Leaders Given Guidelines

Greek Groups Told Obligation

Is to Lead Integration at SIU

By Tim Ayers

SIU’s fraternities and sororities must provide the moral leadership in the problem of integration, according to the chairman of the commission on Fraternities and Sororities, Donald Robinson.

His remarks were echoed by Randall Nelson, another member of the commission, as the presidents of SIU’s Greek organizations met with the commission and members of the Office of Student Affairs Wednesday night.

Under discussion was the policy guidelines drawn up by the commission relating to the activities and status of the Greek organizations on campus.

The guidelines were submitted to the inter-Greek group for their recommendations. They will this go to President Delyte W. Morris and the Board of Trustees.

The guidelines are divided into various sections dealing with the University administration’s responsibility to the groups; self-government; membership and housing and expansion.

Under the self-government section, the guidelines stated that the scholarship standards of the organizations “shall not be lower than the all-University averages for students in comparable groups.”

If the groups fail to maintain these standards for any two consecutive years or in any two years of any three-year period the groups will be suspended and lose housing privileges, the guidelines say.

The same restrictions were also outlined under the section on integration.

The guidelines said all groups must actively seek members of minority groups. Annual reports on their progress in this matter must be submitted to the Inter-Greek Council and the Office of the Dean of Students.

A joint student and faculty review board “equally constituted and broadly representative of the University” will review the progress of the fraternities and sororities on the matter of grades, and integration. This board will then make “appropriate recommendations to the Office of the Dean of Students” concerning action.

Rushing and pledging procedures will also come under the jurisdiction of this review board, if it is approved.

Under the membership and housing section, the report said “As a general policy all single undergraduate members shall live in their organization’s house.”

Dean Moulton, Dean of Student Affairs, said that reasonable exceptions will be made to this rule.

The guidelines also outlined the procedure for the establishment of more Greek organizations on campus. It said that “If all available housing is fully utilized and unsatisfied demands continue, the University will seek additional housing for Greek organizations.”

Arrested in Mattoon

Two Students Face Narcotics Charges

Two SIU students are among three persons scheduled for arraignment Friday at Charleston on charges of violating federal narcotics laws.

One person was released Wednesday on $5,000 bond but the others are still being held, authorities said.

The trio have been charged with possession of dangerous drugs, violation of the Narcotic Drug Act, and violation of the Hypodermic Syringe Needle Act, a Coles County official said.

The persons charged are Richard J. Green, 18, of Urbana, who was released on bond; Miss Diane C. DeClercq, 20, of Kewanee, and Miss Carolyn M. Ronzani, 25, of Chicago. Green and Miss DeClercq are SIU students and Miss Ronzani is a former student.

The three were arrested by Mattoon police Monday. The women are being held in lieu of $5,000 bond at Coles County jail, police said.

Capt. Carl Kirk, special assistant to the security office at SIU, said officials in Charleston are holding amounts of marijuana and amphetamines as evidence.

Many items on the agenda for the Campus Senate meeting were continued until next week. A controversial proposal by student body president Ray Lenzi that calls for the elimination of University regulations of off-campus housing was not introduced. Lenzi said the proposal was not yet adequately prepared.

A proposal to extend library hours will be considered at the next meeting.

After more than an hour of debate, Jeff Yates was appointed personnel commissioner. His duties will include screening students for positions in student government. Opposition to Yates’ appointment centered around his performance as a selection commissioner last year. Some senators thought he organized elections poorly.

Lenzi told the Senate it has a responsibility to get students involved and thinking about contemporary issues. Towards that end, he suggested that senators be organized to lead dialogues in living areas on such subjects as the Vietnam war, morality and race relations.

The Senate discussed the proposal and generally reacted favorably to it.

Gus Bode
SIU Skydivers Expect Best Year Yet

By Nick Harder

Officials of SIU’s sport parachute club have stated that despite the recent deaths of six skydivers over the past two years, they are looking forward to their best year yet. The club, which is held together by a slim, brown-eyed, 23-year-old girl from Springfield, says she thinks national publicity received by the sport could do nothing but good for the sport in the long run.

"I think the deaths over Lake Erie this past summer said Pat McElroy, a graduate assistant in French at SIU, "Of course that sort of publicity doesn’t sound like it will attract members, but it’s going to get the attention of a lot of people who never considered the sport before."

Miss McElroy was referring to the death of 16 veteran skydivers August 27, who were believed drowned in Lake Erie after they missed their drop zones on land. The Federal Aviation Agency and the Parachute Association (USPA), the only officially认可的skydiving organization, both came under fire from Congress and outraged skydiving enthusiasts who demanded more safety precautions for the sport.

Earlier this week, the National Transportation Safety Board blamed fault for the disaster on an error by a Lake Erie skydiving instructor, Congress and citizen groups, apparently satisfied, dropped most of their protests and seemed content to let the sport go on.

However, SIU’s parachute club officers say it would be "a great mistake if more legislation and greater safety precautions were not taken in national skydiving."

The SIU club’s safety officer, Tom Schapanski, a 27-year-old graduate student from Park Ridge, said he thinks more skydiving enthusiasts in the rest of the country would follow the example of the SIU club. Schapanski, who has more than 2,000 jumps and a national championship to his credit, said the safety precautions followed by SIU jumpers are more than second to none.

"Before we allow a person to even sign-up for the club," said Schapanski, "we have them undergo a thorough physical examination to see if they can stand the training and the actual rigors of jumping."

The physical includes everything from an electrocardiogram to the problem of flat feet, according to Schapanski.

If a prospective member passes the physical, he or she can begin 30 hours of strenuous physical training. If successful, the training concludes with a test of the theory and practice of parachute jumping."

The two safety devices were purchased by the SIU club members for $160 each. Both "safety sentinels" are attached to the second, or reserve chute. One, of them, located on the front of the reserve chute is set off by an explosive charge. The other device is spring loaded and attached to the back of the chute. Schapanski said that both devices are "guaranteed to open the reserve chute" if anything on the regular chute should malfunction.

Violation of any of the SIU sport parachute club regulations results in an immediate monetary fine and loss of club membership, but it’s going to be very rare that anyone would miss out on the opportunities that make the SIU club unique.

"We also require everyone to be a USPA member," said the club’s safety officer, "Anyone..." a fact about a member, a chief to another, which the club lays down, said Schapanski, "membership includes the requirement of life insurance, liability and property damage coverage from a reputable company." "Another of the club’s unique membership requirements is the mandatory use of automatic chute opening devices, Schapanski explained, that each member of the club must use the automatic devices during the first few dozen jumps.

An era of permittiveness climaxed, and now comes the most significant cinematic advancement in 16 years. 1, A woman.

Sixteen years ago began an era of growing permittiveness in the cinema. The moral attitudes of American moviegoers drastically changed. Greatly responsible for this was the adoption of New Wave foreign films. Films from countries not bound by rigid moral codes introduced daring themes. They revealed acutal natures of unacquainted and were unprecedented for explicitness.

This was the era of the "art" film. It was epitomized by Bardot, Bergman and the Beat Generation. Filmmakers attempted to entertain and enlighten the mature adult.

But this era has climaxed. Americans have adopted a commonplace attitude toward the films of yester-year.

MOST SIGNIFICANT ADVANCEMENT

Now 16 years later, comes a film so significantly advanced that it will make obsolete the adult films before it. The title of it is "A Woman."

"I, A Woman" is a passionate love story encompassing a theme heretofore unthinkable on the screen. And it is executed with incalculable candor and frankness.

Two of the world’s most permittive countries, Sweden and Denmark, have considered the talents to produce a film that shows life as it is, and nothing more.

"I, A Woman" breaks through the false conventions and taboos of filmmaking in the past, and comes up to the standards of the present. It is a film for today’s mature adult.

It took 16 years for the cinema to mature. Finally a film has been made to enrich the senses and gratification, with honesty and with pleasure.

$1.00 OFF on all $2.50, $3.00 and $3.50 tickets for performances on Wed., Oct. 4 & Thurs., Oct. 5. Get Tickets at UNIVERSITY CENTER INFORMATION DESK

VARSITY LATE SHOW

"MONDO PAZZO" STARTS WHERE "MONDO CAME" LEFT OFF!

"Mondo Pazzo" starts where "Mondo Came" left off. The two safety devices were purchased by the SIU club members for $160 each. Both "safety sentinels" are attached to the second, or reserve chute. One of them, located on the front of the reserve chute is set off by an explosive charge. The other device is spring loaded and attached to the back of the chute. Schapanski said that both devices are "guaranteed to open the reserve chute" if anything on the regular chute should malfunction.

How will the Lake Erie skydiving disaster affect skydiving at SIU? Karl Schiller, a 27-year-old graduate student at SIU and father of a 1 1/2-year old girl, made his first parachute jump the same day of the disaster.

"I’ve only made one other jump since then," said Schiller, "But I didn’t even think about death or dying, or any of that rot."

“My second jump was just before the planes went down and it was so beautiful, Everything was quiet and still as I started floating down to earth. The sky was all golden and blue, I felt very close to nature, then. I guess that’s why I jump."
Humorist, Dog Class Scheduled

Orders for the 1967-68 O'Brien, humorist, will be taken from 9 a.m. to 5 p.m. in Room A of the University Center. The Christian Science Organization will meet at 9 a.m. in Room C of the University Center.

Southern Players will sell tickets from 8 a.m. to 5 p.m. in Room B of the University Center.

The Daily Egyptian, a campus newspaper, will hold a meeting at noon in Room H of the University Center. The Kennel Club will hold a Dog Obedience Class at 7 p.m. in Room B of the University Center.

Scots Girls' Choir On FM Radio Today

Folk music from the Island of Skye and a serenade by the high school girls choir of Ayr will be heard on WSIU-FM. The last of the series "Among the Scots," this program may be heard at 8:00 p.m. on WSIU-FM.

Register for a course in the Indian craft of weaving with pine needles will be held at 1 p.m. Oct. 10 at the Federal housing meeting hall in Benton. The course is offered by the SIU Division of Technical and Adult Education. Two classes, one to meet in the afternoon and the other to meet in the evening, will meet once a week for 10 weeks.

Weaving Course Registration Set

Registration for a course in the Indian craft of weaving with pine needles will be held at 1 p.m. Oct. 10 at the Federal housing meeting hall in Benton. The course is offered by the SIU Division of Technical and Adult Education. Two classes, one to meet in the afternoon and the other to meet in the evening, will meet once a week for 10 weeks.

Dr. Ehrlich's Magic Bullet: To Fire Across WSIU-TV

Edward G. Robinson will star in the movie "Dr. Ehrlich's Magic Bullet", the story of the physician who discovered the first cure for venereal disease at 9:30 tonight on WSIU-TV, Channel 8.

Other Programs:

4:30 p.m.: What's New: "Viller Valley"
5:30 p.m.: Underway for Peace: "Dash"
6:30 p.m.: Biography: Princess Margaret of Great Britain.
8 p.m.: Passport 8: Island in the Sun, "Mountain in the Sea."
8:30 p.m.: Twentieth Century: The Battle of Norway.
Sucker's the Patron

Few things can anger a person, even one from Illinois, more than calling him a "sucker."

A housewife called last week and said she had just paid 35 cents for two cans of lemonade which had only cost her 25 cents for two cans the week before.

She was very polite and calm about the whole matter, but at the same time she wanted one price increase to be indicative of increases of all food prices.

Our reporter was startled too and called the grocer and explained the question to him.

The manager of the large national chain store said there was a price increase for lemonade in the store. It was only juice price which had increased. He then invited the visitor to view the store and examine Carbondale lists which he received from St. Louis before and after school started.

The lady was absolutely correct—there was a mistake.

One day after the conversation with the grocer a letter was received from him. He enclosed retail price correction which he received from St. Louis.

It said, "Frozen Lemonade, 6 oz., should be corrected to read 3 for 35 cents."

The previous listing showed that the mark-ers were to stamp the cans 2 for 35 cents.

The caller said she really became con-

The news that we are probably going to build an Anti-Chinese Ballistic Missile system (A-CBM) has caused some questions to arise in the public mind, such as:

"What the hell's an Anti-Chinese

Ballistic Missile?">

This is a good question. The answer, of course, is that an Anti-Chinese Ballistic Missile is not an Anti-Russian Ballistic Missile. And we hope that everyone, particularly the Russians, will understand this clearly-drawn distinction.

This is crucial because Secretary McNamara doesn't want to build an expensive Anti-Russian Ballistic Missile system. The Russians, he says, would simply build more Russian Ballistic Missiles, then build an even more exotic, which would make them build more Russian Missiles, which would in turn make it all end well. We do, dont' we.

So this firm stand makes sense.

Unfortunately, we have a lot of generals and such who are just crazy to have an Anti-Ballistic Missile factori-

es from the school housing office have been questioned.

Therefore, undesirable apartments have been approved without proper consideration and the attention deserved.

Now that the University has become aware of this problem by those students who were induced to such living conditions, plans should be undertaken to completely eliminate them.

Surely the housing office can find time to be with the matter.

Something should be done if we as citi-

zens are looking forward to living in a bet-

ter community. And to achieve this, an improvement of public health conditions must be made. Let's hope McNamara doesn't have to look to the "Rat Control Bill" for help.

By Arthur Hoppe

Mr. Secretary? But . . .

and a lounge. Established in 1952, VTI has been using World War II-era buildings of the Illinois Ordinance Plant administration complex. Transfer to SIU of title to the 150-acre plot by the General Services Administration permitted construction of the first permanent structure.

Many other areas lack sidewalks and present equally hazardous situations, Nelson said, and he asked for immediate action on them, even if it would mean calling for a bond issue or a special assessment to provide funds for sidewalk improvements.

During Tuesday night’s meeting, the council was informed that city police will begin using radar on a trial basis next week. Safety Director Richard Wilhelmy told the council that the radar unit would be used primarily for traffic surveys, speed violations caught by the radar car will be given warning tickets, he said.

Wilhelmy said he hopes the trial use of radar will show the council justification for purchase of a unit.

The radar unit Wilhelmy plans to use during the trial period will be either borrowed from a neighboring municipality or from a firm which manufactures radar equipment.

Wilhelmy also reported to the council that his department and Jackson County authorities are negotiating a contract for Carbondale’s use of county jail facilities.

Carbondale is presently using the county jail until its antiquated hovels in the northwestern ward. 

Wilhelmy said the contract would probably call for Carbondale to pay the county $1,500 for booking a prisoner and an additional $1,500 daily for each inmate’s living expenses.

Some business conducted Tuesday night, the council approved the appointment of John H. Thomas as city treasurer. Thomas succeeds Orwin Pugh who resigned to accept a position as assistant to city attorney George Fleerlage.

A council also approved the appointment of Mrs. Stanley E. Harris to the Community Conservation Board. Mrs. Harris fills a left vacant seat by the resignation of the Rev. Charles Howe.

The council also approved the purchase of a unit. which manufactures radar equipment. Wilhelmy said that the unit would be used primarily for traffic surveys, and that speed violations caught by the radar would be given warning tickets.

RICHARD PRYOR

Rivers, Ian-Sylvia, Pryor

3 Acts Billed for Homecoming Show

Final contracts have been signed for this year's annual Homecoming Show Oct. 27. Three acts share top billing this year: Johnny Rivers, Ian and Sylvia and Richard Pryor.

The show will be at 8 p.m. at the Arena. Tickets will go on sale later at the Information Desk in the University Center.

Johnny Rivers has sold over 20 million records and is ranked as one of the most popular and consistent male recording artists in the country.

Ian Tyson and Sylvia Frick-er's have gained prominence on the television show Hootenanny and the Bell Telephone Hour. Their repertoire includes English and American classic ballads, mountain music, Negro blues, cowboy ballads and French Canadian material.

Richard Pryor has been the featured comedian on both the Ed Sullivan show and the Merv Griffin show. He writes all his own material, some of which draws on his experience of growing up in Peoria. On a recent television show, he also did a skit on Southern Illinois.

Johnny Rivers' interests have changed lately from the artistic to the business end of entertainment. He recently signed a new long-term contract with Imperial Records, division of Liberty Records, formed his own publishing company, and started Soul City Records. He also spent some time entertaining troops in Viet Nam.

Besides concert tours, Ian and Sylvia have done dramatic roles on the Canadian television network and many nightclub engagements. They have been noted for their research in the folk music field as well as their performances.

Besides being a stand-up comedian, Richard Pryor also sings, dances and plays several instruments. He received his early show business experience at the popular Door in Peoria, where he was a "sit in" drummer. At Central High School in Peoria he earned varsity letters in football and basketball and was voted the "class bad guy."

Glen E. Wills

Assistant Dean Named For Adult Education

Glen E. Wills, associate professor and director of Adult education at SIU, was named assistant dean of the Division of Technical and Adult Education Sept. 22 by the University Board of Trustees.

Wills, 42, joined the Division in 1959 as a supervisor of adult education. He is a native of Shelbyville, Ky., and received his bachelor's, master's and doctoral degrees from the University of Kentucky at Lexington. He is a past president of the Illinois Adult Education Association.

Wills directs an adult education program in which more than 10,000 adults are enrolled each year in communities throughout southern Illinois and in major conferences and short courses on the Carbondale campus.

Thomas W. Dardis, 25, who has served with the division since last March as an assistant in adult education, was named coordinator of adult education by the Board. He formerly served as assistant director at the Thompson Point residence halls.

A native of Davenport, la., he was graduated from Iowa State University at Ames with the bachelor of science degree in industrial administration in 1964. He received his master of science degree in education from SIU this month.

The Board also named six persons to serve term appointments of varying lengths as assistants in adult education at the Manpower Training Center operated by the Division in East St. Louis under a federal Manpower Development and Training Act contract.

Those are Donald J. Buynak, Matthew C. Burroughs, Mrs. Ruth K. Miller, Silvia A. Nimius, Titus Lee Tolson, and Betty Louise Kurkjian.

Safety Education Conference To Discuss New Cycle Laws

SIU will host a safety education conference on Monday, October 2. Students and driver education instructors from 17 Southern Illinois counties will hear discussions on new state motorcycle laws, see a demonstration of a dual-control motorcycle, and learn about safety procedures for operating motor vehicles.

Keynoting the conference will be Harold Holmes, director of the National Safety Council's driver education program service. Also participating will be James Aar-ron, head of the SIU Safety Center, and George Mathis and William Whitlock of the driver education department of the State Office of Public Instruction.

Meetings will be held in the newly-equipped Safety Education Center and in the Univer-sity Center.

Canadian Minister Urges U.S. to Halt Bombing

UNITED NATIONS, N.Y. (AP) — Canadian Foreign Secretary Paul Martin told the 122-nation assembly here yesterday that a halt in the U.S. bombing of North Vietnam was “one side of the military equation.”

“We cannot proceed, if we are to have any hope of success,” he said, “if the other side did not exist.”

He pledged Canada’s continued efforts through the International Control Commission on Indochina-India and Poland are the other commission members—to help “to lead the parties to the conflict in Vietnam to the conference table and to assist in every way to achieve the establishment of an equitable peace in Vietnam.”

In another speech to the Assembly, Argentine Foreign Minister Nicanor Costa Mendes called for active U.N. participation in the search for peace in Southeast Asia.

“It is unreasonable,” he said, “to contend that the international organization, could remain alien to such an obvious case of a breach of both peace and security.”

Both Canada and Argentina are members of the U.N. Security Council, which discussed the Vietnam war without result in early 1966. Soviet and French opposition blocked any constructive council action.

FLOOD RESCUE—A U.S. Coast Guardman rescues a child from a Mexican village during massive evacuations in the wake of Rio Grande floods. Residents in the area of the river face another week of floods.

Differences Multiplying Over Conduct of War

WASHINGTON (AP) — Military-civilian differences over North Vietnam bombing flared today as the war problem drew critical discussion at the United Nations and at the United Nations.

The controversy revolved around the following points:

--Secretary of Defense Robert S. McNamara reiterated his stand against attacking the Communist port of Haiphong, mentioning a four-point formula for Vietnam said: "A risk I don’t believe we should undertake at this time.

--Newly released congressional testimony placed Sen. George Willard, chairman of the Joint Chiefs of Staff, at odds with the administration’s decision making Haiphong a sanctuary from U.S. bombers.

--Republican Sen. Thurston B. Morton of Kentucky, speaking to the Business Executives Move for Vietnam, charged that President Johnson is "brainwashed" by U.S. military and civilian leaders into believing a military solution is possible in Vietnam.

Rusk Pledges to Meet Anywhere for Talks

NEW YORK (AP) — Secretary of State Dean Rusk yesterday challenged North Vietnam Wednesday to meet American peace overtures and pledged he would go anywhere in the world for talks.

"We shall not stand on ceremony or worry about saving face,“ he said, "not in the American Banker’s Association. "It’s no question of saving face, it’s no question of saving South Vietnam.”

Rusk also said those calling for a halt to bombing of North Vietnam should insist Hanoi stop aggression in the south.

He said he found it "hard to understand how one side can stop a war.”

What is being tested in Vietnam, he said, is American commitment to the talks, and any agreement dating back to 1955 pledging American support for Southeast Asia, the secretary said: "If those who would become our adversaries ever should suppose that our treaties are a bluff, we would have a war and a big war.”

In its search for peace in that area, the United States acts on pre-conditions and "will talk directly or through intermediaries," Rusk said.

If Hanoi would produce a real live North Vietnamese somewhere in the world for one to talk to, I would be happy.”

9-19-67
WASHINGTON (AP) -- A deficit-conscious House voted in effect Wednesday to force President Johnson to cut military spending by $5 billion during the fiscal year ending June 30.

By roll call vote of 202 to 193, Appropriations Committee Chairman Wilbur Mills of Arkansas, moving a routine resolution to provide money during October for federal agencies, the House voted to cut $5 billion from the $8 billion the administration had requested for the month-by-month base for the fiscal year ending June 30.

The House acted after being told that the purpose of the move was to give the president a chance to reconsider an earlier action ordering the President to make a cut of $2 billion from the fiscal year's $10 billion military spending.

These are agencies whose annual money bills have not been cleared by Congress. They have been financed on a month-by-month basis since July 1.

The House Ways and Means Committee has postponed consideration of the President's request for a tax increase until there is assurance that there will be sharp reductions. The administration has claimed it can pin-point areas for cuts only after the appropriations bills have been enacted, since much of the spending depends on how much money Congress provides.

Only four of an estimated 17 money bills have cleared Congress. Many are in the compromise stage and three have not started through Congress.
DEFINITELY A MULBERRY—Neil Hosley, forestry instructor, shows a tree leaf to students on a field exercise Monday in Thompson Woods. Cool fall weather has started coloring the woods area, adding to campus beauty.

**Powell Scholarship Gets $11,756 Gift**

A contribution of $11,756 has been donated by friends of the late Mrs. Diety Powell, wife of Secretary of State Paul Powell, for memorial scholarships. The Southern State Legislators Honor Turnbow With Resolution

Jesse W. Turnbow, who retired October 1 as Illinois man between SIU and the Illinois Legislature, has received resolutions of commendation from both the Senate and the House.

For 10 years Turnbow has attended sessions of the Legislature where, according to Senate Resolution No. 163, he has been an invaluable source of information and liaison to the members of the General Assembly regarding educational matters.

Turnbow, a veteran of World War I and a graduate of Green ville College, will continue to work half time for SIU as a field representative for the Extension Division.

**Philosopher Gives Talk on Suicide**

Paul Arthur Schilpp, visiting professor of philosophy, will speak at 8:30 p.m. Sunday at the Student Christian Foundation on "The Phenomenon of Suicide."

After his introductory remarks, Schilpp will open the meeting to questions and discussions.

The public is invited to hear Schilpp and to attend a supper at the Student Christian Foundation immediately preceding his talk at 6 p.m. Cost of the dinner is $5.

Schilpp was presented the degree of doctor of humane letters at Springfield College.

Audio visual programs are widely used in American classrooms today. Many of these programs are taped on college campuses. WSHU-TV currently is producing a series for fifth grade social studies students entitled "Wonder Why." The producer and director is Albert Abady and the teacher is Cecelia Muckelroy, Jonesboro. The program is being produced for Southern Illinois Instructional Television Association and, hopefully, it will soon be distributed nationally. Oh, yes, the puppet's name is "Beppo."

Excellent Illinois Crop Yields May Present Storage Problems

Excellent crop yields at the SIU Experimental Farm and in other parts of the state may present problems in storage and transportation this year.

The Illinois Department of Agriculture has announced there could be a serious shortage of railroad grain cars to move the record corn and soybean crop this fall.

Farmers and elevator operators are being alerted to make plans to move grain in an orderly manner into the market channels.

The SIU Farms have had an excellent year in corn and hay, according to William Doerr, superintendent of the farms.

Fine Arts Offering Winter Advertisment

Pre-registration appointments are now available for students from the Department of Fine Arts.

Art students should make appointments with Mrs. Sue Hill and music and design students should arrange to see Charles Taylor.

Dean Elmer Clark To Speak Oct. 5

Elmer J. Clark, Dean of the College of Education, will be the principal speaker at this year’s first meeting of the Association for Childhood Education. The meeting will be held Thursday, Oct 5 at 3:30 p.m. in the Kindergarten room of University School.

All students and faculty interested in teaching kindergarten through eighth grade are invited to attend.

A special invitation is extended to the Pennsylvania Institution members interested in education.

Journalists Due From 60 Schools

Yearbook and newspaper advisers and editors from 60 Southern Illinois high schools are expected Saturday for the 13th annual Editor-Adviser Fall Workshop at SIU.

The workshop, sponsored by the Southern Illinois School Press Association and the SIU Department of Journalism, will be held from 9 a.m. to 5 p.m. in the Agriculture Building.

Editors and advisers from the Southern Illinois area and neighboring schools in Kentucky, Missouri and Indiana have been invited. Sessions also have been planned for advisers only.

W. Marion Rice of the SIU Journalism Department will direct the workshop.

Soil Fertility Lecture Planned

S. MacCallum King, supervisor of fertilizer use and research for the International Mineral and Chemical Corporation, will ‘discuss the industrial aspects of fertilizer use and research at the Monday session of a soil fertility class at SIU.

The class, taught by Joseph F. Vavra, SIU professor of plant industries, will meet at 3 p.m. in Room 155, Agriculture Building. The session will be open to all interested visitors, Vavra said.

Lincoln Coach Bemoans Team's Sad Showing

By Charles Springer

"Terrible!" said Coach Bemoans, "I'm afraid that was all Lincoln University coach Dwight Reed needed to describe his team's performance in the opener. The Lions lost to SIU in a 1:30 p.m. encounter here Saturday.

Quarterback With Sound Legs Needed by Southern Methodist

DALLAS, Tex. (AP) --- Just hint that you once played a down at quarterback and you'll be on the Southern Methodist University football team with an outside chance to start. Reed has braced in a matter of seconds.

Quarterbacks with sound legs are what Coach Hayden Fry needs most as he thinks back a week, recalls all the fays and flurry his team and sub quarterback, Ines Perez, caused in the 20-17 victory over Texas A&M on Saturday.

Then he compares it with this week when the aftermath of the game was bracing. "It's a thing by itself. So I'm trying to think of the way to get the winning streak going by itself.

Kim Hammond Sets College Offense Pace

NEW YORK (AP) --- K. M. Hammond, the Florida State quarterback who rolled up an astonishing 28-yard passing and rushing against Alabama's usually air-tight defense, is pacing the nation's major colleges in passing and total offense.

The 6-foot-1 senior from Melbourne, Fla., stunned the formidable Alabama football team by completing 23 of 40 passes for 280 yards and three touchdowns in the shocking 37-31 tying Saturday night.

In two games, Hammond has amassed 470 yards in passing offense. He leads the passers, with 38 of 69 for 550, 407 yards, and five touchdowns.

Competitions determine the leaders said the National Collegiate Athletics Sportswriters. The leaders are the national college players, leading the nation's four-month season to the official statistics Tuesday.

MacArthur Lane of Utah State holds the passing lead with 352 yards in two games. Jim Casper of Nebraska and Jim Casper and Mary is first in pass receiving with 19 grabs for 214 yards in three games.

Ken Jukowski, a soccer-style boomer from West Virginia, is among the passers with 28 points in three games on six field goals in seven tries and one punt return for 103 yards. Jukowski, who gave up soccer after suffering two broken ankles, is the first passer ever to lead the major college scoring race with only kickng points.

Sailing Club to Meet

A meeting of the SIU Sailing Club is scheduled for 9 a.m. Monday in room 120 of the Home Economics Building. The meeting is open to all students interested in joining.

Wanted to sell motorcycles. Girls Dormitory, 400 S. Graham, contact Dormitory center, phone 457-2650.

Two vacancies for male students in four bedroom house. Cooking privileges. Approved housing. Phone 549-2330.

Two room approved housing for boys, 11 W. H. Murphy, 3-749-2313.

Sleeping room, private home, girl preferred. Call 457-6326.
Athletics Sweep 2 From White Sox

KANSAS CITY (AP) — Last-place Kansas City's chances of moving into the American League lead Wednesday when the White Sox skidded instead into fourth place by sweeping a two-night opener.

Former Minnesotan Don Mincher led the assault on the five-hit pitching of three games with a 1-5.

MINNEAPOLIS-ST. PAUL (AP) — California threw a major dent into Minnesota's pitching staff, Gary Peters and Joel Horlen, both of whom lost. The Twins beat Red and White Sox ten runs to five singles for a 5-1. The standings now look like this: The Twins lead both Boston sweeps or splits its two games with the White Sox, by one game.

The White Sox are a game and one-half back of the Twins. This means that the best White Sox can finish in a tie for the American Pennant.

Detroit can win the pennant only if it wins each of its remaining four games and Boston sweeps or splits its two games with the Twins this week.

Boston can win only if it sweeps the two games with the Twins, Detroit splits its remaining games, and the White Sox lose one of their remaining three games.

The Twins can win outright if they sweep the two games with Boston, and Detroit loses one of its remaining games.

Twins Ace Beaten by Angels, 5-2

MINNEAPOLIS-ST. PAUL (AP) — California threw a major dent into Minnesota's pennant hopes Wednesday, lashing into 20-game winner Dean Chance for four runs in the fourth inning to whip the Twins, 5-1.

San Diego Gal Dispels Dorm Housemother Image

By Judith Morgan
Copley News Service

Do you remember housemothers?
You know—those kindly, white-haired ladies with rimless glasses, who used to fight to stay awake at night so they could kick the boys out of the girls' dormitory lounges and lock the door? And they wore sturdy shoes, usually, and were whizs at canasta?

There are no such guardians on the campus of the University of California at San Diego. Instead there are resident deans—such as Mrs. Ann Conklin, 25.

Ann has short, honey-blonde hair and clear green eyes. Her shoes are fashionable and she prefers skiing in Sun Valley to a game of cards. Ann's life is a curious mixture of the Jefferson Airplane and a two-seat Cessna 150.

She and her husband, Brody, live on UCSD's Revelle College campus. Their apartment is a center for students with problems, questions, or records to be played.

But those sounds like the Jefferson Airplane and the Fifth Dimension have to be brought in.

"The students have to bring the records they like—we don't have many of them," Ann said as she worked on room assignments for the fall term. "In fact, we don't quite swing it. I'm afraid. Neither Brody nor I got past the twist—and that took us long enough. We go to the student dances but we mainly observe."

The Cessna in her life is the small aircraft she is learning to fly. Ann began lessons last September and soloed in December.

"I've flown 26 hours," she said. "My next hurdle is the solo cross-country flight, which I hope to do soon."

Each Saturday Ann dons slacks and heads for her flying lesson.

"The flying was her husband's idea, Ann says, but since the first time up in the Cessna she has been enthusiastic.

The Conklins' big dream is to own their own plane and be able to fly quickly to good skiing areas.

Brody is a Navy pilot who flies antisubmarine aircraft. He will fly missions in the Western Pacific from the carrier Yorktown in December.

Ann was graduated from Iowa State University with a major in English in 1963. She taught high in Denver one year, then returned to Ohio State University for her master's degree in student personnel and administration.

And she and Brody were married in May 1966, and he was ordered to San Diego, Calif., last summer.

"It was July and I had no job, so I just stumbled into the dean of students' office and was lucky they were setting up the residence dean program," Ann said.

Ann is overseer this school year for 875 students. She is assisted by 13 resident advisers (graduate students or juniors and seniors) who also will live in the dormitories.

Ann is the link between students and the housing office; students and the administration; students and just about anything. She is the representative of the dean's office on location.

When she smiles—which is often—her deep dimples show and she looks younger than many of her charges. Age—or the lack of it—is not a problem in her position, she said.

"Maybe some of the parents wonder about a younger person in this job," Ann said, "but it's not a disadvantage with the students. They seem more willing to talk to me than to an older person. They know I don't have all the answers but they ask questions and we talk things over."

And how does Brody like sharing his apartment with almost 1000 students?

"He really finds it interesting," Ann said, "and, of course he loves free room and board."

"Seriously, he talks to the students about flying and his job."

HIGH FLYER—Ann Conklin, pictured with her husband, is a new generation of resident deans at the University of California. She is learning how to fly. (CNS Photo)

Agricultural Industries Department
To Feature Noted Food Specialist

Wayne Bitting, food specialist for the U.S. Department of Agriculture, will be the speaker at a Thursday, Oct. 5, seminar sponsored by the SIU Department of Agricultural Industries.

Bitting will discuss the use of cost-benefit ratios in allocating research funds during the meeting which will begin at 3 p.m. in the Seminar Room of the Agriculture Building.

REMEMBER!
Deadline for participation In Student Health Insurance Program is September 28.

Industrial Growth, Cars Spreading Blanket of Smog in Parts of Mexico

By John Pinkerman
Copley News Service

MEXICO CITY—This city's lofty perch 7,340 feet above sea level gives it several advantages but it does not eliminate one problem that plagues big cities of the United States. The problem—a growing one—is smog.

A visitor viewing the city from his hotel room in the morning might think he is in New York or Los Angeles. The telltale yellow haze appears nearly every day, particularly in the northern parts of Mexico City, where the greatest industrial growth has taken place.

Scientists of the National University Geological Institute and the Nuclear Energy Commission blame both automobile engines and oil refineries in Mexico City, where the greatest industrial growth has taken place. The problem differs from smog and that only some of the cars are old and smokeless.

There are no smog control devices on autos and no pollution control on industry.

The areas that suffer the most are the heart of the city and the highly industrial areas to the north—Villa de Guadalupe, Portales and Azcapotzalco. It is in these areas that there has been the greatest industrial and housing development. There are auto assembly plants, an oil refinery, steel mills and 390 new factories of various categories in Villa de Guadalupe alone.

Farms and low population density to the south help keep air pollution at a low level in that area.

Newspapers here are demanding action to reduce air pollution. The Mexico City Daily News, in a tongue-in-cheek editorial on the subject, gave thanks for a recent national holiday in that it closed down factories and sent thousands of autos scurrying out of the city for the long weekend.

"There is only one blanket solution to the smog problem," the Daily News editorial said, "and that is a changeover from fossil fuels to electricity and the atom. And, nuclear cars might be developed someday, when man's future looks so smoggy he can't take it."

Computers Help Select

Oklahoma Restaurant Sites

By Katherine Hatch
Copley News Service

OKLAHOMA CITY, Okla.—A computer is telling prospective restaurant operators in the United States and Canada what kind of business they will have.

To date, 95 per cent accuracy is being claimed by this computer program, believed the first of its kind, set up by the Oklahoma Restaurant Association and the University of Oklahoma's bureau of business research in nearby Norman.

"There is no new about evaluating the site of a proposed restaurant," Justin Hill, ORA executive director, said.

"But using a computer to evaluate a site, and the degree of accuracy we've had so far, opens up the possibility of having other types of business sites evaluated by computer," he noted.

Last November, the site evaluation program was begun with the business research bureau's own statistics and detailed information from 36 established restaurants. This figure later was boosted to 100.

Five types of food service operations were profiled for the computer: general restaurants, drive-ins, cafeterias, specialties (Mexican, Chinese and pizza parlors), and hamburgers.

A six-highway location recently has been added as a new category.

"The computer has evaluated within five per cent, more or less, the actual sales realized by restaurants," Hill said. "We have determined this through exhaustive follow-up studies after a place opens on the site the computer evaluated."

A questionnaire covering the computer which then predicted the dollar-volume of business.

This has been done, thus far, with 99 per cent accuracy for specialty restaurants; 98 per cent accuracy for cafes, 91 per cent accuracy on drive-ins; 91 per cent accuracy for hamburger houses and 77 per cent accuracy in general restaurants.

Hill said 'several hundred' prospective restaurant owners in the U.S. and Canada have used the ORA-business research bureau computer program through their local restaurant associations.

But there is a limit. The computer cannot predict accurately for the East Coast and West Coast because 'the population there is unlike any place else in the country,' Hill explained.

The national government is doing some experimenting with smog control devices for cars but none has been adopted and any firm action to curb smog seems in the distant future.

The National University Geological Institute, in a recent report, stated that only 35 per cent of the city suffers from smog and that only another 15 per cent appeared to be in danger of becoming a smog belt. The remaining 50 per cent would have no air pollution problem, the report said.

The areas that suffer the most are the heart of the city and the highly industrial areas to the north—Villa de Guadalupe, Portales and Azcapotzalco. It is in these areas that there has been the greatest industrial and housing development. There are auto assembly plants, an oil refinery, steel mills and 390 new factories of various categories in Villa de Guadalupe alone.

Farms and low population density to the south help keep air pollution at a low level in that area.

A British Psychologist Says

Weddings Rituals of Past

LONDON (AP) - Engagement rings are doomed. White weddings will be rituals of the past. Couples will wed only after they've lived together. Who says all this? Psychologist James Hemming, author of "Marriage Guidance," official publication of Britain's Marriage Guidance Council.

Most British cities have state-supported marriage guidance councils where citizens may go for advice on marriage and marital problems.

If Dr. Hemming is right, the word marriage itself could become obsolete, replaced by the expression "pair-bound."

Dr. Hemming says that to the next generation marriage will no longer be regarded as the only respectable way of having any sexual life.

"Social emphasis will not be on maintaining chastity at all costs," he contends.

Instead, couples will concentrate on "each other's, mutual concern and responsible mate selection.

He does not prophesy that marriage will go completely out of style.

He says marriage will become "a social statement of intent, if and when partners desire it."

Senator Wants

Label on Booze

WASHINGTON (AP) -Sen. Strom Thurmond, R-S.C., a nondrinker and nonsmoker, is inviting the 99 other senators to co-sponsor his bill to require a health label on alcoholic beverages.

Thurmond said he will introduce the bill in the Senate on Tuesday.

He would put a label on beverage bottles containing more than 0.5 percent alcohol by volume. The label would read:

"Caution: Consumption of alcoholic beverages may be hazardous to your health and may be habit-forming."

Hemming said the hazards posed to the health and welfare of individuals who consume alcoholic beverages are equally as serious, if not more so, than those which derive from smoking cigarettes.

Japanese Take a Dim View of Visits

By U.S. Nuclear Powered Warships

By Elson E. Irwin

Tokyo—a rather large vocal segment of the Japanese people has taken a dim view of a recent U.S. decision that more nuclear-powered warships are to be sent to Japan's ports soon.

Beginning with the arrival of the nuclear submarine Sea Dragon three years ago, no fewer than 18 visits by nuclear-powered vessels have been recorded.

The Japanese view the recent announcement as an "open door" to visits by the nuclear-powered cruiser Long Beach and the nuclear frigate Bainbridge, both attached to the U.S. 7th Fleet. They also see the day when the United States will bring nuclear armanent into Japan.

All of the opposition parties in Japan, notably the Socialists, have had a hand in preparing demonstrations against U.S. nuclear vessels. Every postwar Japanese prime minister has taken a firm stand against allowing nuclear armaments to be brought in.

Some Japanese officials believe this may go by the boards in the bargaining for the returns of Okinawa to Japan. They see the need for nuclear armament as a bulwark against aggression by the United States and China in postwar Japan.

Hemming reveals the word marriage may be on the way out. This was done as a bit of a joke intended for me alone, and by accident; it was seen by the printers as part of the book.

This coupon, plus just $2.00, will thank Mom and Dad five days a week.
Stone Graves Attract Dutch Visitors

ASSEN, Holland (CNS)--Huge stone graves reputed to have been built by a primitive race of giants are a major attraction in the area around this northern Holland township of 40,000.

The Dutch name for these boulders is "lunbedden," meaning giants' tombs. They are found in large numbers all over the province of Drenthe, a sparsely populated region sometimes called Holland's "wonderland province."

Farmhouses, neat and tidy in the Dutch fashion, are dotted over this northeast corner of The Netherlands, once a vast swamp and now a rural land of wide moors.

According to scientists, the boulders were brought here by Ice Age glaciers from Scandinavia thousands of years ago. They were buried by sand until primitive inhabitants of the Low Countries unearthed them and decided they would be ready-made monuments for their graves.

The tombs around Assen give historians an intriguing picture of how the early prehistoric dwellers lived. Stone axes, spearheads and household utensils have been dug up over the years.

Such artifacts are on exhibit at the Asen Museum. They range from primitive weapons and implements to amber beads said to have come from Egypt.

House Committee Okays Senate Pollution Measure

By CARL P. LEUBSDORF

WASHINGTON (AP)--Senate passed legislation to expand the federal government's authority to act against air pollution, especially in emergency situations, has won bipartisan approval from the House Commerce Committee.

With only one dissent--and that reportedly on procedural rather than substantive grounds--the committee sent on for action by the House, expected in about two weeks, the three-year, $428.3-million measure.

Most of the provisions are similar to the Senate measure, but the House group cut out additional research funds added by the Senate Public Works Committee, which would have swollen the three-year cost of the measure to $700 million. The authorizations in the House bill, which follow administration recommendations, include an extra $33 million on top of $66 million already authorized for this year, $145 million for fiscal 1969 and $184.3 million for fiscal 1970.

Like the Senate measure, the bill rejects President Johnson's proposal for national emission standards of pollutants but authorizes a two-year study of the health benefits, economic impact and costs of such regulations.

Both bills would authorize the secretary of welfare to go to court immediately if he finds that a particular source of pollution presents an "imminent and substantial endangerment to the health of persons." Federal courts would be empowered to enjoin the alleged pollution by stopping emission of contaminants or by whatever other action is necessary.

The bill adopts Senate provisions to authorize setting up of air quality regions to control pollution but requires this to be done within 18 months of enactment of the legislation.
