Report rape traumatic for victim

Editors note: Following is the second of a series.

By Jerie Jane
Daily Egyptian Staff Writer

Any woman who reports a rape can plan on spending a lot of time talking to people and dealing with a crowded SIU student who recently went through the experience.

Jane, (not her real name), was pulled into a car by three men about a month ago and raped. She is one of seven rape victims on Carbondale police records this year.

"I wasn't sure if I'd been raped or not," she said. Jane said she did not know what legally constituted a rape. According to the legal statute, a rape occurs when any male 14 years of age and older has sexual intercourse with a female who isn't his wife, by force and against her will. Intercourse is defined as penetration of the female sex organs by the male sex organs. By force and against her will includes, but isn't limited to, a female being unconscious or mentally deranged and unable to give consent. Jane said she wasn't sure if penetration had taken place.

She recalled thoughts during her struggle with the driver of the car and the two men in the back seat.

"I was practically a combination of a fright and the bizarro things that went through my head. One of the guys in the back was trying to pull my jacket and top off. I was fighting with him for the door while I was trying to keep the driver away from me. I was wearing a sterling silver diamond necklace with sentimental value. I was so afraid he was going to get a hold of my necklace. I was thinking if he broke the chain I would clobber him. Ironically, two days later, her dog chewed up the necklace.

"I remember clutching my purse all the time because my wallet was stolen just a few days before," she said.

A few days later, Jane learned through the detective investigating her case that a doctor's report verified that intercourse had taken place sometime during the night.

She spoke sarcastically sometimes (Continued on Page 3)

Gus says enrollment drop is a penetrating problem, too.

SIU records highest drop in enrollment

By Bob Springer
Daily Egyptian Staff Writer

Enrollment figures for fall released Tuesday by the Illinois Board of Higher Education (IBHE) show SIU-C with the largest drop of any state public university. Of 19,008 students enrolled on a head-count basis, SIU experienced a 4.2 per cent drop from last year's figure.

Three other state universities felt a decrease in enrollment: the University of Illinois at Urbana, Chicago State University and Eastern Illinois University which lost five students from last year's enrollment figure. Enrollment in all public universities in Illinois for fall stands at 185,363. That is an increase of 2.5 per cent over last year.

The IBHE figures reveal that the number of full-time students in Illinois public universities is declining. The number of students living off-campus is increasing at a faster rate than on-campus dwellers, according to the 18-page report.

Whereas SIU was ranked third in the state for total enrollment in 1979, topped only by U of I and Northern Illinois University, it now stands as the seventh largest school in Illinois.

The report notes that the shift from full-time to part-time status patterns within the state account for the overall decline in Full-Time Equivalency (FTE) enrollment.

Of 90,631 students enrolled in higher education in Illinois for fall of 1974, 46.8 per cent are registered as part-time students, but increased to 48 per cent over last year.

SIU-C's on-campus FTE enrollment figure of 16,802 is a 4.6 per cent drop from last year's figures. Show that is the largest on-campus FTE percentage decrease of any public university in Illinois. Chicago State University, EIU and SIU-Edwardsville also felt a decline in FTE enrollment.

One of the prime factors the IBHE looks at in formulating the FTE enrollment is the rate in which the student's course load is increased from year to year.

While the U of I noticed a drop in total head-count enrollment of 407, the Urbana school was able to see an increase in its FTE figure of 299.

The report's data indicate that private universities and colleges in Illinois are suffering the greatest enrollment drops. Whereas enrollment in private schools increased by nearly 5,000 to a record high of 141,112, some of the private colleges were hit with big drops.

Tenative agreement reached; coal strike may end by Nov. 25

WASHINGTON (AP) — President Arnold Miller of the striking United Mine Workers announced Wednesday that the union had reached tentative agreement with coal operators on a "very good contract" which he said could end the nationwide coal strike by Nov. 25.

Emerging from a day-long bargaining session, Miller said he thought he would have no trouble selling the proposed agreement to the 130,000 rank-and-file union members, who must vote their approval before the mines can be reopened.

"The benefit package will allow us to go back and eradicate some of the long-standing inequities that have existed for years," Miller told newsmen.

The total cost of the contract was not disclosed, but indications were that it could prove to be the highest major labor settlement this year.

The contract, if approved, would provide wage increases of 9 per cent the first year and 3 per cent in each of the next two years.

The miners would also receive, for the first time, cost-of-living increases pegged to increases in the government's consumer price index.

The union chief immediately summoned his 28-member bargaining council from the coal fields to a meeting here Thursday to consider the tentative offer.

The council must first approve any contract before it is submitted to the rank-and-file for ratification—a process Miller has said would take at least 10 days.

WASHINGTON (AP) — The coal industry's chief negotiator, Guy Farmer, called the union negotiators ''very hard bargainers—and I think they've bargained themselves a very fine contract.''

He declined to discuss the specifics of the contract.

Farmer told newsmen that during the nine weeks of negotiations they had one meeting with President Ford and had been on constant touch with W.J. Usery Jr., head of the Federal Mediation and Conciliation Service.

The union said it won a large package of benefits, including five day's sick pay, a near doubling of industry contributions to the miners' pension fund, cost-of-living increases and its first sickness-and-accident-protect plan.
Erosion problems at Cedar Lake confront city; officials, planners will continue discussions on recreational development at the new reservoir, according to Robert C. Boyd and Planning Director James Rayfield.

Cedar Lake remains an isolated refuge three miles southwest of Carbondale, Ill., but one travels by hill back country over rugged, winding roads. At the end of a one-lane strip of gravel, one leaves his car and walks through mud and wild grasses into the park.

The dams are huge mounds overgrown with acres of wildflowers set between limestone bluffs up to 90 feet in height. The "saddle-dams" block off natural watercourses leading away from the west side of the lake. A 30-foot wall of water lies tranquil behind the City stripped topsoil were built. The city begins construction in the summer of 1972, and all the structures in the valley—trees, houses and bridges—were razed, however.

Today the lake spans across 1,750 acres of cropland country and contains 13.6 billion gallons of water. A 30 and 42 inch pipeline and three pumps bring water to the reservoir from the holding pool near Evergreen Terrace, he said. The lake is tranquil behind the city. By January final tests of the line, it will shut off its Crab Orchard pipeline and draw water from the reservoir.

Cedar Lake pipeline will pump an average of 15 million gallons per day. Boyd noted.

The lake was saved from drought in August. Pressed into emergency service, the recently completed reservoir failed to remain within the city. It reserves to a usable level after 48 hours of pumping.

Since August, 1971, the city has purchased 37 parcels of land in and around the lake area today. One of the projects is a U.S. Forest Service land front the lake.

"It is an awful lake. It's been built with public money, and we have the public to make use of it," Boyd said.

Cedar Lake, saved from drought in August, is an example of a possible recreational development at the new reservoir. At least 225,000 visitors-day of recreation annually, Boyd said.

Students from the community and the college who want to participate will have to sign up at the Information Booth outside of the River Rooms, 10 a.m. to 11 p.m., Illinois Student Union. The student workers will be open daily beginning at 8 a.m. in activity rooms A and B.

A concert at the Longbranch at 100 E. Jackson, 8 p.m. will be open to women because of policy of the city. Women and Karyne Pritkin will perform. Other activities are open to the general public.

Other activities include:

11 a.m., Illinois Room — "Women in Medieval Society." John Daton, director of the President's Scholars Program. Barbara Moberg, graduate student department of history.

11 a.m., Activity Rooms A-B — "Women in American History." Betty Fladeland, professor, department of history.

Taytor Mattis, associate professor. SU School of Law, will headline the Cha-paign City councilmen. Greater Champaign Area NOW.

"We're going to have to cut off some of our buildings at night when they're not in use," Edward Merchant, assistant chief benefactor of the Power Plant, said Wednesday. "We're pretty close to the 100 ton per day figure right now."

"We've shut off some of our machinery so by Wednesday we should be down to the 100 ton level. We're planning on being able to run on the shipments from Desoto."

When asked whether SU will be able to cope with the coal strike should it continue, Merchant said, "Sure, we'll be fine. We're not in any danger yet, but then, of course things don't look too bright either."

"We're having a hard time now," Enright said. "Because of the flash of cold weather has caused us to increase our demand for steam from the Power Plant and consequently increase our consumption of coal."

"We're going to have to cut off some of our buildings at night when they're not in use."

"Sure, we'll be fine. We're not in any danger yet, but then, of course things don't look too bright either."

3 p.m., Activity Rooms B — "Black Women and the Movement." Denise Willams, assistant professor, department of Planning of development.

4 p.m., Illinois Room — "Women in Prison." Nancy Werner, assistant professor, Center for the Study of Crime, Delinquency and Corrections; Robyn Stein, graduate student, administration of justice department. Women inmates from Vienna Correctional Institution. All events are free. For more information call the CAF office at 452-3274.

City blacked out

Parts of Carbondale suffered a power failure Wednesday night when wind and tree branches caused a transformer to short out in scattered areas.

The failure began shortly before 8 p.m. and affected the southeast and southwest sides of Carbondale and some areas in scattered areas.

The spokesperson said the power failure affected 50 percent of campus were affected by the blackout.

"We're going to have to cut off some of our buildings at night when they're not in use," Edward Merchant, assistant chief benefactor of the Power Plant, said Wednesday. "We're pretty close to the 100 ton per day figure right now."

"We've shut off some of our machinery so by Wednesday we should be down to the 100 ton level. We're planning on being able to run on the shipments from Desoto."

Victim relates traumatic rape experience

(Continued from Page 1)

about her thoughts and reactions to the two weeks she had been walking the police and being examined at the hospital.

Immediately after reporting her rape, Jane was called to calm herself following the incident an hour earlier, waited anxiously for the police to arrive. Jane ran to her boyfriend’s house after escaping from the car three men pulled her from a telephone booth where she was enrolled on the basis of something in their record.

Jane also said the bill failed to clearly define the meaning of an official “record” as defined by an amendment to the Buckley Amendment. Huffman expects to see a number of tests delivered to the student where it is applicable. Huffman said he wants to “polish it up” before the interim policy is released.

One point of the law Huffman wishes to articulate is the definition of the term “student.” The law is not clear on who is considered a student and when a person loses that classification.

Huffman said the Buckley staff has decided to report a student to the police after a check up and see if the report was real. I almost loses a “student.”

While waiting, the phone in her house rang, Jane said she felt panic and fear once again. “I thought someone was calling to check up and see if the report was real. I thought, "Oh God, what if they’re calling to see if I was a false rape? What if they don’t send someone out?"

After the phone call, Jane again felt the loneliness of waiting for help to arrive. That was her chance to calm herself between the time she called and the police arrived. The officer who came to assist her was a friend she had known for about a month.

“When I saw him I became hysterical again. He tried to comfort me. He kept

Beg your pardon

By Joel Preston, general manager for WDB, states, in part: “The University of Southern Illinois is, of course, not required to operate a radio station but rather to provide an education; however, it considers the station as an integral part of developing a realistic environment for students pursuing a career in the media. It is the same philosophy which resulted in the advertising activities of Daily Egyptian.

The proposed Media Advertising Policy would allow growth of the station to the extent it would like to advertise, is listed as a pending matter before Thursday’s Board of Trustees meeting in the Student Center.

Editor’s note: In part three, Jane gives her reactions to treatment received at the police station and what lies ahead for her if her rape is suspect are apprehended.

Gov. Walker sides with WDB in ad policy controversy

The open portion of the meeting is scheduled at 11 a.m. Monday. In response to Varecha’s letter sent to Walker in late September. In that letter, Varecha expressed concern to the Board of Trustees about the station’s advertisement to WDB.

Walker’s letter, a copy of which was given to the Daily Egyptian, said that the state bought equipment should be used to compete with free enterprise. Certainly, the state is in a position to make competition difficult for private and local broadcasters,” the letter said.

Varecha could not be reached for further comment.

Daily Egyptian, November 14, 1974, Page 3

Editor’s note: This is the third of several articles dealing with local effects of the SIU policy.

By Gary Delsohn Daily Egyptian Staff Writer

SIU has developed an “interim policy” for dealing with the controversy over students’ rights to be present while the record is being examined and shall provide a copy of any documents that contain request and payment of reproduction cost.

A written request may be submitted to correct or delete any information the student feels is incorrect or in violation of his rights. The dean or department head will review the request with the student and any other persons in order to reach an appropriate decision within 30 days of receipt of the request.

The student can appeal this decision, within five days after it is handed down, to the immediate supervisor of the policy or the Board of Trustees.

He is entitled to a closed hearing, within ten days of this request, where he can present any evidence.

This decision can be further appealed subject to the provisions of the Board of Trustees and any award of damages.

Failing to comply with the law could lead to legal action by the state attorney general. SIU received slightly more than $4.7 million in federal grants.

Huffman said the university will make every effort to comply with the law, but “If we don’t, it won’t be because we don’t want to. I don’t think it would remove funds for an attempt to comply. We are going to comply.” Congress or someone has amended the law to make it possible for people to appeal if they want to.

Huffman has requested an interpretation of the law (Congress’s bill of the interim interpretation has been “completely exhausted,” she said.

Changes needed in Eboness pageant

Beauty pageants, like every other aspect of American life, has an aura of competitiveness. From its earliest conception, during the frantic rage for frivolity that followed World War I years ago, the America Pageant became the seed of beauty competition among women which eventually blossomed into a similar event for Black women—the Miss America Pageant. Both pageants base competition on merits of beauty, talent and personality. Their definition of these traits is primarily centered on charm, grace and how stunning a contestant can look in her bathing suit.

The Miss Eboness Pageant, conceived three years ago at SIU by Alpha Phi Alpha fraternity, has taken the concept of competition and given it an entirely different direction.

The judging competition based on the measurements of a contestant’s body was one of several points taken to give shape to the concept of “honoring Black womanhood.” Instead of judging a contestant by body measurements they are given points on their ability to compete in talent and their ability to place their values in a proper perspective. For example, in the question-and-answer period, the contestants are asked, by five judges, how they view their parents’ color. Each answer is weighed according to the extent in which they (the contestants) realize their purpose and goals. Previous to this period, each contestant is allowed five minutes to present an original talent skit. This is the only way the competitors separate the pageant from the Miss America syndrome and boldly allows time to assert that the Miss Eboness Pageant “is not a beauty pageant but a cultural affair.

Being a cultural event is a very important component of the pageant because it enables everyone who attends the function to take part in the affair. The motto of the pageant itself is a bearer of this unique quality, always taking the time to insure the audience that every woman is a Miss Eboness. Therefore, it is the competition aspect that is different from other pageants, but the mere fact that every woman in the audience is capable of bearing the title Miss Eboness.

The Miss Eboness Pageant is by no means a faultless event. It has its difficulties just as any other event would have. There have been criticisms on the technical ability displayed in the pageant since it has started. But it is always a question of time and one time. Although the event itself calls for a large period, the pageant should be won out by allowing a limit of five contests on the stage at one interval.

However, the fact still remains that the pageant’s unique blend of competition and cultural awareness gives it a feeling that is not found in the majority of pageants. It should stand as a precedent for future pageants because of the purpose in which it was originated. There is a need for more events honoring the Black woman’s contribution to Afro-American history. It is also an urgent need for a more concrete system of competition in the pageant. Although the competition of Eboness is the prototype of the pageant, judging criteria will have to allow more room for different opinions such as those of the audience in choosing a contestant who will wear the coveted title of Miss Eboness.

Dog owners must adhere to local laws

Presently in Carbondale there is a dog control problem existing, one which could easily become uncontrollable and result in serious tragedy for people and pets. This is a typical scene occurring on the streets today, maybe it happened yesterday, and quite likely again tomorrow.

A dog running, free of the vicinity of his owner’s residence, strays out into the nearby roadway. A car is driving along that particular street, its driver somberly watching the dog, in class, etc., near the animal.

Next scene: sheer bedlam, the owner of the dog cannot be found, the animal does not wear tags, the driver is in shock or has taken off, the animal is usually carried off to the shelter and put to sleep. Just another headache? Who cares?

The city council, in an effort to forestall a crisis has passed an ordinance requiring leashing, registration and rabies vaccination of dogs, with fines imposed when a canis is “caught by catcher.” The law is not on the books to make the city rich, as many a disgruntled owner has claimed after “sightin’ning” their pet from the Jackson County Humane Shelter.

Carbondale is not a small, country town, it is a city of 25,000 population (including dogs, about 27,000). Owners of pets, if you really love your animals, have pets and care.

Lengthy strike will cause problems

The massive strike by 120,000 United Mine Workers of America (UMW) represents a grave threat to the already perilous economy of the nation. Depending on how long the strike lasts, the nation could face extreme power shortages, giving us the 1974 version of the energy crisis. Increased unemployment is another grim prospect. Of course, the president may have more power over the miners than over the perpetuators of the last so-called crisis, the oil producing Arab nations. The President has the authority under the Taft-Hartley Act to order the miners back to work for an 80 day “cooling-off” period, a very real possibility if the miners stay off the job more than the projected three weeks.

Much of the nation’s electrical energy is produced by steam which, in turn, is produced by coal. In Illinois, a state greatly dependent on coal, 96 per cent of all utility power is produced coal. A prolonged strike, halting two thirds of the nation’s coal production, would cause Illinois and the nation to drastically cut back public consumption. The Tennessee Valley Authority, apparently afraid due to its short emergency supply, has urged governors in its seven state area to take emergency action to reduce electrical use in order to “avoid or postpone cutoffs which could result from a prolonged coal strike.” It is more than likely other government agencies will follow suit, calling on the administration to ask Congress to impose energy regulating legislation on the public.

Railroads and steel mills will also suffer cutbacks due to the strike. Many large firms, such as United States Steel, have already laid off large amounts of workers, adding to the frightfully high rate of unemployment. The federal government has speculated that a miner’s strike lasting one month will cause about 400,000 layoffs nationwide, and 1.7 millions if it lasts two months.

UMW president Arnold Miller and representatives of the Bituminous Coal Operator’s Association are currently negotiating in an effort to reach a compromise and end the strike. The UMW is determined to avoid getting “bludgeoned into accepting” an inadequate contract and the coal operators are equally determined to keep their monetary losses (from increased wages and improved conditions) as low as possible. One UMW district president said the coal operators are hoping Ford “will do the dirty work for them and offer federal intervention in negotiations.” He also said that the nation’s largest mines are owned by the nation’s largest companies, such as Standard Oil, further weakening the miners’ position.

Basically, what the miners want, besides the standard wage and pension increases, is the right to strike locally over safety hazards and five days a year company paid sick leave. These seem like reasonable demands when one considers the spiraling cost of living, the inherent danger that accompanies deep coal mining, and the damage to the economy the strike will cause.

Paradoxical prison system failing to rehabilitate

Susan DeMar
Student Writer

Our penal institutions are concrete conduits, walled off from reality as it is for people. From the moment the prisons were established, they were founded upon a system of cruelty and futile attempts at improvement. Over the years, the system has changed, and the water and bread have been replaced with a chaplain, counselor, vocational instructor, psychiatrist and warden, the latter responsible for a substantial number of inmates. The percent of those released return later, and the number is ever increasing. But statistics alone do not tell the story.

It really is a paradox that there's a lot of punishment and very little "treatment." It's a denunciation of the idea that you need to read before you read it, where you can get a ticket if you can't be sure if it is not returned. A Textbook Rental Committee has replaced the old system. We would like to reply on the student's behalf.

The average price of a textbook is $100 per year. This left an open question: Do the students really need textbooks? Yes, they do need them. But without textbooks, they can't even try to prepare them for a life in a society where there's love, freedom, and compulsory legal education. As one police official stated, "What is the best people in the field of corrections is that large in number, must be tested for the human needs of the incarcerated, so men leave prison seldom having found the something that gives their lives inward security and stability."

If the prison system cannot reform an individual, the system must be totally reformed. The myth that it is the biggest obstacle to progress. Fear it down and it fails. It is a cruel, inhumane, and illegal punishment. In many places, the problem is not just the public safety—providing maximum protection to the public is the maximum psychological damage to the criminal. With this concept in mind, Alternative solutions to the problem might include some direct benefits for prisons. Some other alternatives that are now being used in some areas include group homes where about 8-12 inmates are housed, home visits by prison counselors to local agencies and communal centers located in residential areas a relaxed atmosphere of the inmates can more successfully help them in their adjustment to life. Some other successful such centers in which all patients participate in the work of the housework. The recidivism rate is less than two percent.

Other working alternatives include bail reform, work release programs and weekend jail lockup. All these ideas are being examined. We must assure and encourage the prisoner who fearfully asks, "When I've done my time and prison is behind me, will the persecution quit or remain my present not past?"

Letters

To the Daily Egyptian:

As a former church pastor (Lafayette, LA) and father of a religious leader, I am disturbed when I see fear and fanaticism (especially witchcraft in the prison system of religion. I refer to the letter from John Keyes, Felicia Schwangman which quotes Deuteronomy 18:10-12 to demonstrate that "Christianity is 'what a hell has been done' and especially witchcraft, dream interpretation, sorcery, prophetic, and empiricism. The fact is, the Old Testament condemns these things only when the Canaanites did them. There have been definitely approved of dream divination (Gen. 37-41), devil worship, the worship of Baal, Uran and the Thummim, a Judas-like device in Exodus 28:30, recognition (Judges 4:4), casting lots (Acts 1:25) and general psychic experience (I Samuel 9, especially 3). It's a case of 'if it's done, it's good, but if you do it, you'll evil.' Furthermore, since these three good Christians accept the binding validity of Deuteronomy 18:10-12, they must also accept the binding validity of Deuteronomy 21:17, which commands them to stone to death stubbornly delinquent children. Of course, I also want to keep the feast of booths as contemporary acceptance of Christianity is the only reason that witchcraft is not compatible with Christianity—it is the reading of Euclid by faulty thinking.

Child discipline question

To the Daily Egyptian:

I never taught my children to strike back or to hit over the head, I said to them, "be a better person and home and tell me. This must be a big mistake. I once raised my hand to him, because they are so defenseless in this hostile world, especially in American society."

My small shy boy was hit hard and fast by two big boys (older I simply because he took a hat off from the boy's head. Boys thought he deserved it because it is best to dislike them. The parents of the big boys said "let them take their own problems and solve them." They were five, five and one-half years of age respectively. As another example my small boy came home crying and with wet muddy clothes. I called my other son, a mother to find out what is the matter, he started crying and said, "It was in first. And that's not all the next time his face will go underneath the water." I went to the house and found my son in his own problem situation.

The next few days two neighborhood girls told a group of boys playing in an empty lot to "be quiet." The boys replied by throwing mud. The girls disappeared by running large, jumping, and him down brick wall. The girl's boyfriend observed it, so don't blame the girls. I know my boy is never able to settle his problems fairly on his own because he is handicapped psychologically by physical limitations. He is mentally physically being small. All he knows is that he must raise his hand to hit whenever he went out to play with the neighborhood kids. The only way I know to solve this problem is with parental cooperation, finding out the truth, facts, and dealing with the situation as a child. Parenting is to teach right and wrong and correct the behavior and way of thinking. Moreover it is to learn to love your neighbor as yourself (Luke 10:27). Jesus taught us long ago at the time human history progressed enough to understand what is right and wrong.

Am I a noisy mother siding with my children in their "rival" groups in the kids' affairs? Or am I correct in assuming that we should discipline our children as the Lord commanded us to do?" Brown

Letters to the Daily Egyptian

The Daily Egyptian welcomes expression of all points of view on all topics. Writers are requested to be civil and fair in their arguments. Letters should be no longer than 300 words. The Daily Egyptian reserves the right to edit letters for length, clarity and good taste. Letters to the Daily Egyptian newsroom at 144 E. Main St., or by mail to Letters to the Daily Egyptian, In Carbondale, Illinois 62901. Include your address and the signature of the writer.

The Daily Egyptian, November 14, 1944, Page 5
Funeral service for SIU student set for Saturday

Funeral services will be Saturday morning in Bethal for Denise Helmkaemp, sophomore agriculture-education student killed Tuesday afternoon in an automobile accident near Edwardsville.

The son of Mr. and Mrs. Vernon Helmkaemp, Edwardsville, Denise was home because of the death of her grandmother. He died in a collision stop a hill on a rural road west of Route 4 about 2:40 p.m. Tuesday while en route to the funeral home where his grandmother’s body had been taken.

Services will be at 11 a.m. in the Zion United Church. The Smith Funeral Home is in charge of arrangements.

He was a 1973 graduate of Edwardville High School. He was a member of the Alpha Gamma Rho fraternity and last spring was elected to the AGR house council for the current school year. He lived at the dormitory house, 116 Small Group Housing.

Activities

Recreation and Intramurals: Pullium gym, weight room, activity room 4 to 411 p.m., pool 8:30 to 9:30 p.m.; tennis courts 9 a.m. to midnight.

Original art prints sale scheduled for Thursday

A sale of original prints by master artists will be held Thursday from 10 a.m. to 4 p.m. in Student Center, Ballroom C.

Nearly 1,000 prints by such artists as Rembrandt, Goya and Picasso from the Roten Galleries of Baltimore will be on sale.

The prints range in price from $10 to $60. The collection contains only graphic arts such as woodcut, etching and lithography.

The sale includes work from the 15th century to the present. Works by Cezanne, Darmier, Toulouse-Lautrec, Chagall, Carrier and Ives and many others will be on sale. By Remon's standards, "original" means that the work was conceived and prepared by the artist and the print was pulled from the original plate. Multiple printing makes it possible for original works to be sold at reduced prices.

The print sale is sponsored by SIU Art Student’s League.

Films on authors

set for Thursday

Films on Ernest Hemingway and D.H. Lawrence and a readers' group presentation of two plays by English Professor Thomas Station will be featured in separate events at SIU's Morris Library Auditorium Thursday afternoon and evening.

The films will be shown at two English graduate class sessions, both open to the public. The 2 p.m. class (Eng. 511) will hear recordings of Hemingway's voice and will see a 31-minute film on phases of his career. A 3:35 p.m. class (Eng. 511) will hear some Lawrence recordings and see a film taken at his New Mexico Ranch. Poet-critic John Ciardi and Harry T. Moore, Lawrence authority and research professor of English at SIU, are in the film.

Haton's plays, "The Loathly Lady" and "Atlantis," will be presented by several readers. One of the plays is based on Arthurian legend, the other on Greek myth. Presentation is Thursday at 8 p.m. in Morris Library Auditorium.

Collegium Musicum concert honors patroness St. Cecilia

By Joanne Reuter
Student Writer

Music’s patroness, St. Cecilia, would have been delighted by the Collegium Musicum’s concert in her honor Tuesday at the Lutheran Student Center.

The Collegium members include SIU faculty, students and guest artists. Its 23 voice chorus and Baroque orchestra perform exceptional music from the Middle Ages to the Baroque era.

Henry Purcell’s “Ode to St. Forestry teacher lauds Southern Illinois forests

By Steve Hildebrand
Student Writer

Recreation could be the most important forest use in Southern Illinois, according to John Burde III, newest member of the faculty of the SIU Department of Forestry.

Burde, who receives his Ph.D. from the University of Arizona this year in watershed management and forestry economics, is currently teaching forestry economics and will be involved in recreational research on the Crab Orchard National Wildlife Refuge and nature trails throughout Southern Illinois.

Burde said Southern Illinois has potential opportunities to serve more people from populated areas such as St. Louis, Memphis, and other large cities.

“Opportunities are limitless for recreation and more funds should be provided to develop the areas better to serve the demanding public,” he said.

Burde said he feels “basic economic courses are unnecessarily broad for the forester or recreationalist who needs to relate more to the principles of forestry and recreation.”

Burde’s objectives are to teach resource economics emphasizing its applications to environmental problems and land use planning.
U of I staff may get raise

CHICAGO (AP) — The University of Illinois board of trustees voted Wednesday to request a 12 per cent pay increase for all university employees for the 1976 fiscal year. The request goes to the Illinois State Board of Higher Education. Approval by that body would send it to the Illinois legislature and passage there would put it on the governor’s desk.

Vote for the salary raise was along party lines with six Republicans for it and three Democrats against.

The trustees also asked for a special appropriation to operate the commercial air service at Willard Airport in Champaign. The university now runs the air service out of a general appropriation.

Warren Chester, chancellor since 1971 at Illinois-Chicago, told the trustees he will not seek renewal of his contract which runs through August 1978. Chester, 68, has been involved in a continuing controversy between the school’s administration and Chicago Latino community.

Miner to speak about strike

Jack Wasson, a member of the striking United Mine Workers of America, will speak in the Mississippi Room of the Student Center Thursday at 7:30 p.m.

Dennis Sullivan, SIU student body president, said the purpose of Wasson’s appearance is “to call attention to the plight of the miners.” There are 120,000 miners currently out on strike.

Wasson, a miner from Carrier Mills, will speak about mine safety conditions, living problems and the strike issues.

Additional miners are being contacted to join Wasson’s talk which, according to Sullivan, will be “low key because these men are not public speakers.”

Senior Kenneth Busbee, ID Carbondale, has been invited to attend but Sullivan said he has not received confirmation or denial from him yet. Busbee was endorsed by the Political Action Committee of the United Mine Workers in his recent successful re-election effort.

The speech is sponsored by SIU student government. Sullivan added.

Authentic Indian Jewelry

Cuff bracelets, pendants, rings, hesh and fetish pendants, chokers, all with genuine turquoise stones, set in beautiful hand carved sterling silver mountings. The Illinois State Lottery will come to Carbondale Dec. 5 to draw winning numbers and numbers for $300,000 and 25 tickets to the Superbowl, according to a lottery spokesperson.

Gov. Dan Walker, State Treasurer Alan Dunn and Comptroller George Lindberg, may appear at the University Mall drawing, said Linda Graham, public information officer for the lottery. "There’s a good chance all three will be there," she said Wednesday.

Activities and a list of local dignitaries to embellish the 10:30 a.m. event are still "indeterminate," according to the office of the University Mall manager, Phil Faireaux.

At a Nov. 7 drawing officials drew 131,189 and 421 as qualifying numbers for the Weekly Bonanza and Millionaire games. By matching any two sets of three-digit numbers in the Weekly Bonanza section of a lottery ticket, the holder becomes eligible for the Bonanza drawing.

Last week’s drawing also produced 172 and 994 as qualifying numbers for the Fall Windfall Game. A person matching these numbers with numbers in the weekly Bonanza or Millionaire Game becomes eligible for the bonus drawing Dec. 5. To qualify holders must take tickets to the state lottery claim center in Marion.

Persons qualifying for the $300,000 weekly Bonanza drawing or the Fall Windfall Game to select winners for free trips to the Superbowl may appear at the drawing. The game will act as a proxy for persons not attending the event, Graham said.

Up to 30 persons usually qualify for the $300,000 Bonanza, Graham explained. Qualifiers are eligible for prizes of $20,000, $50,000, $100,000 or $200,000, according to lottery rules.

Qualifiers for the Windfall Game may win tickets and an expense-paid three-day trip for two to the New Orleans Superbowl this Jan. 12, or $1,000, according to the rules. Gary Huff, first string quarterback for the Chicago Bears will host the winners, Graham said.

Weekly Lotto winners for $5,000, $100 and $20 will also be drawn Dec. 5, Graham said.

State lottery officials chose Carbondale for the drawing of its enclosed shopping mall, its location in Southern Illinois and its ready access to transportation routes, Graham said.

Sex seminar to offer tapes, films, exercises

A Sexual Awareness Weekend, sponsored by the Counseling Center and Human Sexuality Services will be held Nov. 22, 23 and 24. The workshop will be held at the Asklepios Foundation located at 328 S. University.

Participants will deal with sexuality as a dynamic life process through the use of tapes, films, exercises and open discussions with others regarding their attitudes, feelings and beliefs.

The workshop will be conducted on a live-in basis. Participants are asked to bring sleeping bags, pillows and whatever else is needed for an overnight stay. All participants should plan to be involved for the entire session.

The cost of the weekend is $10. Participants will be responsible for their own meals.

Registration forms can be picked up at the Counseling Center at Washington Square Building 4 or at Human Sexuality Services at 908 S. Elizabeth. Registration is limited to 20 participants and will close Nov. 15. Workshops are also planned for spring semester.

Vocal recital will be given on Thursday

Soprano Nora Bostaph will give a graduate recital Thursday at 8 p.m. in the Old Baptist Foundation Chapel.

She will sing Mozart's "Concert Arias, K. 418" and "Chanson de Ronard," by Darius Milhaud. Bostaph will also sing selections by Richard Strauss and Ned Rorem.

Aprili Kaeck will serve as accompanist. The public is invited.

Counterculture trends reflected in catalog

SAUSALITO, Calif. (AP) —

The man who brought you "The Last Whole Earth Catalog" is now bringing you another how-to-doo-it yourself, super-sleazy, Whole Earth Epilogue. He says it reflects changes in the counterculture it chronicles.

"Five years later, we find the counterculture and others are a bit more sophisticated," says Stewart Brand, who compiled both books.

"There are still a lot of our readers who are into counterculture, and this is really a catalog for that kind of person," he says.

Carbondale fireman Tom Winkel and Darius Milhaud's "Eliade Lockbery" listed as resident is...

Carbondale fireman Tom Winkel and Darius Milhaud tires in the remaining entries of an early Tuesday morning fire which gutted this automobile and the garage which had stood around it. Both belonged to Estalida Lockbery, 203 S. Oakland. The fire was the third of three garage fires reported to the fire department within a half-hour. (Staff photo by Steve Sumner)

Five off-duty firemen were called to assist in putting out the fires. All three fires look about two hours to extinguish.

Firemen were also called to a car fire late Tuesday night. A fire of unknown origin inflicted $500 worth of damage to a 1974 Gremlin at the East Main Shell Station, 422 E. Main. The car was in the station for repairs, and the owner's name was not available from police.

Two other garage fires were reported Tuesday morning and early Wednesday morning, one at 202 S. Oakland and one at 202 S. Oakland. A car was in the garage and about $500 damage was done. Listed as resident is...

"HAPPY HOUR"

10c For a Good Cup of Coffee
FAMILY FUN
The Waffle Place

SAUSALITO, Calif. (AP) —

The man who brought you "The Last Whole Earth Catalog" is now bringing you another how-to-doo-it
diy, super-sleazy, Whole Earth Epilogue. He says it reflects changes in the counterculture it chronicles.

"Five years later, we find the counterculture and others are a bit more sophisticated," says Stewart Brand, who compiled both books.

"There are still a lot of our readers who are into counterculture, and this is really a catalog for that kind of person," he says.

Brand says his readers are more interested these days in gardening than drugs. "They want to know how to grow their vegetables on rooftops, window sills and any little bit of ground the sun shines on."

There is a new section on home winemaking with recipes "as good as or better than anything you can buy," he says. "There's also that added it did itself" ingredient, the real mark of the counterculture.

Other sections deal with black interests and travel.

"Interest in India, the pilgrimage to holy places and all that, seems to be dimming. Enthusiasm for Nepal, now turning from New York and South America generally. People are also trying to find their way into China..."

The new volume in 316 pages shorter and costs $1 less than the original catalog, which sold for $5.

Like the old catalog, the new one is printed on oversized newsprint with a cover photo of the earth rising as seen from the moon.

Fengiuo Books' initial press run of "Epilogue" was 350,000 copies, but an additional 100,000 copies already are ordered.

Coaching classes available in men’s physical education

By Ron Sutton
Daily Egyptian Sports Writer

Interested in becoming a sports writers’ punching bag? In other words, a coach?

A coaching occupation is available at SIU for non-physical education majors, as well as for p.e. majors.

The men’s physical education department offers classes in technique and theory of coaching in nine various sports. Students can take any three courses after completing two basic two-hour courses, “Introduction to Athletic Training” and “Management of Interscholl Athletics.”

In the women’s department, after the basic introduction course, it is divided into 10 sections of second-level courses covering the various techniques of a particular sport.

Women’s physical education also offers one purely coaching class, numbered 330, called "Coaching Women Sports.”

“A lot of schools that hire teachers also want coaches.” Edward Shea, chairman of the men’s p.e. department, said Wednesday, explaining the purpose of the min-sequence. "They can’t depend on just p.e. teachers because there may only be one or four of them, but 20 coaches needed.

"If you can’t help as an assistant coach, you don’t get the job if you’re just as good a teacher as the next guy. He added, "Not all people that coach are athletes in college.”

The head coaches of the various sports at SIU teach the classes involving their respective sports, with the whole men’s program supervised by associate professor James Wilkinson.

The nine-hour courses available in the men’s department are baseball, basketball, football, swimming, track and field, wrestling, tennis, gymnastics and golf.

The women’s department instructs volleyball, basketball, softball, tennis, badminton, golf, field hockey, soccer and speedball.

“Our courses are not theoretical on coaching, but rather just about how to play the sports.” Charlotte West, women’s athletic director, said. "If you adhere to the philosophy that a coach is a master teacher, then that covers it.”

While the programs are designated as men’s or women’s, each curriculum is open to the opposite sex. “You don’t have to be a physical education major for a high school coaching job—or even a college one, occasionally.” Shea reemplaced. "Principals and administrators around the state have talked with us about this situation.”

While the coaching segment of the women’s department is not a separate entity within the department, the opposite is true in the men’s case. After the two basic courses and three of the choices have been completed, the student receives a certificate, saying that he has passed the program in “Clinical Specialty in Coaching.”

“In Illinois, we don’t have certification of athletic coaches, as we do for teachers.” Shea said. "About five states do have certification requirements. In Illinois, we’re trying to get the present of the certification board to make that requirement.”

The three-hour men’s courses are also travel and additional courses are offered, concerning training, officiating, weight training and psychology of coaching. An adviser has been named to aid in the min-sequence.

Longdogger opponent looks like he’s getting a karate chop to the neck as Carl Halep of the Longdoggers tries to smear a pass. Longdoggers were one of the favorites for the intramural flag football championship, going into Wednesday’s action. (Staff photo by Bob Ringham.)

IM games reach semis

By Dave Wescott
Daily Egyptian Sports Writer

Will the Belmont Bay Bombers shell the bird slipping Merilin’s, or will Merilin’s thug down the Bombers like a cool mug of their favorite brew?

Will Sigma Tau Gamma prove Grillin’ and Groggin’ are no more, or will the Longdoggers oust the Greeks for the Gunnin’ and Gunnin’ championship? Longdoggers aren’t just a pack of hounds.

No one knows for sure, and that makes for a lot of excitement as the flag football playoffs enter the semi-final rounds. Intramural football is much like intramural basketball. On any given day, any one team can beat another. As Michigan State proved, to the Buckeyes from Ohio State, as Sigma Tau Gamma proved to Lewis Park. Intramural football is much like intramural basketball. On any given day, any one team can beat another.

**New wing for Arena possible by 1981**

By Dave Wieczorek

Daily Egyptian Sports Writer

If all the "ifs" become reality, SIU athletes will have a warm place to practice basketball by 1981.

According to T. Richard Magee, Vice President for Administration and Services and Rino Bianchi, Director of Facilities Planning, plans for a $7 million SIU Center for the Development of Athletics would be located on the east side of the Arena by the parking lot. The building will cover 128,400 square feet and may be two or three stories.

To compare that figure with another building, the Arena covers 142,600 gross square feet.

"We are requested by the Illinois Board of Higher Education in a document called Resource Allocation Management Plan to project a five year plan for the future of the University," Bianchi explained.

Included in these plans, is the request to build the new wing for athletics.

"This new wing is a low priority building," Bianchi pointed out. "A priority on the plans are the Valley all-sports buildings, and the basketball schedule in order to get the main floor.

No definite plans have been decided yet, concerning what the inside of the building will look like but both Bianchi and Magee expressed similar views concerning an indoor track.

This is one of the facilities we hope to have in the building," Bianchi explained. "They have already started doing a survey of the weather is so fine, you want to use our facilities and you don't. An indoor track would give us added strength when we talk to a boy.

Athletic Director Doug Weaver was not aware that plans have been started for this building but he was equally pleased. "I'll be great for the entire student body," Weaver said enthusiastically.

"This building would give us some of the best athletic facilities in the country."

**SIU takes on Brazil**

College basketball rules will be obeyed during the game tonight when the Salukis face the Brazilian national team. Game time is 7 p.m.

College rules are used each fall when the Brazilians travel to the U.S. During the past 11 years the Salukis have faced Brazil. The rules are international rules used.

There are four major differences in the international rules and the college rules include a 30-second shot clock: two-second free throws only in the last two minutes of each half: the free throw lane is six feet wider at the point where the shooter stands and officials do not have to handle the ball when it goes out of bounds.

As for the Salukis, this game will be missing two key forwards when they take the court against the Brazilians. Sophomore Corky Abrams will miss Thursday's action with a sprained ankle.

Abrams is expected to begin practicing next week.

Junior college transfer Mac Turner is nursing a bruised knee and is not expected to play against the Brazilians.

Coach Paul Lambert's probably starting line-up includes guards Mike Glenn and Perry Hines, Tim Ricci and Shag Nixon at the forward and center positions.

Weatherwise is the only one, including the coaches, who knows anything about Brazil. The Salukis are one of the players for the U.S. team which finished second in the World Games last August.

"We played the Brazilians in the World Games and they have good size," Lambert said. "They rebound well and they are very good offensively."

The tickets for the game are priced 75 cents for SIU students, $1 for children under 18 and $2.50 for adults.

Warren W. Brandt, SIU president designate, considers Intercollegiate sports an important part of extra curricular activities on campus.

"College sports provides fan participation," Brandt remarked Wednesday. "It is a place where students, faculty, townspeople and alumni can become unified."

Brandt feels that college athletics can have beneficial effects on the individuals who participate. "Sports on the college level has a rivalry to it which is as old as tribal competition," Brandt said.

Several secondary benefits come about from sports on the college level, Brandt said. "Publicity is provided for the university through athletics," Brandt said. "This is one of the fringe benefits of athletics."

Brandt, who considers himself a "sports fan," plans to attend all Saluki athletic events as his schedule will permit.

Warren W. Brandt, SIU president designate, considers Intercollegiate sports an important part of extra curricular activities on campus.

"College sports provides fan participation," Brandt remarked Wednesday. "It is a place where students, faculty, townspeople and alumni can become unified."

Brandt feels that college athletics can have beneficial effects on the individuals who participate. "Sports on the college level has a rivalry to it which is as old as tribal competition," Brandt said.

Brandt feels that college athletics can have beneficial effects on the individuals who participate. "Sports on the college level has a rivalry to it which is as old as tribal competition," Brandt said.

Several secondary benefits come about from sports on the college level, Brandt said. "Publicity is provided for the university through athletics," Brandt said. "This is one of the fringe benefits of athletics."

Brandt, who considers himself a "sports fan," plans to attend all Saluki athletic events as his schedule will permit.

I'm already working on a guest list for the December 2 basketball game," Brandt said.

Last week Brandt met with members of the women's athletic department. The women's athletic department is trying to break away from the women's physical education department in order to form a separate department.

The women's athletic department ran into one major problem earlier in the year while trying to become a separate department. In the past, tenure has not been granted to athletic coaches.

Brandt feels that the tenure problem is a special one. "We're talking about coaches that are already here at the university and have tenure," Brandt said. "Tackling away tenure from these coaches is not a good thing."

"The coaches in the women's athletic department aren't really changing jobs," Brandt said. "A lot of these coaches are making an impact and moving up.

Dr. Charlotte West, director of women's athletics, said Wednesday that the tenure problem has been resolved. "There will be a four of us switching over to the women's athletic department on a part-time basis. and we have been told that we will retain our tenure," West said.

I'm looking forward to helping several new coaches in the future," West remarked. "Those new coaches will not be awarded tenure."

"I met for over an hour with President Brandt and I told him about our program," West said. "I'm eager to see how supportive he is of our program."

Brandt commented on the Men's Title Nine proposal commenting. "I don't think Title Nine will require all federally funded activities to be funded equally."

While on the SIU campus, Brandt has met with several Saluki athletic teams. "The new president met with the football, basketball and several other squads," athletic director and head football coach Doug Weaver remarked.

When asked if he new president could affect his department Weaver said, "He's the major leader of our campus, he can affect every department in the university."

At this time Brandt is unsure of how much influence he will have dealing with athletics. "The board of trustees are the athletic power in the university, or where the athletic board fits in," Brandt said.

"Even if the new president could make changes in the athletic structure of the university, I probably would leave those decisions to the athletic board."
