Supermarket officials have given in to residents on Brook Lane and Walnut Street-and are revising their plans to expand their shopping and parking facilities at the intersection of Main Street and Oakland Avenue.

Claiming that officials of the National Supermarket chain are willing to do everything in their power to appease the grievances of their neighbors, John Feirich, the store's attorney, asked the City Council Monday night to postpone final decision on the chain's plans to expand until Oct. 2, when he said, the store would have a plan to remedy the residents' complaints and would granted his request.

Late last month, residents with homes bordering the site of the shopping center convinced the city's planning commission to deny approval of National's request to remove 4.7 acres of land adjacent to the store from low-density residential to planned business.

National wants to add 93 additional parking spaces to the east of the store and 36 more spaces to the west. In addition, store officials want to expand the building to the east in about five years.

However, store officials did not expect the force of opposition from their neighbors. Residents fear that this addition will be followed by others and that traffic, congestion and litter caused by the store will worsen.

To avoid the intention to compromise, Feirich changed the rezoning request for the west side of the store from planned business to high-density residential, a zoning which provides more protection to nearby residents.

Under high-density zoning, store officials would be required to construct a fence shielding the neighboring homes from the parking lot. It will also limit the height of parking lights to 15 feet. In addition, store owners would be prohibited from selling or disposing of their property for the use of any other business.

In response to the complaint that the grounds are not kept up. Feirich also revised that by Oct. 2, the store will have a written policy on upkeep and will have a "track record for the council to look at.

However, the residents aren't sure they're satisfied. Although W.K. Turner, 30 Brook Lane, said the group would have to check with its lawyer before accepting the revised proposal, he noted that National is still planning to increase the height of the building to planned business, a designation which doesn't offer the protection that National residential does.

Under high-density residential zoning, National would not be allowed to expand its store. And, any addition of additional parking lots would be permitted only if the council granted a "special use" permit.

Turner said that before the store expanded its store, and one more of additional parking lots would be permitted only if the council granted a "special use" permit.

Springfield, Ill. -- The Daily Egyptian, a student newspaper at Southern Illinois University, published an article on September 14, 1978, titled "National needs neighbors' complaints.

"Constitutional vote should be voided, held over, Umholtz charges

By Susan Fernandez
Staff Writer

Representing what he says are "parties interested in maintaining a credible student government," Stewart Umholtz has petitioned the Judicial Board for Governance to declare that North Osceola, student vice president, and Bob Saal, senate president, are unconstitutional, and to call for a re-election.

The Judicial Board will hold a hearing at 1:30 p.m. Thursday in the Student Center Assembly Center.

Rouleau and Saal were elected to the senate Aug. 31, and the elections were ratified by the senate Sept. 6.

"These elections are unconstitutional because there was no vacancy in the office of the vice president," I assumed that office, as the Student Government bylaws require of the senate president pro tem. when Janet Stoneburner resigned last June, and became vice president," Umholtz said.

Stoneburner, Student President Garrick Martin, and a third, running mate, was elected with Matthews last April. She was removed by the campaigning was the "term of the person," "financial difficulties," Brian Adams, Matthews' administrative assistant, has previously been quoted as saying that Umholtz's term as president pro tem expired before Stoneburner resigned, thus making the election unconstitutional.

"Traditionally, the pro tem has served as the sinker of the officer," according to Bob Saal, who was re-elected to the senate at the Aug. 31 senate meeting, the pro tem serves until a new pro tem is elected, and not on a semester basis.

"The pro tem stays in office until a new pro tem is elected," Umholtz said, "and it is not determined semester-to-semester. This is implied in the constitution," Saal said.

Rouleau, however, said he thinks Thursday's Judicial Board hearing may be unnecessary. He said the Student Government constitution.

They will not have the required quorum of five board members, which is unconstitutional. Stewart has the right to challenge the constitutionality of the elections, but the constitutionality of any action of the board members thereafter is questionable, "Leroute said.

Matthews, who will respond to the petition in "manner likely to be interpreted as a representative of the meeting," declined to comment.

Springfield, Ill. -- The Daily Egyptian, a student newspaper at Southern Illinois University, published an article on September 14, 1978, titled "Constitutional vote should be voided, held over, Umholtz charges.

SPRINGFIELD (AP) -- Gov. Thompson said Wednesday that he has adopted 14 recommendations of a cost control task force designed to save taxpayers $50.7 million this fiscal year.

"We are moving as quickly as possible to make decisions on more than 600 of our recommendations of the task force," the governor said in a statement on progress towards carrying out the cost-cutting suggestions of the blue-ribbon panel.

However, at least one of the recommendations the governor cited was a repeat of a previous announcement. In addition, two other economies that Thompson cited were carried out before the Governor's Cost Control Task Force issued its report July 31.

The task force, funded and staffed by private business executives, spent 11 months studying state agency records and interviewing more than 1,000 workers.

The panel said its 178 recommendations eventually could save state taxpayers at least $14 million a year in waste and mismanagement, and bring in extra revenues of nearly $12 million.

Thompson cited for a second time his efforts that have increased the amount of money the state is receiving from the federal government for social services. Thompson has been under fire from Democratic gubernatorial candidate Michael J. Bakalis for his handling of the so-called "Title XX" recommendations.

In the Sept. 6 televised debate, Bakalis claimed Thompson was failing to obtain all the federal money that Illinois was entitled to. The candidates are running for the Democratic nomination.

Thompson said Bakalis was disturbing his record, and added that much of the loss occurred when former Gov. Daniel Walker, a Democrat. Among other savings efforts cited by the governor:

• A decision to close two outdated state armories in Chicago to save $220,000 a year in operating costs.

• Changing the state medical plan for employees to minimize its costs for one time savings of $14.4 million and an annual savings of $15,000. That change was carried out before the cost control panel produced its report.

• Merger of two state agencies concerned with energy and environment into an Institute of Natural Resources. The merger first was announced and discussed several months before the July 31 cost control report was issued.

• Increase in hunting and fishing license fees to offset service costs for an increase in yearly income of $4.3 million.

Deal could let city annex Cedar Lake

By Pam Bailey

A compromise between state Sen. Kenneth Burbee, D-Cardbale, and city officials may make it possible for Carbondale to attain its long frustrated goal of bringing Cedar Lake, the town’s major water supply, within its protection.

Burbee has agreed to withdraw his opposition to legislation that would allow Carbondale to annex Cedar Lake. His change in posture is in return for the city’s promise to rename any zoning jurisdiction it might have over residential areas adjacent to the lake.

With Burbee’s approval assured, John Wernick will appear before the Illinois Municipal Problems Commission Friday to ask it to sponsor legislation allowing cities such as Carbondale to annex parts of the lake. At present, however, Carbondale is not contiguous to city limits. The commission in a state-appointed agency which holds periodical hearings throughout the state in an effort to identify problems which are facing and to assist the General Assembly in preparing legislation that is responsive to local needs.

Carbondale has long had its eye on Cedar Lake. Although the city owns the body of water, the lake is several miles from the city limits and thus beyond Carbondale’s zoning and taxation powers.

City officials feel it is imperative to gain zoning power over the lake if it is to preserve the high water quality necessary.

“We have excellent water quality in Cedar Lake,” said Mike Miles, the city’s police spokesman. “But the City Council doesn’t have the power to deal with the on-shore and off-shore pollution and to head off the pollution in drainage areas. If we don’t, the quality will steadily decline.”

The case most often used by city officials to illustrate the potential danger of pollution in the lake is that of Egon Kamarysz, developer of the Union subdivision and, an assistant professor in political science at SIU.

Kamarysz was sued by the city in 1976 for improperly operating a seweage lagoon for the Union Hills area and for allowing sewage to drain indirectly into Cedar Lake. The suit asked the judge to order Kamarysz to repair the lagoon which it would no longer pollute.

Although the city won the suit and Kamarysz was ordered last month to begin repairs by Nov. 15, Fry points out that “the city had had the power to zone, he wouldn’t have built the lagoon in the first place.”

Legislation was introduced to the General Assembly earlier this year which would have allowed cities to annex non-contiguous water reservoirs. The bill passed the House, but when it got to the Senate, Burbee convinced the bill’s sponsor to restrict the legislation to cities with populations of 10,000 and above. Carbondale’s population is about 27,300.

The bill passed the Senate in its form and is presently awaiting the governor’s signature.

While Burbee said he does not object to the city annexing the lake, he is wary of any extension of Carbondale’s zoning powers in adjacent residential areas.

According to state statute, if there is no county zoning—and there isn’t in Carbondale’s jurisdiction—“there is a mile-and-a-half border involved.”

"I’m not opposed to Carbondale annexing the lake,” Burbee said. “What I’m opposed to is the city’s ability to annex parts of the lake, and there are lots of people living there who are 10 to 15 miles away from Carbondale. It wouldn’t be right for the city to be able to tell them that they can and cannot build when there is already absolutely nothing about the government of Carbondale.”

After expressing the opinion that it would be beneficial to the city to push legislation that the area’s own senator, Burbee, would sponsor, Burbee advised Wernick to visit the legislature the week before Thanksgiving before Burbee left for the week and forget a compromise.

Burbee said he would be very pleased with the legislation Wernick will propose to Friday to the Municipal Problems Commission in Chicago, will eliminate any competition. He speculates that the city’s zoning jurisdiction may not extend beyond the reservoir.

Oswald’s widow says ‘not qualified’ to state if husband was killer

WASHINGTON (AP) — Lee Harvey Oswald’s widow told the House Assassinations Committee Thursday that she is “not qualified” to say whether her husband murdered President John F. Kennedy.

But Marina Oswald Porter testified that the former Soviet security officer had been nothing unusual about her husband when he left home the morning of Nov. 22, 1963, and during his assassination. She also said Oswald avoided discussing Kennedy’s murder the one time she talked to him after arrest.

Rep. Richardson Preyer, D-N.C., asked her, if with 15 years of hindsight, she could say whether Oswald did in fact assassinate the president. She answered, “I don’t know if I am qualified to make statements like this. I can only speak for one side of Lee but I don’t know what happened.”

“If he did it, do you know why?” Preyer asked.

“arried, she said.

Asf if Oswald protested his innocence, she said, “He never told me I was married.”

“Did he look scared?” she was asked.

She said the couple had no problem by locking Oswald in the bathroom. “An hour after him when we walked back, he was sitting on the floor and was involved in an anti-communist campaign, dramatized her husband’s career with politics and fascination with guns.

“Rosen was not just a manly Bobby at possessing the rifle,” she said of the night that Oswald came home from his first. “It seemed he was capable of killing someone with it.”

Earlier, Mrs. Porter testified that when they were first married and lived in Russia, President Kennedy’s speeches on a short-wave radio and had “old things” to say.

Mrs. Porter and Oswald were married in April 1961 in Russia, only a few months after President Kennedy was inaugurated as president.

Oswald, who spoke both English and Russian, was sometimes cut off about Kennedy, Oswald’s widow said. “He was very ambiguous,” she said. His own husband, President Kennedy, it was only good, always good.

“I think it was the lone witness as the committee continued investigating Kennedy’s death,” she said. “This wasn’t a problem.”

Mrs. Porter was the lone witness in the trial in 1963. Oswald never lived to tell his story; he was shot to death in the Dallas police station by Jack Ruby.

Suspect in Moro murder arrested in Milan

MILAN, Italy (AP) — Corrado Alunni, wanted in the kidnap-murder of former Premier Aldo Moro and reputed to be the new leader of the Red Brigades, urban guerrilla organization, was arrested Wednesday evening in Milan, police said.

Police did not explain how the arrest occurred. The suspect was caught hiding in a residential building in a suburban district near the airport.

His name was mentioned by investigators immediately after Moro was kidnapped in Rome March 16 and his five bodyguards shot in a street ambush. An arrest warrant was pending against Alunni on charges of having taken part in the ambush and the May 9 slaying of the Christian Democrat politician.

Carter seeks accord on Palestinian Arabs

CAMP DAVID, Md. (AP) — President Carter intensified his efforts Wednesday to break the stalemate in the future of Palestinian 4 areas as the summit moved toward its "op.

News Analysis

The fire which destroyed the Nutrition Headquarters warehouse took one hour for Carbondale firemen to get under control. Three high-rise firemen were called back twice Wednesday morning to extinguish the fire. A spokesman for the department said Wednesday evening there is no danger of the fire rekindling.

News Briefs

Local stages,” said Jody Powell, the summit spokesman in an overall assessment of the eight-day old conference among the leaders of the United States, Egypt and Israel. “I can’t imagine any more intensive period of discussions.”

Powell confirmed that the drafting of the windup statements had begun. Diplomatic sources, asking not to be identified, said the talks might end Thursday night or Friday morning.

Despite the step-up in U.S. efforts, there was no indication that a deadline is being imposed to end his talks with Begin and Egyptian President Anwar Sadat.

West Germans refuse to transfer Croatians

BONN, West Germany (AP) — The West German government Wednesday has rejected a Yugoslav request for the extradition of 3 accused members of the Baader-Meinhof West German terrorist gang arrested last May in Yugoslavia.

West German government spokesman Armin Gemater told a German newspaper that the government had refused to extradite any of the accused. He said there are legal precedents in West Germany against extraditing former Gestapo officials, some of the same accusations as have been made against him in Yugoslavia.

Yugoslavia contends the three are part of a "state plot" to establish a separate state in Croatia, one of Yugoslavia’s component republics.

State spending grows, but income keeps up

SPRINGFIELD (AP) — Gov. Thompson says the state spent less money than it took in during the last fiscal year, leaving available balance in the General fund at $68 million, up from $51 million.

It was the first time in four years that the state spent less than its income, Thompson added.

He said the earlier statements that the state had achieved "its first budget surplus in four years," and said "the emphasis on spending control in the public aid and government operations area was the key to our budget success."
**Polls: Bakalis gaining on Thompson**

By Mark Peterson

Recent polls indicate that Democratic candidate for governor Michael Bakalis is up 5 percent in the governor's poll, said the incumbent's lead was certainly greater than 5 percent.

One survey indicated that state Comptroller Bakalis has made "magnificent gains" in his leadership recognition and head-to-head match up with the incumbent, acting Gov. Blair Lee was ousted in the poll.

In Minnesota, businesswoman Robert E. Shurt narrowly won nomination for Hubert Humphrey in the District of Delaware, with still a large lead in the poll. While in Florida, former Sen. Edward J. Gurney declined in the first round of a comeback bid.

Former Maryland Transportation Secretary Harry Hughes' victory over Lee in the Democratic primary was the highest in the state of Delaware and the District of Columbia of elected primaries.

It is seen as a repudiation of suspended Gov. Marvin Mandel, who was readmitted to the state house after being convicted of mail fraud and racketeering by the U.S. Sen. J. Glenn Beall had no problem gaining the GOP gubernatorial nod.

**Incumbents victors in primary races**

By The Associated Press

Seven incumbent governors and three U.S. senators easily turned back nomination challenges on the heaviest primary Tuesday. But in a major upset, acting Gov. Blair Lee was ousted in the polls.

In Minnesota, businesswoman Robert E. Shurt narrowly won nomination for Hubert Humphrey in the District of Delaware, with still a large lead in the poll. While in Florida, former Sen. Edward J. Gurney declined in the first round of a comeback bid.

In Washington, D.C., City Councilman Marion Barry had lost a slender 1,000-vote lead in the mayoral primary with incumbent Walter Washington running strongly, but he said he might not be determined until absentee ballots are counted. Also, Fletcher, who served in the Ford administration on cancer, bribery and perjury charges, was later acquitted - returned to the electorate after the Florida Senate had captured the Republican nomination in the House passed a bill that first sent him to Washington.

In other Florida races State Atty. General George A. C. Naddor was unopposed for reelection, and former head of the Government Services Administration, Jack Eckerd, won the governor's race. His short in Minnesota came at the expense of Rep. Donald Fraser in the Democratic-Farmer-Labor primary.

**Research grant money up; trend to continue in '79**

By Brent Cramer

Research funds awarded to SIU during the fiscal year that ended June 30, 1978, increased by 21 percent over the previous year, according to the Office of Research Development. The total grants and contracts reached $113,243,763 for the fiscal year which ended June 30, 1979. This compared with $128,851,461 for the previous year.

According to the office of research, said it expects another increase in the research funds based on the high acceptance rate of research proposals.

"Of those proposals about which decisions have been made, our acceptance rate is 48 percent," Goyan said. He noted the normal rate is 20 percent, but said those submitted to the various state, federal and private funding agencies.

Research funds that go to the faculty, Goyan said. "They have a high acceptance rate in seeking external support," he added. Goyan said he hopes the University will be able to increase its research funding, and on a regular basis, he said it is "outstanding" and said he hopes to keep the high acceptance rate of research proposals.

"If any of these proposals about which decisions have been made, our acceptance rate is 48 percent," Goyan said. He noted the normal rate is 20 percent, but said those submitted to the various state, federal and private funding agencies.

The more "intelelligent students these days realize that the grading of classes, studying, tests and even partying can be compensated by using solar energy in order to sustain life during their college careers. Some of these intelligent students also realize that conserving the energy sources of their country is a necessity in the process of sustaining their current lifestyle. In recent years scars caused by oil embargoes, coal strikes and overall prices of energy resources have caused people to realize that perhaps conservation is not enough. It is becoming increasingly apparent that more and better fuel sources are needed. But there should be no great alarm because we need to look no farther than the sun in order to find a fuel source that should be utilized forever. An estimated 5000 times more energy shines down on this country annually than the most extravagant projections tell us will be used in the year 2000. So being the intelligent sort you are, you ask, "Where can I get my solar power driving that will rid me of utility payments and fuel problems?" Well, and others of course.

The development of solar power as a valid and constant energy source has come across some definite problems. Two of these problems, pointed out by Sen. James Abourezk D-South Dakota, is that Exxon, Gulf and other large energy companies and are obviously not too ready to allow a rapidly developing competitor to challenge their industry. The two major nuclear reactor manufacturers, Westinghouse and General Electric, companies who have received a good deal of federal solar energy development money, are dragging their feet on solar research while waiting for their multi-million dollar investments in nuclear power to pay off. So as to not appear to have a conflict of interests, G.E. researchers found that "additional research is needed before solar heating-cooling systems become commercially viable," and that "nuclear power and solar energy do not offer sufficient differences in terms of energy needs for the foreseeable future." The statement makes O.E. appear rather shortsighted. Therefore it should come as no surprise that, of the over $2 billion budget proposed by the Energy and Research Development Agency in 1975, only 1.5 percent was for solar research. This amount was about $10 million short of the minimum proposed by the National Science Foundation. In 1976 the solar energy industry fared virtually the same as it received 2 percent of the incentives directly specified to energy producing industries. Of the estimated $30 billion that the federal government has spent on energy incentives in the 30 years prior to 1976, the amount spent in the area of solar development is so minimal that it constitutes less than one percent of the total. It should be pointed out that these incentives are not necessarily all dollar expenditures by the federal government, though some are. The incentives can be broken down into eight categories including: 1) Creation or prohibition of organizations that carry out objectives; 2) Exemption from or reduction of taxes; 3) Disbursement of federal funds; 4) Disposal of property; 5) Collection of fees for the delivery of governmental goods or services; 6) Governmental requirements backed by criminal or civil sanctions; 7) Tax credits, subsidies and other incentives given through a nongovernmental entity without direct change; 7) Nongovernmental backed by criminal or civil sanctions; 8) Nongovernmental backed through a nongovernmental entity without direct change. The ever-present reality is that solar energy strategy has been pushed aside by policy makers in favor of an accelerated nuclear-fossil fuel program for reasons that are economically selfish.

Why should this be? Solar energy is safe, it is environmentally clean, it is inexhaustable and it is free because no one owns the sun. Some of us are already in business in the Southwest, Florida and California during the first half of the century, proving that the sun is a viable source of energy. The business only died out when, during the Fifties, natural gas temporarily became cheap and plentiful. Further fodder for the solar cannon is provided by Dune Lee Fay, former chairman of the atomic energy commission, who reported that with sufficient research, the photovoltaic cell which turns sunlight into electricity would become practical by 1985. Even the National Petroleum Institute admits, "Had it not been for an abundance of fossil fuels, we might today have a 'Solar Energy Economy' just as effective and efficient as our fossil fuel economy." The federal government can pursue a number of courses of action suggested by varying studies in order to promote the development of solar energy. Among these suggested incentives are subsidies, low interest loans, tax-free industrial bonds, bonuses for nongovernmental innovations, and a Manhattan type project for solar energy.

For individuals the best solution to this problem is suggested by Ramparts Magazine editor Tom Zeman. "It is our dollars that pay for the energy industry's nuclear-fossil fuel program. We can, if we want to, use these same dollars to make our own choice."
Kennedy years dulled by memories

By Arthur Hoppe

I open the paper today of these disastrous days of the Johnson Administration, and I pull the threads, the "grasp the thread," ... the Fourth of July..."

Once again, publicity-seeking congressmen are stirring up the emotional mud, waving the death certificates of Lyndon B. Johnson’s public taking testimony on the shattering of his skull and the shattering of his brain.

After fifteen years, I am sick of it. After fifteen years, I am sick of these most odious. After fifteen years, I simply don’t care. It bothers me that I don’t care. I know that as a responsible citizen I should be concerned when it is said that Harvey Oswald acted alone or in concert with others.

I know I have a duty to participate to keep a full and accurate history of our times. I know that the ends of justice should be served. But I simply don’t care.

To me, Lee Harvey Oswald has always been a poor, sick loser suffering from delusions of persecution, seeking revenge on a world he had been made. We will show them, by God! He’d make a name for himself, by God! He did. And after fifteen years, I loathe the very sound of it.

I don’t want to hear it any more. It bothers me that the student senators‘ voting on the issue of the 520.00 had to be acted upon without any thought. They should have gained what he wanted. That alone is simply don’t care. It is or isn’t sick and stinking self-centered smugness.

I don’t want to read any more about the Johnson years, this world died.

It is like hearing the anguished wailings of a beloved aunt. I don’t want to read any more about Jack Ruby or the Plaza Hotel. The singing of the litanies of their minds that shining image. And, above all, I don’t want to be reminded once again that, in the end, Lee Harvey Oswald won.

Letters

Student Senator claims editorial charges are false

In regard to your degrading editorial of Wednesday, Sept. 13, I must respond honestly in answer to the questions you pose. I agree it is time that the facts do surface concerning the expenditures of the Student Government. I am already concerned about the attitude of the current student government towards all complaints. I was about to write the editor, but why pick a quarrel when I am already able to do it myself? After all, the accusation is false.

First of all, the appointment of Brian Adams as an expense manager does not mean that he has an undisclosed nor improper. When the appointment was made during the summer, most available people capable of being an expense assistant, who were not otherwise involved in the student government, were nowhere to be found. Brian was not qualified of the position, but Garrison also needed help to the workings of the Student Government during the summer since Janet Stonebomar vacated her position. You refer to the job Brian did as a election commissioner. Granted, the job could have been done better but what human being is not prone to make mistakes? After all, the accusation of improperly made last week in regard to Garrison pulling polices for the first senate meeting out of the student senator’s mailboxes is absolutely false and several senators know who did it.

For this paper to make such a serious accusation without first knowing the facts is inexcusable and libelous. Also, the mere fact that Garrison could not have written a proper procedure is if again would have researched his duties before accepting them. This is merely proper election procedure if you again would have researched the rules of the Student Government. I am sure it is not proper to pride oneself on destroying the credibility of Student Government and students. In light of the student senator’s duties, all things considered, your policy is one of blatant yellow journalism and politics.

Spoken by a student, you write that since this paper has not done the kind of in-depth reporting needed to cover Student Government and the present administration’s policy is not with the present administration in Student Government. I don’t want to be more intelligent than the editorial staff of this paper, only more informed.

Kellie J. Watts

W. F. HAGEN OF THE MINNEAPOLIS TRIBUNE

Bible opposed to ERA

In the beginning, says the first verse of the Bible, God created the heavens and the earth. The second chapter gives an account of the creation of man and woman. The source of man’s frame is the dust of the earth and to woman he gave a helpmeet. This book refers to man as men’s helper. Later, this same word is commanded to work. It does not matter to the Bible if there was one or two women in the world.

This fact that this is not in its world and in all of its encompassing nature. The ERA is not just a simple legal right without it we are not able to legislate away the male and female sexual roles as defined by the Bible.

Women are not the only ones rebelling against their sexual roles. Both the countries of the American Revolution and the women’s revolution were indicative of the attitude of restraint on the part of men to accept their male responsibilities. The Bible tells us that women should shirk additional responsibilities as well. It will also give men the right to legislate and defend themselves, to protect themselves, and to put out their revenge under the protection of the law. We are in danger of producing a generation of spineless males and frustrated females trying to fill this leadership void. ERA leaves too big a legal loophole. If there is to be a revolution in human relations then there needs to be a revolutionary change in each person from self-centeredness to Jesus and his teachings as set forth in the Bible.

John McGowan
Carbondale, Ill.

Facts of ERA are stated

Unfortunately I do not have your original letter nor the accumulation of responses on hand. Nevertheless I will try to respond to the "Letters." I fully agree that an attack on your personality name is solely misguided. The issue at w is the interpretation of the "facts." In my mind the facts are what is stated in the proposed amendment:

"Section 1: Equality of rights under the law shall not be denied or abridged by the United States or by any State on account of sex."

Section 3: This amendment shall take effect two years after the date of ratification.

Neither of these sections find the words or references to gay rights (it says sex not sexuality), which are governmental, not legal, which (which is already legal in some states), nor the end of the family, or any immoral behavior, but in our misinterpretations thereof and our lack of faith in our present system to protect, it does not make sense. I would like to close with a personal word of praise to the student senator, East Side, for his ability to express himself because it is most often the case that it is one person’s view representing the whole. If, Mr. Figgins, you are ever going to discuss a woman’s place in God’s kingdom I would be more than happy. Just for a beginning look at Gal 3:28-29. There, there is neither slave nor free, there is neither male nor female, for you are all one in Christ Jesus.”

Large 'superflies' kill gypsy moths

By Marion Dunn
Associated Press Writer

PITTSBURGH (AP) — Some people call them the "superflies"—pest bugs that like people a whole lot more than people like them.

But entomologists say the nasty reputation given to the European psocid and Parasitaea silverstern, commonly called superflis, is undeserved.

"They're not as big as a house fly," said Robert Schuster, a biological control supervisor for the state Department of Environmental Resources in Harrisburg.

"They do cause a problem for some people, but they're not a major pest." Schuster said the bugs typically attack immobile food items, including fruits and vegetables.

"They like to eat things that are stored in your pantry or refrigerator," Schuster said. "If you're not careful, you can end up with a house full of them."
Concert finances gamble for graduate at Shawnee

By Deb Brown

Sponsoring a concert may be a graduate's way to back job hunting, but arrangements for the Heartfield-Mody Shawnee appearance at the Shawnee Natural Theater were made two weeks before and the Farmer's Almanac said Sunday the 17th would be clear.

Rain insurance and good relations with the bands are among Mark Kirwath's assets, a graduate of Paducah. Kirwath handles the Shawnee Finance, and the bands appear not for Pearl Productions, which is sponsoring the concert.

Flashing a grin, Kirwath says, "I try to smile and I imagine at the phone. Things seem to go good after that. After I hang up I call in a half hour, the private promoter said, "I think we're going to do it." I still get crazy after that. He had some experience at it in 1973 when he organised a concert with Heartfield at Shyrock and a Ray Boz Smirceville Station concert at Shawnee Bluff two years ago.

Storm Leon, a booking agent in Chicago, makes up the other half of Pearl, which is distinct from Shawnee Productions which sponsored the Shawnee Jams, Kirwath confirms.

He's proceeding carefully down the road, however, for graduate at Shawnee\n
Poets to read own work

Two Chicago poets, Richard Friedman and Darlene Pearlstein, will read their own works at 7 p.m. Saturday at the University Museum in Illinois State Normal. Friedman and Pearlstein are co-founder of the Poetry Press, which has sponsored poetry readings at the Bookstore every Sunday in the fall at Chicago. The press has also published numerous volumes of poetry and prose. The Yellow Press Press also publishes a magazine, The New Quarterly.

Recent issues of the magazine have included features on Gwendolyn Brooks, Paul Carroll, Ted Berrigan, as well as Friedman and Pearlstein.

Friedman is employed as an artist in residence in Chicago. He won the 1975 Poetry Prize, which was awarded by the Chicago Transit Authority and the Illinois Arts Council. Friedman is the author of "Straight" and "Deadline USA" and writes poetry about baseball.

Pearlstein is a teacher for the Chicago Public Art Gallery in front of the collection of the Meadows Museum at Southern Methodist University. She has been an artist for the Chicago School and is the author of "a book of children's poems," "Rainbow, Fugue, and Other Mishaps." An evening discussion will follow reading.

\"Cyrano\" set for Thursday

"Cyrano De Bergerac," a play set in 17th century France, will be given at 8 p.m. Thursday at the Illinois State Normal University Library Auditorium.

Recipe authors, Charles and Ray Cooper, are Coordinating Editors of the Illinois State Normal University Library Auditorium. The project is supported by the Illinois State Normal University Library auditorium.

The play centers on a soldier, Cyrano, and huge unrequited love.

\"Cyrano\" will be performed by the Illinois State Normal University Library Auditorium.

Professor leaves SIU for money at Kent State

Thomas O. Olson, associate professor of radio-television, has submitted his resignation and will be leaving SIU at the end of the fall semester.

Olson, 45, will assume the position of director of television services at Kent State University at Ohio. He will be responsible for the television instruction needs for all the classes at Kent State. He will also overview Kent State's contributions to public television in the northern Ohio area.

Olson will receive a 100 percent faculty appointment in the telecommunications unit of Kent State as a professor. The means he will continue teaching, but he will have a smaller class load than he has had at SIU.

Olson said the main reason he is leaving SIU is money. He, along with all of SIU's television department faculty will be forced to work under nine-month contracts, as opposed to the twelve-month contracts they have been working under. With inflation, and the choice not to enter college, Olson frankly said he "just can't afford that."

In his new position, Olson will have more power to implement programs that he wants, which is another reason for his leaving.

"Right now I don't have any teeth," he said. "At Kent State I'll have more power, the last thing as a ranking and raising faculty member."

In his eight years at SIU, Olson has taught a full load of classes, mainly the beginning and graduate-level courses in the radio-television curriculum, and found it to be a very rewarding experience.

"I derived a great deal of satisfaction from teaching in one of the largest and best radio-television programs in the country," he said.

Olson said he also "derived satisfaction in having discovered research and grantsmanship," referring to SIU's tenure policy requiring faculty members to engage in research.

Before coming to SIU Olson was a faculty member at Wayne State University from 1955 to 1970. He was also director of the television services unit and director of the graduate program there. He received his Ph.D. in radio-television in 1960.

Besides being a full-time faculty member at SIU, Olson was the director of the public visual communication program for graduate students between 1972 and 1974.

"Most every student who has gone through that program has gotten a professional job," he said. "I'm just as proud as I can be about that."

Olson said the process for selecting his replacement has begun, but because of affirmative action and other considerations it will be awhile before his replacement is named.

University conducts Agronomy Day

URBANA—"AP—University of Illinois agriculture experts will show farmers the latest in agricultural technology during Agronomy Day here today during Agronomy Day at the farmers college. Olson frankly said he "just can't afford that."

Visitors will be given tours of the university's south farm and its agricultural engineering farm.

Farmers will get the latest information about insect and weed control, plant disease, crop research on soil fertility, high-density corn, soybean varieties, crop photoperiod, and disposing of spray tank wastes.

Agricultural experts from the university will provide the answers to farmers questions.

They will discuss soybean harvesting equipment use, placing, double cropping, drying grain with solar energy, and weed control with various tillage methods.

Board of Education approves plan to cut out college remedial programs

NORMAL, Ill. (AP)—The Illinois Board of Higher Education has approved a watered-down resolution saving public universitv should try to phase out remedial education.

The resolution, requested by the legislature, originally called for an end to the remedial programs in five years. However, the board's draft meeting several university presidents objected, and the resolution was rewritten.

As approved, it says that it is the goal of the board to have all universities try to eliminate the programs in five years, with the community colleges providing any remedial services still needed.

"I don't know if we are doing this at all," said University of Illinois President John Corbally. "I don't know if it's necessary." Kenneth Shaw, president of Southern Illinois University Edwardsville, agreed with Corbally.

They said everyone shared the hope that eventually it would not be necessary to have remedial education in universities.

James Furman, executive director of the board, said the resolution was sought by legislators concerned about the decrease in academic performance, particularly at the elementary and secondary level.

"There is no legal force to the resolution," said Furman. "This is simply an expression of policy."

The resolution is part of a series of resolutions suggested by the legislature. Others say that the Illinois Board of Education should work with elementary and secondary schools to establish minimum standards for competency, identity problem areas and help students improve and achieve those standards.

The idea was that if students were better educated at the lower levels, there would be no need for catchup work in college.

The board also added a section to the resolution saying that special assistance programs were not the same as remedial education programs and would not be affected. Special assistance programs are designed to aid economically or educationally disadvantaged students, particularly minority students. They might include remedial education courses, but also would include counseling and guidance of those students.

Remedial education, according to the board's definition, would be programs available to any student who had not learned basic skills before entering a university.

University credit may be given for courses taken as a part of special assistance programs, but not for remedial courses taken by other students.

The board also voted to give Furman a new, three-year contract, even though his old contract had a year to go.

And, board member Dorsey Day of Chicago announced that he was resigning because of a job transfer to Detroit.
Indiana grand jury says
Ford fuel tanks unsafe

EKBART, Ind. (AP) — An Indiana grand jury indicted Ford Motor Co. on criminal charges Wednesday in connection with a Pinto automobile crash in which three teenage girls were killed. The jury said Ford knew the Pinto fuel tanks were unsafe but did nothing about it.

The panel said the tanks were "recklessly designed and manufactured in such a manner as would likely cause the Pinto to flame and burn upon rear-end impact," and that the Ford Motor Co. had a legal duty to warn the general public.

Ford, which is involved in multi-million dollar civil suits concerning the Pinto, announced in June that it was recalling 1.5 million 1971-78 Pintos and 36,000 Mercury Bobcats to improve the safety of the fuel tanks, but the recall is just getting under way.

The grand jury, impaneled by Elkhart County Superior Court, indicted Ford on three counts of recklessness homicide and one count of criminal recklessness. Maximum penalties would total $25,000 in fines.

Ford called the action "unprecedented and unwar'rented" and said it had not broken any Indiana laws. R.R. Nolte Jr., Ford vice president and general counsel, said in a statement released in Detroit that the automaker would study the indictment and "take appropriate action in response to it."

Elkhart County Prosecutor Michael A. Conen said he expected Ford to challenge the indictment, which he described as "certain to make law."

The charges stemmed from the Aug. 30 death of Judy L. Uhrich, 18, of Osceola, Ind., her sister, Lynn, 16, and their cousin, Donna Uhrich, 18, of Rosanne, Ill. The three girls burned to death when their 1973 Pinto sedan exploded after being hit from behind by a van on a northern Indiana highway. The driver of the van, Robert Dugar, 21, of Goshen, was not indicted because, the grand jury said, "although he may have been negligent, we do not believe it constituted a criminal act."

Conen said, "The thrust of the state's case will be to show that the design, engineering and manufacturing of the Ford Pinto was inappropriate and recklessly done, that Ford came to know of the car's defects and did nothing about it."

Ford denies the tanks on the Pintos and Bobcats are any more susceptible to explosion than those of other small cars from early model years, when no federal rear-end collision standards existed.

The recall could cost Ford $40 million or more. The company also has been hurt by the fact that sales of 1973 Pintos have declined, even though these models contain a redesigned fuel system, introduced in 1977.

Nixon appears in N.Y.; signs contract for book

NEW YORK (AP) — It was eerily like the old days for Richard M. Nixon. Walking in downtown Manhattan, Secret Service tore and aft. People gawking, or seeking autographs, gathered. And a full-dress news conference, being addressed at 1976 President, questioned about the state of the world.

Nixon, out from the walled seclusion of San Clemente in the most dramatic way since he left office, seemed a bit solemn about it all.

He said he considers President Carter, except on economic leadership and that he believes circumstances are such that the Camp David MidEast summit can be successful.

The former president was in New York Tuesday to sign a contract for a book to be published next year. The details of that project, he said, will keep him from making a planned world tour until the manuscript is completed in the spring.

Nixon acknowledged there had been some chilly reactions to such a trip but said "we have a number of positive signals." He would not discuss specific countries, other than Australia which let it be known that he wasn't wanted there.

Nixon said he understands Australia's reluctance and that other countries that have not extended a welcome.

The Nixon book, still untitled, will be published by Warner Communications which paid him $2 million for his memoir. Nixon was not asked about the financial arrangements for the new work and he did not volunteer the information.

He said this time he will write about major issues confronting the United States and the free world but not of any personal or political theory.

Nixon said Carter is making every possible effort to provide leadership. But he took a swipe at recent White House efforts to improve public perception of the president.

"Inspiration does not come from imagery alone. It does not come from public relations," Nixon said.

Until this year, Nixon rarely ventured away from his seaside home in California. But in January he attended Sen. Hubert Humphrey's funeral in Washington.
**Hill House conducts self-evaluation**

Hill House, a therapeutic program for people with behavioral and psychological disorders, has been serving most of them drug-related, is doing a comprehensive review. "The residents and persons who have been through the program," said Reitman. "We'll be looking at work patterns, drug use, educational trends and living conditions as well as other things. We want to contact former residents and see what they are doing now," said Paul Reitman, executive director of Hill House.

**Stranded skipper enjoys long delay**

WILMINGTON, Ill. (AP) — Stranded on the Kaskake River since Aug. 17, a 72-year-old Texas is making the best of it in his 26-foot sailboat "Happy Jack," and the best is pretty good living.

The skipper is a decorated Jack Mangham has had his one-man voyage off the hook, largely because of a shutdown of locks being repaired on the Kaskake River near the Dresden nuclear power plant.

The Army Corps of Engineers said the locks will be finished on Oct. 4 and Mangham can continue his trip down the Illinois River to the Mississippi River, then to the Inter-Coastal Waterway from Louisiana to Texas.

"I've no hurry. If I want, I'd turn around and go back," said Mangham, who was uninsured. "There's not much difference between spending a month and a half here and a month and a half in Texas. What the heck, this is a nice place."

Mangham has spent most of his life on the water. He joined the Merchant Marine when he was 17. He has sailed around the world many times. Since retiring from the Merchant Marine after serving 21 years, he said he has been an airplane pilot and seaplane pilot, flight school operator, aircraft mechanic and a real estate salesman.

"I've made a Jack of all trades\.*\[^{1}\]. I don't need much money. I'm just enjoying myself while I can," he says. "Some people can't travel like I can because of jobs and families. I try to share my travels with them, by photographs or letters that I send them. My log will probably be the only possession I'll have to pass on to my relatives when I die."

Mangham's sailboat has all the comforts of home. It is equipped with a television set, citizens band radio, galley, sleeping area, a bathroom complete with shower, stall and book shelves. While anchored on the river, he has rebuilt his anchor equipment, repaired rigging, secured lights and polished the boat's wood trim.

What is mountaineering all about? Funny you should ask. Because we just happen to have an answer. (Ah-h, life’s little coincidences.) Mountaineering is a skill, a science and an art. Yet anyone with a thirst for excellence and normally developed motor skills can master it. Simply study these fundamentals and follow them faithfully.

1. Step one, appropriately enough, starts by selecting the correct site. To do so, pick up a bottle of Busch. This is commonly called heading for the mountains.

2. Okay, here’s where the fun begins. Hold the mountain firmly in your left hand, grasp the mountain top with your right hand and twist the little fellas off. There you go.

3. Now for the tricky part. Neophytes, listen up: the proper pour is straight down the center of the glass. Only in this way will the cold, invigorating taste of the mountain come to a head.

4. Once poured, pacing becomes paramount. As any seasoned mountaineer will tell you, the only way to down a mountain is slowly, smoothly and steadily — savoring every swallow of the brew that is Busch. If you’re a bit awkward at first, don’t be discouraged. Perfection takes practice. Soon enough, having emptied your glass and filled your soul, you too will be a mountaineer.

Don’t just reach for a beer. Head for the mountains.
Start your engines

Visitor researches SIU computers

By Nancy Cameron
Student Writer

Student access to computers is better at SIU than at most universities of the same size, according to Ben B. Barnes, visiting research consultant from Auburn University.

Barnes is on a four-month leave from Auburn University in Alabama, where he is the computing services director. During the four months, he will work on a number of computer-related research projects at SIU.

Barnes' immediate interest at Southern is the possible installation of a small computer in the School of Business. The area he will research include total costs, selection of the most beneficial unit and possible complications resulting from the actual installation.

"I feel I can contribute to SIU because of the problems I have encountered at Auburn," Barnes said. He said the experience he will gain here will help him when he returns to Auburn.

AFL-CIO guests strip tables of non-union cloths

ROSEMONT (AP) — When tablecloths in a motel meeting room were discovered to be non-union made, they were ripped off the tables and part of the day was deeded to what is known as the Illinois AFL-CIO convention.

About 1,000 delegates and guests convened in the hall Tuesday while a banner that proclaimed their support of "the struggle for social justice" by workers of the J.P. Stevens Co., a large Southern textile firm that has resisted unionization for 10 years.

Stanley J. Horn, president of the state AFL-CIO, suddenly yanked a tablecloth of a table, held it up, and promised to something on it. It was not a stain, but a J.P. Stevens label. The delegates amidst both shouts and laughter began stripping off the tablecloths.

Board approves construction funds for junior colleges

NORMAL (AP) — The Illinois Board of Education gave final approval Tuesday to about $5.4 million in community college construction projects.

The board, meeting at Illinois State University at Normal, approved the construction at Kishwaukee College in Malta, College of Lake County in Grayslake, and Highland Community College in Freeport. Kishwaukee College will use $11.2 million to install a computerized library management system.

The state will provide $3.2 million for the project, and the college will use another $2 million of its own funds. Highland Community College will spend $70,715 to remodel a building.

Auditions for "House Call," an original one-act play by Ken Robb, will be at 7 p.m. Tuesday in Communications Building, Room 1022. Everyone is welcome.

The Department of Chemistry and Biochemistry will hold a seminar entitled "Overview of Activities at Institute," at 4 p.m. Thursday in Nechek's C218. Andrew Saynok, a visiting professor at SIU this semester, will be the speaker.

Dentist asks court to force publisher to use display ad

CHICAGO (AP) — A dentist is asking for a court order to compel a telephone book publisher to accept his display advertisement.

Dr. Eugene Minat, 22, also sought a temporary injunction to prohibit the Northwest Side's "Northside Newsdell" from publishing the 1979 Yellow Pages and the court set the case.

Minat, formerly of California, is establishing his dental practice on the Northwest Side and alleges that Donnelly refused his ad without reason.

The publisher declined to comment on the lawsuit, scheduled for filed Tuesday.

Jobs on Campus

Grow it green... Grow it gorgeous

With Atkins Quadra-Care

When the Lawn Pros do it, they do it right! Quadra Care has got to be the best thing that's ever happened to lawns. It's amazing. It's so affordable! It's a residential lawn care program geared to maximum results at minimum prices. Because our fertilizers are time released, they work on and on.

No one-shot deal. Quadra Care is exactly what it says: Four seasonal applications. Tipped the way nature intended it. A total lawn care plan: fertilizers, chemicals, weed and insect control. All carefully executed by professionals who match their know-how to your lawn's particular needs. It's year-round protection at no more than do-it-yourself costs! Check your costs for doing the yard last year and then call Atkins for a no-obligation inspection and estimate.

Trust your lawn to the lawn pros They'll grow it gorgeous.

"Zip on in"
Tough defense 'a tradition' at Lamar, coach says

By George Cook
Sports Writer

The best offense is defense. How many times does one hear this line during football? And it's always true, some defensive power like the Dallas Cowboys or the Chicago Bears, knocking opponents silly and winning defensively. But football team has to have some sort of offense, too. But the Lamar Cardinals are not far behind in defense. And they didn't win.

The Cardinals lost to Northwestern Louisiana, but the 17 points they put on the board were the credited to the defense. The defense fumble another touchdown and recovered another to set up field goal. There was still another 30-yard touchdown drive.

The anemic offense, meanwhile, managed to run off only 160 yards in the rain and cough up the ball a number of times. The 137-point turnover led to NW Louisiana scores.

Lamar coach Fredrick is trying to run out the mistakes and prepare his Cardinals for battle against Arkansas. He says Lamar will have a nonconference game at Beaumont, Tex.

This week should be a little different, Frederick said in a telephone interview Wednesday.

"For the reason our showing last weekend was the rain or it being our first game," he said. "Northeastern had a touchdown and recovered another to set up field goal. We'll be a little more in the mix this week.

Barrett assessed. "It's time to run," said mmm's cross country Coach Fredrick.

"Well, almost. More precisely, it will be time to run at 16:30 a.m. Saturday against the University of Illinois at Midland Hills golf course.

"I'd like to have another week of practice without a race," Hartog said. "You'd have a better chance (with another week of practice) and there's a mental thing in it. You start to lose some of that edge and that desire to try and do something better. But with a little more time, you're a little more motivated."

Hartog has a tough season. Last year, the Saluki golfers were 36 holes on Thursday will be 36 holes on Thursday and then Saturday's tournament over the same five-mile route that the Salukis will be running again this week.

"We've been working on it: Frederik said. "The Salukis have never been a contender for the team that won two games that."

The slick greens on which Hartzog tells the Salukis have never been a contender for the team that won two games that. Hartzog tells the Salukis are relatively thick, lush woods. And they have lost only one runner to graduation.

"We'd need four or five others running the same pace as our top three to be in the hunt," Hartog said. "But we've lost a couple of them later on in the race. Hopefully, they'll still have enough left to finish well."

Stay with the leaders as long as you can, is the only strategy that Hartog tells his runners to abide by. "I'm not much for setting up different types of tactics against different teams," Hartog said. "I'm not a believer in taking it easy for the first two miles. You just do that, sometimes the front runners don't come back to you later.

By Brad Betker
Staff Writer

Harriers ready for clash with Illinois

By David Gafric
Staff Writer

Saluki golf coach Jim Barrett is excited about the beginning of the golf season. Yet he's not enthusiastic 'tic about the team's opening tournament, the Indiana Classic which begins Thursday at the Hulman Links golf course.

The reason for the paradox is not linked to injuries or inexperience, but rather to the course on which the tournament will be played.

"The course is just to the point of being unfair," Barrett said Wednesday before the team left for Terre Haute, Ind., the site of the tourney. "There are some holes that they should tear down."

However, just because Barrett is taking a young team to challenge the course doesn't mean he has given up hope of winning.

"Our kids think we can win the tournament," Barrett said. "In fact, they know they can win it."

This week's team consists of two freshmen, two sophomores and one junior. Jim Reburn, the only junior, is the only starter returning from last year's team. Sophomores Larry Emery and Butch Poshard and freshmen Jay Smith and Doug Clemens are relatively new to collegiate play. However, all have had extensive tournament experience in the past and this year to make up for their collegiate inexperience.

"Age wise, we are a very young team," Barrett assessed. "But in terms of experience, we're not far behind."

"Reburn, Emery and Smith have good tournament experience. Clemens, like Smith, was a high school champion."

"Emery was not concerned about whom he took to the tournament, though, because he knew I'd do the best for us," Barrett said. "Todd O'Reilly just missed making the overall team by one stroke. Jeff Lin and Rich Jarrett were close too. I'm not thinking of keeping any of them off the team when I thought about mental and physical condition."

"What does concern Barrett is the course, which he says 'never lets up,' Barrett is concerned with the course in which the tournament will be played.

"The shock nearly killed everyone," Barrett said, referring to the first time he played the course and how it affected him when he found out the course was going to be played.

"No fairway is more than 40 yards wide. The course is 7,147 yards. The fairway is 142 yards. The green is 132 yards. It's 72.0, which you let know that there aren't going to be many low scores," Barrett said.

And, if concentration didn't play a big role in the Salukis' homecoming the board will now," Barrett said. All players will shoot 36 holes on Thursday and then warm up with another 18 on Friday. Two players will be allowed to play that many in the first place.

"But with a 3,300-yard course, it will take more than 10 hours to play. That will leave any golfer mentally and physically exhausted," Barrett said.

"Concentration will be especially important in the final nine holes of the 18-hole course."

"The first hole is the easiest," Barrett explained. "The second hole is the toughest. The 11th is an unfair hole because there are no fairways up. The 17th has a clump of trees 300 yards down the fairway with some trees on either side of them."

"These are the types of holes you have to shoot well on, Barrett said."

"With the anticipated difficulty in playing the course, Barrett is worried that "the course will be a very difficult game, confidence."

"And the final nine is another thing that has Barrett worried. Poshard was another victim of the 36 holes under-par at the turn (tenth hole)."

"The slick greens over which a ball percolates, the thick, lush woods which gobble up wayward balls and, of course, the present obstacles are all part of the course the Salukis will face. The Lamar coach has looked at the Drakes-S ISU course and said, "I think many of our players will find it more difficult to play."

"I don't know which quarterback they're going to use," he said. "You don't know that the game will be a struggle between two good, solid defensive teams who are trying to improve."

"But with a little more time, you're a little more motivated."

"And the Lamars may have revenge on their minds."

WHY IS KEMPER & DODD #1 IN THE AREA?

* BECAUSE
WE OFFER THE AREA'S LARGEST SELECTION OF AUDIO COMPONENTS!

We always keep our warehouses and display areas filled with every bit of equipment they'll hold! We want you to find just what you're looking for when you walk into a KEMPER & DODD STEREO CENTER — and most of the time — people do!

* BECAUSE
WE CARRY PRODUCTS WITH PROVEN RELIABILITY AND PERFORMANCE!

At KEMPER & DODD, we always have our eyes (and ears) open for new and innovative products. Through constant searching and careful evaluation, we sell those products which offer unsurpassed quality, performance, technical excellence, and dependability. These are the kinds of products we recommend — and back up 100%!

* BECAUSE
30-DAY PRICE GUARANTEE!

We can't promise to always have the lowest prices (nobody does even if they say they do), but we do know you'll find that our prices are, from day-to-day, consistently lower. Here's how we can assure you of getting the best possible deal: If you purchase any item from us, and someone else within fifty miles offers the same item for less than you paid for it at KEMPER & DODD, within thirty days, we'll refund the difference to you! That's why we say "our price is always right!"

* BECAUSE
NO CASH — NO SWEAT!

KEMPER & DODD still accept cash ... we also accept MasterCharge and VISA. And, we can arrange financing for up to thirty-six months, with convenient terms. We can even arrange financing for ninety days, with no interest charge, for purchases over $150.00.

* BECAUSE
WE OFFER A 30-DAY HAPPINESS GUARANTEE!

When you buy a music system from KEMPER & DODD, we give you a whole month to decide if you're entirely pleased with the way the system looks and sounds in your home. If the color of your speaker grilles makes your dog howl, or if anyone else doesn't work out the way you expected, bring the whole system back, and we'll refund 100% of your purchase price. Or, we'll do whatever we can to make sure you're satisfied with your system!

* BECAUSE
FULL ONE-YEAR 100% EXCHANGE PRIVILEGES ON RECEIVERS AND SPEAKERS!

If you decide to upgrade your components anytime within a year, KEMPER & DODD will give you an 100% of your purchase price, in trade, for a more expensive product, as long as your units are still in current production, and in original condition.

* BECAUSE
OUR OWN SERVICE ORGANIZATION!

If anything unexpected happens to something you bought from KEMPER & DODD — Heaven forbid! — we take care of your problems promptly in our service department. We have two full-time service technicians, and our warranty work is usually turned out within forty-eight hours.

* BECAUSE
WE'RE NICE GUYS, TOO!

At KEMPER & DODD STEREO CENTERS, you deal with a group of people who are genuinely interested in giving you exactly what you expect from a stereo dealer — a large selection of equipment at the right price, competent advice on what will best suit your needs, and assurance that we will be there to back our products — after the sale!

YOU'LL LIKE THE WAY WE DO BUSINESS!
SPECTACULAR EVENTS!

FOR THE MAN WHO HAS EVERYTHING -- EXCEPT A GREAT STEREO!

$2995

This system has it all! Ultra-high powered Receiver, AR’s finest Speaker system, fine 3-head Cassette Deck, and Pioneer’s new top-of-the-line Turntable with Shure’s new V15 Type I! This “dream system” is built around the ultimate luxury receiver, the Pioneer SX-1980, with 270 (yes, 270) watts per channel, Quartz-Locked Tuner, and an array of other features and controls! The new AR-9 Speaker System has already received world-wide recognition as one of the most musically accurate speakers ever built! With two 12” woofers in each cabinet and three other outstanding drivers including the famous AR dome tweeter, the AR-9’s reproduce every nuance from floor-shaking bass to the highest audible frequencies with unsurpassed realism! Pioneer’s top-of-the-line CT-F1000 combines state-of-the-art cassette performance at moderate cost. And the PL-630 professional turntable features quartz-regulated speed control and fully-automatic function. We’ve selected Shure’s new V15 type I V Phonograph Cartridge for optimum tracking and highest fidelity. Save $905.00 off the list price of $3900.00.

OUT-OF-THIS-WORLD DOWN-TO- EARTH PRICE!

$562

We know of no other system that produces a cleaner, more powerful sound at anywhere near the price of our feature! Pioneer AAL System! Pioneer’s new SX-880 Receiver packs a powerful 60 watts per channel RMS into 8 ohms from 20 to 20,000 Hz with no more than 0.02% THD -- enough to drive the AAL-3X Speaker System to concert hall listening levels with plenty of room to spare! The AAL-3X is a 12”, 3-way design featuring extra-long throw woofers, plasma-electric tweeter and accurate 5” midrange driver. Records are gently handled on Pioneer’s new PL-518 Turntable with illuminated strobe and speed control. We’ve included the Shure M-91ED Phonograph Cartridge also. Save $347.85 off the list price of $1144.85.
