Advance Registration to End Friday: Deadline for Fee Payment Sept. 11

Advance registration for the fall quarter will close Friday. Jack Graham, coordinator of Academic Advisement, has urged all currently enrolled students to complete the advance registration process as soon as possible. Students must make appointments to see an advisor.

Students who have received their due statements are requested to pay by the deadline date, Sept. 11. Students who do not pay in advance of this deadline will have their registrations cancelled. They will then be required to re-register the advisable and sectioning process beginning Sept. 23. Those students who have paid their fees may see advisors to discuss schedule changes during final examination week. Formal program changes can be made at the Sectioning Center on Sept. 24.

The advance registration deadline, freshmen, new transfer students and all graduate students will be reviewed and registered for fall quarter on Sept. 21 and 22.

Currently enrolled students and students enrolled last spring will not be able to register until Sept. 23.

50 Attend Rehabilitation Institute

Prof. Tucker To Retire

Lowell R. Tucker, a member of the SIU faculty for 17 years, plans to retire at the end of the summer session. He is associate professor of plant horticulture.

He came to SIU in 1947 and for a time was acting chairman of the Agriculture Department. This was before its enlargement and reorganization into the School of Agriculture.

While at SIU, he has taught general agriculture, horticulture, landscape gardening, preservation of agricultural products, and soil conservation.

Tucker received his bachelor's degree from the University of Massachusetts and his master's from the University of Rhode Island. He received his doctorate from the University of Massachusetts and has specialized in horticulture.

Hamblen to Give Paper at Meeting

John W. Hamblen, director of the Data Processing and Computing Center, will present a paper at a recent meeting of the Illinois Institute for Computing Machinery to be held Aug. 25-27 in Philadelphia.

His report, to be given during the 11th annual conference of university computing centers, is titled, "Procedures and Policies on Use of Computing Center Facilities."

He will cover some factors affecting priorities and other decisions necessary to computer center operation, examine some policies regularly used and propose some new policies in these areas.

Orientation of New Workers Is Main Purpose of Sessions

Approximately 50 persons are attending the 11th Annual Institute for Rehabilitation Personnel being held at Thompson Point.

The institute started Monday and will run through Aug. 28.

According to Guy A. Renzaglia, director-director of the institute and associate professor of psychology and guidance, "the primary objective of the institute is to orient new workers to rehabilitation principles, procedures, and programs."

It also serves as an introduction to the United Fund Board To Meet on Budget

The board of directors of the Carbondale United Fund will meet tonight to consider the budget proposal, and for the forthcoming campaign.

This board will also consider the appointment of the Rev. Edward L. Hoffman as chairman of the campaign drive.

The board members will meet at 7 p.m. in Morris Library Lounge.

Best Laid Plans ...

Last-Minute Cracking Is Frowned Upon By Students Who Spend Night Studying

By Larry Widrig

Get out your No-Doz, coffee, cigarettes, and your rabbit's foot. Here we go again.

Finals begin next Monday, Aug. 24, for summer quarter. So, get on your mark, get set, cram!

A number of SIU students were asked to comment on how they study for finals. After a few nervous tears, they gave out some of their formulas:

I'll usually try to have my reading assignments read and outlined as the term develops. Comments Fred Starr, a senior from Belleville who is majoring in economics. "By doing this, I spend only two or three days reviewing my notes and outlines," Starr added.

"Up until a week before finals, I try to keep a relaxed attitude by doing enjoyable things," said Lawrence J. Harris, a senior from Leland, Mich. "By following this policy, I am always prepared during the days preceding finals. This lets me frantically finish my term papers in time for exams."

By doing this, I may try something else next quarter—and make it back in," said Diane Ambrose, a junior majoring in accounting, in Morris, Ill.

(Continued on Page 8)

Heat-Battling Students Prefer 8-Week Quarter

SIU students asked about the length of the 8-week quarter seem to prefer the shorter version.

Most of the SIU academic program this summer was on the "11-week" system, instead of the eight weeks which had been the general pattern in previous years.

"The reason I came to summer school is to keep from working," Hal Kavall told us. "But this 12-week quarter has kept me busier than a job would have," he said. "I would rather travel more during the summer, and the extended quarter doesn't allow him enough time for this."

The session is "12 weeks" but it counts out to 11 on the calendar.

"I don't mind the 12-week system but I do another term. However, along about the seventh or eighth week of the term, I find myself wishing it was over, if the summer term were still eight weeks, I am sure I would have no regrets," Sue Selenitz, a senior from Monticello, said. She prefurred the shorter eight-week session.

"It's too hot to go to school for 12 weeks in the summer," she declared.

The summer heat was also a factor in the preference of Joan Jenkins, a senior from Carbondale, to continue the longer quarter because it offers more time for study and preparation. "However, because of the heat in the summer," I prefer the eight-week session," she said.

Larry De Vantier of Altamont, a senior majoring in education, was interviewed before the season of cool weather. "As hot as it's been here of the last couple of weeks, attending class under the old schedule of longer class periods in the eight-week quarter summer term would have been completely unbearable--particularly in air-conditioned classrooms, areas such as Old Main, and also the hoe. We have as much work in air-conditioned comfort, and attend class the same way this year," she said.

Another student took the position that eight weeks was too short, and the extended term too long. He was Charles L. Ehler, a junior majoring in agriculture. According to him, a compromise between the two would be far better. This would enable the student to spend the normal 50 minutes in the classroom, but leave a month to six weeks...
Today's Weather

Considerable cloudiness with showers from west ending during the day. High in mid to upper 60s.

Gloria' by Vivaldi to Be Highlighted Of Summer Choir Concert Thursday

By Jack Rechtin

Thomas Meeth will begin work on a master's degree here next term, along with five other graduate students.

Unlike his colleagues, Meeth will not be able to spend his non-classroom time with the Summer Choir, whose concerts will be presented Aug. 20 at 8 P.M. in Davis Auditorium.

The performance has been announced previously for Shroyer by Robert Kingsbury. Kingsbury has rescheduled the concert for Vivaldi's Gloria in Davis Auditorium at 8 p.m. Thursday.

Other selections on the program include a work by 16th-century composer Vivaldi, "Now Gloria Be Praised in Heaven's Above," and the "Adoration of the Name" of 16th-century composer Corai. The Choir will close the concert with Vivaldi's "Gloria." They will be accompanied by a small orchestra.

Mrs. Fischer, soprano soloist, is a native of New Minden. She has appeared previously as Susan in Mozart's opera "The Magic Flute" at an SIU Opera Workshop presentation last winter. Her husband received his doctorate from SIU this spring.

In addition to her singing, Mrs. Grauer studied music at North Texas State University, Denison, Missouri, and is director and assistant choral director of the Hill-crest High School in Dallas, Texas. Earl Grauer, she came to SIU with him when he chose the school for his graduate work. She will be teaching choral music in the Johnson City Schools this fall.

Brenda Bostain is formerly of Marion and now a Carbondale resident. A music student, she appeared in the SIU Summer Music Theater production of "My Fair Lady." The "Gloria" is one of Vivaldi's most festive works.

The text is derived from the ordinary of the Catholic mass. The acting uses not only soloists and chorus, but a small orchestra of strings, double reeds and the higher Bach-style trumpet. Janet Cox, Mount Vernon, is the organ accompanist and will play the keyboard continuous for the performance.

Dressing on SIU Campus

For Whom The Belles Dress—Men, Girls?

By Leonor Wall

During the summer months in the world of fashion, attention focuses on designs for the fall and winter seasons. Likewise, during the winter months exhibition is given to the new creations for spring and summer.

For many people, this topsy-turvy phenomenon is met with as much confusion as the appearance of Christmas items in stores while Christmas is just beginning in the home. The sale on fur coats on a hot day in July or August; and the finding of Easter bunnies nestled in green grass in show cases while traces of snow are still on the ground. It would seem that for many the determination of an individual to be dressed properly becomes dependent on the season.

Returning our attention to fashion, Miss Padgett, chairman of Clothing and Textiles, said as what makes a well-dressed woman.

Her answer: "Clothes that are tasteful, comfortable, and becoming to the occasion and fostering the determination to dress themselves by being professional..." Miss Padgett said she believes that if a style is a fad, something that is picked up just as quickly and as quickly disappears, it will go over, but, if a style is high fashion, something that is exclusive and comes down from the top of the fashion ladder, it will be selective upon individual tastes. Also she stated that the areas stores dictate a lot of what is worn on campus by the merchandise that they handle.

As an observer of fashion, Miss Padgett was asked for whom she felt men dressed, "Men dress for professional reasons because they must look up to certain standards in the world of business. A man on the whole likes to dress well and in dignity clothes."

Fingering her turquoise ring, she explained for a moment, "Women dress for their own satisfaction and social acceptance rather than for others, she being well dressed and therefore can be a determining force shaping the dress habits of others."

Regarding the question of for whom people dress, Sylvia Little, a senior from Carbondale, said, "Women dress for themselves because men's dress is so drab. If women dressed for men, they wouldn't be so stylish because men don't care much about what one wears."

Martha Davis, a junior from Carbondale, said, "I dress for no one in particular but myself, for myself."

The wife of one of the faculty members, "Women dress for women, they compete with each other in fashions."

However, she admitted that she dresses for her husband, "If he doesn't like what I'm wearing, I don't wear it. My husband picks out my clothes. It is just as well he doesn't because I wouldn't wear it if he didn't like it."

46 Are Enrolled in Space Course

Fifty-six teachers and others interested in the importance of aero-space education in modern civilization are enrolled in an Aero-Space Workshop to continue through Aug. 21 at SIU.

Jason Collins, director, of the workshop usherer over some of the most elementary questions about the space age. It was designed especially for social studies teachers. Assisting Collins are seven U.S. Air Force officers.

Highwaymen

Folk Singers

On WSIU

Tonight's America on Stage will feature "The Poor of New York" by Dion Boucicault at 7:30 p.m. over WSIU Radio.

Other highlights:

12:30 p.m. News Report.
2:30 p.m. Man and the Molecule.
2:45 p.m. The World of Folk Music: The Highwaymen.
3 p.m. Paris Star Time.
3:30 p.m. Concert Hall: Brahms, "Concerto No. 2 in B Flat Major for Piano and Orchestra." Mannesett, "The Old Ballet Music." Willsman, "Squaw &... Rhapsody."
7 p.m. Forum.
8 p.m. The Music of Don Gillies: "Symbology No. 2 (Gaga of a Prairie School)."

Teaching Technique Featured At 8:30 Tonight on Channel 8

Eye on the World will feature "Comparison Four Teachers" at 8:30 p.m. today over WTVI. This program looks at some of the present day teaching techniques and takes the viewer into the classroom to watch four outstanding teachers. Other highlights:

5 p.m. What's New: The technique of flight is exhibited by different kinds of birds and this is compared to how airplanes are supported in the air; also, a journey to Mesa Verde.
6:30 p.m. Eye on the World.
Tolkefon to Speak At Southern Hills

The Summer Steering Committee meets at 7:30 p.m. today in Room E of the University Center. Dean Tolleson, instructor in higher education, will discuss, "The Arts and Social Distinction." On the Green at 8 p.m., today at Southern Hills Building 177.

The social committee of the Summer Steering Committee meets at 3:30 p.m. today in Room F of the University Center. Leonard Hollmann and Mary Jo Brock will present an organ recital at 8 p.m., today in Shryock Auditorium.

Saddle Horses Also Star In Film, And Test New Hardwood Stalls

SUI, which has buildings, students, faculty, library, and so forth, also has a herd of 20 horses.

The herd was a gift of Richard Lumpkin of Madison, who made the presentation to the Animal Industries Department in December. It now includes 20 American saddle horses. These horses are used in demonstration purposes in agricultural classes dealing with horses and are currently involved in a behavior study that included extraordinary perception.

The horses are the responsibility of Ronald D. Carr, whose experience with horses and interests extend back to the days he spent on his father's farm. Carr studies grazing and shows about horse work he is doing in high school, and after finishing his studies at SIU, he has been working with horses continuously since 1961. He has two horses, for one he is on a full-time horse, and has also been involved in work at fairs (tracks) in Chicago and New York.

Carr said all the horses have gone through the experience of commerce of breeding and have been used extensively during the year. This has been a hard year. The stallions do not run with the mares, and some of the horses have been used for other purposes as well.

The horses are used for some periods of time, but this is not a 24-hour-a-day, 365-day-a-year, sort of work. The horses are considered domestic animals and are not pets. They are, however, treated as pets.

The herd consists of four stallions, one gelding, one stud bull, and the remainder, mares and fillies.

The mares run loose in the pasture and shelter is provided for them. Because of a lack of snow, the stallions do not run with the mares, and their exercise is taken care of by the herd. The stallions are used for bridge and demonstration purposes in these courses.

In addition, the American saddle horse is currently being studied for recreational purposes. Reid and the number of saddle horses has increased tremendously in recent years. A rising standard of living and more leisure time will probably further increase the popularity of saddle horses, he explained.

With this growing popularity, the demand for persons with knowledge of horses is increasing. Reid continued, but at the same time, the ability to maintain and control horse shows and stables is reflected in the dropping of the study of horses in many schools of agriculture.

At the time SUI accepted the herd, it had a Department of Recreation and Outdoor Education, and, in the Animal Sciences department, a department of Agri-Horticulture and Agri-Science. The animal sciences department, under the direction of Alex Reed, continued, has a structure designed to train the students in the field of the horse.

A program has been established to provide a limited number of student appointments for this work. The student will work for the horse, and the student will be paid.

One of the horses, a gelding, has been killed in a fire. The horse was named Flyer, and the student has been paid.

Reid said Mike Walsworth is a student who is in the field of the horse and has been working with horses for several years. Reid said Mike Walsworth is a student who is in the field of the horse and has been working with horses for several years. Reid said Mike Walsworth is a student who is in the field of the horse and has been working with horses for several years.

Meanwhile, the Office of Recreation has announced plans to finance a film about the care and management of horses. In addition, these stalls are involved in the hardwood experiment program under way at SUI. Part of the program is the testing of new hardwood stalls for various uses. The stalls are to be tested for use in horse barns was is a good example of what can be done.

Cool Temperatures make the horses frisky

The stallions do not run with the mares, and some of the horses are used for recreational purposes. Reid said the number of saddle horses has increased tremendously in recent years. A rising standard of living and more leisure time will probably further increase the popularity of saddle horses, he explained.

With this growing popularity, the demand for persons with knowledge of horses is increasing. Reid continued, but at the same time, the ability to maintain and control horse shows and stables is reflected in the dropping of the study of horses in many schools of agriculture.
Campus Vending—Getting Your Money Back

So you’ve been robbed by a silver-livered merchant, and a swift clubbing of the machine has perhaps borne your first reaction. Were you just a cut or two above the average, it stood of exacting a pugilist’s measure of remuneration you could have chosen to process to one of three places on campus where remuneration for a vending machine’s banditry can be obtained in the form of cold hard cash. Immediate refunds are made at the Information Desk in University Center, at Auxiliary and Service Enterprise offices in Room 103, Shryock, and at Lentz Hall. It is true that filling out the required form overtaxes their mentality, in other words, there’s nothing to it.

However, although the three locations on campus where a refund can be obtained are more or less correct, located, they nevertheless may not be convenient to place and a person loses his money. Sometimes the effort of getting a refund, though small it may be, is just doesn’t worth it.

Auxiliary and ARA, the campus’s largest vendor, is refunding practically all the money it holds.

On Other Campuses

There is much popular complaint in regard to vending machines, much of it indeed by justified. Much of it is not. Perhaps the average student is hindered in judgment by an all too hasty and possibly myopic examination of the facts. Or perhaps it is just the average student’s desire to complain.

It is more than that. Machines do sit vacant.

Money Back

In our next editorial, we deal with ways the average, complaining student can be instrumental in designing machines vending machines the service he desires.

Education Corps Praised on 1st Anniversary

MSU’s unique Student Education Corps passed its first anniversary as an active program. It is very successful in directing the enthusiasm of students to helping deprived children, something the average student, whether in schools throughout central Michigan or anywhere in the state, has the opportunity to grow.

The corps was founded during the summer of last year and this year and in terms last year after a discussion of a student teaching problem student of sociology—education of class met enthu-

The reception of the program has been good both in Michigan and around the country. A column on SEC by James Roston of the New York Times brought requests for information from colleges around the country, and students in 13 Michigan colleges and universities are now working in the volunteer teaching programs with goals similar to those of SEC.

At a conference called by Gov. Romney at Kellogg Center earlier this year, a clearing of those interested in the program was established at MSU. The purpose of the Student Education Teaching Programs, HELP, is to coordinate the operations of the various programs around the state.

Gottlieb said it is essential to “think in terms of the kind of things this University could do to assist in areas of education, especially in the area of the culturally deprived. One of the aspects of SEC to which its success is attributed is the fact that it has a run on a day-to-day basis entirely by students, with a faculty and student advisory committee headed by Gottlieb.

Students recognize that the survival and success of the program depend on them, Gottlieb said. The purpose of the program is what they do to make it successful.”

Volunteers work at least one half day a week, and, Mrs. Warden said, more often one half day or two or three half day.

A wide variety of subjects are taught by SEC volunteers, and many work in extra programs of athletics, music and art, or group activities such as Girl Scouts and youth groups.

"Of all the student activities on campus, I feel SEC is the most worthwhile," said Lance Hauer, Detroit graduate student and coordinator.

Reckoning the managing the service is much like trying to manage a woman. It can’t be done for very long. This means that you have to neaten up. Sometimes (Massa) Spectator

When your wife tells you about the dent in the fender until after you’ve eaten, that’s managed news.

Kennedy Confers With Wagner
Senate Race Decision Pending

NEW YORK -- Atty. Gen. Robert F. Kennedy on December 15th has announced his decision to enter the race for the U.S. Senate from New York.

He left for Washington saying he did not know whether he would make known his plans. The attorney general said last week that he would not seek the Democratic nomination here without the open approval of Wagner.

"I have nothing to add," he said. Wagner, the Senate incumbent, has not decided whether he will run for re-election.

Viet Cong Goes to Malaysian Border

SAIGON, Viet Nam -- A Communist battalion smashed two government posts in the Mekong River delta late Sunday, ambushed a relief force, and inflicted a total of 250 casualties on government troops.

A helicopter-borne operation against Viet Cong units in the area of Sagoi, where the conflict began, forced Communist forces to retreat a short distance. Five Viet Cong were killed in the operation.

The operation was an example of the tactics being used by Communist forces throughout the South Viet Nam because of the extensive use of small arms and the fact that the Viet Cong has little or no heavier weapons.

Shroyer Adds New Assistant To Grid Staff
Frank Chizevsky, a former Decatur high school football coach, will join the SIU football coaching staff. When fall practice opens, Chizevsky, an assistant coach at St. Louis DeSmet High School for seven years, will join head coach Don Shroyer, who was named new head coach of the Southern Illinois University football team.

Jane Dougherty, executive assistant to the office of the Vice President for Student Affairs, said she has this opinion for reasons, "but it helps me concentrate," added Annette Chizevsky, an assistant coach. "Of course, if I have a course without a final, this cuts down on the amount of work considerably. My system is not the best I'm sure, but this is my last term of school and it has worked for me in the past," Olmer said. "I usually study for finals by looking over my notes taken during the term," David Deverick, a senior taken from Riverdale, said, "I then read over my notes and decide what I need to study the most. Then I cram." "I always intend to review all the courses as I go along, but I usually end up cramming for each final the night before," said Roger Turner, a senior from Kaskaskoa who majors in advertising. "There are too many final exams too short a time to prepare for all of them adequately," he added.

So, out with the books, into the fire with our notes, and let the parties begin and we'll all flunk out together.

Keep Up Work, Don't Cram, Students Say As They Plan to Stay Up All Night Studying

(Continued from Page 1)

"But then I usually stay up all night cramming at the end of each term," confessed John Landgren, a senior from Byrons, Ill., majoring in management. "I always wait until the last minute and then I read my notes the night before," says Wendell Green. a Highland Park senior in management. "It is hard to arrange my time. With me, procrastination and college are complimentary." "I usually intend to review all the courses as I go along, but I usually end up cramming for each final the night before," said Roger Turner, a senior from Kaskaskoa who majors in advertising. "There are too many final exams too short a time to prepare for all of them adequately," he added.

So, out with the books, into the fire with our notes, and let the parties begin and we'll all flunk out together.

Edward J. Schmidlein

Prof. Schmidlein Makes Hole-in-One

Edward J. Schmidlein, professor of accounting, made a hole-in-one while playing golf last weekend. He scored the ace Friday on the fifth hole at the Jackson Country Club. "I play once or twice a week," says Schmidlein, "but I'm not a very good golfer." Even with the hole-in-one, I say Schmidlein, "I'm not a very good golfer."

Last-minute studying for finals may be frowned upon, but for some reason I end up cramming at the end of each term," confessed John Landgren, a senior from Byrons, Ill., majoring in management. "I always wait until the last minute and then I read my notes the night before," says Wendell Green, a Highland Park senior in management. "It is hard to arrange my time. With me, procrastination and college are complimentary." "I usually intend to review all the courses as I go along, but I usually end up cramming for each final the night before," said Roger Turner, a senior from Kaskaskoa who majors in advertising. "There are too many final exams too short a time to prepare for all of them adequately," he added. So, out with the books, into the fire with our notes, and let the parties begin and we'll all flunk out together.

Phoeasnt Hunting

To Start Nov. 14

In 12 State Areas

Pheasant hunting on 12 of the state's conservation management areas will be permitted from Nov. 14 through Dec. 20. Hours will be from 8 a.m. to 4 p.m., CST. This does not apply to the seven public pheasant hunting areas where permits are required.

The 12 conservation areas are in Hamilton, Randolph, Saline, Washington, Wayne, Douglas, Jasper, Lawrence, Decatur and Stephen A. Forbes State Parks.

Students Prefer 8-Week Semester

(Continued from Page 1)

for summer employment or vacation, Olmer said. Linda Burde offered these thoughts: "I like the eight-week session better because you can get out earlier and can earn more if you need the money. The main advantage of the eight-week quarter is the long time. I think 50 minutes in a class is too little time for a good instructor to say everything." But Jesse Perkins likes the 11-week session better. She said she has this opinion for several reasons, "but mainly I think you are able to study the course better—you don't have to cram as much into a shorter time." In addition, the longer quarter enables the student to get through school faster.

In a following story, these and other SIU students will express views on the four-semester system, versus the new eight-week system.

Angel Flight Asked To Contact Officer

All members of Angel Flight on campus this summer are asked to contact the executive officer with any inquiries. Jane Dougherty, executive officer, asked the Angel Flight members to call her as soon as possible. She gave the Flight members to call her at 3-2891 from 8 a.m. to 4 p.m., and at 5:30 A.M. to 9 p.m.
