Editor's Note: This is the first in a series of articles examining the possibility of oil drilling on the SIU campus.

By Ron Becker
Daily Egyptian Staff Writer
A fleet of trucks, new gravel roads, cement mixers and standard pads will be part of the scene if the APCO Petroleum Corp. begins drilling for oil on SIU property.

An independent contractor will move a 40-foot truck with a rotary drilling rig, which stands 80 feet tall, onto the one-quarter to three-quarter acre well site. Fuel trucks will move down six-inch thick gravel roads, followed by an armada of service trucks, including supply-laden flatbed trucks, trucks loaded with electronic gear and water trucks.

Two or three earth pits, 20 feet to 30 feet long, six feet deep and five feet wide, with a total capacity of 8,000 gallons, will be dug near the well to hold drilling muds. The muds are used as lubricants for the drill bits that will grind into the earth.

The bits, equipped with three rotating gears, are used to chew the rock above the oil.

The drilling rig will lower pipe, to which the bit is attached, into the ground. By the time the level where oil is expected to be is reached, almost 2,500 feet of pipe will have been sunk into a 13-inch-wide hole.

The drilling muds, a mixture of water and barite or bentonite, flow through the core of the pipe. The mud lubricates the bit and, because of its weight and density, serves as a plug to stop premature release of oil and gas from the hole.

After the depth of the hole has reached 200 to 300 feet, the drill pipe and bit are removed. Surface casing, made of pipe, is then placed around the sides of the hole and covered with cement. This is done to protect underground water in the drilling area from contamination.

A second hole, about seven inches wide, is then drilled the remaining distance to the oil. A second pipe lining forces the drilling muds out of the hole into a pipe leading to the sludge pits. The cement is left on the outside of the casing and is allowed to harden up to 24 hours, depending on the procedure of the drilling company.

A cement cap which has been left at the bottom of the casing is perforated by an explosive charge placed in the well by the company that logs all records of the (Continued on Page 3)

Cites economic conditions

Police chief expects rise in crimes

By Bruce Hackett

Carbondale Chief of Police George Kennedy said he expects the crime rate to rise in the city because of worsening economic conditions.

"However, the crime rate in Carbondale is rising less rapidly than the national average," Kennedy said.

Citing figures from a yearly comparison of crimes committed within the city limits, Kennedy said the figures do not reflect a true reading for all of Carbondale because of the existence of two separate police departments inside the city.

"Carbondale has a unique system in that both the city and the University have police departments," he said. Kennedy pointed out that the University and the city are in the process of working out an agreement whereby all crime statistics for the city will be funnelled into the Carbondale police department.

"This system should be implemented within 30 days," Kennedy said.

Tom McNamar, administrative assistant to Chief Kennedy, said Carbondale breaks down crimes in Carbondale into the following categories.

Robbery is when a person takes property from a person by force or the threat of force. Burglary is when a person without authority enters or remains within a building, trailer, automobile, etc., with intent to commit therein a felony or theft. Theft is when a person obtains or exerts unauthorized control over the property of the owner or obtains the property of the owner. Rape has occurred when a male person over the age of 14 has sexual intercourse with a female other than his wife, by force and against her will.

Kennedy said burglaries of residences in Carbondale are considerably higher than the national average because of the large number of multi-person dwelling units. He said in Oc- (continued on page 3)

Grad assistants to get pay raise

By Laura Coleman
Daily Egyptian Staff Writer
SIU graduate assistants will receive a monthly pay increase of five percent next year, Vice President for Academic Affairs Keith Leasure said Monday.

Leasure said he has informed all deans of the increase. Guidelines for faculty raises, however, still remain unsettled. President Warren W. Brandt said he is "getting close" to a decision on how to distribute faculty raises on the basis of merit and across-the-board percentages.

Graduate assistants usually are not considered for any type of cost-of-living increase. Leasure said, adding that it is in the "biggest percentage rate increase of any group on campus."

Graduate Student Council President Kathy Jones said she was not expecting the raise and is "pleasantly surprised" by it.

Leasure also agreed to offer employment to 160 "special doctoral assistants" and graduate students holding fellowships for the month-long period between spring and summer semesters.

The offer, which will be made this year only, covers graduate assistants who have been offered summer appointments.

Leasure said $60,000 taken from "leftover funds" will pay for the employment. The money is left over from staff who have been terminated or have resigned.

"We could have used it to bring in lecturers or for other research assistants, but we decided this was the best use for that particular money," Leasure said.

Gus Bode

Gus says with a TA's pay raise you can buy a gallon of gas.
The Action Party candidates for student president and vice president say that after a year of what they call false promises, stagnation and an increase in student fees, they will run for president on the Action Party ticket. Sandy Fohrman, a sophomore in art education will run for vice president.

Don Zwicker, a junior in agricultural economics, said that he would run for Student Government. If Zwicker, 20, wins, the student president should have a voice in the Board of Trustees, he added.

Zwicker added that if he were elected, he would run for reorganization of the student parking garage on campus. He said that he would run for vice president. Present Student Government administration has been irresponsible and apparently unaware of the needs and desires of the students," Zwicker said. "Seasame Street has more class than the present Student Government." Zwicker said that there should be a reorganization of parking spaces for students after the completion of the new parking garage east of Fauner Hall.

He also said that he is in favor of the National Organization for Reform of Marijuana Laws' (NORML) attempt to decriminalize marijuana in Carbon County.

"We will expend all efforts to work in conjunction with the SIU NORML efforts to decriminalize marijuana," Zwicker said.

Sandy Fohrman

Don Zwicker

He said the student president should play a major role in the University. As an example, Zwicker said he would work directly with Dean Justice, Arena manager, to bring better programming to the Arena.

"In taking matters of importance right to the top myself," Zwicker said, "I would be able so that they would get immediate attention."

Fohrman said she will work for the equalization of student fees for both men and women on campus, whether or not the Equal Rights Amendment passes this year in the legislature.

Both candidates say they feel there should be an adjustment in the allocation of student fees, rather than any increases. They both favor the continuation of the textbook rental service for General Studies courses and feel that research pertaining to alcohol on campus should be continued.

The present Student Government which was founded in 1963, is the oldest active student political party on campus.

In an effort to avoid the problem of the Student Government's current羸blem ofPX52, John Gunther, the President of the board, said that he had been approached by several American diplomats, "Everybody is trying to be casual but they are paying dearly for it."

Sources said Ambassador John Gunther Dean asked Catholic Relief Services, World Vision and CARE to send nonessential personnel to Bangladesh or Saigon until after the U.S. Congress votes on President Ford's request for additional military aid for Cambodia. Some diplomats fear the request will be rejected andJacobs to take in answering the charges.

Diplomats preparing to leave Cambodia

PHNOM PEND, Cambodia (AP) - The U.S. Embassy, apparently anticipating Phnom Penh's reported willingness to consider providing money for Communist-led insurgents, published documents Monday and told refugee agencies to "pare down to essential personnel," American sources reported.

At the same time, field reports said insurgent forces captured the airdrop at Neak Luong, the government's last, after the Mekong River, cut off a government force that had captured Toul Leap, six miles from Phnom Penh airport, and rocketed the airport, killing five children and wounding two.

South Viet troops abandon central highlands

SLAGON, South Vietnam (AP) - In its most striking setback of the war, South Vietnam's government announced that it has abandoned the central highlands provinces of Kon Tum, Pleiku and Darlac to the North Vietnamese because the region cannot be held, officials said.

"The decision was made to cut losses now because the North Vietnamese were putting so many troops in the region and there was no way to supply the South Vietnamese troops," a government official said.

"The logistics are in favor of the North Vietnamese whose supply lines from Laos and Cambodia are much shorter," the official said South Vietnamese troops were fighting to hold the Khmer Rouge insurgents.

South Viet troops abandon central highlands

Rail closings would cause strain on roads

Chief Justice Robert C. Underwood questioned Cramer repeatedly. "Isn't the real point at issue the fact that the department DLGA hasn't made any effort to equalize assessments," he asked.

Cramer replied that part of the blame should go to local assessment officials. "If they had done their job before, the first place, the DLGA wouldn't be needed," Cramer said.

"But it is precisely because they don't that DLGA was given that responsibility," Zwicker said. "Isn't that right?" Justice Underwood asked.

Cramer told the court it was unfair for taxpayers in other counties to be affected adversely by a Lake County case in which they had no opportunity to participate.

The court took the case under advisement, and a ruling is not expected for a week or more.

Rail closings would cause strain on roads

Cramer said the DLGA to do this job resulted in widely varying assessments, a cause of unfair taxation and distortion of the tax base.

Asst. Atty. Gen. Herbert Cramer, representing the DLGA, argued that the equalization effort should be made by the county, saying that any state rule would be to force huge property tax increases on residents of many Illinois counties.

Model U.N. guest speaks on population

**By Tim Hastings**
Daily Egyptian Staff Writer

Although overpopulation has been recognized as a problem since World War II, efforts have not been well-funded, Julia Henderson, secretary general of the Planned Parenthood Federation, said.

Starvation and illiteracy caused by overpopulation in less-developed parts of India may be nearly in surmountable, she said. However, she said that there are steps that can be made in the short term to solve population problems in Africa and South Africa still exists by putting every penny possible into economic development.

Henderson presented her views Friday night at the 17th Annual Model United Nations in Student Center Ballroom D. Her address was co sponsored by the University Convocation series.

A high birth rate combined with a lower mortality rate has accelerated the population problem since the end of World War II, Henderson said. People are also unequally distributed in relation to resources. The worst population problems are in the underdeveloped countries, she said.

Another problem of world population has been convincing people that a problem exists, Henderson said. The United Nations World Conference on Population held in Bucharest in April 1974 was the first United Nations conference of governments on the subject.

Similar United Nations conferences held in 1964 and 1966 were primarily for scientific reasons. Henderson said that if the conference in Bucharest last August caused a great deal of political awareness of the population problem, it showed a promise of concern among nations. The next time might be issues of population planning, she said.

In Bucharest, the delegates agreed on a world integration of population programs and technical aid and determined what would be acceptable national and international population levels.

The delegates upheld the right of individual nations to determine their policies and said they wish to accept from the United Nations. Finally, delegates adopted the United Nations Conference on the Population question.

Political concerns delayed specific discussion of the first five days of the population conference, Henderson said. The western nations were accused of isolating the population problem from the interrelated social and economic difficulties.

Henderson said that the impression to the rest of the world that it wanted to cut population before it could be solved, without giving technical aid, Henderson said.

Henderson said that the Chinese and Russian delegations argued that if the western nations would concentrate on developmental aid, the population problem could be solved, she said.

Henderson said that a U.N. resolution was reluctant for many years to take action in favour of population planning. The executive delegation introduced the first population resolution in 1962, many of the countries said.

In 1964, the U.N. made a world survey to determine what assistance for population problems. Over half of the nations questioned said they had a serious population problem.

In 1966, the U.N. passed the first resolution giving global population planning. Since then, the population planning fund has been the fastest growing special fund at the U.N., Henderson said.

**Sullivan slams Chamber official’s statement**

By Jon Kartman
Daily Egyptian Staff Writer

Student President Dennis Sullivan Saturday morning criticized Carbondale Chamber of Commerce executive board member Jack Hanley for comments he made at the March 11 Chamber of Commerce meeting.

At that meeting, the chamber voted to oppose a proposed poll of community leaders to obtain an accurate opposition to a proposed poll of community leaders to obtain an accurate opposition to a proposed poll of community leaders. Hanley said that the chamber favored opposing a proposed poll of community leaders.

The Southern Illinoisan reported that before the vote, Hanley told the chamber that the issue would create a heavy student voter turnout. By voting against a mayor and council members in the April 15 elections, students would be exerting their influence for years, Hanley said, even though they would be gone in six months.

It is unfortunate that Hanley links student voting to decriminalization of marijuana, Sullivan said at the press conference.

Bruce Talbot, regional director of the National Organization for the Reform of Marijuana Laws (SIU), was upset by the remarks and he has asked Hanley to retract.

Talbot, who is not an SIU student, said he had not been contacted Hanley to discuss the remarks Hanley had made about the SIU students.

The chances are that Hanley represents Carbondale merchants who take students money but don’t want to support students.

“Do what you want to do,” Talbot asked. “Throw rocks. We want to see everybody, townspersons, and students register to vote.”

Sullivan asked, “Is the Carbondale Chamber of Commerce afraid they will be defeated by open elections to the students?” We want to show people, young and old, that you can have viable open elections in the political field.

Hanley, contacted by telephone Monday, said his remark was made as a statement at the meeting and was “blown out of proportion.”

He said the marijuana item wasn’t on the agenda and that his statement was in response to the reason the chamber voted against it because they felt it was contrary to state law.

Hanley said when an issue is put on a referendum, “It’s going to be a very big job to convince people that a tax will be voted against.”

If the chamber should take an issue to the people, he said, “I think it’s great that students vote in national and state elections, but when they do that it’s the wrong thing. We are afraid that if the students affect them once they’re gone, the citizens are left with the results.”

Talbott presented a petition signed by 1,800 students to the Carbondale City Council March 19, asking that the issue of decriminalization of marijuana be placed to the people.

The petition proposes lowering penalties for possession of 30 or less grams of marijuana to a $25 fine. Under state law, possession of 10 to 30 grams of marijuana is a Class B misdemeanor.

Talbott said he is on the agenda for the next Carbondale Chamber of Commerce meeting, at which time he said he will discuss with the chamber the decriminalization of marijuana.

**The weather**

By Julia Henderson
Daily Egyptian Staff Writer

**The weather**

Tuesday: variable cloudiness and warmer, chance of showers, high in the lower 60s. 80% chance of clouds, showers likely, low in the lower or mid dle 40s.

Wednesday: partly sunny, high in the lower 60s.
Agents of the Metropolitan Enforcement Group (MEG), accompanied by a small army of officers from other local and state enforcement agencies, recently entered the campus and local community to effect the arrest of approximately twenty persons on drug-related charges. These arrests are apparently the culmination of several investigations which had been simultaneously pursued by MEG and local police:

Law enforcement agents are rather like fishermen who catch fish that are usually eager to see publication of detailed reports in cases in which they capture large quantities of contraband. The manner in which these arrests were reported and the size of the bail amounts assessed seem to indicate that this yield yielded a relatively small quantity of illicit drugs.

One of the alleged offenders was charged with the delivery of five grams of hashish on the basis of an arrest warrant issued for an offense which occurred last October. This indicates that a great deal of costly enforcement effort was utilized to apprehend a person on a charge which constitutes only a Class B misdemeanor under Chapter 56.5 of the 1973 Illinois Revised Statutes.

Cost to the taxpayer for investigation and prosecution of crimes of this nature is enormous. Initially there is the cost of salaries and operating expenses for investigating agents and then in the post-arrest stage there is the cost of prosecution, which includes salaries for judges, prosecutors and clerks. This latter can add up to a sizable amount when one considers that these cases are often not settled until four or five court appearances have occurred and often as much time as a year has elapsed.

It must be contended that the charges brought against these people are valid or that their alleged activities were not illegal. However, it would seem that if investigations of this scope are to be carried out they would be better directed toward the apprehension of a more heinous class of criminals than that class concerned with possession or delivery of minor amounts of marijuana or controlled substances.

Carbondale, in the past few months, has been a good deal a violent crime and yet there have been few reports of arrests. Local police departments should consider a reevaluation of their priorities when murders go unreported and yet massive efforts are directed toward the capture of minor drug offenders.

Short Shots

Now that we have halted the theft of books from Main Library, all we have to do is catch the NEHDE that cut the pages out.

Mike Chylewski

Republicans shouldn't be so surprised at Chicago Mayor Richard Daley's display of raw power and brute force. Jackasse historically have had these qualities.

Nancy Davies

It looks like the energy problems haven't affected the way the Daley machine runs.

Geoff Skinner

Freezing out HEW won't end discrimination

In December, 1972 a new decentralized Affirmative Action Council was formed under each vice-president. A five-member academic board composed of two female faculty, two black faculty and a white administrator was created to advise the vice-presidents; it was assigned the task of helping draft a response to the HEW's findings of discrimination after an investigation in the spring of 1973.

The board was also asked to work out a draft for an academic Affirmative Action plan and help set up an equity model for pay scales. To do this it needed to know how many faculty were in each department and how much they were getting in order to compare the salaries of white males to those of minorities with the average salaries of white males.

The administration showed complete lack of cooperation. The board repeatedly asked for the data, but never got it. They worked until the beginning of fall quarter, 1973 and submitted skeletal recommendations with blanks for the data they could not go.

At this time it found that other persons were actually writing the report. All the members of the board except one felt they had no choice but to resign.

An academic Affirmative Action Board was appointed in November 1973 under the direction of Vice President for Academic Affairs and Provost J. Keith Leasure.

This board wrote the most recently rejected Affirmative Action Plan. Charles Williams, chair of the Higher Education Office of Civil Rights, said SIU's plan failed to meet two of the three criteria set by HEW.

HEW asks institutions to do a utilization analysis, set goals for ending discrimination, develop and reaffirm policy, be responsible for implementation of goals and define specific problems.

Duffy said SIU's plan was weak in identifying problems, but it was particularly weak in utilization analyses, which compare the percent of minorities and females seeking employment in the work force to the percent the institution employs.

"We felt SIU's plan was so weak in this area, we didn't even evaluate the goals," Duffy said.

When the Affirmative Action Office was established at SIU in 1971, women constituted 18 percent of the academic staff. At that time there were about 110 more teachers on campus. The current figures show that the number of women on the academic staff is 18 percent. Twenty-two per cent of the 196 terminated faculty were women, so the actual number of female teaching staff has decreased more than the per cent figure would lead us to believe.

The 18 percent includes library staff, college advisors, researchers and research assistants, full-time teaching faculty. The American Association of University Professors annual survey of academic salaries shows that there are 764 full time male professors, associate professors, assistant professors and instructors. There are 140 female professors and a full time teaching staff which comprise less than 16 percent of the teaching staff.

The past four years of SIU's Affirmative Action have been disappointing. Perhaps with a new president and numerous changes in the administration we can start to slowly chip away at the iceberg of discrimination.
On a clear day, you can see for yards

By Arthur Hoppé

"Enjoying our regular Sunday drive in the country, honey?"

"I guess so, Daddy. Will we be there long?"

"No, long, honey. I think they're beginning to move up ahead. Meanwhile, let's enjoy the view. Now on our right over there about a mile, just beyond those oil derricks, is beautiful snow-capped Mount Colossus."

"I can't see it, Daddy."

"Well, you could on a clear day, honey."

"What's a clear day, Daddy?"

"Hey! See, there, we're beginning to move. Good Ford! We're up to five miles an hour. How about that?"

"Why do you always say, 'Good Ford.' Daddy?"

"Why, honey, he was just about the most popular President this country ever had. He was the one who preserved our inalienable right to go for Sunday drives in the country."

+++ 

"I think we studied about that, Daddy. Wasn't that when there was an energy crisis or a recession or something?"

"Both, honey. The automobile factories were closing down and things were in a mess—all because those sneaky Arabs raised the price of oil to $11 a barrel. But Mr. Ford sure showed them!"

"How, Daddy?"

"He raised the price to $14 a barrel, honey."

"Why, Daddy?"

"So we wouldn't use as much gasoline, honey. Then, to help the poor auto factories, he decided to give us tax rebates—that's money—we'd go out and buy new cars. But Congress haggled. They said some unaptriotic folks wouldn't buy new cars. That's when he came up with an even better idea—The Good Ford Plan."

"What was that, Daddy?"

"You remember, honey. Instead of giving everybody money to buy new cars—which maybe some selfish folks wouldn't do—he simply gave each and every American family a brand new car. More than a hundred million of them."

"But that means we'd use more gas, Daddy?"

"Well, it was the same whether we bought them or gave them to us. And it sure was popular. Every good American loves a brand new car more than anything. And the factories were humming again and—"

"But where did Mr. Ford think he'd get all the gasoline for all those brand new cars, Daddy?"

"Why, he wasn't stupid, honey. He had lots of ways in The Good Ford Plan. Now you see that hillside over there? No. I guess you can't. But on a clear day you'd see it was one of the biggest open-pit coal mines around."

"Aren't they ugly, Daddy?"

"Well, maybe, honey. But we needed more coal to save on oil. It's a little smokier, I guess, but you can't have everything. And then Mr. Ford cut back on anti-pollution devices to save gas. And he encouraged off-shore oil drilling. And, anyway, in the end, everybody still got to go for Sunday drives on our fine highways. Everybody who can fit, that is. Aren't you enjoying it, honey?"

+++ 

"I guess so, Daddy. But some day I'd kind of like to see that snow-capped Mount Colossus. And maybe some day walk on the beach without wearing my galoshes. And. . ." 

"Hush, now, honey. Like I say, you can't have everything. You just relax and enjoy your Sunday drive. Hey! I think we're going to start moving again."

---

We're all dogs in this kennel

To the Daily Egyptian:

This is directed to Gary Deisohn regarding his column of March 12:

If you don't know what you are reporting about, as you seemingly admitted in your editorial column, then "what the hell" are you doing writing about it?

Your commentary about Gov. Dan Walker's airport press conference was among the most inane pieces I have ever read from the Daily Egyptian editorial staff. And I still don't see what the slur on the professional capability of WICU reporter Terry Caldecoll had to do with the qualifications of Walker's proposed state budget. Did YOU, perhaps, ask questions with the bite of a virile, fully toothed dog?

The whole article appeared to me to be criticism for sake of criticism. A "watchdog" that barks for the sake of barking gets to be annoying and does nothing helpful.

I hope that all people in the media can be more positive oriented in their thinking and criticisms of the world.

Greg Mysko
Senior
Radio-Television

Lousy coverage

To the Daily Egyptian:

We want to hereby express out utmost disappointment for the poor coverage the Daily Egyptian granted the activities of the 1975 International Festival. Beyond reasonable doubt, the Daily Egyptian stubbornly ignored the highlights of this unique set of events aimed at educating the isolated enclave known as Southern Illinois in matters concerning life, culture, struggles, and hopes of the world outside the United States.

Our disappointment becomes anger when we see that any fraternity with the "tweens" gets more publicity or when self-denominated "Christians" get involved in what apparently is the crusade of the 70's—the war against massage parlors.

Ricardo Caballero
Chairman
International Student Council

Letters to the Daily Egyptian

The Daily Egyptian welcomes letters from all members of the University community. Letters are refereed to ensure that the views expressed are those of the author. When appropriate, the editor reserves the right to combine letters to permit a larger variety of opinions, to correct minor typographical and grammatical errors, and to edit lettent material that is considered libelous or in bad taste. Letters should be concise, double spaced, and accompanied by the writer's name, address, and signature on the利润率 of the work is expected.
Monroe film festival set

A three-day Marilyn Monroe film festival, free and sponsored by the Student Government Activities Council Films Committee, will take place this week in the Student Center Auditorium.

The festival will begin Tuesday with showings of "How to Marry a Millionaire." It is scheduled to run from 8 to 10 p.m. in the center's activity rooms.

Cobham lives up to billing but band detracts from show

By Deborah Slager
Daily Egyptian Staff Writer

Although Billy Cobham displayed the style in his Friday night concert at the SIU Auditorium, that sometimes makes fans refer to him as the Jimi Hendrix of drums, the rest of the band just couldn't keep up with him.

Cobham's playing lived up to the expectations generated by his work with Miles Davis on Black, Jack Johnson and Miles Live-Evil, and also to his prior recordings with John McLaughlin's Mahavishnu Orchestra.

But the personnel currently traveling with him, most of who are on the Crosswinds and Total Eclipse albums, showed little evidence of the tight sound and interplay with Cobham that makes those albums a constant hit with Alex Blake on bass and Randy Brecker on trumpet, timing was slow and the band's playing was sloppy.

They turned five and 10 minute suites such as Phantasm, Pinafore and Hechter, into 30 and 30 minute pieces. In live concerts, musicians will often start to jam together which makes for extended versions of their work, but this wasn't the effect with Cobham's band. Stret亚马ng the songs as long as they did made the available material seem thinner and more redundant than it actually is.

Cobham's compositions such as Shoshana, Sea of Tranquility and Hechter are compositionally innovative and offer good material with which a horn or piano player to work. Glenn Ferris on trombone and Milcho Leviev on electric piano plodded through most of the material as if it were dull and unexciting.

This left the burden of generating energy and carrying the excitement of the original compositions up to Cobham. It's a monumental task for any drummer to beat the weight of a band, and even though Cobham is one of the best drummers around, the burden was even more heavy for him to overcome.

One of the nicer surprises of the concert was the band that plays Cobham back-up. After opening the show, the musicians played for about an hour and a half. During the intermission, one of the major topics of conversation was the band's identity.

It turns out that it is the SIU Jazz Quintet, which started playing together only at the end of last semester, according to Alan Oldfield, director of the Jazz Ensemble.

Although they are all good musicians, Ty Voss on drums and Gus Pappell on the keyboard are exceptional. In a set featuring songs like Penny Arcade, Last Tango in Paris and Body Talk, the rapport between drummer and pianist strengthened the group's already strong sound.

Student Credit Union to poll student workers

The Student Credit Union (SCU) will distribute a questionnaire among student workers to find out if they would be interested in a payroll deduction savings plan.

Payroll deduction would be a convenient way for SCU members who are student workers to build up their savings. The questionnaire would probably be directed at those who don't belong to SCU, or the services the organization can provide.

The SCU received permission to distribute the questionnaire from Robert Brewer, assistant bursar.

Tom Langer, treasurer of the SCU, said establishment of a payroll deduction plan would be a good selling point for the promotion of the credit union. He said he also feels that it would promote good will between the students and administration at SCU.

The following programs are scheduled Tuesday on WSIU-TV, Channel 1:

6:30 p.m. Invisible Gardens: p.m. — Seaside Street; 5 p.m. — The Great West: 3:30 p.m. — Master Rogers Neighborhood; 6 p.m. — Zoot Sists; 7 p.m. — Song Talk; 7 p.m. — America; 7:30 p.m. — The Ascent of Man: 8:30 p.m. — Woman; 9 p.m. — Interface; 9:30 p.m. — Behind the Lines; 10 p.m. — The Silver Screen — "Pursued" (1947) western.

The following programs are scheduled Tuesday on WSIU-FM (91.3):

6 a.m. — Today's the Day: 8 a.m. — Take a Music Break: 12:30 p.m. — WSIU Expanded Report: p.m. — Afternoon Concert: 4 p.m. — All Things Considered; 5:30 p.m. — Music in the Air; 6:30 p.m. — WSIU Expanded Report; 7 p.m. — Visions in the Wind; 8 p.m. — The Vocal Scene; 9 p.m. — The Podium; 10:30 p.m. — Expanded Report.

TUESDAY

MONDAY:

Leatherwork: 5:45 p.m. Home Ec.: 2:30 from April 7 till May 5

TUESDAY:

Crocheting: 7:45 p.m. Home Ec.: 308, till April 15

Jewish Dancing: 7:30-8:30 p.m. Ballroom A or C, Student Center till April 22

WEDNESDAY:

Harmonica: 7:45 p.m. Big Muddy Room, Student Center till April 22

Bridge: 8-10 p.m. Activity Room C, Student Center, till March 15

Christianity 101: 8 p.m. Student Center River Room till April 22

Weaving, and Off-Loom Techniques: 6:30-8:00 p.m. Pulliam till April 21

History of Democratic Socialism: 7:30-9:30 p.m. Inquobs Room, Student Center till April 21

THURSDAY:

Writing Poetry: 7:30-8:30 p.m. Pulliam 211 till April 34

Begining Embroidery: 7:30-8:30 p.m. Pulliam 208 from April 3 till May 1

SATURDAY:

Guitar: 9:15 a.m. beginning Students, 10-11 a.m. Advanced Students, Pulliam 229 till May 10

SUNDAY:

Peacemaking as a lifestyle in the '70's: 10:30-noon, First Presbyterian Church, 310 S. University

Square Dance: 2:5 p.m. Ballroom C, Student Center, April 6, 27, May 4

New van operation speeds repair work

Doors screws and lost contact levers should be on the decline around campus with the initiation of the Physical Plant's radio dispatch service-van operation this spring.

The operation, which should be completely in effect by mid-April, provides three service vans to cover minor, one-man maintenance in the areas of carpentry, electricity and plumbing.

A.W. Blais, physical plant director, said Monday the vans will respond to requests for repair of non-union appliances, faulty plumbing, loose latches and sinking contact levers. He said the vans will be available.

Summer jobs are available

Hundreds of summer jobs are available in store and department leaders who possess leadership ability, competency in at least one craft and who enjoy working with young people, according to James F. Moore, coordinator of summer work program at the Office of Student Work and Financial Assistance.

Summer employment is available in camps and resorts in New England, the Carolinas, New York, Pennsylvania, Wisconsin and Illinois. The demand is for counselors, kitchen help and leaders for craft, sports and water safety activities. Nurses are also especially needed.

Most camps provide room and board, while many of the resorts offer housing if one stays until the season is over.

Some camps specialize in a selective population. The Rimland School for Autistic Children of Evanston, Ill., is accepting applications for full- and part-time male graduate or undergraduate teacher-counselors or teachers aides.

Audition set to pick cast for Lithuanian play

Open auditions for "Five Posts in the Market Place" will be held at 7 p.m. Wednesday in the University Theater of the Communications Building.

"Five Posts in the Market Place" is a Lithuanian play translated into English by the Baltic Theater Project at SIU. Production dates will be May 9, 10 and 11. Assistant Professor of Theater Alfredo Strunz is director of the show, plans to tour the production in Chicago and possibly to Kent State University in Ohio.

Players slate children's play

"Three Rabbits White Seek Spring Bright," the Southern Players' final children's show of the SIU theater season, will be presented Wednesday through Saturday in the University Theater.

Four cast times are 1:30 p.m. on Wednesday and Thursday, 3:30 p.m. and 8 p.m. Saturday.

"Three Rabbits White Seek Spring Bright" is a fantasy about the seasons written for the spring of the winter. Admission price is $1.75 cents. A group rate is available of 50 cents per person for groups of ten or more.

Reading hour set for Calipare Stage

The Oral Interpretation Club of the speech department will hold a reading hour at 7 p.m. Tuesday at the Calipare Stage.

Fiction and poetry by such authors as Ambrose Pierce, Wallace Stegner, E.B. White, Richard Conn and Thomas Menhan will be read. Performers will be selected by Evanston, Illinois, students who possess a voice in the audience.

Details on the evening is free. Everyone is invited.

Model U.N. proposes energy crisis solution

By Tim Hastings

Daily Egyptian Staff Writer

The Model United Nations put into motion a plan for solving the world energy crisis during their formal session Saturday morning.

The mock assembly passed a resolution submitted by the Arab bloc nations to set up a committee to create a working plan for solving the energy crisis.

The topic of the three-day model General Assembly was the world food and population problem. The Arab nations submitted their resolution on the belief that the problems of food and energy are interrelated.

The mock session of the U.N. was held Thursday through Saturday in Student Center, and was sponsored by the Student Government Association's Lectures Committee.

Thomas Doby, president of the mock assembly, chaired the four plenary sessions.

The Arab resolution originally called for Israel to withdraw from all Arab territory, including Jerusalem, which it had occupied since 1967. It also proposed the establishment of a Palestinian state on Palestinian lands.

These provisions were unacceptable to Israel and supporting Western nations when the resolution was brought before the General Assembly Friday evening.

The assembly adopted the resolution Saturday morning after the "Netherlands Amendment," proposed by Mark Braun, delegate from the Netherlands, deleted the last two requirements of the Arab resolution.

The amendment was the result of a compromise reached late Friday night by the delegations from Israel, U.S. Qatar, Saudi Arabia and the Netherlands, said Steve Alvin, chairman of the U.S. delegation.

Alvin said the compromise was a necessity so that the question of Israeli and Palestinian sovereignty would not obstruct the other business of the Model U.N.

Abdul Kabbal, delegate from Saudi Arabia, said the compromise was reached after the amendment deleting the legitimate rights of Palestine was added.

The "Netherlands amendment" to the Arab energy resolution stated the inadmissibility of the acquisition of land by force, cited the need for Israel to end the territorial occupation since 1967 and called for respect for the sovereignty and territorial integrity and independence of every state in the area. Finally, the amendment called for an accounting of the legitimate rights of the Palestinians as pertaining to their self-determination as an independent and sovereign state.

In other business the assembly adopted a program of food distribution presented by Pam Lacey, delegate from the U.S.S.R.

All developed nations of the U.N. are required by the mock resolution to contribute one per cent of their gross national product to the food fund. To be eligible for the fund, the underdeveloped nations must accept a program of population control and agricultural aid in their country.

The assembly defeated a resolution submitted by the delegation from Ecuador proposing a government body to maintain a 68-day food reserve stock.

Harold Emme, delegate from the Dominican Republic, proposed that the bill create a surplus of oil as well as food. The proposal was adopted by Ecuador as a friendly amendment.

Mark Haskell, delegate from Qatar, said the resolution was unfair because it did not include other materials besides oil which are the mainstays of the economy of other nations.

The assembly defeated a resolution submitted by Israel pledging their support to any nation needing assistance in irrigating deserts, low lands and swamps. The resolution also proposed that the World Bank extend loans to countries for irrigation projects.

Nelson Bank, delegate from Cuba, submitted a resolution requesting a program of agricultural incentive which would provide nations with an adequate food supply. The resolution was passed by the mock U.N.

The assembly adopted a resolution submitted by Ahmet Arslan, delegate from Turkey, requesting that fertilizer plants be built in developing nations to increase the amount of fertilizer available at lower prices.

The assembly voted to suspend the membership of South Africa in the U.N.

The final act of the Model U.N. was to halt the killing of whales for the next 50 years in order to replenish the world whale population.

CUT OUT THIS CHECK AND CASH IT IN AT
Health data to be compiled

By Peter Bush

Two graduate students in the
Communications Department are
helping organize an infor-
mation retrieval system on health data in Southern Illinois.

Stanley Andrews and Peter Vose are assisting Comprehensive Health Planning in Southern Illinois (CHPSI) and the Health Care Planning Department at SIU's School of Medicine.

Martin Anderson, executive director of CHPSI, said the graduate students are part of a four-man team set up to construct a filing and retrieval system of all available data in the 27 counties of Southern Illinois.

"They are working on a system of managing available data and putting it into usable form," said Anderson.

Anderson said this project will help support the certification of need legislation passed by the Illinois General Assembly last fall.

"The certificate of need," said Anderson, "states that a hospital, a long-term care facility, or a medical surgical facility cannot make any expenditures for expansion unless they are proven to be needed.

The information retrieval system will be an available source of health data to those areas that are considering expansion, and it is the Illinois State Health Facilities Planning Board which must review and comment on the medical facilities petition, said Anderson.

Policemen plead not guilty

The four Carbondale policemen charged with illegal restraint entered pleas of not guilty Monday in Jackson County Circuit Court in Murphy's murder with Judge Richard Richman presiding.

A court date has not been set, but Judge Richman said the trial will begin sometime in April for Sgt. Marvin Voss, Patrolmen Mel Krinkel, William Holmes and Robert Gery.

"Lucy" booth at Grinnell

The famous Peanuts character Lucy will be at Grinnell Hall Wednesday and Thursday with her traveling information booth, the theme for the Career Planning and Placement Center.

The purpose for the information booth is to inform students about services provided by the CPCC, such as job interviews and CLEP testing.

The Lucy booth will be at Grinnell Hall for the evening meal Wednesday and Thursday from 4:30 to 7 p.m. and during the noon meal on Thursday from 11:30 a.m. to 1:30 p.m.

Fee allocation deadline set

The deadline for recognized student organizations to turn in their requests for Student Activity Fee Allocations is 3 p.m. Tuesday.

The requests can be turned in at the Student Government offices located on the third floor of the Student Center.

Beginning April 1, Student Government will hold public hearings on the requests. Organizations which do not turn in a request will not get a hearing.

Join the third biggest family in the world.

Imagie an order of 22,000 priests and brothers in 73 countries around the world. (That's a pretty big family.)

But that's what the Salesians of St. John Bosco are all about - a large family of community-minded men dedicated to the service of youth. (And no one gets lost.)

In Italy in the 1860's a chance meeting between a poor priest and a street urchin served to create a movement of such success that it is still growing today. Don Bosco became the priest who taught young boys from the streets - and back to God.

He reasoned that a program of play, learn and pray would make useful citizens of the world. He crowded out evil with reason, religion andkindness in a what was the heart of atmospheres of family.

The ideals of St. John Bosco are still with us today. His work goes on in boys clubs, technical and academic schools, guidance centers, summer camps and missions. And the very human face of God evident in the family spirit of the Salesians. This is the way he wanted it. This is the way it is.

The Salesian rule (which he learned - it is lived)

"The First Minute of a New Day"  
Gil Scott-Heron

By Gary Dolson  
Daily Egyptian Staff Writer

There is music to relax to, music to dance to and music by which to become enlightened. "The First Minute of a New Day," Gil Scott-Heron's latest contribution, is all of this.

Scott-Heron's best known for his undergroun classic, "The Revolution Will Not Be Televised," has come up with a jazz based album with a strong message directed to, as one reviewer puts it, "a young black audience that doesn't need much." This is not to exclude the white audience also in need of a consciousness raising experience.

Along with Brian Jackson, who composed much of the music, and the Midnight Band, Scott-Heron runs through seven somewhat ragged rhythms, each markedly refreshing from the hoopa and love groans that characterize much of today's black music, such as Barry White and Isaac Hayes.

The most melodical track is "Winter in America," a scathing assessment of the American race struggle. Scott-Heron tells us that because we are in a period of relative racial calm, we must not believe that the battle is over. "There ain't nobody fighting, because nobody knows what to say," he reminds us.

Another biting track is the one in which Scott-Heron tells his black brothers and sisters that there "ain't no such thing as superman" to pull them through. In that tune a rocker that fills one with kinetic energy, he puts a leash on black Super Fly's bad as being "blind" and self defeating to the black cause.

Then, there is the sequel to his "H 20 Gate Blues," titled "Pardon our Analysis, because the (Nixon) pardon that you gave this time.

America, was not yours to give." In this monologue, accompanied by a moanal piano, Scott-Heron introduces us to "Oatmeal Man." Anytime you can say that a man in Congress 25 years and nobody's heard of you have Oatmeal Man. This album might be offensive to whites and blacks alike. But Scott-Heron obviously has a plan to raise the consciousness of his audience. This effort is a spiritual and musical pleasure that stands miles above much of the trite music recorded today that claims that "I love you and you love me, blah, blah, blah."

"The American Tap"

By Phoebe Snow

Sheeter Records

The music of Phoebe Snow's unique musical talents has just recently hit the Midwest. A fast rising performer, the album recently went from 31 to 12 on the charts. Snow's bluesy voice moves the listener with dynamics and power reminiscent of Laura Nyro.

"Winter in America" and "Blind Man" appear from her sequels as a singer and her ability to combine it with good music, creating a style all her own. She performs with the finesse and class of a veteran blues guitarist— and then some.

The lyrics reflect her insecurity with cutting a first album. She laments blues that proclaim, "it might be Monday to cause everybody's drinking Vermouth," the failures of love and life, and a childlike naiveté music.

Sounding like a slickly-jazz night-club performer, Snow casts and swings her unmistakable voice to fill the saxophone signs of John "Zoe" Sims, the piano blues of "Teddy" Wilson and her own tremulous guitar playing.

Dave Bromberg and Dave Mason join her on some smooth guitar licks and the Persuasions add superb vocal accompaniment, which enhances Snow's mellow voice. What makes the album even better is its diversity. Although each song is based on a blues progression, the addition of other instruments lends a unique sound to each of "Phoebe Snow."

FOR SPEEDY SERVICE WITH A SMILE,

By Mary Whilber
Daily Egyptian Staff Writer

A system designed to monitor Carbondale's six sewage pumping stations is now in operation, said James Mayhugh, superintendent of water and wastewater treatment.

Pumping stations, also referred to as lift stations, are at low points throughout the city's sewage system. Sewage collects at the low points and is pumped to a higher elevation where it continues to flow through the system by the pull of gravity.

The monitoring system will use telephone lines which feed into a main control panel located in the Water Treatment plant. An operator is on duty 24 hours a day at the water plant to acknowledge all alarms, Mayhugh said.

The lift stations are located behind the Holiday Inn, west of the water tower on Helen Street, behind Murdale Shopping Center, in the Hunter Woods area, on the west end of Short Street, and on the west end of Kent Drive.

Under the old system, a bell would sound at the lift station site and passer-by or neighbors would call the Water Treatment plant to report the malfunctioning of the pump or a flooded condition.

This system was inefficient and "not only alerted but sometimes irritated the neighbors," Bill Boyd, director of public works, said.

The new system costs $11,744. Costs included a main control panel at $3,700, eight remote reporting units at $2,972, twelve float switches at $600, three chlorine leak detectors at $1,850, installation of telephone lines at $180 and miscellaneous installation materials at $317.

The city saved approximately $5,000 because the project was installed by the public works staff, Boyd said.

The main advantage of the new system is that the Water Treatment Plant will now know immediately of any malfunction, including power failure, excessive storm water flows getting into the sanitary sewer and mechanical failures causing flooding conditions, Mayhugh said.

New vets' association head promises club more attention

PROMISING to spend more time with members, Jim Saul was elected as the new president of the SIU Veterinarians Association.

"The club does need a new direction," Saul said at the association meeting, "and that is toward the members." He and 8 other new officers will assume their duties at the last meeting of the semester, according to current president Jim Mills.

A second vote was taken Wednesday night after Saul and his opponent, Bill Conley, tied.

Saul said he would try to leave the vice president more in charge of the Veterinarian's Affairs Center so the president could keep in closer touch with association members.

RIDES NEEDED

Interdisciplinary group probes social sciences

By Mike Karlington

Faculty members with an interest in behavioral science who believe SIU and other schools need to start working for the benefit of the community might want to get involved in ASSRIP.

ASSRIP stands for Applied Social Science Research Interest Group and has members from departments across campus. Bill Vicars, an administrative science professor and the coordinator of ASSRIP, explained the origin of the organization's unusual acronym.

"Originally," he said, "the name of the group was Applied Social Science Research Interest Group, but when one of the members saw what the initials read, we decided to change it to something people would like.

Vicars said that the name is an "eye-opener," he added. "We're forming a little bit, but it is a serious group.

Vicars said ASSRIP started in the fall of 1983 as a "Social Change and Schools" meeting beginning at 6 p.m. at the Library.

The meeting is the third of the "Breaking Barriers in the Carbondale Community," a series of meetings sponsored by the Carbondale Interchurch Council and the Carbondale Peace Center.

The meeting will begin with a meal at 6 o'clock. During dinner, Bob Wesc of the SIU Department of Philosophy will give a mime presentation, "The Box.

After dinner, Bill Easin of the SIU Department of Educational Administration and Foundations will comment on three sides of the theme, "Social Change and the Schools": status quo, reform and radical change.

Workshop discussions will be "Competing for the Name of the Game?" led by George Schedler of the SIU Department of Philosophy; "Male-Female Stereotypes and the Schools," led by Stella Johnson of Carlinville Junior High School; and "Our Schools and Good Soldiers," led by Robert Griffin of the SIU Department of English.

Other workshops will be "Personal Growth: Nurtured or Stifled?" led by Bob Wesc of the SIU Department of Elementary Education; "Racial Equality, Realities and Rhetoric," with Norma Exving of the SIU Department of Special Education.

The meeting will report to a general session moderated by Bob Child of the Southern Repertory Dance Project.

The series of meetings is funded by the Illinois Humanities Council.

Southern Hills plans improvements

By Donna Pantaleo

The Physical Plant is ready for bidding for improvements to newer buildings at Southern Hills but remodeling will be done only as money becomes available.

That was the comment Friday of the fund available.

Funds available

Applications for the Daisy Powell Memorial scholarship, political science, can be obtained in the Department of Political Science in Phanstooth.

Two $400 awards will be given to political science majors who have attained sophomore standing as of fall semester, 1987. Applicants must be Illinois residents, have a grade point average of at least 3.5 and demonstrate the need for financial assistance. Only undergraduate students are eligible for awards.

Applications are due April 8.

Four tracksters earn 'All-America'

By Dave Wieczorek
Daily Journal Staff Writer

Carbondale, the All-America city. That couldn't be truer, considering the performances of four of SIU's tracksters this past weekend in Detroit. For the second consecutive year, they captured the Illinois Class AA state meet title, and four of them came back All-Americans.

The four were led by senior Lonnie Brown, whose long jump effort of 24-10 1/2 was good enough for fifth place. Bill Hamilton of Kansas won the event at 24-11 1/4.

Senior Phil Robbins earned All-America honors with his leap of 53-9 1/2 in the triple jump. Robbins led the competition until Arnold Grimes went 54-0 on his last jump. Carlton Euzeviles of Illinois finished third at 52-6 1/2.

"The fact that they had not been on boards all year is enough for them," Hart-zog explained, concerning his athletes' performances. "It's so much different on the boards all year, and it hurt," Brown said. "They were too used to running in the field, and they had it hard on the running surface. Both jumpers had good efforts."

Senior Bill Hancock failed to clear 20-7 on his last jump, and Ed-thony Hoosman, a junior, is 6-7 junior, is 6-7.

All-American BiU Hancock failed to clear 17-1 1/2 on his third jump, and it was just superb," Hart-zog related. "For a freshman to go that far and do a job like that—it's just great!"

The track in Detroit is all boards and is bouncy, generally harder to run on unless the runner is used to the surface.

Senior Bill Hancock cleared 7-6, but his 6-11 mark was good for fifth place. Twenty-three 7-foot jumpers were entered in the field, which is probably the toughest competition ever faced indoors.

The winner was Greg Joy of Texas-Las Paso (UTEP), with a mark of 7-2.

One of the more extraordinary performances of the meet had to be that of freshman Saluki pole vaulter Gary Huntz.

Earl Bell of Arkansas won the event with a vault of 17-2, breaking the old meet record of 17-1 1/4, set by Jan Johnson and several others.

However, Hunter was the big news for SIU. His third place finish was the result of a 10-7 vault that set a new SIU record. That is the best ever by a Saluki-indoors or out.

"It did it on his third jump, and it was just superb," Hart-zog related. "For a freshman to go that far and do a job like that—it's just great!"

The 1976 team has the outdoor meet indoors for the first time in two years ago, scoring nine points.

The national meet ended the indoor season, and the Salukis are now looking forward to the outdoor season which will start next month when they meet Auburn in Alabama.

"I was very pleased with the indoor season," Hart-zog said. "If the outdoor season can be as good—we'll be happy.

Supersectionals tonight ...

By the Associated Press

Undefeated East Leyden was favored to run away with the Class AA state meet Monday to capture the Illinois Class AA state meet title this weekend.

The Eagles, carrying a 38-0 record into Tuesday's supersectional round robin, have been class champion Proviso East, gained 11 of a possible 12 votes.

In the key to any title chance, East Leyden won the 28-1 1/3) 242 of the State AA meet by teams Monday, 28-1 1/3) 242. Illinois, finishing third with 258 points, followed by South seventh, and Bloomington with 171 1/2.

With the exception of Phillips, those are the only teams among the Top 16 in the AP's state meet poll, survivng regional and sectional tourney play that had an original field of 258 to supersectional size.

If East Leyden, paced by a pair of all-state in Greg Crumwald and 7-1 Tom Gore, can hurdle the hurdles Provise East Pirates, the Eagles should dominate the lower bracket at Champaign.

... one game here

East St. Louis and O'Fallon will fight it out at the SIU Arena Thursday night for the right to represent Southern Illinois in the Class AA state high school basketball tournament.

East St. Louis, 24-1 enters as a solid favorite after downing Alton 77-73 in their sectional championship game. O'Fallon, 23-3, meanwhile, knocked offEffingham 84-76 after upsetting Alton in their sectional action.

With two games to enter the game with a distinct advantage distinction, Anthony Williams, a 6-7 junior, is flanked by forwards Charles Thomson and Hubert Hooman, both 6-6 seniors. Larry Townsend and Eld-ward Vaughn, both 6-4 seniors, man the guard positions.

O'Fallon will answer with 6-8 senior Terry Phillips at center, 6-7 seniors Robert Lee and Kyle Harper at forwards and 5-10 seniors Terry and Larry Bussard at guards.

Tuesday's tipoff time is 8 p.m. Plenty of tickets will be available at the door.

The winner will advance to the 7 p.m. contest Friday at the Assembly Hall in Champaign to face the winner of Tuesday night's Decatur Eisenhower-Bloomington game.

Washed away

'Twas a false start.

The Saluki baseball team was all prepared to open its season Saturday at the Tulsa Invitational, but it didn't get off the ground—because the water didn't either.

The Salukis were possibly rained out at Murray, Ky., Tuesday, and a later rainout also kept the Sharks from being able to open the season.

Good warnings have hit that area.

Ivancevic leads Saluki contingent into finals

Ivancevic, the Salukis' top diver, scored 18.60 in each of his first two events. He led the way as Salukis finished seventh.

Friedman said she does not plan to swim next year "until I am allowed to check out the coach very carefully. No way am I going through this again."

"The thing is, I've been swimming competitively since I was six," she said. "I felt that this was my peak. This was my chance to prove to myself that I could finish well."

"My times were good compared to the others. I had 32.8 for the breaststroke and 1:12.1 for the 100-breaststroke. Now, I'll never know..."

"For everything I worked for just went out the window," she said. "I've never been shot down so emotionally, physically."

As far as I feel, I'm the only one that lost his job. He's totally irresponsible and totally unorganized. He should never have such a position of responsibility. If he doesn't lose his job, something is wrong there."

DumIn said, "I don't blame them for being upset... but one thing good did come out of this. The judges plan on making provisions for mistakes... It looks like we'll get around to not penalizing swimmers for coaches' mistakes."

DumIn explained that, although not official yet, the AIAW plans to fines coaches and officials for each swimmer involved in the errors.

The swimmers will still be penalized, however. DumIn said that if there is an error, swimmers will be taken out of their assigned heats and placed in tougher competition.

DumIn said one of the reasons for the mistake was "the flurry of getting ready and trying to get 50 pipes to look at the stuff (entry sheets). I hadn't been very successful at that all year, so I kind of panicked trying to do it."

DumIn said that he was not the only coach who made the entry. He added that four coaches made mistakes at the Illinois State Championship meet, in which he also made a 50 error.

According to two swimmers, who asked not to be identified, the swimmers wanted to look over the entry blanks but were not given a chance.

One swimmer said, "We would have been able to check one another and look at the entries if he (the DumIn) would have asked."

The problem began Wednesday when the swimmers found that mistakes were made. They tried to appeal the judge's decision.

According to DumIn and two swimmers, DumIn called the swimmers' name on TV."

He said, "That's when I knew that they wouldn't be able to swim. What DumIn accomplished was that this meet would be able to swim in the events in which they were listed."

The women saved up until about 1:30 watch TV and were totally unprepared for DumIn's wake-up phone call the next morning.

Another swimmer said that the women "might as well have not swam the events."

"A swimmer can only be so good, and then after that, what happened to us, we were definitely psychologically unprepared... It's a good thing we had each other, or we would have been hysterical," she said. "When we found out we couldn't swim, two of us started crying our eyes out, and no one should have gone through."

Charlotte West, director of Women's Athletics, was out of town and not available for comment.

Wiesen falls early

By Dave Wieczorek
Daily Egyptian Sports Writer

The luck of the draw went against Mark Wiesen, according to his coach Lon Long.

Wiesen and Long were at the NCAA championship meet held at Princeton last weekend to qualify for the nationals, but the 187-pound Wiesen never made it past the first round. He lost to Mark Hansen of Brigham Young University, 9-7 in consolation.

Hanson lost his next match, which canceled Wiesen's chances of wrestling back to a third place finish by way of the consolation bracket. According to the rules, the way wrestling tournaments are set up, Hansen and Wiesen will advance two matches in order for Wiesen to wrestle again.

"How a guy does depends on the draw a lot of times," Long said. "Mark just didn't have that chip that could whip him."

He had wrestled Hansen's brother a year ago, but they weren't strange to each other.

The team title was won by the University of Iowa and, as usual, Long said, the regular match schedule was presented, including Iowa State, Oklahoma, and Lehigh. Competition was tops, and Long said a wrestler has to be prepared.

"When you get to that kind of competition—you better be ready," he assured. "Mark was not prepared. He lost a match that he made a couple of technical errors that he's made all year and they caught up with him."

Hansen was an exceedingly worthy opponent," Long added. "He was the Western Athletic Conference champion (at 187) and we wrestled him, he won it twice, he lost it once."

Wiesen finished the 1974-75 season with the best record on the team at 15-3.

This would seem to conclude the wrestling season, but Long said the 1975-76 season gets underway April 2, when the first squad meeting will be held.

James Gang captures title in women's IM basketball

By Ruth Miller

James Gang rides again.

This time the object of theft was the women's intramural basketball championship trophy. Mark Gang was able to hang on with a 31-25 title game triumph Sunday over the Hot Shots.

This year's contest was never in doubt, as the winners rolled out to a 7-0 lead after the first quarter and polished their performance with an 11-2 fourth quarter binge.

Just super," Meade exclaimed after Saturday's individual competition, in which Ivancevic captured the top honors with an 18.15 score on his third attempt at the 10-foot board.

Ivancevic, the Salukis' top diver, scored 18.60 in each of his first two events. He led the way as Salukis finished seventh.

The Salukis continued to pressure the program as competition switched to parallel bars. They managed to sneak by ISU 36.75-35.65. Saluki Steve Shepherd, however, won the individual title with a 14.45 score for the second team comprising members Jim McPual, 13.89 to 12.25.

ISU actually built its lead in the pommeled horse, when it displayed a little more balance than Saluki. Saluki Brian Proctor scored 13.82 and 13.85 to finish second and third, respectively, but Ed Paul squeaked by them with 13.80. ISU totaled 36.95-SIU's 35.95.

SIU bounced back in vaulting as Jim Ivancevic captured top honors with an 18.15 score on his third attempt at the 10-foot board.

Ivancevic, the Salukis' top diver, scored 18.60 in each of his first two events. He led the way as Salukis finished seventh.

The highest single score of the day was recorded by Ivancevic in the final event, the floor.

His score of 9.6 gave Ivancevic an 18.60 total for the event and first place. ISU came up with more team strength and beat SIU 48.58-38.35.55 for the event title.

In Saturday's individual competition, the top three competitors in each event qualified for the national championship.

Five Salukis qualified in five events.

Hanson and Hembd finished 1-2 in the pommeled horse with Thomas taking third. The three qualified in the event.

Ivancevic was tops in vaulting. Ivancevic qualified again by finishing third in the pommeled bars. Eidman took second place.

Ivancevic won still another first in the butterfly events. He was a candidate for the title.

"I wasn't too disappointed about losing," Meade said. "A lot of times we say we had the same score with 77.05. Our highest score and have managed to win.

Ivancevic showed a little more disappointment. "I was a little glad we qualified, but I'm disappointed where we finished," he related. "I thought we were a better team than we showed."
Pitt dumps Dogs from NIT

By Ron Setton
Daily Egyptian Sports Editor

NEW YORK—Pitt and the pendulum. They certainly went together at Madison Square Garden Saturday night, as the Panthers grabbed the early momentum and swung to a 70-46 National Invitational Tournament win over SIU.
The first round loss ended the Salukis’ season at 19-8, their second straight year in the major college ranks in 1968.
Pittsburgh is now 19-10 entering Tuesday night’s quarterfinal game against surprise winner Providence, which upset 16th-ranked Clemson, 91-86.
Tournament players and coaches, alike, illustrated that we will see strength, defense and depth are the key to the Salukis’ success this year. This game certainly proved the point.
Although the Salukis won the rebound battle 53-34, Pittsburgh was the team to reap the harvests of board domination. The Panthers controlled the caroms in building up a 37-38 half-time advantage, and the Salukis had to struggle without interference. It was the 11th time in its last 16 games Pittsburgh had held the opponent under 70 points, while SIU had scored 20 or more only one time in that same span.
Taking its place, Temple, winner of the nation’s 296. 01”, move up, and SIU’s 26-9-6

Totals

PITT 70 (Hill 1-0-2; Starr 9-3-5-2); Bennett 2-2-8; Bruce 5-1-21; Richards 3-1-2-7; Harris 6-0-6; Bulla 0-0-0; Kelly 2-1-5; Haygood 0-0-0.

SIU 57

Huegel 2-0-4; Meriweather 12-26-6; Glenn 74-4-4; Hines 27-7-11; Nixon 6-6-6; Boynton 8-6-8;

PITT 37 23-70

SIU 26 39-80

SIU’s 20th-ranked defense in the conference.

Scoring: 428.50 points and finishing second in the Illinois State (ISU), the SIU gymnastics team Friday, assured itself a spot at the championships to be held in Terre Haute, Ind., April 5-6.
The Salukis hosted the Eastern Independent Qualifications of the NCAA Friday and Saturday, which included team competition Friday and individual competition Saturday.
According to NCAA qualifying standards, the winner of every conference or region must score a minimum of 200 points. At one team fell over 200 points, the next highest scoring second place team in the country will take its place. Temple, winner of the Eastern Independent Gymnastics League for the third time in four years.
As of Monday, SIU’s total was the second highest in the nation of any team, winner or runnerup, with the exception of ISU which scored 429.45.
The next closest team to SIU is Nebraska with 413-plus. There are four regions and conferences that have not been decided yet, but Saluki coach Bill Meade doesn’t figure on any second place finish this season, and he hopes to win the championship.
After his team’s performance Friday night, Meade was pleased, although a little disappointed that they didn’t win.
"The kids did a good job," Meade said. "We’re a good team, and we’re hungry. I think we gave away about a point-and-a-half."
