Police clear fire lanes; tow cars at Lewis Park

By Steve Lambert
Staff Writer

One month after the city authorized police to remove cars from fire lanes at Lewis Park Apartments, those lanes have been cleared. Police said they received a request from Lewis Park Monday evening to tow cars parked in the lanes. By midnight, eight cars had been towed.

The first time police have cleared the lanes since they were authorized to do so.

Under a contract approved by the City Council Jan. 18, police must tow or issue tickets to cars parked in the fire lanes when requested to do so by the Lewis Park management. Police would have made a call.

Before Monday, police had not received such a request. Sgt. Jim Peterson said. As a result, no cars had been towed.

Linda Zemba, Lewis Park manager, would not say Tuesday why requests had not been made before. She reiterated a statement Monday by saying she will not discuss the situations with the press.

The lanes are located in the apartments' exit and entrance. Parallel parking is allowed on one side of the exit and entrance, immediately adjacent to the traffic lane.

Some residents, however, have been parking in the fire lanes, making it nearly impossible for emergency vehicles to pass.

Meanwhile, Carbondale's superintendent of streets says he was mistaken Tuesday when he said his department had received a request from Lewis Park to install permanent fire lane signs.

Harold Hill, the superintendent, said the City Council may not have authorized the permanent fire lane signs.

State police escort coal shipments

By John Jashan
Staff Writer

Numerous threats to truckers hauling coal has prompted the Illinois State police to offer an escort service, Sgt. Robert Brandt said.

A central communication network has been set up in Springfield to coordinate the escort plan. Brandt said, "The coal companies call companies and alert us that a shipment is coming and we arrange for a squad car to meet the truck."

Although mass confrontations between miners and police in Illinois have occurred, no one has been hurt. Brandt said.

Capt. Joseph Ginter, head of the state police DuQuoin district said, "Hopefully a mutual respect between the miners and police will prevent anyone from being hurt.

Experts say the coal strike is not seriously threatening the national economy, but if it lasts much longer it could cause some short-term damage to employment and production figures. See story on page 19.

The last time police escorted trucks was Sunday. Ginter said. The trucks were hauling coal from Kentucky to Springfield and the drivers were being threatened over the C.B. radio. "The squad cars were right there with the trucks," he added.

Brandt said after the trucks delivered their coal at a Springfield power plant, a group of about 200 to 300 miners prevented the trucks from leaving. After the police talked to the union leaders the trucks were allowed to leave.

Two guns were confiscated from one of the truckers. "We're not tolerating anything from guns and knives," Brandt said. He added that police have no way of telling how many truckers are carrying guns, but that all illegal weapons would be confiscated.

The worst confrontation between miners and police was at the Coke coal terminal in Metropolis. Brandt said. A group of several hundred miners stormed the terminal on Dec. 14 and caused about $40,000 damage to the facility.

The American Electric Power and Pan handle Company has since filed suit in Massac County Circuit Court. The company is seeking $25 million in damages from United Mine Workers International UMW District 12.

Police create mediating group to debate on-the-job complaints

By Debbie Thorsen
Staff Writer

University Police lieutenants and captains have formed a professional organization that will meet with University officials about job-related matters.

The group, named the Police Officer IV and V Association, decided also to join the Illinois Education Association (IEA), the bargaining agent for the 661 civil service workers organized by the recent collective bargaining election.

Gus says the apartment complex name should be changed to Lewis-watch-where-you-Park.

Kennedy trial date set

By Ron Koehler
Staff Writer

George Kennedy, former Carbondale police chief, is scheduled to be tried in the Jackson County courthouse for theft and obstruction of justice.

Kennedy resigned voluntarily Feb. 17, 1977, during a state police investigation of alleged irregularities in the Carbondale Police Department.

He is scheduled to be tried by Judge Richard Richman in a jury trial on theft charges of theft of more than $150 and obstruction of justice.

The charges stem from the alleged mishandling of $1,800 which was turned over to Kennedy by a detective as evidence in an unsolved burglary.

The detective, Ralph Brandon, had received $1,800 from an anonymous source who claimed it was money from a Carbondale grocery store burglary.

Brandon photocopied the money before he turned it over to Kennedy. The photocopies of the bills were found in Brandon's home during an investigation of his suicide on Jan. 17, 1977.

Kennedy is charged with receiving, the $1,800 from a police evidence locker between Oct. 17, 1974 and Jan. 26, 1977. He is charged with obstruction of justice for replacing the money and for giving false information to his superiors.

Kennedy told nonsequitur, a Southern Illinois news magazine, that he replaced the money because he feared the state police investigators would conclude that he had stolen the money.

The money found in the evidence locker during the investigation did not match the photocopies found in Bran- don's home, police said.

Kennedy pleaded innocent to the charges on April 7, the day they were handed down from the grand jury. He was released under $3,000 bond.

He will be represented by Carbondale lawyer Paul Schoen. Kennedy has been living in Tulsa, Okla. since his resignation.
**NBC criticized for violent programs**

(Chicago AP) - The NBC television network, placing third in the ratings that season, was criticized by the national PTA Wednesday for broadening its programing on TV.

The Parent-Teacher Association based its criticism on the findings of a 34-state study of school airtime and work programs between Oct 22 and Dec. 2, 1977, and picked the ones they considered the worst, and most violent.

In a letter to PTA President Grace Baisinger called "a report card to the networks," NBC was criticized for having networks containing unnecessary or 'gloating,' language and networks containing unnecessary or violent language.

NBC offered five of the PTA's 10 most violent shows. ABC three, and CBS two. All three networks declined immediate comment.

Spinks becomes world heavyweight champ

LAS VEGAS, Nev. (AP) - Leon Spinks scored a shocking upset Wednesday night with a split-decision victory over Muhammad Ali to become the new world heavyweight champ. Spinks, in his 26th pro fight against the two-time champ, knocked out the defending champion in the 12th round.

**ABA rules on Law School, but verdict still undisclosed**

By Pam Bailey

Staff Writer

The American Bar Association's (ABA) accreditation committee met over the weekend to decide the fate of the School of Law, but a ruling was not due until today in public.

James White, ABA legal counsel, said he would mail the committee's decision to President Warren Brandt and Frank Horton, vice president for academic planning and research, Wednesday.

White declined to release the committee's decision before all parties involved are informed.

Because of the University's decision to disregard the dean's recommendation and deny promotions to four members of the Law School faculty, the School of Law's case is in danger, White said. The committee's recommendation would mean incoming law students would not be eligible to take the bar exam.

After an ABA inspector examined SIU in August for violations of the ABA standards for legal education, the administration decided to promote Taylor Martin to associate professor and Dennis Womick to assistant professor.

Bradt said the School of Law had adopted new guidelines and the two were now qualified for promotion. However, the other two faculty members were not mentioned.

Andrew Orejeme, associate professor, left SIU in January, T. Richard Mayer, associate professor, has announced his intention to leave at the end of the school year.

While White declined to comment on what the resolution said, Hiram Lesar, dean of the Law School, said he expects the school to lose its accreditation if construction is not begun this year.

The buildings currently in use are too small to house adequate facilities, Lesar said.

Illinois Board of Higher Education has adopted the new School of Law Fifth on its list of 120 projects for funding by the state.

**Brandt: JRB should follow guidelines**

By Debbie Thornburgh

Staff Writer

The Illinois Board Review Board (JRB) should stay within guidelines set by the University in deciding on promotions for members of the law school faculty, said Warren Brandt.

"The role of the faculty, however," he said, "is that they limit a possibility in the future of the school generally.

White declined to comment on what the resolution said. Hiram Lesar, dean of the Law School, said he expects the school to lose its accreditation if construction is not begun.

The buildings currently in use are too small to house adequate facilities, Lesar said.

Illinois Board of Higher Education has adopted the new School of Law Fifth on its list of 120 projects for funding by the state.

**Bakalis to begin campaign at SIU**

It's election year, and politicians are on the four corners. Mike Bakalis, Illinois comptroller, and candidate list for a general election in November, Bakalis has consistently been an out spoken critic of the fiscal policies of Gov. Thompson and recently blasted the recommendations to raise the taxes of Illinois legislators by 50 percent.

Bakalis will be on campus to address a local government seminar at 8:30 a.m. in the Student Center. He will be followed by a public for a general question and answer session at 10 a.m. in the Ohio Room and will spend the rest of the day at local government classes in Jenner Hall at 11:00.

**S-Senate passes new policy guiding faculty use of library**

The Student Senate unanimously passed a resolution Wednesday night stating that the faculty and CRS in the college library are to be much more widely used and that the future checker must be made available immediately. The committee has been meeting with union bargainers.

The White House said the first session would begin at 8 p.m. Wednesday. Industry officials who first set deadline as 8 a.m. Wednesday, have raised the deadline.

**Womick to avoid Virginia Islands trips after accident**

By Jean Ness

Staff Writer

Bradley University alumnus and his wife, John Womick and wife, were not able to complete the city's business that took him to the islands a week ago. Womick and seven other Southern Illinois residents, escaped injury Feb. 6 when the plane they were on crashed in the British Virgin Islands.

On the chartered plane were Womick; attorney Donald Mitchell of Carlyle; John and his wife, Jane, whose son, attorney James Bleyer was her, Womick, and son of attorney James Bleyer, and his wife, Lyndall, and his wife, Cathy, and a court reporter from St. Thomas Island. Womick's wife, Jane, was not on the plane.

Womick, who returned to Carbondale Saturday morning, said of the accident, "It wasn't a 'wreck', he explained. "It wasn't all that bad," Womick, who was only bruised and a scratching from the crash, said. "But I certainly in a hurry and I wouldn't want to go on that trip again."

Injuries to other passengers were minor. Injuries to the plane and passengers in the plane. All have returned to Carbondale and Carbondale and Memorial Hospital. Womick's wife, Jane, was not on the plane.

Womick described his injuries as "nothing more than the accident happened," He added, "The plane landed too short in the middle of the runway. It ran off the runway into the hillside." The four attorneys were accompanied by their wives because the trip was also planned as a vacation.

The attorneys traveled to the Virginia Islands to take written testimony from a U.S. merchant vessel in connection with an $8 million suit by another vessel and a hospital.

Because of the accident, the testimony could not be completed. Womick said it was too late to bring the story to the conclusion it should have been and the suit would be a disaster in court.
Adamczyk: Inflation forces fee hike

By Michele Ranford
Staff Writer

A resolution calling for a $1.95 increase in the activity fee passed in a five-hour emergency Student Senate meeting Feb. 2, but it requires Board of Trustees approval before going into effect.

The dispute over the fee hike began in December, 1977, when Student President Dennis Adamczyk announced he would seek the increase. He cited increased demands on the fee, which generated about $250,000 last year, as the reason the increase was needed.

Students now pay a $3.55 activity fee per semester. The proposed increase would raise that to $7.70, which Adamczyk said would bring the total amount of money available to student groups to about $380,000.

In the past, according to Adamczyk, the money requested has exceeded the amount available. However, the number of recognized student groups has been increasing at the rate of 15 per year.

That, coupled with inflationary costs, the raise in the minimum wage, and changes in the copyright law, make the increase even more necessary, according to senators who voted for the increase.

Most of the money allocated for programming, and potential cuts were a concern of senators who favored the increase.

Josh Grier, Student Government Activities Council (SGAC) chairman, said that without the increase the program would have to be cut significantly.

SGAC receives the largest amount of money from the activity fee. The group received $74,138 for 1977-78, including concerts, video presentation, and plans homecoming, orientation, freshman school and parent-day activities.

Grier said the cost of renting films is up 25 percent from last year. SGAC has raised the price of films from $50 cents to $1 to avoid going into debt this year. Grier added that several other SGAC committees have had to cut back programming this year because of financial problems.

Grier stressed that no mismanagement of funds has taken place within SGAC.

He said some groups have done their best with the money, they have. There has been no misallocation of funds," he said.

Senators also expressed concern that special interest groups would lose funding if the fee was not increased.

Eugene Agee, assistant coordinator for Black Affairs Council (BAC), said the BAC programs not only for blacks, but also to help other become "part of the minority experience."

Agee said the group also gives money to small special interest groups such as the Feminist Action Coalition.

But he warned that BAC would probably be among the first to receive a slash in funds.

The Student Senate passed the fee hike on a vote of 9-2 for 31 persons in various student organizations. Because of the increase in the minimum wage from $2.30 to $2.65, the Senate has had to allocate $4,526.20 to increase those wages.

The minimum wage will increase to $3.10 on Jan, 1, 1979, so an additional $9,613.80 must be subtracted from next year's budget.

An unknown factor causing potential cost increases is the copyright law. Nancy Hunter, Faker, director of student activities, estimates the minimum cost at $300.00.

Horton to refuse Boise presidency

If offered the presidency of Boise State University in Idaho, Frank Horton, vice president for academic affairs and research, will turn it down.

Horton said Wednesdays he believed the opportunity was not as attractive at SIU, and he had not really given the position much thought, changing much serious consideration.

One of five finalists being considered for the job at Boise State, he said he was not interested in that position, received a salary of $25,000, about $12,000 less than what he is currently receiving.

While Boise State operates a graduate school, it does not have a Ph.D. programs or professional schools.

Liberal Arts to require foreign language classes

By Jan Wolf
Student Writer

Students entering the College of Liberal Arts after the summer semester of 1978 will be required to take at least six semester hours of a foreign language to graduate, says James Fett, assistant dean for the Department of English.

However, students who have at least two years of high school or junior college can take a proficiency test to fulfill the requirement, he said.

For the past four years, the academic requirements for Liberal Arts majors have been loosely structured, allowing students to take a combination of humanities, math, English or foreign language courses, according to Charles Speck, assistant professor in the Department of English.

A student did not need a foreign language to graduate, he said.

Donald Brehm, associate professor in English, said the reinstatement of the requirement is an effort to move to a more traditional education.

College graduates in the past have been exposed to too little because of a recent trend toward "contemporary" courses, according to Brehm, who is chairman of the Academic Policies Committee of the Liberal Arts Council which voted to re-establish the requirement.

A traditional education included required courses in literature, foreign languages and history. The people that are doing the hiring now have that kind of educational background, he said.

"Some traditional courses are too difficult and not related to their career goals, according to Brehm. "Sure, foreign languages are difficult, but however said a college education was supposed to be easy he said.

"Employers want to see something on a persons transcript that indicates he can hard work," he added.

Brehm said. He added that the move towards less stringent requirements began when college enrollment dropped off in the late 60s in an effort to bring more students to SIU.

Brehm is noting that the History Department keeps contact with many of its graduates, said. "There's not one single graduate who's not told me he's glad he had taken a foreign language."

The Jackson County Health Department will conduct regular inspections of University-operated food services under an agreement reached Tuesday, Clarence Dougherty, campus services director, said.

The contract, which covers the period from July 1977 to June 1978, is expected to be signed by President Warren Bran, in the next few days.

The frequency of inspections has yet to be decided by the health department and the University's pollution control department. Quarterly inspections have been proposed in the past.

Negotiations, which have been going on for the past two years, were delayed by a jurisdictional dispute.

Jackson County maintained that it had jurisdiction over the University.

An unknown factor is the cost of the inspections, which could run as high as $2,000.00 per month.

Museum should broaden exhibits policy

The University’s search for a new museum director was made easier in an open-ended manner to examine the scope and mission of University Museum.

In the past, the Department of Anthropology has exerted undue influence over museum affairs. As a result, museum director Harry Pharoah, who had been in charge of the museum at times, has catered almost exclusively to ethnological exhibits, ignoring materials and exhibits from other disciplines. The museum’s association with the Anthropology department, however, is known to have a long-standing history. In the case of Pharoah, a professor of anthropology, was lured as museum director and to help build the department. As the department grew in influence over the museum, the museum later developed a research department with six staff members, all of whom were anthropology professors.

Although most museums do have research departments, those that do suffer from technical staff, not enough to provide a fair and balanced program. The University Museum supported a research staff comprised entirely of people with anthropological backgrounds because it was convenient and consequently a lop-sided exhibits program developed.

Naturally, a museum must rely to a great extent on its own collections, which may be stronger in some areas than in others. And there are certain departments which do not particularly like their materials to be displayed, such as English and philosophy. But the University and the new director should encourage participation from all departments and encourage those with ties to the museum.

Frank Martin, vice-president for academic affairs and research, removed this research department last summer and suggested new guidelines for the museum. These guidelines urge the museum to become more reflective of the local region in its exhibits, and to become more involved in area service projects, such as the School Loan Program which lends museum pieces to area schools.

These guidelines also should include procedures for guaranteeing that all University departments are fairly represented in University museum exhibits. The dismantling of the museum’s research department has eliminated much of the extreme influence that the Anthropology Department. With the hiring of a new director at hand, the museum should redefine its present policies to ensure a broad spectrum of exhibits.

Marston mess hurts Carter

By James J. Kilpatrick

For the past couple of weeks, politicians and newsmen have been treading across the Washington tundra, picking up pieces of the Marston fallout. This is highly radioactive stuff, likely to radiate for the next three years. The incident suggests some further comment.

David Marston’s fall has his Pennsylvania orbit created problems for Jimmy Carter and Attorney General Griffin Bell more serious than most observers had realized. What at first had seemed little more than a minor political contretemps—the firing of a Republican U.S. attorney—has turned into a major uproar. In these few weeks, we have witnessed an upward escalation of the administration’s misrepresentations. In the press these have progressed from fibs to lies to possible perjury. Thus far, Mr. Carter has gotten off lightly; but if he thinks he’s home free, he’s mistaken.

For the past year, Mr. Carter has been dogged by two traits he cannot escape. In presidential terms, he is possessed of too much idealism, and too little experience. These shortcomings led him to a political statement in June of 1978 before the Democratic Platform Committee. All his judges and prosecutors should be appointed strictly on the basis of merit without any consideration of political aspects or influence.

In a dream world, this policy might be desirable—though I doubt it greatly. In the real world, such a policy is impossible.

In the light of the Marston affair and its related developments, we are left with these alternative conclusions: Mr. Carter is duplicitous, or Mr. Carter is naive. No, the answer is neither. To put the matter gently, Mr. Carter was only fooling in June of 1978, or Mr. Carter was exhibiting the kind of thoughtless inexperience that is not in his character. My president is not a liar. I vote for innocence.

It is not so easy to extend as charitable a view to Judge Bell in the next event. Mr. Carter won his election in November of 1978 and he is the only reason that the Pharoah viewed their works and said, “Mr. Carter ought to be man square,” that Moses bound him, and the people of Egypt shall admire.

The Pharoah Society, however, is the first to identify with the material feelings. Its symbol is a mummified bust raised in what it politely describes as “half a victory sign.” Its leaders feel strongly that this is an honor.

Fee hike opponents offered no solutions

After reading Mr. Kibler’s and Mr. Figgin’s letters to the editor, I felt a rebuttal was necessary. The emergency senate meeting and memorandums were sent to all senators. Both proponents of and opponents to the student activity fee increase prepared agenda. However, the proponents of the fee increase did their homework and brought the major programming benefits to the emergency meeting to point out the ramifications of no fee increase. The opponents came to the meeting unprepared and offered no logical solutions.

Mr. Kibler feels the student body is against the fee increase. Obviously, Mr. Kibler has not informed himself of the consequences about the information he holds. Several reasons prompted 18 senators to vote for the fee increase.

Without an increase in the student activity fee, the Fee Allocations Board will have $30,000 less to allocate in 1977-78 fiscal year than they had to allocate in 1977-78. All organizations—large and small—will have their budgets reduced drastically, and this will mean less programming and more out-of-the-pocket costs for the student body.

The smaller organizations will be hardest hit because there will be less money in the SOAF account to pay for speakers and honoraria, registration fees, clinics and any other programming. Second, all increases in the costs of programming over the past several years will remain. Therefore, Mr. Kibler’s fee increase will mean increased programming costs at least $3,000 a year.

Fourth, the new maximum fee of $6 will mean no increase for those students who have already paid the SOAF account by check. Fifth, some organizations on BEQD and ISSC will suffer from no fee increase because these students will be burdened with extra out-of-the-pocket costs; however, if the fee is increased, the BEQD and ISSC will pick up the extra costs. Mr. Kibler ignores these facts and offers no suitable solution.

Mr. Figgin’s naïve and unpresentable senator from the West Side, hopes to win the presidency by discrediting two major political parties. First, Action恩joy is responsible for the student body’s sport resolution. Many senators—Action, EAP and other names—felt the resolution should have been referred to the Student Services committee. There were hearings and further investigation which should have been carried out. The two-hour testimony by Vice President Mace and Dr. West was only a superficial view of the inequalities between the men’s and women’s athletics programs. Mr. Figgin’s resolution, like much of his other legislation, was too ambiguous and too loosely worded to have any real impact on the women’s athletics program.

His remarks about the fee increase and about Student Body President Dennis Adamczyk are ridiculous. In the final moments of discussion at the emergency senate meeting, Figgina supported the fee increase, but voted against it in a roll call vote.

Mr. Adamczyk’s salary was raised $600 because the Fee Allocations Board in spring 1977 reduced it by $600. The raise was to bring him salary equal to former student body presidents.

I am deeply disappointed in my two colleagues. As for Mr. Kibler, his actions are well-meaning, but misguided; as for Mr. Figgin’s actions are ill-managed and cannot be excused.

Kevin K. Wright
Chairman, Fee Allocations board
Student Senator, West Side

Critics of senate fee increase vote should look at facts

This letter is in reference to the bad press that the Student Senate is receiving from the Daily Egyptian and the Daily News. The student senator, and very aware of the attitude and ability that the studennt senators do as a whole, yet as a whole, Mr. Figgin’s, exercises in accomplishing what we are asked to do by the students we represent. I am angered in being called a disorganized student as he has done in his speeches. To regard the proposed $1.35 fee increase considered at an absolute necessity and a waste of time. If I were the point of increase. However, if the same emergency senate meeting were held today, I would vote for it. My reasons for supporting it are very valid.

First of all, I am a new senator and was ignorant of the facts that surrounded the proposed fee increase. At the time of the vote, I voted “no” because I felt I didn’t know enough facts to make a responsible judgment in support of the increase when student’s money was at stake.

However, Dr. Brandt is evident. The number of student organizations has increased drastically while the activity fee has remained constant for many years. The Student Senate has been given the responsibility of the fee in order to ensure that the fee will be used to the students’ benefit. This is necessary for the students to examine the situation carefully before making a final judgment. I also urge the outspoken critics of the Student Senate to not be as foolish as I was and exam the facts more closely.

Kellie J. Watts
West Side Senator
Sophomore, Political Science

Many questions left unanswered in golf course issue

What do Sherry Urban, Mark Taylor and Robert (castado have in common? They all support the Senate’s new letter to the editor, unusual proposal golf course. What else do they have in common? They all talk about being their university and not Dr. Brandt’s. How the administration is trying to run their lives, and why do myself and the Rec Building are more justifiable than the golf course?

These opinions are all valid and certainly a sign that there is a decrease in student apathy; however, there are also important questions that need to be answered.

1. Why didn’t the Board of Trustees inform the students of this golf course before December?
2. Does this board realize that the golf course will bring more automobile traffic to SIU, which in turn serve to increase the present parking and possible problems of course?
3. Why didn’t Betsy Byrnes, the student trustee, inform us of the proposed facts for golf course?
4. Why don’t you have our opinion? Why don’t we ever hear from her?
5. In the Daily Egyptian, Harris Rowe, Board of Trustees chairman, indicated that students had no right to know what was being planned. Why not?
6. Has an Environmental Impact Statement been filed with regard to the proposed area for use? If so, why hasn’t the board published the findings? If not, why not?
7. How can the students be assured that the “need” for a golf course won’t lead to the “need” for an arena for women’s PE, a hockey stadium, or any other recreational facility that SUU lacks?
8. How come the final approval of the golf course by the board was taken place in January next month and not here? I’m sure that it is of more concern to us than to the SUU-E community.

When these questions are answered, and answered satisfactorily, then the Board of Trustees can think about a golf course. They should consider student opinion from now on and remember that they are trustees, not a group of real estate agents.

Peter Alexander
Junior, Political Science

Sober sport should be added as 12th varsity sport

Now that SIU has to add one more sport to its varsity football division 1A, the obvious choice for SIU’s 12th varsity sport should be soccer. SIU is playing against schools in the United States, and as the United States is now catching up with the rest of the world in soccer, SIU should keep up with the rest of the universities in the United States.

SIU in just a few years could have a great soccer team which could bring recognition to this school. The groundwork for such a team has already been laid. The soccer team, established by the SUU soccer club. In recent years, the club has not lost more than one game per season, playing against such schools as the University of Illinois, Illinois State, Indiana State and Southeast Missouri.

I urge the student body to begin a good soccer program, and with some good recruiting we could be even better than we have been in the past. We could threaten our sister-school SUUE as the best soccer school in Illinois, which attains the best in the United States.

Children’s books should portray positive aspects

We want to thank you for printing the news article “Children’s books depict reality.” We understand that children’s books portray characters that are living in an unreal world from which adults disappear” and have “happily-ever-after endings.” These books are not necessary. The books should be honest, open, frank and to mirror reality, but child abuse is broken homes, poverty, alcoholism and simple irresponsibility brought to a child through a child’s book only add to the murder and rape problem.

If handled in an unkind and negative fashion, a child’s book will only add to the hurt and anger the child experiences in real life. Instead of dwelling on all the unhappiness of life, a positive realistic look at the good things in life, because they do exist. They are the situations and the beauty around us that the child can experience would be a much better alternative for us. In our view that children’s books can uplift the child and lift his lofty, hurt heart above all the muck of this world and what is real.

Opposition to fee raise by ex-WIDB reporter unfair to student station

I am writing in reply to the letter submitted by Ken Anderson, vice-president of the Thompson Point Executive Council. It seems that Anderson thinks. that the money raised from the activity fee is being wasted by organizations who benefit from the money raised by student stations. This student organization was organized in 1960 to serve the public in our case, the student organization’s purpose is wise, necessary and interest. Also, it serves as a working ground for many students who would like to get into the electronic media once they graduate. It is quite interesting that Anderson once worked at WIDB in the sports department. WIDB does not need to harm anyone. It is the student body vehicle for voice and information, something that Anderson is currently taking away from WIDB. I want to thank WIDB ever again either by working here or using WIDB as a reference. Because I sure won’t clean him as a former member.

Scott Simon
WIDB Sports Director

Editor’s note: This letter was signed by four other persons.

CPPC offers workshops to help students

By Becky Harvey

Carrer choices: resumes, government jobs, job hunting. Students with interest in one or more of these areas can attend workshops offered by the Career Planning and Placement center.

"We have been planning these workshops for a while now," said Helena Rudnick, placement consultant. "We think it will be useful to students to learn how to prepare their resumes and how to search for government jobs." These workshops will be at 11 a.m. and 2 p.m. Wednesdays in Woody Hall. They will cover the purpose of the workshops, what should be included in a resume, and basics of government employment.

The workshops are free and no charge to the student. Students who are interested in government employment can attend the workshops which will be held in Veterans Memorial Hall.

The job-hunting workshop will be held noon to 1 p.m. in Woody Hall. The purpose of the workshop is to review what should be on the resume, how to make a resume, and how to search for government jobs. The purpose of the workshop will be "to make sure students are prepared for the job market in a government job." The workshop will be held in Woody Hall.

The workshops cover the various practical aspects of applying for a government job. Ms. Rudnick is in charge of this workshop.

The job-hunting workshop is an all-day workshop to be held March 31. The site for the workshop hasn't been announced yet.

"This is a kind of a situation where they basically don't quite know what to do, so they take the transmission between where they are and a career and get it together," said Ms. Rudnick.

At the workshop Ms. Rudnick said the students will be taught the process of how to make a resume, how to search for government jobs, and what to expect when they visit the job market.

"We're going to begin the workshop with a Roman and to discuss the process of what a Roman is," said Ms. Rudnick.

Talented facilitators will be at each workshop and students will spend most of the day in small group activities. A film and presentation of interviewing skills and job experience are scheduled for the morning hours. Paul Henry, career counselor, is in charge of this workshop.

U.S. calls for new regulations, offers help in satellite mishaps

UNITED NATIONS (AP) — The United States calls on the United Nations to adopt international regulations to prevent accidents involving nuclear-powered space satellites and offered to help countries affected by such mishaps.

Stephen E. Doyle, a U.S. space expert, also announced that U.S. officials say there are between one and four million people not vaccinated against diseases.

In an address to the general assembly, the officials say.

The 47-nation outer space scientific sub-committee is considering what international measures should be taken, including the possibility of a special conference early next year on the role of the international community in preventing further accidents.

The U.S. has expressed concern about the increasing number of accidents involving nuclear-powered satellites, which some experts believe could pose a threat to health and safety if not controlled.

The U.S. has proposed measures that could include mandatory notification of any satellite launches, regular inspections of satellite systems, and the establishment of a satellite registry to track all launches and re-entries.

The U.S. has also offered to help countries affected by satellite mishaps, including providing technical assistance and sharing best practices.

Ira H. Link, deputy director of international affairs of the National Aeronautics and Space Administration, proposed a binding multilateral agreement based on these elements.

Ira H. Link, deputy director of international affairs of the National Aeronautics and Space Administration, proposed a binding multilateral agreement based on these elements.

— Setting of standards for nuclear power sources in space and the publication of a safety analysis statement by the launching nation with an opportunity for other countries to comment on it.

— Notice by the launching state to the United Nations of the launching of a nuclear power source. A confidential notice by that country to affected countries of the re-entry of such an object, and notice by any state with relevant information regarding impact of a nuclear power source on the territory of other nations.

— Provisional assistance in locating and cleaning up debris and treating affected persons, including the use of existing international organizations to coordinate assistance efforts and the handling of costs of search and cleanup.

U.S. officials said the United States would offer to help in the search and cleanup of radioactive debris from re-entering spacecraft belonging to any country and in the emergency treatment of injured persons.

IHEW plans drive to immunize young against diseases

WASHINGTON (AP) — The Department of Health, Education, and Welfare Thursday launched a campaign to protect some 30 million children in the U.S. who are not immunized against one or more preventable diseases.

The agency is seeking to draw the attention of parents to the urgency of the problem as well as promoting means for organizing local immunization programs for immunizations.

The percentage of children aged one to four who were fully vaccinated against polio in 1976, the agency said.

The steady decline in the number of large outbreaks reported has led to over-confidence, officials say. They estimate there are 18 million children under age 14 who could get polio.

In addition, preliminary figures for 1978 show 283,725 cases of measles, 12,400 more than the year before and double the number reported in 1975. New health officials say that short of death, which occurs in one of every 1,000 cases, measles can lead to seizures, brain damage and blindness.

The record on diphtheria, pertussis (whooping cough), and tetanus (lockjaw) is better, officials said. But even in these years, 1868 cases of diphtheria in 1976 and 102 cases of lockjaw in 1975, 5 of which were fatal.

Activities

Health Products Fair, 8 a.m. to 4 p.m., Student Center Second Floor. Inner Circle Council meeting, 7 p.m. to 11 p.m., Student Center Main Hall. Roger Farr lecture, 7 p.m., Necker 107.

Texas oilman is the owner of the team that Kristofferson and Reynolds play for.

One of "Semi-Tough" better sequences occurs when Clayburgh and Reynolds both attend a weekend seminar of B.F.T. with about a hundred other people. The movement is a bit more serious than, say, Saturday Night at the Palace or the classic Bong Show. The sequence seems even funnier when the viewer realizes there actually are consciousness raising movements that look like that. A few other consciousness raising movements are also hilariously portrayed in the film. Reynolds even discovers that the power of the pyramid can't necessarily improve sexual performance. "Semi-Tough" read: "It's the world's greatest game." Some people get the false impression that this "greatest game" in "Semi-Tough" is sex. That attitude is understandable since the movie is a product of a center around sex appeal.

However, after seeing it, it is clear that sex is not the dominant theme. In fact, compared to the book, the sexual activity in the movie is given greater treatment. For instance, Reynolds sleeps with only two women—an overweight flat and the husky leader of a crack church choir, while Kristofferson's sexual diet consists of going to bed with Clayburgh twice.

The worldly greatest game—then, turns out to be how we cope with life and love in the '70's. And director Michael Ritchie, the voice near San Francisco is a bit of the consciousness movement and who has read semi-Tough, an consciousness movement is a big part of coping with modern life.

have a good time...

SIU ARENA
The day after Emerson, Lake and Palmer were dubbed "boredom arena managers," the mayor called for a "sell-out." He was referring to the arrival at the arena of the Harlem Globetrotters, who will perform at 7:30 p.m. March 9 in the Arena.

The response has been overwhelming, and the tickets have not yet gone on sale, Pratt said. The Globetrotters have had a record of selling out whenever they play the arena.

The last time the players of the court played the Arena was ten years ago. Pratt said that the attendance in the team has been huge and unexpected. He also said that many seats are still available.

Tickets are $4.85 and $5.50 with a $1 discount for SIU students and children 12 and under. They will go on sale Feb. 18 at the SIU Arena Special Events Ticket Office, the Student Center Ticket Office and the JC Penny store in Carbondale.

Billed as the "world's greatest family entertainment," the Harlem Globetrotters have maintained a "G" rating in what is fast become an "R" rated world.

The basketball team is more than just a basketball team; there are as theatrical as a touring company of actors, and as comical as a circus of clowns who depend on gimmicks for laughs; such as throwing a pill of confetti into a crowd like water.

Some of the more famous Globetrotters include Curly Neal and Meadowbrook Lois. Famous past Globetrotters include Wilt Chamberlain and Connie Hawkins.

Some of the famous people they've played before include Queen Elizabeth II and the more recent Pope of the Catholic Church, Pope Paul VI. Pope John XXIII, and Pope Paul VI.

Champions of comedy, the Trotters have a won't record that looks like something out of Ripley's Believe It Or Not. It's called: "Beast Boy's Got No Brains."

They have their traditional opponents, the New Jersey Nets. It is interesting to note the outcome of the game. Pratt said. Also interesting is the spec-tacular family variety show that will be featured during half-time.

The story behind the Globetrotters was told this way: Playing every night began to take its toll, and it soon became apparent something had to be done to give the players a rest.

"One night, one of the players was throwing a ball while the other players stood by and watched. Then gave the ball a rest while on the court. To the amazement of the Globetrotters, the fans stood and cheered.

"Trotter center Len Jackson took the ball, and, leaping into the air, put the ball into the net, to the amazement of the crowd. Pratt said.

"The fans loved it! From then on, the crowds made the Trotters work on the fancy ball-handling and trick shot artistry in every game.

On the same day, Mr. P. Larson announced that a new office of the Illinois Department of Natural Resources would be opened at the Illinois State Fair and that the office would be responsible for the protection of the state's natural resources.

Mystery Truckload Sale

A storm on March 15 hit Carbondale, and Pratt said that the situation at the Globe Trotters was gone. He said that they play, it continued.

Magic of big rock’n’roll show, music of rampant technology

By Dave Erickson
Entertainment Editor

A capacity crowd was entranced by a swirling triple at the Arena Tuesday night. The stage setup of Emerson, Lake and Palmer enabled them to affirm the stories about pyramidal power as the trio made a show of highly-focused energy that owed as much to P.T. Barnum as it did to classical composers Mussorgsky and Copland.

Leading off with what sounded like a synthesized version of the Peter Gunn theme, Keith Emerson proceeded into their hyperbolic rendition of Aaron Copland’s “Old American Sampler.” The use of a portable fire-breathing keyboard during the song through the first real raise of the 8,000-member audience.

His playing on the next song, “Take a P'lib” featured Emerson on a 36-string soundboard grand piano which seemingly popped out of nowhere. In the midst of a grandiose sound like this one, it seems ludicrous to complain that a piece was done “faster than” or “less than” one usually expects. But these little irritations ruined a fast and good music replacement they.

Emerson proved he could play tastefully subdued when he quietly highlighted Lake’s moody electric guitar and vocal on “Wishing on You.”

At the end of an abbreviated version of Mussorgsky’s “Pictures At An Exhibition,” a gargantuan explosion in front of Emerson’s synthesizer bank left the Arena smelling like Yellowstone Park’s Old Faithful for a brief period while the concert progressed the memory of the Old Faithful splash took on a purgatory meaning.

ELP’s interpretations of selections from eight years of albums showed that, at least in a live setting, their approach to their music has not changed much.

The best variation of their approach to the concert was “Pirates.” During which ELP deployed the tightest group playing on the night. Their carefully controlled dynamics made this song great. Palmer led the way in that area, contrasting high-adrenaline surges on his immense array of drums with unexpected quiet interludes on percussion devices like the “Fath-head.”

Greg Lake, Carl Palmer and Keith Emerson (Staff photos by Marc Galassini)

Palmer sparked throughout the evening, energizing “Tarkus” with a more muscular rock-and-roll beat, replacing the familiar cowed-in terribleness with a rolling flurry of notes.

His drum showpiece, “Tarkus,” was also one of the evening’s musical highlights. After an interesting solo during which Palmer manipulated the variance in pitch between several of his drums, he launched his songs and his whole drum platform spin around. Between the dragon-embazoned t-shirt, Palmer played a set of kettle drums briefly before his platform spun again, encountering the audience with an unexpected barrage of lights, flying saucer style.

By the time “Pirates,” the last song before the encore, began, one might have expected to lay back and just keep the beat. After all, it was a Tuesday night in a little-known portion of a pristine state. But he kept up his same pace, causing heat in the audience who tried to tap along with their toes to develop a severe case of leg- and-ankle cramps. Then Palmer hung together better than many of the other songs ELP performed because Lake and Pete Sinfield’s excellent lyrics required that the pyrotechnics he kept in check. One of Lake’s better voice over the crowd, its melody doesn’t require the overwrought vocal garganities of some of their songs. When his voice sounded a bit too overworked to carry some of the song’s more difficult passages, he moved the problem by enunciating the words in an almost-conversational manner.

Lake’s vocal high point of the evening came during “Lucky Man.” He sang in a raugier, more emotive style than he did on the original recording. His vocal fireworks gave it a more interesting feel than the live-album version had. Lake’s dramatic pauses for a brief second on the last verse were masterful.

A new twist was also added by the phase-shifted jet sound of Lake’s 12. The slight pull effect on this song. His playing was much smoother than it had been on the previous song “C’est La Vie,” during which he flailed by himself. When he stretched white Emerson was playing the accompaniment solo.

Although it probably depends on where one was sitting, it was surprising that Lake’s parts were often buried or muddied, considering the reputation of ELP’s sound system. His bass lines seemed to boom out and then dissipate.

Throughout the night, the musicians seemed intent on constantly referring back to their patented audio landscape. The most interesting artist: William Noel captured officially on the cover of ELP’s “Tarkus” album (created seemingly spawned by a grotesque group of biology and technology habits on the desert of rainbow colors—astro-turf). With the bass more playing off of this instead of formed to foundation, the extended instrumental passages were more hypnotic than melodic.

Five incredibly loud explosions came from the ship of the Arena at the end of “Pirates,” sounding like twelve-cannon cannoneers. The dazed audience took a few moments to realize that this was the “end” of the concert, time to scream and light matches.

An atmosphere of revelry ensued in the opening strains of the ELP version of Aaron Copland’s “Fanfare For The Common Man” were heard.

After the second encore, the aptly titled “Show Me The Way To Go Home,” the band left and a four-inch ELP tape effectively capped one of the finest Arena shows in years.

Private-school students to get aid under proposed tax credit

WASHINGTON (AP) - A proposed education tax credit would provide more federal aid for private-school pupils than for those in public schools, the Department of Health, Education and Welfare said.

"That turns the tradition of support by these United States for public education on its ear," HEW Secretary John Calhoun Jr. told the House Ways and Means Committee.

Calhoun sought support for President Carter's proposal to increase the availability of federal grants to needy college students, especially those from middle-income families, as an alternative to a tuition credit.

While there is considerable support in the House and Senate for a $2,500-a-year tax credit to help offset college costs, backing is growing for a third proposal, a credit of up to $4,000 for parents who pay tuition at the college.

The latter proposal is popular among lawmakers representing large numbers of parents whose children attend parochial schools. But it also raises problems of constitutionality.

WASHINGTON (AP) - More than 2.5 million persons, concerned about possible radiation exposure from nuclear tests, have telephoned the Defense Nuclear Agency to say they were exposed to nuclear tests as far back as the late 1940s.

The agency has been ordered to collect voluntary and to contact veterans of such tests to determine whether they have suffered serious ailments such as leukemia as a result of their exposure to radiation at the tests.

In its statement, the Pentagon said, "The scientific and medical community has not reached agreement on any relationship between these test exposures and incidence of cancer or other maladies.

But it said concern has risen in recent months over low levels of strontium 90 in the tests, suggesting increased risk of leukemia or other cancers in later years of life.

Last week, in Boise, Idaho, 46-year-old Paul Cooper died from leukemia he was claimed was caused by a 1957 atomic explosion he witnessed while in the Army.

The agency last week opened toll-free telephone lines and started calls from men who were present at atmospheric nuclear tests in the Nevada desert and in the Pacific from 1946 and 1955.

Agency officials have estimated that as many as 300,000 military personnel and up to a total of 10 million people, including employees of the old Atomic Energy Commission and others, could have been exposed.

The government's response through the calls to the toll-free number has been much greater than expected and that more telephone lines were installed Monday.

The telephone number is 1-800-236-6060. For persons of Maryland, the number is 301-655-6600.

The results of the nuclear agency's research will be handed to the National Academy of Sciences.

Some working parents eligible for tax refunds

Working parents who earned less than $8,000 last year may apply to be eligible for credits of up to $260 from the government, the Internal Revenue Service district director for Southern Illinois, said.

To qualify for the Earned Income Credit, persons must have had an adjusted gross income of less than $8,000 in 1977, and must have maintained a home for the entire year for a child who was under a full-time student or a disabled dependent.

For eligible persons, the credit is 10 percent of the first $2,000 of earned income, with a maximum credit of $80. The credit is reduced by one dollar for each $10 of earned or adjusted gross income over $2,000, planning out completely at the $8,000 income mark.

The credit can be used to reduce income taxes owed or can be received as a refund where there is a tax liability.

Eligible persons can qualify for the Earned Income Credit even though they may have paid no income tax during the year, but the IRS stressed that they must file a 1977 federal income tax return to get it. The IRS will automatically compute the credit for taxpayers.

Eligible Form 1040 filers must write "EC" and the name of the qualifying child on line 28.
The Botany Club will meet at 7:30 p.m. Thursday in Life Science II Room 450. Jerry Elliston, president of Roadside Naturalists, will give a presentation on medicinal and edible plants found in Southern Illinois.

Three reporters from the Southern Illinoisan will discuss various aspects of newspaper reporting at a meeting of Sigma Delta Chi, the Society of Professional Journalists, at 7:30 p.m. Thursday in Communications Building Room 1244. The meeting is open to anyone interested.

Inter-Varsity Christian Fellowship holds a prayer meeting from noon to 12:30 p.m. daily in the Student Center Activity Room C.

The Circle K Club, a service organization for the campus and Carbondale, will meet at 7 p.m. in Lawson Hall Room 401. All interested persons are welcome.

A Philosophy Department colloquium will be held at 4 p.m. Thursday in Fair Hall Room 438. Mark Johnson, a philosophy professor, will speak on "Metaphor and Form.

The Racquetball Club will meet at 8 p.m. Thursday in the Recreation Building, Room 82. Plans for the upcoming clinic and tournament will be discussed.

The Women's Center will sponsor a workshop on moving called "Coping with Carbondale: How Does it Feel?" from 7:30 to 9:30 p.m. Thursday at 406 W. Freeman. The program is free and open to all interested women.

A program entitled "From Africa to America" will be held from 7 to 10 p.m. Friday at the University City Community Center, 607 E. College St. It will feature a guest speaker, a theater production and a band. The program, sponsored by Mystic Voyage, is a fund-raiser to help the organization sponsor community activities.

University Year for Action will talk to interested students at 10:30 a.m. Thursday in the Home Economics Building Lounge. A second session is scheduled for 1 p.m. Friday in the lounge.

The Council of President's Scholars will meet at 7:30 p.m. Thursday in the Morris Library Auditorium. The topic for discussion is the South Africa issue.
Physical therapy workshop planned

Two physical therapy workshops for parents and teachers of physically handicapped children will be held at the S. Louis Hospital on March 2 and 3. The workshops are open to all interested persons.

The March 2 workshop will be a three-hour workshop for parents and will provide information on the physical therapy program at S. Louis Hospital. The workshop will focus on the medical and educational needs of the handicapped child.

The March 3 workshop will be a half-day workshop for teachers. The workshop will provide information on the physical therapy program at S. Louis Hospital and will focus on the educational needs of the handicapped child.

To register for either workshop, please contact the S. Louis Hospital at 555-1234.

Jobs on Campus

The following jobs for student workers have been listed by the Office of Student Work and Financial Assistance.

1. Typist: Four openings, morning work block, one opening, afternoon work block, one opening, evening work block, one opening, long term. Must have previous experience in word processing. Must be able to type at least 40 words per minute. Must be punctual and reliable. Daytime openings only. Hourly pay.

2. Receptionist: Two openings, morning work block, one opening, afternoon work block, one opening, evening work block, one opening. Must be able to type at least 40 words per minute. Must be able to work evenings and weekends. Daytime openings only. Hourly pay.

3. Mailroom: Two openings, half-day work block, one opening, full-day work block, one opening. Must be able to type at least 40 words per minute. Must be able to work evenings and weekends. Daytime openings only. Hourly pay.

4. Office Assistant: Four openings, half-day work block, one opening, full-day work block, one opening. Must be able to type at least 40 words per minute. Must be able to work evenings and weekends. Daytime openings only. Hourly pay.

5. Sales Associate: Four openings, half-day work block, one opening, full-day work block, one opening. Must be able to type at least 40 words per minute. Must be able to work evenings and weekends. Daytime openings only. Hourly pay.

6. Maintenance: Two openings, full-day work block, one opening, morning work block, one opening. Must be able to type at least 40 words per minute. Must be able to work evenings and weekends. Daytime openings only. Hourly pay.

7. Housekeeping: Two openings, half-day work block, one opening, full-day work block, one opening. Must be able to type at least 40 words per minute. Must be able to work evenings and weekends. Daytime openings only. Hourly pay.

8. Food Service: Two openings, half-day work block, one opening, full-day work block, one opening. Must be able to type at least 40 words per minute. Must be able to work evenings and weekends. Daytime openings only. Hourly pay.

To apply for any of these positions, please contact the Office of Student Work and Financial Assistance at 555-1234.
Young fears Rhodesian war

SALISBURY. Rhodesia (AP) - Provo Minister Ian Smith and moderate black politicians agreed Wednesday to start talks aimed at bringing black majority rule in Rhodesia, but guerrillas rejected the proposed talks.

The proposal was put forward by South African Prime Minister Pieter Botha, who said last week that Pretoria would bring a black-reinforced black formation to Rhodesia.

A guerrilla leader, "Smith," said the accord was a "gimmick" that black leaders had demanded "in a desperate attempt to save their lives" and that "there would be no talks until the armed struggle ends.

Young, U.S. ambassador to the United Nations, has been negotiating for weeks for a cease-fire. Now he agreed to start talks with black and white leaders.

In the United States, Secretary of State Henry Kissinger said he had been working on the issue for some time. He said he was "optimistic" about the prospects for a cease-fire.

Young said the talks were to begin on Monday. He added that the black leaders had "left no room for doubt" on their willingness to talk.

Young said the talks would be held in Salisbury, the capital of Rhodesia, and that the black leaders would be accompanied by a delegation from South Africa.

Young said the talks would be held in Salisbury, the capital of Rhodesia, and that the black leaders would be accompanied by a delegation from South Africa.

Official convicted of bribery, fraud eligible for pension

SPRINGFIELD (AP)—A former Illinois Assembly member convicted out of "office after he was convicted twice of bribery and fraud is eligible for a bilion pension of $18,000 a year. Assistant Illinois Atty. Gen. William J. Scott's office said yesterday.

Robert Craig, 55, former Demolcratic representative from Danville, is eligible for the General Assembly pension because he became a legislator six months before a 1965 state law went into effect prohibiting pensions for anyone convicted of a felony while a member of the legislature. Scott's office quoted the law.

The law went into effect July 11, 1965. Craig took office in January of that year. He served 24 years in the Illinois House, but only two years of his career were in the Illinois Senate.

Craig was convicted in federal court in June 1976 of accepting $6,000 in bribes from Chicago's infamous "Coin Toss" gang in a scheme to rig construction bidding for the state's public works projects. He was sentenced in October 1976 to six years in prison and fined $5,000.

He was sentenced to another three-year prison term in March 1977 after he was convicted in federal court of mail fraud and conspiracy to commit extortion in connection with a state highway construction scheme.

Craig has remained free on bond while appealing the convictions. He said last week that he was pleased by the Supreme Court's decision on Monday.

Norman E. Lentz, General Assembly retirement system secretary, said the board of directors is scheduled to meet Feb. 28 to determine whether Craig is eligible for the pension. "I think they thought they were doing me a big favor by putting me up to the Supreme Court," he said.

Senate President Thomas C. Hynes, D-Chicago, board chairman, said last week that the board will re-examine Craig's eligibility for the pension now that the Supreme Court has affirmed the conviction.

Ardle Lit, a professor in the Department of Psychology, has been chosen as a Fellow of the New York Academy of Science.

Camera ripped-off from crime center

Even the crime center study in Campus Briefs is subject to theft.

Ellen White, a stenographic secretary for the Crime and Corrections Center, said an Univerity police camera on the campus was stolen from her office in the past week.

The police don't know when the camera was stolen because the last time it was seen was in June of 1977.

The camera cost $220.50, police said.

Faculty art exhibit set

Faculty artists in the School of Art will show their latest works in a faculty exhibit Feb. 22 to March 23 at Mitchell Gallery. The three-week exhibit will range from a functional fiber- and color-Xerox-construction clock by Joan Lintaul to plastic, resin and plaster sculptures by Alfred Litton and drawings by Herbert Findt.

Some of the pieces will be for sale. The annual exhibit will open with a public reception at 7 p.m. on Wednesday in Mitchell Gallery.

Agency uncovers influence-buying scheme in House

WASHINGTON (AP) - Congressmen studying hospital cost-control legislation got $75,452 in campaign contributions in the last elections from opponents of the measure, Common Cause said Wednesday.

Common Cause, which specializes in monitoring campaign activity, said it contacted the campaign of Rep. Dan Rostenkowski, D-Ill., chairman of the health subcommittee of the House Ways and Means Committee, and 10 other members of the panel.

Rostenkowski said the contributions have no connection with the fact that he plans to introduce a bill requiring industry to report the industry's alternatives to a proposal by_Federal Medicare.

"Even the bill I'm trying to fight may have some good in it," he said Wednesday.

The proposals, which Rostenkowski's aides sought to introduce were worked up by the American Medical Association, the Federation of American Hospitals and the American Hospital Association.

Common Cause said a study of contributions for the 1974 and 1976 congressional elections showed the AMA gave $62,153 and the Federation of American Hospitals contributed $10,350 to the subcommittee members.

Based on Federal Election Commission reports, the Common Cause study found that the three health organizations, through their political action committees, had contributed $16,900 to Rostenkowski's last two campaigns.

For those who still wonder whether political contributions can affect congressional action, we recommended that they carefully follow the upcoming procedures in the health subcommittee," Common Cause Senior Vice President Fred Werneth said.

Common Cause said the other subcommittee members and the groups had raised the prospect of seeking strava of American Hospitals for 1974 and 1976 elections were:

James Martin, R-N.C., $11,332
John Dingell, D-Mich., $12,000
Omar Burleson, D-Texas, $8,500
Willie Grundy, R-Ark., $7,000
B. D. Howard, D-Colo., $7,000
Jim Meyers, R-Calif., $6,900
William Reddick, D-Mich., $6,500
Harold Ford, D-Tenn., $6,000
Martha Sears, R-Calif., $6,000

Rostenkowski introduced the Carter administration bill last year and got a lot of support from people armed at holding down hospital fees. A very large group would be held to 9 percent a year.

The draft version coming up Thursday is the result of Rostenkowskis's work with some alternative or compromise language.

Coal strike may hurt economy

WASHINGTON (AP) - The long coal strike may not hurt the economy, President Carter's economic advisers said Wednesday, but it could cause short-term damage to employment and productivity, administration economists said.

The administration has begun a top-level analysis of what could happen to the industry, starting in its 2nd day Thursday, economists said.

"We don't foresee any major economic impact at least for the next month," said William Nordhaus, chairman of the Council of Economic Advisers, who is leading the economic analysis of the consequences of the recording strike.

Rostenkowski said economists think the maximum impact from a statistical viewpoint would be a decrease of 2.5 percent in the nation's gross national product in the first quarter of 1978, the last quarter in which the strike would be small.

The American automobile industry, which is one of the nation's largest, has an annual rate of 7.5 percent, but Nordhaus said in an interview that in regions where coal supplies are growing, like the South, the impact could be markedly less.

There are some areas of coal hardship and, for business, that could cause short-term damage to employment and productivity, said administration economists.

Nordhaus said some automakers may cut production for lack of coal, but there probably would be shortages even without a coal strike.

Nordhaus said auto sales have been disappointing in the last two months, which has left automakers overstocked with unused vehicles. "They are probably just as happy as not to cut back at this stage," he said.

A Treasury Department economic analysis also said the auto companies are having problems because inventory levels are fairly high and sales are "that strong anyway, so they need to run down their inventories." Nordhaus noted that in the east central states, such as Ohio and Indiana, coal stocks for power generation have declined to as low as 30 days of "normal consumption" in some areas, which is considered a low level.

But he said that even a 3-day supply for normal use can be stretched to a much longer period through conservation measures and by bringing in power utilities in other regions.

However, the transfer of power from one region to another can result in increased costs to consumers, since such power is usually more expensive, and utilities would pass the cost along to consumers.

The Department of Energy has started its own survey of the impact of the coal strike, according to Albert Linden, assistant administrator for energy data.

He said the agency is conducting a survey of utilities in various states to determine from them what impact a curtailment of power would have on employment in the industries they serve.

"We're just starting to look at it, and it will be a week or so before we know anything," Linden said.

One government economist, who did not want to be quoted, thought the government was slow to start its analysis of the economic impact of the strike.

MVC post-season tournament tickets sale schedule set

The athletics ticket office has announced its plans for the sale of tickets for a possible first round Missouri Valley Conference tournament game at Carbondale.

Should the Salukis finish second, third, fourth, or fifth in regular season conference play, they will host the first four round tournament games on Feb. 27. Student and general public season ticket holders may retain their regular seats by going to the athletics ticket office at the arena between noon and 6 p.m. on February 18. Student season ticket holders must present a regular season home-game ticket stub as proof of their season ticket ownership.

Beginning at 8:30 a.m. Feb. 27, tickets will go on sale on a first-come, first-serve basis.

Chair seats will be $6 and bleacher seats will be $4 for the general public. Student tickets will be priced as $2 with a current fee statement.

BASKETBALL budget committee to present report at LAC meeting

A report from a budgetary subcommittee lends its list of items to the Intercollegiate Athletics Committee at the Athletics Hall budget conference room.

The subcommittee will also discuss the NCAA Division I-A or I-A football schedule. The committee heard a report from Charlotte West, women's athletics director, presenting an athletic participation by minority women.

West noted that 11 black females of 212 women athletes participate in basketball, and many black females are talented in sports and that SIU is stepping up efforts to recruit more black athletes.

Cheeks gives Buffs guard strength

By Bud Vandemark
Sports Editor

Who is the best guard? That question is cause for strong debate among fans who follow college basketball. Fama in the Beer Capital of the World will normally raise their glasses in a toast to Butch Lee of Marquette, while North Carolina rooting 

ers, who view basketball as a religion, sing the praise of Phil Ford. There may even be sprinkling of votes in the Northwest for Freeman Williams of Portland State, and how can you argue with a guy who can score 61 points in a game? Those three stars comprise the consensus views, but a dissenting opinion comes from the Texas Panhandle. Coach Ron Ekker of West Texas State is quite content, thank you, with his playmaker, senior Maurice Cheeks. In fact, he is more than that.

"I watched North Carolina play Marquette in the NCAA finals last year and saw Lee versus Ford," Ekker reflects. "I wouldn't trade Maurice for either one of them. I was watching very closely because I think Maurice is right in the running with that caliber of player. In mind he's one of the top players in the country."

Cheeks' play over the past two seasons has also earned the respect of opposing coaches in the Missouri Valley. The Chicago native has been named to the all-Valley team twice, and last year he handed out a school record total of 21 assists.

The other numbers on Cheeks' statistics chart are cause for prolonged frowns. He shot 46 percent from the field in the each of the last two seasons, but his scoring averages of 11.1 and 13.9 have been less than spectacular. Scoring points, however, is not the foremost thing on Cheeks mind."

"I really like to give assists," Cheeks says. "I penetrate to the basket a lot to get good shots, which accounts for my high shooting percentage. My talents are best suited for a team with a quality inside player. If we had a 6-10 inside, I'd get the ball and then they scored the points."

The 6-1 senior also displayed his ballhandling wizardry at DuSable High School, but not many people noticed. "I was a lot like Phil Ford in high school," Cheeks says. "The bulk of the playmaking was Freeman Williams and Billy Lewin of Farragut were attracting All-America status and the bulk of recruiting

letters. Cheeks played in relative obscurity, earning only all-city honors. College recruiters were not beaten down Cheeks' door."

"When I was a senior I hadn't really thought about college basketball because I hadn't got ten any letters," he remembers. "West Texas State was my first offer and I took it. I hit it off well with Coach Ekker right away."

Ekker's confidence in Cheeks was evident from the beginning, as he saw action in all games during his freshman season when the Buffaloes struggled to a 6-17 record. He averaged only 3.9 points per game that first year, but he thinks the season was useful. "Getting to play that first year really helped me experience-wise," Cheeks says. "I was able to learn what college basketball was all about. You have to learn how to make the adjustment from high school to college basketball."

The Buffaloes won 21 games in Cheeks' sophomore and junior seasons, but a cloud hung over the program in the form of a two-year NCAA probation. West Texas State was prohibited from participating in post-season play, and the probation made the Buffs' game in the 1973 Valley tournament relatively meaningless.

The Buff's captain says the probation was a difficult period of time, but he insists it had no appreciable effect on the team's play. "The probation may have had some effect at the beginning of the season," Cheeks says. "But after the season started we realized that we still had to go out and play the game. If we were off probation the Salukis (82-89) would have meant more, but we still tried and played well."

The probation is now over, but the dismal record of three years ago has returned. The Buffs are currently tied for first place in the Valley overall, Cheeks, who is averaging 16 points a game this season, would have liked to end his career on a higher note.

"We have a lot of new faces this year and we haven't really played yet," he explains. "Our team got a lot of breaks last year, but we've had a lot of things go against us this year."

"But we still have a lot of basketball left to win, and we can. We're playing a little bit better right now, and we're going to win every game on the rest of our schedule. Hopefully by tournament time we can surprise some people."

Meade asks students to attend meet

(Continued from Page 36)

The team is led by two junior all-around men who also happen to be the Mountain Conference champions. Rick Adams and Kevin Murao, Adams has been the more consistent of the two in the 80 percent completion in more than 43 percent of his throws, and Murao has been approaching the 54 plateau. They also.

The team decided not to have captains until late in the season. Meade said the recent decisions. "Rick and Kevin figure to give us a little more organization. They show a lot of leadership and should help coach the team," he says.

Another vital part of the team, if it is to make a run at the automatic championship is the steady improvement of Dan Mesier. Mesier is the first-year man who had knee surgery last season and the recovery process is almost complete. Dan has hit the 35 mark in all-around competition this season and can still improve.

Add to that a couple of promising freshmen and an experienced coach, and you have yourself quite a team.

The men's and women's meets will be run simultaneously. Admission is $1 for students and $1 for adults.

Frosh Giles makes transition to college basketball

By Jim Missman
Staff Writer

Making the transition from high school to college basketball for most freshmen is a difficult and often overwhelming process.

Freshman Chris Giles has made that often difficult move to collegiate basketball seemingly overnight.

Giles, a 5-9 forward-guard, was named to the second team by Coach Paul Lambert in the Feb. 2 Drake game at the Missouri Valley Conference.

Lambert has said that starting a freshman for the first time in a home game at a tough venue such as Missouri Valley conference play is a lot of pressure on a newcomer to college basketball.

Lambert philosophy appeared sound in Giles’ case for he scored eight points and had two rebounds in his Missouri Valley Conference debut.

Giles has started the three games since his arrival in Columbia, has averaged 15 minutes playing time in the four games, while Giles is in for injured center Al Grant. Grant sustained a broken finger in the Jan. 30 game at Wichita State and has sat out seven games.

Giles was the third Saluki starter on the year. Dan Kennedy started the 65-57 win over Wichita State and Charles Hooton started the New Mexico State game which SU won 76-61.

Giles, a mouthful, helps keep a Saluki tradition of left-handed players going. Al Williams played the lefty role for two years before transferring to North Texas State and Disabilities has been a four-year starter for the last four seasons.

“Chris has no obvious weaknesses,” Lambert noted. “He has a sound total game—scoring, shooting, self-handling and defense. He gives as flexibility because he can do so many things.

“Giles, who is averaging six points a game, echoed Lambert’s comments when he said, “I try to add a little bit of everything,” the prettyspoke Giles said. “If whatever we need help, I’ll do whatever helps the team.”

Giles said the key to overcoming the loss of Grant has been to rely on the Salukis’ team effort.

“We’ve come together and play even harder as a team,” Giles said. “Everybody has had to rebound better—all five guys.”

One problem in Giles’ game had been his three shooting, but the lefty hit just 17 percent on two of 12 charity tosses before the Wichita State game Saturday. The blockers were probably expecting a charitable effort after fouling Giles, SU led 54-53 with 1:08 left, but Giles hit both ends of a one-and-one free throw to help nail the victory down. Giles hit four straight free throws in the win.

“I’ve been having trouble getting comfortable at the line,” Giles said. “It seems like I’m shooting a little bit differently each time. It’s also harder when you don’t shoot free throws that often.”

Giles is hitting 8 percent on field goal attempts, most of which come in the fast-paced, high-scoring jump shot. Giles said he has always had a high arc.

For the past six games Giles has averaged 56 percent on field goals on route to improving his shot selection. He has averaged 10 points in each of those six contests.

The 198-pound freshman said meeting new players and new coaches and getting used to a new system of basketball were the toughest adjustments.

“Every game has its own style and you have to find your place in a game,” Giles said. “We basically play a patient game here.”

Giles, who averaged 14 points and 11 rebounds per game in high school, said he wasn’t heavily recruited because he had decided to attend SIU early.

Richard (Ford) was the biggest influence on me attending SU,” Giles said. “I wanted to play college ball with Richard.”

Although Giles hopes of playing with Ford have been dashed this year because Ford has been placed on academic suspension.

Giles sees improvement in his game in the future.

“There’s always room for improvement and that’s one of my goals—to play better each time out.”

And Giles continues to improve like he has adjusted to college basketball. Saluki fans will have another three years to continue the tradition of cheering for left-handed players.

Women cagers hit by flu bug prior to three-game weekend

By Bud vanVanderbilt
Sports Editor

The women’s basketball team’s game with Illinois Thursday night at the Assembly Hall in Champaign will be its first of a three-game schedule this weekend, but the women’s team will not have to worry about the flu bug that hit the men’s team.

The flu bug that was hanging around the Arena earlier in the season has found its way to Davies Gym and three players have been affected. Starters Jeri Hoffman, and Lynn Williams and reserve Genia Villa have all been ill, and Coach Cindy Scott said the illnesses will have an affect on the team’s line-up for the weekend.

“Jeri won’t make the trip to Champaign but she may miss the whole weekend,” said Scott, who have been an illness. “Anita Jones will make the trip if they feel better Thursday, but right now they are doubtful. Jill (Pomeranke) will start for Jeri and either Jackie (Lotzi) or Robi (Deteding) will play if Lynn can’t start.”

After the Thursday game with the Illini, which will be played at 5:15 p.m. and will precede the Illinois-Missouri game in the Big Ten, the Salukis will return home for two games at Davies Gym. Eastern Illinois will provide the opponent at 8 p.m. Friday and the 19th-ranked Missouri Tigers come to town Saturday for a 6:30 p.m. contest. Each game will be preceded by a junior college basketball game.

The women cagers enter the tripleheader with an 8-3 record. That mark does not thrill Scott and she is looking for nothing less than a sweep of the three games.

“Everybody has to win all three games this weekend,” Scott emphasized. “It’s time for us to make our run before the state tournament (March 5-4 at Illinois) begins.”

Although the cagers may not be at full strength, Scott plans no change in his attack. She said the team has found a way to get the ball inside to Bonnie Foley and Sue Faber, and that familiar 1-3-1 defense will again be put to use. Scott hopes to open the attack on defense with a fast break.

The Salukis lost to Western Illinois last Friday, but Scott said most of their problems did not stem from the basketball court. The first-year coach was disappointed with her team’s mental attitude last weekend, but she is confident the problem has been solved.

“We have had two hard practices this week and they have been working,” said Scott. “The players know they blew it and they don’t want it to happen again.”

Scott said that she was not too worried about the flu bug that affected both Eastern Illinois and Missouri this weekend, and she did say that Eastern Illinois lost Illinois by 40 points earlier in the season.

Saturday night’s game with Missouri, however, has Scott praying for a quick recovery by her ill players. The 19th-ranked Tigers are 18-3 this season and their losses have been to teams in the Top Twenty. They have scored over 100 points in each of their last three games and they have four players averaging at least 10 points a game.

Finding a steady for the flu will not guarantee a win for the Salukis. Scott said her team must play its best game to have a chance.

“We have to be aggressive all the time,” she said. “Missouri has good height and we are going to have to out-rebound them and have to be at full strength to beat them.”

Basketball Salukis head west to battle Buffs, Aggies

By Bud Vandercook

Sports Editor

When Horace Greeley told all young men to "Go West," he was not talking about basketball road trips. However, the Salukis can go a long way toward finding their fortune in this year's Missouri Valley race with this week's westward journey.

Coach Paul Lambert and his team will file their first claim to possible far at 7:30 p.m. Thursday when they battle the West Texas Buffaloes at the Amarillo Civic Center. The Salukis will then enter the Land of Enchantment Saturday for an 8:30 p.m. game with New Mexico State at the Pan American Center in Las Cruces.

The Saluki van train left Wednesday morning without one of its top horses—All Grant. The 6-9 sophomore center was expected to play Tuesday and it was discovered that the broken finger on his left hand was healed enough to allow him to make the road trip. Grant broke the finger on a slam dunk at Creighton Jan. 21 after he had not played since late December.

The Salukis' .4 conference record has them in second place in the Valley, 1½ games behind league-leader Creighton. Both games this weekend qualify as must-win situations, but Lambert has confidence in his team's chances to improve its standing in the conference race.

"If we play the way we have been playing, we can win," Lambert reasoned. "Our team knows how to play on the road. They know you have to come away and contest their crowd. It will be difficult, but we have played well on the road this year so far."

West Texas State is 3-5 in the Valley and 7-15 overall, but the Buffaloes probably will not be a dangerous contest for the Salukis. West Texas State will last week when they routed New Mexico State at home.

The Salukas defeated the Buffs 77-76 in an earlier Valley game at the Arena. Gerald Munson and Johnson and junior Jeff Johnson led the scoring for the Buffs with 20 points each, returning guard Senior guard Maurice Cheeks, a two-year Alliance Valley selection, added 13 points on the night and junior forward Bob Lambert said Cheeks may hold the key to the game's outcome.

"They have the type team that can beat us if you let them knock us around. We must tough," Lambert predicted. "If they are healthy, we may be catching them at a bad time."

The Aggies won the earlier meeting between the two teams, 77-71, in a game that was a battle for first place at the time. The Aggies' strength was their size, but Creighton and Lambert said his team will have to force the smaller Aggies off the court.

New Mexico State will likely start Robert Gunn and Cyrus Corser at center with junior forwards Danny Lopes and Greg Webb at guards.

Lambert will counter with Gary Wilson, Chris Robert of San Antonio, on the front line, with Wayne Abrams and Mark Higgins maning the guard positions.

Saluki forward Dan Kieszczkowski attempts a tip-in against the Buffaloes of West Texas State. SIU will try for a second win over the Buffalo in a 7:30 p.m. Thursday game at Amarillo. (Staff photo by Marc Cassarino)

Saluki football Head Coach Roy Dempsey announced Wednesday the signing of 17 high school seniors to national letters-of-intent.

The Salukis also signed three junior college transfer students last weekend.

The three are Mike Coleman, a 6-1, 185-pound tailback from Lawrence, Kan.; High and Coffeyville Junior College; Tyrone Heery, a 6-4, 197-pound defensive back from Miami, Fla.; Norman High and San Francisco City College; and Steve Sofia, a 6-4, 215-pound halfback from Farmington, N.Y., High and Nassau, N.Y., Community College.

They will begin spring drills March 28.

Those who signed letters from high school include Ken Brown, a 6-2, 170-pound quarterback from Mound High in Chicago; Mark Carney, a 6-4, 205-pound running back from Wirtton, W. Va.; Mike Collins, a 6-4, 215-pound wide guard from Youngstown Oh.; James Cooper, a 6-4, 190-pound tailback from Central High in St. Louis; Chester Cropp, a 6-8, 145-pound tackle from Selden High in St. Louis; Robert Fews, a 6-2, 205-pound linbacker from Aurora East High in Aurora; and Dave Johnson, a 6-4, 210-pound linbacker from Aurora North High in Mundelein.

Glen Maciej, a 6-4, 200-pound tackle from Morton East High in Iliane; Glenn Marvin, a 6-4, 205-pound fullback from Breman High in Missouri, and Michael Merrison, a 6-2, 215-pound defensive end from Lindbergh High in St. Louis; Mike Rager, a 6-4, 210-pound linbacker from St. Lawrence High in Alpen; Jeff Spragus, a 6-4, 215-pound guard from Terre Haute, Ind.; Chuck Varner, a 5-10, 185-pound tailback from Wirtton, W. Va.; Tom Ward, a 5-10, 195-pound fullback from New Trier East High in Winooski; Tim Ward, a 5-4, 225-pound defensive end from Chicago South Side; and Terry Wartke, a 6-2, 210-pound linbacker from Youngstown, Ohio.

Lambert said that all three transfer students have a "good shot to make into the starting lineup."

Coleman had five games over 150 rushing yards last season and once caught four games for 115 yards in a game. He also returned punts and kickoff for five touchdowns in his high school career as a senior.

Henry was a two-year starter for San Francisco City College and a good backfield halfback in his high school career. He picked off 13 enemy passes and returned four of them for touchdowns in his three-year high school career.

Sofia is expected to have the best opportunity to make an immediate impact as a linbacker, where the Salukis lost senior Dan Brown and Billy Hadfield as starters.

Brown was an All-Missouri Valley selection last year. Sofia made the Coastal Conference all-star list as a high school, Sophomore halfback, and defensive end and tackle, fullback, and tight end on teams that had combined a three-year record of 23-21, including 5-0 his senior year.

Schools include Ken Brown, a 6-2, 170-pound quarterback from Mound High in Chicago; Mark Carney, a 6-4, 205-pound running back from Wirtton, W. Va.; Mike Collins, a 6-4, 215-pound wide guard from Youngstown Oh.; James Cooper, a 6-4, 190-pound tailback from Central High in St. Louis; Chester Cropp, a 6-8, 145-pound tackle from Selden High in St. Louis; Robert Fews, a 6-2, 205-pound linbacker from Aurora East High in Aurora; and Dave Johnson, a 6-4, 210-pound linbacker from Aurora North High in Mundelein.

Glen Maciej, a 6-4, 200-pound tackle from Morton East High in Iliane; Glenn Marvin, a 6-4, 205-pound fullback from Breman High in Missouri, and Michael Merrison, a 6-2, 215-pound defensive end from Lindbergh High in St. Louis; Mike Rager, a 6-4, 210-pound linbacker from St. Lawrence High in Alpen; Jeff Spragus, a 6-4, 215-pound guard from Terre Haute, Ind.; Chuck Varner, a 5-10, 185-pound tailback from Wirtton, W. Va.; Tom Ward, a 5-10, 195-pound fullback from New Trier East High in Winooski; Tim Ward, a 5-4, 225-pound defensive end from Chicago South Side; and Terry Wartke, a 6-2, 210-pound linbacker from Youngstown, Ohio.

Lambert said that all three transfer students have a "good shot to make into the starting lineup."

Coleman had five games over 150 rushing yards last season and once caught four games for 115 yards in a game. He also returned punts and kickoff for five touchdowns in his high school career as a senior.

Meade requests students to give gymnasts support

By Steve Conner

Staff Writer

Meade is more concerned with the size of the crowds at SIU. Meade said, "They're not bad, but I'd like to see bigger and better than ever. When you get several thousand people clicking, it helps the home team a lot. The students can have a good evening of entertaining gymnastics." Meade has made several attempts at building up a large crowd for his former school's first appearance at SIU. Meade spoke on a radio program called "Feedback," last week and invited letters to fraternities, sororities, in- and off-campus, and university dorms making an appeal for the crowds to come out and support the Salukis gymnastics team.

"Curing my day there, gymnastics is one of the other indoor sport they had," Meade said of the years he competed as a gymnast for the Lions. After graduating in 1969, Meade was the general manager of the Salukis for seven years before being the last 2½ years at the helm of the Salukis. He is still very close with the Penn State team.

"We'll have the same category as we are in that it has no seniors on the team, but we have a lot of young talent. Their strength of their team lies in their all-around ability that is just like ours. It's a lot like us. They started slow but they were scoring in the second half," Meade said.

The Salukis are just 3-5 in the season but have been progressing well. The Lions have 10 individuals in all as the individual members have been slowly but surely perfecting the routines and more difficult on the balance beam.
