Trustees officially advocate no-tuition policy

By Diane Misialko
Daily Egyptian Staff Writer

The SIU Board of Trustees officially established SIU's advocacy of a no-tuition policy at state universities and colleges by unanimously endorsing its tuition committee's report Thursday.

Tuition committee members—Trustees William W. Allen and Margaret Blackshear, SIU-Carbondale President David R. Derge, SIU-Edwardsville President John S. Rendlemen and Chief of Board Staff James Brown—submitted their report to the Illinois Board of Higher Education (IBHE) Nov. 5. The Board of Trustee's approval, therefore, was retroactive.

The report presents six recommendations to the IBHE, based on a six-page rationale. The six tuition recommendations are:

—The IBHE should develop a tuition policy which supports the belief that higher education is a right of all the people, not a privilege.

—The IBHE should determine society's versus the individual's responsibility to pay for education. The report notes the state's present policy is inconsistent. Elementary and secondary education and some lower-level college education is free, as if it were a right, while other higher education is a "qualified privilege," the report says.

—The IBHE must examine the factors of community college enrollment and tuition, Illinois State Scholarship Commission (ISSC) policies, and changes in residency law which affect IBHE also should examine the ISSC grant differentials between public and private schools. "The SIU and Derge recommend that the ISSC provide uniform grants to all students whether they attend public or private universities," the report says.

—The IBHE should re-examine its policy of subsidizing private education to ask whether or not eliminate un-policy still exist. State dollars "ought to be spent first in the state universities so state universities can afford both the quality and quantity of higher education required by the people of the state."

—The IBHE should recommend technical agreements as between adjoining states to allow the exchange of students within metropolitan areas.

This point is addressed to the situation of SIU-E, which, a report calls a "major educational institution in the St. Louis metropolitan area."

—The IBHE should explore a step-by-step transition toward the goals outlined in the report. Step one should be the reduction and ultimate termination of state support to private institutions. Step two, recommended to begin in fall 1974 should be to reduce tuition at all state institutions to the 1976 level. Continual reduction should proceed from there while the state seeks alternate sources of income toward providing tuition-free higher education.

The SIU tuition report contains no (Continued on page 2)

Carr and GSC reject Senate trustee decision

By Terry Martin
Daily Egyptian Staff Writer

Officials of Student Government and Graduate Student Council (GSC) said Thursday they will not accept the Student Senate's decision to eliminate all qualifications for student trustee candidates.

A special executive session of the Student Senate will be held at 1:30 p.m. Friday in Activities Rooms C and D of the Student Center to discuss election laws. Mike Carr, student body president said Thursday.

"The purpose of the meeting is to inform officials of GSC and Lynn Kinsell-Rainey, GSC president have been invited to attend the special meeting.

"I was pleased last week that the senate took it upon themselves to check into election laws for the good reason, because it showed they were concerned," Carr said. "One of the things the student overooked Wednesday night is that grad students are also involved." Student Senate Vice President Jim Kania said petitions for candidates cannot be passed out until a compromise is reached. Petitions originally were to be available at 9 a.m. Friday.

"I think the Senate is acting in a realistic fashion," Kania said. "They don't realize they have to work with...GSC, the student body president and me."

GSC President Lynn Kinsell-Rainey said she wants student senators to realize that GSC wants to work with them on the trustee election.

"We want to work with the Student Senate in any way we possibly can as we thought we had been through the ad hoc

Derge announces steps to diminish energy shortage

By Julie Tilton
Daily Egyptian Staff Writer

Definite steps will be taken at SIU to help alleviate the energy crisis, President David Derge announced an afternoon press conference Thursday. "America will get through this," Derge said the university will "urge and solicit voluntary compliance."

"The temperature in all campus buildings will be reduced to 68 degrees from the usual 70 to 73 degrees. The manual re-setting of thermostats will take at least one week and cost around $5,000.

"The University will proceed with the installation of an automated control system in the power plant which will regulate the peak load energy consumption. Executive Vice President John Rendlemen was also at the conference, which took place after a Board of Trustees meeting. He said he and his staff would look thoroughly at the energy crisis and take any necessary steps towards its alleviation in Edwardsville.

"Unfortunately, unlike Dr. Derge, I don't get advance information from the White House on what they're going to do," Rendlemen said.

Derge said he had not received any advance notice of President Nixon's energy mandate. He paid tribute to his staff for working late Wednesday compiling the regulations.

Gus Bode

Gus says maybe turning the thermostats down will turn the grade points up because it will be too cold to sleep in class.
**Trustees advocate no tuition**

(Continued from page 1) specific economic recommendations. Allen, who chaired the tuition committee, said, "We feel we should make policy first and then develop the economies to support it." He said we feel we are operating without a policy now." Allen said the IBHE formula that tuition should be set higher than the cost of instruction is not a policy, but that recommendation, he explained. The standard formula, Allen said, has no underlying policy.

Allen, quoting from the report, observed that present state tuition levels, ISSU's recommendation to private education have made higher education "a right of the poor, the privilege of the rich and a serious problem for fine arts education."

The SIU position on tuition "will be pursued with vigor," Allen said, through the "expected and necessary IBHE debate" on the matter. As a recommendation of the Committee on Public Relations, Publicity and Information, two members of the Carbondale faction have eight members and not have seals, but you'll be the Edwardsville namecards. "We may have as many constituting committees," said SIU-E President John S. Rendelman, "but we're not here and we try hard." Rendelman also pointed out that the Carbondale panel had molded plastic nameplates while the Edwardsville panel had cardboard namecards.

"You will be welcome when we meet at Edwardsville," he joked. "You may not have seats, but you'll be welcome." Board chairman Ivan Elliott Jr. will meet soon with members of the panels to decide how their recommendations to the board and board staff will be made.

The weather:

**Partly cloudy, chilly**

Friday: Party cloudy and chilly with the temperature in the low to middle 40s. Precipitation probabilities include a 30 per cent chance of light drizzle. The wind will be from the North to Northwest at 8-12 mph. Relative humidity 68 per cent.

Friday night: Party cloudy and cold with the low temperature in the middle to upper 30s. Probability for precipitation will be decreasing to 20 per cent by tonight.

Saturday: Party sunny and mild with the high in the upper 40s.

**Senate okays proposal to continue DE hearing**

The Student Senate hearings into the editorial policy of the Daily Egyptian will continue until the last Senate meeting of fall quarter. Gloria Underwood, member of the Academic Affairs Committee which is conducting the hearings, brought the proposal to the Senate Wednesday night.

A recommendation by the committee was originally scheduled to be finalized by the third regular Senate meeting in November. Investigation began after Fred Whitehead, assistant professor of English, told the senate on Oct. 10 that a letter he had written to the paper had been refused for publication.

In other committee reports to the senate, Ron Adams, finance committee chairman, recommended that $152 be allocated for a Public Relations Club bus trip to St. Louis. No action was taken. Adams also proposed that a bulletin board and subscriptions to other state campus newspapers be purchased with the cost to be around $300.

"The purpose of this would be for
Bids for stadium revamp okayed by SIU Board

By Marcia Bullard
Daily Egyptian Staff Writer

A half-hour meeting ended the approval of bids Thursday for the McAndrew Stadium renovation.

The bidding process was opened by the Board of Trustees, T. Richard Mager, a longtime exponent of the stadium, strode across the meeting room and grasped the hand of Athletic Director Doug Weaver.

It marked the successful climax of nearly two years of planning and hard work for the two met.

"It's the greatest thing to happen to SIU athletics since the construction of the SIU Arena," Weaver said later. "The students and fans deserve it and the coaches and players deserve it."

Board approval of the bids means the stadium will be renovated, hopefully by the fall of 1974. Improvements will include more seats for the west grandstand, better seating for the west grandstand, additional locker rooms and toilet facilities, new concession areas and a $50,000 press box in the west grandstand.

Mager, vice president for development and services, and Weaver have been the two biggest supporters of the renovation which wascriticized because of high costs.

The lowest bids on the stadium renovation were $580,000 in excess of estimated costs. In the past month, Mager and Weaver have visited some construction features and raised funds from various university organizations to make up the difference.

The cost of the renovation now stands at $2,029,636.32 instead of $2.4 million.

Carr rejects Senate decision

(Continued from page 1)

committee," Ms. Kinsell-Raney said. "Hopefully, the senate and the GSC can finalize the election rules in a manner that will be acceptable to both groups. Ms. Yerian and Ms. Kinsell-Raney both feel the eligibility requirements eliminated by the senate are vital.

'This is a whole new debate," Ms. Yerian said. "Some form of ground- work eligibility requirements should be kept in the pasta which have been criticized because of high costs.

Those bids on the stadium renovation were $580,000 in excess of estimated costs. In the past month, Mager and Weaver have eliminated some construction features and raised funds from various university organizations to make up the difference.

The cost of the renovation now stands at $2,029,636.32 instead of $2.4 million.

Late Thursday afternoon: Mager and Weaver met with the football team during practice session to announce the approval of the renovation. The team knelt in a circle around Mager, Weaver and head coach Dick Towers at the edge of the field.

When Mager told the team of the review of the board's action, members broke out with cheers and applause. Mager then relaxed players for Saturday's final game by saying: 'let's leave the old stadium to the wind.'

Asked if he was happy to see the approval of the renovation project, SIU President David Derge said, "I'm just glad it's finally over." He said construction costs keep rising and he is relieved that work will get underway soon.

Plans for the stadium renovation began in 1967 when Delyte Morris was president of the university. Earlier this fall Derge said if the project had been decided by him it probably wouldn't have cost quite so much.

Four bills passed

Senate supports crosswalks, SIU Golf Club

By Debby Rattermann
Daily Egyptian Staff Writer

The Student Senate passed four bills in rapid succession following a two-hour debate which revises the eligibility requirements for student trustee candidates.

All to bills sponsored by Ron Adams dealing with unsafe crosswalks were passed. Adams said authorities told him action on the crosswalks must be initiated by the Senate. The Senate requested that a crosswalk be painted on Wall Street directly in front of Wilson Hall. A bill was also passed requesting a yield sign at the crossing on Logan Drive directly behind Schneider Hall.

The Logan Drive crosswalk is right before drivers get to the stop sign Adams said. "Cars don't stop until they get to the stop sign and consequently they could run over students in the crosswalk.

Adams' original bill requested that the stop sign be moved to direct in front of the crosswalk, but the senate amended the bill to request a yield sign.

The Senate resolution to recognize the SIU Golf Club as a campus organization passed unanimously.

The senate also passed a bill allotting $87.50 to Sigma Delta Chi, national journalism fraternity, for a convention trip.

Two Senate committee appointments were approved following recommendation by Diane Balich, chairman of the committee on committees. Frank Wink was appointed to campus physical facilities and Ron Adams was named to the health and welfare committee.

In other action, the senate tabbed a bill for a campus clean-up day introduced by Gary Ferguson.

Vice President and Provost J. K. Leasure will speak to the senate next Wednesday.

Fact goes to U.N.

Mideast cease-fire could produce talks

By THE ASSOCIATED PRESS

Israel and Egypt both have agreed to a five-point cease-fire agreement that could produce peace talks on a Middle East settlement by the end of the year, U.S. officials said.

The officials, with Secretary of State Henry A. Kissinger in Saudi Arabia on the last leg of a Mideast trip, met with newsmen early Friday and said the agreement still had to be submitted to U.S. Secretary-General Kurt Waldheim.

The agreement, the officials said, would ease tensions by providing an exchange of prisoners and giving the Egyptians access to their encircled 3rd Army on the east bank of the Suez Canal and to the city of Suez on the west bank.

The officials said the agreement calls for readjustment of the cease-fire line to conform with terms of the Oct. 22 U.N. cease-fire resolution.

Israeli and Egyptian officials met Thursday to discuss a new cease-fire line in accordance with the reported cease-fire plan. Israeli Defense Ministry sources said Thursday in Tel Aviv.

The U.S. officials, describing Washington as "the trustee" of the new cease-fire agreement, said action to implement the agreement could begin in a matter of days.

At the United Nations in New York, it was learned that U.S. Ambassador John A. Scali had an appointment with Waldheim Friday morning, apparently to give him a copy of the agreement.

The U.S. officials said it was understood that the agreement also would provide for the lifting of a blockade that has barred Israeli ships from going from the Red Sea to the Persian Gulf.

Announcement of the agreement followed Kissinger's trip to Morocco, Tunisia, Egypt, Jordan and Saudi Arabia, where he conferred with Arab leaders.

President Sadat and Syrian officials said in the past that they would never bargain directly with representatives of Israel. Washington has taken an ambigous stand, suggesting at times the United States favors face-to-face negotiating and at other times suggesting that negotiations be conducted through an intermediary while the two sides "were under the same roof."

Before the U.S. officials announced the new agreement, the Israeli state radio broadcast a report that Israel had accepted a five-point compromise worked out by the United States and Egypt.

Orderly marketing procedure

Carbondale consumers are being deprived of a time-saving and money-saving shopping device—unit pricing.

Unit pricing, the practice of listing the cost per ounce, pound, or number of a product in addition to its total price, was developed to simplify comparative shopping.

If a shopper went to a super market to buy a can of corn, he would likely have to make a choice between eight or nine different kinds, all with varying sizes and prices. The unit pricing method would label each can as to cost per unit, enabling the shopper to decide on the basis of comparative cost.

This eliminates the mind-boggling process of dividing pounds into ounces and then figuring the difference between two brands or two sizes of the same brand. While the long-division method may work well for math majors, the average shopper doesn't fare as well with mental calculations and probably doesn't have the time to do so with every product he considers purchasing.

Several states have legislated unit pricing and a number of cities have adopted the plan, either on a voluntary or mandatory basis.

Unfortunately, Carbondale isn't one of these cities. However, local consumer response and legislative pressures could very well make this plan a reality. Consumers have a voice, and should use it to make their desires known.

A welcome hint from Simon

You win a few, you lose a few. Former Lt. Gov. Paul Simon's indication that he will run for Congress from the 24th district devastate strikes us as very good news; the possibility of having at least one first-rate political figure is welcome. But Elliot Richardson, former United States attorney general, has taken himself out of consideration as an opponent for Sen. Stevenson (D., III.), which deprives that contest of one standout.

It is, of course, too early even to speak about possible endorser or candidate for election near away. But the more top-quality candidates in an election, the better the chance of electing a good one. It's no reflection on Stevenson to want to see the best possible people in the Senate.

Simon has hinted broadly that he will try for the Democratic nomination to succeed U. S. Rep. Kenneth J. Gray, also a Democrat, who will retire next year for health reasons. Simon was a victim of the Dan Walker upset last year, losing the gubernatorial nomination apparently because it was simply the wrong time for a good man to have the backing of the Democratic party machine. It is impossible to think this would have diminished Simon's honesty or competence in any way, but the voters were fed up with party politics and voted the wrong man.

We don't know who will be Simon's opponents in the primary or—if he makes it that far—in the general election. We hope they'll be good ones too, but meanwhile it is pleasant to anticipate Simon's return to public life.

Human energy crisis

To the Daily Egyptian:

Today, we are told, America faces an energy crisis—shortages of gas, electricity and gasoline. We also face other energy crises—a shortage of energy demanding that no man is above the law, a shortage of energy demanding fulfillment of the judicial processes, a shortage of energy demanding that the nation face up to the legal procedure that is impeachment instead of copping out by muddling through or hoping for a resignation.

Wake up, America, recharge those energy cells that demand justice.

C. Harvey Gardiner

What is impeachment

To the Daily Egyptian:

John Hiland's editorial in Wednesday's Egyptian is only the latest evidence of widespread ignorance as to what impeachment is. Many, many people are saying we shouldn't impeach Nixon because he hasn't been proved guilty—as if "impeach" meant "convict" or "punish." It does not.

Impeachment is for a government official what an indictment is for the rest of us. It doesn't mean he's guilty; it just means there's solid reason (such as sworn testimony plus circumstantial evidence) to believe he might be. It sets the stage for the actual trial where guilt or innocence will be proved. In this case, the House of Representatives, acting as a grand jury, would bring the indictment, and the Senate would conduct the trial.

Now, why do we need impeachment in the present case? Because a Congressional investigation has turned up incriminating evidence, but has been thwarted in its attempts to get to the heart of the matter. Because a Justice Department investigation has been frustrated and stifled by executive action of the President. Because since the matter was taken up in the courts, Nixon has managed to prevent them from getting access to the evidence they felt was needed. And it has become obvious that we will not know whether our leader is a crook or not unless he is impeached and tried. For the good of the country we must find out.

Prisoners need help

To the Daily Egyptian:

The destiny of our nation's prisoners remains in peril. Evidence the death of an inmate recently at Marion Federal Penitentiary. This is not the only visible situation at Marion that shows what our prisoners are being subjected to. A prisoner in Marion, Edward Sanchez, recently complained to the proper authorities that he had a severe tooth ache. One free woman, a friend of Edels states: "he's been sick, tooth infection and a virus... When I was there, the officials told me they would put him in the hospital there at the joint, but they lied to me!" He raised hell because of the pain he had and they threw him in the box cars. They are cliffs that sound just as bad as they are... you're put in naked... my last letter said he is now getting some official attention... it's a damn shame that they have to go through so much hell just to get some medical attention.

I must remind you that this is no isolated case. In fact this type of case, while perhaps not being totally common, is surely not uncommon. If you are interested in arresting such intolerable situations, if you care about your fellow human beings, please come up to our office on the third floor of the student center, in the Student Government office, and find out what YOU can do. There is power in numbers, there is strength in numbers, there is action in numbers. Please join us.

Keep cool with Dick

By Arthur Hoppe
Chronicle Features

Good morning, housewives and other shut-ins. It's time for another chapter of "Will to Win," the heart-warming story of how a poor, young lad from Wiltshire struggled against overwhelming odds to survive his Six Crises—so he could undergo another couple of thousand.

As we join Dick today, he's seated in an easy chair, watching television. His loyal wife, Pat, enters, looking worried. Dick: Go for the bomb, Redskins! Go for the bomb. Pat: Excuse me, dear. I hate to interrupt when you're working. But I smell smoke. I feel another crisis coming on. Dick: Great! You know how I love a crisis. Pat: Maybe that's why you have so many, dear. Dick: I love them because, as I have said many times, of my incredible ability to ream cool during a crisis, thereby avoiding a confrontation. Pat: I thought you remained cool during a confrontation, thereby avoiding a crisis. Dick: I can do it either way with one hand tied behind my back. Pat: I'm glad of you, dear. But what should we do in this crisis? Dick: Keep cool, of course. Drat! The Cowboys pushed that one off. De-fense! De-fense! Pat: Oh, my goodness! I think a spark from the fireplace must have gone under your chair. Dick: Keep cool, I myself, shall personally investigate myself to determine whether I, myself, am on fire.

The justice said

By M. R. Williams

The year is 1946. A military tribunal sentenced a military officer to death for atrocities committed by troops. Was the tribunal properly convened under law? Yes, holds the U.S. Supreme Court. Referring to certain provisions of the Geneva and Hague Conventions, Mr. Chief Justice Stone said:

"These provisions plainly imposed on us the duty, under the so-called "omissions" of the law, to inquire into the circumstances that led to the war crimes charged and to determine the responsibility of the defendants in each case."

Just who are the male chauvinists

To the Daily Egyptian:

Male chauvinists derive a lot of satisfaction from the proposition—not fact—that men are "taught to have an irrational fear of women bosses or sexually aggressive women."

Now, why do I call the participants in the seminar on "Women as a Woman" (*) male chauvinists? It is not as fantastic as it sounds, for a glance at the rhetoric shows that they feel that the traditional symbols of masculinity should belong to men and those of femininity to the men. They in short have taken an ideological stance on sexual roles more fanatical than any male: that what males do is to be valued and hence is superior, and that what women do is in second place.

I am going to do a disservice to this cause of male chauvinism in female clothing by clarifying a few points.

1. Males have an irrational fear of bosses and aggressive women. Children, animals, and other men. Such a fear is probably not only innate but common sense, requiring no conspiracy of international bankers to maintain it by conditioning. Furthermore, no man "fears" a woman who takes the initiative in displaying her sexual signals.

2. Dr. Ladd said, "women would rather settle issues with rational discussions than by having their children kill each other." That's a good one. Is he suggesting that only women with children have any reason to be rational, so that childless women are not to be trusted to deal with emotional issues? And where does that putting women who?...?

What about those rational women in history? Victorial I, she presided over one of the greatest colonial empires on earth controlling monopolies that exploited in N. America, Africa, India and China. How about those peace lovers like Catherine the Great of Russia, Indira Ghandi of India, Golda Meir of Israel? What about those women in the audience at that seminar who feel "oppressed" and want the power to do something about it? I'll bet that "something" has nothing to do with rational discussion.

The issue boils down to this: female male-chauvinists feel "oppressed" because their ideology (invented by men, by the way) tells them to. That they are oppressed by a mind crippling theory, will never occur to them, for obvious reasons. Because they hold an ill conceived ideology, they will never, never solve their self-defined problem of "oppression." Not even the most ruthless totalitarian state with the power and will to "guide" the smallest details of our daily lives will be able to "literate" them. They will always be threatened by those terrible anti-social non-conformists and reactionaries who somehow don't respond to their beat laid plans. There will always be, in other words, scape goats to blame for the failures of a corrupt and corrupting theory.

Cutback threatens SIU dental lab

By Gail Hooper
Daily埃及 Mail Writer

The dental laboratory technology program of the SIU School of Dental Care is in danger of losing its national accreditation due to severe budget shortfalls, according to Dr. Michael Leebens, supervisor of the program, said Thursday.

Dr. Leebens said recent governmental cutbacks on funds for the Department of Health, Education and Welfare (HEW) have resulted in a nationwide lack of program funding.

"Last year we received a federal grant of $70,000 for our program," Dr. Leebens said. "It looks like we won't get anything for this year. We're not bad right now, but if the state doesn't kick in, we'll be in bad shape next spring."

The SIU program is one of two in Illinois to be accredited by the Council on Dental Education of the American Dental Association. The other is at Triton College in River Grove.

"It's hard enough to meet the requirements for a federal grant," Dr. Leebens said. "But to be approved, as we were, for a $70,000 grant and then lose it...that really hurts."

Dr. Leebens said money is needed to repair some of the present equipment, but supplies for practical instruction are the most important need. He said it is possible the program could not fulfill requirements of the accreditation board if there is no increase in funding.

"If we loose accreditation, it would be a waste of time and money to run the school," Dr. Leebens said. "SIU provides a small allocation for the program, Dr. Leebens said. "But we had to depend solely on the university, so we wouldn't be here. The program is running presently on supplies stockpiled from last year, he said.

The SIU program, started in 1950, was one of the first dental technology schools to gain national accreditation. Enrollment in the program has increased from three in 1950 to 68 this year.

"We accept all students if we had the faculty and the supplies," Dr. Leebens said. There are five faculty members involved in the program.

Dr. Leebens said the University cut off enrollment in the 10-month program in August. "Quite a few people wanted to get in but we just couldn't take them," he said.

"The job opportunities in the dental technology field are wide open," Dr. Leebens said. "Most of the people here get a job in a commercial lab somewhere. There is a large demand for trained dental technicians."

The SIU program emphasizes the fundamentals in dental technology, and this is a big reason students come here, Dr. Leebens said. To enter the dental technology program, the applicant must have a high school diploma and must be accepted by SIU. After completing the program, many students enter the pre-dental program on SIU's Carbondale campus.

Before coming to SIU, Dr. Leebens was a practicing dentist in Minnesota. He lost parts of two fingers in his right hand in an accident, and decided he could no longer practice effectively. He decided to enter dental laboratory education and joined the SIU program in 1969.

Dr. Leebens said one of his reasons for coming to SIU was the university's plans for a $60 million complex to house the School of Technical Careers, formerly the Vocational Technical Institute.

"It was to begin the spring of 1967, but so far we haven't seen a shovel touch the ground," Dr. Leebens said. "And when the accreditation board says 'you promised new buildings,' we don't have an answer for them."

Administration spokesmen request emergency powers

By William L. Chace
Associated Press Writer
WASHINGTON (AP) - Hours after the White House thermostat was turned down to 60 degrees, Nixon administration spokesmen Thursday sought blanket powers to suspend clean-air requirements and shorten licensing procedures of nuclear power plants.

The requests went far beyond those in an emergency energy package proposed by Sen. Henry M. Jackson, D-Wash., chairman of the Senate Interior Committee.

"I believe we would be deluding ourselves if we think that we can entirely avoid granting variances which may impose upon primary standards," said Russell E. Train, administrator of the Environmental Protection Agency.

In his speech Wednesday night, President Nixon asked for sweeping authority to ration gasoline and fuel oil, reduce automobile speed limits, exempt industry from certain environmental controls and impose taxes on excessive energy use.

Police to sell
43 used bicycles
at city auction

Forty-three bicycles will be auctioned to the public by Carbondale Police to a man in the lot behind the police station, 218 E. Main.

People interested in the bicycles will be able to look over the bicycles along with 15 personal bicycles and assorted parts from 8-10 a.m. before the auction begins.

A police spokesman said all the bicycles and parts will be numbered and number lists identified, theworthbeingwill bedetermined.

All the bicycles were either abandoned or stolen and have been stored by the police department for at least six months, the spokesman said.

The Jackson bill would give the President, most of what he requested, but it was short of allowing the administration to suspend so-called primary clean-air standards designed to protect public health and safety.

Jackson's measure would allow the administration to grant, on an individual plant basis, temporary variances from federally set emission standards. But in no case would the bill allow emissions to exceed national primary standards.

"Admittedly," said Train, "we face something of a dilemma in attempting to reconcile and balance competing environmental and energy needs in the face of a fuel emergency.

"The dilemma arises from the need to protect the environment at a time when fuel shortages may make it necessary to burn "dirty" fuels that pollute the atmosphere. The committee planned to begin voting on the Jackson bill Friday af-

Heavy Traffic is a highly polished work—one that cleverly mixes and mingles live action, animation, and music."

"Ralph Bakshi's idea of merging real characters into cartoons and vice-versa is done with brilliance! Visions of undeniably stunning power."

"...serious piece of work and also a brilliant example of the animator's art."

"Heavy Traffic is the most ingenious contribution I've ever seen. It's hard and gross and fascinating. It's a much larger work than Bakshi's earlier 'Fritz The Cat.'"

Damy Hutton, Cory Wells and Chuck Negron, the lead singers at Three Dog Night, will perform a 30-minute medley of rock and roll of the fifties during their two hour show Friday night.

Arena’s biggest stage hosts Three Dog Night

The news releases are completed. The ticket sales are good. And the biggest stage front ever built for any group—80 feet—is under construction at the Arena.

That’s the way Bill Searcy, assistant manager of the Arena, accounted for the Arena’s preparation for Friday’s concert.

Three Dog Night and Deodato. Deodato will open the 8 p.m. show with a one-hour instrumental 200 Space Orchestra sound. Three Dog Night will follow with two hours of rock and roll, featuring a 30-minute medley of nostalgic music of the fifties.

“The double size stage is needed for all the sound equipment Three Dog Night uses,” Searcy explained. Although the ticket sales began slow at first. “They are steadily rising this week and we don’t know how many will be sold at the door. 3,000 seats are still available.”

Searcy said he encourages everyone to come early to get seated and prevent disturbing others after the show begins. “Hang on to your ticket stubs,” he added, “because some people will try to improve their seats during the intermissions and if they don’t have the stubs, they can’t rightfully claim them.”

Only the working press will be allowed to take photos from in front of the stage. “We do have an obligation to the people who buy front row tickets and a lot of photographers in front of the stage disturb the audience and the performer,” Searcy said.

Concerning the No Smoking ordinance of the Arena, Searcy said, handbills will be distributed to the audience notifying spectators that smoking will be prohibited. “While we are hoping the students can control the situation themselves, our ushers will enforce the ordinance,” Searcy said.

Fugitives arrested in separate events

By The Associated Press

Four fugitives were apprehended Thursday in separate incidents in California and Minnesota.

Two fugitives sought for questioning in the execution-style slaying of nine persons in a central California home were arrested in Sacramento.

Douglas Gretzler, 22, of New York City, was apprehended during a search of the Chico Hotel four blocks from the state Capitol.

Officers said they were tipped off by a clerk who saw the fugitives' pictures in the Sacramento Union.

Gretzler's companion, Willie Luther Steelman, 28, of Lodi, Calif., surrendered at an apartment house 90 minutes later after police fired tear gas into the shabby frame building.

Officials had assured Steelman in a broadcast message over a Sacramento rock music station that he would not be harmed, but he did not surrender until the tear gas was fired.

Then Steelman emerged following a slim blonde acquaintance, not identified.

The men and the girl were taken to police headquarters for questioning.

Both men are also wanted on a two-count murder warrant in Phoenix, Ariz., and on a variety of other charges in Santa Rosa and Yolo County, Calif., officers said.

The victims in the Victor massacre were identified as Walter Parkin, 31, the owner of grocery market in Victor, his wife, Joanne, 31; their children Lisa, 11, and Bobby J., Richard A. Earl, a neighbor and accountant; Earl's wife, Wanda; their son, Ricky 15; their daughter Bobby, 13, and Mark Lang, 30, identified as Bobby's boyfriend.

A farm family in Wadena, Minnesota, held prisoner more than 33 hours escaped after the two jail fugitives who held them captive fell asleep.

Elmer and Joyce Wegscheid and

Agenda full for F-Senate discussions

A crowded agenda is planned for the Faculty Senate meeting at 1:30 p.m. Tuesday in the Student Center, Mississippi Room.

The undergraduate education policies committee will present an alcoholic beverage policy for adoption, as well as plans for extensions of bachelor's degree programs in religious studies and nursing.

There will be a progress report on the study of whether to abolish the current system of academic advisement. Anne Thorpe, senate chairperson, said Thursday she has received many letters favoring the retention of the current advisement system.

The senate will also receive a request from J. K. Leasure, academic vice president and provost, to consider abolition of University-wide General Studies requirements. The alternate mentioned by Leasure would allow the faculty of each school and college to determine graduation requirements.

Student Center Auditorium
Multi-media show Saturday

By Dave Bearnas
Daily Egyptian Staff Writer

Piano ragtime music, art objects, films and poetry readings will be presented by artists in the Southern Illinois area at 8 p.m. Saturday in the Student Christian Foundation.

"Probably all of the artists have exhibited their work in various places, but never as a group in Carbondale," said Allan Stock, who is exhibiting his painting, sculpture and silversmithing.

Most of the artists are not students and are trying to make a living out of their art. "We're all in various stages of poverty, trying to get by. That's what we're all about with our art," Stock said.

Addison Webb, who will read a chapter from one of his books Saturday night, organized the show to give these artists a place to show their work. Jan Douglas, who recently returned from the International Ragtime Festival in Toronto, will play piano. The creator of the Merlin's dragon, Jim Fuller, will show his sculpture and silk screens. Two other contributors to the Merlin's decor, Jammie Calwell and Barbara Trent, will show their sculpture. One of their earlier collaborations, which is a knight, now stands at Merlin's.

The multi-media show will take place in various rooms, occupying the entire Student Christian Foundation building.

"It's hard to describe the show, because nothing like this has ever happened in Carbondale," Stock said.

Bake sale slated

A bake sale will be held Saturday at 8 a.m. at the Communications building in front of room 3012 by the Student Relations Club. Coffee will be served.

Blair to call fifth special session

SPRINGFIELD, Ill. (AP)—Speaker W. Robert Blair of the Illinois House said today a fifth special session of the state legislature will be called.

The legislature is already holding a regular fall veto session and four concurrent special sessions. Blair said a new session will attempt to clear up some legal blockades.

Artist, (1980) is the American version of "The Seven Samurai." Now the setting is Mexico and the helpless villagers go to a U.S. border town for help and hire seven gunmen. Eli Wallach is superb as the evil bandit leader. Yul Brynner, James Coburn, and Steve McQueen are among the seven gunmen. Admission is $1 for each film, or $3.50 for both films.

Proposed recreation center to offer year-round activities

By Dan Hayes
Daily Egyptian Staff Writer

Questions concerning the proposed recreation center were answered last week by Carbondale Planning Commission member Steve Coatney.

The commission’s questions centered on the location of the construction site of the center. Coatney explained that the committee’s suggestion for a "short overview of the center, explaining the history of proposed municipal pools in Carbondale and the current plans for the center."

The plans include not only a swimming pool, but also an ice-skating rink because of past defeats for a municipal pool in the city.

A referendum for a $100,000 bond for municipal pool was defeated in 1985. Coatney said with the addition of an ice-skating rink the center could operate year-round, whereas a swimming pool would be opened only 100 days a year yet require maintenance 20 days a year.

The risk, Coatney explained, would have many uses, such as roller skating, basketball and dancing. The ability of the center to operate year-round is a key factor in the consideration of the project, he said.

The planned site of the center, on North Almond Streets between Kenisco and Ridgon Streets, was chosen by the Housing and Urban Development (HUD), Coatney said.

RUD, which is providing a $239,000 grant for the project, stipulated that the center be readily accessible from low-income areas and that the cost of the land be low.

When asked by the commission about home displacement, Coatney said only one house is on the site and no one is living in it.

Purchase of the land is still not settled, Coatney said. He said condemnation could be used if negotiations fail.

Coatney was asked if the city would modify the streets in the area of the center. "(City Manager Carroll) Fry and I have generally discussed the matter," he said.

Coatney said a report between the city and the park district could be developed to eliminate the planning of the center.

He estimated that the center would draw as much as $70,000 per year after expenses. Coatney said each year the revenue situation would be examined to see what, if any, tax would be advisable. The most the tax could be is 4½ cents per $100 assessed valuation.

Coatney ended the discussion by emphasizing that anyone living in Carbondale could vote Saturday on a referendum for a $750,000 bond issue for the center. Persons need not be registered voters, he said.

In other action, the commission discussed proposed policies for Cedar Lake, which are to be a final draft to be submitted to the City Council.

HEW renews research grant on health care

The Department of Health, Education and Welfare has awarded an $80,000 renewal to its grant to SIU School of Medicine that will allow the school’s department of Educational Resources and Development to continue its research in measuring health care concepts.

The funding renewal increases the total amount of federal support for the research planning and extends the program to November, 1974. The research was conducted by John E. Ward, Jr. and Mary Kay Carr (Ph.D.)

The research program is designed to appraise plans for the center, regard the values placed on health, services of social workers, health services and perceptions of health status and quality of care.

The results of the research will allow the development of a set of actions that will improve the evaluation of the health care people receive.
Outwit Winter

Now's the time to make sure your car's up to the rough weather ahead. So you'll enjoy safe, trouble-free driving. And reduce harmful engine emissions. All winter long.
The new tune-up

Car sales boom prior to rise in prices due to safety laws

With new car sales hovering around all-time record volumes this year, the pundits and prophets have offered a wide variety of reasons for the boom. Among the reasons most often cited was this: Cars in the near future may be higher in price due to emissions and safety systems mandated by the government.

Still it seems that many 1973 and 1974-model car buyers want to take advantage of lowest possible prices now and presumably want to keep those cars as long as they can. Certainly, new cars will continue to be attractive buys for millions of motorists annually. The thrill of new car ownership is a never-ending one.

While the theory is sound, the motoring public will have to do a lot better job than they have been doing if they want their new cars to last. For the lamentable history of car neglect that has been so evident in this country has always meant that vehicles are ready for the scrap heap well before their time.

There are more motor vehicles, junks in this nation every year than there are vehicles registered in all of South America. Only five nations in the world have more cars than the number of cars relegated to scrap heaps here each year.

And a large proportion of our discard vehicle population got that way because of neglect. If you want to get your car that extra couple of years, you must pay more attention to car care. The benefit of care outweighs the costs considerably.

For example, the nationally-syndicated columnist Sylvia Porter recently noted, "Tune-ups pay for themselves in savings on fuel consumption and engine wear. And as gas prices climb, a tune-up will more than pay for itself."

Other instances of how careful a car lengthens its lifespan and saves money in the meantime are many. Changing oil and oil filters and lubrication at recommended intervals help prevent premature engine and chassis wear. Balancing and rotating tires and aligning wheels add 10 per cent or more to the life of a set of tires.

This does not even take into consideration the serviceable safety components that help prevent accidents. Certainly keeping brakes, lights, tires, windshield wipers in good operating condition are keys to safe driving. Maintaining the cooling system is another must for trouble-free driving.

Power steering malfunctions can be heard, felt by drivers

If your car has power steering, you may be under the impression that this device is extremely complex, and can be serviced only by a highly trained specialist using special tools. "Actually, this is not the case. A properly maintained power steering system is considerably more complicated than a non-power system. But most power steering maintenance work can be done by the average automotive service technician.

At the heart of your car's power steering system is the hydraulic pump that supplies the pressure to turn your car's wheels when you turn the steering wheel. This pump rarely breaks down, however, provided you make sure its supply of hydraulic fluid does not get too low.

So the most important thing to do with your car's power steering system out of trouble is to have the fluid checked periodically. And when you have the fluid checked, you should also have the serviceman check the hoses that connect the pump to the other elements in the power steering system. Because leakage here is the main cause of fluid loss, which in turn is the main cause of power steering trouble.

Correct anti-freeze tops list of winter concerns

Getting your car ready for winter's severe temperatures and driving conditions should involve a lot more than just adding anti-freeze. The American Petroleum Institute has developed a check list that may help you get ready for the cold weather ahead.

But first, let's look at anti-freeze. Today's cars are designed to use the "permanent" or ethylene glycol type—not the older "alcohol" base variety. Although it is called permanent anti-freeze, it should be replaced once a year or, if your car is equipped with air conditioning, twice a year.

Anti-freeze solutions also act as rust inhibitors and water-pump lubricants and additives that lower their effectiveness after a year's driving.

When changing anti-freeze, begin with a careful check of the condition of the radiator hoses, thermostat, and radiator. Have your mechanic "pressure test" your cooling system. Replace worn hoses before they leak.

If all systems check out, drain and flush the radiator. Replace the coolant liquid with a 50-50 mixture of water and water-glycol anti-freeze. This will offer maximum protection. Do NOT use 100 per cent anti-freeze, use the 50-50 mixture—it's cheaper and more efficient.

Do not overfill the radiator; fill only to the lower of the two lines. If it is full, the overflow that occurs when your car heats up will spill the anti-freeze onto the street.

Check the tension and condition of your fan and generator belts. These few critical to proper cooling and battery charging. Check with your service station about the multi-grade oil suitable for winter use. Get your snow tires on early and avoid the long wait during the first snow fall.

Park your car in a garage, if possible, to keep the engine from getting cold.

Drive on the "top half" of the tank. This prevents water condensation from forming in your tank which can freeze and plug your fuel lines. In other words, don't wait until the tank is almost empty to fill it up.

Be sure to give your car a moment or two to warm up properly, but don't let it idle for long periods of time. This can foul the spark plugs and also clog gas line. Remember, cars pollute more when first started.

Auto mechanics face good future

Five years from now there will be a need for at least 100,000 more mechanics beyond the approximately 600,000 we have now. With more than 120,000,000 cars expected on the roads in 5 years, that is a conservative estimate.

With car population growing at the rate of 3.4 million a year, there should be a job for every mechanical mechanic for the next 50 years. Young people apparently do not understand the earnings and opportunities in the job. Average hourly earnings of mechanics and opportunites in the job are now $6.13, with some making much more. $25,000 a year is not unusual.
Not all women who drive confine their trips to shopping expeditions or journeys to the office. Lucette Saube is one of a growing number of women who earn their living behind the wheel of a car, bus or truck. Mrs. Saube transports children from the Princess Elizabeth school in Windsor, Ontario.

A woman who drives
Low mileage often hinders car operation

Owners of less-mileage cars—though they may have only 7,000 miles or less annually—may believe they are saving money because of the low mileage. In fact, unless they take extraordinary care of these vehicles, their prized possessions may turn into money-pumping prize headaches.

A mileage car owner may believe he should get recommended service at normally suggested mileage intervals. But maintenance schedules are planned for automobiles driven the average of 10,000 or 12,000 miles per year.

The engine, especially, suffers as a result of short-distance driving—often because it has little time to warm up properly. Vital lubricated components of the engine’s moving parts are restricted.

In the Army, lubrication that minimizes wear within the engine. With normal usage, dust and the wear particles are carried to the engine parts.

But an engine must be allowed to run after it has warmed up—in order for the warm oil to flow freely, and carry away all or most of the damaging particles. When moving parts are thus lubricated, they’re cushioned by the fresh friction and shock—caused by the firing of, combustion charges. When starting the engine or accelerating, these driven on the average of 7,000 miles or less annually—may believe they are saving money because of the low mileage. In fact, unless they take extraordinary care of these vehicles, their prized possessions may turn into money-pumping prize headaches.

Car cooling systems must be safeguarded

In the wintertime, when a car’s heater is in daily use, many motorists neglect to safeguard the cooling capabilities of their air conditioners. Even though the owner has paid $250 to $800 or more for an auto air-conditioning unit, he cannot take it for granted. As a result, thousands of dollars in service bills, repair costs and major engine repairs are assessed to owners every year.

According to automotive manufacturers, the air conditioner should be turned on and allowed to run in at least five minutes each week in cold weather, or during periods when it is not in frequent use. This allows the system to operate and check the seals, which eliminates fluid leakage and keeps the seals pliable. But used oil can freeze when exposed to cold, and can cause the seals to harden and fail.

A fan that runs into ice or slush or slick pavement, reduces speed but does not stop. If you are driving too fast, you are likely to lose traction and have an accident. If you avoid any abrupt steering movements. If your car should go into a slide, don’t panic—turn the steering wheel in the direction the car is sliding and allow the car to reduce speed by taking your foot off the accelerator pedal. If you must use the brake, pump it gently.

If you have stopped on a slippery surface, and are unable to move your car, you are in a critical situation as well. Suddenly moving your car can cause you to lose control. Many snow bridges freeze sooner than the rest of the road surface. Be especially careful to avoid slids on bridges.

Starting problems

Waiting for a tow truck to help your car get started in winter is no one’s life’s most enchanting pastimes. Chances are, you’re too busy for work, an important appointment or anything preferable to waiting for the wrecker.

It’s too cold to practice putting your foot on the front lawn and you don’t have the time to put your front lawn and you don’t have the time to put the day to good use. Pay attention to the signals your car is giving you while you are trying to start it. Analyze the sounds and the feel of the engine, and try and figure out just what the problem is.

No, it’s not as simple as “my battery is run down.” Your battery may be run down, all right, but most any battery problem is caused by malfunction of one or more of these components.

If while attempting to start the engine, you hear the starter cracking but nothing happens, suspect one or more of the following conditions: Champion Spark Plug Company suggests: (The strong odor or heat may be present too.)

- Worn spark plugs
- Cracked distributor cap
- Burnt, carbonized or "stick" points
- Worn or cracked wiring leads
- Car is out of gas

Assuming none of these factors apply, other possible causes in closing order:

- Out of fuel
- Key pavements create hazards to winter driving

Autumn and winter driving can build numerous hidden hazards. Wet leaves on the road surface or patches of ice on bridges or shady pavements can be far more dangerous than the occasional fallen snow.

If you run into ice or slush or slick pavement, reduce speed but do not stop. If you are driving too fast, you are likely to lose traction and have an accident. If you avoid any abrupt steering movements. If your car should go into a slide, don’t panic—turn the steering wheel in the direction the car is sliding and allow the car to reduce speed by taking your foot off the accelerator pedal. If you must use the brake, pump it gently.

If you have stopped on a slippery surface, and are unable to move your car, you are in a critical situation as well. Suddenly moving your car can cause you to lose control. Many snow bridges freeze sooner than the rest of the road surface. Be especially careful to avoid slids on bridges.

Tire overloaded on many trailers

If you will be using a trailer, camper or motor home be sure to check the weight you are putting on your tires. According to the NHTSA, 80% of all recreation vehicles are exceeding the maximum loads their tires should carry.

You can check with your tire dealer, the owner’s manual or your dealer to determine the maximum safe tire load. Then have your vehicle weighed, fully loaded, on a public scale.

A vehicle with overloaded tires will have difficulty starting, may be hard to park and may blowout control problems will greatly increase the chance of a serious accident.

Warning arouses citizens

BY THE ASSOCIATED PRESS

Some Illinois local governments and businesses turned off their lights, lowered their thermostats and ordered their cars slowed down Thursday to stave off what President Nixon called the worst fuel shortage since World War II.

The activity ranged from Chicago's Wrigley Building, where the Goodlets were ordered turned off at night, to Jackson County, where a 40-50 mile-an-hour speed limit was imposed on the area's sheriff's patrol cars. The concern for the nation's dwindling energy resources was given a presidencial boost Wednesday night when Nixon went on national television and radio and urged the American people to conserve, lower speed limits, lower thermostats, the extension of daylight saving time and the relaxation of anti-pollution standards.

By Thursday morning several city officials were implementing many of the President's suggestions.

In Elgin, James Ayliff, assistant to the city manager, said the sanitation department has been ordered moved out of one building and into another with the street department to save electricity and heat.

Washtenaw Mayor Robert Sabonjian said all unnecessary lights would be turned off at city facilities. He also ordered thermostats turned down "but not at the expense of the comfort of the employee or our office workers to become ill." The board met City Council buildings and Chicago city buildings was to be lowered to 60 degrees. Mayor Richard J. Daley ordered reduction in lighting in city buildings saying that has never been change in plans for an official Christmas tree that will be lighted at night.

One mayor, Dennis Jacobs of East Moline, said he wants it demonstrated to him that conservation is definitely necessary in his area, then he will cut back on heat.

"We're in the unique position of having our police department in City Hall," he said. "Therefore to cut down on our heat in City Hall will allow our police department, which works here 24 hours a day. I don't think a man should have to work in a temperature range other than the which is conducive to good working conditions."

Hours before Nixon's address, Gov. Daniel Walker ordered thermostats in state buildings lowered, imposed a 50-mile-an-hour limit on all state vehicular and insured that lights in state buildings be turned off at the end of the day except those needed for security.

Private citizens too were urged to lower their thermostats in their homes but some said they were concerned about the effect of lower temperatures on health.

"We would have a hospital full of people with pneumonia" said Mrs. William P. Value of East Moline. "We keep our thermostat at 71 and it's a hospital."

Mrs. Charles Fowler of North Chicago said, "I don't believe we should subject small children to temperatures in the low 60s. I believe the adults could weather the low temperatures by putting on additional clothes, but the children and the elderly.

In other businesses, including Sears and Montgomery Ward in Chicago, announced programs to cut back on the use of electricity and limit the speed of company trucks may drive.

The suggestion that lower speeds be maintained by drivers was taken by some motorists during the rush hour Thursday.

Sgt. James Stever of the Illinois State Police said he observed motorists driving 50 mph on interstate highways on the Illinois side of the Greater St. Louis area. They were going 10 to 15 miles per hour slower than usual. The interstate speed limit is 60.

An official of the Chicago Motor Club said motorists in Illinois and Indiana said the lower speed limits should be observed by all vehicles, including trucks.

Worn wipers loom as driving hazard

Like so many other crucial devices, your car's windshield wipers are most likely to fail you when you need them most. During the winter months, windshield wipers have to fight snow, ice, sleet, road salt, as well as the usual rain, and that all-weather clear vision is extra important, due to hazardous road conditions. So now is the time to check your blading blades, and to replace them if they're not in perfect condition.

How should they be checked? and are there other signs that a wiper blade isn't up to par?

The best time to check your blades is during a rainstorm, or just afterwards, when there's dirty water on the road. Or you can check them by using your windshield washer or as you go through a carwash. Or even when having to wipe your windshield with a hose.

Whenever you choose to test your wipers, you should be sure to check them at all wiper-speed rates they can be set for. And also to be sure to check for all of the following signs of malfunctioning.

- Streaking—are of unwiped moisture within the wiping area
- Hazing—a thin, hard-to-see-through film covering most or all of the wiping area even after the blade has just wiped
- Hopping—a jumpy motion, accompanied by a "chattering" noise on the blade swipes across the windshield, with some areas left unwiped
- Scaling—a ragged outer edge in the wiping pattern
- Rapping or bouncing in the case of problems, but the wiper blade must be loose as, if they're very loose.

Pollution level of newer cars is proven significantly lower

Laboratory and test track probes give unpublishable proof that the cars you drive may be quite as bad as or better than cars you'd have to buy in 1960 to get the equivalent in performance. The tests were conducted by the Department of Transport, and showed that most vehicles actually in the hands of the average driver, operating in typical everyday driving conditions.

According to a survey of 1,370 privately-owned and operated cars throughout the United States, vehicles of 1970's are running about twice as clean as models built prior to 1968. Reason for the cleaner-running car is the continuous cleaning systems designed and installed by the car manufacturer.

Due to these new devices, prospects for rapid improvement in the nation's air quality are excellent. According to the Motor Vehicle Manufacturer's Association, 17 out of 20 cars now on the road have some form of emission control.

A thirty-three percent cut in carbon monoxide and hydrocarbon emissions from 1970's models is expected. As a result of this improvement, a 7.0 percent reduction in fuel consumption is also expected. This means that most gas stations will be closed in the future.

Worn wipers are a problem in your car, and sometimes wiring. "The real need is," says one man, "to have your car checked at regular intervals, and to have your wipers checked at the same time."

The average driver, according to the test results, drives 12,000 miles a year. Of these miles, 50 percent are highway driving, and 50 percent are city driving.

In the Phoenix test, there was an average reduction of 70 percent in the amount of pollutants released into the air. Similar reductions in harmful emissions were noted in Denver and Detroit.

Other cities participating in the test were Dayton, New Orleans, New York, Miami, Dallas, and Memphis.

Car care helps in fuel shortage

A windshield splash with winter road slush can provide a moment of terror to any motorist. For a fraction of a moment he is practically blind. It takes good wipers to clear away the obstruction as quickly as possible and restore safe visibility. Replace those worn wipers before poor winter weather sets in.

Thus between one and two gallons of gasoline per tankful can be saved by a tuned engine. So if you use a tankful of gas a week, you've almost done your part to help alleviate the fuel shortage.

In addition, a tuned engine starts more easily and considerate fuel is wasted in hard starting situations. There are a variety of ways to help you save. In fact, the best way to drive is to keep your car well tuned. You will save fuel, reduce wear and tear on your engine, and increase the fuel efficiency of your car.

Make sure your tires are properly inflated. Underinflated tires are gas hogs. Accelerate smoothly. "Hot road" types consume enormous amounts of fuel.

"Better" driving habits can save you a lot of money. For example, if you drive 10,000 miles a year, you can save $25 on gasoline. That's $25 out of your pocket! And you don't have to do anything special to save it. All you have to do is drive carefully and follow the rules of the road.

The most important thing to remember is to always wear your seatbelt. It's the law in all 50 states. It saves lives. It's the law. So wear your seatbelt every time you drive.

Long distance impairs drivers

Tests conducted in the U.S. have come out with some facts on how a motorist's ability to drive is impaired by long_into the steering wheel.

On the average, after four hours of driving, a motorist takes 20 percent longer between corrections of the steering wheel.

The automobile with a fatigued driver drifts more than twice as far from the center of the lane. When there's a blow out before the driver regains control, the car will take three times as far as before when he is fresh and alert.

Tests were made in a Cornell Aeronautical laboratory (CAL), Inc. at Syracuse, New York. The tests were followed up by over 100 drivers in 16 cities and states. They are for the U.S. Department of Transportation.

The simulator puts the "driver" into the seat of a car and on the road with the conditions being controlled and set up by a computer. The "driving" of the wheel and accelerator and brake pedals.

The value of rest pauses in long-distance driving is required were given support from the tests, says CAL's manager of Research. Each driver, after completing the fourhour period, was given a five-hour break. Then, after rest, drivers had accuracy equal to that at the end of the four-hour period.
Three timely reasons why your car should be tuned regularly.

To save gasoline.
During the current gasoline shortage, it's important for us all to conserve the amount of gas we use. Yet tests have shown an untuned car uses 8.2% more gasoline than a tuned car on the average. And that's more than a gallon in every tankful.

To save our environment.
In recent tests and talk about auto emissions, it's become clear that the pollution controls on our late-model cars are working. And it's been made just as clear that the pollution devices must be maintained and the cars tuned regularly, To keep harmful emissions down.

To save yourself from winter weather worries.
Other tests by Champion Spark Plug Company have shown that an untuned car is especially troublesome during winter. Cars needing tune-ups had twice as many "won't starts" as tuned cars. And the untuned cars took an average of 15% longer to start.

More gasoline. Cleaner air. Trouble-free driving. They all can be yours if you take your car in for a tune-up. Once each year or every 10,000 miles. With the spark plug brand 22 million people have switched to. Champion.

Better plugs for everyone.
Storage tips for vehicles are offered

While winter-time offers lots of attractions to recreation vehicle owners, many enthusiasts prefer to put their units away for a well-earned seasonal rest. When storing Recreation vehicles during cold weather months, the following procedures should be observed:

Winter precautions recommended by the Recreational Vehicle Institute (BVI) include:

1. Draining all water from the vehicle’s water system, to prevent freezing of moisture from all water tanks and from sink and shower traps. Use compressed air, if available, to blow out the last traces of moisture from all pipes and ad-

2. Removing any antifreeze or similar product from stored batteries at least twice, and dry before storing.

3. Draining all water from the vehicle's water system, to prevent freezing of moisture from all water tanks and from sink and shower traps. Use compressed air, if available, to blow out the last traces of moisture from all pipes and ad-

-Increase the level of protection on the applied to stored batteries at least twice, and dry before storing.

Antifreeze on one side... just putting a little bit to one side. Brake linings worn to this extreme are not only a safety hazard, they also cost the driver a higher than normal repair bill. Note, too, that the wear on the left side is much greater than on the right, a good case in point for having all four brakes checked.

Dependable brakes are winter necessity

Dependable brakes on a car are a year-round necessity—but, in many areas, winter brings more frequent split-seconds demands on the brakes. Like other automotive parts, brakes can be affected by temperature changes. Pre-winter in-

-Brake shoes, when worn, are not only out of balance but often are worn unevenly. It is wise to remove seals and cushions covered with such materials.

Faulty exhaust is a risk

The motorist can keep right on driving a car with a faulty exhaust system. But he cannot do so—especially in the winter.

Contrary to safety rules, many people drive their cars with faulty exhaust systems. Thus, without proper ventilation, a motor vehicle can be a deathtrap for the party of fumes, which might seep into the passenger compartment. By the same token, an exhaust pipe or the muffler can be a deathtrap for the driver.

Muffler manufacturers estimate that over 25 percent of cars over one year old should have some kind of exhaust system parts replaced. It is not a serious clamp, but a loose clamp near a rear end, can be cracked.

It takes only a few minutes to have the exhaust system checked, which can be done even as a car is on the left for lubrication or other winter-

-When a car is raised, ruptures or weak spots in the exhaust pipes can be seen—and your service man can check the muffler for clogging. Deterioration of the exhaust system can cause the motorist to be sure he is not being exposed to the deadly fumes. The great danger is that carbon monoxide is colorless, odorless and tasteless. It creeps up on its victims. The body can collect carbon monoxide—therefore, a fatal dose is not necessarily a small dose large.

Do-it-yourself guide offered for checking car belts, hoses

The following tips on checking belts and hoses are suggested:

Belt:

- Most belts look fine on the top, even when they're in terrible con-

-doing, so, when you're checking your car's V-Belts, be sure you look at the sides and bottoms. Here's what to look for:

- Cracks on the underside are rapidly made larger by flexing. Belt can break without warning.

-Glazing—slight hard sides cause low battery and overheating

- Grease-soaked underside and slick sides cause slipping—also rot rubber.

-Peeling—Undercoat peels or frays at bottom corners so that belt runs rough—soon fails.

-Split belt—Top of belt may look good, but undercoat may be split or side badly worn.

-Check belt tension and tighten as necessary.

Blood drive begins on campus Nov. 27

By Jackie Clark
Student Writer

Would you like to take off an hour, lie down, rest up with friends, enjoy a snack and know that during the hour you may have saved someone’s life? That’s basically what happens when you donate blood at the Red Cross Bloodmobile. The bloodmobile will return to campus Nov. 27 through Nov. 30 at balconies in the Student Center.

Sponsors hope to collect more than 1,000 units of blood during the drive. To give blood, a person must set up an appointment one week before the drive. Tables will be set up from 10 a.m. to 4 p.m. Nov. 14 and Nov. 15 in the Student Center and during lunch and dinner Nov. 16, 17, 19 and 20 at the dining halls at Thompson Point, Brush Towers and University Park.

Donors are asked to fill out a card stating their address, telephone number and the times they are available to give blood at the bloodmobile. The cards are used in scheduling appointments and a member of the blood drive will call each donor to remind him of the appointment.

After coming to the ballrooms, the donor picks up his medical history form at the first set of tables. This form remains with the donated blood until it is used. A worker checks each donor’s temperature and records it on the history form.

**Doerr will attend Board meeting**

William Doerr, School of Agriculture assistant dean for instruction, Carbondale, will attend a meeting of the Illinois Junior College Board’s advisory committee in Springfield Thursday.

Doerr will be involved in seasons of the committee’s subsection on Articulation of Agriculture in Higher Education.

The donor should be sure to eat before coming to the drive. Next, registered nurses take a blood sample to check the hemoglobin and the blood type. They fill out the donor’s medical history form after checking for certain illnesses and medications. It takes 15 minutes to fill the pouch with a pint of blood. Then the donor is sent to a canteen for a drink and some food. This eases the mild shock to the system caused by giving blood by getting food and liquids into the stomach. The donor is asked to rest 10 minutes before leaving.

For giving blood, each donor is guaranteed blood from the Red Cross for him and his immediate family for one year. The donor is given a card with his blood type and the date he gave blood for identification as a blood donor.

Under state law professional donors are prohibited and no blood supplies can be brought in from out of state. To receive blood, a person must pay for it, have friends donate it or, because he or a member of his immediate family donated blood, be supplied by the Red Cross.

To give blood the person must be at least 18 years old and weigh a minimum of 110 pounds. Certain types of medications and illnesses will make a person ineligible to give blood.

SIU to sponsor conference on law enforcement education

Several new programs for teachers in corrections and law enforcement education will be introduced to junior college and corrections officials Thursday at a state-wide correctional education conference at SIU.

The new curricula are aimed at state universities, work in educational programs in correctional institutions and at those who will conduct education programs for law enforcement and corrections departments.

Lawrence Weisman, assistant professor in educational administration and conference program chairman, said the new curricula involve options within existing programs in the departments of corrections educational, Rehabilitation Institute and Center for the Study of Crime, Delinquency and Corrections.

The environment in correctional institutions creates special problems for education administrators, Weisman said.

Dorm dweller robbed by two at gun point

SIU Security police are seeking two men in the armed robbery of a 20-year-old student in his Allen Hall room Wednesday evening.

Michael Kliemann, who lives in Allen Hall, told police he heard loud knocking down the hall from his room at 6 p.m. Wednesday.

Shortly afterward, Kliemann said, there was a knock at his door. When he opened it, two men armed with pistols forced their way into his room, he told police.

After threatening him, the men took about $15 from his dresser and some $30 from his roommate's desk drawer, Kliemann told police.

He said as they left one of the men told him "if I moved or yelled, that he was going to kill me."

Moments after the men left his room, Kliemann said, he ran out yelling for help, but the men had gone.

Kliemann described the men as black with short hair and dark clothes, one about 5-foot-10 with a medium build and the other about 6-foot-2 and slender.

HELP offers class in resuscitation

The Division of Continuing Education will sponsor a class in emergency resuscitation from 6:30 to 9:30 p.m. Thursday at the Student Center Ballrooms.

Programs HELP Heart Emergency Life Procedures, as it is called, is particularly useful to members of families where there are cardiac patients. Participants will be taught emergency treatment for the first ten minutes after a heart attack, until help arrives.

There will be a registration fee of $2.50.

Additional information can be obtained from Andrew Morey, SIU Division of Continuing Education, Carbondale.

Tenney given "emeritus" title

The SIU Board of Trustees Thursday named Charles L. Tenney, former vice president of SIU, as the newest professor emeritus of SIU at Carbondale.

"Tenney, a professor of English and philosophy, achieved emeritus status Nov. 1," in other faculty-administered payroll changes, Joseph Goodman, assistant to the president for development and services was approved as Executive Director of the SIU Foundation at Carbondale. His monthly salary increased from $1,250 to $1,500.

Harold H. Hudson gained approval as Chairman of Animal Industries with an increase to monthly salary from $2,400 to $2,600. He was formerly associate professor in the department.

Chester E. Johnston, associate professor in the School of Technical Careers, was named chairman of the Graphics Communications division of STC.

Larry Marshek was approved as assistant editor for the Journalism and Daily Egyptian laboratory on a nine-month contract. His monthly salary of $600 is to be paid from restricted funds.

Ten persons were approved to serve without salary as clinical associates in the School of Medicine.

The Board also approved the following changes: Change in Assignment, Salary, or Terms of Appointment (Approved Base Salary Not Repeated).

- Glenn J. Bennett, Assistant to the Dean, Coordinator of the Center for Planning and Placement Center, rather than Coordinator of the Counseling, and Associate Professor, R. Ralph Bedwell, Assistant Professor of Chemistry and Biochemistry, to serve also as Coordinator of Administrative Management, rather than Assistant to the Dean.
- W. Bolen, Assistant Professor of Chemistry and Biochemistry, to serve also as Assistant Professor in the School of Medicine.
- F. Mach, Assistant Professor of Counseling, rather than Coordinator of the Counseling, Center for Planning and Placement Center, rather than Coordinator of the Counseling, and Associate Professor, R. Ralph Bedwell, Assistant Professor of Chemistry and Biochemistry, to serve also as Coordinator of Administrative Management, rather than Assistant to the Dean.
- W. Bolen, Assistant Professor of Chemistry and Biochemistry, to serve also as Assistant Professor in the School of Medicine.
- F. Mach, Assistant Professor of Counseling, rather than Coordinator of the Counseling, Center for Planning and Placement Center, rather than Coordinator of the Counseling, and Associate Professor, R. Ralph Bedwell, Assistant Professor of Chemistry and Biochemistry, to serve also as Coordinator of Administrative Management, rather than Assistant to the Dean.

Tenney given 'emeritus' title

The SU Board of Trustees Thursday welcomed Charles Tenney, former vice president of SU, as the newest professor emeritus of SU at Carbondale.

Tenney, a professor of English and of philosophy, achieved emeritus status Nov. 1.

In other faculty-administrative payroll changes, Joseph Goodman, assistant professor of computer science, was promoted as Director of Computing of the SU Foundation at Carbondale. His monthly salary increased from $2,926 to $3,450.

Harold H. Hudson gained approval as Chairman of Animal Industries with an increase in monthly salary from $1,402 to $1,462. He was formerly associate professor in the department.

Chester E. Johnston, associate professor in the School of Technical Careers, was named chairman of the Graphic Communications division of STC.

Larry Marshek was approved as associate editor for the Journalism and Daily Egyptian laboratory on a nine-month contract. His monthly salary of $650 is to be paid from restricted funds.

Ten persons were approved to serve without salary as clinical associates in the School of Medicine.

The Board also approved the following changes:

Changes in Assignment, Salary, or Terms of Appointment (Presentation Approved Base Salary Not Repeated)

Charles W. Miller, Assistant Professor, in the Counseling and Testing Center, was named a member of the counseling and testing division.

Donna G. St. Cyr, Assistant Professor of Psychology, was named as a member of the counseling and testing division.

Robert L. Turner, Assistant Professor of Chemistry, was named as a member of the School of Technical Careers.

Louis J. Gislason, Assistant Professor of Chemistry, was named as a member of the School of Technical Careers.

As the hearing in Sirica's court proceeded, the President's personal secretary testified Thursday that the quality of some of the subpoenaed Watergate tapes is so bad that no one will be able to hear every word.

Rose Mary Woods told of laboring nearly a month, sometimes until 3 and 4 in the morning, trying to transcribe Watergate conversations from recordings made surreptitiously in the President's offices.

Asked whether she was able to make a verbatim transcript, Miss Woods said: "I don't think any human being could. Maybe a technician. I couldn't get every word. I don't think anyone else.

The sentence was left incomplete.

Miss Woods, 36, a Nixon aide for 23 years, was a witness at a federal court hearing exploring the White House claim that two key Watergate conversations went unrecorded.

Later in the day the court was to hear from another Nixon intimate, H. R. Haldeman, who resigned as presidential chief of staff April 30 in the heat of the Watergate scandal.

Miss Woods' testimony was the first in six days of hearings to contend that the quality of the tapes was poor. A technician had testified earlier that even whisps could be picked up by the sensitive microphones placed in the President's desks and in wall lamps.

Haldeman, who had listened to one tape, said this about the tapes' quality: "It's good at times and bad at times. It's the kind of tape recording you have in a large room where the Oral History is not audible and bouncy. It's difficult to follow the conversation completely, but it is not by any means impossible."

Haldeman aides have said in recent days that the recordings will be of little value to a Watergate grand jury—where they will go after review after U.S. District Judge John J. Sirica.

WASHINGTON (AP)—President Nixon's personal secretary testified Thursday that the quality of some of the subpoenaed Watergate tapes is so bad that no one will be able to hear every word.

Rose Mary Woods told of laboring nearly a month, sometimes until 3 and 4 in the morning, trying to transcribe Watergate conversations from recordings made surreptitiously in the President's offices.

Senate stalls approval of student
ominated for Board of Governors

By John Mortimer
Daily Nominations Staff Writer

The Illinois Senate postponed consid-
eration of the Governor's nomination of
Robert F. Walker, a Rockford resident and
student representative, to the Board of Governors.

Sen. John W. Stobbs, R-Chicago, said the Senate
would consider the issue again after the
legislature adjourns in June. The Senate
Executive Committee has not yet scheduled
a time for the debate.

The Senate was scheduled to meet this week
and next week to consider the nomination.

The Senate bill, SB.1116, was introduced by
Sen. John J. Gurney, R-Chicago, who said the
nomination was necessary to fill the vacan-
city on the Board of Governors.

The Senate has been considering the issue
for several months, and the nominee has been
on the agenda for more than a year.

The Senate has not yet acted on the nomina-
tion, and the Governor's office has not
announced a decision on the issue.

The Senate has not yet acted on the nomina-
tion, and the Governor's office has not
announced a decision on the issue.

John W. Andersen, professor of forestry, has been notified of his appointment as a research associate in urban forestry for the Missouri Botanical Garden in St. Louis.

In announcing the appointment, Peter H. Raven, Garden director, said the arrangement gives Andersen access privileges to the facilities and is intended to foster cooperative consultation and idea exchanges on developing urban forestry programs in the St. Louis area.

Andersen is carrying on teaching, research and public service activities in urban forestry at SIU.

+++

Davis is a geology specialist in ground water hydrology and is interested in techniques for finding and developing ground sources of water. He also is vice-chairman of the Association's technical division.

+++ 

Several of the staff members of the Department of Business Education will participate in the fall conference of the Illinois Business Education Association Thursday through Saturday at the Holiday Inn East in Springfield.

SIU faculty member Marcia Anderson, secretary of the IBEA, is a member of the program committee and is in charge of the educational exhibits for the conference. Harvey Hake will be the chairman of the panel on "Motivating Teacher Education Students." and Harry Jacobson will be the recorder at that session. Michael Payne, a graduate teaching assistant in the department, also will attend the conference.

+++ 

The SIU chapter of Sigma Xi, national chemistry honorary society, will sponsor a public lecture Tuesday by Robert R. Gorman of the experimental biology division of the Upjohn Company.

Gorman will lecture on "Prostaglandins," a group of chemicals which have been used to induce birth of full-term infants by stimulating the uterus administered early in pregnancy. The drug is effective in inducing abortions.

Richard T. Arnold, chairman of the department of chemistry and biochemistry and president-elect of the local Sigma Xi chapter, said the drug is presently being produced and used in Europe. He said Upjohn is conducting research on the drug, and plans to produce and market it in the United States following approval by the Federal Food and Drug Administration.

Gorman's lecture will be held at 8 p.m. Tuesday, Room 240 B Nickers Building.

+++ 

Milton Altschuler, associate professor of anthropology, has been elected Vice-President of the Central States Anthropological Society. Presently Dr. Altschuler served three years on the Executive Board of the Society.

+++ 

Dr. Lewis E. Hahn, Research Professor and director of graduate studies in philosophy, is the author of an essay which will appear in the forthcoming Winter issue, 1974, of the Midwest Journal of Philosophy. Professor Hahn's essay is entitled "A Flair for Philosophy."

"Essays in Twentieth Century Philosophy" is published biannually by the Department of Philosophy at Murray State University. Murray, Kentucky, with Wayne Sheets as editor and Frederick Kremer and Franklin Robinson as associate editors.

Professor Hahn received his B.A. and M.A. degrees at the University of Texas and Ph.D. at the University of California. He has been a member of the SIU faculty since 1961.

+++ 

John R. Verdun, Jr., educator, has been elected chairman of the advisory council for the Illinois Gifted Program.

The council, composed of seven professional members from throughout the state, serves in an advisory capacity to the State Superintendent of Public Instruction on all matters concerning the state's educational program for gifted children.

Verdun is professor of educational administration and foundations in the College of Education.
Rugby Club beats Illinois

The SIU Rugby Club held the University of Illinois scoreless Sunday as it dumped the Illini 17-0. SIU put 10 points on the board in the first half with scores by forwards Doug Vincent and Ron Rusky. Bob Jones added one successful conversion kick.

Tom Skora opened up the second half by scoring from five yards out and Jones completed the scoring with a 30-yard three point penalty kick.

"The key to our success resulted from heavy workouts in speed-running drills and ball handling," Skora said.

SIU, now 3-3-1 on the year, will play its last match of the fall season against St. Ambrose at 3 p.m. Saturday on the field east of the Saluki baseball diamond.

Squid kids

Steve Kirkwood (white jersey) of the SIU Squids goes up against a Topeka Chairman player as a referee throws up a jump ball. The Squids won the game 47-42. Jon Bonner is the Squid player in the foreground.

Squids send two members to Pan American games

Two members of the SIU Squids wheelchair basketball team will represent the United States in the Pan American wheelchair games. Lynette Hunter and Ray Clark will be making the trip to Lima, Peru on Nov. 12. Both Clark and Ms. Hunter competed in the World Games and then were invited to participate in the Pan American games.

At the games, Clark will compete in the discus, shot put, javelin and the women's pentathon. Ms. Hunter will compete in archery, shot put, the discus and javelin and the women's pentathlon.

EZEN GREEN HOUSE

Wesley Community House

ATTENTION CONCERT GOERS!
The Logan House will be accepting Reservations for a concert dinner on Friday, Nov. 9. Avoid the Rush — Phone 687-2941 for your Reservations.
MVC Commissioner says no invitation will be issued until December

By Mark Tupper
Daily Egyptian Writer

Missouri Valley Conference (MVC) Commissioner Mickey Holmes said in a telephone interview Thursday "absolutely no decision whatsoever" has been reached by his MVC officials concerning which school will receive an MVC invitation to join the conference. Holmes said 28 schools have contacted the MVC expressing interest in conference membership and a decision will not be announced until the conference board of directors meets December 2 at the conference office in Columbia. Holmes said, faculty representatives and athletic directors from the nine existing conference members will convene to evaluate the recommended schools. Holmes predicted the official announcement would probably be made December fourth or fifth. Holmes and a MVC committee visited the SIU campus to look over the weekend of October 30 to meet with SIU athletic department officials and examine the SIU athletic program and facilities. "I have long respected the tremendous athletic program at SIU," Holmes said. "I feel SIU's program is definitely one of the best in the country." Holmes said he felt personnel is what makes a successful athletic program and labeled SIU's athletic staff as "very impressive." "I've known many of SIU's staff for several years," Holmes said naming SIU Athletic Director Doug Weaver, Football Coach Dick Towers, Basketball Coach Paul Lambert, Wrestling Coach Linn Long and Sports Information Director Butch Henry. "On the basis of the staff at SIU," Holmes continued, "one can't help but be impressed." The MVC commissioner said he really feels we have a good chance to be invited to join the Missouri Valley Conference. Weaver said. "But we realize we have not received any commitment from the conference." Weaver said SIU was one of several schools in the running for the conference bid and said SIU was "in the thick of the race." The nine existing members of the MVC are, Wichita State, Drake, St. Louis, West Texas State, North Texas State, New Mexico State, Bradley, Tulsa, and Louisville.

Tracksmarkturn quick times in quarter-mile trials

By John Morrissey
Daily Egyptian Writer

With more than two months until SIU's first indoor track meet, Coach Lew Hartzog is already getting serious about putting his mile relay corps to the test. SIU's sprinters and quarter-milers have achieved a reputation in recent years. The All-Americans in this category on the Salukis currently number five—Terry Erickson, Eddie Sutton, Gerald Smith, Wayne Carmody and Lonnie Brown. Yet this year Hartzog may not be able to put last year's crack mile-relay team together. An impending yield of new talent gives Hartzog eight contenders for the four available spots. Hartzog sought to crystallize his speculation on Wednesday when running time trials at McAndrew Stadium. Using quarter-mile time trials from the week before, he split the top four runners between two squads to make a competitive race, and filled in the other four.

The results of the race raised the eyebrows of spectators, and raised the spirits of a shouting track coach. The winning team of freshman Scott Dorsey (30.5), Smith (40.4), Brown (45.9) and Sutton (49.5) covered a 3.16, while the second team, though they lost Erickson when he tightened up in the last stretch of his leg, came in at 1:51.6 by Carmody, who spent the previous day in the hospital with the flu. Erickson came down with the flu this past week.

The best four splits add up to 3:15.3, while SIU's three months slower Hartzog's pre-season goal. And the times used to compile the 3:15.3 do not include what Carmody and Erickson are capable of doing while they are healthy. Hartzog bemoaned at the results, considering the times came after "only four weeks work, and it was not a nice day."

Eddie Sutton crosses the finish line ahead of Mike Monroe to anchor his intramural mile-relay team to a 3:16.9 clocking. The smile design on Sutton's jersey accurately depicts Coach Lew Hartzog's face as he watched the outcome. (Staff photo by Tom Porter)

Sports facilities not exempt from energy crisis worries

By THE ASSOCIATED PRESS

The sports spectator may find it less comfortable in indoor sports arenas throughout the nation because of President Nixon's plea to conserve energy. Some arenas and stadia already have reduced use of lights and heat and others, in the wake of the President's Wednesday night plea, are looking for ways to cut back.

RPK Stadium in Washington, one of the early economizers, keeps the thermostats set at 68 degrees in offices and team areas and turns the heat off in other areas only when necessary for sports events.

For the past year, Kansas City's Municipal Auditorium has been heated only when company was coming and then only to 65 or 66 degrees. James Oehust, manager of the Greensboro, N.C., Coliseum where the 1974 National Collegiate Athletic Association basketball finals are to be played, said the facility had been on an economy kick for three months and last month alone saved 2,800 gallons of fuel oil. Nassau Coliseum in sunburned New York currently is busy trying to keep hundreds of circus animals warm so they can perform. But once they're gone, the temperature will be reduced and, when professional basketball and hockey are elsewhere, the complex will be in total darkness.

The University of Texas athletic department has cut back night use of Memorial Stadium by 25 per cent by scheduling all band and football practice and high school games during the day.

However, earlier in the season the university rejected fans' protests about UT night football games. "We found that the power needed to light Memorial Stadium would equal the power for 1,860 color televisions and 2,610 black and whites," said a spokesman.

Last year's winning NCAA championship time was 3:17, and SIU finished 0.2 seconds faster this time. Back in December, the conference president's, and, in fact, the virtually certainly will be in the unlikely event Notre Dame would not be named by Alabama Coach Paul "Bear" Bryant to play his Crimson Tide in the Sugar Bowl. The official word from Notre Dame was that the Irish would wait until after their game with Pitt this Saturday to make a decision. However, it was reported unofficially that the Notre Dame team is evenly split between the two sides. After word of the virtually certain Sugar Bowl match, LSU voted to join the Orange Bowl since, it was said, many of the school's fans are going to the Sugar Bowl. The Associated Press learned Thursday that all but a few fans in the Sugar Bowl, the only eligible opponent, would be given higher ratings in the wire service poll.

Though not spelled out in the LSU announcement, it was clear the Tigers were expressing their intention to play in the Orange Bowl since—New Orleans and Notre Dame locked up in the Sugar Bowl—the only eligible opponent ranked higher than LSU at "this time" is Penn State.
