Fun, Contests, Games Will Highlight '64 Saluquarama Program Saturday

A schedule of events for the Saturday portion of the festival includes:

- Singles ping pong tournament at the boat house, 9:30 a.m.
- Limbo contest at the beach, 3:30 p.m.
- Free-style swimming races at the beach, 4 p.m.
- A dance will be held at the beach beginning at 8 p.m.
- Awards to first, second and third places winners in events plus an award to the team with the most points will be given at the dance.

Distance race from the boat house around the lake, 10 a.m.
- Singles badminton tournament at the boat house, 10:30 a.m.
- Canoe races at the boat house, 11 a.m.

The area normally held July 4 was scheduled late in the summer because of conflicting activities.

Senegalese Ambassador Visiting SIU

* * Street Closing
To Last Long

The section of Grand Avenue between Morris Library and Loop Drive that has been closed for more than three months will remain closed indefinitely.

C. C. Hart, associate University architect, said although the University has finished its work of laying new water and sewer mains and a steam tunnel across Grand, the City of Carbondale wants to lay a water main before repaving the street.

Completion of the project is in the "vague distant future," according to Hart, and so is the opening of Grand Avenue to through traffic.

Tennis Tourney
To Begin Today

The 10th annual Southern Illinois Open Tennis Tournament will begin on the SIU campus this weekend.

The tournament, sponsored by the SIU Athletic Department, will open this afternoon on the SIU tennis courts south of the Physical Plant.

Divisions included in the three-day event are men's singles and doubles, juveniles 14 years old and under, and 12 years and under.

The junior's and boys' divisions will open play today at 2 p.m.

Men's singles and doubles competition will start Saturday at 9 a.m. with division finals to be held Sunday.

The tournament is directed by the professor in charge Carl Sexton and is sanctioned by the United States Lawn Tennis Association.

Gus Bode

Gus says he looked behind the closed circuit TV set and found the professor had gone out for a coffee break.

Sees Corps Men
In Training Here

Oumane Diop, the ambassador to the United States from Senegal, is on campus today visiting Peace Corps training classes.

Some 57 young men and women are being trained here for Peace Corps duty in Senegal. The other 81 volunteers here are being trained for duty in Niger.

The ambassador and his aide arrived in St. Louis late Thursday and drove to Carbondale Thursday evening. They remained overnight at a motel and began touring classes this morning.

A spokesman said that the ambassador would probably stay one day. His complete schedule had not been worked out because we were not notified of his arrival. We would visit here and we aren't positive just what he may want to do," the spokesman said.

The volunteers for Senegal will be given home leave from Sept. 12 to 18 as their training is being delayed because of lack of rooms.

Creation of a U.S. Army Research and Development Unit at SIU has been given preliminary approval, according to Maj. Thomas E. Dimins, subsector commander of the Southern Illinois area. Dimins said Lt. Gen. William Dick, chief of U.S. Army Research and Development, Washington, D.C., has expressed personal interest in the formation of the unit on the Carbondale campus. The processing of applications of "interested reservists," or "dossiers of current reserve component, is progressing at the present time, and the unit is slated for formation early in the fall.

Maj. Leslie D. Garee Jr., of the army reserve and an associate professor of mathematics at SIU, is scheduled to be the initial commander of the unit. Lt. Col. John O. Anderson, Marine Corps Reserve, retired, and associate dean of the SIU Graduate School, has indicated interest in the part of the University administration.

Anderson felt the University would be able to provide facilities support for the proposed unit.

The initial organization of the unit will be based on those individuals who currently hold active reserve status. Those individuals who have been interested in applying for direct commission in the unit will be processed as quickly as possible when the unit is activated on campus.

Creation of the new unit
Stage Band Plays
On Patio at 7 p.m.

The Summer Stage Band will present a concert from 7 to 8 p.m., today on the University Center patio.

The 16-piece band, under the direction of Glen A. Daum, a graduate assistant in music, will perform jazz and pop music under the sponsorship of the Music Department and the Student Activities office, in a direct result of the initial organizational effort last spring by a committee comprising Vice President John G. Grinnell, Dean Anderson, Col. Kelton S. Davis, Army Corps Headquarters representative, Maj. Dimins, Maj. Garee, and Maj. Robert B. Vokac, assistant SIU placement director.

Gates expressed that ample notification of the initial organizational meeting will be published early in the fall so that interested individuals may contact them or Maj. Dimins at the U.S. Army Reserve Center in Marion.

The unit will concern itself with pertinent and appropriate research projects directed by the Office of the Chief of Army Research and Development, based upon the qualifications and interests of the unit membership.

Several meetings were held on campus early in the Spring term at which Army officials outlined plans for the unit to interested students, faculty members and others.

Southern Illinois
University Carbondale

PLENTY OF WATER - While Carbondale resi-
dents find themselves with bowns lawns and withering flowers and shrubs, SIU has solved the water shortage problem. It just tapped the Lake-on-the-Campus with a portable pump and hooked it up to the sprinklers among the shrubs in Thompson Point. Officials explained that it's just a stop-gap measure and pointed out that it has been used before.

Activation in Fall

Preliminary Approval Is Obtained for Plan
To Set Up Army Research Unit on Campus

To set up a research unit on the Carbondale campus, the U.S. Army Research and Development Unit at SIU has been given preliminary approval, according to Maj. Thomas E. Dimins, subsector commander of the Southern Illinois area.
Clerical Workshop Scheduled
For SIU Student Employees

More than 100 beginning student secretaries are expected to attend the annual workshop Sept. 16-18. It is scheduled for 8 a.m. to 5 p.m. in Brown Auditorium.

All new clerical workers and applicants for clerical jobs are expected to participate in the Student Secretarial Workshop. Because no workshop was conducted for students entering the work program in summer quarter, they are also expected to attend, according to Alice P. Rector, assistant director of the Student Work Office.

She said the workshop is designed to help student workers get started on their jobs. It also serves to give the program more uniformity on campus, and streamlines the necessity of good supervision, she added.

Supervisors who have students hired within the past year, are invited to ask these students to attend.

Today's Weather

Partly Cloudy

Partly cloudy and slightly warmer. Chance of scattered showers in the afternoon. High 78 to 84.

700 New Positions in Fall
About 5,000 Jobs Open to Students
In SIU Work Plan During 1964-65

By Lester Parker

SIU students seeking employment this fall will find approximately 700 new jobs available on and off campus, according to Frank C. Adams, director of student work program, the new jobs are the result of SIU's expanding program of student employment. Some of the jobs are created by vacancies left by students who graduated, students fired, and students who flunk out or quit school.

Adams said there are some 200 different job areas from which students have a choice. The type of jobs range from unskilled entry jobs to those requiring advanced college training or highly skilled nature. There are already openings for employees in the various cafeterias, and for maintenance and secretarial work.

"'I'm proud of the students who participate in the Student Work Program. The capacity of the individual to help himself cannot be underestimated," Adams said.

When asked what he thought the greatest problem was with student employees, Adams said it was difficult to say. "We don't have a major problem with student employees, because each area supervisor takes care of the students working under him," he said.

Adams feels the major problem was with the students themselves, especially with the new ones.

"They are faced with the problem of adjusting to new jobs and college life. This is why we suggest that most of our students start work in the summer since the load is less," he said.

There will be nearly 5,000 jobs filled by students during the coming academic year. This figure represents a five percent increase over last year's. This does not include students employed on a part-time basis by area businesses.

"As far as the percentage of student workers to the entire student body is concerned, this places us above the Big Ten Universities," Adams said.

An estimated $1,758,000 worth of $220,000 over the 1963-64 academic year is expected to meet the increase in student employment.

The annual earnings of students who work regularly ranges from $650 to $700. However, more than 200 students over $800 a quarter. Students are paid during the middle of each month. Some 3,000 students are expected on the payroll in October.

"There are some of the opportunities we offer to SIU students to help finance their college careers and to cope with our increasing enrollment," Adams said. "But the program has some limitations."

A lack of staff and facilities limits the services of the Student Work Office to the necessary contacts with individual supervisors throughout the campus. The lack of faculty personnel also prevents the type of development and supervision desired in the off-campus work program. "We have expanded in this area but we hope to do more in the near future," Adams said.

It is hoped that IBM cards will enable the Student Work Office to transfer students from unskilled jobs to jobs related to their academic interests. "We still lack the operational facilities for follow-ups on students," Adams said.

Before a student is authorized to work, and before his hours and type of pay are established, he is interviewed; given performance tests and a study is made of his academic record. Performance tests are given to all students to determine eligibility for work. Students having academic difficulties may have to carry a reduced load. Otherwise he is ineligible for work.

"Many students depend on our services. And try as much as possible to meet the needs," Adams said.
Activities

Dances, Shows, Trips Offered on Weekend

Friday

Tennis class sponsored by the P.E. Department at the tennis courts at 7 p.m.

"Casino Night" dance in the Roman Room of the University Center at 8 p.m.

Sharon Abbott, of the Theater Department will discuss "The Stratford--Connecticut and Canada" at the Dome at 8 p.m.

Cinema Classics presents "The Human Comedy" in Browne Auditorium at 5 p.m.

Saturday

Contests in the 1964 Salugarama begin at 10 a.m. at the Lake-on-the-Campus. An art show featuring Ron Watson at the Dome from 1 p.m. until 5 p.m.

Casino Night, Dance Offer Study Break

Equipment from a Reno casino and lots of money (play, of course) promise to make Casino Night one of the most enjoyable dances of the year. If studying for last minute exams has given you the blues, gamble and dance away your cares at 8 tonight in the Roman Room of the University Center.

Mrs. Ridley Named Clothing Instructor

Mrs. Samantha Sue Ridley of Cartherville has been appointed instructor of clothing and textiles, replacing Ritta Whitesell, associate professor, who retired this summer. Eileen E. Guiley, dean of the School of Home Economics announced.

Mrs. Ridley has taught home economics in Cartherville high school since 1951.

Researcher Writes Article on Feeding Bobwhite Quail

A few rows of unharvested corn or soybeans and nearby fencerows or other woody cover can provide ample food and shelter for wintering bobwhite quails during even the most adverse Southern Illinois weather, according to SU specialist.

In a study reported in the Journal of Wildlife Management, John L. Rosene, research assistant in the SU Cooperative Wildlife Research Laboratory, described responses of bobwhites to snow cover on 1,600 acres of farm land near Carbondale. While harvested corn or soybean fields apparently provide enough food under normal Southern Illinois winter conditions, Roseneby reported, unharvested crops or food patches are important to the welfare of wintering quails during periods of deep snow.

Socialist Discussion Club meeting in Room F of the University Center at 7 p.m. Bus leaves the University Center for the Many Opera production of "Porgy and Bess" at 4 p.m.

Movie Hour presents "Rat Race" at Puru auditorium at 6 p.m.

Dance at Campus Beach at 8 p.m. Winners of the 1964 Salugarama will be announced during the dance.

Sunday

Bus leaves the University Center at 1:30 p.m. for a Sabiuki Safari to Shawneetown.

Philosophical Picnic presents Bruce Bredland discussing the imagery of Langston Hughes through the concept of the artist, at the Dome at 5 p.m. Hot dogs and lemonade will be served.

A student recital will be presented by the Music Department in Shroky Auditorium at 6 p.m.

Chess Club meeting in the Olympic Room of the University Center at 6 p.m.

U.S. Folk Music Featured on TV

American folk music will be featured at 7:30 p.m. today over WSIU-TV.

The viewers will see and hear one of the nation's outstanding singers of authentic folk music, and members of the famous Ritchie Singing Clan.

Other highlights:

5 p.m.

What's New: A look at insect colo­nies; also, the wall of the Grand Canyon.

6:30 p.m.

What's New: A look at some of the oddest insects; also, a look at increasing buffalo traffic.

7 p.m.

At Issue: One of the current issues is discussed in this program.

7:30 p.m.

Lyrics and Legends: A look at folk music in America.

8 p.m.

Science Reporter: A look at the newest programming systems for computers that permit a man to communicate with a computer by drawing sketches on a tube.

8:30 p.m.

Festival of the Arts: This is the last of the series of the dramatizations of the delightful short, short stories of H.H. Munro that have been called the "true proper stories of Satir."
The first signs of a boundary between the United States and Canada have appeared.

The withdrawal could have been intended to contribute to this effort to drive a psychological wedge between the Vietnamese soldiers and their American colleagues. But no one in authority believes the Viet Cong intend to fight on this scale. It seems possible that they have shifted their operations. And a Viet Cong attack on a fortified hamlet near Phat Thiet, a coastal town 60 miles east of Saigon, reinforced that belief. The government announced 10 guerrillas had been killed and nine missing.

The pilot killed Wednesday, the Blue Angels' Helldiver, led a strafing run.

DETROIT -- The United Auto Workers Union has ordered its General Motors Corp. units to take strike votes before the end of the month. The UAW contracts with General Motors, Chrysler Corp. and Ford Motor Co. expire Aug. 31.

The UAW said General Motors has made no move toward settlement of the issues.
Key to TV Lessons Is Class Follow-Up

By Robert F. Wold

With the many advances in educational programs, teachers are increasingly being asked to manage the programs without the guidance of the experts who train them. This article offers suggestions for improving the effectiveness of television lessons in the classroom.

Although WSU-TV has a wide range of educational programs, the men supervising these programs say, "No," as Marshall E. Allen, supervisor of closed-circuit television operations, says, "The total effectiveness of a course depends heavily on the teacher's follow-up activities after the television program. An emmisary will not replace the teacher in a team-teaching approach."

In the fall quarter Geog­raphy (GSC 103), Humanities (GSE 203), and Oral Communication of Ideas (GSD 103) will be offered. Many of the programs being shown will be added during the winter quarters.

Tapes for geography, health, and speech have already been recorded. Tapes are being made now for the literature and mathematics courses. The literature course will include a wide range of writings from Greek mythology to Huckleberry Finn.

The elementary and second­ary program under Carl M. Plascik includes a wide range of language, including French, Spanish, and Japanese. Some of the courses are presented at almost all grade levels. Fall quarter courses include Science 9-10, Social Studies 8, Art 2-3, and Social Studies 5 are produced at SIU studio. Tapes for the other courses are rented.

The educational system of Russia Revised

The programs are evaluated by teachers who see them. Evaluating the results often involves tallying 1,500 educational institutions.

The Russian Federation of Education is the most advanced system of mass education in the world. The system is divided into three levels: primary, secondary, and higher education. Each level is further divided into sub-levels. The primary education level consists of the first six years of schooling, followed by a three-year secondary education level and a four-year higher education level.

The primary education level is the most critical, as it lays the foundation for future learning. During this time, students are introduced to basic subjects such as reading, writing, and arithmetic. They also learn about history, science, and social studies.

The secondary education level is more specialized, allowing students to choose courses that align with their interests and abilities. During this time, students are also introduced to new subjects, such as foreign languages and mathematics.

The higher education level is the most advanced, providing students with the opportunity to pursue their passions and interests. During this time, students are also exposed to research and critical thinking, preparing them for success in their future careers.

The system of education in Russia is continually being revised and improved to ensure that students are receiving the best possible education. This includes changes in curriculum, instructional methods, and assessment techniques.

A total of $10,440 has been raised by the University of Illinois Alumni Association's second annual Telethon. The money was raised to provide 90 more classes for the 1972-73 academic year.

The Educational Council of 100, Inc., to provide facilities for the new SIU 28th American Exhibition of Educational Programs, has launched a campaign to raise $1,800 for the new center.

The announcement was made by T. J. Kiely, director of the Educational Council of 100, Inc., in a telelesson on the new center.

The Educational Council of 100, Inc., is a nonprofit organization that aims to provide educational programs and facilities for students in Southern Illinois.

The goal is to build an outdoor center at SIU that will serve as a medium for outdoor education.

OUTDOOR CENTER — Looking over the site of the new Outdoor Education Center south of Little Grassy Lake, President Deloye W. Morris (third from left), are (from left) Loren Taylor of the Department of Recreation and Outdoor Education, Dr. Warren D. Tuttle of Harrisburg, president of the Educational Council of 100, Inc., and T. J. Kiely, manager of WSJL-TV at Harrisburg.

Goal Is $250,000

The Barren Oasis

This is University Center. It is noon time. See the crowd in the Roman Room. See how desolate the Oasis is.

University Center was built to serve the needs of the students. At noon time, students need to eat. Would not the needs of the students be better served had the Oasis remained open?

Some have said that the Oasis was closed because its operation was no longer economically sound. Good grief, did that many students leave at the end of the eight weeks? If so, where did the crowd in these pictures come from?

If so, where did the more than $400 taken into cafeteria cash registers while these pictures were being made come from?

University Center Cafeteria has long been a sore spot. It still is.

Walt Waschick
Students Discuss Political Ties, Many Vote for Man, Not Party

American college students have a reputation for being far more dovish than students in other nations. They've, for example, led protests and demonstrations against the government and as students did recently in several countries. Nor have they stood and upcn a high ranking officer from another country who was visiting the United States, as has been the case in several South American countries. But when it comes to policiessAmerican style—they can be a real challenge to being a student anywhere around the world. Most of them will

ighly and proudly admit their party affiliation and tell you why.

Here are some of the responses from students who were asked recently whether they were a Democrat or a Republican and why.

"I'm a Democrat," said Linda Martins, a junior, "because my father is. I kind of like the welfare state and the

You Know the Answer?

Some Blush, Twitch and Evade Instead of Simple 'I Don't Know'

By Ed Pluzynski

Your face turns red, feet begin to twitch, nails are bitten till they are crimson and then you softly utter: "I'm not sure. I understand the question, sir..."

Several SIU students were asked about this common classroom phenomenon: What do you do when an instructor asks you a question you can't answer?

Students seem to have overcome the illusion that saying something is better than nothing at all.

"The most frequent answer given by the students interviewed was party expression," said a sophomore from Perryville, Mo.

"I simply tell him I don't know the answer," said Jim Buchheit. "I honestly think that this is better than to try to talk around the question that might be easily answerable, especially if the question involves an over due reading assignment."

Most students agree with this, Philosophy, Joe Bransen, a sophomore from Mat-

noon, added, "I think it's better to admit you don't know rather than involve yourself further."

Of course, there are students who differ with this view. "I never worry about teachers asking me questions," Ray Korda said, "because I know all the answers."

A quick answer to this came from Barbara Shackelford, "Some kids try to answer Home Ec Appoints Resident Manager

Virginia Martell of Mount Vernon, a student who was appointed instructor in the Department of Home and Family Living, is the new Resident Manager of the Home Ec Apartments. According to Eileen E. Quigley, dean of the School of Home Economics, Miss Martell, a 1957 graduate of the School of Economics, has taught in the University City 4th grade school for the past nine years. She completed the master's degree in home economics at SIU in 1962.

Democrats are tending that way."

Judie Muller, a senior from Arbon, Michigan, came out for a Republican because her parents are Republicans.

"I'm not really sure at this point what I am," said Marjory Crawshaw, a senior from Murphysboro, "I'm not really a Democrat but I most certainly am anti-Goldwater. I don't go strictly with the party."

Miss Crawshaw admitted that her parents' politics have influenced her some but she reads national newspapers to help her form her opinions.

"I'm adamant to what other people have to say about politics."

Bob Meyer, a senior from Springfield, claims allegiance to the Democratic party but he added facetiously that he is gaining his degree in "artistic arts and sciences."

Lewis Ameel, a teacher major from Arbon, said he is a neutral but admitted he leans toward the Democratic party.

"As I see it," Ameel said, "we are in need for realism. The federal government must become more personal. We need progressive leadership in this sense and the Democratic party would be the one to initiate it."

Another independent is Bill McLaughlin, a senior from Little Rock, Ark. He said his family is Republican but he adheres to no party specifically.

"I have thought this out for myself and I feel you should not be under the spell of the party," said William Reals, a junior from Pleasant Plains, who calls himself an independent.

"It is the position that the man takes on certain issues is important to me," he added.

Max Sappenfield, professor of government who has had long years of experience watching students become politically aware, said he believes students vote according to what will best maintain a secure future for them. They are very security minded and fear the unknown world," he said, "thus they vote frequently to maintain the status quo."

E. Claude Coleman, director of Plan A, said he be-

With Stamp of Approval

Boy Invades Privacy Of All-Female Abode

Students living in the Home Management Apartments, part of the Home Economics Building, this summer have a different experience than most of their predecessors. They have the care of a baby boy.

During a six-week assign­

ment to practical homemaking in the apartment, the girl students have experience under supervision in such phases of home management and care as meal planning, budget making, consumer buying, use and care of household appliances and equipment, and the responsibility of guests both formally and informally.

This summer, the baby, either an infant or a toddler, of a graduate student who is also en-

rolled in the School of Home Economics, is to be considered "member of the family."

Previously, most of the junior occupants have been girls. This summer, the baby of the Family Management Club, Allie Wharton, five-month-old son of Mr. and Mrs. Gerald Whar-

ton, Mrs. Wharton, the former Julianne Minch, is a second year student in home economics.

Resident supervisor of the Home Management Apartment is Virginia Martell, who joined the faculty of the Home and Family Department in June after seven years' teaching experience in home economics in the Johnston City Schools.

SERVICES OFFERED

SIR members, the tax exempt nursery school plan for SID members is now up and running. Call ISU Extension Services or write to the Office of Continuing Education. We will help you to make available programs to your institution that can serve the tax exempt nursery school program in your area. We can't do it all, but we can help.

For a new nursery school, write to the Director, 1210 W. Main, Carbondale, Ill. 62901. The Minnesota State Department of Health has just approved a loan under this program to help meet the capital cost of establishing a new nursery school in Carbondale, Ill.
Hunting Time Is Almost Here, State to Open 12 Game Areas

Twelve conservation areas will be opened to hunters this season, according to William T. Lodge, director of the Illinois Department of Conservation. Hunters will be required to report to check stations at nine of the areas. The areas are:

- Hamilton County Area, 7 miles east of McLeansboro, Lake Arglle State Park Area, north of Colchester in McDonough County, Lake Ramsey State Park Area, north of Ramsey in Fayette County, Randolph County Area, 4 miles north and 1 mile east of Chester;
- Red Hills State Park Area, east of Lawrenceville in Lawrence County;
- Saline County Area, 2 miles south and 8 miles east of Harrahsburg;
- Stephen A. Forbes State Park Area, 2 miles east and 1 mile north of Omega in Marion County;
- Washington County Area, 4 miles south and 1/2 miles east of Nashville; Waynesville County Area near Johnsville.

Hunting season dates and hours for the nine areas are:
- Squirrels—Sept. 15 through Oct. 15, from sunrise until noon, CST;
- Doves—Sept. 15 through Nov. 9, from 1 p.m. until 4 p.m.;
- Quail—Nov. 14 through Dec. 31, 11 a.m. until 4 p.m.

On these areas all hunters, except squirrel hunters, must check in before they begin hunting and check out before they leave the area at the headquarters building. They must wear a back patch on their hunting coats while in the field.

Squirrel hunters do not have to check in or wear back patches, but they must report their kill and check out before they return home. Only shotguns may be used on these areas.

All Illinois Game Code regulations will apply unless area restrictions are more restrictive, in which case the area regulations will be enforced.

Check stations will not be in operation at the following areas open for hunting:
- Douglas County, 3 miles east of Hillsboro
- Jasper County Area, 1 mile east and 1 mile north of the intersection of Routes 33 and 103, near Newton;
- Pope-Manasac Area, 2 miles west and 2 miles south of Bay City. These three areas will be open for squirrel, dove, quail, rabbit and pleasant hunting during the regular season. Shotguns are the only firearms allowed. State and Federal hunting regulations will be enforced on these areas unless area rules are more restrictive.

The Washington County, Saline County, Hamilton County, Pope-Manasac, Lake Ramsey and Lake Argle State areas will be closed to all small game hunting during the deer season, Nov. 20, 21, 22, and Dec. 4, 5, and 6. Deer hunting will be permitted on the Saline, Pope-Manasac, and Hamilton County Areas during the shotgun season.

Deer hunting will be prohibited on all other areas,

Earned Run Average Is Low

Hotz, Star Pitcher for SIU, Throttled in Summer Loop

Saluki pitching ace John Hotz is having his troubles on the pitching mound this summer. Hotz, a junior from Bloomington who turned in a sparkling 10-9 record with SIU's baseball team last spring, is currently pitching for Bloomington (III) in the Central Collegiate League.

As of Aug. 1, the star right-hander had an unimpressive 0-2 record as a starting hurler.

But Hotz's won-loss record doesn't tell the whole story of his performances this summer.

In the five games in which he has appeared this season, Hotz has allowed only seven earned runs and 20 hits in 31 innings. To go along with his 2.15 earned run average, Hotz has struck out 22 batters and walked only 13.

Bloomington currently is

Two SIU Golfers

Place 6th, 11th

Two members of SIU's varsity golf team placed in last weekend's annual Bloomington Gold Cup golf tournament, Bill Muhleman, Alton, finished sixth in the tournament, while teammate Gene Carello, captain of the 1964 Saluki golf squad, shot a stroke-over-par 150.

Jim Mitchell of Salem won the 36-hole tournament with a one-under-par 143.

Basketball Star

To Enroll Here

Bill Dial, a basketball standout for Ziegler-Royalton last season, is planning to enroll at Southern this fall, according to Saluki basketball coach Jack Hartman.

The 6-3 forward originally intended to enroll at Millikin University at Decatur, but a mixup in scholarship plans resulted in the switch to SIU. Dial also is a member of the Black Diamond League in Southern Illinois.
