**Handgun control toughens in Illinois**

**SPRINGFIELD (UPI) —** Handgun owners would have to obtain new state ownership permits and register their handguns with the state as well under a legislative proposal unveiled Monday.

The proposal calls for stricter handgun controls, increased law enforcement and increased criminal penalties to "make Illinois a leader in developing model legislation aimed at curbing the escalation of gun crimes," said Sen. William Marovitz, D-Chicago.

The measure would require anyone owning a handgun to obtain a new Illinois Owner's Identification card from the State Police Department. Individuals will apply for the new handgun owner cards in person at their local police department and will receive three valid forms of identification, including their Social Security number and description of each handgun they own, marking the expansion of Illinois' current gun control policy of registering gun owners but not their weapons.

"This package is aimed at addressing loopholes that exist in current gun control laws," Marovitz said. "It is aimed at keeping handguns out of the hands of drug dealers and would not have them and making it easier for law enforcement officials and agencies to trace those weapons used in the commission of violent crimes," Marovitz said.

Applicants for the new permits would have to provide a no-waiver giving the State Police authority to conduct background investigations lasting as long as 90 days. The proposed legislation would also give public and private mental health facilities that provide care for patients of mental institutions would be prohibited from having a handgun owner.

**Jokes may not be funny to source**

By Lisa Miller
Staff Writer

The University students responsible for placing the offensive jokes on a computer printout could be in violation of the student conduct code, Larry Welch, vice president of student affairs, said.

The student affairs division will examine the jokes thoroughly and probably will make a recommendation for an administrative hearing, Welch said.

An administrative hearing would entail a review by a judicial board, Welch said. The panel would involve individuals who were not present during the joke's origination and could vary in the case.

"The jokes were discovered by a Glendale Elementary Kindergarten student who found the printout in the 'scrap box' at the school," he said.

The University destroys its used computer printouts to protect the students' privacy, he said.

**Groups present grievances to USG after funds denied**

By Miguel Alba
Staff Writer

After being denied funding access through traditional channels, four Registered Student Organizations presented their grievances to the Undergraduate Student Government Committee for Internal Affairs at Monday night's meeting.

Representatives from the Student Alumni Council, Photogene, Veterans' Association and Strategic Games Society told CIA members why the USG Committee would not consider their requests for funds.

The reasons for denials ranged from missed applications, tardiness, format of requests, lack of response from organizations, lack of necessary forms and the lack of interest from the students.

"The outcome of the hearing can result in an expulsion from the University," he said.

However, Welch said he had not read the formal report yet and the circumstances could vary in this case.

"The jokes were discovered by a Glendale Elementary Kindergarten student who found the printout in the 'scrap box' at the school," he said.

The University destroys its used computer printouts to protect the students' privacy, he said.

**SIU-C to acquire coal research center**

By Anna Bickler
Staff Writer

After three months of setbacks, SIU-C is proceeding with acquisition of the Carterville coal research center and its necessary repairs, John Yopp, dean of the Graduate School.

The center will receive $210,000 from the Department of Energy for repairs to the building.

The $210,000 is a part of $1.5 million SIU-C will receive from the Illinois Department of Energy and Natural Resources to further coal research.

"This money was applied to the Department of Energy to make the necessary repairs, regardless of who received the governor's travel. The Department of Energy and the Illinois Department of Energy and Natural Resources to further coal research," said J. Craig Carrell, assistant director of the coal research center.

Clarence G. Dougherty, vice president for Campus Services, said the repairs are needed due to dry rot caused by the building.

"The Department of Energy and the Illinois Department of Energy and Natural Resources to further coal research, said J. Craig Carrell, assistant director of the coal research center.

The money was applied to the Department of Energy to make the necessary repairs, regardless of who received the governor's travel. The Department of Energy and the Illinois Department of Energy and Natural Resources to further coal research," said J. Craig Carrell, assistant director of the coal research center.

Pilots shut down engine in Midland Boeing crash

LONDON (UPI) - Investigators said Monday the pilots of a 15-week-old British Midland Boeing 737, flying with one engine vibrating and on fire, shut off the wrong engine and could not restart it before they crashed, killing 47 people. The Transport Department's Air Accident Investigation Branch, in a bulletin updating the progress of its investigation of the crash, reported vibration, fire and smoke in one of the jetliner's two engines 13 minutes after taking off the £4, a Boeing 737 from London's Heathrow Airport en route to Belfast, Northern Ireland.

Sri Lanka violence results in 67 slayings

COLOMBO, Sri Lanka (UPI) - A new wave of slayings linked by Sri Lanka's state- run news agency to the government of El Salvador as the work of anti government rebels killed 67 people across Sri Lanka in a 24-hour period ending early Monday, authorities said.

South African activists ask for their freedom

JOHANNESBURG, South Africa (UPI) - Four black students recovering from a hunger strike escaped from a hospital on Monday, according to the West African Embassy, demanding their release and the freedom of fellow activists held without charge. Foreign Minister Pik Botha defended the minority white government's response to a series of hunger strikes in prisons nationwide that began in January.

Demonstrators arrested in Salvador protest

United Press International

More than 200 people were arrested in sometimes violent demonstrations Monday against the government of El Salvador as protesters swelled with police, blocked streets, and kept federal workers from their offices. Nine police officers suffered minor injuries and several demonstrators received cuts and bruises during clashes at a protest outside the Federal Building in New York City.

White House reports rise in prices no worry

WASHINGTON (UPI) - Trying to quell jitterS on Wall Street, the White House insisted Monday there is no reason to believe a recent rise in prices portends a "long-term rise in inflation" warranting a change in economic course. The Dow Jones Industrial Average plunged 40.37 points on news that the Producer Price Index, a gauge of wholesale prices, shot up 1 percent, in February, matching January's gain and shattering forecasts of a 0.6 percent to 0.5 percent increase.

Bush: States must aid in resolving gun issue

WASHINGTON (UPI) President Bush said Monday the federal government alone cannot resolve the volatile gun control issue of semiautomatic weapons, and that the states must provide the solutions "in various ways. I am convinced that reasonable men and women can work together to find an answer to these automated weapons," which are being used in rising numbers by criminals, Bush told a group of state legislators.

Trump wants renegotiation of Eastern deal

MIAMI (UPI) - New York developer Donald Trump said Monday striking Eastern Airlines' Northeast shuttle has no longer worth the $365 million he originally agreed to pay for it and vowed the airline's owner, Frank Lorenzo, to cut the price. Eastern, which had been counting on the shuttle deal to bring in badly needed cash, had no immediate comment.

Education bills making way through Senate

INDIANAPOLIS (UPI) - This year's major bills on education were advancing through the Legislature Monday in hearings by the Senate Education Committee with testimony that aired continuing conflicts between various interests. The main bill, which sponsors said extended Gov. Robert D. Orr's A-Plus program and added Gov. Evan Bayh's Excel program, included too little money for summer school, said state Superintendent of Public Instruction H. Dean Evans.

Five SIU-C seniors share Rickert-Ziebold Trust

Artists win cash prizes in contest
By University News Service

Five seniors from the School of Art and Design will share this year’s $20,000 Rickert-Ziebold Trust Award, one of the nation’s largest cash prizes for undergraduate students.

The winners were chosen by art and design faculty members from a field of 15 finalists. Each winner will receive $4,000, which may be used in any way he or she chooses in furthering his or her artistic career.

The winners are: Frank J. Brown, Carbondale, for ceramics; Carole J. McNaughton, Evansville, Ind., for glass work; Martha I. Summers, Urbana, for ceramics and glass work; and Marguerite A. Swanson, Carbondale, for metalsmithing.

Brown plans to attend graduate school. Summers plans to use her share of the prize money for graduate study. Swanson plans to use her share of the prize money for furthering her artistic career.

The Rickert-Ziebold award comes from a trust fund established by the late Richard and Kathie McNaughton, Carbondale, for ceramics. He is the son of Richard and Louise Lawrenz; award coordinators, Sunand Bhattacharya and Shemy Fotopoulos; Frank J. Brown and Scott A. Swanson.

City may levy gasoline tax to finance road study
By Jackie Spinmer

Carbondale city staff wants to pump $150,000 from area service stations to fund a study for a northern bypass or connector, but the station managers are divided over whether gas consumers and dealers should be the source of revenue.

The City Council will discuss a proposed one-cent gas tax increase at its meeting Tuesday.

Mike Cochran, owner of Cochran’s Amoco and Gas Tyne, said service stations operate with private business people will be affected by the tax more than the company-operated stations. Private service stations follow the gas prices set by the company-operated stations. Because some of the locally-owned stations depend on gas sales for profits, they absorb the gasoline tax.

“Company-operated stations won’t mean that much because they are not managed by people here in Carbondale and a lot of times they don’t even know from day to day what the prices are in Carbondale,” Cochran said.

Cochran’s Amoco and Gas Tyne is located at 1007 W. Main.

Clark manager Jeff Hammond said the tax would affect the consumers more than company-operated Clark stations at 1012 W. Main and 804 E. Walnut.

“This tax is typical of government in general,” Hammond added.

Gator 76 dealer George Williams said, “It’s a Clark’s and the Checkers that control the prices.”

Cochran plans to use the gas tax to reward the accomplishments of outstanding undergraduate seniors in art and design.

Awards will be presented during an opening reception set for 8 to 10 p.m., Friday, May 1.

Winners of the 1989 Rickert-Ziebold Trust Award at the awards announcement, from left: Martha I. Summers, Carole J. McNaughton, Brian C. Lawrenz, award coordinators, Sunand Bhattacharya and Shemy Fotopoulos; Frank J. Brown and Scott A. Swanson.

The revenue generated from the proposed tax would finance a study for a possible northern bypass or connector but the road itself.

By Interim City Manager Jeff Doherty said, “Based on the revenues projected and received from the one-cent tax imposed currently, gas sales appear not to have been affected.”
Acid rain legislation: a tough one for U.S.

GOV. JAMES R. Thompson has been lobbying the White House over an issue that is critical to the Illinois economy and the environment of the North American continent. The issue is national acid rain legislation.

Thompson asked White House Chief of Staff John Sununu earlier this month to support upcoming acid rain legislation. The administration has been considering a judicial approach to reduce emissions, but Thompson is afraid that congressional legislation might level heavy penalties on states that are responsible for pollution.

"The problem with sulfur in the coal," said microbiology professor JAMES R. THOMPSON, "is generally considered to be acid rain. What means do we use to address this?" The very newspaper article on which I placed my subscription will likely be shredded as acid rain destroys the nation's forests and waters.

Acid rain is a tough one for Illinois. Gov. Mario Cuomo as he vetoed a proposed state death penalty bill, which states that local governments can't control the killing of people like Purdy. So we propose to take away the law allowing citizens' firearms. Then there's the catch, if they are not turned over to authorities, we would be considered felons and information would be shared.

"It's important to protect people's rights," said Jacobson. "We must begin at a grassroots level and inform our legislators to do our part with recycling and conserve when possible, as I do my part with the recycling of trash.

THOMPSON LIKED THE sharing of the financial burden of acid rain to the federal government's bailout of the savings and loan industry. "Illinois citizens are being asked to pay their share of the savings and loan bailout through the primary beneficiaries seem to be the states of Florida, Texas and California."
House members begin talks
to determine Wright's future

WASHINGTON (UPI) — Members of the House ethics
committee, in a bipartisan decision, began
discussing Monday whether to open an
investigation of Speaker Jim Wright. Wright's
effectiveness was questioned over the weekend in
the wake of a New York Times report which
accused him of using his influence to
secure a position in a law firm during his
Congressional career.

Wright has denied the
accusations and said he would not resign. He
has been a central figure in Washington politics for
decades, serving as House majority leader for 14 years
before becoming speaker in 1989.

The ethics
committee, which is
designed to investigate
allegations of wrongdoing
among lawmakers, met to
discuss whether to launch
an investigation.

The committee's
decision would be based on
evidence gathered during
the investigation.

The committee's
decisions are made public
after a vote, and the
speaker must approve
before the investigation
begins.

A spokesperson for Wright
did not immediately
respond to a request for
comment.
Organization to Honor Females

University Women's Professional Advancement will be recognizing campus Women of Distinction by giving several awards recognizing unique contributions made to the University and/or community by women. Each nominee will be considered for recognition based on such contributions as research, academic or professional achievement, service on University committees, mentoring other women, and community service. Special emphasis will be given to achievements in the past year.

Nomination forms are available from the following individuals: Pam Brundt, 215 457-5042; Frances Gilman, Graduate School, 556-7791; and Gena Watters, Director of New Woman's Professional Advancement, 556-3966. Nominations will be accepted from University organizations or individuals and must be received by April 16, 1989.

Let's celebrate all the great women that have contributed to history at the Comedy Cellar! LADIES NIGHT - SPECIAL TAP ROOM

LYNN AND JEN - MARCH 22nd

Let us rule our night! Call 549-8389!
Students may only notice the siren sounds on the first Tuesday of every month, but SIU-C's civil defense program sirens have been put through the open over the years, and several times not as "only a test." Originally constructed in the early 1960s, the sirens were part of a federally funded civil defense program that swept in with the nuclear weapons age and the ensuing cold war with the Soviet Union. The Siren systems were initially controlled by the University of the Communications Building and a room in the Physical Plant. Special civil defense radio inside both buildings were kept tuned to both state and federal emergency broadcast frequencies. Former SIU-C Safety Officer Oliver K. Halderson, a former Lt. Col. in the U.S. Air Force, said the control stations were staffed on a semi-volunteer basis by representatives of different faculty groups. "It wasn't a 24-hour watch or anything," Halderson said. "We mostly looked for bad weather." Even so, Halderson described the preparations the University has made in the event of a nuclear attack. "The federal government supplied us with literally tons of canned food, water and medical supplies so we could survive," Halderson said. "We had it stacked up to the ceiling. People broke into the medical supplies for the morphine and the food finally went bad, but there must have been tons of it." Halderson described the labyrinth of steam tunnels located under the campus that were to be used as blast and fallout shelters. "I could walk from one end of campus to the other underground," Halderson explained. "It was a really good shelter." Twice the sirens were used in actual emergencies. According to Halderson, "Fortunately, both were weather related," he said. In the early 1970s the city of Carbondale took over control of the campus sirens with the formation of the Emergency Service and Disaster Agency. Halderson said the city should have had control from the beginning, but that it did not have any facilities of its own. "It took a lot of persuading, but the city finally installed a system of its own and formed ESDA," Halderson said. ESDA has been based out of the City Council Chambers at 607 E. College St. since 1975. The system now consists of a control center, a Siren system that can alert any facility that has the special receiving equipment. The SIU- C, Security, Memorial Hospital of Carbondale and the Carbondale Police all have this receiver. Tom Harris, Carbondale ESDA coordinator since 1987, said the system can now reach 98 percent of Carbondale residents. "It is intended to reach the outdoor population," Harris said, "people indoors will have to rely on television and radio alerts." A small telephone-like transmitter called an encoder, sends a radio signal to the sirens or receivers to activate the system. Depending on the type of alert, the corresponding building for the siren is pushed, Harris said. An earthquake drill, like the one conducted in conjunction with University last April, is planned for this coming May. Though the purpose is to test the system's readiness, the sirens will not be used in the drill, Harris said. "You don't want to cry wolf" with the sirens too often," he said. "Pretty soon people ignore them, and that's the last thing you want." Harris said the sirens have two different alerts they can send. The bad weather alert is a steady blast while the attack alert wavers up and down. "We've only used the weather alert in real emergencies before."
Charles Simonds, New York sculptor and flummer, will speak at 7 tonight in the Student Center Auditorium as part of the University’s Visiting Artist Program.

Simonds creates unfired clay sculptures, which are represented throughout the world. He is the first of seven artists invited to SIU-C to present a free public lecture and slide presentation.

Visiting Artist Program: will be immediately followed by a visit from Bill Haendel, an art professor at Northern Illinois University who will demonstrate cast paper and paper making at 2 p.m. Wednesday in the Student Center Craft Shop. Haendel will also lecture at 1 p.m. Thursday in the University Museum Auditorium.

Gene Koss, associate professor of art at Tulane University, will speak at 12 p.m. April 5, in the University Museum Auditorium. Koss’s sculptures resemble the farm implements of his fabricated steel, pressed cast glass and even.

Ceramic artist James Lawton, whose work has been exhibited nationally and internationally, will speak at 10:30 a.m. April 10, in the University Museum Auditorium.

Lawton is a visiting artist at the School of the Arts Institute in Chicago. Californian fiber and neon artist, Victoria Rivers, will present a lecture on her work April 11.

This is all you need to apply for the Card.

With Automatic Approval, it’s easier to qualify while you’re still in school.

Now getting the Card is easier than ever. For the very first time, students can apply for the American Express® Card over the phone.

Simply call 1-800-942-AMEX. We’ll take your application by phone and begin the process right away. It couldn’t be easier.

What’s more, because you attend this school, full-time, you can also take advantage of the Automatic Approval Offer for students. With this offer, you can get the American Express Card right now—without a full-time job or a credit history. But if you have a credit history, it must be unblemished.

It’s actually easier for you to qualify for the Card now, while you’re still a student, than it ever was before.

Apply Now: 1-800-942-AMEX

Become a Cardmember. Fly Northwest $99 roundtrip.

As a student Cardmember you will be able to enjoy an extraordinary travel privilege: fly twice for only $99 roundtrip to many of the more than 190 Northwest Airlines cities in the contiguous United States (only one ticket may be used per six-month period)!

And, of course, you’ll also enjoy all the other exceptional benefits and personal service you would expect from American Express.

Apply now by calling 1-800-942-AMEX. And then you can really go places—for less.

*Fee is for roundtrip travel on Northwest Airlines. Tickets must be purchased 24 hours after making reservations. Fare are non-refundable and no itinerary changes may be made after purchase. Seats at these fares are limited and are not available when you call. Travel must be completed by certificate expiration date and may not be available between certain Northwest cities or to certain destinations. On sale 12/9/89 and expires 2/28/90. Certain blackout dates and other restrictions may apply. For complete offer details, call 1-800-942-AMEX. Current student Cardmembers automatically receive two $99 roundtrip certificates.

Two dead, one still critical following hostage standoff

SPRINGFIELD (UPI) — A "mentally deranged" gunman, who police believed to be oncocaine, shot and killed his girlfriend, wounded her sister, and then shot and killed himself Saturday, ending a 48-hour hostage ordeal on the city's west side.

Springfield Police Chief Mike Wallin said he believes Douglas Thomas, 29, of Springfield, shot his victims and himself 20 minutes before police stormed a house where as many as four hostages had been held since Friday.

Police fired two volleys of tear gas and moved shortly before 5 p.m. CST after negotiations broke down and it appeared the gunman was close to harming his hostages, Wallin said.

"We believe the hostages were an imminent danger," Wallin said. "Our negotiators, their opinion was he would murder his hostages.

Officers from a special tactical team found the two victims underneath several quilts by the heavily barricaded front door. Thomas was laying on top of them, he said.

Thomas died from a self-inflicted gunshot wound to the chest. His girlfriend, Karen Lambert, 30, also died from a gunshot wound to the chest, Wallin said. Lambert's younger sister, Nicole, 14, remained in critical condition at St. John's Hospital on Monday with multiple injuries from a gunshot wound to the head. She was stable and undergoing surgery.

Police stormed the house after attempts to have relatives of the hostages talk the troublemaker out of killing himself. Thomas stepped out the front door and turned toward police, Wallin said. Thomas then stepped back and threw two handguns, a .38-caliber and a .22-caliber revolver, Wallin said. But police did not know which weapons were used by Thomas to shoot the victims or himself. They said they were firing gunfired at the door prior to entering the home, but speculated the shots could have been made by Other people.

Thomas did not make any demands during the ordeal that began at about 1 p.m. Friday when he took four people hostage, police Cmdr. David Searcy said. During negotiations, Thomas threatened to kill his hostages and himself, said he had gone tape to the hostages' heads, and said he was so "low" which police believed to be a gun.

By Sunday morning, Thomas had released two of the original hostages, a 2-month-old Kellis Lambert, the daughter of Thomas and Karen Lambert, and Karen's 4-year-old daughter, Katrina.

The hostage released Saturday after extended negotiations while the 1-year-old was released about 6 a.m. Sunday, Police Cmdr. David Searcy said.

"The door opened and she walked out. It was extremely tired and extremely hungry, but otherwise unharmed," he said.

Searcy said Thomas has been living illegally since hanging up the telephone on police negotiators, then calling the 911 emergency line.

"We're going through mood swings, anger and depression," Searcy said during the standoff.

Thomas served nearly three years in prison for shooting one man at a neighborhood dance in 1985, leaving one of the victims a quadriplegic.

He was convicted of attempted murder in a bench trial by Judge Jerry Kane and sentenced to five years in prison. But Rhodes later quashed his own verdict and dismissed the case following an acquittal on a murder charge.

Thomas said he had been under investigation for alleged criminal sexual conduct of a minor female in February.
Basic steps aids in abuse problem

Knowing when and how to help a friend in need of counseling for a substance abuse problem can be difficult. Most of us fear that we lack the skills necessary to talk to a person with such a problem.

It is important to remember that counseling does not mean judging, blaming, nagging or scolding.

Before you take that step towards intervention, some basic information will help.

1. You need to be clear of your motives and understand that your role is to help the person understand their problem, which is causing you concern for them.

2. The person will need to accept counseling assistance. A person abusing substances will not come to you because they are aware of their behavior or because of guilt or shame, they will come because they want to change. If they want to change, they will contact you to help them.

3. You should not force someone to accept counseling. It will only cause you and the person you are trying to help frustration.

4. You will need some basic communication skills. Listen, listen, listen. Do not judge. Express your concern and caring for the person and let them know that you care enough to help.

5. Remember, however, that some people appear to take the longest and most painful path to health and happiness. Each person has this right. Show respect for their privacy and let their information remain confidential between the two of you.

6. Respect your own boundaries. Avoid combining your role as a friend with that of a counselor. Often, a person abusing substances with whom you have a relationship, may lie about their use or involvement of help, or otherwise appear to hurt their helping friends.

7. Rather than taking these behaviors personally, try to see them as symptoms of an illness. Do not allow yourself to become a target for abuse. Decide what you are not willing to deal with.

University and community resources for counseling are available from the Center, the Counseling Center, Synergy, or a counselor for another person sometimes means taking care, talking about difficult issues and being willing to accept the changes to go beyond a superficial relationship. The effort will be worth it.

FITNESS ASSESSMENTS
The Sports Medicine Office at the Rec Center conducts fitness assessments Monday through Friday. For appointment, call 536-5531, ext. 23.

ADULT AEROBICS will be held from 5 to 6 p.m. Tuesday, MWF and from 7 to 8 p.m. Tuesday, MWF. Registration begins March 23 in the Rec Center Room 158.

REGISTER NOW for Session II Tai Chi Classes is held from 5 to 6 p.m. every Wednesday beginning March 29 through May 20 in the Rec Center Martial Arts Room. There is a fee for this program.

SESSION II of Beginner Aerobics begins March 29 and will be held Monday, Wednesday & Friday from 4 to 5:45 p.m. in the Rec Center Dance Studio until May 5.

SESSION II of Pre-beginner Aerobics begins March 30 and will be held Monday, Wednesday and Friday from 6 to 7 p.m. in the Rec Center Multi-Purpose Room and then from 7 to 8 p.m. on March 30 and then from 6 to 7 p.m. on April 6.

BASE CAMP provides rental outdoor equipment. Base Camp is located on the lower level of the Rec Center. For more information, call 536-5531.

FITNESS WALKING will begin Tuesday, March 29 and will meet every Tuesday and Wednesday from 6 to 7 p.m. in the Rec Center Multi-Purpose Room until May 5.

Poets to read

Husband and wife poets Eric Pankey and Jennifer Atkinson will read their work in a presentation at 4 p.m. March 22 in the University Museum Auditorium at Foner Hall.

Pankey, coordinator of the writing program at Washington University in St. Louis, has had his work compared to Robert Frost's. Atkinson, a graduate of the University of Iowa Writer's Workshop, has been published in such magazines as "Poetry" and "The North American Review." She is the editor of "River Styx," an international literary magazine.

Tot finder program helps firefighters find children

By Phyllis Coon
Staff Writer

One of Carbondale's many mobile homes is on fire. The fire department left that arrived.

The firefighters only have seconds to decide what room of the mobile home they are going to start their search pattern for residents. But just as quickly as the question of a search pattern comes to mind, it is answered.

In one of the bedroom windows is a round orange sticker that has the words Tot Finder, which means a child could be in that area of the home.

The Tot Finder program is sponsored by the Carbondale Fire Department in cooperation with United Casualty Insurance Co., Brian McGuire, Firefighter II, said.

"Other cities have sticker programs," McGuire said. "But just in the fact that the programs have lasted so long, the stickers have proved their worth. They've saved more than one life."

Some sticker programs have been around since the early 1970s, he said.

"This is the first time Carbondale has done this program," McGuire said.

FBI she was trying to extort money from Boggs.

"By starting a search pattern going around the area firefighters can find a child a lot faster than starting in the living room," McGuire said.

Residents can get the stickers by sending a self-addressed-stamped envelope to Tot Finder, Carbondale Township Fire Department, R.R. 6 Box 19, Carbondale. Or by going to the station on East Park Street.

Professor to receive fellowship for research

Day H. Hua who received a doctorate in organic chemistry from the University in 1979, has been awarded a Sloan Research Fellowship, by the Alfred P. Sloan Foundation of New York.

Sloan Fellows receive $25,000 over a two year period for research. Hua in presently associate professor of chemistry at Kansas State University in Manhattan, Kansas. Hua was born and raised in Saigon, South Vietnam.

Boggs' former mistress arrested

COSTA MESA, Calif. (UPI) — Mary Jo Adams, who has filed a suit against her former boyfriend, andre Boggs of the Boston Red Sox, was arrested on Friday for trying to shoplift a coat from a department store, police said Monday.

Adams, 33, was detained by security officers at the Nordstrom store in South Coast Plaza Sunday about 7:30 p.m., after they recovered with her $256 coat that she had not paid for before leaving, police said.

Security officers turned her over to police who released her after citing her for petty theft, a misdemeanor. Adams, an Orange County mortgage broker, promised to appear in court April 6, Keene said.

Adams, currently on a worldwide tour to promote a two-part Penthouse article in which she tells about her affair with Boggs, pleaded guilty in January to eight counts of using someone else's charge card to buy more than $4,000 in merchandise at Nordstrom and other businesses.

Boggs reached the Red Sox spring training camp in Winter Haven, Fla., broke into laughter when told the latest news about Adams. "I guess Penthouse didn't give her enough money," he told the Patriot Ledger newspaper of Quincy, Mass.

Asked if he thought about helping Adams with bail, if it had been necessary, Boggs answered, "She can sit there, drink the water and eat the bread."

Adams, who also posed nude for Penthouse, filed a $12 million suit against Boggs last May, alleging that he broke an oral contract to pay her for lost wages and for financial services rendered during four years as his mistress.

An appeal court ruled last week Adams could not seek $11.5 million in punitive damages against Boggs, who Adams said inflicted intentional emotional distress on her by telling the FBI she was trying to extort money from him.

The court said she could ask for lost income and professional services totaling $10,000, saying any discussions Boggs had with the FBI were private.

Cana Rail Pass Unlimited train travel in Canada for the unlimited imagination.

There's never been a better time to see Canada by train now with VIA Rail's new CanaRail Pass, you can travel coast to coast or by region for one great price. It's your passport to seeing Canada in the most affordable style.

Unlimited mileage and flexibility

The moment you own a CanaRail Pass is the moment you own the country. You can travel anywhere you want, with as many stops as you want, when you want. CanaRail Passes are designed for the "plan as you go" traveler. You can even add days, prior to your first departure.

VIA trains cover the country

As Canada's passenger train network, VIA operates 711 miles of track. Our trains stop in over 45 Canadian communities. It's a rail network that covers the country as only the train can.
Illinois ranks worst in toxic rail spills

CHICAGO (UPI) — Illinois had 49 railroad accidents in 1986 involving toxic chemicals and other hazardous substances, the most of any state in the nation, according to a study released Monday.

The study by the Illinois Public Action Council said its findings were based on an average of 75 people, the national average and up to 15 people per incident, over the previous 10 years.

"Illinois is the toxic rail crossing capital," said Rep. Brian D. Danner, of Palatine, who released the study. "This is a matter of safety and the environment and the need for states to take action to protect our communities from toxic chemical spills." The report said 10 of the 49 accidents involved hazardous chemicals, and 29 caused a major emergency.

National schools vary in plans for asbestos

WASHINGTON (UPI) — About 15 percent of the nation's schools have submitted plans for dealing with asbestos problems, officials said Monday, the Environmental Protection Agency said Monday.

The EPA said another 39 percent of the schools will submit plans within 90 days, May 9, to submit their plans. Under the Asbestos Hazard Emergency Response Act of 1986, the plans were to be submitted to states by Oct. 12, 1987.

The remaining 30 percent of the schools with identified noncompliance, the EPA said Monday.

EPA said, however, the data from some states is incomplete.

"Just over one-third of our nation's schools have submitted any plans at all," said Rep. Brian D. Danner, of Palatine, who released the study. "In some schools, we have failed to comply with the law, saying it is in a manual or the book."

The states with the best compliance records are Arkansas, Kansas, Virginia, the U.S. Virgin Islands, with 100 percent of school districts either scheduling repairs or getting extensions. Nebraska and Wyoming had 99 percent.

States with the worst compliance records included Puerto Rico, 95 percent, Mississippi, 94 percent, Virginia, 94 percent, and the District of Columbia, 49 percent, Massachusetts 39 percent and Pennsylvania 29 percent.

Congress passed the asbestos law to ensure school districts inspected their buildings for asbestos, which was widely used as a fire-resistant material in ceilings and walls in the 1960's and 1970's.

SIU-U seeking director for employee relations

SIU is seeking applicants for a director of employee relations who will be a key member of the SIU System in labor relations.

Thomas C. Britton, vice president for administration, said the director will be active in collective bargaining negotiations; in representing the two campuses in labor-related matters; and in employment-related issues such as salary and compensation.

Applicants must have a bachelor's degree, three years of professional experience in personnel administration and experience in labor relations and labor relations personnel, or a master's degree, and an interest in practice law in Illinois will be given preference.

Britton said applicants will be informed in Carbondale, Edwardsville, Springfield, St. Louis and in the Chouette of Higher Education.

Good Luck Next Year!
XTC still funky and colorful in 'Oranges and Lemons'  

By Theresa Livingston  
Staff Writer  

XTC, the veteran English band, with nine albums under its belt, doesn't make music simply to make money, according to Colin Moulding, bassist for the group. "We do it purely down to the financial aspect, I think you've really lost it when you do that," Moulding said.  

This statement is consistent with the band's critical acclaim, as this critically-acclaimed group has been making hits for over a decade.  

XTC, one of the most innovative of the many bands forming in the wake of punk, began playing in 1977 out of Swindon, an industrial town on the remainder of England. The band, which consisted of Moulding, Andy Partridge on guitar and vocals, Barry Andrews on second guitar, Terry Chambers on drums, and Colin Moulding on bass, had a very popular following. Also with the release of two albums, "White Music" (1980) and "Drums and Wires" (1982), the band received favorable reviews.  

1989 MARKED a significant change in the group as the year saw both the replacement of Andrews by Steve Bown, a Dave Gregory and the release of the group's breakthrough album, "Drums and Wires." The album which included the first single to hit in the U.K., "Making Plans for Nigel." The breakthrough album, "Drums and Wires," all the way to the end with "Gardens of Eden." and "Children," there were many hits. "The Mayor of Simpleton," the first single of the album, is the band's attempt to simply be happy with life. The song which has already been made into a video, begun with the line, "never been near a university never took a learning degree," and deals with a theme of "emotion over education," according to Partridge.  

EVEN THOUGH the album successfully spans many musical genres, the lyrical content of the album revolves consistently centered around the innocence of children and the range of human emotions as the member of the group discover the joys of parenting. From songs such as "Hold My Hand," which deals with the emotional difficulties of a father-son relationship and "The Loving," which Partridge has dubbed "All You Need is Love," the classic Beatles song, in another form, are the band's introduction for children to the world.  

"IF THE whole world's going to listen for an hour, say what you want to say. The songs are about life and how we feel, about money, about sex, about drugs, though we do disguise them a bit because it's difficult to be stark naked," Partridge said.  

XTC, long noted in musical circles for their witty, whimsical and, at times, biting lyrics, view lyrics as an integral part of the music-making process. "This songwriting is more than turning on a word machine. The '80s was a great time to be a musician because there wasn't any pressure to make a hit. People were willing to try and make the music. The artistic was separate from the financial," Moulding said.  

THE BAND'S philosophical standpoint, as well as its preference for creating psychedelic pop albums rather than live work, has made comparisons with their fellow countrymen, the Beatles, inevitable. "It (the comparison) is quite flattering, really but flat­tering also. Americans like to make similarities, draw comparisons, like that, but it tends to stifle creativity. We admire the Beatles but we're People actually wanted to disguise them for an hour," Moulding said.  

ALTHOUGH PARTRIDGE is responsible for most of the XTC songs, Moulding wrote three of the songs on the album, which Partridge calls "Collins' cynical irony." Although, the lyrics of the three songs, "Kings and Queen," "One of the Million," and "25¢ (the comparison) is quite flattering," really but flattering also. Americans like to make similarities, draw comparisons, like that, but it tends to stifle creativity. We admire the Beatles but we're People actually wanted to disguise them for an hour," Moulding said.  

"IT WAS just the way I felt," says XTC, Page 17.

In a surprise move, the group changed producer Paul Fox, relatively unknown in music circles, to produce the album, rather than longtime producer Eugene Chadbourne. This is Paul's big venture.

We were impressed with his work with Roy Orbison. We basically gave him a song and asked him to rewrite it, which he did brilliantly. It was very impressive, a really brave thing to do," Moulding said.

ALTHOUGH MOULDING admits liking a few contemporary artists such as K.D. Busch, Tracy Chapman and Edgar Winter and the New Bohemians, he says the band mainly looks back to the music of the '60s for inspiration.

"Today's music seems to be beyond die. It just seems to be a three-minute, programmed format. A lot of it is dance music," Moulding said.

Moulding explained the band's penchant for '60s paraphernalia in this way: "It's easy to pick up a drum and a sequencer and sing something over the top, as opposed to actually writing a

Scientists: Too much fat in livestock

DES MOINES, Iowa (UPI) - Survey after survey indicates that consumers want leaner meat in their diets.

Simple rules of supply and demand should, in turn, mean a leaner meat product: a leaner meat would be more worth than a fatty one at the slaughterhouse. But implementing advanced methods of evaluating fat-to-lean ratios has been slow, a Purdue University expert says.

Before consumer demand can change the supply, these advanced methods must be in place, John C. Forrest told an audience at a meeting of the American Society of Animal Science Monday.

Forrest said the farmer will have to produce a leaner meat animal, such as swine, when it becomes economically beneficial.

"The consumer is saying that leaner is better," Forrest said. "But that isn't passed along through the meat packer and the consumer.

The reason the message isn't passed along is that slaughterhouses generally use the same methods for determining fat-to-lean ratios as have been used for decades. In years to come, electronic sensing equipment and computers will give accurate fat-to-lean ratios in seconds.

"Biomedical technology, combined with advanced high-speed computer technology, offers potential for improved precision in meat animal evaluation and pricing," Forrest said.

Purdue researchers currently are studying three evaluation methods that show promise. The methods under study are: electronic probe of the carcass; ultrasound imaging of live animals; and electromagnetic scanning.

All three evaluation methods can be adapted to the slaughterhouse. Forrest said in the case of ultrasound imaging, advances in robotics and computerized image analysis are needed as well.

In a move that is very unusual in the music world, the members of XTC have repeatedly refused to tour again under any conditions since Partridge collapsed, after four years of extensive, exhaustive world touring, onstage in Paris in 1986.

"YOU DON'T see the audience when you're onstage and they become more and more remote as we moved from small clubs to big hall. I believe in the song, but I wasn't doing them justice with me screaming onstage," he said.

Moulding said the band simply don't want to go through the ordeal of touring.

"We're not going to tour. We don't like to make records because we feel it presents the best side of the group and it's what we like to do," Moulding said.
Film Review

image and the symbolism of death and life is compelling. The music, by Sasi Poluedorous, is equally majestic. The danger of the jungle is implied by the heavy, deep beating of drums as the British stalk through the underbrush.

Nolte is not particularly impressive as Learoyd. The role provides a break from his recent string of comic farces, including "Three Fugitives," but that's about it.

The scenes when Learoyd struggles through the jungle, before being found by the headhunters, verge on the heavy-handedness. Nolte overacts some of these scenes in the jungle, though his desperation just before being found is realistic.

The filmmakers amplified his heavy breathing and this blatant dramatic play detracts from the emotion of the scene. However, Nolte's acting in the rest of the film is true to character. His sorrow at saying goodbye to his daughter is touching.

Havers, who plays Captain Fairbourne, is especially good. His last role seen by many American filmgoers was in "Chariots of Fire." Havers' calm but attentive style suits the role of Fairbourne, who is essentially an observer. Through him, the audience sees Learoyd's peaceful village destroyed by the outside world.

The themes of the movie are clearly obvious — life and freedom. In case the audience does not catch on the first time they are mentioned, the words are repeated several times throughout the film.

The dialogue is full of not-so-subtle comments on war, such as "When the Allies recapture — I mean liberate — this country..."
Drug informer tells of alleged plot to get even with 'Miami Vice' cast

NEW YORK (UPI) - An alleged narcotics undercover informant for the Drug Enforcement Administration claims DEA planned a "sting" operation so it could arrest members of the "Miami Vice" cast, it was learned Monday.

"The scheme was to get co-conspirators with the NBC series for the unflattering manner in which they were portrayed," said DEA spokesman Dorene Capasso in a statement Monday.

The accusations by self-proclaimed "Miami Vice" informer Michael Swint were rejected by DEA officials who said, "We would not be able to comment whether we knew or didn't know the guy." Swint, in a taped interview with "Current Affairs" reporter Bill McGowan, said the DEA told him to get close to "Miami Vice" cast members because the federal agency didn't like the way they had been portrayed on television.

"The DEA had a real bad grudge about the way they were being portrayed on TV of thieves and crooks ... and they started to wonder 'How do we get him?'" Swint said on the taped interview.

At another point in the report, Swint said the DEA office in Jacksonville, Fla., offered him about a $50,000 yacht with video cameras and other gear.

"They were going to tape them all partying and then arrest them right there on the spot and the headlines would have been 'DEA arrests "Miami Vice" cast,'" Swint said.

The report also alleged that DEA officials offered Swint $50,000 to obtain an interview with the show's "Miami Vice" star, Tony Dorsett.

"Swint said McGowan said in an interview that Swint had contacted 'Current Affairs' with his story, describing him as a freelance bounty hunter for the DEA. McGowan said he checked Swint out and a DEA official confirmed Swint's status with the agency.

The "Miami Vice" sting, which was to have taken place in 1987, never came off, Swint said.

"It never came about because I called it quits on the fact that that and a lot of other things we were starting to do things we wanted to do on our own science. Anything that the DEA ever let me see was real borderline illegal and so unethical that it blew my whole concept of law enforcement," Swint said.

Bess Myerson's boyfriend may move to halfway house

NEW YORK (UPI) - A federal judge Monday ordered former Miss America Bess Myerson's boyfriend, Carl "Andy" Capasso, transferred from Pennsylvania prison to a halfway house in New Jersey serving his sentence on tax evasion charges.

But the judge later in the day stayed his own order until Friday when he will recover papers on the Bureau of Prisons' movement that he does not have jurisdiction to designate a facility in which Capasso should be held.

Capasso was acquitted along with ex-husband and Myerson's lawyer, Llew Stewart, on April 12 of tax evasion charges.

"Myerson's boyfriend, Carl Capasso, was acquitted along with Myerson's lawyer, Llew Stewart, of income tax evasion charges," U.S. District Judge Charles Shaw said Monday.

Capasso, 31, served more than two years of the sentence, for which he was eligible for parole after 15 months. He is free on $50,000 bail until his final sentencing.

"He is currently serving time on a $250,000 income tax evasion charge at the Allenwood Federal Prison in Pennsylvania. He is in Ohio," Shaw said.

Dorsett was sentenced to 60 months in prison after being convicted of conspiracy to defraud and tax evasion.

"I'm happy," said Capasso in a telephone conversation with his attorney, "I'm happy to get back to my business and take care of my children."
Men's first outdoor meet finds track team ready

By Paul Pabst
Staff Writer

The men's track squad notched two relay wins at the Florida Relays in Tallahassee, Fla., in the first outdoor meet of the year.

"I'm really happy with the first outdoor meet," coach Bill Cornell said. "We faired pretty well against the other schools.

The 4x110-meter relay team of Pentigrave, Andy David, Petravig, David Beucham, and Andy Beucham set their event in a time of 45.89 seconds. They distance pacing team consisted of the same runners as the other winning relay except for Craig Steele, who ran for David Beucham. The combination won the relay in 3:52.78, beating Petravig overtaking another runner at the finish. "Both relays did well for us," Cornell said. "The point total gained a lot of the tougher southern schools were there.

The relays, which took place Friday and Saturday, consisted of more than 30 teams. The meet was non-scored.

Darnell Williams and Randall Smith added a lot to the Saluki's successful weekend. Williams placed third in the four intermediate hurdles in a time of 58.57. Cornell said, "Darnell could be the best 400-hurdler in the conference."

Daugherty did well.

Cornell added a sour note, during the 4x400 relay Angie Nunn strained the hamstring on the opening leg of the race. Nunn struggled to pass off the baton. By that time the fournace was 23 seconds behind the last-place team. A solid effort closed the gap but the other three Saluki runners weren't able to overcome the deficit.

DeNoon showed his satisfaction with the team's performance of his outdoor team.

Kathy Raske sets school mark in women's first spring meet

By Paul Pabst
Staff Writer

Fresh off her participation in the NCAA indoor championships, Kathy Raske set a school record at the Mountain West Conference. raske set the school record 14.66 in the 110-meter hurdles.

"I really thought we could have broken the record," Raske said. "The conditions were perfect for running.

The 110-meter hurdles are the second hurdles in a time of 13.77 seconds to win the event at the Georgia Relays.

"I hit a hurdle or two," Raske said. "My time could have been better, but it is still a great way to start off.

The Salukis brought only 14 athletes to the Athens, Ga., meet, the first outdoor test of 1989. In addition to Raske, there were several other strong performances.

The distance medley team of Rosanne Vincent, Lisa Judas, Donna Kryczek and Jane Schumacher ran to a second-place finish in 1:51.36. A nearly identical 4x800 team, Danielle Sciano instead of Kryczek, came in second place by four one-hundredths of a second with a time of 15:37.

According to Coach Don Jones, the 27 team field was a tough one. "The relay team ran well for us. We beat some tough competition to finish in second."

Another strong point for the Salukis at Saturday's non-scored meet was the jumping of Christiana Philippou.

Philippou notched a pair of first-place finishes in the long jump and the triple jump, leaping 19 feet 3 inches and 39-4 feet, respectively.

On a sour note, during the 4x400 relay Angie Nunn strained a hamstring on the opening leg of the race. Nunn struggled to pass off the baton. By that time the fournace was 23 seconds behind the last-place team. A solid effort closed the gap but the other three Saluki runners weren't able to overcome the deficit.

DeNoon showed his satisfaction with the Saluki's successful weekend.

Golf coach pleased with team

By David Galleneti
Staff Writer

Just one day after returning from their Florida trip, men's coach Jerry Hartzog expressed his satisfaction with the early state of his team.

"If I really feel pretty good about it," Hartzog said. "We improved 41 strokes over last year in the same tournament."

The Salukis finished with a team score of 1,432 in third place of the conference.

The top individual for SIU-C was sophomores Mark Bellas, who finished with rounds of 78, 75 and 77 for a total of 230. Sophomore Brett Pavlovich finished at 75, 79 and 79 for a score of 233.

"Those are tough courses," said Hartzog about the three cities used for the tournament. "Two of the courses are used for PGA qualifying rounds."

Hartzog said the poor weather in Illinois cost the Salukis in Florida. "We would have gotten out 10 to 12 times we would have been several strokes better at a team," Hartzog said. "We are trying to get back into the swing of the last summer and fall. This trip takes up about one-fourth of our budget, and does it in to get the kids in shape. We almost have to do it."

Women golfers playing on little practice time

By David Galleneti
Staff Writer

After a week in sunny Florida, the women's golf team is ready to get down to some serious practice. Only the weather doesn't seem to want to cooperate.

"We had a whole week of practice," I just hope we do not get back here and lose it all," coach Diana Daugherty said.

The team has faced three of the four tournaments in Florida with a team score of 436. Kanas won the event with a score of 627 while Missouri finished second at 438.

"Putting together scores of 325 and 331 in the two rounds, Daugherty said for little practice coming in, the team is doing well.

"I'm very pleased with the third," Daugherty said. "They're tough to win to, especially since our first practice was the first 18 holes we played.

SIU-C finished above Gateway conference fees Western State andemain State, which Daugherty said was better revenge over last fall when the Salukis dropped every match with the two teams.

Junior Lisa Meritt was the top individual, scoring an 80 and 81 in her two rounds to finish at 181, good for 10th place. Freshman Jane Childress finished with a 79 and an 83 for 162, good for 11th.

"Lisa played steady and Anne came in and took 11th which is terrific," Daugherty said. "Our goal is to be under 320 for this time of the year, but I thought it was great. The people there played well.

"I can't believe the way he reacted... maybe I should back off... I'm so confused, He doesn't think he has a drinking problem."

Aren't you confused about how to help a friend with a drinking problem?

Perhaps we can help.

The S.O.S. (Self Over Substance) Peer Facilitator Program can help you learn more about alcohol and drugs, yourself and how to help a friend.
Baseball team opens season with 4-7 mark

Young pitching causing problems for coach Jones
By Troy Taylor  Staff Writer

Two days after the Salukis gave up seven runs in the last inning of the 9-8 loss to Mont- cello in Lake Worth, Fla., Coach Itchy Jones still laments the poor performance of the baseball team's youthful bullpen.

"We had a good chance to come up with a good finish and we let it go," Jones said. The Salukis concluded their spring trip at 4-7, claiming victories over Fairleigh-Dickinson, Monmouth, Pace and Rutgers. While the Salukis' offense appeared potent — spearheaded by the team-high 420 average of center fielder Doug Shields — the pitching dilemma will occupy the coaching staff's thoughts for a long time.

The Salukis lost four games in which they gave up a lead in the last three innings.

"We scored enough runs to win most of the ball games," Jones said. "But we needed someone who can come in and get us an out or two in a key situation. We're going to have to take the early part of the season to find out." 

Staff Coach Sam Riggleman must sift through the seven freshmen pitchers, looking for those willing to challenge the hitters with the game on the line.

"Without a doubt, it's a question of wanting to be in those situations," Riggleman said.

The Salukis, who were 6-4 after last year's spring trip, have seven games scheduled through Easter Sunday. They are at Arkansas State for a doubleheader Wednesday, then have a single-game at Southeast Missouri Thursday. The home opener at Abe Martin Field is a doubleheader Saturday against McKendree starting at noon. They also have a twinniel slated for 1 p.m. Sunday against Quincy College.

Here are the results from the spring trip:

SICU-C 12, Fairleigh-Dickinson 1.

Johnson, an assistant, Kurt Endrode opened his collegiate career in a big way, driving in four runs on three singles and stealing two bases as the Salukis opened their season with a victory.

Doug Shields also had two doubles and two stolen bases. Matt Giggling went 4 for 5 and had two doubles while pitcher Chris Bend struck out four in five innings.

Miami 6, SIU-C 5. Miami's Alex Fernandez (5-1), the top draft choice of the Milwaukee Brewers, fanned 12 and allowed only five hits as the Hurricanes survived a pitching duel with the Salukis' Dale Meyer. The sophomore right-hander hit Miami for seven complete innings before the Hurricane erupted for all six runs in the eighth.

James Madison 11, SIU-C 4, Jackson Madonna (10-1), led by Steve Schwartz's three-bagger batted in, scored three runs in the fifth and eighth innings to secure the win. The Salukis threw four freshmen pitchers, with lefthanded starter Bryan Oestreich pegged by the loss.

Montclair 6, SIU-C 4. Miami's despite Shields' 4-0 appearance, the plate and the Salukis' five-run seventh.

Florida Atlantic scored nine runs in the eighth for a comeback victory.

Jackson, Mourning top UPI all-freshman squad

United Press International

Chris Jackson, who set an NCAA scoring record for freshmen, has been named Freshman of the Year and leads the 1973-74 United Press International all-freshman team.

The 6-foot Jackson had 960 points and averaged 30.2 points for Louisiana State. Both figures surpassed the 1973 freshman marks of James "Fly" Williams of Austin Peay, who scored 854 points and averaged 29.4.

Jackson also made first team All-America.

SUCCESS, from Page 24

Jerry Jones was the rebound leader with 8.8 per game while Rick Shipley pulled down 7.8.

As a team, SIU-C outrebounded its opponents 29-36-9 and his 95 of 2,100 field goals for 45.4 percent.

The Salukis will look to improve on a disappointing Missouri Valley performance. SIU-C finished in a fifth-place tie with Illinois State and DePaul but played Creighton in the championship of the MVC tournament.

STUMBLES, from Page 24

Raske noted that the success of his "to-do list" was his achievement of goals for the season. "I first wanted to qualify for the NCAA's, then when I got there I wanted to get to the finals. I had a good season."

Raske added that the strong competition was a good experience for the future. "I competed against the best in the nation and held my own. It was a good experience for me to go against the best, it will prepare me for when I go for the Olympic trials."

Scott to change schedule in effort to win NCAA bid

By Troy Taylor Staff Writer

You won't catch women's basketball coach Cindy Scott trying to schedule the likes of No. 1 Tennessee, No. 7 Long Beach State, No. 14 Purdue and Western Kentucky all in the same season.

Scott dotes his highly-rated schedule as being the only real obstacle to the 1960 Salukis not receiving either an NCAA or Women's NIT post season invitation.

"I can promise you I will change my scheduling philosophy," said Scott, whose team went 1-4 against schools that qualified for the NCAA's. "We're not going to kill ourselves by playing Top 10 teams and have it hurt us in the end."

Scott had planned his schedule hoping to impress the national selection committee. However, the Salukis lost to Tennessee 74 Long Beach State 91-59, San Francisco 64-66, and Western Kentucky 86-59 -- in addition to the 70-53 loss to Illinois State in the Gateway Conference championship game.

It was always under the impression that the harder your schedule, the better off you were, whether you win or lose. But now, I know that's not true. You need to win 20 games to play in a postseason tournament."

Scott said that he already has replaced Tennessee with Tennessee Tech, the No. 11 seed in the Midwest Region who "set to No. 3 seed Iowa 77-76 in the second round on March. "Tennessee Tech is a good team, but someone we can play with," Scott said.

The Salukis finished second in the Gateway at 10-3. They were 11-3 at home, 7-4 on the road, and 1-0 on neutral courts.

average attendance at the Arena was 850.

The Salukis lose four seniors: Deanna Sanders, who holds nine school records in 3-point shooting; Todd Nelson, whose 75.8 percent shooting from the free throw line was a team high; Cathy Kampwerth, who led scoring at 11.9 points per game and holds season and career records in blocks; and Dana Fitzpatrick, who led in assists (4.0), steals (1.1) and minutes played.

Two starters return: Amy Roberts, a sophomore forward who averaged 10.5 points and led the team at 8.4 rebounds per game, and Collette Heimstead, a freshman point guard who started 28 of 28 games and averaged 2.9 turnovers in the last 13 games.

Other top returnees: Cyd Mitchell, a 6-2 sophomore who was the team's top scorer and second top rebounder three years ago, and Deanna Kibelkis, a junior reserve who had a team-high 12 points against 16th-ranked Tennessee on Jan. 22.

Newcomers: Allison Smith, a transfer from San Diego State that sat out this season and who Scott says "will be a key for us." Also, Angie Bouque, a 5-10 guard from Memphis, Tenn.; Kelly Firth, a 6-3 center from Springfield; and Tiffany Bolden, a 5-11 forward from Kansas City, Kan. The Salukis expect to sign at least one more player during the April signing date.

Salukis finish 4-2 to raise record to 4-5 for new year
By Douglas Powell
Staff Writer

The Saluki softball team returned from spring break with a third-place finish in the Florida State Seminole Invitational Tournament.

The Salukis finished the tournament with a 4-2 record defeating No. 14 Nebraska. The team's season record stands at 4-6.

The Salukis' first three defeats came in regular season play in Tallahassee against Northern Illinois and a doubleheader against Missouri.

Junior second baseman Shelly Gibb's play was critical to the Salukis' season. Gibb, who was defeated by the Salukis' season record, had eight hits. Gibb's bat was on fire.

"It was just one of those games," coach Kay Brechtelsbauer said. "Our pitching didn't hold up."

A doubleheader against Missouri in regular season play resulted in two more Salukis losses.

"We just didn't score in either game," said Brechtelsbauer. "We couldn't push a run across."

Traci Furlow, 9-2, pitched a complete game with seven strikeouts.

Furlow and Mary Jo Fimbach were named to the all-tournament team in the Florida State Invitational.

Fimbach batted 1.2, had five strikeouts in the 1-0 game but Missouri scored on a sacrifice fly, giving them the 1-0 win.

The first win of the season came in tournament play as the Salukis stomped Stetson 11-0. Sophomore Lisa Robinson, 2-1, was on the mound, and once again Gibb showed her stuff by going 3-for-4 with a home run. Mary Jo Fimbach and Michelle Davidson each had two hits.

"They (Stetson) are a weaker ball club," said Brechtelsbauer. "We came out with a bang.

"We just ran out of time," said Brechtelsbauer in regards to the Salukis' loss to the third-ranked Florida State by a score of 4-2. Karen Greenawalt and Gibb were offensive strong-points with two hits each. Dick Cokley was on the mound. Brechtelsbauer said the Salukis got off to a slow start offensively and had to play catch-up.

With one win and one loss in the first day of tournament play the Salukis racked up three wins in the second day of the tournament. First against Southwest Missouri, Miami of Ohio, and Nebraska were defeated by the Salukis.

Jennifer Brown threw a shutdown game against Southwest Missouri and Fimbach had three hits. Miami of Ohio was defeated by the Salukis with a score of 5-3.

"Fimbach had some key plays," said Brechtelsbauer. "But the Salukis do have G.G."

We were disappointed that Gibb wasn't chosen for All-Tournament, but I don't pick 'em," said Brechtelsbauer.

The Salukis will be in action this weekend playing the Salukis' annual doubleheader. The tournament was a loss against Northern Illinois by a score of 1-0. An error on the ice shortstop.

Junior second baseman Shelly Gibb's average stands at .406 in the early season.

**Gymnasts fall to No. 1 Illinois in final home meet**

By Stephanie Wood

It wasn’t pretty, but it will certainly be remembered. Illinois, the nation’s No. 1 team, rumbled to victory over the Salukis in the final home meet of the season by a score of 196.2550 to 190.8750. Intercollegiate athletic programs are based on the performance of athletes and where they were placed in the competition.

Illinois won the competition, but the spotlight was on SIU-C. The team’s mentor of 25 years, assistant coach Bill Meade, lauded the accomplishments of Carbondale mayor Neil Dillard, the opposing coach and his athletes. March 17, was designated Bill Meade Day in Carbondale by Dillard.

Meade made jokes about his career, including the awards and the competition. Meade was very much a part of his team’s daily work, and it was a very enjoyable season for both the players and coaches.

The Salukis set a new record in the final meet of the season. In addition, the Salukis set a school record of 3,569 points scored. "I think you have to give credit to the fans in Southern Illinois. They have all been my great friends, and I started making fans over 50 years ago. We did a lot of exciting things for them and they answered," Meade said.

Since the 1984 season, Herrin has won four seasons at SIU-C, garnering a total of 10 meet victories. "I think it is definitely a plus," Herrin said. "We are in a very elite group, and we are excited about having been in it. Everyone is allowed a poor performance, and that was by far our poorest." The Salukis will lose four seniors to graduation — Kai Nurnberger, Randy House, Scott Walsh and Dominick Nardin.

Salukis see success

By David Galinnetti

Winning among the top 50 teams in the country is fine by coach Rich Herrin. As a matter of fact, he found it rather entertaining.

Scott wants lighter schedule next season

Page 21

“Overall it was a fun year,” Herrin said. “We were among the top handful of teams for the NIT. It was a very enjoyable year for the players and coaches.”

There are a lot of teams who would have liked to have been in our position. I’m very happy with where we sit.” The Salukis finished the year 20-14, the first 20-win season for SIU-C since 1977. In addition, the Salukis set a school record of 1,569 points scored. "We try to emphasize the good things that happened as a team,” Herrin said. "We did have seven guys who received some kind of individual award. We have done a lot of little things that were very important for a team.”

The Salukis’ record is also the first mark over .500 since 1977. "I think you have to give credit to the fans in Southern Illinois. They have all been my great friends, and I started making fans over 50 years ago. We did a lot of exciting things for them and they answered," Meade said.

The Salukis are in the final meet of the season. In addition, the Salukis set a school record of 3,569 points scored. "I think you have to give credit to the fans in Southern Illinois. They have all been my great friends, and I started making fans over 50 years ago. We did a lot of exciting things for them and they answered," Meade said.

The Salukis’ record is also the first mark over .500 since 1977. "I think you have to give credit to the fans in Southern Illinois. They have all been my great friends, and I started making fans over 50 years ago. We did a lot of exciting things for them and they answered," Meade said.
