Four-state strike by iron workers halts construction

Work on Phase II of SIU’s new Physical Sciences Building was halted Monday in the wake of a regional iron workers’ strike affecting four states.

Local 782 of the Iron Workers Union, which has jurisdiction in 11 counties of Southern Illinois, ordered the strike after contract negotiations failed late Sunday.

The only other construction project on campus employing steel workers, Phase II of the Life Sciences Building, was not affected by the strike.

According to William H. Hart, campus architect, the general contractor for the Life Sciences project has a contract with the International Iron Workers and is not subject to the regional strike call.

One other large project in the area, however, will be affected. Work on an addition to Carbondale’s Doctor’s Memorial Hospital was halted.

Negotiation on a new contract is expected to begin today with representatives of area contractors. Home office for the Iron Workers Local is Paducah, Ky.

Gus says the Super Bowl turned out to be the Super Bowl and the Colts were left with the bone.

‘Counterinaugural’ parade, planned by anti-war groups

WASHINGTON (AP) — Anti-war groups whose peace demonstrations in Chicago blossomed into violence claimed Monday they have official sanction for a “counterinaugural” parade down Pennsylvania Avenue the day before President-elect Nixon’s inauguration.

The word came from a leader of one of the groups, David Dellinger, 32, head of the National Mobilization Committee to End the War in Vietnam.

Emerging from a negotiating session on permits with a government representative, Dellinger told newsmen:

“The government recognized the force of the peoples feelings while American soldiers and Vietnamese are dying in an imperialist war and that the anti-war feelings of the American people cannot be suspended during the time it takes the government to change hands.

“The recognition of the termination of the people to halt the war is the beginning the government has recognized the right to march down Pennsylvania Avenue on Sunday, the day before Nixon takes office.”

Joining the NMC for a three-day program, which Dellinger said would be aimed “not at personalities but in support of issues,” will be members of the Southern Christian Leadership Conference, the New Party, the New York chapters of the Women’s Liberation movement, Women’s International League for Peace and Freedom, and some units of the Students for a Democratic Society.

In addition to the parade permit, which a government spokesman said had been approved “conditionally,” the NMC negotiating group demanded:

Permission to erect a massive tent 100 X 300 feet in ground area, near the inaugural line of march, to be used as the site of a “counterinaugural” ball next Sunday night.

Specified areas along the route of Monday’s official inaugural parade will be used by peace groups carrying anti-war placards which Dellinger told officials would avoid the use of vulgar words.

Inside today

Five DeQuoin high school students, who have been dismissed from school for five days, are being investigated by the Board of Education for SDF involvement.

Abortion: an agonizing experience

Recently, an SIU coed nearly died after having an abortion. In the hope that it will deter others, she has discussed her near-fatal abortion with a staff reporter. See story, page 3. (Photo by Dave Lounsbury)

Advisement appointment lineup

(Students stood in line Monday morning to get advisement appointments for spring quarter. These students, sometimes six to seven abreast, were lined up from the second floor of the University Center to Brown Auditorium.)

13 SIU students arrested

A group of 13 SIU students arrested in Circuit Court in Murphysboro at 10 a.m. Friday.

Two more persons file for councilman election

Two more Carbondale persons filed petitions Monday for the city councilman election, bringing the number of official candidates to three. Archie Jones, 87, 811 N. Wall St., and Donald Crabtree, 1300A North St., will run according to City Clerk Elizabeth Leighton.

Two more persons file for councilman election

Two other people who received the petition forms Monday for the councilman election.

Free press seminar planned

Morris Ernst, a well-known New York author and lawyer, and two SIU authors will discuss the topic of "The Press, a Symposium," in a seminar on the press at 8 p.m. Thursday in the Studio Theatre at University headquarters.

The discussion will center around Ralph L. McConkey, recently published book, "Freedom of the Press," a bibliographical survey of the press during the last 400 years. McCooey is director of University Libraries at SIU.

Ernst, Breyer Rucker, an SIU journalism professor, and McConkey will head the symposium.

Ernst is author and co-author of three books, including "The First Freedom," recently updated in an article by Breyer Rucker. Ernst is founder of the American Civil Liberties Union and the American Civil Liberties Union Foundation.

Exam registration deadlines are near

The registration deadline for the mid-term exam is near. For registration for the Law School, the deadline is today, scheduled for February 8, (closed Saturday).

Registration for the mid-term exam is near. For registration for the Law School, the deadline is today, scheduled for February 8, (closed Saturday).

Registration set for graduate exam

Wednesday is the deadline for registration for the Educational Testing Service Graduate Foreign Language Examinations, which will be administered Thursday, March 15.

Registration is available at the University Library in conjunction with the symposium.

Two graduate exams to be given Saturday

Two graduate exams will be given Saturday: the Graduate Record Examination, which is scheduled for 8 a.m. to 3 p.m. in Farr Auditorium. Registration for this exam will close December 31.

Central ticket office now in new home

A central ticket office which already handles student "ad hoc" ticket sales will now handle tickets to all University events, beginning the first week in a new home. Located on the second floor of the University Center, adjacent to the director's office, the new service desk is really several months old.

Begun in September to centralize ticket sales, the office employs one full-time and three part-time workers who now design, order, sell and audit tickets.

Archie Griffin, business manager of the University Center, oversees the operation which he envisions someday will serve all University ticket sales.

Prior to the central office idea tickets were sold at various points on campus, usually by the department sponsoring the event.

Palermo to present lecture on psychology

David S. Palermo, former SIU student and now a student in the Department of Psychology at Penn State, will give a lecture at SIU at 4 p.m. Friday in Morris Library Auditorium.

Palermo's appearance is sponsored by the Interdepartmental Committee on Linguistics and the Department of Psychology.

The lecture will explain "Experiments in Rule Learning and Their Relevance to Psychology." The lecture is open to the public.

Clarke to initiate seminars

Dr. Walter Clarke, SIU Health Service physician, will initiate a series of nine public seminars at 4 p.m. Thursday, beginning in the SIU Library, according to Theodore Bradbury, SIU assistant professor of agricultural engineering.

The seminar series is sponsored by the Industries Department of Agriculture.

Clarke, who recently returned from a short-term medical assignment in Viet Nam, will discuss concepts of "undeveloped" and "developed" as they apply to the field of medicine.

The central theme for the seminars will be those concepts from the standpoint of specialists in various areas of health and work. "Unitsays." Their aim will be to explore the dimensions of "the over-simplified and over-worked phases of development."

Paul Schipp, SIU professor of philosophy, will conduct the second seminar Wednesday at the same time and location.

Succeeding sessions of the seminar, beginning Jan. 21, will be at 4 p.m. on announced dates in the Seminar Room of the Agriculture Building. Faculty members from design, art, government, music, Eng.

International role of SIU analysed

An insight into the SIU international activities on campus and elsewhere in the world will be presented at the international Dinner at 7 p.m. Friday in the ballrooms of the University Center.

Among the speakers for the dinner will be Chancellor Robert MacVicar Ralph W. Ruther, vice president of Area and International Services, and John O. Anderson of International Services.

The speakers will present an analysis of the importance of SIU's program of international travel as it is presently conducted and possible future developments.

The dinner is in honor of the faculty who have served on SIU projects as speakers.

Reservations by ticket at 50 cents per person may be made until 5 p.m. in the International Students Service in Woody Hall.

Entertainment will be provided by the international students on campus.

Chemistry professor gives research paper

Donald W. Slotum, associate professor of chemistry, recently presented a paper, "Competing Rearrangement Reactions of 1,4-Dimethyl-2,5-dihydro-1,3-benzenethione Bullittimide," at the Southeastern Regional Meeting of the American Chemical Society, Tallahassee, Fla.

The experimental results of P. L. Gledhill, SIU professor of chemistry, in the Department of Chemistry, Gledhill worked with the extension of certain base-catalyzed rearrangement processes with the chromic thiosulfate ring system.
Editorial
A silent killer

Something must be rapidly achieved on both a national and international level to forestall the continuing pollution and deterioration of our natural resources. Manmade today is another threat to man's survival. The swift action to prevent this is needed throughout our nation and the world.

Between 1900 and 1940 recently by the United Nations to summon an international conference to study the environmental problems in 1972 is one of the most important acts taken by the nations since international cooperation began in 1945.

To be sure, the UN's move to persuade governments to act seriously on the issue of pollution was inevitable; the warnings have been coming for years. There is a limit to nature's patience, and events have proven the words of Albert Schweitzer.

"Man has lost the capacity to foresee and to forecast. He will end by destroying the earth."

Schweitzer's words may still seem, to some, to be far too dire of a finding. When "things aren't really all that bad," in fact, however, the great humanitarian's predictions of an Armageddon brought on by man's indiscriminate abuse of his environment is far more serious than man's words can be seen wherever we look today.

Our country, the United States, provides a massive example of an environment polluted and destroyed by man. The instances and examples are many, including:

- Our lakes and rivers have sunk into degeneration. If you fall from a boat into Lake Erie, you're advised to get a tetanus injection. The Buffalo River in New York State has been declared an official fire hazard, so numerous are the inflammable materials in its fatal waters.

- During the period 1956-1966, our requirements for fresh water were doubling, while our national stock of drinkable water pollution during the same period. The pollution has reached such critical stages that consumer crusader Ralph Nader recently said that Los Angeles is a city "dying for human habitation, it is now designed for automobiles, not people."

- Over fifty species of American wildlife are so threatened as "bordering on extinction." Man is responsible for their near extinction, and nobody can say with complete certainty how wide-spread will be the effects of the disappearing animal species.

- The requirements are under unprecedented assault. When the United States spews 142 million tons of smoke and noxious fumes into the air yearly, that means 1,400 pounds a person. And it does not get out to sea, it moves over mountains and the depths of the forest, for the wind that blows the smoke out of Chicago, drops it on the Appalachians—and beyond.

In short, amid our unprecedented material affluence we have established an unprecedented polluting efficiency; squander amid splendor, and the former now threatens the latter throughout our entire nation.

Dean Rebiboff

Abortion law

The Illinois statute on abortion states that a woman may obtain a legal abortion only "for the purpose of preserving the woman's life." And because of the wording of the statute, an estimated 75,000 women will be illegally aborted in Illinois in 1969.

Abortion as a public health menace will be tacit in the automobile, by the food, by the physician for whom various reasons have lost their right to be licensed as medical practitioners. These part-time surgeons will be allergic to pain, kill, destroy, and on occasion, the necessary to cure their patients.

And if apprehended by the authorities they can be sentenced only to one-to-one years for illegal abortion. The penalty of a manslaughter. Only the State of Illinois has the legal authority and responsibility to remedy this situation.

For too long the Illinois Legislature has refused to do its part. For too long the Illinois courts have refused to impose the maximum sentence under law, and, for too long the citizens of Illinois have not made themselves heard on this issue.

Whit Bush

To the Daily Egyptian

In a recent letter, appearing upon the Daily Egyptian, Enright misrepresented the remarks made by Sonv Wayne, the principal of the school, the institutions of learning that belong to the town and faculty. They are the property of the governor, the legislature, the administration, the people.

In fact, Mr. Wayne did not make any such statements. He asked the institutions of learning in the state of California are the property of the voters and taxpayers of that state, that the governor, the legislature, and the administrators of those institutions were the duly elected and appointed administrating agencies for those property, and that the sewage of those facilities of learning was decided by the representatives of the owners, and not by any smash-and-grab artist who happens to think that he deserves to supercede the desires of the owners and taxpayers who made those facilities possible.

In a democratic society there is no formal constitution for Mr. Enright, nor, whether or not of his persuasion, to make known his views to his fellow citizens by means of the press. If Mr. Enright could not find that democratic political processes are not the only and necessarily unresponsive to his desires, then he must find the facts and act upon them—perhaps by running for one of the public property. Think on that, my friend.

Sam Bootagh

Letter

'We all want to change the world'

To the Daily Egyptian

Can students gain meaningful changes in society without rising, closing down universities, and generally causing trouble? They sure can! But try to convince the majority of students who believe only one way they can get something is by causing trouble and eventually stuffing a student down the throats of the majority.

At San Francisco State College, only 300 students out of a student population of 18,000 closed down the college for a week last November. The situation, after re-opening the college, became so bad that 900 police had to be assigned to the campus to keep order. SFS's president, S. I. Hayakawa agrees with the majority that college students should remain open so that the college could continue to function, to educate people. He even made concessions to the minority to stop the closures, and the administration and the protesters. It has been suggested that programs be so camouflaged with the spirit of revolution, that the clashes between the administration and the students become more important than settling the dispute in question.

At other universes, there have had take-overs of buildings and student strikes to get change. Most of the time they get nothing except a visit from the local police at the invitation of the university officials.

It should be evident that the method of violent change doesn't work. The peaceful method works much better. It doesn't take brains to throw rocks, shout for letter words, and exhibit physical force. It does take brains to plan peaceful change and, if you use an intelligent approach, changes will come quicker. Sure, you may suffer minor set-backs, but if you keep thinking, you'll get what you want sooner or later. After all, didn't Sil students get a lesson in what women's hours without violent upheaval? And, despite all the problems, last spring, wasn't it two letters signed by 15 SFS professors that caught the eye of Chancellor Robertson MacVicar who says he is taking them very seriously and will meet with his staff and the letter's authors to find out what we can do to get an upswing change can come peacefully.

The people who advocate violent take-over and mind-ripping are true drop-outs in the real sense. They are scrapping brain for brawn, rights for riots, and change for conflict. They are, by using violent methods for change, giving up and saying that peaceful methods do not work after having tried them only once. They are real losers!

We had a spring riot on campus in 1966. We had an attempted take-over of President Morris' office last May that resulted in eight students being expelled. I only hope that we never have anything like that on campus again for as long as this University exists. Universities are supposed to be centers of knowledge, learning and intelligence. Violence is the method of the few.

The ordeal of abortion

Physiological, mental stress incalculable

"I will not give to a woman an instrument to procure abortion."—HIPPOCRATES

By Whit Bish

On December 6, 1968, in a dingy, white frame house on the outskirts of St. Louis, an attractive, blonde SUI cook endured the ordeal of abortion on a dirty kitchen table. She was attended medically only by the woman who was about to help her for money.

Upon completion of the searing of the uterus, the woman was left pregnant with twins—and despite severe hemorrhaging, she was told, "Get off the table, go home, and get some rest." For this less than qualified medical advice the girl nearly lost her life.

At 3 a.m., the next morning it had become apparent to her roommates that her condition had become deteriorate. She had lost nearly four pints of blood, so they rushed her to a Carbondale hospital for emergency treatment. There, she was immediately given blood transfusions, injections to combat the threat of peritonitis and prepared for an operation.

Within a few hours after admission to the hospital a "D and C," dilation and curettage, was performed to insure the abortion was complete. This operation entails the scraping of the uterus with a curette to empty and cleanse the womb.

Several days later she had improved to the point where her name was removed from the patient rolls, and her roommates agreed through an intermediary to an interview for the purpose of relating her experience for publication. For obvious reasons neither the girl's name nor an identifying situation are being used. She was willing to talk of her experience only in the hope it may keep some other girl on the campus from becoming involved in a similar situation.

In a calm, but understandably reluctant manner, she disclosed how she learned she was pregnant.

"I was very sick one morning," she began, "and one of my roommates suggested that I ought to go to the Health Service to find out what was wrong. So later that same day after my last class I went over there."

"I explained my symptoms to them and they took some tests. And, after a while, the doctor took me into his office and told me I was pregnant. And he agreed now of thinking off at the time, "what was I going to do?"

"Later that night I was crying in my room when one of my roommates came in and asked me what was wrong. And when I told him I was pregnant and that I couldn't tell my parents, and that I needed an abortion, he said I'd have to find the way out. So we began asking around and the next day my roommate came up with this St. Louis number.

"I called the number and began what became a long, fruitful but conversation of who gave me the phone number and getting answers to where I must go, when, how I was to identify myself, and how much money I should bring with me. She, the woman on the phone, emphasized twice that it must be in cash or negotiable.

"Evidently, I satisfied her on the source who had given my roommate the number, because she gave me the information I had asked for, and got me to the abortion business—and it is a business—great care is exercised by the people in it to preclude the possibility of a police plant. And, because of the high risk factor involved, the going rate for an abortion is usually in the $300-and-up range.

"We, my roommate and myself, went to the parking lot of a restaurant at the designated date and time and gave code words to a man who drove by once, came back, and asked us our names. He told us to get into the car, which we did, and he then drove to the house where I was aborted.

"When we got to the house the man told us to wait in the car because his wife was taking care of another girl inside and would be with us in a couple of minutes. And shortly the woman and a girl I recognized from the campus came out. The girl got into the car and left with a man. The woman only told us to come inside."

She described the abortion as being in her middle thirties, with red hair which looked like a wig, wearing her theatrical-looking makeup and having a firm, business-like personality. The coed thinks all of this was an attempt on the part of the woman to disguise herself.

"When we first got back after the abortion," she continued, "I was of course feeling pretty weak so I went to bed. And, after I had laid in bed for several hours and realized I was still bleeding heavily, I wasn't strong enough to even care anymore. My roommates kept trying to talk me into taking some penicillin tablets, but I couldn't barely hear them. I don't even remember being taken into the hospital.

"Obviously holding back tears she said she was very grateful to have survived with her life.

An estimated 750,000 to 1,200,000 illegal abortions take place in the United States each year with a known death-rate of more than 500 women annually dying from these criminal operations.

According to Illinois statute, "Any person who attempts to procure a miscarriage or perform an abortion with any tool, drug, or instrument has committed a felony." Richard E. Richman, state's attorney for Jackson County, stated that in his opinion, "the individual undergoing the abortion is as equally criminally liable as the person performing the illicit operation." Richman added however that the aborted girl or woman is rarely prosecuted if she has cooperated in the operation of the case.

In a survey conducted by the Joseph P. Kennedy Foundation it was found that the moral aspect of abortion was the least disconcerting to women who had submitted themselves to abortion. The survey also revealed that the average woman who is aborted is white, between the ages of 19 and 26, married, and from a middle socio-economic group.

California has enacted into law a statute on legal abortion designed to take the abortion business out of the hands of the clandestine operator and to also make it possible for the poor and indigent to obtain a safe abortion when "required."

Aborted women 'criminally liable'

As a result of being questioned by her doctor in Carbondale about the abortion the girl revealed to him the St. Louis phone number and all the pertinent facts which took place pertaining to the illegal act. He assured her he would communicate to the St. Louis district attorney for investigation.

"And if these people are ever arrested and brought to trial," she states firmly, "I will definitely testify against them."

"I've told my parents and they came here and were more understanding than I thought they would be. I'm a senior this year but I won't be coming back Winter Quarter and maybe never back to SUI. Right now I just don't know what I'm going to do. My doctor and hospital bills will be more than $800, I don't know if I'll ever be able to have a child again, and I feel my life is presently just a total zero."

"I know 'm lucky—I lived through it. But the next girl might not be as fortunate," she concluded without expression.

The California "model law" permits legal abortions when pregnancy endangers the life of the mother, when the mental health of the patient is in jeopardy and in cases of rape or incest involving girls under the age of 15.

In Illinois a woman may obtain a legal abortion only when it is "necessary for the preservation of the woman's life." Pregnancy alone is not recognized by Illinois authorities as a potential fatal circumstance.

The abortion dilemma is much more prevalent than the general public realizes. And, this misconception is chiefly based upon the widely-held assumption that the ready accessibility of the contraceptive pill has for all practical purposes eliminated any uterine conception. This premise has been statistically unmasked as pure fallacy.

David S. Seelig, assistant state's attorney for Cook County, estimates, "... that as many as 30,000 illegal abortions a year may be performed in Cook County alone."

Usually, the decision for an abortion is reached during a period of emotional panic and few women are fully cognizant of the hazards inherent in an aborting situation. A bungled abortion can result in paralysis, reproductive organs being damaged to the point where conception can never again take place, and death.

Daily Egyptian, January 24, 1969, Page 5
Opportunity great for civil technology graduates

Technicians attack a problem

Two SIU freshmen, David Seville, left, from DuQuois, and Fred B. Black from Wood River, work out a field problem in site planning for a VTI engineering course.

Opportunity in heavy construction is virtually unlimited for graduates of a civil technology course at the SIU Vocational Technical Institute.

That's what Faculty Chairman Franklin A. Bassett of the VTI Highway and Civil Technology Program says, and he should know — before joining the University faculty he was an engineer on industrial, chemical, and water and sewage installation projects for contractors in five states from Oklahoma to Massachusetts.

"The field has a great variety of opportunities and offers something for everyone," Bassett declares. "The heavy construction technician can choose the type of work he wants and travel wherever he wants to do it.

The two-year course, started at VTI last year in response to manpower needs indicated by state and federal government studies, leads to the associate in technology degree. It is designed to train technicians with a broad background in heavy construction and engineering.

Formal studies in the curriculum include drafting, surveying, hydrology, estimating, construction methods and equipment, planning and scheduling, properties of the basic materials of heavy construction such as concrete and steel and mathematics and science, along with courses in the humanities and social sciences in the University's General Studies program.

Instruction is given in five and a half quarters of classroom and laboratory work on the VTI Campus and 11 weeks of cooperative work experience. This can be with any employer or in any type of heavy construction as long as the job relates to the curriculum of the course and the employer agrees to provide supervised experience acceptable to the school.

This sort of training prepares graduates to step into many technical jobs in construction, Bassett says. They can develop preliminary sketches, assist engineers in detail design of structures and

Chronicle prints

Wiegand article

"Demonetization of Gold Parallels Changed Ethics," an article by G. C. Wiegand, professor of economics, recently appeared in the annual Stock and Bond Market Outlook Supplement of The Commercial and Financial Chronicle.

Wiegand is a regular contributor to the Chronicle and has been a professor of economics at SIU for 12 years. The article points out that the 19th century gold standard was part of the "rule of law" and which is now being replaced by economic interventionism, or the "rule of men."

A native of Alhambra, the 54-year-old Bassett holds the bachelor of science degree in civil engineering and accounting from the University of Illinois. He joined the SIU faculty as an assistant professor in construction technology at VTI in September 1964, and was named faculty chairman of the Highway and Civil Technology Program in December 1967.

Project sponsored

SIU sponsors a special cooperative research on John Dewey Publications Project which studies and compiles works of the American educator.

Burglars take break during Yule

Burglars, who apparently believe in Christmas holidays as much as anyone else, took a vacation from their normal underground activities at SIU during the yuletide season. Compared with the Thanksgiving break, when more than $3,500 worth of goods was stolen, the yule season record was clean. No major burglary has been reported in the area and only two break-ins have occurred at the SIU Security Office said.

One burglar evidently believed in the Christmas spirit of giving and receiving. In place of resident's stereo, he left a toothbrush, comb and wash cloth—unwrapped.

Wilson Hall, which was hardest hit of all the living areas, has been broken into. The SIU Security Office reported no thefts during the Christmas break.

No one was allowed to stay in the dorm, Fred Whitlock, resident manager, said. During Christmas the building was checked for breakins each night.

Although the front door of the building was open during the day to allow residents to get their mail, no one was allowed to go beyond the reception area.

The spring break when the residents will be allowed to stay and an auxiliary police guard will be hired, Whitlock said. Hopefully, the residents will be better protected against future thefts, he added.

Israelian rabbi to speak here on criminology

Zvi Hermon distinguished rabbi and university professor of criminology and penology from Israel is visiting SIU until Jan. 31 under the sponsorship of the SIU Center for the Study of Crime, Delinquency and Corrections.

The rabbi, a professor at the Hebrew University in Jerusalem, has been a visiting professor at McGill University, Montreal. He is a board member of probation services for the Haifa and Galilee districts of the Government of Palestine, and director of the Israeli Bureau of Prisons.

While at SIU Hermon will conduct a series of lectures and seminars and will speak to a number of classes in fields related to corrections. His first formal appearance is scheduled Jan. 16, when he will speak at 4 p.m. at the Center for the Study of Crime, Delinquency and Corrections on "Correction in Israel." The lecture is open to interested faculty and students.

On Jan. 21 he will deliver a lecture which is open to the general public at 8 p.m. in Morris Library Auditorium. His subject will be "Crime Abatement in Bedouin and After the State of Israel." There will be a reception hour preceding the lecture.

Carbondale leads area in sales tax

Carbondale led all towns in the 22 county Southern Illinois area for sales tax collections during the third quarter of 1968, the Illinois Department of Revenue reported.

Carbondale's tax return from 892 merchants amounted to $495,950.36. Grocer's took first place for the largest contributor with automobile dealers and filling stations coming in a close second. General merchandise was the third highest category reported. This shows an increase of $41,018.59 over last year's third quarter total.

Jackson County, boosted by Carbondale's first place finish, led in the Southern Illinois county total with $100,380.55. Automobile dealers and filling stations edged out the food category, however, for high honors in the county.

Hanaford, Franklin County town with a population of 289, took the area's low with collections amounting to $19.01. General merchandise was the town's main contributor.

Total Illinois sales tax collections amounted to $228,451.91. Returns were from 395,356 businesses. Collections in individual categories followed Jackson County's trend with automobile dealers and filling stations first, food, second, and general merchandise third.

Cook County receipts from 156,019 returns amounted to $228,451.91.

Collections reported are from the Retailers' Occupation Tax and Use Tax. Receipts under the Service Occupation Tax are not included in the totals.

Graduates publish

The first issue of a new semi-annual journal in philosophy created by graduate students has been published at SIU.

"Philosophia," dedicated exclusively to the publication of student scholarship, is believed to be only "graduate journal" of its kind. Editor-in-chief Richard Creed, a Yale University graduate who received his master's degree at SIU and is now working on his Ph.D. in philosophy at Southern, explained its origin as stemming from the fact that "persons who are still completing degree responsibilities often have valuable research, make sound criticisms and develop original ideas, but in the past have had no generally recognized journal in philosophy to which they could submit their work for publication."

Distribution will be national and manuscript submitted will be accepted from students at other schools. No work will be accepted from anyone who has completed Ph.D. work. The journal is printed by the SIU Office of Central Publications.

Contributions to the first issue, all SIU graduate students at the time of manuscript preparation, are Creed, Carbondale Martin Campbell, Toledo, Ohio; Kenneth Cooley, now teaching at the University of Wisconsin at Madison; Waukesha, Philip Demattei, Collinsville, Conrad Koehler, Terre Haute, Ind.; and Donald T. Kelly, Carbondale.

Psychology professors to talk with undergrads

A "Conversation hour" for psychology undergraduate majors will be held at 3 p.m. today in the Department of Psychology Office, 806 Elizabeth.

Professor Gordon Pitz and Neil Carrier will be present to meet and talk with students.

Israelian rabbi to speak here on criminology

Zvi Hermon distinguished rabbi and university professor of criminology and penology from Israel is visiting SIU until Jan. 31 under the sponsorship of the SIU Center for the Study of Crime, Delinquency and Corrections.

The rabbi, a professor at the Hebrew University in Jerusalem, has been a visiting professor at McGill University, Montreal. He is a board member of probation services for the Haifa and Galilee districts of the Government of Palestine, and director of the Israeli Bureau of Prisons.

The lecture is open to interested faculty and students.

On Jan. 21 he will deliver a lecture which is open to the general public at 8 p.m. in Morris Library Auditorium. His subject will be "Crime Abatement in Bedouin and After the State of Israel." There will be a reception hour preceding the lecture.

American Youth: Its Outlook Is Changing the World

The subject of this month's issue of Fortune magazine

Much has been said, and much has been published, about today's "alienated" youth and society. But to some extent, two important questions remain unanswered: Is this, indeed, a special kind of younger generation? If so, what will be its impact on U.S. life over the next decade?

To find the answers to these questions, Fortune has devoted most of its January issue to Youth and its View of America Here, in a single issue of Fortune, is perhaps the most thorough and searching analysis of the topic ever presented by a magazine. Some of the areas on which this special study focuses:

- Why student activists demand reforms
- The revolution on the square campus
- Youth and the pop culture cult
- Parents of the Forties
- What blue-collar youth thinks
- A new style of campus living
- How youth is retooling business

Don't miss this special, single-subject January issue of Fortune. It's on sale now!
Androcles and the Lion

Shows performing in “Androcles and the Lion,” the George Bernard Shaw comedy which was staged in the auditorium last Friday night, are members of the 1968-69 Touring Theater and Drama Department Playhouse. The play was directed by Archibald McLeod of the Department of Theater. Upcoming shows of the department are "The Second Mrs. Tanqueray" which will be staged Jan. 29-31, and "Measure for Measure," to be presented Feb. 12-14 and 19-21. A special performance of "The Lion in Winter," will also be performed in the Experimental Theater on Feb. 27 and March 1.

Judge appointments questioned

SPRINGFIELD, Ill. (AP) — William J. Scott, sworn in Monday as attorney general of Illinois, and promptly filed suit with the Illinois Supreme Court challenging the constitutionality of the appointment last Saturday of 11 Circuit Court judges by out-going Gov. Samuel Shapiro.

Scott is a Republican. Shapiro is a Democrat.

Scott said he received a telegram from Shapiro Saturday night requesting that he institute a test case with the high court. Scott said that minutes later, a similar telegram arrived from Richard B. Ogilvie, who was sworn in as governor Monday.

Shapiro appointed all 11 Circuit Court judges Saturday to fill vacancies. Constitutional experts say the judges must be elected by Illinois voters, and cannot be appointed.

"If filed suit with the Illinois Supreme Court as my first order of business today," Scott told a press conference Saturday night, "I was asking the court not to certify the 11 Circuit Court judges. I also asked the auditor to not pay the judges until the case is decided."

"It doesn’t meet the requirements that the voters of the state be entitled to elect the judges," Scott said. "We will have the Constitutionality of the law tested immediately."

Shapiro told a news conference announcing the appointments Saturday that he would ask Scott to withdraw the suit and present a constitutional challenge of his own.

Among the judges appointed was Francis Lorenz, who Scott defeated in November for attorney general.

Transplant chances increase

FLORENCE, Italy (AP) — Dr. Christian Barnard, said to have performed the world's first human heart transplant, said Monday that heart transplant survival for transplant patients have risen to 35 per cent.

He warned, however, that people with new hearts can never escape the possibility that their body will reject the new organ—and kill them.

The South African surgeon spoke at the first World Congress on Transplantation and Reanimation. It is being held in a land where all organ transplants except kidneys are still forbidden by law.

In another talk prof. Pietro Valdanti, the man who performed the prostate operation on Pope Paul VI on Nov. 4, 1967, came out in favor of changing the law. In Italy, he said, was lagging far behind other nations in the field of organ transplants.

Ag advisement to start today

Counseling, and advisement for students in the Department of Agriculture will start today and Wednesday.

Sophomores and juniors that attend the department will receive their counseling appointments today. Senior students will receive their appointments Wednesday. Students must choose their major courses for next year and be registered.

Following student walkout

DuQuoin to investigate SDS

By Dan Van Atta

A investigation of high school student involvement in the SIU chapter of students for a Democratic Society (SDS) has been proposed by the DuQuoin Unit School District Board of Education.

The school board action comes in the wake of a walk-out conducted by five DuQuoin high school students at an assembly dealing with SDS affiliations last Thursday. All five students received five day suspensions.

According to Hewey F. Writer to speak

George P. Elliott, professor of English at Syracuse University and a contemporary writer of fiction, will speak at 2 p.m. Wednesday (Jan. 15) in the Home Economics lounge at SIU. He also is a poet, novelist, and critic.

Elliott's most recent article appeared in the Atlantic Monthly for December, and has written a book of short stories entitled "An Hour of Last Things," which has been published by Harper and Row.

At Syracuse since 1962, Elliott was on leave for the 1965-66 academic year while writing a play, "Michael of Haydium," after having been awarded a Ford Foundation fellowship.

ATTENTION:

Candidates for Teaching Positions

in Chicago Public Schools

NATIONAL TEACHER EXAMINATIONS

for Elementary (K-8) and Selected High School Areas

CHICAGO N.T.E. REGISTRATION DEADLINE DATE:

Friday, January 10, 1969, 4:30 p.m.

Chicago Public Schools will recognize as part of their 1969 certificate examinations for

KINDERGARTEN-PRIMARY GRADES 1-2-3

IN ELEMENTARY AND MIDDLE SCHOOLS:

In Elementary Schools: 1-2-3-4

In Middle Schools: 4-5-6

In Junior High Schools: 7-8-9

High School: English, Languages, Mathematics, Science, Social Science

All Candidates Must Take the Common Examination and the Teaching Area Examinations Referent to the Certificate Sought

Applicants for teaching positions in the Chicago Public Schools will have to:

1. Register with the Educational Testing Service, Princeton, New Jersey to take the common examination and the relevant teaching areas examination. Registration is due by N.T.E. deadline January 10, 1969.

2. Indicate on the N.T.E. form, Line 10, that scores should be submitted to the Chicago Board of Examiners. Chicago Public Schools specify: 460 N.W. 28th.

3. Failure to register for certification will result in no placement in the Chicago Board of Examiners. The following credentials should accompany the application:

a. Official copy of Birth certificate, official transcript of all college work attempted. The application and credentials must be filed by Friday, February 7, 1969, 4:30 p.m.

The National Teacher Examinations will be administered Feb. 2, 1969 on 400 college campuses.

For additional information, contact the Chicago Board of Examiners, Room 6/4

Chicago Public Schools

226 N. La Salle Street, Chicago, Illinois 60601

or the Office of Teacher Recruitment, Chicago Public Schools, 226 N. La Salle Street, Chicago, Illinois 60601

Future concerts cancelled

First SIU mini-concert deserved better turnout

By Dean Reboffoni

Okay, so it was Friday night in Carbondale, you had no pressing homework (Homework? On Friday night?), you just received a $10 check from the folks, and you decided—why not—to take in some sort of spectator sport. The late show downtown seemed like a good deal, so you got a date and took it in.

And it was a real bummer: something called "Wanted, Warded Wench" or some such rot. All about a young blonde lass who gets mixed up with the Hell's Angels, leaves the Boor Next Door, goes out to a beach beer party, gets her mint ripped off by some grotesque leering punks, gets dragged behind a Harley Davidson '74-cubic cycle for ten miles with her bourbon caught in the speaker, and...

Well, you shot Friday Night. Five bucks for the movie and pizza afterwards, and you had a bad taste in your mouth when Saturday morning came around.

So stop your complaining; you could have done better. Friday night—last Friday night—was also the occasion of the first SIU mini-concert, and you could have taken it at Shryock Auditorium.

Unfortunately, the first mini-concert was also the last. And kick thine ownself, because you weren't there. In fact, nobody was really there. Oh, there were about 250 paying customers ($3.00 cheap was the price for students), but Shryock has a seating capacity of almost 1,800 people, and to the performers on stage it looked pretty empty out there.

The performers, "Vicar and the Deacon" and "The Health Service reports on weekend activities Students admitted to the SIU Health Service this weekend are Brenda Kay Oertman, Moe Smith Tower; Dennis Wish, Allen II; Helen Fleming, 110 S. Forest; Sarah Fretz; Jonatha Moore; 105 S. College; Rolli Raje, 1433 Neely Hall; Guy Wharton, Southern Hills; and Richard Flucanoe, Route 5, Carbondale.

Discharged: Rachelle Jones and Helen Robinson, 109 Small Group Housing; Julia Fretz, 110 S. Forest; Kay Anderson, South Wall St.; James Harner; James Kaboria, 509 Snider St.; Randall Gotschall, Snider Hall; Tony Minneta; Southern Hills; Richard Flucanoe, Peggy Vaughan, 422 E. Main and Brenda Oertman.

Music Projection," deserved better—much better. The duo which performed a variety of entertainment from flamenco guitar to novelty and blues, was very good. The latter group, with a mellow electric act (quite a bit like the sound put out by the Association was even better—better, in fact, than some of the well-known groups which appear, on say, "Hollywood Palace").

Theoretically, of course is the reason for the poor attendance and the quick demise of the mini-concerts the two performing acts didn't have the big, big names. Sure it's a crying shame that "Spanky and Our Gang" couldn't make it here for their scheduled performance—but what's in a name, anyway? By any other names "Vicar and the Deacon" and "The Music Projection" would have sounded as good—the equal of many better-known groups. And they weren't panomiming, either—so for example "Gopfepnoll" was doing recently on "The Smothers Brothers Show. It was the real thing there in Shryock.

But for only once. According to Jack Griggs, chairman of the Student Government Activities Council—which sponsored the show—there won't be any more mini-concerts.

"We lost a considerable financial sum on Friday night's show," Griggs said. "And the mini-concert system is behind as far as we're concerned. After all the work, it's depressing to have such a poor turnout of students."

Griggs added that two tentatively-booked shows, including a salt-and-pepper soul group, a folk-soul comedian and a folk concert, are being cancelled. He added that unless the is some displayed student interest in the programs, the mini-concert system is definitely dead.

So, a one-night stand for the mini-concert. Well, there's always the late show at the theater. And next week it's going to be "Hot Hipst Harlot," and the following week it's "Sadistic, Sinful, Satiating Sexop,' and the week after that...

Sorority rush registration set this week

Campus social sororities are sponsoring a week of rush activities beginning Saturday. Pre-registration for the activities is taking place this week in Room C of the University Center. Saturday afternoon the sororities will hold teas beginning at 12:30. Monday and Tuesday each house will hold an open house from 8:30 to 10:30 p.m., and Jan. 23 is reserved for sorority preference parties. The next day bids will be given. Any coed with 12 credit hours and a 3.2 grade point average is eligible to pledge. A first-term freshman who was in the upper one-fourth of her high school class is also eligible.

Sororities on campus are Alpha Gamma Delta, Alpha Kappa Alpha, Delta Zeta, Sigma Kappa and Sigma Sigma Sigma.
Applications available for resident fellows

By William McGraw

The Dean of Students Office is seeking applicants for graduate fellowships for the fall quarter. Hank Wilson, assistant dean of the Graduate School, said the positions are open to all students who have either completed or will complete a course of study at the University. The positions are divided into two categories: those for students who have already completed their studies and those for students who are currently enrolled.

The Department of Educational Psychology is offering two fellowships for the fall quarter. These fellowships are designed to provide support for graduate students who are conducting research in the field of educational psychology. The fellowships are available to students who have completed at least one year of graduate study and who are currently enrolled in a graduate program.

The Department of Educational Administration is also offering two fellowships for the fall quarter. These fellowships are designed to support graduate students who are conducting research in the field of educational administration. The fellowships are available to students who have completed at least one year of graduate study and who are currently enrolled in a graduate program.

The Department of Educational Leadership is also offering two fellowships for the fall quarter. These fellowships are designed to support graduate students who are conducting research in the field of educational leadership. The fellowships are available to students who have completed at least one year of graduate study and who are currently enrolled in a graduate program.

The Department of Educational Technology is also offering two fellowships for the fall quarter. These fellowships are designed to support graduate students who are conducting research in the field of educational technology. The fellowships are available to students who have completed at least one year of graduate study and who are currently enrolled in a graduate program.

The Department of Educational Measurement and Evaluation is also offering two fellowships for the fall quarter. These fellowships are designed to support graduate students who are conducting research in the field of educational measurement and evaluation. The fellowships are available to students who have completed at least one year of graduate study and who are currently enrolled in a graduate program.

The Department of Educational Policy and Planning is also offering two fellowships for the fall quarter. These fellowships are designed to support graduate students who are conducting research in the field of educational policy and planning. The fellowships are available to students who have completed at least one year of graduate study and who are currently enrolled in a graduate program.

The Department of Educational Psychology, Educational Administration, Educational Leadership, Educational Technology, Educational Measurement and Evaluation, and Educational Policy and Planning are all offering two fellowships for the fall quarter. These fellowships are designed to support graduate students who are conducting research in their respective fields. The fellowships are available to students who have completed at least one year of graduate study and who are currently enrolled in a graduate program.

The Department of Educational Psychology, Educational Administration, Educational Leadership, Educational Technology, Educational Measurement and Evaluation, and Educational Policy and Planning are all offering two fellowships for the fall quarter. Reading Dynamics

The surefire shortcut for college students who want better grades and more free time.

College students and high school students, too, are under constant pressure to complete their outside reading assignments — which generally average 500 hours per semester. In order to keep up, and stay ahead of the mountain of words, thousands of students have graduated from the Evelyn Wood Reading Dynamics Course. They are reading dynamically... which means that they are reading from 3 to 10 times faster, with equal or better comprehension and recall.

Reading Dynamics is taught in more than 150 Institutes throughout the United States and in Canada and Europe. Based on Evelyn Wood’s discovery in 1949, the Reading Dynamics method, which uses no machines or gadgets, has been used by more than 400,000 students, housewives, businessmen, professional men, educators, scientists and Congressmen. It is based on the simple scientific principle that YOU CAN READ AS FAST AS YOU THINK! And, as thousands are experiencing in their everyday reading, dynamic reading is not only faster, it’s better.

The best way to learn the secret of Reading Dynamics and what it can do for you is to come to an exciting, informative, FREE, one hour Demonstration. Here you will see a documented film of actual interviews with Washington Congressmen, such as Senators Proxmire and Talmadge, who have taken the Evelyn Wood Course and use it daily in their work. You’ll learn how we can guarantee (see below) to triple your reading ability or the Course won’t cost you a penny. All your questions concerning Reading Dynamics will be answered by a qualified reading expert. You’ll understand why Reading Dynamics is exactly right for college students who want to get more out of college and more out of life!

ATTEND A FREE DEMONSTRATION

TONIGHT 8:00 P.M.
WEDNESDAY 8:00 P.M.

LIFETIME MEMBERSHIP
As a Reading Dynamics graduate, you are entitled to take a Refresher Course at any time, and as often as you wish, at any of the 150 Evelyn Wood Reading Dynamics Institutes in the United States and Europe.

OUR POSITIVE GUARANTEE OF TuITION REFUND
The Evelyn Wood Reading Dynamics Institute will refund your tuition if you do not at least triple your reading index reading rate multiplied by comprehension percentage during the Course as measured by our standardized testing program. This policy is valid when you have attended each classroom session and completed the minimum daily assigned home drill at the level specified by your instructor.

This is law student Phil McAleer

Phil is a graduate of the University of Illinois and is enrolled at Columbia University Law School. One of more than 400,000 Evelyn Wood Reading Dynamics graduates. Phil says, "I firmly believe the Reading Dynamics Course is one of the finest educational experiences I ever had. My reading speed has increased 6 times and my comprehension has also gone up."

Read what SIU students say about Reading Dynamics:

Sue Carruthers, Govt Major, 1969, SR. (Beginning average: 315 words per minute at 55% comprehension ending average: 1445 wpm at 75%): "The hard work was worth the effort. It’s a skill everyone can use."

Scott Ritter, Zoology, 1970, SRU. (Beginning: 229 wpm at 74%; ending: 1993 wpm at 76%): "Reading Dynamics has not only increased my reading rate and comprehension, but it has introduced me to a new and efficient means of studying."

Eric Sloane, Engineering Tech, 1970, SRU. (Beginning: 571 wpm at 70%; ending: 1060 wpm at 82%): "My major, engineering technology, did not appear to lend itself to rapid reading, so I was skeptical about the results that Reading Dynamics could give me. After completing the course, I honestly think it was the most useful eight weeks I have ever spent."

Hitchhiking veteran travels 8,000 miles

By V. Allen Manning

An SIU student who opted for adventure over Christmas cheer and comfort decided to visit Alaska the hard way during Christmas break; he reports he hitchhiked to Fairbanks.

John Kernahan said he left Bardolph, Ill., Dec. 18 and covered the 4,000 miles by Dec. 27. The freshmen from LaGrange endured temperatures to 35 degrees below zero "just for the hell of it." "I just wanted to go someplace," said Kernahan, 19.

The clean-cut redhead related several instances about his trip. One occurred at 3 a.m. Christmas day in the Yukon Territory where he was sleeping on the floor of a motel room rented by travelers who had given him a ride.

There was a knock on the door by a girl saying her boyfriend was being beaten up. Kernahan went to the rescue with a can of mace and the men ran off.

To keep warm Kernahan had quite an array of insulated boots, insulated underwear and thermal shirts. He suffered from frostbite and frozen toes during a 22 hour wait for a ride in Canada.

Kernahan said his stay in Fairbanks was a short one. He took the flight for a steak dinner and then caught a plane back to Seattle, Wash. From there he hitchhiked down the West Coast and back to Illinois, arriving on Dec. 31.

During his ride, Kernahan usually talked with the person with whom he was riding and then watched the scenery or slept. He also kept a diary. A veteran of 40,000 miles of hitchhiking, Kernahan said a person once pulled a gun on him, he was threatened with a knife twice.

"I developed a sixth sense," said the Stevenson Arms Dormitory resident. "I can tell when there is going to be trouble."

When asked if he had any other plans planned, he asked when the Mardi Gras took place. "Maybe I'll go to New Orleans for that and then there were some girls we met once in Ohio and..."

Chem Department gets summer grant

Robert Gower, an SIU grad who now works as a senor chemist at the Sinclair Oil Corp., recently presented a $1,500 Sinclair grant to the director of the SIU Department of Chemistry.

The grant will be used to support summer graduate student research. Gower received his bachelor's and master's degrees in chemistry at SIU, and a Ph.D., from the University of Minnesota.

Kansas State dean to head Ag banquet

Carroll V. Hees, dean of agriculture at Kansas State University in Manhattan, will headline the program for the 31st annual Agriculture Banquet at the Feb. 26th.

The dinner program, sponsored by the SIU Agricultural Student Advisor Council, is the main winter-term event for SIU agriculture students, faculty, alumni and other interested persons. The Council is composed of representatives of various student organizations in the School of Agriculture.

In addition to the address by Hees, the program will include presentations of achievement and recognition awards.

HOME OF THE WORLD'S GREATEST HAMBURGERS

SFIU Financial Report will soon be available

By Don Von Alst

University financial reports for 1974 and for the year ended June 30, 1968, will be made available to the public in the near future.

Such will probably be the case with the 147-page SFIU Financial Report for the year ended June 30, 1968, soon to be made available to the public interested in such multidisciplinary content.

Compiled by the Chicago based firm of Lybrand, Ross Bros. & Montgomery, certified public accountants, the document consists of a current analysis of income and expenditures.

According to the report, total University income for fiscal year 1968 was $78,129,853.88. Total expenditures for the year were $74,627,997.19. This left the University with an excess income of $3,501,856.69 over expenditures.

However, according to Dean Isbell, SIU assistant treasurer, this apparent excess in the annual report represents items for which funds were appropriated but monies not expended by June 30.

"The statement merely reflects a historical picture of the institution," Isbell said. "In the normal interpretation of governmental budgeting you do not have the element of profit or deficit that you find in corporate reports."

"We use the report mostly to determine and analyze costs and income, and to make reports to state agencies such as the Board of Higher Education."

Isbell said a less detailed, abbreviated, annual report will be made public and will be distributed in the near future.

Betta Zeta chapter initiates nine members

New members have been initiated into the Beta Zeta chapter of Pi Omega Pi, honorary business education society.

The initiates are: Patricia Ballard, Bonnie Gillenburg, Barbara Harvey, Beverly Simon, Rosemary Warrington, Nancy Ward, Ruby York and Janice Michalski.
Footballers to play 10 in '69

Salka footballers will move back to a 10-game schedule in 1969, after the nine-game 1968 slate in which the Salka finished with a 6-3 record.

Max (Diggie) Ros, coach of the Salka, will open their schedule against the University of Louisville on Sunday in Louisville. Other games are (home games):

Sept. 7—Youngstown University; Oct. 4—University of Toledo; Oct. 11—Miami; Oct. 18—Indiana State University; Nov. 1—Bradley University; Nov. 8—Ball State University; Nov. 15—Drake University; and Nov. 22—Southwestern State College.

There are no completely new opponents on this year's slate, however, the Salka will not meet the University of Tulsa, Dayton or Northern Michigan as in 1968. Added to the 1969 schedule are Ball State, Bradley, East Carolina and Indiana State.

Pros to play here March 9

The Salka Arena, in addition to hosting the first-round of the NCAA playoffs on March 8, will have its floor flocked up and ready for the Big Ten basketball tournament on Thursday, March 6, when the Chicago Bulls take on the Phoenix Suns in an 8 p.m. National Basketball Association game.

The Bulls were moved to the game from the Chicago Stadium when the Ice Capades exercised its option on the arena.

Although the contract is not signed as yet, according to Fred Huff, director of Salka sports information, "The National Basketball Association will pay all expenses and will also donate $1,000 to the Salka athletic department.

Ticket arrangements will not be set until the contract is signed, but the Salka ticket office will handle ticket arrangements.

Swimming tourney announced

Students who want to begin conditioning for the annual Intramural swimming tournament set for Saturday, Feb. 18, must contact the Student Recreation office by Monday, Feb. 10.

The competition will be held on Friday evenings, Saturday afternoons and Sunday afternoons and evenings between now and the tournament date.

The Intramural Office, located in the Arena, will have detailed information concerning the tournament beginning Monday, Jan. 20.

Garret hot, but frost fall

although the Salka freshmen basketball squad lost to Southwestern Air Force Base Saturday night in the Arena 86-75, the Salka's John (Mouse) Garrett continued his topscoring and scoring pace as he bagged in 35 points, 15 of 31 from the floor.

Scott Air Force Base scored 607 from the floor, while the Salka men could manage only 385.

Southern out-outlun them 40-41.

Scurry, in the third game, darted out to a quick lead, and held a 13-point margin right before the half. The yearlings cut this advantage to five points in the first period. Scott then jumped the scoreboard up to 10 points and held on.

Salka scoring—Howard 6, Powies 12, Molnar 1, Wiest 7, Knaus 7, Bruder 2, Rollins and Williams 2.

Southwestern scoring—Clark 16, Herndon 9, Pace 0, Barnes 28, Mcintosh 19, Simpson 5 and Wallace 3.

Intramural basketball today

The following games are slated for Tuesday's Intramural basketball action, starting with the U.School game at 6:15 p.m.:

6:15 p.m.—CVD Supporters vs. The Association, court 1, The Beared Clans vs. Luzzy Pickers, court 2, University School;
7:15 p.m.—The Animals vs. The Seven and Seveneros court 1, Supporters vs. The Beared, court 2, University School;
8:15 p.m.—Schneider III vs. Soulful Stringers, court 1, Tarter Tenth vs. Fall-Stuffers, court 2, University School;
9:15 p.m.—Boomer Blues vs. El Mahal, court 1, Supporters vs. The Beared, court 2, University School;
In the Arena:
7:15 p.m.—Wright Brothers vs. Boom I 74ers, court 1, Jao & The Techniques vs. Booher I Vets Club, court 2, Booher I Bangers vs. Great Expectations, court 3, Lamar I Cardiinals vs. Wright III, the Experience, court 4, Arena;
9:15 p.m.—The Jack Flashes vs. Raifer Darrel, court 1, The Consolators vs. Whitecoats Brothers, court 2, the X-Cl's vs. Salka Patrol, court 3, Vets vs. The Dukes, court 4, Arena.

Bandits get 30c

CAGLARI, Sarindia (AP)—Two San Diego bandits were arrested the house of Giovanna Picci- conti, 85, during the night, were taken up and demanded all her money.

She told them she had none. After tearing up her house, they fled after finding an envelope containing $30.

Foolish are not for three years

Thinclads await indoor track

The Salka track team is one month away and will benefit from the proposed Salka recreational building, completed in the last three years.

It needs an indoor track facility, according to Lew Hartzog, Salka track coach.

"Not only obvious competition reasons, but also to help guard against injuries in the winter months," Dr. Robert Spockman, Salka athletic trainer, concurs.

Spockman pointed to an increase in cold and respiratory illnesses that can be related to working outside in cold weather in the Salka situation, and shin-spots also crop up when the team runs on alternate hard and snow-ground.

Because the cinder track is frozen from about Thanksgiving until the end of March, the team must train on an spot that is clear and dry.

We can't train in the Arena because the hard surface wouldn't allow for the distance for the boys.

"We will be happy to get into a building with facilities for us where our boys can also train any time rather than just conditioning," Hartzog said.

"Just staying in shape doesn't win meets. It is through a basketball player just can stand back and forth on the floor without getting to above.

Hartzog stated that Salka is the only team in its size in the West that does not have suitable indoor facilities and that this fact places the

Jets return home

NEW YORK—The Giant killers arrived back in Manhattan after World Football Champions after their stunning victory over the heralded Baltimore Colts in the Super Bowl at Miami Sunday, the New York Jets flew into Kennedy Airport and were greeted by some 10,000 fans, including the Mayor, John V. Lindsay.

Notably absent was Joe Nap- math, the outspoken quarter- back of the Jets.

Coach Weilbank said that the American Football League and Super Bowl's most valuable player "had other commitments in Miami."

All but 10 of the Jets returned on the charted Northeast Airlines Flight.

One carried a placard which read, "The Colts were overrated."

At the present time, the track team numbers 18, some 18 of them freshmen.

SRI will be running away with everything they do, but we should be win- ning a lot of them," Hartzog says.

Football conditioning starts at University gym tomorrow

By Mike Klein

Although it is nine months until the 1969 football season opens against Louisville, the Salka football machine has already begun to roll.

In an effort to improve on an impressive 6-3 record, the first winning season for the Salka since 1961, the prospective candidates for the varsity ball club will begin off-season conditioning workouts tomorrow at 3:30 p.m. in the University School gymnasium.

At an organizational meeting Monday, Head Coach Dick Towers stressed that the program is open to all male candidates.

He also said that he hopes for new football practice, this program is an absolute necessity.

The objective of the off-season program, to be held each Monday through Thursday, is to build "strength, endurance, and speed," according to Towers. In order to do this, daily attendance must be required if maximum results are to be obtained.

Since this is not the official beginning of spring football, no locker or shower facilities will be available, and all athletes should dress at their respective living quarters.

Much of the workout will be held outside, and each player should have a sweatshirt with a hooded sweatshirt or a stocking cap, gloves, and a pair of good tennis shoes.

Also, and very important according to Towers, mudslides, beards, beards or goatees will be tolerated and hair must be short on the first workout day.

Page 14, Daily Egyptian, January 14, 1969
NBA all-stars to play

BALTIMORe (AP) — Rookie star Elvin Hayes will lead a White Team all-star reserves on to the top professional meet for the 19th time in the annual Na- tional Basketball Association all-star game tonight.

Washington and Houston All-American, carries the highest average, tops the NBA, but he will be going against the leading All-Stars. A year ago, a veter an player-coach Bill Russell of the Boston Celta cics, a year ago, the great, got hurt when perennial all-star Jerry West of the Los An geles Lakers withdrew because of a leg injury. West will be made to bear the starting lineup by Jerry Sloan of Chicago.

The East holds a 12-6 edge in the series and bombed the West last year 144-124 as Hal Greer of Philadelphia hit 8 of the 9 from the field and scored 21 points, 19 in one quarter, to win the most valuable player award. Green is a re serve on the East team this year.

Hayes, of San Diego, bear out Will Chamberlain in the voting for the starting spot. But Chamberlain is being offered $150,000 by Elgin Baylor of Los An geles for the starting spot, through the Los Angeles Lakers.

The appearance of Russell will be his 12th in an all-star game as one of the five players in the league. Other East starters will be Jerry Lucas of Cincinnati, John Havlicek of Boston, Oscar Robertson of Cincinnati, and Jerry West.

Six former winners of the most valuable player award will be on hand. In addition to Green they are Chamber lain, Robertson—who won it twice—Russell, Lucas and Baylor.

Citing the Ivy League’s practice of no spring drilis, he said, "I have reasons for it. They were in the past when we are getting better and better people. It was time for the development of a sound program."

"While Towers feels that any move is in the dis cussion, he feels that many coaches, will think about the possibilities a great deal in seasons to come."

"I think this is a good move for the league, as well as for the players, and I think it will be a move that will benefit the game in the long run."
Evansville next rival-
Salukis hit Tarpons 92-68

Perhaps looking forward to meetings rival Evansville Wednesday night, the Salukis
basketball team found with the University of Corpus Christi in the first game of Saturday night in the Arena.

Center Chuck Benson popped in three quick baskets to stake Southern to a lead that it never relinquished. Within still his 20-9 lead over the Tarpons.

The Salukis, however, cut short a what would've been first half with liberal substitution after the Salukis built up a 30-15 lead with 7:33 remaining before intermission.

All the Saluki regulars were out at halftime. They put in another five minutes before the half ended with SUU leading 30-28. None of them scored more than six minutes in the second half period.

"It's always nice to get to play everyone," Hartman commented. "But we had another Saturday night that we couldn't fill so we scheduled Corpus Christi who were up to play Kentucky Wesleyan." Corpus Christi lost to the Panthers Thursday evening 101-84.

A fast-breaking ball steals by Benson and Re Barkler helped the Salukis to pump in 22 of 44 points from the field during the first half. The game shotting percentage dipped to 42 percent from 39 percent due to frequent insertions of the back bench.

Ironically, the Tarpons, outclassed, outscored and out-rebounded (48-29) impacted the Salukis in the field goal percentage column dropping 24 of 54 tries for a .444.

"The shooting was very in-
dicative of the game's outcome," Hartman said. "We were getting a great many three-point shots and Corpus Christi was. We established a large margin.

Before Saturday night's game, the Salukis defense was rated seventh best in the nation giving up 59 points per game. The Salukis forced the visitors from Texas into 19 turnovers.

"We were very impressed with your defense," Coach Ray Smith, coach of the Tarpons, said. "Your team was able to cause a lot of turn-
overs which isn't typical of our club.

"Scoring wise, Hartman was very, very nice to us. The Salukis have a much better club than Wesleyan, and I was surprised to see that the Panthers could play so close."

"It would be hard for me to pick an outstanding Saluki basketball player because of the large scoring margin."

The largest Saluki lead of the second half was 27, five different times. The final one came on a flashy behind-the-back pass, Harlem Globe Trotter style, from Barkler to Willie Griffin, pushing the Salukis ahead 74-47.

Only one Saluki did not score in the offensive attack which featured five Salukis in double figures with Dick Garrett leading the team with 17 points.

Barkler was close behind with 16, Benson and Griffin added 12 and Roger Westbrook finished with 10.

Wrestlers win twice despite
sub-zero Minnesota weather

Although the thermometer read almost 35 degrees below zero, the SIU wrestling team managed to melt the ice with two decisive victories this weekend in Moorhead, Minn.

The grapplers out-wrestled Moorhead State 24-11 Saturday night after they had beat-en North Dakota University 40-3 earlier in the day.

"We have a lot of things right that we have to straighten out," says Coach Linn Long, SIU wrestling coach. "If some of the boys had made only a few changes they would have won their match."

The Salukis will take to the road again this weekend and meet Eastern Michigan College in Ypsilanti, Mich. Friday night and go against Michigan State University, fourth-ranked in the nation, on Saturday night at East Lansing, Mich.

Results of both meets are as follows:

113-1425: (a) 5-0 and dec-

Salukis hit Tarpons 92-68

The Salukis hit the road for the first time this season on Saturday, November 24. They faced the University of Corpus Christi, the University of Alabama, and the University of Kansas. The Salukis won all three games, scoring a 92-68 victory over the Tarpons.

Success still with
Ex-Saluki Cagers

Two former Saluki cagers, teammates while at Southern, were in the news recently. Walt Frazier, and his roommate, SIU's Stan Whitaker, have both proven valuable to their respective teams during this season.

Whitaker found a home with the North Park Eagles. And Saturday turned in a 24-point performance against the Bills of Southern Methodist University.

Frazier, who transferred from SIU after seeing limited action with the 1967 NIIT championship team, hit 11 of 18 from the field, and sank two free throws in the 99-84 Missouri Valley Conference win over the Bills.

Walt Frazier, the Atlanta, Ga. native and now Knickerbocker of the National Basketball Association at SIU, faced the 1967 Salukis to the NIIT win, is leading his team in both the willful goal percentage and assists.

He is rapping the net for a .307 clip on 456 attempts, and is averaging 5.0 on assists. He is playing both guard and forward for the Knicks.

Among the honors Frazier was b 1 were a Salukian, NCAA College Division All-American; NIIT team and Most Valuable Player in the 1967 NIIT, and first team in the Sun Carnival in El Paso, Tex.

Take it away

Dick Garrett, Southern's leading scorer, drives and maneuver himself free as he dunks in two of his 17 points Saturday night against the Tarpons from Corpus Christi. Jockeying for rebound positions are Chuck Benson (50) and Bruce Burchko (52). SIU won 92-68. (Photo by Ken Gare)
