**Worker Who Fell From Library Dies In St. Louis Hospital**

Wille Slaughter, the construction worker who fell from the top of the Morris Library addition Wednesday afternoon, died at 9:45 a.m. yesterday in St. Luke's Hospital, St. Louis.

Slaughter, 25 of 404 N. Marion St., Carbondale, is survived by his wife, the former Joyce Kenner, and a son and daughter, aged 3 and 2.

In the 56-foot fall Wednesday, Slaughter suffered multiple fractures of both legs and spine. He fell from the roof of the seventh floor to the protruding roof of the third floor on the north side of Morris Library.

Slaughter, a laborer for the masonry sub-contractor on the project, apparently tripped and fell from the roof when a bricklayer's scaffold tipped, other workers said. He landed on "insulating fill" on the third floor roof.

In addition to his wife and children, Slaughter is survived by his parents, Mr. and Mrs. H.T. Slaughter of Carbondale; five sisters and four brothers.

Slaughter was a member of the Hopewell Baptist Church and had lived in Carbondale for the past six years. Funeral arrangements are incomplete.

Slaughter was the second construction worker to be injured on the Library project. Earlier this month Russel McMurray received a severe sprain of his right ankle when he fell from a ladder. He fell approximately six feet.

Other SIU philosophers to lead the picnic discussions will include E. Claude Coles, a popular speaker on the SIU campus. He is dated up for the second in the series, June 30.

**Sunday Picnics To Feed Minds As Well As Empty Stomachs**

Sunday evening picnics designed to feed the inner man with hot dogs and lemonade, the mind with ideas, will be held at Lake On-the-Campus June 23 starting at 5 p.m.

The Activities Development Center Supervisor, has tagged them "Philosophical Picnics," and has lined up a group of popular faculty members to lead the unstructured discussions.

The first leader will be George Axelle, a professor in Education Administration and Supervision at SIU, formerly chairman of the Department of History and Philosophy at New York University.

Axelle said the audience will pick the topics at the Sunday night picnic. Everyone will be invited to join.

Axelle has been associated with "Plan A" since it was started at SIU. He has also been faculty advisor to the Student Council.

Picnic Dome no. 1 near the boat house has been reserved for these affairs.

Other SIU philosophers to lead the picnic discussions will include E. Claude Coles, a popular speaker on the SIU campus. He is dated up for the second in the series, June 30.

George McClure, assistant professor of Philosophy is the speaker for July 7.

Others who will take over the leadership, dates to be determined later, are Tom Cassidy, Paul Campisi, and Alfred Lit.
British Publisher Sees 'Hovercraft' As Ideal Channel Transportation

"The best thing I know between France and England is the sea," commented Douglas Jerrold, English editor and humorist, in the 19th Century. But times and ideas change. A British newspaper publisher who visited the SIU campus recently expressed ideas differing greatly from Jerrold's statement as he discussed improved means of traversing the channel which separates the two countries.

Major H. R. Pratt Boorman of Maldonate, England, said French and Britons are still discussing plans for a tunnel beneath the channel. The development of "hovercraft" to transport people and vehicles across the 20-mile wide channel may also be a great aid in establishing a better link between the countries, he said.

Speaking of the channel tunnel proposal, Boorman said, "The whole thing is an" 'im' and "but" proposition now... But France and Great Britain seem more willing now than in the past to do something about placing closer ties between the two countries."

Boorman emphasized he is not an authority on the subject of constructing the proposed tunnel, but he said he has watched the progress of the plan with great interest.

The idea of a tunnel under the English Channel was first proposed in the 1890's, Boorman said. The plan was developed further a little later when coal was discovered in Kent and it was found that the coal went beneath the channel.

The official group promoting a tunnel is the Channel Tunnel Company, which has been in existence since 1988.

Begining of this century. This is a large national company with both French and British representatives serving on it, Boorman said.

"At one time the English were keen on the idea of a tunnel and the French were not," he said, "Then at other times France was keen for the idea and Britain was not."

One of the plans for the project was a tunnel in the chalk beneath the sea. A later proposal was for a series of cement cylinders laid on the floor of the sea.

"Many people did not like the latter idea," Boorman said, "Because some ships drag anchors and damage a portion of the tunnel away, trapping passengers inside.

While all this talk was going on, other methods of transportation across the English Channel were being developed.

A first-class ferry system was developed and has also been a change to an air system, with planes crossing the channel every three to four minutes, Boorman said.

Cars, in addition to people, are taken across by the planes.

The present tunnel proposal would be for motor vehicles to be carried on a train under the sea through the tunnel. Cars would be loaded onto the train in the tunnel, Boorman said.

This system was proposed because officials would be able to check the tunnel to see if it can support the weight of the tunnel, Boorman said. There have been models made of the tunnel, in which cars are driven through, and officials are probably nearer than ever to making the channel tunnel an actuality. However, Boorman said, the wonder of "hovercraft" might not replace the tunnel.

The "hovercraft" would be a surface craft which travels on a cushion of air and goes over land and water.

H.R. PRATT BOORMAN

This vehicle was only invented about 4 1/2 years ago, Boorman said. Last year a hovercraft was developed which was capable of transporting 24 people from Liverpool to Northpool, This was a 2 1/2-hour journey by car to 25 minutes by hovercraft, he said.

The next move seems to be hovercraft which would accommodate 150 people and vehicles, he stated.

If such a development is successful, Boorman said, there is the question, "Will a channel tunnel then be necessary?"

Boorman said he favors a tunnel plan over hovercraft. It would be possible to drive cars through the tunnel and if sufficient air space were provided to make it safe from car exhaust fumes, he said.

But he is not so favorable to a tunnel plan if it meant loading cars on a train to travel through the tunnel. Cars would be just as easy, and faster, to transport vehicles across by air, Boorman said.

He predicted earlier this month and participated in raising the British national flag in front of Old Main June 8, in honor of Queen Elizabeth's birthday, Boorman has raised the American flag above the Maldonate, England, City Hall on July 4, 1961 and 1962. Trustee Reappointed

Governor Otto Kerner has reappointed two members of the SIU Board of Trustees to six year terms. They are Kenneth L. Davis, Harrisburg, and Russell R. Fischer, Granite City.

Nemeth Back On Former Job

Dr. Steven B. Nemeth, visiting professor of business administration during the winter and spring terms, will return today to his position as director of dairy and swine education at the College of Agriculture for Hubbard Milling Co., Mankato, Min.

Nemeth received his undergraduate and graduate education in agricultural economics at the University of Minnesota in 1960 and 1963, and was employed by the United States Department of Agriculture before coming to the United States.

He is the author of an extensive article, "Improper Taxation," appearing in the June issue of the Minnesota Agricultural Journal. In it he suggests a method of increasing the profitability of livestock operations at all levels of income and the feeds.

SIU Grad Heads Dairy Research

Richard C. Bernett, former SIU graduate student, has been appointed an assistant professor and director for Moorman Manufacturing, Ltd., a company in England. He has been educated at the University of Minnesota in 1956 and 1957, and is now engaged in research with the Dairy Science Department.

A native of Manfield, Ill., Bernett was graduated from the Dairy Science department of the University of Minnesota in 1954. He is a son of Mr. and Mrs. Ora W. Bernett, Harrisburg.

Scratched Films Given Once Over

The housewife who uses scratch-remover furniture to save it a pair of pins on the Audio-Visual Aid Service.

Reclaiming scratched films is today a professional art. It is a practice that is saving money for the service, according to Donald A. Ingil, director.

The staff of the service is now engaged in examining the thousands of films on record.

"We will pull perhaps a thousand films that need resynchronization," Ingil said, "If isolated, the film has not been penetrated by the scratches. They can be removed and the film will be ready to re-enter service."

Cost of the scratch-remover process is less than a tenth of the price of replacing the films, he said.

Technology Faculty Sends 4 To Meeting

Four faculty members from the School of Technology will be in Philadelphia this week for the Third Annual Conference of the American Society for Engineering Education, which is held there.

Attending are Dean Julian H. Lauchner and Ernest L. Dunn, Jr., Steorer and Herbert A. Crosby of the advisory science department.
LITTLE MAN ON CAMPUS

Camp Fire, Song Fest, 'Dance Planned Tonight

Students on campus this summer with their registrations largely completed and class work mapped out, are offered a "get-acquainted" camp fire and song fest tonight for fun and relaxation.

Miss Elizabeth Mullins, coordinator of Activities Development Center said "Hootanny" will be included and there will be dancing. The affair will be held at the Lake-on-the-Campus beach starting at 8 p.m.

"Hootanny" she defines as a social gathering of people who can make folk-music by guitar, ukulele or the human voice. There will be no charges, Marshmellows will be furnished.

Next noon is the last chance to sign up for the bargain trip to Muni Opera to see "Ondine" Saturday. This is to be the first of an excursion series to take in cultural and performing events in St. Louis.

The round-fare bus ticket and ticket-performance is available for $2.00. It is payable in the Activities Office, at the University Center. Also due at noon today is

Unclaimed Obelisks

Several copies of the 1963 Obelisk are yet to be unclaimed by students who ordered and paid for them, according to members of the Obelisk staff.

The Obelisk office on Harwood Avenue will be open this afternoon and again at 6:30 p.m. daily, they said.

Orders for next year's Obelisk can be handled by the SIU Advertising Club.

American Business System

To Be Explored On WSIU-TV

The American Business System, with emphasis on modern developments, aims at informing and highlighting tonight's programming on WSIU-TV.

The Time for Challenge, scheduled at 7 o'clock, presents "Production and Marketing," a program which illustrates the competition generated by a marketing system which improves products through packaging, service and prices.

Other programming highlights:

5:00 p.m. 
What's New: "Wildlife and Reptiles," shows the migration of Elk; "Space Age" examines the possibility of life on other planets; "Folk Music Travels to Ceylon."

5:30 p.m. 
Milton Berle's "American Memoir" traces 60 years of satire.

6:30 p.m. 
The Big Picture Takes Center Stage

6:30 p.m. 
What's new: Repeat of the 5:00 p.m. program.

7:30 p.m. 
Bald Journey: "5,000 Miles by Snowshoe" follows four men in two 16-foot canoes as they paddle from Denver, Colo., to Old Town, Me.

8:00 p.m. 
The Living You (Explaining on Light) features Dave Garloway and a discussion and experiments with the factors that are the essential nature of life.

6:30 p.m. 
Festival of the Arts: "An Age of Kings-The Sun in Splendor" embraces Henry VI, Part III, Acts 4 and 5, and again the emphasis is on murder and intrigue as the Duke of Warwick and the Duke of Clarence changes places in the bloody Wars of the Roses.

9:44 p.m. 
Sign-off.

reject Kennedy plea for demonstration truce

New York

"We do not intend to call off demonstrations."

This was the reaction of James Farmer, national director of the Congress of Racial Equality (CORE), to President Kennedy's plea for racial peace.

Negro integration leaders in Gadsden, Ala., pledged renewed demonstrations; shot­gun pellets fired from ambush in a Negro section of the troubled city hit a state police car's fender.

In Washington, the Army announced Thursday that about 3,100 members of the federal­ized Alabama National Guard would be released from active duty Sunday and Monday. This will leave about 300 Guards­men still in federal service, about 100 of them near the University of Alabama campus.

The Associated Press re­ported enactment of one of President Kennedy's civil rights proposal was "extremely doubtful." This was the Kennedy request for legis­lation to desegregate pri­vately-owned firms by legal means.

Senate Republican Leader Mike Mansfield of Illi­nois thumbed this provision out of a bipartisan bill he sponsored with Senate Demo­cratic Leader Mike Mansfield of Montana; the bill would carry out the remainder of the President's program, Senator

‘Fiesta’ In McAndrew Stadium Turns Out To Be One
The Supreme Court And Religion

The recent Supreme Court decision does not mean that religion has been stripped of public life, nor could it be. Earlier this year, the Supreme Court held that Pennsylvania and Maryland could prescribe Bible readings and recitations of the Lord's Prayer in public schools. The Supreme Court's 8-1 decision follows from the 2-7 decision of the Regent's prayer case. Last year the court held that New York could require a prayer composed by state officials for school children.

What the court has done in its most recent decision is to protect religion by restricting the activity of the state in that area. What it has not done, despite false intimations, is to prohibit all religious references in public life.

Justice Clark makes a strong case for the proposition that religion has an exalted place in our society; that it is properly based on the church, the home and the individual, and that it has learned from bitter experience to prevent government intrusion into this citadel of faith; and that, consequently the First Amendment stands against an official establishment of religion confines and governs the "potion of neutrality."

Justice Stewart, in soliloquy this year as last, contends that the court cannot seek a simple formula for separation of church and state to "be applied mechanically in every case." Senator Aiken of Vermont, leading the critics in Congress, suggests that it is "illegal to quote the Bible in school or force the Lord's Prayer in school."

These criticisms are too subtle; for of course it has offered no simple, automatic formulas and it has not made the law clearer in Bible and school. Schools and teachers obviously can continue to use the Bible in classroom teaching, and no one has suggested that religious services, if not in required religious services. The Government can continue to employ chaplains in the armed services.

But whatever the state does is done in such a way as to leave the students free to exercise their rights of conscience without compulsion. Once again the court makes it clear that the First Amendment does not simply forbid preferential treatment of one religion over others, but forbids government compulsion in religious affairs. There is no other way to avoid preferential treatment.

What the Supreme Court has done is to demand the understanding of citizens of all persuasions. There is no simple formula for the separation of church and state. But there is a formula, a "rule of thumb," for a general guide to a series of social reforms planned by a group of individuals not great in numbers, but inspired solely by their desire 1) to do good, 2) to save the Hemisphere from violent revolutions and change.

The acceptance of the idea that social change and reform must come slowly is a wise point, but the question is whether the economic development (progress) will then take place, to the Europeans for whom Dr. Westland was speaking, or to the horse.

Essentially the same idea is expressed in another way in a recent issue of "The Rotarian" by Dr. Agustin Navarro Velez, who suggests: "why is it that before promoting all sorts of reforms and changing our attitude toward them, do we not ask us Latin Americans what we think?" He issues a call for the active participation of private industry and banking in speeding development, in raising the level of production, and economic exchange. In this has words that speak of a country, which, for all its proposals, active development on an international scale, of new markets for unexploited natural resources, of new taxes required to support the American presence in the Americas possess tremendous power to be responsible for the critical lack elsewhere.

Indeed as one looks back on our own development and past economic changes, it seems that political reform, and the resultant political change, not even in the Americas, is the critical lack everywhere.

Social Gains In Latin America Must Be Tied To Economics

By Albert W. Bork, Director Latin American Institute

Guayaquil, Ecuador- Nearly everyone who takes an interest in hemisphere affairs asks, "What's the progress for progress, how's it doing?"

One answer which goes a little farther than the usual question was suggested in the morning edition of "El Universo," an important daily located in this South American port.

Many people have feared that the Alliance would fail. That it is, as a matter of fact, has been a very difficult time in getting off the grounds is no secret to anyone. The claims that go to great results have caused the anti-U.S. forces to say of it, "The Alliance is simply foolish."

But the Nation uses the natural play on words for the active participation of Latin Americans, for the Bible in school, for the First Amendment as the advice of the academic community itself.

There is much truth in these observations, even that the Alliance plan, compared to the "me too" mechanical approach, is idle at this late stage to argue that the government is really at war with those who do not accept some other kind automatically, good is it even more, boostous, as a practical matter now account, what those that the Federal Government, with its high defense and other scientific progress, must be freed from the academic world.

What is most notable about Mr. Bundy's letter is something new: its diminution of the mystique of American higher education free of outside political control. Right now Princeton gets over half of its $44 million budget from the Federal Government, what will be, there and elsewhere, a decade hence?

The men-in-Government or out of which so eagerly centralize education have the best intentions; certainly they regard themselves as the universities' best friends. But "the more closely they have become aware of the excessives concentration of power in the Office of Education," the more they regard themselves as the Universities' best friends. But what is the reason for their having lost the battle may also have to say the least, Yet there, definitely must be changes made in the Federal Government's education policy.

Bob Green, SIU's NCAA 120-yard hurdles champion, will headline the Saluki entries in the National AAU championships this weekend in St. Louis.

The meet starts this afternoon and runs through Saturday evening. It is being held in the Public Schools Stadium, Altgeld Field from around the world and across the nation "appropriately for the occasion."

Several world records are expected to fall and many AAU marks will be broken by the finest amateur talent in the country. Athletes will be judging positions on the U.S. track squad which will run against Russia later this summer.

Green, Brian Turner, Bill Cornell and George Woods will be the SIU entries. Jim Stewart will be one triple and three doubles.

Patton Hitting

264 At Winnipeg

Mel Patton, former SIU outfielder, currently is hitting .264 with Winnipeg in the Class A league.

Patton signed with the St. Louis Cardinals baseball organization following his sophomore year at Southern. This is his second year for playing minor league baseball.

He was assigned this year to Atlanta but was reassigned to Winnipeg at his request. He has hit one home run, one triple and three doubles this year.

Students may check out recreation equipment at the boat docks located on the east side of Thompson Lake. Softballs, basketballs, volleyballs, tennis racquets and horseshoes may be checked out by summer session students.

Bill Cornell, Jim Dupree

Bill Cornell, Jim Dupree Will Race Against Each Other At St. Louis

There will be a strange situation in the half-mile run at the National AAU championships this weekend in St. Louis.

Bill Cornell and Jim Dupree, former SIU teammates, will be running against each other in the race and will be trying to beat the other.

It is hard to pick the winner. Cornell has been hot, finishing second last year in the AAU championships behind Jerry Siebert, who since has retired. His second place time last year was 1:45.6 but he hasn't come near matching that this year. He was ruled ineligible for competition last spring by an activities committee due to several meets. The ineligible does not affect his amateur status and thus he is entitled to compete against collegiates.

Weight Lifting Added

To Summer Intramurals

Weight lifting has been added to SIU's summer intramural program because of popular demand.

Glen Martin, director of SIU's intramurals, says the acceptor will be open to nine p.m. on Monday, Wednesday and Friday evenings.
Interest Warms In New Freeze Food

Freeze-drying—used successfully for preserving blood plasma, vaccines and antibiotics for more than 20 years—is now on the threshold of success for food stuffs. A Multi-billion dollar market is predicted as a possibility by 1970.

Everything from steaks to scrambled eggs, from mushrooms to coffee is being freeze-dried and numerous items are currently on the market. Freeze-dried shrimp are popular.

A SIU graduate student in home economics, Mrs. Doris Osborn of Carthage, has made an intensive study of freeze-drying—its history, current status and prospects in a special problems course taught by Paul Fenton, distinguished visiting professor in the Food and Nutrition Department of the School of Home Economics.

"Freeze-dried" foods are entirely different from frozen foods, Mrs. Osborn explains. The term refers to the method of dehydration. Freeze-drying involves first quick-freezing, then drying in a high vacuum to evaporate the minute ice crystals formed when the water content is frozen. Dehydration from the solid state leaves a porous, sponge-like structure.

Freeze-dried foods lose 50 to 70 percent of their original weight, thus reducing transportation costs, Mrs. Osborn reported. They can be stored without refrigeration; nutritive values are less affected by other methods of drying; they have a "freshly prepared" taste, and preparation for serving is simple.

Mrs. Osborn, who holds the bachelor’s degree in home economics from Stout State College and is working toward the master's degree at SIU, found some disadvantages as well, chief of which at present is the high processing cost.

However, she said that "freeze-drying eliminates shrinkage which occurs in ordinary drying, eliminates migration of dissolved materials to the surface, minimizes denaturation of proteins, prevents case hardening, reconstitutes more easily, inhibits chemical reactions, and minimizes loss of volatile constituents."

Scores of foods have been tested for freeze-drying by dozens of food processors in this country and in Europe, she said, and some are on the market. Seafoods, meats, fruits, fruit juices, a wide variety of vegetables, dairy products and even scrambled eggs, gelatin, coffee, tea and beef extract have been freeze-dried.

The excessive cost of processing is the biggest drawback to the widespread acceptance of freeze-drying, Mrs. Osborn found. Costs are high, and complex hand-crafted equipment is necessary at present.

Packaging presents a problem both in providing a barrier against oxygen and moisture-pickup and in providing protection against contamination and rough handling.

**TOP SENIOR** — Glenn R. Huisinga (left), received the Illinois Agricultural Association trophy as the last senior in the School of Agriculture, from Earl Eubanks, I.A.A. District Six secretary.

**Glenn R. Huisinga Named Outstanding Ag Senior**

Glenn R. Huisinga, agricultural economics student and an outstanding senior award at the School’s annual senior reception and awards program.

Presenting the Illinois Agricultural Association trophy to Huisinga was Earl Eubanks, West Frankfort, I.A.A district VI secretary of organization. Huisinga is the son of Mr. and Mrs. Ralph Huisinga, 1265 River Drive, Calumet City. While at SIU Huisinga has held an Illinois State Scholarship and an SIU scholarship. He has been a member of the SIU chapter of Alpha Zeta, scholastic honor fraternity in agriculture, a member of the Little Egypt Agriculture Cooperative, and president of the Agricultural Economics Club.

He has also been a member of the debate team and is a national forensics honorary.

**Rural Electric Linemen Receive Special Training**

The first of three week-long Hot Line Maintenance Training Schools for personnel from rural electric cooperatives throughout Illinois will begin at VTl Monday with 15 men from six regional electric cooperatives enrolled for the first period.

The annual series of short courses, tailored especially for power line maintenance men, emphasizes the use of special tools and safe practices in installing and maintaining electric power lines.

Special outdoor laboratory facilities, including electric line poles of various heights and high-voltage lines, are located at the VTl campus for the instructional program. The SIU Division of Technical and Adult Education and the Illinois State Board of Vocational Education cooperate in providing the short course for the cooperative personnel.

Chanute Air Force Base linemen have joined in the program this year.

Other groups of linemen are scheduled to attend sessions during the weeks of July 7 and July 14.

Instructors from the State Board of Vocational Education will be C.M. Scott of Roseville and Harry N. Simpson of Taylorville.

The Saluki Flying Club will meet at 7:30 p.m. Monday in the seminar room of the Agriculture Building.

Movies will be shown and refreshments served.

**Forest Research Shown To Industry**

A "Opportunities for Hardwoods" meeting to acquaint industry representatives with research efforts in forest products utilization will be held here June 25-26.

Sponsors of the meeting are SIU and the Central States Forest Experiment Station, U.S. Forest Service, Columbus, Ohio.

Discussion will stress wood products utilization and marketing research, hardwood resources in the area, and SIU and Forest Service programs. Also planned are optional individual discussions of programs and projects with SIU and Forest Service personnel and an optional tour of the Kaskaskia Experimental Forest in Hardin County.
