**23 Run for 12 Student Council Positions**

**Housing Area Grievance List Date Arrives**

Residents of University Park have a date today to present their grievances to SIU housing officials.

The 36-page petition will be accepted until 10 a.m. to outline more than a half-dozen complaints about the two men's dormitories in University Park.

As their complainants are inadequate drainage in the showers, inadequate lighting and lack of furnishings and other facilities.

They also ask that the University not let ten persons to the third men's dorm, now requiring complete their construction work has been completed and the building itself is not yet furnished.

In addition, they plan to ask that the University not let dormers be permitted to break their room windows without being penalized.

**SIU Student Group Gets City's Okay To Demonstrate**

Permission to stage a march Saturday protesting U.S. involvement in Vietnam was granted by Carbondale City Council Monday night.

A spokesman for the group told the council he expected about 50 to 100 persons, including faculty and students, to participate.

He said the marchers would walk single file from the main gate at University and Grand Avenues to Freeman Street, and then proceed down Illinois Avenue to Main Street and back to the University Center.

Permission for the march route was given, but Mayor D. Blaney Miller and Commissioner Joe Ragsdale expressed disagreement of the demonstration. "We don't want a disturbance," warned the mayor.

**Cards Required For Advisement**

All students except graduate students and those attending the Vocational - Technical Institute must pick up their authorization cards from the Sectioning Center on the second floor of the University Center prior to being advised.

Graduate students may pick up their authorization cards at the Graduate School and VT1 students may obtain theirs at VT1.

General Studies students may begin self-advisement on Oct. 26.

**Finality!**

You've gotten your student ID card.

Now you are an official member of the SIU clan.

It is a time that anyone wants to know who you are, all you must do is pull out a plastic card punched full of holes and there you are, name, date of birth, sex, social security number and a few other miscellaneous pieces of information.

All in all, this is one of the most important cards in your college career. It will accompany you everywhere. It can get you out of trouble, like when you use it to cash a check when you're broke, or it can get you into trouble, like when you use a false one to buy alcoholic beverages and get caught.

To most students their ID is merely a fact of college life. But like so many other things we take for granted, a lot of work must be done by a number of people before it can ever reach the student.

The first stop toward a completed ID is when a student takes his picture taken by the Photographic Service. The film is then sent to a contract in Chicago who makes up the card with the student's picture laminated on the plastic.

Within 10 days, the time limit on its contract, the film is sent by the mail service.

Next, the ISM holes are punched in the card and the student's name, record number and date of birth are embossed on it.

The card is sent to the library for checking at the 057 computer that is used to check out books. This check must be made to the number of books the student is allowed to check out.

Some SIU students were asked to comment on whether they would prefer this system.

Kenneth A. Oleson, a senior from Chicago, said, "There is too much generalization with this system, and not enough stimulation."

Jennifer Mostek, a sophomore from Lebanon, said, "We are hopeful that faculty and students will put added force to the pursuit of learning more than a grade."

**Want a No-Grade System Here?**

A new system of marking has been inaugurated at West- minster College, Fulton, Mo., eliminating the customary grade of A through F. The new marks will be recorded as distict, high pass and pass. Failing marks will not be recorded on the permanent record.

Donald Gordon, West- minster registrar, said, "We hope that the faculty and students will put added force to the pursuit of learning more than a grade."

Some SIU students were asked to comment on whether they would prefer this system.

Kenneth A. Oleson, a senior from Chicago, said, "There is too much generalization with this system, and not enough stimulation."

Jennifer Mostek, a sophomore from Lebanon, said, "We are hopeful that faculty and students will put added force to the pursuit of learning more than a grade."

**Green Eggs and Ham**

"I won't eat that green stuff, Dr. Seuss," the little girl said. "I won't eat it, Sam-I-am."

"It's delicious," said Sam-I-am. "Try it. You'll like it."

"No. Until I do see some green eggs and ham, I'll refuse to eat that thing."

**Gus Bode**

Gus says SIU's becoming so internationally minded the only way to meet friends is to get to see his prof is on the way to the airport.
SUZUKI

SUZI

The new SUZUKI "SUZI" was made for gals on the go; gals who appreciate modern comforts. With its step through frame, automatic clutch, smooth riding hydraulic suspension and extra quiet muffler, Suzi is a very civilized young lady, who is on the go.

Books the Librarian Snubbed

Our suggestion for addition to the Freshman Guidebook in "Taxes and the People of California" by Blaine Miller.

One publication we've been unable to find is an accurate Central Railroad timetable.

A book we recommend for all motorcycle riders is "Emergency Surfing Self-Protection" by Martin Luther King.

The "Most Amiable Book Award" goes to the Student Peace Union for "How to Live with Radiation Poisoning."

The book to be-taken-with-a large grain of salt is "The Stand, Divided We Fall," by Lai Babadur Shastri.

Finally, we would like to give credit to the soon-to-be-released collective opus of the SIU students and staff, "The 1965-66 Directory."

Ed Rapetti

Computer Technology Can't Replace Wisdom

By Robert M. Hutchins

We hear every day that in a technological world what we are going to need most is lots and lots of engineers. The Soviet Union is said to be a threat to us because it produces twice as many as we do.

The apparently earnest calls for engineers that the defense industries print every day in page after page of the newspapers seem to bear out the popular view that there is a shortage of engineers and that our safety depends on filling it as fast as possible.

Anybody who will take the trouble to talk with engineers and come away with an opposite impression. He will be told that the advertisements are run because the government pays for them. Many companies board engineers so that they can be ready for government contracts if they get them. Applications for each contract contains large displays of engineering personnel who are of course dis- charged if the application is unsuccessful.

The picture emerging from conversations with engineers is that the typical member of this profession in the defense industries is a floater, paid by the hour, here today and gone tomorrow. And the suggestion that the country may be left behind in the technologi-cal race because there are too few engineers is never heard.

D. W. Kean, assistant for technology in International Business Machines, has lately described the prospect for engineers to a committee of the American Society for Engineering Education. The engineers appear to be in the process of getting themselves out of business. The machines they have designed can do the work faster and better than they can.

Kean shows that a computer can now design a machine, produce a finished drawing of it and turn out a punched paper tape that can be fed into a numerically controlled machine that will actualize the new design in metal.

Kean says, "In a world of automatic chess players... It can hardly be taken for granted that the engineer's traditional position is secure."

A study made in 1962 by the Engineers' Joint Council indicated that perhaps 75 per cent of today's jobs in the profession are or will be vulnerable to technological change.

Engineers will make sure that computer designs cannot be tampered with that are impregnable, Computers are now programming themselves.

If engineers are obsolescent, who is in charge?---at least not yet. It may be that we ought to worry about the value of intellectual power rather than the supply of engineers.

Speech Department Names Ohioan Assistant Professor

Larry L. Barker, a native of Wilmington, Ohio, has been appointed assistant professor of speech. Barker was formerly a teaching fellow and associate director of Year Group Research Search Center at Ohio University, where he earned A.B., M.A. and Ph.D. degrees.

He is a member of the American Forensic Association, the Illinois Speech Association, the National Society for the Study of Communication and Phi Delta Kappa, education association.

A coauthor of three research reports, Barker has had five articles and a poem published. His works have appeared in Speaker and Gael, Journal of the American Forensic Association, Central States Speech Journal, the Ohio Speech Journal, the Dispatch Sunday Magazine and the "National Poetry Anthology."

He is also a coauthor of a communication workbook and has mimeographed a programmed instruction.

Barker, 23, is married to the former Jeanne Wilson of Jackson, Ohio.

**A New Breed Of Outerwear**

Zwick and Goldsmith

Just off Campus

It's a western look, a rugged, almost repish look - yet home on any range. Wear no matter how low the temperature dips, yet appealing to any range of outerwear now being featured at Zwick and Goldsmith's. Take your choice of jackets in brushed twill, raw, dark wool, and move out in style. See also our hooded bench warmers, lined and unlined, in waist and knee lengths. **$17.95 to $35**

**Group Will Attend Meeting on Space**

A delegation of School of Technology faculty members will attend a manned space flight meeting in St. Louis through Wednesday.

Sponsored by the American Institute of Aeronautics and Astronautics, the meeting will feature sessions on the current status of manned space flight, manned space stations, future manned mission requirements, simulator and training, vehicle design, transportation and bio-technologies.

Arrangements for the delegation's participation are being made by Eldred Hough, School of Technology assistant dean for research and graduate studies.

The last of three 10-man teams to live beneath the ocean, eager to breathe fresh air again, is reluctant to bring to a close the 45-day experiment performed in Sealab 2. The aquanauts, who ascended from the 205-foot depth Sunday, were to end a 31-hour stay in a decompression chamber at 5 p.m. PDT today. The decompression was necessary to rid their bodies of gases they had breathed under intense pressure during their 15-day stay in the 12x58-foot capsule 1,000 yards offshore.

Navy officials have said Sealab 2—in which each team spent 15 days—has been "one hundred times better" than Sealab 1 last year of Bermuda when four divers lived 11 days at a depth of 192 feet. Sealab 2 was lowered Aug. 26, and two days later the first team took up residence.

The President, recuperating from a gall bladder operation, was told by doctors to "take every opportunity to rest" for several weeks.
Alleys Stabbing Deep Into Viet Cong Area

SAIGON, South Viet Nam (AP)—Telephone switching equipment ground forces stabbed deeper into Viet Cong territory Monday in two big offensives, U.S. aircraft smashed at the entrance.

The twin offensives, hundreds of miles apart in the jungles north of Saigon and the central highlands of South Viet Nam, accounted for at least 75 Viet Cong dead, U.S. military spokesmen reported. Vietnamese sources reported another 60 killed in the highlands by artillery and air strikes but the figure was not confirmed by U.S. authorities.

U.S. casualties were termed light to moderate in the two operations.

The allied troops—Ameri­cans, Australians, and South Vietnamese—reported sporadic contact with the guerrillas in both areas but no contact was reported with the North Vietnamese 323d Division, reported last week in the highland province of Binh Dinh.

In the air war, U.S. planes dropped six million leaflets into the Communist North. The largest leaflet raid of the war, Twelve U.S. Navy planes dropped 3.7 million leaflets into the central highlands of South Viet Nam and other strike targets 150 miles north of the fron­tier. U.S. and South Viet­namese planes made 444 sorties against suspected Viet Cong positions in the past 24 hours in South Viet Nam.

Planes and helicopters also flew heavy support for the U.S. ground attacks.

In the central highlands, Operation Shyan Bayonet, believed the largest U.S.-Vietnamese offensive of the war, west into its second day with the allies trying to close a pincer on the Communist guerrillas in the Soui La Tinh Valley, 25 miles northwest of An Khe.

Troops of the U.S. 1st Cav­alry, Airmobile Division re­ported they killed 16 Viet Cong and captured 30 others. They were backed by heavy artil­lery and air strikes.

The operation, the first ground movement of the highly mobile "Flying Horsemen" that fought in the North Viet Nam a month ago. About 170 of the unit's 428 sold­i­ers went into action and flew 338 sorties Sunday.

U.S. Supreme Court Refuses To Interfere in School Issue

WASHINGTON (AP) — The Supreme Court refused Monday to intervene with the New York plan to crack school segregation by reorganizing school districts.

And in a decision in another controversial area, the court cleared the way for a stop­gap rev­ention of the New York Legislature in a special elec­tion next June.

In both instances the court did little to amplify its views.

The school ruling was in an unsigned order turning down a challenge by white parents to a lower court's decision that upheld the school plan.

The reapportionment ruling also was unsigned.

The school transfer deci­sion, the fourth in a row by the court, supports ef­forts of both sides to keep racial imbalance in public schools. But it stops short of making clear the court's prevailing view of school integration plans.

In two previous cases, one from Gary, Ind., and the other from Kansas City, Kan., the court refused to review lower court rulings that racially im­balanced school districts do not violate Negro students' constitutional rights.

However, in the 1964-55

Meat Doctors

HARRISBURG, Pa. (AP) — The horse troops are a thing of the past, Brig. Gen., Hen­ry M. Gron, Pennsylvania Se­cre­tary of the Common­wealth, explained Monday why Pennsyl­vania must supply eight veter­inarians for the January draft.

"The men will be used as meat inspectors, he said.

Tom Thomsen wanted challenging work

T. R. Thomsen, B.S.M.E., University of Nebraska, '58, came to Western Electric for several reasons. Important to him was the fact that our young engi­neers play vital roles right from the start, working on exciting engineering projects in communica­tion, electronics, telephone switching, tele­vision, circuitry, microwave systems and optical mers.

Tom reasons that more than 7,000 engineers for supervisory positions within the next five years. And he's getting the solid experience necessary to qualify. Right now, Tom is developing and new and improved inspection and process control techniques to reduce man­ufacturing costs of telephone switching equipment.

Back to Normalcy; Indonesians Told

KUALA LUMPUR, Malaysia (AP) — President Sukarno of Indonesia told his government Monday to "normalize the sit­uation" in the country in the wake of the attempted pro­Communist coup Sept. 30, Ja­karta radio reported.

Whether this was an attempt to hold back the army in its crackdown on the Indonesian Communist party was not clear.

The army, after amassing the coup, has taken over high office of the country and has launched a campaign ap­parently designed to break the back of the Communist party.

About 1,000 Reds have been reported arrested so far.

The broadcast monitored in Singapore said that Su­karno gave his directions to his minister for coordination.

Deadline Near For Motorbike Registration

The deadline for registration of motorbikes is Saturday. After this date, a $3 fine will be assessed those riders who have failed to register.

To date, 1,340 motorcycles have been registered out of an estimated 2,000.

"Because of complaints about the noise motor scooters make," said Joseph P. Zaleski, coordinator and assistant dean, Office of Student General Affairs, "it has been necessary to assign parking places on the periphery of the campus."

The most central of the assigned lots for motorcycles is the old tennis court southwest of the University Center. Other lots provided and marked as being specifically for motorized cycles are located west of the Arena, west of the Agriculture Building, northwest of Wham, and north of University School.

Motorcycles may be parked only in these areas.

An additional space is being constructed in University Park and parking in this area will be regulated.

"It is important for the riders of motorized cycles to realize," Zaleski said, "that they are not granted the same parking privileges as the riders of bicycles."

Ping Pong Exhibition

Lance Lumaden, a member of the SIU tennis team, will give a table tennis exhibition at 8 p.m. Thursday in Dining Room No. 2 of Lentz Hall.
Cycle Increase Attributed to Efficiency and Fun

Obeying Regulations Held Important if 'Bikes' Are to Stay

By John Goodrich

"Why are people so buggy about motorcycles?" Well, one of the best answers to that question comes from Barry Brown, writing in the October issue of Car and Driver. "Because ol' buddy, they take you back to that distant time when driving was fun, when you hopped down the road in a pleasure-boost bubble, gear shift in hand, whistling away the road into hulks of corner, trees and air.

In other words, cycles are just plain fun. They can provide quick and efficient transportation for college students. They're easy to drive, park and keep gas in. Most students would probably consider a car as being a more desirable vehicle to have on campus, but SIU's ban on cars for undergraduates rules this out.

It doesn't take a sharp eye to observe the increase in the number of cycles on campus. It doesn't even take a sharp eye to realize that there are special problems created by the influx of these cycles, as well as advantages to the University community.

Cycles are beginning to dominate the campus's traffic. Drivers and passengers should consider that there are some disadvantages to having so many cycles on campus.

The main advantage in registering is for police use. Should the cycle be stolen, the Police Department will have ample space to search for the vehicle and keep the problem of too many cycles at bay. The revival of the horse—power limit would not solve the problem of too many cycles being going too fast, as some would contend. The advantage of a cycle lies in its maneuverability, but not in the sheer amount of power it can deliver. Underpowered bikes, such as 50 cc models, are dangerous for they often cannot keep up with the normal pace of traffic. It is true that many students have large, powerful bikes capable of outrunning most cars. One student was suspended last year after he took to the fields in his 305 Honda when being chased by the Security Police. The police car got stuck in a ditch when it tried to follow the cycle. The cyclist's license was traced, though, and he was arrested the following day.

Stories like this only aggravate administrative officials, and repeated traffic violations by cyclists, together with rising numbers of accidents and thefts of cycles, may bring about some regulation of them. Motorcycles might be banned from campus, just as cars were. This would be unfortunate, for they have proved useful for many students. To prevent this from happening, student cyclists must be cautious about driving and parking their vehicles. They must know and obey the rules and regulations that apply to them. Otherwise, it will mean extermination of motorcycles.

Modern Dance Club Slates Meeting Tonight

The Modern Dance Club will meet at 7:30 p.m. today in the Women's Gym.

We'll be on campus soon to talk about a new breed of engineering you can't get a degree in.

"RANGE PROFESSIONAL." It's a new discipline of our own creation... a blend of the many technologies required to support our nation's space and missile launchers. When a new grad joins Pan Am at the Eastern Test Range with a degree in electronic, electrical, mechanical, chemical civil or industrial engineering, physics, or math... or even if he's an experienced specialist in telemetry, optics, hydraulic, radar, statistics, infrared, orbital mechanics, data handling, communications or what have you... he soon becomes proficient in many disciplines.

The multiple striking power of this all-around engineer goes a long way in explaining our success with planning, engineering, and directing operation of the Air Force's multimillion-dollar instrumentation complex stretching from Cape Kennedy to the Indian Ocean... and why we're working ahead confidently for launches of MOL, Apollo, Voyager and a host of other sophisticated programs.

Find out more about your potential as a Range Professional when our team visits your campus.

Uniforms Taken to Cleaners; SIU Switches, Then Fights

By Joe Cook

Southern, the home team, wore its road uniforms; Lincoln University, the visiting team, wore its home ones; a Lincoln punt traveled a minus-one-yard, and a defensive player turned out to be the game's leading rusher. These events all occurred at Saturday's football game.

Southern had to wear its white road uniforms, because Lincoln reported its white uniforms had not yet come back from the cleaners.

Southern, which now has lost three games while clothed in road white, will go back to the lucky home maroon jerseys Saturday night against Drake University.

Boyce Smith, who could go down as one of the most inconsistent punters, was guilty of a minus-one-yard punt that led to Southern's only touchdown.

Five of Smith's punts went for more than 50 yards, and two others were of the short variety. Monty Riffer, who started the game as a defensive halfback, was the 'leading' rusher.

Riffer returned to his familiar fullback position when Hill Williams left the game early with an injury. Riffer picked up 99 yards on 23 carries.

... Southern's defensive unit continues to outplay the offensive team.

In four games the defense has given up no more than 14 points a game. The offense scored 23 points in the first game, against State College of Iowa, but hasn't scored more than one touchdown in any game since.

... Northern Illinois University will dedicate its new 22,500-seat stadium Nov. 6 in the homecoming game against Illinois State University.

Northern Illinois is reportedly trying to seek membership in the Mid-American Conference.

Saluki Rivals

Win and Lose

Some of Southern's remaining opponents did well over the weekend, scoring substantial wins, and others were defeated in gridiron contests.

Drake University defeated State College of Iowa 31-7. Tulia, a powerhouse scheduled here for Homecoming, defeated Memphis State 32-28. Another strong opponent, Wichita State, lost 8-6 to Arizona State.

Southwest Missouri State, scheduled to play an afternoon game here Nov. 20, held Pittsburg (Kan.) scoreless in a 13-0 meet. Ball State defeated Akron 16-14. SIU plays Ball State on Nov. 13.

Northern Michigan, scheduled to play a night game here on Parents Day, lost to Central Michigan 15-0.

212 S. Illinois
Southern's football players may be seeing visions of kicking correspondence deadlines through this week after the Salukis' 9-6 loss to Lincoln University. Saturday night in McAndrew Stadium.

The Tigers took the game on a 1-yard field goal in the last 33 seconds. For the second straight weekend, goal-line play was nullified by a one-man holding penalty.

One penalty play in which Lincoln took over, but couldn't move the ball and had to punt. The Salukis' defense forced their 15th and started a long but fruitless drive that ended at Lincoln's 38.

The Salukis thrust deep as third-down passes and a miscommunication left the ball back at the Lincoln 38, where the ball was punted. Once again Lincoln failed to jell, and the Salukis took over at the 43 after a punt.

On second down, fullback Joe Stowe went off left tackle for 13 yards to give Southern a first down at the Tiger's 18. But once again Southern's offense failed to gain momentum, and Lincoln took over on downs short of the end of the first half.

The scoreless first half was dominated by Southern. Lincoln, which Southern picked up 91 yards.

**Intramural Teams**

*Set 16 Contests*

Eight flag football games are scheduled for today and Wednesday, with kickoff starting at 4:15 p.m. The schedule is as follows:

Moore Is Individual Winner
In Double Meet With DePaul

Oscar Moore of the Saluki Track Club was the individual winner in a double dual meet with DePaul University and the SIU varsity Saturday. Moore set a course record with a time of 25 minutes, 7.5 seconds, clocking two and one-half minutes faster than the previous record. DePaul defeated the SIU varsity 23-34, and the DePaul Track Club beat the Saluki Track Club 17-19 at the 5-mile course in Chicago.

Egyptian Poll Shows Students Differ in Opinion About Plan

(Continued from Page 1)

“Let Westminster experiment with the system and then if it works we should use it. SIU has enough experiments as it is,” Thomas L. Fitzgerald, a sophomore from Chicago, said.

Raymond L. Reed, a senior from Nokomis, said, “I leave the system as it is, it’s with added remarks from the instructors."

Toni L. M. Pierandozzi, a junior from Carbondale, agreed, “I leave the system as it is, it’s with added remarks from the instructors.”

In the opinion of Jay S. Kramer, a senior from Evansville, the only one who would benefit from the proposed system are the poor students, because their failing marks would not be recorded.

Giedre B. Poderys, a sophomore from Melrose Park, said, “There are some students who would try to get away with anything. Since there is no motivation, the system will not work.”
