hibitionist organization, Mrs. Fred J. Tooze, pinpoints her hopes for a repeal of the XVIII amendment to the way we live right here in town. "The wetting conditions in Washington," she said, "and drinking and drunkenness by many in public office, as well as the reportedly wet attitude of the White House is helping to revive public opposition to alcoholic beverages."

We don't ginsantly agree with Mrs. Tooze on booze. She seems to be saying that because of the high percentage of bushels— the soaking wet crowd on Capitol Hill and in the barrooms—the people are going to recoil in horror and demand an end to this senselessly permissive attitude toward other folks' sins.

The problem there is that it is Congress itself that would have to approve another prohibitionist amendment—a likely possibility indeed.

Mrs. Tooze's deeper implication is that the main prohibitionist hope lies with those who oppose the White House on other grounds and who will revive prohibition chiefly in order to deprive President Johnson of his occasional glass.

Mrs. Tooze obviously doesn't hang around much in those Washington circles where the President is most freely denounced. But if she turns out to be right, by far the most interesting development of this election year will be the merging of the Disaster Democrats and the New Left with the Prohibition Party in a mopping-up drive on the soppy liberals and old soaks of the New Deal.
Publish or Perish? Not Necessarily

By A. M. Buchan

In the St. Louis Post Dispatch

It is not only the college professor who must publish or perish; it is the consequence. Every man who makes his living by brain work knows that the novel, the editorial writer, the minister, the copy-writer,—must grind out his quota of words, not perhaps every day but certainly so as to place a taskmaster, himself or another, as peremptory as the head of a college department. Perhaps what seems a trifle ridiculous in the old days when the college was the dogma as it rules in the academic world are the assumptions underlying it; that a professor’s own, important task is to bring out articles and books or making discoveries in science; that the college professor is the one person on demand and the author will have a growing list of items to his credit; and the man teaching, or assisting the campus community interferes with his research, he is at times to be found to agitate for a day off his time and energy. Behind these assumptions lies an interesting story.

At one time, the special mark of the professor in the famous universities of the past century was a talent for productive scholarship. He usually came by it because of happy circumstance,—early youth, opportunity of employment in a sympathetic home, for instance, the stimulus of his own exuberant talents, above all an inborn capacity for long hours of solitary work. Sometimes he was renowned as a teacher, or the campus athlete, or a Clementine poet. It may be that ill luck was handed over to assistants who were kept too busy lecturing, grading and trying to make a living, for they have had but little time for much production of their own.

The professor retired into his study or lab, nothing was allowed to disturb him, and being a bright and persistent fellow, he emerged in course of time with a book or a discovery of scholarly merit. To the students who were few. Between the famous universities of the past in which renowned intellectuals emerged in course of time with a book or a discovery of scholarly merit. Over the years this has been the normal form of mental activity in a society that, like a saint’s halo, set him apart as a genius, as privileged staff members, they pursue their inquiries unhampered by much teaching or solicitude for students of the college community. Having learned how to seek out and shape material without agonizing about its value, they keep on happily turning out articles and books. By middle life, they think of becoming dean, consulents, and editors of scientific journals can always rely on them for a solid kind of research as the professors of the old Kingdom of Academe. They are plentiful, but they are not the majority.

There also slip into the profession, a little later in life, men who are eager, young men who barely survive the rigors of their training. Through several years of graduate training, they bear up meekly under an inhuman load of papers, each one written against a deadline and under the bludgeon of a grade. For months they labor over a dissertation, the mechanics of which become more and more unmanageable and dreary as the weeks pass. If the thesis is something a young man finds himself a job, he is apt, in reaction to the drudgery, never to want to write again, nor a paper, a not a footnote, not even a letter home. And at this point of disgust, the head of his department calls him in and suggests that an article would be more desirable than spending too much time with the students. At the moment when he utters this first gasp of relief at being free to read and teach, and choose his own course, he hears the crack of the academic whip. These young men are more inclined to try their hands at intellecual activity or to its expression in words. They talk excitedly to another in lab and library, and many of them, if they have the knack of teaching, kindle a fire of enthusiasm in their undergraduates and sophomores. But for years they have written with great labor, papers for an audience of one, personal

Rush for Prestige

In this rush for the kinds of prestige of which lists can be made,—so many Woodrow Wilsons, Guggenheims, Ford and Rockefeller grants and Nobel prizes, the professors, the college professors, the college professors who win, the colleges have been shamed about the domestic chorne of teaching. They overlook the fact that in the famous universities of the past in which renowned intellectuals emerged in course of time with a book or a discovery of scholarly merit. Later, they find it a lonelome and dreary labor, for an audience of one. Rush for the kinds of prestige of which lists can be made, so many Woodrow Wilsons, Guggenheims, Ford and Rockefeller grants and Nobel prizes, the professors, the college professors, the college professors who win, the colleges have been shamed about the domestic chorne of teaching. They overlook the fact that in the famous universities of the past in which renowned intellectuals emerged in course of time with a book or a discovery of scholarly merit. They overlook the fact that in the famous universities of the past in which renowned intellectuals emerged in course of time with a book or a discovery of scholarly merit. Later, they find it a lonelome and dreary labor, for an audience of one.

The open question, of course, is, will the hard-headed young men, who publish because they must and make a success of the system as they find it, undertake this thankless chore, or will they try to find one else to take it over? A generation of college professors, who published a little and loved teaching more, is rapidly disappearing, and the young men who fill their places may have less time to give to students and be less eager to listen. This is not the case. Teachers know that teaching is required because of the heterogeneous nature of the student body. And the more complex knowledge becomes, as it seems to do in every field of investigation, the more essential is the teacher’s task of pointing a thread of communication between it and the sensitive filaments in the minds of young people.

David Henry
Gun Control Recommended For Chicago

CHICAGO (AP) — A City Council committee, following a hearing attended by a word-unanimously Wednesday to recommend that the council adopt ordinances that would control ownership and traffic in firearms in the city, Mayor Richard J. Daley proposed the laws, which would require registration of all firearms in the city, prohibit gun ownership by persons under 18, by narcotics addicts, by felons within five years of the offense, by prison and by mentally retarded persons.

Gun registration would be free. Failure to register a weapon could result in a $500 fine and confiscation of the firearm.

The ordinances also would make unlawful possession of and dealing in a firearm a business or an inaccessible part of a car.

The City Council meets Jan. 17 to act on the recommendations.

Then more than a dozen witnesses testified during the finance committee hearing.

Counterfeit $50 Million Nabbed By Secret Service

NEW YORK (AP) — A mound of counterfeit currency, largest in the nation's history, was reported vanished Wednesday before New York police could unload $50 million in fake $10, $20 and $100 bills. Samples were available for inspection by prospective buyers.

Already in the hands of federal officials as of Wednesday evening were officials of printing the money, none of which, apparently, got into circulation.

The bills were printed in New York and two in Ohio. The man seized in New York was a 26-year-old Beach, Fla., lawyer, was described by federal authorities as a small-time traffic manager for the ring.

The other two men, accused of printing the money, none of which, apparently, got into circulation.

Further arrests were forecast by Albert E. Whitted, agent in charge of the Secret Service in New York. The Kennedy Airport seizure was the largest haul of phony money in the history of the Secret Service, surpassing the 1963 recovery in San Francisco of $2 million in counterfeit $20 and $50 Federal Reserve notes.

Chapter 1 of a new book by the Secret Service is the arrest of three men Tuesday night who were charged with making $50 million in fake currency.

The book, "The Kennedy Airport Story," was published by the Secret Service.

Recommended by the committee for reason of reliability is Ray Henry. Mr. Henry was supported by Ray Page, Illinois superintendent of public instruction and a member of the board, who renewed a recommendation of the board's Special Committee on New Jersey Institutions that the board accept the concept that Illinois universities fit into one of five different systems that offer a particular type of education.

"If the report's committee's comments are accepted as policy, the University of Illinois would be permitted to fore-close itself from the governance of any new institution which conceivably might be proposed in the state of Illinois," said Mr. Page. Contended the special committee's report considered far more radical than did the Illinois Legislature in setting up the Board of Higher Education or than the board intended in giving support to its committee's assignment.

The special committee recommended that the proposed Chicago senior college be governed by the Board of Governors and that the proposed Springfield college be governed by the Board of Regents.

WASHINGTON (AP) - Senate Democratic Leader Mike Mansfield said Wednesday that conversations with President Johnson have convinced him the United States will not permit the outbreak of Communist forces from South Vietnam into neutral Cambodia.

"It would be a tragedy compounded on tragedy," the Montana Democrat said during a press conference. "I commend the President for his unyielding attitude in that respect."

"I think I have a pretty fair idea of the President's feeling on Cambodia," Mansfield said. "We have discussed it from time to time."

Mansfield, back at the Capitol after a two-week vacation, said he believes President "has been subject to very strong pressures" to authorize troop crossings into Cambodia and perhaps into North Vietnam.

But he said he believes Johnson will resist either step.

U.S. Ambassador Chester Bowles is in Phnom Penh, Cambodia for talks with Prince Norodom Sihanouk on Communist use of that neutral nation's territory as a sanctuary from U.S. and South Vietnamese forces in the Vietnam war.

Sihanouk had suggested that Mansfield might serve as a U.S. emissary, "on his master's business.

Mansfield said a policy of pursuing Communist forces into Cambodia would force the United States to boost its Vietnam troop commitment to 700,000 or 750,000 men.

---

Calf Hearts May Be Used In Human Transplant Cases

WASHINGTON (AP) - A research project aimed at preconditioning, the hearts of unborn calves for ultimate transplantation into a human being was disclosed Wednesday by Dr. Charles A. Hufnagel, a heart surgeon.

The project could lead to establishment of a living heart bank and eliminate the need to delay heart transplants until a suitable human donor can be found.

In a relaxed development, Prof. Mauricio Levi announced Wednesday in Tel Aviv that he had replaced a damaged human heart valve with one taken from a calf. The Israeli surgeon said his patient was "doing quite well."

But whereas Levi used only the valve, the project undertaken by Hufnagel and his associates at Georgetown University Medical School here envisages the eventual substitution of a whole calf's heart for that of a human patient. Hufnagel said in an interview he is confident the technique ultimately will be "the real breakthrough" in heart-transplant surgery.

The doctor, a pioneer in the field of human kidney transplants, said he has no plan to transplant human hearts.

He said the Georgetown research will center on treating calf embryos - still in their mothers' wombs - with drugs and radiation to eliminate or minimize the innate tendency of the human body to reject animals' hearts as a foreign substance.

In the five human-to-human transplants already performed, there had been no opportunity to precondition the donated heart before implanting it in the recipient's body. Postoperative treatment aimed at disarming the patient's rejection mechanism has been necessary.

---

Civil Disorder Report Not Comfortable

WASHINGTON (AP) - The chairman of the presidential panel studying city riots reported Wednesday no facts turned up to indicate that any of the rioting was prearranged.

Gov. Otto Kerner of Illinois, chairman of the National Advisory Commission on Civil Disorders, told a news conference the group's report would be ready by March 1.

"The report we believe will be uncomfortable for the people of the United States," he said. "It covers, he said, the facts of why the riots occurred and how they happened. It also will make recommendations on how to prevent them.

Mayor John V. Lindsay of New York, vice chairman of the commission, said he trusts the report will be thoroughly read and "I expect it will be completely honest."

The 11-member commission was appointed by President Johnson last July 29 after widespread disorders in cities. Its report was due July 29 of this year, but the commission moved up the deadline.

One of the reasons, Kerner said, was a realization that conditions for rioting might be the same this year when summer comes.

Asked if the report would be uncomfortable for the Johnson administration, Kerner replied, "I don't think it will be comfortable for anybody."

Kerner said no price tag on the cost of their recommendations had been determined. He did say the commission will suggest that certain functions be appropriately be used in a little different way.

The commission held 19 days of hearings and visited eight cities. It has heard testimony from some 130 witnesses.

The commission held 19 days of hearings and visited eight cities. It has heard testimony from some 130 witnesses. Testimony and staff went to 23 different cities.

RAP BROWN TAKES SANCTUARY

At Cuban Mission to U.N.

NEW YORK (AP) - Black Power militant R. Brown took sanctuary inside the Cuban Mission to the United Nations on Wednesday night, after a policeman sought to arrest him during a pushing incident on the street outside.

By telephone, Brown told a newswoman: "This happened on mission territory. My rights are a gun... They have no right to question me."

Police Capt. William Lake, who was in uniform and on routine guard duty at the building, said: "Brown was said to have been carrying a package and Gloriaeasmad, "What have you got there?"

"Why don't you mind your own business and go away?"

Brown was quoted as replying.

Train Schedule

BAGBEE, SIDETRACKED

FOR BIG SALE

---

GRADUATES

Our company, a well-established and growing meat packer, opens openings available in our management training program for young, aggressive and ambitious college graduates.

The successful candidate must possess the following qualifications:

- The quick ability to learn and adapt to all phases of the meat packing industry.
- The desire to develop as a leader in the area of management and decision-making.
- The capabilities of advancing to responsible management positions.

Bachelor or Masters Degree in Business or Agriculture preferred, but not essential. Top salaries, and excellent fringe benefits offered for those with outstanding academic records and management potential.

Tickets for Ella Fitzgerald

Still Available; Show Jan. 28

Ticket sales are lively for the Ella Fitzgerald Concert scheduled for Jan. 28, but good seats are still available, according to Dean William Justice, manager of the SIU Arena.

Tickets for the show are on sale from 9 a.m. until 10 p.m. daily at the University Center Information Desk and will be sold until the date of the performance. Prices range from $1.50 to $3.50. The show will start at 8 p.m. in the arena.

Miss Fitzgerald, queen of female jazz vocalists, held the title “Favorite Female Jazz Vocalist on Campus” in 1964, 1965 and 1966. She performs such selections as the popular “Ode to Billie Joe” as well as tunes ranging from “Satin Doll” and “Summertime” to “Goin’ Out of My Head” and “Sonny.”
Southern Illinois Airport Serves Transportation, Education, Research

By Jay Kenemerly

To persons who have used it, Southern Illinois Airport is one-of-a-kind providing important service to aviation, education, research and community air transportation. All of the town's citizens are located in what was once a poor area.

Airport manager Gene Seibert considers his operation unusual because he has practically every service provided by any major airport in a town of 15,000.

Across from the terminal and airport building and hangar houses the facilities of the Aviation Technology School at SIU.

Southern Illinois Airport, operated by SIU, covers 566 acres about midway between the towns which own and support it—Carbondale and Murphysboro.

As passengers are pleasantly surprised to find the modern facility and the number of services at their disposal, Soo stop for lunch in the airport's attractive Skyroom Restaurant, while others hurriedly pick up a set of keys at the rent-a-car desk and move to neighboring towns for business meetings.

An architect designer, he has airport officials on the new administration building to be erected soon.

"We have the room and plans to increase our runways," says Seibert. "That means more traffic in the future."

In addition to two DC-3's, Southern operates six and nine-place light aircraft of the single and twin engine types.

When it began using its own aircraft (4/63), Southern was 69 days behind the national average of 1,000 trips and 35,000 passengers. Today Southern offers 70 full-time pilots and keep at least six planes on the ground.

They are busy transporting athletic teams, debate squads and other University groups both state and elsewhere.

The University's other investment comes under the heading of SIU Vocational Chemistry Seminar.

J. W. Hill of the SIU Department of Chemistry will hold a seminar, "Substitution Effects of Free Radical Stability," Friday at 4 p.m. in Parkinson 204.

The place to go when you're feeling low is Speedy's The Scarbs are playing tonight 9:30 p.m. to 1:30 a.m.

5 miles North at Desoto on Hwy. 51

Technical Institute. Presently, three major areas of study are available to the student in Aviation Technology. Associate degrees are offered in Professional Pilot, Maintenance Technician and Aviation Electronics.

Soon to be incorporated into the program is a course helicopter pilots and mechanics.

Faculty Chairman Edward A. DaRosa sets the standards for students. "Our two-year course must produce men of academic excellence with good social bearing," he says.

An associate degree, Alpha Eta Rho, provides ample opportunity for social and professional contact, while proof of academic excellence might be inferred from the steady stream of interviewers who seek out DaRosa.

In his words, "I have representatives coming from United, Braniff, TWA and National, and all my boys who will be graduated in the next six months are already hired."

An impressive $2.5 million inventory of equipment, tools and fully operational mockups are at the student's disposal in the classrooms.

"If you don't see any other airplane in the sky, you must have these facilities," comments DaRosa, pointing to room after room of hangar and aircraft systems.

"If you were to step into the cockpit of a new commercial jet liner, you would see exactly what the students are using in these classrooms.

We are teaching today's and tomorrow's aircraft, not yesterday's," he said.

After earning their associate degrees, many students find work in the aircraft industry. Others move their studies to the campus in Carbondale and continue to earn a bachelor's degree in management or other related fields.

Article on Characeae

Published by Journal

Donald F. Tindall, assistant professor of botany at SIU, has an article in the December issue of the Journal of Plant Physiology. The title was "A New Species of Nitrella (Characeae) Belonging to the Nitrella Flexilis Species Group in North America."

The article was part of a larger study on Characeae, an aquatic plant.
ILLINOIS JUNIOR COLLEGE MOVEMENT TO INFLUENCE STATE INSTITUTIONS

By Mary Jane Coffel

With the stepped-up pace of the "Efficiences Movement" in Illinois, state institutions of higher learning are going to experience a decrease in their undergraduate enrollments, according to Darle E. Keefer, professor of secondary education at ISU.

"SIU hasn't been affected to any noticeable degree, but in the future ISU could become primarily a graduate institution," he said.

The junior college movement isn't an Illinois phenomenon, but it's taking place throughout the nation, said Keefer.

Illinois was the first state to have a public junior college with Joliet Junior College being founded in 1901. By 1960 Illinois had six public junior colleges with the Chicago Junior College operating since 1963. The Department of Higher Education now recognizes 32 public junior colleges and 14 private junior colleges.

"Where a junior college becomes established in an area, it tends to draw a good and increasing proportion of the college-age group," said Keefer.

In the future junior colleges will affect the nation's larger universities because the freshman and sophomore enrollment, will decrease, he said.

Keefer emphasized that this means the classes at the junior-senior level in the universities will be larger than they are today.

"Also more people will go into graduate work," he said. "They will have more money to further their education because they lived at home moving the first two years of school."

The "Junior College Movement" has affected counseling and guidance programs in the state's high schools as well as the junior colleges. The function of the secondary school counselors will be to help a student plan his college program by suggesting the facilities which junior colleges offer.

The junior college counseling and guidance personnel will have as their primary job the matching of students to various programs offered.

"High school seniors will be influenced to go to junior colleges because the schools are located within driving distance of home," said Keefer.

"There will be a greater proportion of students planning to go on to junior colleges for the first two years of college work and for specialized and advanced vocational training."

Today the Illinois Public Junior College System is emphasizing the comprehensive junior college. With this type of curriculum, the junior college maintains an acceptable program in general education, occupational and adult education. In other words, the emphasis is on vocational training as well as training in liberal arts and sciences.

Keefer believes that in the near future graduating high school seniors will be more interested in junior colleges.

"I think that students who are given scholarships to schools located farther from home will be the ones who aren't interested in junior colleges."

Another problem which arises when choosing between the junior college and the state schools is educational standards. There is much speculation that the standards in the junior colleges will be lower.

However, Keefer said, "The people in my classes who have survived the junior colleges and come to SIU have been able to do comparable work to juniors who have been freshmen and sophomores at SIU."

Will SIU become primarily a graduate school in the future? This is the question which has been discussed recently on campus.

"SIU will continue to grow slowly, but it will grow at the junior, senior and graduate levels with the greatest growth coming in graduate students in the future," Keefer predicted.

He believes SIU will eventually become an upper-level graduate and professional school.

Glee Club and Quintet To Present Concerts

The University Male Glee Club and the Faculty Brass Quintet will present concerts on Jan. 20 and 21 respectively in Shryock Auditorium. The glee club will perform at 8 p.m. and the brass quintet will entertain at 4 p.m.

Deck Seminar Offered For River Officers

Three-day deck officers' supervisory seminars will be offered at SIU in February and March.

Identical in content, the two sessions are scheduled for Feb. 21-23 and March 18-20. They are offered by the SIU Transportation Institute and Division of Technical and Adult Education.

Seminar content is based on suggestions by officials of barges, Illinois State and the US Patent Office and is designed to supplement skills and knowledge of deck officers, according to Edward F. Dardis.

Towboat and barge safety, including accident prevention and hazardous conditions and cargos, emergency medical treatment and the importance of communications and effective personnel relationships for the deck officer, will be covered.

The seminar faculty will include L. H. Grote, safety director of the Illinois Harbor Commission; Leo Coles of the Chicago Transportation Institute; and University faculty members Frank Bridges, associate professor of health education and coordinator of Civil Defense, and William D. Smith, assistant professor of speech.

The registration fee of $35 covers lodging, meals and transportation on the University campus. Participants may choose either the February or March session, Dardis said, but registration must be received by Feb. 15.

Out-State Licenses Won't Make Bond

Out-of-state driver's licenses are no longer acceptable bonds for driving violations.

The revised Illinois State Police Code, signed by Gov. Paul J. Douglas, states that unless otherwise specified, $25 cash or the equivalent of an Illinois driver's license are acceptable bonds for violations.

Robert Kingsbury, assistant professor in the Department of Music, will conduct the glee club, and Rebecca Hindlin will be his accompanist. The glee club will sing "O Come, O Come, Emmanuel," "When Good Omens Is Good" and "Quatre Petites Pieces de Saint Francois."

Following intermission, the club will present "Opening," "Landlord, Fill the Flowing Bowl," "Something's Love," "Aura Lee," "Where Have All the Flowers Gone?" and "King of Banan." Other song presentations will include "Wagon Wheels" and "Old Arkansas Motiv." Feature performers on the Faculty Brass Quintet are: Phillip Olson and Donald Wooster, trumpets; George Nadal, horn; Gene Stimson, trombone; and Melvin Siebert, tuba.

Testament Officers are instructors in the Department of Music while Olson and Stimson are associate and assistant professors.

Skating Party Planned At Marion Rink Friday

A roller-skating party is scheduled Friday at Poe's Skate-In, in Marion. Buses will leave the University Center at 9 p.m. and will return at 12:30 a.m.

The cost is 50¢ per person, including skate rental. Those interested may sign up at the Student Activities Office before noon, Friday.

Group Studies Soccer
For Curriculum Spot

The Study Committee on Intercollegiate Athletics has formed a sub-committee to study the possibilities of including soccer in the athletic curriculum.

Members include Athletic Director Donald Boydston, Dean of Students Wilbur Molt, Vice President Joseph Chu, faculty advisor to the Intercollegiate Athletics, and Director Donald Boydston. Dean of Students Wilbur Molt, and Vice President Joseph Chu, faculty advisor to the Intercollegiate Athletics.

In a meeting held Jan. 2, the committee discussed the current soccer club program and conditions that must be met before the club could be considered for intercollegiate competition or support from the University.

Present requirements that the club cannot meet include a professional coach and an operating budget excluding a coach's salary. The club does not play a regular fall season or scheduled matches in the spring quarter.

Other major rule changes include:
- A maximum of three trips to the pitcher's mound can be taken by a coach before he is required to change the pitcher. Two times in one inning to talk to the same pitcher also will require the removal of a pitcher.
- A run down play, an obstructed baserunner will be awarded at least one base beyond the base he had last legally touched. He had been required to return to the base he had last touched.
- No run may score on any play when the third out is made and the third out is

Swim Tryouts Set

Winner tryouts for the Aquaeet's women's swimming club will be at 5:45 p.m. Tuesday and Wednesday at the University School pool.

Interested persons unable to attend regular tryouts may contact Miss Julee Hiller at 3-2297 or in Room 124, Women's Gymnasium.

Jumpers to Meet

The SIU Sport Parachute Club meeting will be 7 p.m. Tuesday in Room D, University Center.

Officers will be elected and dues will be collected for winter. Parachuting will resume today and Sunday at the SIU Airport.

New NCAA Baseball Rules
Apply to '68 College Play

By George Knemeyer

A series of rule changes in college baseball will have pitchers meditating over the rule books long before the 1968 season gets underway. Sabuk: Coach Joe Lutz, who has just returned from an NCAA rules clinic in New York, said that four of the seven new rules involve pitching regulations.

The changes are designed to make collegiate baseball coincide favorably with professional rules. The most notable changes are listed below:

-The pitcher must take the signal from the catcher while standing on the pitching rubber. Previously, he could take the sign anywhere.

-The pitcher can deliver the ball from a set position without coming to a complete stop. A stop is defined as a complete reversal of direction. Previously, a pitcher had to stop to set up for one, two, or three runners on base.

-The pitcher must deliver the ball or make a play or attempted play within 20 seconds after receiving the ball. If he fails to do so, a ball will be called. Previously, a pitcher could take as long as he wanted.

The 20-second rule has been in effect in the pros, but has only token enforcement. Lutz feels that it will be enforced more often in college play.

CIFGAST M COACH Comments...

SIU gymnastics coach Bill Meade expressed relief Wednes­day that the NCAA officials intend to call off the meet. Meade expressed relief through the terms of gate receipts, certification.

"The ruling could be a move to the decision could be supported by an )-level team on a national table in which 4.0 is the maximum.

Dr. Mason W. Gross of Rutgers University defended the admission of a boy who failed to meet the standard, pro­tested what he called "a ridiculous and unjustifiable rule." The rule specifies that an athlete must project a 1.6 grade average on a national table in which 4.0 is the maximum.

The original rule, strongly objected to by Ivy League and other Eastern colleges, also said that the athlete must maintain this average-equivalent to a D—in order to remain eligible for athletic competition.

In an amended version, adopted at the annual NCAA convention Wednesday by vote of 232 to 92 -- the main­tenance of the average is not required where an athlete pro­jects a C on the NCAA's national table or a table more demanding upon admission.

However, for the institu­tional or conference table is not at least equal to the national table, then the athlete must meet the 1.0 level throughout his college career.

In order not to jeopardize the U.S. efforts in the 1968 Olymp­ics, the NCAA and AAU over control of amateur sports.

Walter Byers, executive di­rector of the NCAA, said the action was delayed until Nov. 1 in order not to jeopardize the U.S. efforts in the 1968 Olymp­ics. He said the action was delayed until Nov. 1 in order not to jeopardize the U.S. efforts in the 1968 Olymp­ics.

This has been a sore spot in the long-running debate between the NCAA and AAU over control of amateur sports.

The AAU has insisted that it cannot accept joint sans­tioning of open track and field events, and it has steadfastly refused to give certification for track and field events.

The so-called moratorium has been in place since 1965, at the start of the so-called "open" era. The AAU and the NCAA have been trying to reach an agreement on the issue for years, but have been unable to do so.

Earlier the NCAA retained the ruling which, it said, was academic for any attention. The official said that the AAU had expressed aưởng of its support.

Meade pointed out that the ruling does not necessarily prohibit the AAU from compet­ing in all AAU meets. But all events entered will have been sanctioned before­hand by the AAU.

"The AAU's argument is that it cannot accept a joint ruling," Meade commented, "It's understandable for the AAU to control the advertising in the New York papers. A lot of money is being spent by those conducting the sports, the participants as students."

"It's especially good because most of the time the AAU officials have thought only in terms of gate receipts."

"The new ruling will force them to think more of the people as individuals instead of in terms as races coming through the gate," he added.

Meade pointed out that the ruling does not necessarily prohibit the AAU from compet­ing in all AAU meets. But all events entered will have been sanctioned before­hand by the AAU.

"The AAU's argument is that it cannot accept a joint ruling," Meade commented, "It's understandable for the AAU to control the advertising in the New York papers. A lot of money is being spent by those conducting the sports, the participants as students."

"The new ruling will force them to think more of the people as individuals instead of in terms as races coming through the gate," he added.

Meade pointed out that the ruling does not necessarily prohibit the AAU from compet­ing in all AAU meets. But all events entered will have been sanctioned before­hand by the AAU.
SIU Meets Arch Rival Ky. Wesleyan Tonight

SIU will meet possibly its toughest foe of the year when it takes on Kentucky Wesleyan at 8 p.m. tonight at the Owensboro sportscenter. The Panthers stand 7-2 in won-lost and are ranked second among small colleges. Their only losses have been to Central State of Ohio in overtime and top-ranked Evansville by seven points.

The two big guns for Wesleyan are forwards Dallas Thornton and George Tinsley, averaging 16.0 and 19.0 respectively.

"They'll be two of the finest players we'll meet all season," Saluki Coach Jack Hartman warned. "They're both fine individually with excellent court play. Thornton is exceptionally good under the bucket, and they're both fine defensive players."

According to his coach, Mayer ranks in the top 15 "all-around" performers in the country and if he continues to show improvement, he would be in the top 10 by the end of the year.

Proof of Mayer's ability can be found in the fact he is the first SIU gymnast to qualify for the Olympic trials to hold later this year. He compiled 144 points over the holidays in the United States Gymnastics Federation Eastern Clinic in Ft. Lauderdale to become one of the eventual 30 or so gymnasts who will compete for a spot on the Olympic team.

Mayer's point total is the minimum qualifying score for the June tryouts which will be the first of three such sessions. He picked up 32.50 points in the optional exercises and 51.80 in compulsory events.

"Mayer has been putting in more time since the end of spring and this has been reflected in his work," Meade said, "and in his qualifying score."

His work in other events besides the all-around competition has also shown improvement.

He was only a 6.0 performer on the high bar last season, but improved this year to an 8.5 and Meade thinks he can hit 9.0 mark by the end of the year.

"Still rings is his weak point, but Meade said 'he is still improving' and could turn in good scores in that competition by the end of the year. Mayer started in gymnastics as the result of an error when he enrolled in some courses at the Berkeley, Calif., YMCA.

'I wanted to take judo, but made a mistake," he recalls. 'I went on the wrong day, and that's the day they had gymnastics. I enrolled anyway.'

Saluki Grapplers Drop Opener 30-13

Colorado State won all but the last three matches as the Salukis Grapplers dropped their home debut, 30-13, Wednesday night in the Arena. 115--Jime Martinez, Colorado State, decisioned Mike Rossy, SIU, with .51 remaining in the second period.

145--Gary Wickal, Colorado State, pinned Tim Toppling, SIU, with .52 remaining in the fourth period.

152--Pat Menke, Colorado State, pinned Tom Duke, SIU, in 54 of the third period.

177--Ben Cooper, SIU, decisioned Mike Patterson, Colorado State, 13-2.

SIU's Al Bulow, 191, and Richard Sebowski, heavy, were on default.
