WASHINGTON (AP) — U.S. defense leaders backed the nuclear nonproliferation treaty Thursday but opposed abandoning a U.S. missile defense system just because of prospective missile-curb talks with the Soviets.

Gen. Earle G. Wheeler, chairman of the Joint Chiefs of Staff, told the Senate Foreign Relations committee the joint chiefs support the treaty's aim— to outlaw the spread of atomic arms — and view the pact as "not inimical to U.S. security interests."

Deputy Secretary of Defense Paul H. Nitze called the treaty "an important step forward toward future forms of security."

He added its negotiation by the United States and the Soviet Union leads to cautious encouragement that the two superpowers may reach further disarmament agreements.

Few objections were heard as the committee acting Chairman John J. Sparkman, D-Ala., moved through its second day of hearings on the treaty which President Johnson wants ratified by the Senate before its Aug. 3 adjournment target date.

Today's major listed witness is Glenn T. Seaborg, Atomic Energy Commission chairman. Besides barring the nuclear powers from giving atomic weapons to non-nuclear nations and the have-not states from acquiring such arms, the treaty calls also for good-faith negotiations on limiting the nuclear race and on general disarmament.

The senators showed special interest in this provision and have voted to begin a multibillion-dollar antiballistic missile defense system.

Gen. Stuart Symington, D-Mo., one-time secretary of the Air Force, led those arguing against starting a U.S. ABM system now. He noted former Secretary of Defense Robert S. McNamara once had vigorously opposed the ABM idea as costly and fruitless.

By Brian Treusch
(Third of a series)

The next major anti-draft demonstration could easily be composed exclusively of high-ranking college and university officials.

For while many students believe they are being thrashed by the draft, school officials are being made the unwilling instruments of that flagellation.

Lt. Gen. Lewis Hershey, director of the Selective Service System, has said "that while it is the registrant's duty to provide the local board each year with evidence that he is satisfactorily pursuing a full-time course of instruction in a college, university or similar institution of learning, the institution has the primary responsibility for furnishing such evidence."

The big problem for colleges and universities across the country is how to determine which students are pursuing a full-time course of instruction.

In Illinois, the State Selective Service System has issued a memorandum (No. 6-21) which gives recommendations to local boards, students, and universities regarding how to determine a student's status under the new draft law. This memorandum is not, however, legally binding on the local boards and they may interpret the Federal draft law any way they please.

This memorandum states in part that colleges, universities and similar institutions will notify local boards if the beginning of the school year in the fall or whenever a registrant enters the institution, changes from full-time to part-time, ceases to pursue his course of work satisfactorily, or drops out of the rolls of the institution, or graduates.

The memorandum notes that "registrants who enter college or graduate school for the first time should complete 25 percent of their degree work in their freshman year, 50 percent by the end of their sophomore year, and 75 percent by the end of their junior year if they are enrolled in a four-year course. If it is a five-year course, they should complete 20 percent of their work each year."

A big problem at SIU has been that many students who are officially enrolled in a one-year curriculum require longer than four years to complete their degrees. Many SIU students attribute this delay to the complexity of various degree programs and the lengthy General Studies requirements hence, unfortunately, for those students affected, most draft boards are not familiar with SIU's General Studies Program.

The National Selective Service System may be having some second thoughts in this area. In a recent issue of an internal magazine, "Selective Service," Hershey stressed the need by local boards for "flexibility in eligibility and universality of many presently conducted by many institutions and the problems encountered in transfer between institutions and between programs in a single institution."

Hershey stressed that present guidelines make "deliberate use of the word "must" rather than "may" in order to give local board's discretion in continuing the deferment of students... when the failure to earn the required credits is due to illness or some other reason, the board should not be required to make the decision."

(Co)
Reed Accepts New Foreign Assignment

Alex Reed, a member of SU's faculty for 22 years and now a member of SU's department of Animal Industries, will travel to Nepal to join SU's Agency for International Development educational contract team.

Wayne Ramp, a coordinator of international programs in SU's International Services Division, says Reed will become 'chief of party for the Nepal team, succeeding John D. Anderson, who is returning to campus duties after 21 months in Nepal.

Reed has had several international educational assignments to date. He was on leave from SU duties for two years in 1954-56 to take a University of Illinois assignment to India for dairy research and as a consultant at the Allahabad Agriculture Institute. In 1961-63 Reed was in Vietnam with SU's AID educational team concerned with teacher training programs in South Vietnam.

The AID team now includes 10 persons, of whom five are SU faculty members.

The program the team is now conducting in Nepal involves advising the government of the nation in preparing, operating and administering a national vocational training center and helping train a Nepali staff for the center as well as teachers of applied vocational education in secondary schools. Headquarters for the team is at Kathmandu, capital of Nepal.

W. E. Keeper, dean of the SU School of Agriculture at Carbondale, said the nation in Nepal, a large exporter of animal industries, has been recommended to serve as an acting chairman of the department and a permanent chairman is named in Reed's place.

July 19

Industrial Wastes, Pollution

Subject of One-Day Seminar

A one-day seminar to discuss the problems of industrial wastes and pollution will be held on campus July 19.

Home Ec Study Planned

Marjorie Brown, research professor of home economics education at the University of Missouri, will meet with two-week workshop, July 15-26, in the School of Home Economics at SU.

Subject of the workshop, offered for graduate students, is "Philosophical Foundations of Home Economics." Sessions will be from 9 a.m. to 1 p.m., Monday through Friday each week.

The seminar is part of a six-week seminar held at the school of Technology and the Illinois State Technical Services Program and by industry and municipal governments in solving their particular industrial waste problems. The program, which began in February, has considered cyanide, heavy metals and toxic compounds problems in industry. The seminar will also include demonstration techniques for analyzing industrial wastes, participations in the laboratory for samples for analysis with the help of SU staff members.

In Rio de Janeiro

Former Dean Recalls Riots

Julian H. Lauchner, home on vacation after a year as Ford Foundation adviser in Brazil, has just returned to his knowledge of South American student riots.

Lauchner, former dean of the SU School of Technology, said he was walking across a square in Rio de Janeiro which seemed unusually crowded with noisy young people when it suddenly was surrounded by soldiers with fixed bayonets. Helicopters appeared overhead and dropped canister on of tear gas.

Lauchner said he struggled, over the door of a doorway and waited until the crowd and the gas had dispersed. He said he had no idea what the students were demonstrating about.

The man picked to start SU's School of Technology six years ago will return next month to Sao Paulo, Brazil, to complete his contract as science and technology adviser for the Ford Foundation's Latin-American program. He has been graced an extension of his leave of absence from SU.

This man in Brazil involves studying its institutions of higher education, making recommendations for improvements to be financed by Foundation grants, and supervising Foundation-approved programs.

A lack of trained faculty seems to be the main problem in Brazil, Lauchner said.

Crime Article Accepted

Virgil Williams, a research professor of SU's School of Journalism, has had an article accepted for publication in a national professional journal.

"Design of Teaching Games for Use in Training Correctional Officers" is the article's title. It will be published in "Crime and Delinquency" during its second or third quarterly issue next year.

'Black Orpheus' Colorful, Dramatic

Few movies are as extrava- gant in their wealth of color, visual patterns, music, and sheer dramatic power as "Black Orpheus." This Brazilian film was originally released in 1960 and has since become a true classic in the cinema. The picture tells in modern imagery the tragic love story of Orpheus, a Brazilian street car conductor, and Eurydice, a country girl who came to the big city to escape the spectre of a man sworn to kill her because she rejected his love. The picture was filmed in the colorful city of Rio de Janeiro, high up on the mountains in the Black section of the city. The marvelous rhythm of sight and sound, speech and music, and the modulations of color especially in the carnival scenes, make this one of the most beautiful stories recorded on film.

Directed by Marcel Camus, the picture stars Maria de Medeiros as Eurydice and Breno Mello as Orpheus.

The film is being shown at the 8 p.m. Saturday Night Movie Hour at Purr Auditorium. Admission is 75 cents.

Future Environment Will Be Panel Subject on WSIU(FM)

"The Role of Art, Spirit, Science and Technology in the Future Environment" will be examined in a panel discussion today on "The Next Fifty Years" over WSIU(FM) at 2 p.m.

5:30 p.m.
Misterogers' Neighborhood.

ROTIC Has No 'Hairy' Problem

Some professors and instructors may get tired of students who peer at them in class from behind shaggy heads or fuzzy faces, but it isn't a problem in the Air Force ROTC program, according to Col. Edward C. Murphy, Professor of Aerospace Studies. Col. Murphy pointed out that the man voluntarily entering an officer-candidate program is usually not the type that would be wearing long hair or a beard anyway. "Occasionally," he said, "an upperclassman will come back from summer vacation with a beard, but he always gets rid of it before classes start.

First mover of the movie is "Endless Love."

"Endless Love" was a movie that has since become a true classic in the cinema. The picture tells in modern imagery the tragic love story of Orpheus, a Brazilian street car conductor, and Eurydice, a country girl who came to the big city to escape the spectre of a man sworn to kill her because she rejected his love. Lower the Voting Age Law

President Johnson's proposal to lower the voting age to 18 would extend a privilege and a responsibility to over 10 million Americans who are well able to accept it. Mr. Johnson was right when he said in his message: "The age of 18, far more than the age of 21, has been and never more than now. Reason does not permit us to ignore any longer the reality that 18-year-old young Americans are prepared, by education, by experience, by exposure to public affairs of their own land and all the world, to assume and exercise the privilege of voting." It had been argued that a person who is old enough to fight for his country, is old enough to help decide how it should be governed. It is also at the age of 18 that many people assume the adult responsibilities of earning a living and supporting families.

Granville Hammond, in his breast a love of country (but never more than now). Reason does not permit us to ignore any longer the reality that 18-year-old young Americans are prepared, by education, by experience, by exposure to public affairs of their own land and all the world, to assume and exercise the privilege of voting.

Columbian Hopes

The authorities of Columbia University must now be making decisions about that institution's future, and we do permit ourselves to express two hopes: The authorities will meet reasonable student demands for better educational procedures. That, under no circumstances, will there be a repetition of this spring's disgraceful and wasteful disorders.

Johnson Denotes Praise
To Latin Common Market

By Aniero Piedela

South of the border down Mexico way (although not visiting that country), President Johnson went on his three-day tour to the five Central American nations last week. The welcome he received must have been a refreshing change from all that picketing the President has encountered in this country. Indeed, one of the placards reportedly seen during his trip in Costa Rica read: "Hurry for LBJ-Hurry for Hoover-Hurry for America!" It is understandable from the human interest point of view but regrettable at the same time that almost all anyone watching television newscasts learned of this trip was that miniaturized Luci Bognet is pretty good at dancing with Central American youngsters, that the President himself had learned a couple of phrases of Spanish, and that lady Bird apparently had learned none. However, the much-needed hamstringing through the five little Central American republics (all five within 24 hours) was the least important part of the President's trip. President Johnson actually took the trip in order to pay tribute to the Central American Common Market.

The model and echo of the information of the Central American Common Market was the establishment of the European Economic Community, and it became obvious in December, 1960, the trade of these countries has expanded nearly seven times, investment has increased 65 per cent and the annual growth of the area has averaged 6 per cent. But in its seventh year the Common Market is still far from overcoming some of the basic problems that hinder further development in the area.

Central American leaders are beginning to realize that tariff-free commerce is but a part of the solution. Their trade is depending too much on the fluctuating profits of some traditional items like bananas, sugar, cotton and coffee. But diversification of economies, as necessary as it would be, has proved extremely difficult. Another problem is the people. The population of Latin America as a whole is increasing much faster than that of North America, and according to some experts Latin America will have twice as many people as the United States by the end of this century if present rates of increase continue.

In 1950 the population of the five Central American countries was approximately 8 million. Today it is estimated at 13 million and continues rising at an average of more than 3 per cent a year. Guatemala has 4.4 million inhabitants, Salvador 3 million, Honduras 2.3 million, Nicaragua 1.8 million and Costa Rica 1.5 million.

Each of these governments is straining with inadequate resources to keep pace in educational and other services. At its worst is the situation in Salvador where three million people are jammed into 5,000 square miles. Yet the countries have failed to agree on free movement of the people, an agreement whose necessity is seldom contested.

After the boom of the early 1960's, market development has been replaced by near stagnation. Additionally, significant growth during the past year has been counterbalanced by serious deficits in balance of payments.

This fact caused the latest crisis within the Common Market. Nicaragua reportedly had threatened to quit the market unless the other four promptly ratified an agreement reached last month to impose a $0.25 per cent surcharge on imports from outside the area. At San Salvador, all the five presidents promised to implement this levy to cut imports and ease payments deficits. Whether their promise will live-only time will tell.

Those who are pessimistic mention Guatemala in this context. Early this year the government there had to make a major retreat on the fundamental issue of levying increased taxes to support much-needed development programs.

The government had been cautious in applying reform measures in the fiscal field. In December, however, it urged the sales tax on goods and services to support a more vigorous development program. Congress approved this, and a 5 per cent general sales tax and a 30 per cent levy were due to take effect on January 1. Only footstuffs and other clothing were exempted.

On January 2 and great confusion, prices began rising. Matters approached a crisis when bus owners in Guatemala City decided to raise fares on an average of 5 cents to 10 cents. The government backed and exempted bus owners from the sales tax but they went ahead with the fare increase anyway.

This resulted in the suspension of the tax measures altogether and Congress removed them from the 1968 budget law. Instead, a commission was established to study basic tax reform. It is expected to report its recommendations this month, but it is sometimes difficult as a new and somewhat unnecessary addition to the high pile of tax reform recommendations gathering dust because nobody knows how to put them into effect.

It is easy to criticize the pace of progress within the Common Market. Latin America as a whole in 1950 stood at $8.3 million (which equaled to 2.8 per cent of the total trade of these countries) was in 1965 $142.2 million, a 17 per cent share of the overall trade.

To the outside world, Latin America as a whole may still look the same as before. By and large, there have been few changes in its monocultural and back-seated economy, its extreme social differences, the low standard of living of the masses, irrational budgeting by the states.

But closer observation, claims Dr. Fried- rich Wehner of Hamburg, will show numerous indications of internal stabilization and serious effort towards reforms which should not be overlooked. The Hemispheric countries have moved at least a little closer in the target of intensifying trade between member countries of the Central American Common Market and the larger Latin American Free Trade Association.

The future goal is to unify these two market areas. This Latin American Common Market is to come into being between 1970 and 1985. By flying to Salvador last week President Johnson, who has shown great interest in these economic cooperation efforts, made a well-timed personal move to ensure the future cooperation by present positive action.
Sniper Kills
Three, Wounds
One In Bronx

NEW YORK (AP) - Three persons were shot to death in the Bronx Thursday night, and police said a sniper with an automatic rifle had been firing from a window. A fourth person was slightly wounded.

A heavy force of police marked time as the buildings where a sniper with an automatic rifle had been firing from a window. A fourth person was slightly wounded.

"The guy took about 90 shots from a .30-caliber rifle," the officer said, adding that the sniper was shooting at the windows of the three-story building.

One police official said the shooting apparently began on the street and that the sniper then ran into the building and resumed fire from a window.

Large crowds gathered at the scene in an apparent frenzy even though the body of one of the victims lay sprawled for a time on the street where he had fallen. Police were unable to get to him immediately because of his prone position.

A police spokesman said the search for the gunman was complicated by the presence of scores of people on the streets and people looking out their windows.

Some of the curious in the street crowded around to get a better view of the activities.

Grecian King Loses Power

ATHENS (AP) - The Greek regime published Thursday a royal proclamation that strips the king of his powers and drastically weakens Parliament.

Premier George Papadopoulos, strong man of the army-backed regime, said it will be submitted to a national referendum Friday.

The new constitution prevents the king from appointing and dismissing premiers - a privilege he had before the military coup seized power in the April 21, 1967 coup d'etat.

The military would have no specifically spelled out veto over civil processes but it is considered the defender of the country against enemies abroad and at home.

Atty. Gen. Rules
Court Berth Upheld

WASHINGTON (AP) - Atty. Gen. Ramsey Clark told several senators Thursday President Johnson has both law and precedent on his side in the Fortas-Warren switch at the Supreme Court.

Testifying before the Senate Judiciary Committee, the nation's top law officer said scores of new federal judges have been nominated while the judges they were to replace were still sitting.

"It is vital for the President and Congress to keep the judiciary full so it can perform its service," Clark said of Earl Warren's decisions to stay on as chief justice until Abe Fortas takes the bench.

Beyond that, Clark rejected as the product of "a conspiratorial view of life" the notion that Warren tried to influence the choice of Fortas his successor.

Still, Sen. Sam J. Ervin, Jr., D-N.C., and a group of committee Republicans appeared intent on at least trying to stall Fortas's confirmation.

After the two-hour session with Clark broke up, Ervin told reporters he would question Fortas about his "judicial philosophy" at a committee session Tuesday.

New Safety Center Allows Expansion

In Driver Education

By Kevin Cole

In an age when skyrocketing highway deaths and tabulated with increasing interest and decreasing horror, driver education programs are in vogue.

In an effort to combat the bloody national pastime of highway slaughter, the SIU Safety Center has gotten down to grassroots seriousness.

The Safety Center has recently moved out of a four-room house on East Grand's headquarters for some nine years—into a section of the Physical Plant Complex.

The new location contains of administrative and secretarial offices, a classroom, a library, a storage area for ceiling and elevator education literature, and a good start on a driving training laboratory.

The new center will have cost between $75,000 and $100,000 when completed, according to one member of the staff.

In the laboratory are 12 driving simulators, a 'drive-in screen' viewing area, movie projection equipment, a console for controlling and scoring the performances of the students.

The simulators, each costing about $1,300, are electrically powered replicas of the driver's compartment of an automobile. Each unit is complete with ignition, speedometer, steering wheel, gear selection lever and clutch. It may be easily transformed from automatic to standard shift driving.

Students operate the simulators as they would an auto on the highway and react to driving situations shown by full-color movies on a screen at the front of the laboratory.

This summer the Center is serving as a workshop for area driving education teachers.

The program is a four-hour-a-day, three-week training for the teachers. Other groups are eligible to participate at other times.

The Center's staff pinpointed out the possibility of a driver education session for SJU policemen, and bus and truck drivers.

James E. Aaron, assistant professor of health education and coordinator of the Safety Center, said that the simulator system offers only one step on the road to effective driver education.

"The ideal situation in a sign school equipped with simulators would be to offer the students classroom instruction which would then be followed by driving training, and move them up to the actual driving in the dual-control driver education car."

Advantages of the simulator program are two-fold. It gives the school a more effective driver education program and it saves the school money.

Despite the high cost per unit, simulators would reduce the amount of "hazard pay" which driver education instructors usually receive for on-the-road instruction.

Some receive up to $6 an hour for on-the-road instruction, according to A. Frank Bridges, associate professor of health education and a member of the Safety Center staff.

For the students, four hours of simulator training are considered by Illinois law to be equal to one hour actual road experience, according to Bridges. Twelve hours in the simulator satisfy half the state requirements for on-the-road training in driver education courses.

There were more than 1,000 simulator systems in the U.S. and some 93 in operation in Illinois, he said.

KOSSYGIN BLAMES ISRAEL FOR MID EAST CONFLICT

STOCKHOLM (AP) - Soviet Premier Alexei N. Kosygin said Thursday there can be no Mid east peace settlement until Israel moves out of Arab lands seized in the war of June 1967. He accused Israel of prolonging the conflict by clinging to the captured territories.

Despite reports of differences between the Soviet Union and Egypt on Mid east strategy, Kosygin's brief speech gave no indication that Moscow's pro-Arab line would be softened in expected talks here between Kosygin and Swedish Ambassador Gunnar V. Jar- ring, United Nations special peace envoy to the Mid east.

The U.N. has been pressuring unsuccessfully to mediate the dispute with a formula calling for both Israeli withdrawal and Arab guarantees of Israel's right to exist within recognized boundaries.

Three Bandits Hold Up Bank

NEWARK, N.J. (AP) — A "Bonnie and Clyde" style gang of gun toting bandits held up a bank Thursday and fled with $151,000 in a getaway car driven by a woman.

Three bandits, two of whom were policemen, scooped the money into a pillow case and then raced from the Hayes Branch of the National Newark & Essex Bank to their green sedan parked outside with the woman waiting behind the wheel.

Chess Club Formation
Aroused by Tourney

All persons interested in forming a chess club at SIU are asked to attend an organizational meeting at 10:30 a.m. Friday, July 19, at the Student Christian Foundation, 913 S. Illinois.

Interest shown by 13 competitors in an open tournament held at the SCF during July has moved several of them to form a club, according to Karl Keppler, director of the chess meet.

On Sunday, July 14, at 2:30 p.m., Dr. O. O. Dille was named acting president and Charles Marvin of Key Control Security was appointed club adviser.

Ron Manning, a junior from Fairfield majoring in philosophy, made a clean sweep of the SCF's Five-Round Swiss Tournament by totaling five points.

The two students tied for first place and playing with four points each were Gene Baldwin, Bob Turner and Ron Whitlock. (One point is awarded each win, and one-half point is given for each game ending in a draw.)

Keppler said club membership would be open to any interested person in the University, from the beginning chess player to the professional.

He said the club has three main interests:

-to seek "a core group of strong players" and possibly form a chess team to compete against other colleges and universities;

-to provide a place for chess competitors to talk over their game;

-to teach beginning players how to play or improve their game.

R. Buckminster Fuller, a noted physicist, will be the featured guest in the Student Christian Foundation program, at 10 a.m. Friday, July 19, at the University Center.

Young U.S. Grant Described
In Sister-in-Law's Memoirs

U.S. Grant, Civil War gen-
eral and 18th President of the United States, was a handsome, dashling young lieutenant and "as pretty as a doll"—that is the picture given by Emma Doni Casev. She recalled the day of her childhood when her oldest sister, Julia, was being courted (eventually to be won) by Grant.

John Y. Young, SIU historian and executive director of the Okeens Y. Grant Association, has reprinted the first installment of Mrs. Casev's mem-

ories in the alumni Grant Newsletter, which he issues. The memoirs were published in a 1909 magazine, The Cirl-

cle.

In the two-part article entitled, "When Grant Went a-Courting," Mrs. Casev de-

scribed Grant in these words:

"At that time Lieutenant Grant's personal appearance was very attractive. He was

very youthful looking, even for his age, which was just 21. His cheeks were round and plump and rosy, his hair was fine and wavy. His eyes were clear, bright and always full of light.

Moslemi Chairman
Of Forestry Society

All Moslemi, associate professor of forestry, is the newly elected first vice chairman of the American Society for Fiber and Particle Processes. The election came at the Society's 22nd annual meeting in Washington, D.C., June 23-28 which Moslemi attended.

Moslemi will screen research papers intended for presentation at a 1969 sym-

posium of the Division of Fiber and Particle Processes.

Moslemi a specialist in wood technology with master's and doctoral degrees from Michigan State University, is carrying on associated research work on the properties of hardwood and wood color determin-

ation methods. He joined the SIU Department of Forestry in 1965.

23 Study in Mexico Program
Twenty-three students from 19 Illinois cities are enrolled in a summer study program in Mexico sponsored by SIU's Latin American Institute.

The students participating in this eight week program are under the instruction and supervision of Robert L. Gold, SIU assistant professor of history, and his wife.

The program, which began June 14, is sponsored by the University of the American, Mexico City, After
five weeks of study in Mexico City, the group is scheduled to visit places of historic and artistic interest. The program will end Aug. 10.

Courses offered for the program include a wide variety of subjects, including history of Mexico, economic development in Latin America, tech-

ique for teaching Spanish on the secondary school level, Mexican folk dance and song, and Latin American govern-

ment.
Weekend Activities

FRIDAY
"The Most Happy Fools" will be presented by the Summer Music Theatre. Play starts at 8 p.m., in Muckeltroy Auditorium. Tickets are on sale at the University Center and Communications Building box office. Regular admission tickets are $1.50 for students and $2.25 for the public. Season tickets are $4.50 for students and $7.50 for the public.

Advanced registration and activities for new students and parents will be held from 10:30 a.m. to 12 noon in University Center Ballroom B.

The Campus Folk Art Society will sponsor a folk sing from 8 to 10 p.m., at the beach and Lake-on-the-lake. Trueblood Hall will be the site of a dance, sponsored by the Activities Planning Board, from 8 p.m. to midnight. The Great Film Series presents "Gambit" at 8 p.m. in Parr Auditorium. Coke Sales sponsored by the Student Council will come from 7 to 10 p.m. The Interfraternity Council Fellowship will meet from 7 to 9 p.m., in the University Center Room C.

The Baha'i Club will hold an International Food Feast from 8 to 10 p.m., in University Center Room D. A special topic "Travel Observations on the Key Deer" will be presented by the Center for Law and Government.

SATURDAY
"Black Orpheus" will be shown at 8 p.m. in Parr Auditorium. Admission is $1.50.

The Testing Center will hold the Graduate Record Examination from 8 a.m. to 11 a.m. in Morris Library Auditorium. A Graduate English Examination will be administered by the Testing Center at 8 a.m. and 8:30 p.m. in Morris Library Auditorium.

The Testing Center will hold the College Entrance Examination Board at 8 a.m. in Davis Auditorium. Student Government will meet at 2 p.m., in University Center Room C. Kappa Alpha Psi dance will be from 7 p.m. to midnight in the University Center Ballrooms. The Department of Music will sponsor a student recital at 8 p.m. in Davis Auditorium.

Jackson-Williamson County Community Action Agency will present the Headstart Training Program from 8:30 a.m. to 12:30 p.m. in Lawton Hall Rooms 201 and 221.

The Southern Players will present a special performance of "Mr. Highpockets" for the National Campers and Hillers Association at 8 p.m., at the De Quoin Fairgrounds.

Film programs for the High School Music Workshop will be presented by the Student Activities Center from 7 to 11 p.m. in Davis Auditorium.

VTI Programming Board will sponsor a trip to the stock car races. The bus leaves VTI Student Center at 7 p.m.

SUNDAY
The Department of Music will present visiting artists Owen and Liebau, pianists, at 8 p.m., in home Economics 1409.

Home and Family Consumer Cooperative Workshop will meet July 14-15 at 8 a.m. in the Home Economics 1409.

The Activities Programming Board will sponsor a trip to the Municipal Opera a "Brigadoon." The bus leaves the University Center at 4:30 p.m. and returns immediately after the show. The $3 cost includes bus fares and admission to the opera. Sign up in Student Activities Office by noon Friday.

The Jewish Student Association will hold a potato pancake feast at 803 South Washington from 5 to 11 p.m. at a self-supporting rate of $1.50.

The Activities Programming Board will sponsor a trip to the Municipal Opera a "Brigadoon." The bus leaves the University Center at 4:30 p.m. and returns immediately after the show. The $3 cost includes bus fares and admission to the opera. Sign up in Student Activities Office by noon Friday.

Black Alumni Association Sponsors Seminar for Negro Prep Students

The Black Alumni Association will sponsor a seminar for College and Career Preparation for high school students from 8 a.m. to 3 p.m., Saturday in Ballroom. The seminar is sponsored by the Alumni Center.

The session will also be open to all black students at SIU and interested black residents. The purpose of the seminar is to focus on educational and career opportunities for black high school and college students.

Information will be given on preparation for college and careers and available resources. Emphasis will be put on awareness of black history and black achievements including this awareness in curricula of elementary, secondary and advanced schools.

John Flamer, assistant to the Alumni Director at campus alumni, and Rendleman, chairman of the Black Alumni Association, John Holmes, SIU graduate student, chair the seminar.

The Association is a year-old organization and has a total membership of 10 SIU alumni in Carbondale and in other cities. The seminar will be the first session of its type sponsored by the members.

Registration will begin at 8 a.m., and the program for the day follows:
- 9:10 a.m.-General orientation session. A student of black history and culture will speak.
- 10:10 a.m.-Small group sessions. The group will include the place of the black man in society, the problems of black high school and college students and some problems in career development.
- 11:10 a.m.-Free period. Participants will tour the campus and take a lunch break.

12-1 p.m.-General assembly.
- 2 p.m.-Group discussions.
- 3 p.m.-Free period.
- 4 p.m.-Final assembly.

Health Service

The University Health Service has requested the following admissions and dismissals:

Admissions: Sharon Day, 500 Freeman; Gay Burton, 905 E. Park; Norman Singer, 211 Emerald Lane; George Balokowetz, 201 N. 4th; Raymond Harriman, 307 Schneider; Barbara Richards, 24 E. Halls Tower; Catherine Richard, 500 Freeman.

Dismissals: Thomas German, 201 N. 4th; John Swartbuck, Gay Burton, 905 E. Park; Norman Singer, 211 Emerald Lane; Patricia McLean, Mae Smith Tower.

CARRIES
FRIDAY AND SATURDAY NIGHTS
No Cover Charge Before 9:30 p.m.

Listen To The Sounds Of The
"LONG WAVE RADIO"
SUNDAY NIGHT-FOLK SINGING 9 p.m.-1 a.m.
No Cover Charge
Doctoral Dissertation

**Irish Drinking Study Planned**

SIU graduate student, Richard Stivers, is going to try to find out how the Irish keep sober in the midst of all that Irish whiskey.

Stivers will seek to unravel one of the tantalizing mysteries of western civilization when he goes to Ireland this fall to do a first-of-its-kind research study involving the social-historical aspects of Irish drinking behavior. This one-year endeavor will be the meat of a dissertation for his Ph.D. in sociology.

Stivers says many studies have been done on the heroic drinking habits of Irish-Americans, whose intake ranks highest of any ethnic group in the U.S. But so far nobody has attempted to bottle up data on the Emerald Islanders, also believed among the heartiest tipplers in the world.

He'll be based at Galway University as an exchange student, and plans occasional sojourns from his study to the public houses.

"That will be mostly for observation and getting acquainted," however. Stivers says a sociological analysis of bar behavior already has been done.

"I'm interested in the historical aspects of a sociological phenomenon. Time was when the Irish were known as a sober people and there's still a strong core of temperance provincials, also believed among the heartiest tipplers in the world.

"If we make it to a book in writing it would be more for observation and getting acquainted," however. Stivers says a sociological analysis of bar behavior already has been done.

"It's the present time says what specific recommendations will be made. A strong possibility, he said, is the creation of a medical review board. Such boards have been suggested by the U.S. Department of Transportation, he said, as a means of keeping unqualified drivers off the road.

"As the committee will probably recommend that the General Assembly "make licensing tests more difficult to keep many of these borderline drivers off the road.

"One of the most important steps we can take to make the roads safer," he said, "is to make sure that there are better drivers behind the wheel."

The committee was created by the state senate to examine the present state driver licensing laws and recommend ways to make them conform more closely to the guidelines of the Uniform Vehicle Code and the National Highway Safety Bureau.

According to Aaron, the present laws "somewhat weak" and need clarification in some areas and "completely new provisions" in others.

Aaron said he cannot at the present time say what specific recommendations will be made. A strong possibility, he said, is the creation of a medical review board. Such boards have been suggested by the U.S. Department of Transportation, he said, as a means of keeping unqualified drivers off the road.

Aaron said the committee will make its recommendations to the General Assembly in December.

---

**Stricter Controls Seen For Illinois Drivers**

It is going to be harder to get and renew a driver's license in Illinois in the near future if James E. Aaron, SIU safety expert, is right. He says there is a "good chance" of stricter controls on licensing next year.

Aaron is coordinator of the SIU safety center and director of the Citizens Advisory Committee on Drivers Licensing. He said the committee will probably recommend that the General Assembly "make licensing tests more difficult to keep many of these borderline drivers off the road.

"One of the most important steps we can take to make the roads safer," he said, "is to make sure that there are better drivers behind the wheel."

The committee was created by the state senate to examine the present state driver licensing laws and recommend ways to make them conform more closely to the guidelines of the Uniform Vehicle Code and the National Highway Safety Bureau.

Coach Expresses Optimism, Appreciation

Ron Marcinick, SUU's offensive line coach, expressed both optimism and apprehension about next season's football team in a talk given at Trueblood Hall Wednesday evening.

"I still feel we are a pennant contender," he said over a new conference. "I don't think first place is unrealistically even though we are 101/2 games out."

Harry Dalton, Oriole personnel man, cited Weaver's highly successful minor league season and said, "I think he's a winner. He's a very aggressive. He's a ball hawker."

Weaver was hired for the remainder of the season.

It was Arizona that abruptly broke the news Wednesday to Baltimore and Kansas City that he was being hired midway through his fifth season as an Oriole manager. "We were disappointed in the total performance of the ball club," he said as a reason for paying off Bauer.

The Oriole orchestra are third in the American League. They won the pennant in 1966 and then swept four straight games in the World Series from the Los Angeles Dodgers.

"I think I inherited a good ball club," said Weaver, who will be 38 years old next month. "With one or two changes, I think it can improve."

He said he couldn't be specific yet, but mentioned "getting someone very good in the defensive line; we're doing good well in Rochester."

He has managed Oriole farm teams for 11 years, not finishing out of the first division, winning pennants in three different organizations and being runner-up five times.

He played 13 seasons in the minor leagues.

"We're going to have a good team," he said. "I feel we have both offense and defense and we still have a lot to do."

"We had a good spring practice and we are and bound and determine to have a good football program at SUU in the near future. Our freshman team won and of the west we've had and consists of 15 boys from the immediate area."

Marcinick summarized the fall schedule, familiarizing the students with the opposition for the coming season. He named Tulsa, Louisville and the University of Tampa as three of the toughest schools for Salukis will play. "Tulsa will be the most exciting game of the year," he said. "We are not worried about playing them."

Southern up then the highly rated Golden Hurricane last season, 16-13, in one of the biggest football wins in SUU's history. "Louisville is always a big game," he added. "We have one man claimed Marcinick. "They have a sprint out offense and utilize the quarterback option play."

"Tampa is a lot like Tulsa in that they are a big, strong team with good backs," he added. Drake, Dayton, Springfield, Youngstown and Lamar Tech will round out the fall slate.

An increase in student support of the team was cited by Marcinick to be an important factor in the success of the team. He used the Tulsa game last year as an example of how student support can lead to victories.

"Let me tell you this," Marcinick said. "Football is a business, and we are about to make a mistake. Take the Tulsa game for instance. It was an exciting game. Tulsa had one of the best offenses in the country and two of the best quarterbacks. The SUU student body and the team were aroused that day and we beat them bad. The day after the game classes were called off and Southern made headlines across the country."

Speaking on the topic of athletic expansion, Marcinick repeated the amount of NCAA scholarships grants and the size of the new football stadium is still undecided. He did say the scholarships would go to seniors first, then the juniors and so on down the line to incoming freshmen.

Earl Weaver Replaces Bauer at Baltimore

BALTIMORE (AP) - Earl Weaver, a minor league base- ball manager for 18 years, is confident he can turn around the Baltimore Orioles Thursday from Hank Bauer, autofocus on the afternoon scene during the same span.

"I still feel we are a pennant contender," he said over a news conference. "I don't think first place is unrealistically even though we are 101/2 games out."

"I think I inherited a good ball club," said Weaver, who will be 38 years old next month. "With one or two changes, I think it can improve."

He said he couldn't be specific yet, but mentioned "getting someone very good in the defensive line; we're doing good well in Rochester."

Basketball Team to Face Tough Rivals

SIU's basketball schedule for the 1968-69 season was released Friday by Athletic Director Donald N. Boydston and included a game against the University of Iowa on December 15, 1968. The season would feature a total of 26 games, including 14 home games and 12 away games.

The schedule included several high-profile opponents, such as the University of Illinois, the University of Missouri, and the University of Kentucky. The Salukis, led by Coach Jim Lawrence, were expected to have a strong season, with many experts predicting a top-five finish in the Missouri Valley Conference.

American after living in the United States, and the University of Illinois, which was ranked as the top college football team in the country, were expected to provide a difficult challenge for the Salukis. The Salukis, however, were determined to rise to the occasion and compete at the highest level possible.

The schedule also featured several games against teams from the Southern Conference, including the University of South Carolina, which was expected to be a tough opponent. The Salukis were looking forward to these games, as they believed they could use the experience gained to improve their performance against the top teams in the country.

In conclusion, the 1968-69 season would be a challenging one for the Salukis, but they were determined to rise to the occasion and compete at the highest level possible. With a strong schedule and a talented roster, the Salukis were poised to have a successful season and make a name for themselves in the world of college basketball.
