Nixon Accepts LBJ Offer of Vietnam Info

MIAMI BEACH (AP) - Richard M. Nixon set top priority Friday against rallying Republican troops to his banner in the big industrial states. And he accepted President Johnson's offer of full information on the Vietnam crisis, renewing his pledge not to undercut him.

The GOP presidential nominee told reporters he was reading the Speech by LBJ. Nixon has evolved a plan to stop at the LBJ ranch in Texas Saturday en route to 10 days of round-the-clock sessions in California - to get a briefing from Lyndon B. Johnson, deputy U.S. negotiator in Paris.

But Nixon said he has called off plans to visit Russia later this month or at any time before the election because "we have too many demands that are urgent in the United States to allow foreign travel.

He suggested it might be presumptuous to say whether he would make such a trip if the Nov. 5 election makes him president-elect.

While Nixon met with reporters and then headed for an afternoon of relaxation at nearly key Biden-GOP officials went through the traditional post-convention housekeeping chores, re-electing Ray Bliss as chairman of the party's national Committee and picking former budget director Maurice Stans as the new party finance chairman.

Nixon, looking tired but relaxed, said he has four hours of sleep Thursday night, about four times as much as the night before. "That's the way it's gonna be from now on," he advised reporters.

"Very shortly," he said, "we will be starting bridge-building in the states" where there has been great support for other candidates. Nixon had support from only Illinois and Texas of the seven largest states in winning the nomination and mentioned Cali­fornia, Pennsylvania and New York as specific areas of attack.

And Michigan Gov. George Romney said Nixon and Agnew "make the party leaders from states that must win the election for them at least as important as Mr. Nixon made the leaders of the South and Southwest in winning the nomination.

Nixon said that when the Republicans already have an ex­cellent organization as in Pennsylvania, "we want to work with it and through it, not around it." He said he would spend two or three days visiting these states, confer­ring with party officials but not on the scenes, "but not nearly as much as in the Democratic party.

Reporting that the President phoned him Thursday night, the nominee quoted Johnson as having told him: "Dick, you are going to have my congratulations and my sympathy.

Czech Thousands Hail Yugoslav President

Prague (AP) - Czechoslov­akia by tens of thousands took to the streets Friday shouting welcome to Presi­dent Tito of Yugoslavia, the maverick Communist who stood behind Prague's leaders during its crucial confrontation with the Soviet leadership.

Thousands of Yugoslav and Czechoslovak flags fluttered at Hradcany Castle, the seat of government, where the re­ception reached its peak.

A Communist party official in the crowd told a newsman: "It has been a long time since Prague has seen anything like this.

Eisenhower Said Gaining Strength

WASHINGTON (AP) - Former President Dwight D. Eisenhower's doctors reported Friday he is gaining in strength and is in "excellent spirits" following his new­est major heart attack last Monday.

He has been classified as criti­cally ill, like another victim of a recent cardiac attack. He so far has survived twice as many attacks as the number that apparently most often add up to certain and quick death. And his latest three have all occurred within 3 1/2 months.

Gus Bode

After more than an hour of shouting, Tito, wearing a grey business suit, appeared on a balcony of an inside court­yard and drew a 15-min­ute ovation.

The Yugoslav leader, who 20 years ago became the first Communist ruler to steer a course independent of Mos­cow, is in Prague for talks with the Czechoslovak Com­munist party leadership.

Anderso3

Czech thousands hail the Yugoslav president.

Man and Nature

A loose tree, framed by brick and mortar, rises amid the stone of the Technology Building courtyard. It is not an ampalass, jungle yet.

Aircav Beat Back Foe Near Saigon

SAIGON (AP) - U.S. air cav­alrymen battled North Vietnamese five miles north of Hue Friday, driving back a force threatening that ancient capital of South Vietnam.

A spokesman for the 101st Air Cav­alry Division said that in a day of battle across the broken, sandy terrain the troopers killed 37 North Vietnamese and captured 63 suspected enemy troops. U.S. casualties were not announced.

The cavalrymen threw a cordon around the battlefield as night fell, hoping to take more prisoners when another sweep is launched at dawn Saturday.

Air cavalrymen have had success with the fast, encircling movement they can employ with helicopters in their attempts to disrupt another enemy blow at Hue, hard hit by the offensive in February. But sometimes, under the cover of night, enemy units have been able to slip through the encircling troops as they did recently in this same general area.

Two important operations were under way in the Hue area. In the second, other units of the 101st plowed deeper into the A Shau Valley looking for enemy supplies.

Word from the valley 27 miles south­west of Hue said contact continued light, that four North Vietnamese soldiers were killed and 17 rifles were seized. The amount of supplies and weapons found has been far less than expected.

The 101st is following the same path as troops who swept up huge stores of weapons and supplies last April and May in the valley, a major base for enemy forces threatening Hue and Da Nang, the U.S. military complex to the south.

Far away in the Mekong Delta, a U.S. river patrol fighting in monsoon rains repulsed two Viet Cong ambushes but ac­cidently raked a nearby village with heavy fire.

The ambushes Thursday came seven hours apart and each time return fire from the American boats struck the vil­lage of Cai Rang, 83 miles southwest of Saigon. In all, 15 Vietnamese civil­ians and a soldier were killed and 105 civilians and 15 soldiers were wounded.

The river patrol had penetrated deep into the delta in an area that long has been a Viet Cong stronghold and was re­turning after killing 252 Viet Cong and uncovering big weapons caches.

This was part of allied operations de­signed to upset enemy plans for renewed attacks on Saigon.

The first ambush, against troops of the U.S. 9th Infantry Division and the Riverine Force of U.S. Navy boats, was sprung Thursday afternoon just south of the important delta city of Can Tho.

The second came after midnight.

U.S. officials said that in both ambus­hades, a curve in the Can Tho River, Cai Rang was just to the south and directly in the path of American return fire over flat terrain.

Eisenhower's Said Gaining Strength

WASHINGTON (AP) - For­mer President Dwight D. Eisenhower's doctors reported Friday he is gaining in strength and is in "excellent spirits" following his new­est major heart attack last Monday.

He is still classified as criti­cally ill, like another victim of a recent cardiac attack.

And his latest three have all occurred within 3 1/2 months.
Intercul Poster Contest

Two Designs Chosen

Two commercial arts students at VTI have won a poster contest sponsored by Intercul (International Cultural Studies Program).

The winners were Stephen L. Forbes, who designed the arrow symbol currently being used on all intercultural publicity, and Charles Scott, whose design, the intercultural wheel symbol, will be used on all future Intercul publications. Both are first year students.

Usable Ideas, Wisecracks

Found in Suggestion Box

By Inez Roberge

"Please don't assign any more girls to 11th floor at Moe Smith Brush Towers."

"Why don't you show movies at McAndrew Stadium this summer?"

"I would suggest you send me because you need me."

These are some of the suggestions found this summer in the little wooden box that sits inconspicuously on the counter at the University Center Information Desk.

Jack Griggs, president of the Activities Programming Board, said the present suggestion box has been sponsored by the board for three years. It replaced a smaller, less attractive, metal box which had been around since the opening of the building in 1960, according to James Sheppard, assistant director of the center.

The box is a depository for everything from unusable university-oriented suggestions to wisecracks and unwrapped sticks of gum.

During regular quarters, Griggs estimated, about 20 usable suggestions are deposited and "thousands of other things get in."

Valid suggestions are transferred to the areas or departments on campus which they concern. The box in the past has been checked by Ac­ tivities Programming Board advisors, but a Communication Service Committee of students will be appointed to do the sorting beginning next quarter, Griggs said.

The suggestions are written on anything from stationery to scraps of paper. Some are signed; some are unsigned. One recent suggestion was written in French and has still to be translated.

Daily Egyptian

Ex-SIU Staff Member, Honors Recipient Dies

A former SIU instructor, graduate, and Achievement Award winner died Thursday in New Orleans. It was learned Friday.

Fred R. Cagle, 51, a vice president of Tulane University, was a recipient of the coveted award from the Alumni Association in 1965. He was a 1937 graduate of SIU.

Cagle was with SIU's Department of Biology as an assistant professor from 1958 to 1947. He was appointed to the U.S. Commission for the United Nations' Educational, Scientific and Cultural Organization (UNESCO) in 1961.

He is survived by his wife, the former Josephine Alexander of Marion, and a son and daughter.

The funeral will be held in Saturday in New Orleans.
Activities

**VTI Recreation Night, Campus Tours Planned**

**MONDAY**

Advanced registration and activities for new students and parents will be held from 10:30 a.m. to noon in the University Center Ballroom B. A tour of the campus on the SJU Tour Train will leave the University Center at 1 p.m.

The Vocational-Technical Institute Programming Board will sponsor a recreation night beginning at 7 p.m. on the Outdoor Recreation Area at VTI campus. Pulliam Hall gym and pool will be open for recreation between 6:30 and 10 p.m. Room 17 will also be open for weight lifting for male students.

The Department of Music will sponsor a graduate recital by pianist Bill and Susan Head at 8 p.m. in the Home Economics Auditorium. Alpha Phi Omega will have a pledge meeting from 9 to 11 p.m. in the Home Economics Building, Room 11B. An active meeting will be held from 9 to 11 p.m. in the Home Economics Family Living Laboratory.

**Video Spotlights**

**Eye-Opening Tale**

**Of Dramain-Life**

A seventeen-year-old youth uncovered the unpleasant past which led to his father's suicide on the NET Playhouse at 9 p.m. Sunday on WSUI-TV.

Other programs:

- 5:30 p.m. Film Feature (Color)
- 6 p.m. NET Festival
- 7 p.m. The David Suskind Show

**Life Saver Classes Slated Next Week**

Red Cross life saving classes will be offered free at the Riverside Pool at 23rd and Commercial, at the entrance to Riverside Park in Murphysboro, from Aug. 12 to 16. The lessons, which will be held from 9 a.m. to 12 noon, will be divided into two age groups. Young persons between 12 and 15 may enroll in the Junior Life Saving class, while those age 16 and over may sign up for Senior Life Saving.

The only cost will be admission to the pool. Adults will be charged 60 cents and children under 12, 40 cents.

**Health Service**

The SIU Health Service has listed the following admissions and dismissals. Admissions: Roberta Fields, 207 So. Wall; Bruce Kaplan, 609 So. Poplar and Jennette St. Germain, Nealy Hall.

Dismissals: Alberta Henderson, transferred to Holland Hospital, and Roberta Fields.

**Trade Commission Decides Against Steel Investigation**

WASHINGTON (AP)—The Federal Trade Commission announced Friday it has decided against an investigation of the steel industry's pricing practices.

A formal request for such a probe was made by Sen. Philip A. Hart, D-Mich., in a letter to the FTC on August 3, three days after Bethlehem Steel announced a five per cent across-the-board price increase.

FTC spokesmen declined to explain the decision, but chairman Paul Rand Dixon hinted last week this might be the outcome if there was a retreat by the industry from higher announced prices. Such a rollback occurred Wednesday when United States Steel said that it would make selective increases averaging under 2.5 per cent. This position by the industry's giant prompted Bethlehem and others to revise price hikes to remain competitive.

"The Tiger and the Pussycat"
Trouble Spots Neglected

The necessity for a safer means of pedestrian traffic at the 12th Street railroad crossing west of University Park and at the highway crossing near the physical plant has been discussed for almost three years.

If the construction of an underpass, overpass or the insertion of a warning system at these two locations was just a convenience, the three-year delay would be excusable. However, it is a necessity, and the delay is far from excusable.

With the recent completion of Brush Towers, the daily traffic over the railroad tracks at Harwood Avenue should increase this fall to about 5,000 students making innumerable crossings. This, along with the fact that nine passenger trains and 11 freight trains pass through the crossing daily, presents a problem that warrants an immediate solution.

One campus source speaking on the Harwood Avenue crossing quoted in the Daily Egyptian as saying: "I can just see the day when a group of inattentive students rushes across the tracks after one train has passed, only to be cut down by a train going the other direction on the other track."

Two years ago, months after the completion of University Park, safety experts and campus architects began discussing the possibility of including underpass or overpass facilities whenever both the railroad tracks and U.S. Highway 51 at Harwood Avenue are expanded. The idea was then scrapped and in its place a pedestrian-vehicle underpass south of the physical plant was considered. It's too bad that the latter wasn't completed a year ago before an SIU student was killed trying to cross the highway near the very spot of the proposed underpass.

The proposed underpass at the physical plant, costing $75,000 to $100,000, should not be delayed another year. It is already one life too late.

Many safety experts have mentioned that the insertion of traffic signals would have only a "limited" amount of safety and would be a wasted proposition. They contend that the students would normally disregard the signals and use their own judgment in crossing the tracks.

However, when a pedestrian has had a few or is preoccupied with matters such as grade safety, it can be the last thing on his mind. As one person put it, the insertion of some kind of warning system would not insult the student's judgment, but would "supplement" it.

At least a warning system would provide a minimum of safety while still allowing those who may feel that $50,000--the cost of a concrete underpass--is too much money.

A warning system at Harwood Avenue and an underpass at the physical plant deserve immediate attention. The administration should not wait until another student dies to do something about these two campus trouble spots.

--Dave Palermo

Positive Moscow Hint

These are days when statements around the world are keeping eyes open for "signs of good faith." Washington is looking for the same from Hanoi. Moscow is seeking such from Prague. And in the Middle East, each side claims that it is willing and ready to deal. It is considered to be a positive follow-up to the recent Moscow statement that the United States was interested in a big-power agreement to limit weapons sales to the Middle East.

Since Washington has all along had a hint of the Kremlin's readiness doubt that it will respond constructively to any Russian gesture, however slight. It is to everyone's benefit that war potential in the Middle East be kept at the lowest possible level, and that diplomacy replace the temptation to rely on physical force.

The world is disappointed that we are now almost in the 14th month since outbreak of the Arab-Israeli war of June, 1967, and Middle East peace seems no nearer. Yet, one thing has been learned. This is that, if peace or some viable accommodation is to come, it will almost certainly come as a result of an American-Russian agreement. The channel for such an agreement might well be the United States (and possibly, more particularly, its special envoy to the Kremlin). But the endive that sits behind the scene would have to be some degree of understanding between Moscow and Washington.

We therefore trust that no time or effort will be lost in plotting the meaning of this latest reported Russian decision. And if it is the Kremiln's decision to talk accommodation in the Middle East, let all interested parties seize the opportunity offered.

--The Christian Science Monitor
Eberhart: Serious Irony and No Change in the Tide

Reviewed by Nicholas Jaost

For a reviewer than is reviewing the work of a poet who has just published his second collection of poems or who has a reputation not yet assured. One is confident that the reviewer will not be too hard on the book by Richard Eberhart; but there will be few surprises beyond the pleasures offered by the poems themselves. Yet these are, to be sure, of the greatest pleasures art offers — the confrontation of, the

musing upon, the work of art itself.

My own preference is for the forthright statement and the more serious irony found in certain Eberhart poems among the fifty-five lyrics comprising this book. It takes so short a time to get married. We noticed no change in the tide, wrote the poet describing a marriage "of the very young by the side of the sea." in his witty "A Wedding on Cape Cod." And as always, Eberhart can splendidly evoke the resonant lyric sense as symbol. An "ancient iguana... unmoving on a tree... Far up a mountain..." a heron standing on a rock... "I am flying high..." And the invention of certain states of soul, certain values of the human being, and its effects on the reader: I aim for order and for peace, I strike for grace and harmony. All natural beauties of the world Of bird, of beast, of sky, and tree, So indeed do many of the poet's readers strike, who cannot write poetry. Eberhart's approach is not an attempt to set up a new standard of intervention, which is to save the world, falls to function here for those readers unless order, peace, grace, harmony, and all the natural beauties of the world are depicted persuasively in images and sounds: in the words of a poem. Richard Eberhart's enduring achievement is the honesty of statement, the color, the texture, the diction, the sound that dates, the poems, the poems themselves, and the process of composition. The poems, the poems, the poems, the poems. No other speaker of true, the it is from your side your poems poetry. You who rushed ahead to Watts. The allusion to "Brahma" here is effective, because the sheer abrupt sincerity of the poet's admission shocks the reader into empathy.

At Last—Academic, Personal Goals of Philosophic Study

This handbook is intended to serve as a guide to the new for further philosophical study by acquainting beginning students with the problems in philosophy and some of the technical terms used. A glossary at the back of the book will be especially helpful in the latter respect. "He and Hunt have given this small handbook a freshness of approach that is commendable. As an introductory text, it differs from the general type in two important respects. First, it offers a clear statement of both the academic and the personal goals of philosophical study. For the ordinary student, these are more important. They comprise the authors who name the goals of the book. They are the "background," the "background," the "background."

Reviewed by John Howie

Developing one's own philosophical perspective; selecting relevant questions for research; searching for answers that make a difference; and grasping aims and assumptions; making distinctions; exploring new perspectives to find meaning for one's own life—these are the personal goals which the book may help one achieve.

Second, the book offers an unusual approach for understanding philosophical differences. It attempts to combine the "lack" and the "lack" of philosophical opposition by using the conceptual device of the continuum. As used by these authors, a continuum is a way of representing comparing and representing a range of possible theses, and the book's atmosphere is the understanding of a philosophical position. The authors construct continua to represent the range between such perspectives as theism and atheism, freedom and determinism. The continua should prove helpful to the beginning student, may be considered a novel way of depicting dialogues elsewhere in still more the conversations of wise men.

Our Reviewers

John Howie is on the faculty of the Department of Philosophy, Nicholas B. Heilbron professor of Philosophy, and editor of "Papers on Language and Logic" in the Edwardian campus and also on that campus' Humanities Department faculty. William M. Bidder, retired, was a member of the Department of History faculty.
Retarded Children Show Progress From Summer Tour Experiences

Thirty handicapped children camped recently at SUU’s Outdoor Laboratory at Little Grassy Lake. The week-long stay was the longest leg of a summer tour that has taken the children from their homes in Tucson, Ariz., to Oklahoma, Nebraska, and Missouri, Kansas, Arkansas, and Texas. They were accompanied by a nurse, five counselors and Mrs. Laura Ganoung, a special education administrator.

Mrs. Ganoung said her tests indicated that the word power of the retarded children has gone up 40 per cent in the two years she has been taking them on trips like this. It is the seventh such trip since Tucson’s Exceptional Children, Inc., under Mrs. Ganoung, won a $34,000 grant from the U.S. Department of Health, Education and Welfare for a demonstration project in recreation for the mentally retarded.

Mrs. Ganoung said her TREK (Touring Retarded for Experience and Knowledge) program has shown that many children break through the language barrier after being exposed to other experiences beyond the classroom and parents. The most striking advances are noted in their “sequential story telling ability.”

“Instead of single words like ‘boy,’ ‘girl’ and ‘mama,’ they’ll come back from a trip speaking in sentence lengths,” she said. “One little girl, who never before had said more than a word at a time, got home and greeted her parents with ‘See the nice big bus,’ I thought they were going to faint, they were so happy,” Mrs. Ganoung said.

The project includes severely physically handicapped children as well as the mentally retarded.

The group is called Camp Echo. The “Echo” stands for “Exceptional Children Have Opportunities.”

Arizona Group Camps at Lake

Tucson, Ariz. special education administrator Mrs. Laura Ganoung and her touring campers, shown at SUU’s Outdoor Laboratory on Little Grassy Lake during their summer excursion across the midwest. The mentally retarded youths gain vocabulary skills and self-reliance as a result of the trip, she says.

Randy Agnew Hears Good News in Sick Bay

GIA LE COMBAT BASE, Vietnam (AP)—James Randy Agnew had washed in muddy river water so often he was in a Navy sick bay Friday morning to get his ears “unplugged” after he was told his father had been nominated for vice president.

“I was just waiting around when this medic who had been listening to the radio came over and told me Dad had been nominated,” the 21-year-old son of Maryland Gov. Spiro T. Agnew said. “I was surprised, very surprised.” Happy? I sure was, I still am. And I’m going to send Dad a wire as soon as I can.”

The message, he said, would be “Can’t wait to get back and help.” It will be a couple of months, anyway, before Randy can join his father’s campaign team. He is a Navy Seabee—3rd class petty officer—and his present job is repairing a bridge in Hue blown up by Viet Cong snipers during the offensive last February.

His unit, Mobile Construction Battalion 8, is due for rotation back to the states in October, and the governor’s son said he expects to take a month’s leave to help his dad in the final weeks before the November election.

Young Agnew, who will be 22 next month but who has not voted in an election before, expects to vote in November for the Republican ticket of Richard M. Nixon for president and Spiro Agnew for vice president.

So Peculiarities Ain't Mistakes

Sectioners Serve as Scheduling Watchdogs

By Robert Nash

Ever want to be in a class of one? Or pass up a Friday night date to attend a lab session at 10 a.m.? Or be the only one around to 6 a.m.? These are some of the situations presented the sectioning office each quarter. Mrs. Linda Weeks, secretary, and an Office assistant, discussed a new try which was supported by sectioning when he drawing up new or reviewing old sections. These sections were drawn across some unusual classes which have been known to impress upon the student that he must admit, they did make kind of curious.

Some classes referred to were a 400 level chemistry course with only one student enrolled, a 9 to 9:30 p.m. Friday night lab and a "by invitation only" course which met every 6 a.m. daily.

British Turboprop Crashes; All Die

MUNICH, Germany (AP)—A British turboprop airliner, swerving en route to Protestant, smashed into a four-engined Viscount, on route from Berlin to Luton, Austria, was carrying 44 passengers and a crew of four.

British Eagle Airways head‐quart­ers in London reported to be snumdruck, Austria, was carring 44 passengers and a crew of four.

With more than 2,470 courses listed in the SIU Undergraduate Bulletin, shouldn't be surprising there are classes which are peculiar, Mrs. Weeks said. That's one main reason for the new try, which acts as a guide for making sure peculiar classes are added.

Mrs. Weeks pointed out that it is not the sectioning office that draws up the list but the deans' office.

"The department has the authority to redeem old times, teachers and number of sections, but the sectioning office is to classify the entire schedule and correct errors that may be required," she said.

According to Mrs. Weeks, the process of preparing the present schedule is as follows: The chairman of each quarter's classes is sent to each department; the department then adds any courses or sections along with the times and meetings new listings are sent to the chairman and dean of the department for appro­val; the listings are then transfe­red to the registrar of the college.

From there, data processing makes a list that is to be compared corrected and the primer, who copycodes certain pages for the quarterly class bulletin, is the last to receive the schedule.
Men Gymnasts Face Strong Schedule

The 1968-69 schedule of opponents for SIU's male gymnastics team was released Friday by athletic department officials.

The schedule rates as one of the strongest in recent years for the Salukis and features competition with perennial power Michigan State, Iowa and Illinois of the Big Ten.

Coach Bill Meade's gymnasts finished second in NCAA conference competition last season behind Southern California. They compiled an impressive 10-1 record, including a 9-1 victory over Iowa midway during the campaign.

The loss ended a 16 dual meet winning streak. The loss was avenged later in the season.

Although he will lose nine men from last year's team, Meade repeatedly expressed optimism for his team's chances of capturing a third NCAA championship next year.

"I feel this is the personnel we have returning," he said, "and those who will be eligible will have just as good a team, if not a better one. I know that a lot to ask now, but I feel our returning boys can do the job."

The Salukis will make five appearances in the Arena.

Bears' Total Defense Keeps Foes Guessing

RENSSELAER, Ind. (AP)—The Chicago Bears are key-noted this season by an intriguing total defense scheme designed to keep National Football League opponents guessing.

It fits in with a sort of modernization program under the intense new head coach, Jim Dooley. Dooley, 38, a player and assistant coach with the Bears for 16 years, was hand-picked by George Halas as his successor when the 73-year-old Papa Bear retired from the sidelines May 4.

Total offense simply means giving more running room to the electrifying Gale Sayers, who in three seasons has scored 46 touchdowns by rushing, passing, receiving, kickoff returns and punt returns.

Sayers, running from the halfback side in previous years, has been banged upon by opponents who attacked their defenses against him.

The Bears' total offense has Sayers at fullback in the tight T, at tailback in the double wing, and at man-in-motion flanks in the balanced T.

"Now he they overload on Sayers when they don't know which direction he's going to run," said Dooley, whose head coaching debut was celebrated with a 30-24 exhibition victory over the Dallas Cowboys last week.

The Bears, who finished the 1967 season in the Central Division with 7-6-1 behind the Green Bay Packers' 9-6-1, have the carryover problem of too few running backs and offensive linemen.

Along with Sayers are Ronnie Bull, Ralph Kures, Brian Piccolo and Andy Livingston and possibly Garry Lyle, who still has a hamstring muscle.

Livingston is overweight and never has performed to his potential in Bears' green.

With Bob Wetoska's ability, the offensive line is shaky.

The Bears are strong on pass receivers, linebackers and defensive backs.

Pro football explodes with a 12-game exhibition schedule this weekend, featured by a nationally telecasted battle between the Detroit Lions and Philadelphia Eagles.

The scheduled game is at 7 p.m. Saturday in Philadelphia.

Regional Tennis Tournament Planned

For Aug. 16-18

The 13th Annual Southern Illinois Open Tennis Tournament will be held August 16-18 this year at the tennis courts located at the northeast side of the SIU Arena.

The tournament is sanctioned by the United States Lawn Tennis Association. Forty-two trophies will be awarded to the winners and runners-up in each division.

There are 14 classes to enter: men's singles-age 45, men's singles-age 35, and men's doubles, women's singles and doubles are being added this year for the first time. Other classes are: junior singles, boy's age 16 and under, and boy's age 14 and under. The doubles feature the same age classes.
