Panel suggests raising bar entry age

By Lisa Miller
Staff Writer

Carbondale bars could deal a second heavy blow if the liquor control commission decides to raise the bar entry age to 21. On Sept. 1, Gov. James R. Thompson signed a bill prohibiting the sale of reduced-priced drinks during happy hours, which was a large source of income for many bars.

Now, the Carbondale Liquor Control Commission has a panel of city staff members study the ways to curb underage drinking. The result was a report that suggested raising the bar entry age to either 21 or 19. The current entry age for many bars is 18.

The report stated that underage drinking was a serious problem in Carbondale and "the bar entry age deserves serious consideration."

"The simplest solution would be to raise the entry age to 21," the report said. However, the report noted that some of the bar owners in Carbondale, especially those who own bars on Southern Illinois Avenue, "the Strip," would be forced out of business.

Jeff Allsop, manager of Checkers, located on East Grand, said if the bar entry age was raised, a lot of the younger students would have no form of entertainment.

"Since we're the biggest dance bar in Carbondale, the young people like to come in and just dance and socialize," Allsop said.

Allsop said the employees at Checkers were very strict about underage drinking.

"We kicked a lot of underage drinkers," Allsop said. "But a lot of underage people come there for the music and dancing. I don't think it's fair to ruin their good time."

Ann Karayanni, owner of Finney Pub, an over-21 bar located on East Grand, said she was "somewhat ambivalent" about raising the bar entry age to 21.

"She said she raised the age to 21 would make the bar owners life a lot easier because they wouldn't have to constantly worry if someone underage was illegally drinking.

"I don't really think it would hurt our business too much," Karayanni said. "We have a pretty tight clientele." The report said raising the entry age might be too strict because of the students who frequent

An SIU-C student could be chosen for the Illinois Student Assistance Commission, formerly the Illinois Student Scholarship Commission, which is responsible for the administration of numerous financial aid programs.

Susan Hall, who has served on several campus organizations and the Illinois Board of Higher Education for three years, is a nominee for the student commission position.

Mary Barber, assistant to the governor for education, said The ISAC is unique compared to other higher education administrative boards in that "ISAC allows the student commission a full vote and full membership, not just an advisory status."

"The student has the same rights as all the other members since the student position is appointed by the governor, just like the rest."

After appointment, the student must be confirmed by the Illinois Senate.

To be considered for appointment, a student must be nominated by an organization that represents Illinois students, Hall said.

Barber said the Illinois Student Association, Illinois Board of Higher Education's Student Advisory Committee and the Illinois Community College Board's Student Advisory Committee typically nominate students, but these are not the only groups which can nominate.

"We don't know how many nominees there are at this time," Barber said.

However, Hall said she only

Colombian army offensive seizes 42 properties

By Carrie Pomeroy

Anthropology professor Jonathan Hill spent a month in Colombia last July studying the social and ecological effects of gold mining on Colombian Indians, who are also referred to as indigenous peoples.

Hill conducted interviews with the Yanconas and Tanimoto people who live adjacent to gold mining on the Magdalena River. He also attended a conference on mineral rights organized by the National Organization of Colombian Indians and participated in seminars at the University of the Andes.

Hill said the Harvard-based group Cultural Survival funded his research, providing about $3,000 for travel expenses. He said the group's mission is that "it's bucked the biggest不用担心的 movie star."

Stones' sold-out act leaves crowd in awe

By Doug Toole
Staff Writer

The kids may be slight and the airplane may be flying again, but the Stones are definitely rolling.

The Rolling Stones concert Friday night in Alpine Valley was, simply put, incredible.

Mick and the boys played a two-hour concert in the Alpine Music Valley Theater in East Troy, Wis. that left the sold-out crowd hoarse and awe-struck.

The band never disappointed.

The show was a mix of greatest hits and newer material with no unusual tunes tossed in. The effects were spectacular and the band members outplayed all expectations. It is easy to see how the Rolling Stones has achieved its legendary status and following.

The set opened with 'Start Me Up' and an explosive light show. From there the band went into some cuts off their new 'Steel Wheels' album. The audience wasn't very familiar with the tunes, the band's level of intensity won the crowd over.

Then came the favorites, 'Tumbling Dice,' 'Ruby Tuesday' and 'Play With Fire.' It was one of the first of the afternoon's tunes played. The evening played like a good '70s hit album.

The Upjohn Pops were part of the background band, providing a saxophone solo on 'Miss You' and a French horn introduction to 'You Can't Always Get What You Want.' Richards also got a chance to front the band, providing vocals on two of his own numbers while Jagger took a short break. After that break, things really started to jump. The band played 'Paint It Black,' '2000 Light Years From Home,' (with a psychedelic light show), and 'Sympathy for the Devil' in rapid succession. 'Gimme Shelter' and 'It's Only Rock and Roll' received thunderous applause and 'Satisfaction' closed the show.

The stage included two huge video screens that showed the band in case you couldn't see them from your seat. The rolling light show ranged from subtle to blinding, but always fit the mood of the song.

'Hosky Tonk Woman' was complemented by the presence of a three-story balloon shaped like a woman in skimpy clothing on either side of the stage. Even the backup singers got into the act, occasionally wandering out to center stage to do a bit with Jagger.

Throughout, the Stones gave some pleasant surprises. Early in the show Jagger announced the band would play a country number and then proceeded to play 'Dead Flowers' (hey, this is the Rolling Stones; they could play a medley of Carpenter numbers and it would work.) Most recognizable during 'Midnight Rambler' but puzzling for the most part, was a balloon dropped. It had a strong rhythm and blues sound. Even if rock 'n' roll has never taken this type of song, the Rolling Stones would probably still exist today as the world's greatest rhythm and blues band.

Unlike other bands, the Rolling Stones are still alive and kicking.

KIDS' TAILGATE PULLS THROUGH RAIN

By Jeanne Bickler
Staff Writer

Despite Saturday afternoon's menacing clouds, the Kid's Day tailgate tent was packed to capacity with children and the participating Greek members who made it possible.

"We have an excellent turnout," Don Lockhart, Interfraternity Council public relations chair, said.

The tailgate, sponsored by the Interfraternity Council in cooperation with the National Association for the Advancement of Colored People, offered free hot dogs, chips and soda for area kids, as well as free tickets and escorts for the afternoon's rain-soaked football game.

Brian Brown, director of boarding service for the Brehm Preparatory School, said he brought about eight kids from his school to the tailgate. The Brehm School students were invited by the Interfraternity Council to participate.

Jason Bowen, 7, and Junior Bowen, 6, from Carbondale, came to the tailgate with their parents.

The Bowen brothers were playing wiffle ball with the members of the Greek organizations.

Harriet Wilson Barlow, assistant director of public relations, said the children were very pleased with the way the Kid's Day tailgate turned out.

Recycling our trash should be a priority

TRASH WORTH cash? You better believe it. We have come to the point, in this high-tech world, where recycling is the way to go. Recycling is not only an environmentally conscious activity, but it is also profitable. Many items can be recycled, such as paper, aluminum, and plastics and taking the effort to separate the trash that cannot be recycled with the trash that can is one way that an individual can help out the environment. Instead of taking the attitude that your small part will not help, realize that the problem begins at the individual level.

The problem that is becoming more and more evident, and that has prompted a lot of attention for recycling, is the lack of room for trash. A recent study by the Illinois Department of Energy and Natural Resources states that in four to six years Illinois will not have anywhere to store its trash. Recycling may be one way to slow the trash flow.

However, it takes minimal effort for groups and individuals to save their aluminum cans and help the problem.

Recycling our trash should be a priority

At the University, recycling efforts are still on the grassroots level. However, if the university's Pollution Control Office gets support, there could be a campus-wide recycling program. This is something that everyone would benefit from. It would be an effort to make recycling a priority. Educating students on the desperate environmental situation, and having designated areas on campus for the collection of paper, glass, and aluminum, will likely increase the rate of recycling much easier. If students realize the problem, giving them an accessible place to throw the used goods would increase participation.

Another concern is the turnover rate among students. It is typical for a campus-wide program to have its ups and downs as the student population changes. According to John Meister, director of Pollution Control, a recycling program usually lasts about as long as the student leaders supporting the program are in school. However, if this is a total effort among students and the administration, there should always be someone who stays involved. Designate concerned faculty members to be advisors for the group, or even an administrator. These people will be able to get help from around the average student, and they could keep the project alive while constantly recruiting new members. With a problem that is not only locally, but universally evident, surely there would be a substantial number of people who would be willing to donate time, effort and their concern for the environment to help get a recycling project on its feet here at SIU-C.

But for the time being, before a project can be put together, students should put forth their own efforts. On the job, in the department or in the household, everyone should be conscious of the need to recycle.Bins should be set up in the hallways to designate one person to take the cans in for redemption. Even the smallest contribution is a solution to a very big problem.

Letters

Football players need to earn respect from students both on and off field

While playing intramural softball on Tuesday, Sept. 5, at approximately 5:35 p.m. at the lower level arena play fields, the true colors of our fine SIU football team came out.

The softball player that I was participating in was rudely interrupted, as well as the softball game on the adjacent field, by the football players who were leaving practice.

Their practice had ended and the players decided to march right through the middle of the softball fields intercepting both games and causing both games to stop because of this interference.

When reading the Daily Egyptian on Wednesday, Aug. 30, 1989, I turned to page 4 to read the viewpoint for that day.

After reading the article, I looked above the article and noticed a picture, which showed a concrete statue of Abraham Lincoln sitting in a large concrete chair. Directly below the statue of Abraham Lincoln are several young black men. One of these young men were staring at the statue and should bust up the statue and sell it for crack.

Student claims cartoon is insult to blacks

At first I didn't know how to react. I looked to see if this picture had a story to go with it. However, the picture was not accompanied by a story, but was for amusement only.

Therefore, I was appalled and down right disagreed at the fact that you would place a picture of this worth in our school newspaper. It not only has no purpose, but it also takes away from the true colors of our fine athletes on this campus.

The thought of this being approved for publication gives me a raw feeling of your staff. It stereotyped the minorities on this campus and serves as negative reinforcement.

If you can't show minorities excelling, then please use better judgment when depicting us in a different light.

Thus, to alleviate any further mental anguish, I would like to circulate a written and published apology to myself, the students and faculty on this campus. —Penry Feiton, Sophomore

Commentary

Increase in parents who would censor books

St. Louis Post-Dispatch

A recently released study by People for the American Way of censorship in the 1988-89 school year showed an increase in attempts to remove from schools material that teachers or librarians had chosen. According to the liberal organization, the most frequent targets are such literary classics as John Steinbeck's "Of Mice and Men" and "The Old Man and the Sea." Most interesting, more than half of the challenges to such reading material were attempts to remove them from the school library; the books had not been assigned reading material.

It might be one thing if a parent had an objection based on religious conviction to a book that had been assigned. In those cases, some attempt might be made to give the children of the complainants alternate assignments. But to remove classics of literature from the school library, to take them away from all students, because of the objections of a few or even many is simply wrong and cannot be tolerated in public systems.

Censorship drives usually originate with religious fundamentalists who don't want their children exposed to points of view of which they disapprove. Parents frequently underestimate their children's ability to understand and evaluate what they have read. Books enlarge a person's world and teach valuable lessons about the behavior of people, which is what education is about.

Parents who would censor are trying to keep the world out. Not only is that impossible, it is a mortal sin in our society.

Quotable Quotes

"I want that gorgeous policeman to know that he can't manhandle women, I'm standing up for the battered women of America." —Zar Zee Gabor talking about what happened when a police officer stopped her for having expired tags.

"There really is no need to feel it's important to just educate women who are willing to humiliate themselves." —Ann Simonton, former Sports Illustrated swimsuit model, who is against the Miss America contest.
American Red Cross blood

drive below 985-pint goal

By Phil Pearson

The week-long Post Labor Day Blood Drive ended Friday with the total donations 59 pints short of the goal. The regional Red Cross drive coordinator for the Red Cross, as Sue Ugent, said, although the goal of 165 pints wasn't met, she was impressed with the turnout of people. "Everybody has been really supportive of us," Ugent said. "Over 900 (pints) is a very significant amount." Friday's drive at St. Francis Xavier Church, 303 S. Poplar St., placed 10th in the nation. She added that the goals for on-campus blood drives are set higher than for most blood drives. "The goal for the Student Senate at SIU are always ambitious because SIU is always competitive," Ugent said. She said not meeting the goal won't cause a critical shortage of blood, but the Red Cross needs to do what it can to meet estimated demands for blood from area hospitals. "We think the blood supply is adequate, " Ugent said. "We hope we can figure out a way to make up for the shortfall." "We want to replenish this blood supply," Ugent said, citing the increased need for blood around holidays, like Labor Day. Ugent said 27 of the 131 people volunteering to donate blood Friday were deferred. This, she said, is an unusually high number.

RESEARCH, from Page 1

will not be possible to save the Amazonian basin because the destruction unless we save the indigenous peoples." By participating in the conference on mineral rights, Hill worked on the development of programs to protect indigenous people from being exploited by gold mining companies. He said the present situation in Colombia leaves indigenous people powerless in the exploitation because all precious and strategic minerals are declared property of the state. Although Colombian land laws protect indigenous people from invasion and from destruction of plants and animals, they are against the people's rights to resources found underground, he said. "If they discover gold under the house of an indigenous family, it could be dug up," Hill said. As a solution to this problem, a proposal was made at the conference to "establish Indigenous Mineral Zones, " Hill said. Such zones would give preferential resource rights to indigenous peoples who would have the choice to use or not to use the resources on their land, he said. Hill said his research gave him a unique opportunity to address environmental and social issues in Colombia. In meetings with Colombian officials in Bogotá, he brought up many problems he had observed in his contacts with indigenous peoples. "The river systems of Colombia drain into Venezuela and Brazil. If you have people using mercury in gold mining, "it's going to affect the ecology of the entire Amazonian basin," he said.

COMMISSION, from Page 1

the bars are under 21. James Preer, executive director of the Illinois Chamber of Commerce, said he has not had a change of heart, but bars own their issue. He said the chamber would address the subject at its next meeting. A second solution to curtail underage drinking was to raise the entry age to 19. "It would reduce the number of college freshmen who were placed in a drinking environment in the early part of their college careers, when they are trying to adjust to a new lifestyle," the report said. In Champaign, the University of Illinois, the bar entry age is 19 and in Dekalb, home to Northern Illinois University, the entry age of assistance is 21. "It's clear that something must be done by the city or the probability of the underage possession and consumption in Carbondale will continue unchanged," the report said. According to the report, raising the entry age might also increase the number of key parties in Carbondale. The report suggested the city might consider the possibility of prosecuting hosts of key parties who sell alcohol to minors.

The current fine for underage drinking is between $10 and $50.

BILL, from Page 1

$100 million in revenue by placing a 15-cent deposit on all beverage containers. Half the deposit would have gone into the environmental repair fund and the other half back to the consumer. The bill failed on the third reading in the senate.

HALL, from Page 1

Iowa, one of our other nominees besides her other nomination to the Illinois Community College Board's St. Louis Commission. Hall has been nominated by both the Illinois Student Association and the Board of Higher Education's Student Advisory Committee. As a member of the Illinois Board of Higher Education's Student Advisory Committee. As a member of the Illinois Student Senate, she has represented the Quad-Cities area. Also named to the committee were Janice Moore of Illinois College, M. O. G. of Illinois, and N. I. T. A. of Illinois. Lawrence K. Privett, SIU chancellor, also sent a letter of nomination on Hall's behalf to the governor. "Ms. Hall has shown not only a strong interest in student financial aid but an extraordinary ability to understand the complexities of financial planning," Privett wrote. Besides these nominations, the Governor's Office has received letters of recommendation fromzzarella, 203 S. Sizelade St., and Jennifer Morgan, Director of Student Affairs, SIU. Lawrence K. Privett, SIU chancellor, also sent a letter of nomination on Hall's behalf to the governor. "Ms. Hall has shown not only a strong interest in student financial aid but an extraordinary ability to understand the complexities of financial planning," Privett wrote. Besides these nominations, the Governor's Office has received letters of recommendation from

ROLLING STONES, from Page 3

The Who's 25th anniversary tour sounded like a farfellow performance. Jefferson Airplane is trying to see to it if it will be as an audience that long after Woodstock, Ringo Starr and his All-Star Band are just performing their old hits. The Stones are playing the songs that made them legends and still turning out enough new material to keep making albums. They really are that good.

Most individuals were deferred because of low iron in their blood. Ugent said. She said in most cases, people can get their iron level up with one meal by including iron-rich foods, like spinach or liver. Ugent said if potential donors have unusually low iron, it will be deferred.

The next Red Cross blood drive in Carbondale will be from 1 to 6 p.m. Oct. 20 at Wal-mart, Ugent said.

She said the next blood drive on campus will be the week beginning Nov. 5. Ugent said the next event will be sponsored by the Mobilization of Volunteer Effort. M.O.V.E. is comprised of registered student organizations and residents of various dorms.

Hill said his experiences in Colombia contrast sharply with recent media reports on the area's drug-related violence. "When you read the papers you get the impression that Colombia is tied up in knots, but I didn't find that to be the case," Hill said.

Hill said there was one outburst of guerrilla activity in a hotel and a drug lord living in Bogota, but he said generally he did not feel that he was in any danger.

One of the main difficulties in conducting research was transportation to and from Bogota to the indigenous peoples' land near I. T. A. Hill said. "It was very hard to get a place. We flew out on a plane naturally loaded with fish. My nose was blowing for five days after that," Hill recalled with a laugh.

Researchers trying lectureware in class

By Tim Crosby
Staff Writer

Two people in the SIU-C chemistry and biochemistry department are using computers to bring scientific marvels out of the laboratory and into the classroom.

The MaxLecture Project is a new teaching method that enables instructors to use the latest in computer-based instruction in the lecture environment to enhance education.

By evaluating commercial hardware and software and developing a CD lectureware, the researchers hope to disseminate the computer potential as a lecture tool.

"Computer technology is so flexible, it offers us a way to change the subject matter and methods we use in such a subject," said Conrad Hinckley, a professor of chemistry and one of the main researchers on the project.

Hinckley, along with Research Associate Robert J. Brenstein, received a grant from Apple Computers, Eastman Kodak and several other companies to develop computer-based lectureware methods and equipment. The two researchers recently offered a seminar on how to use the technology to faculty and administrators at the University.

"There was a lot more genuine interest in the project this time," Brenstein said. "People create an image in mind when you mention a new computer application. But when they are given something they can use, it changes. Everyone can do it."—Jim Farley

"MaxLecture is a new computer system for science education at the college level," said Hinckley. "The technology allows us to change the way we teach chemistry and give students a new way to learn.

"It is a big opportunity that we have been given. We are working hard to develop the best possible MAX Lectureware system to make MaxLecture a powerful tool for science education.

"The computers can be used in a variety of ways to improve the learning process. They can be used to develop new lectures, to modify existing lectures or to create entirely new courses.

"We are working on a demonstration of MaxLecture and we are confident that it will be ready for implementation within the next few months. We are excited about the possibilities that MaxLecture offers for science education and we are working hard to bring it to the classroom as soon as possible.

"Computer technology is a powerful tool for teaching science and we are committed to developing the best possible system to make it available to students. We are confident that MaxLecture will be a valuable addition to the science education system and we are working hard to bring it to the classroom as soon as possible.

"We are excited about the possibilities that MaxLecture offers for science education and we are committed to developing the best possible system to make it available to students. We are confident that MaxLecture will be a valuable addition to the science education system and we are working hard to bring it to the classroom as soon as possible.

Prison psychiatrist: Bakker suffered normal panic attack

CHARLOTTE, N.C. (UPI) — The Rev. Jim Bakker, a completely rational man, according to a government psychiatrist, was acting like a maniac in a federal court Monday for the ransom trial of Orestes Calloway Jr., because he was charging of framing his TFL flock.

The television evangelist is accused of 35 counts of theft and conspiracy related to money-raising tactics at the television ministry. If convicted, he faces up to 120 years in prison.

It was Bakker's first court appearance since the trial began but little evidence has been heard, first because a witness could not testify, and then because Bakker was committed to a hospital for psychiatric treatment of his attorneys and a psychiatrist said he was irrationally liable to do violence.

Dr. Earl Basil Jackson, a Manhattan psychiatrist who has appeared on Bakker's television show, told the court Bakker was psychopathic, hallucinating and had to be sedated with Xanax, a tranquillizer.

U.S. District Judge Robert Porter ordered Bakker taken to the Federal Correction Institution in Butner, N.C., for competency testing.

The judge called a recess after Nelson collapsed and Bakker was taken to a private room and began to weep.

"He said all of the events of the last three days have caused him a loss of PTL, the publicity about his interaction with others, his financial problems, the loss of his family's privacy — all of these events came home to him and he began to cry," said Johnson.

The psychiatrist said she found Bakker incoherent, easily manipulable and somewhat vain.

"I was immediately struck by his incoherent, self-aggrandizing type of behavior," she said.

"Cognitively he is intact. He has above average intelligence and is able to process information, but he has dependent features in his personality as well as narcissism."

Bakker is concerned about personal appearance. Given an alternative, he would never have been seen in public as he was when he was hauled off to Butner in handcuffs, Dr. Edgar Basil Jackson, an expert in psychiatry, said.

"His face was puffy, his clothing rumpled and his hair soiled that the tiny hair at the back of his head was showing. Bakker appeared in distress."

Johnson said she found no evidence that Bakker was psychopathic, as Jackson labeled him.

She said the panic attack was a perfectly rational reaction to the national political trial Bakker was facing. She said Jackson and one of his doctors, Dr. George Davis, praised the fame of his panic.

"When someone is panicking and that panic is fueled, it doesn't help the problem," Johnson said.

"What he needed was assurance a major catastrophe was not going to happen, that someone was going to be there for him, that things were going to be fine," she said.

"He needed someone to shore him up or get a handle on the situation." It's not abnormal for someone to experience those symptoms in a trial situation, particularly if there are trials followed on the heels of major events that could destroy a family life and lifestyle," Johnson said.

Visiting Soviet politician reverses criticism concerning Gorbachev

NEW YORK (UPI) — Maverick Soviet politician Boris Yeltsin turned down his own candidate of Mikhail Gorbachev Sunday and predicted the Soviet leader's policies would be judged with his conservative opponents.

"We need not whine about Gorbachev's 'populism,'" Yeltsin said in an interview with CBS's "Face the Nation." Yeltsin was a former KGB colonel and is considered a key to the movement for perestroika.

"Some people were concerned about the demonstrations of the country, especially the first stages," Yeltsin said.

"He did a lot for our international relations as well," Yeltsin said.

"But as far as the domestic policy, the political system, he has missed some opportunities."

"Nonetheless, I have no doubt that he has good chances and will indeed, return his position as leader," Yeltsin said, who was fired as Moscow party chief for telling the Central Committee plenum that reforms were coming too slow because conservatives were blocking changes.

But Yeltsin rebuffed and was elected to the new Supreme Soviet polling 57% of the million votes more than any candidate in Moscow.

Yeltsin said he supports Gorbachev's views on the strategic development of the Soviet Union but noted, "Sometimes we have differences of view on tactics."

"I think and I would like to retain leadership of the country," Yeltsin said. "And I think that that's the way it's going to be for the time being."

But Yeltsin indicated the single greatest obstacle to a multi-party system must be revaluated and that the people might someday consider a multi-party system.

"I do not reject the possibility of a multi-party system," Yeltsin said.

"But one has got to be discussed by the people first. And when the public opinion has matured, then the people can do this." But Yeltsin said the plans in number of cities. His original strategy has been avoided because Soviet authorities apparently delayed issuing the exit visas.

"Yeltsin has said that proceeds from his lectures, reported to be $25,000 each, will go toward treating children with AIDS.

Cubans opposing Castro's reign chain themselves to monument

WASHINGTON (UPI) — Five Cubans have chained themselves to the monument of "human rights" by the government of Fidel Castro chased themselves to the top of the Washington Monument for almost a half hour, U.S. Park Police said.

Officer John Nawrot said four men and one woman handcuffed themselves to the rail at the 500-foot level of the monument. The protesters agreed to let the police make voluntary and halt with police, Nawrot said.

In a statement issued later the five said they chained themselves to the Cuban Movement 30th of November "Frank Park." They said they chained themselves inside the monument to condemn what they called the 1962 massacre of hundreds of young Cubans by the Castro dictatorship.

The protesters said they were condemning what they called the 1962 massacre of hundreds of young Cubans.

"We have chained ourselves inside the pinnacles of the George Washington Monument, a democracy in Washington, D.C., to condemn once more the massacre of hundreds of Cubans by Cuba by Castro's dictatorship on August 30, 1962," the statement said.

"Still, after years of Marxism-Leninism, the violation of human rights in Cuba continues," it said. The protesters said the main purpose of the monument is the U.S. government not to establish relations with communist Cuba.

The United States broke relations with Cuba in 1961.

The organization, which was founded in Cuba in 1961 to fight Castro's dictatorship is comprised mainly of people who had belonged to the 26th of July Movement but turned against the dictator when they realized he was communist, spokesman Misael Abreu said.

Abreu identified the five as Carlos Rojas Leal, of Miami, Armando Gonzalez, of Miami, and Jesus Padin, of West New York, N.J.

The Cuban movement has offices in New Jersey, New York and Miami.
Brave youngsters to be given medals

WASHINGTON (UPI) — Four youngsters including a teenager who wrestled to the ground an armed man holding him and 70 of his California classmates hostage, will be awarded for their acts of bravery, the Justice Department said Sunday.

President Bush is expected to present the 1989 Young American Medals for Bravery to the youth at a White House ceremony tentatively set for Sept. 21, the department said.

Cited for his bravery and public service were Robin Ortega, 19, of Alhambra, Calif.; Angela Marie Campanoli, 12, of Lacey Wash.; Freddy Torres, 18, of Boston and John Philip Donovany, 17, of River Vale, N.J.

The Young American Medals Program recognizes people younger than 19 for acts of bravery or conspicuous community service. Justice Department officials selected the recipients from names submitted by governors.

"These award winners are examples of what's good about America's youth," Attorney General Dick Thornburgh said.

"Despite all we hear about the acts of small numbers of teenagers, most of today's youths are law abiding young men and women who will become productive adults and good citizens.

On April 80, 1989, Ortega and about 70 classmates at San Gabriel High School were in English class when a student armed with an assault rifle walked in and held them hostage for about 30 minutes.

Without regard for his own safety, Ortega grabbed the assailant's rifle and wrestled him to the ground. With the help of several students, Ortega held the assailant on the floor until police arrived.

"Yeah, I was afraid. But I was just trying to get the gun away from him. I thought he was going to start killing people, start hurting people," Ortega said in a telephone interview.

"I didn't think he would have time to shoot me. He was sitting on a chair and the rifle was in between his legs, pointing upward," said Ortega, who admitted it "feels kind of good" to have his friends call him a hero.

Another youth honored was John Philip Donovany, who served his River Vale, N.J., community and school in 1988 through a variety of volunteer programs.

Study: American education lagging

WASHINGTON (UPI) — Warning of dire consequences for the nation's future, U.S. high school principals issued a "report card" Sunday giving American education a C-plus, compared with an A-minus for South Korea and West Germany's B-plus.

The report differs from others that have focused on American young people lagging behind their foreign counterparts by examining not just student performance, but the overall commitment to education in the three societies, the National Association of Secondary School Principals said.

The study graded the countries: 15 categories and found America ranked as high as both South Korea and West Germany. Otherwise young Americans spend more time watching television or working at outside jobs and less time in school or doing homework, and are more likely to take drugs and live in crime-ravaged neighborhoods or single-parent families.

U.S. shows fewer educational television programs and more commercials, the report said.

Overall, the United States received one A, three B's, nine C's and two D's. The report gave South Korea 11 As, three B's and one C, and West Germany five As, nine B's and one C.

DEALING WITH CHANGE

This support group will be five sessions long and focuses on skills needed to manage the stress of all the changes taking places as a result of coming to college. Sessions will include: identifying coping strategies that work for you; identifying inner strengths and support systems; identifying and utilizing relaxation techniques that work.

Meets Wednesdays, 6:30-8:30pm, beginning September 13, Saline Room, Student Center.

If you can find a Macintosh in this room, we might put one in yours. Free.

In what will surely be the easiest test of your intellect this term, Apple invites you to try winning a free Apple IIe Macintosh with personal computer merely by finding it in this drawing.

We'll even give you a hint. It's not the table, the lamp, or the chair. It's not even on your own.

To register, look for contest details where Macintosh computers are sold on your campus. Oh, and right, we'll give you a hint for that, too. Look at the bottom of this ad. But as a really, really fast. Because only one Macintosh is being given away on this campus, and it's going to happen soon.

Soon, as in right away. Promise. Quick like.

But hey, you can take a hint.

Somebody's going to win a free Macintosh.

Ukrainian activists form national rebirth movement

KIEV, USSR (UPI) - Ukrainian activists formed a nationalist movement Sunday that called for rebirth of Ukrainian life and independence of control of the natural resources in their republic, the richest in the Soviet Union, and one time bastion of Europe.

About 200 people gathered under the watch of militia men later at a statue of the Ukrainian national poet Taras Shevchenko to show their support for the fledgling movement.

A small circle of women sang the Ukrainian national anthem in the dark during a steady drizzle.

"The Ukraine has not died, neither its glory, nor its will," they sang.

A total of 1,109 delegates, saying they represented 260,000 supporters, ended a three-day founding congress of the Ukrainian Popular Movement for Perestroika by approving a sweeping platform outlining economic and political reforms.

China marks 40th anniversary

Published slogans celebrate founding of the communist nation

BEIJING (UPI) - China published 40 slogans Sunday to mark the 40th anniversary of the founding of the communists on Oct. 1, including a refrain calling Chinese to praise the bloody suppression of the democracy movement. The slogans are part of a national propaganda campaign designed to instill patriotic sentiment before the Oct. 1 National Day which this year celebrates the 40th anniversary of the proclamation of the People's Republic of China by Mao Tse-tung on Oct. 1, 1949.

The government has already announced that National Day ceremonies will be relatively low-key and has scrapped plans for a military parade in Beijing. The city has been under martial law since May 20.

The slogans issued by the Communist Party Central Committee, were of a conservative cast reflecting the political tightening that followed the army June 3 crackdown on pro-democracy protests.

Among the list were "Warmly hail the successful quilting of the turmoil and the consistent voluntarism of Europe," references to the official labels for the protests.

Another slogans on Chinese to "firmly fight against bourgeois liberalization."

Woman sues jailed attacker for $5.86 million won in Lotto

LOS ANGELES (UPI) - A woman who fought off a man trying to rape her is suing him for the $5.86 million she won in the state Lotto 649 game.

Becky Ramack, a 28-year-old homemaker in Venice, and her husband, Ben, were on their way home from a fast food worker from Santa Monica, now serving a prison term for attempted rape, is remorseful for his crime and claims a voyeuristic obsession with sex that dates back to being molested as a child. He says he needs his winnings to pay for court-ordered psychiatric treatment.

He is being 8.56 million playing Lotto on Oct. 12. On Jan. 21, he attacked Ramack as she jogged along a rural road. He was arrested in February and pleaded guilty in June.

His lawyer, James Falcy said losing the jackpot would devastate Wilson and said the Ramack's suit

nises a question of justice. "How do you express remorse, and how much is enough?" Farley said of the Los Angeles Times.

"There are always two sides to every story." Becky Ramacks family founded the Missionary Church in Venice County and she attended church three times a week. A mother of two, her life was disrupted by the Jan. 21 attack.

Shortly after her surgery needed in a 7-mile jog. Wilson dragged her into a ditch and tried to pull down her shorts. As they struggled, he grabbed her by the throat with both hands.

"I was blacking out," she said. "I couldn't breathe for the longest time. I thought my life was over. I really did.

She broke free when a passing car distracted Wilson and flagged down a car that took her home.

Since the assault, Becky Ramack says she has had nightmares and panic attacks.

The Ramacks say they deserve Wilson's winnings to pay for her therapy and lost earnings as a church teacher. But they say they would use most of the money to fight pornography, abortion and other things they consider immoral.

Wilson, who had no criminal record before attacking Ramack, was actually molested by a man at 8 years old when he was 4 or 5 and has been treated with sex therapy since, court records stated.

He developed a habit of driving around staring at women, who called "a polling ton on wheels."

His winnings enabled him to buy a $200,000 van, hire an expensive psychologist and buy a home in Tarzana for $650,000.

Doctors told the court Wilson is a troubled voyuer but not a rapist and could benefit from long-term therapy.

But Farley said a verdict giving the Ramacks all Wilson's winnings "could wipe out everything Ray has, leaving him broke" and unable to pay for the therapy that could redefine his life.

Trial begins today for Gabor

BEVERLY HILLS, Calif. (UPI) -- Actress Zsa Zsa Gabor hasn't seen any of her jewelry since it was kicked off a Delta Air Lines flight for letting her two Shih Tzus run on the plane.

But the January airline incident prompted one woman's attention compared to Gabor's more publicized run-in with a Beverly Hills detective, who she slapped outside a court last month.

The admittance charges against Gabor that are running in Hungary include battery on a police officer, disobeying a police officer and having an expired driver's license. Other charges include having an open container of alcohol in a vehicle and a expired registration.

If convicted of the battery charge, Gabor, who lists her age as 66, could be sentenced to a year in Los Angeles County Jail and fined $2,000. The misdemeanor charges carry maximum six month jail terms and $1,000 fines.

Anticipating the worst, designer Bob Mackie has designed a $6,000 dress for Gabor complete with traditional jewel strips.

Gabor was spotted by Beverly Hills motorcycle cop Paul Kramer on La Cienega Boulevard January 14 for having expired tags on her $10,000 Rolls Royce coupe.

While the officer was checking her license by radio, Gabor suddenly drove off, police said.

Kramer followed her car a short distance away and ordered her out, police said. Gabor complied, but Kramer was not satisfied and officers in the face, police said.

She was uncooperative, arrested, fingerprinted and released.

The next day a visibly angry Gabor made a news conference at her $15 million Bel Air home to complain that officers had interrogated her and called her a whore and several choice obscenities.

Gabor showed off bruises on her left wrist and right eye she claimed resulted from Kramer pulling her out of the Rolls. She said her slapping of the officer was a "natural reaction" to the pain.

NAVY MEDICINE SCHOLARSHIPS UP TO $100,000

The Navy is accepting applications now for scholarships to qualified students in or who expect to be accepted by an accredited AOA or OCA medical osteopathic school in the United States or Puerto Rico. United States citizenship is required.

Here's What You Can Expect—

Up to 4 years of full tuition including books, fees and necessary equipment.

A stipend of more than $600 a month for living expenses.

Opportunities to pursue clinical and professional duties during summer periods.

Mother Teresa gets 'temporary control'

CALCUTTA, India(UPI)—A temporary pacemaker inserted next to Mother Teresa’s heart has controlled her irregular heart beat and the 79-year-old Nobel laureate was “feeling brighter” Sunday but remains under intensive care.

The Roman Catholic nun of worldwide renown for her unceasing charity work was placed in Calcutta’s Woodlands Nursing Home last Tuesday when she began experiencing an erratic pulse and related problems of fever and nausea.

Mother Teresa, who turned 79 on Aug. 27, made an initial recovery, but her condition again deteriorated on Saturday prompting doctors to place a temporary pacemaker beside her heart to control its beat.

“The pacemaker was inserted last night without any complications,” said Dr. A. Barthan, the leader of the medical team tending the nun. “Since then, Mother Teresa has responded well that had improved by early Sunday and the spirally nun appeared to be stable.

“How her temperaturn this morning remaining normal and the irregularities of her pulse are well controlled,” Barthan said. “All together she is feeling brighter.”

Pope John Paul II sent a telegram to Mother Teresa Sunday conveying a special papal blessing and saying he spiritually shared her hospital ordeal.

A Vatican spokesman said the pope expressed “assurance of his prayers and of his spiritual participation in the nun’s treatment and sent a ‘heart felt’ apostolic blessing.

About 20 nuns and social workers remained on a vigil outside Mother Teresa’s room in the intensive care unit in the six-story hospital, which is located in Calcutta’s plush Alipore district and regarded as one of the leading medical centers in the city.

“Pray for her well being,” said Sister Agnus, a senior member of the Missionaries of Charity organization.

Hurricane Gabrielle kills one off coast of New York City

MIAMI (UPI) — A weakening Hurricane Gabrielle thrashed about in the north Atlantic Sunday, tossing up ocean swells that smothered a houseboat off New York City killing at least one of the 11 people aboard.

Bob Pannuto, a meteorologist with the National Weather Service office in Boston, said the drying hurricane spawned swells of up to 12 feet along the New England coast.

"We have a small craft advisory out along the New England coast" from Watch Hill, R.I., to Eastport, Maine, Pannuto said.

Gabrielle, which was stalled in the north Atlantic about 325 miles south of Sable Island, Nova Scotia, was blamed for at least one death.

High winds from the storm swamped a 42-foot Gibson houseboat off New York City early Sunday, washing its 11 occupants overboard.

The storms maximum sustained winds had decreased by 5 mph to 75 mph by middle Sunday.

Case predicted the stationary storm would eventually slide south of the Canadian province of Newfoundland. "Our best models indicate the center will stay offshore," he said.

Nevertheless Gabrielle continued to make itself felt along the northeast coast of the United States, bringing up abnormally high swells.

"We expect just a gradual decrease (in the swells tomorrow) but it looks like the swells will still be around," Pannuto said.

At 11:20 a.m., the center of Gabrielle was near latitude 39.2 degrees north and longitude 60.5 degrees west. Case said the storm was expected to remain nearly stationary before beginning a northward drift.

"It appears that it will remain stationary or quasi-stationary for about 24 hours, and then began a drift toward the northeast," Case said. "The nice part of it is, the longer it sits there, the weaker it becomes."

Gabrielle's winds weakened to 80 mph Saturday as it sailed over the north Atlantic. Meanwhile, tropical storm Felix, which had reached hurricane status earlier in the week, dissipated off the coast of Newfoundland.

MISS AMERICA PAGEANT still has its critics

ATLANTIC CITY, N.J. (UPI) — Despite a flurry of changes to improve Miss America Pageant into the annual September quest for America's unofficial sweetheart the beleaguered Miss America Pageant still has its critics.

"They have to spend a lot of time thinking how to walk a certain way or talk a certain way and say what the judges want to hear," said Linda Bower, president of the National Organization for Women in New Jersey. "It doesn't exactly lead one to be an individual that marches in a different drum," Bower said.

The Purdue Boilermakers showed the SIU-C women's cross country team that success one week may not necessarily run over to the other. The Salukis entered the triangular meet with Purdue and Kansas Saturday on a high note after triangular victory over Murray State and Eastern Illinois last week. Purdue won the meet Saturday with 18 team points followed by SIU-C and Kansas tied with 55 points.

"We may have had a false sense of security after last week's success," head coach Don Devoon said, "We may have been overconfident.

Purdue's Amy Koontz was the overall winner in a time of 18 minutes 26.8 seconds as the Boilermakers had four of its runners in the top five. Seven Boilermakers finished in the top 10.

"We knew coming in that Purdue had a very solid team and I did expect us to do a little better," Devoon said. "I thought it would be amazing to see how we would compete against this level of competition. The muddy weather may have played a role as well."

SIU-C's top finisher was freshman Leanne Conwy finishing sixth in 19:06.7. Sophomore Amie Padgett finished 10th at 19:26.3. Coventry and Padgett finished first and third respectively in the Eastern Illinois last week.

"Leanne may not have been as mentally tough as she was last week," Devoon said. "She may have been nervous against the tougher competition.

Dona Griffin, 19:34.7, Dawn Barefoot, 19:44.6 and Rosanne Vincent, 19:45.2 finished 12th, 13th and 14th respectively for the Salukis. Only five Salukis finished in the top 20 with seven SIU-C runners finishing below that mark.

LOSS, from Page 20

when the defense forced Western to punt. However, Davis fumbled and WIU recovered and ran out the rest of the clock.

WIU's final score came on a 49-yard touchdown pass from quarterback Benhart to receiver Steve Williams with 11:58 remaining in the fourth quarter.

Benhart finished the day 8 of 18 for 142 yards and one interception. Benhart's one interception was picked off by Saluki Willie Davis with 7:47 remaining in the first quarter. Davis was slow getting up after being tackled by a host of WIU defenders.

Davis said he felt fine after the game but was a little sore.

"I just got the wind knocked out of me," Davis said. "I was a little sore at half time but I feel fine now.

"Davis said the 0-2 start by the Salukas does not mean the team is down for the season.

"We've still got a chance to win (the conference)," Davis said. "We're going to be ready to play next week."

The Salukas will host Eastern Illinois Saturday.

Ferbrache said aside from a breakdown on the punt-block team the Salukas played well.

"The defense played a fine game," Ferbrache said. "We were getting to their quarterback and they couldn't handle our pass rush.

"I still think this could be a good season," he said.

Linebacker Kevin Kilgallon said the defense is a little frustrated.

"We didn't get the breaks but that's the way it goes," Kilgallon said.

Kilgallon said the Salukas will get their chance to avenge WIU's winning streak.

"It's like flipping a coin six times and each time it comes up heads, but one of these times it's going to come up tails," Kilgallon said.

Kilgallon led the Salukas defensively, recording 12 tackles, and five of those tackles were for a loss.

Overall, Smith was pleased with the team's performance.

"I'm really proud of the way our kids played," Smith said. "They played hard for four quarters of football."
Cubs beat Cardinals, stay in 1st

CHICAGO (UPI) — Rookie Dwight Smith clubbed a game-winning, two-run home run Sunday in the ninth inning, and starter Steve Wilson and three relievers combined for a club season-high 18 strikeouts to lead the Chicago Cubs to a 4-1 victory over the St. Louis Cardinals and cut their first-place lead to 2 ½ games in the National League East.

St. Louis rookie Ken Hill, 7-12, took a one-hitter and 1-0 lead into the ninth, when Wilson stepped in for Bailey as he opened with a single and Smith followed with a drive down the left-field line for a 2-1 lead. The Cardinals took a 1-0 lead in the fourth when Dick Schofield singled, moved to second on a walk by Wilson, and scored on Terry Pendleton's two-out single.

A two-out double by Luis Salazar and rookie Jerome Walton's RBI single, both off reliever Campillo, made it 3-1 in the seventh inning.

The Cubs extended their lead to 4-1 in the eighth inning when Andre Dawson reached first on a fielder's choice, moved to second on an error at second, and scored on a three-run double by Sammy Sosa that drove in Wilson and Schofield. It was Sosa's 13th home run of the season.

The game was postponed because of a lightning storm Saturday. The Salukis next game is at home against Eastern Illinois at 4 p.m. Sept. 16.

Junior Tim Callier tries to elude a WIU defender as senior Rob Derricotte blocks in the second quarter of the Salukis 14-7 loss Sunday. The game was postponed because of a lightning storm Saturday. The Salukis next game is at home against Eastern Illinois at 4 p.m. Sept. 16.

With 6:40 to go in the fourth quarter the Salukis began an effort to tie the score at 14, Gibson engineered four first downs in the drive but was stopped by WIU's Amin Gashbarro for a loss of 13 to the Western 31. The Salukis continued to push the WIU ball out of the end zone, eating up the clock.

The Salukis had one final chance to score with 58 seconds left.

Spikers finish 3rd in own invitational

Senior Brackins only Saluki named to all-tourney team

By Tracy Sergeant

The Saluki Volleyball Invitational came down to the wire Sunday night as the Salukis fell to the Oklahoma Sooners in a five-game final for second place.

The University of Georgia swept the tournament to capture first place. The University of Oklahoma, 2-1, squeaked by SIU-C, 1-2, to take second and Busker University placed last with a record of 0-3.

SIU-C coach Pattie Hagemeyer said this weekend's had a learning experience for both her and the team.

"I try not to be upset about the loss because there is always room to build on from the mistakes. There are differences in the way teams approach the game. I tried to tell them that's the way the big boys play in practice. "That's also what we need to do in practice (raise the intensity level) because it makes the level of play in the next match," Hagemeier said.

At times, the Salukis had problems keeping their concentration level constant.

"They came out dazed and not sure that they belonged there and I told them they're as talented as anyone," Hagemeier said.

SIU-C's lone senior Nina Brackins was named to the invitational's all-tournament team.

Brackins led the Salukis in kills with 53 kills for the weekend.

"She played great. She really got going at times," Hagemeier said.

Other players who made the team were vehicles Karla, Cindy Regisaud and Tracy McKinney of Oklahoma and Jill Moon, Christin Lord and Kelli Ogden, the most valuable player, of Georgia.

In last year's invitational, SIU-C came out with a 0-4 record and the last time they placed in the top two was 1984.

"The crowd participation was great. It contributed a lot to the level of play. This is the most excited the team has ever played, I know that the other teams don't like to come here and play with a crowd like this it's very intimidating.

"Overall I feel pretty good about all of this," Hagemeier said.

The Salukis next match will be September 15th and 16th at the Georgetown Tournament in Washington D.C.
