Heavy rains sink Route 13 by 4 inches

By Richard Nunez
Staff Writer

Relentless rain caused about 100 feet of Route 13 to sink nearly four inches Wednesday, an Illinois Department of Transportation official said.

Lynn Forbes, assistant District Engineer for IDOT, said the settling patch of highway is east just east of Chapman Rollo Furniture Company between Carbondale and Makanda.

Forbes said the settlement poses no danger to motorists.

"We went out with a drill rig to make sure there weren't any voids underneath the pavement," Forbes said.

Forbes said they drilled the highway and found no voids, or holes, underneath the highway. If voids would have been discovered, Forbes said the highway would have posed a danger because of possible cave-in of the pavement.

"It wasn't necessary to repair it as of yet," Forbes said. "But we have signed it as a bump."

The bump warning sign cautions motorists to drive at 60 mph. Forbes said.

Dialy almost, four inches the SIU Airport Weather Service, said of 5:20 p.m. Wednesday, 5.69 inches of rain had fallen in Carbondale since Monday.

Jaynes predicted the rain would taper off today and possibly redevelop as snow or sleet.

USG supports health, recreation fee increase

By Miguel Alba

Increases in the recreation and off-campus insurance fees were approved by the Undergraduate Student Government, with further increases probable next year. The USG senate voted 16 to 7 in favor of supporting the health fee increase and 18 to 7 in support of the recreation fee increase, in Wednesday night's meeting.

Mike Dunn, Recreation Center director, and Sam McVay, Student Health Program director, said changes in the economy will be reflected in the cost of running the programs.

"It'll be right back next year," Dunn said. "But I don't know the amount of the increase."

Dunn said the $239,108 produced by this increase will support the Recreation Center's new addition, but fluctuations in wages and utilities could put a strain on the projected budget for fiscal year 1990.

"The Illinois Board of Higher Education has projected a 15 percent salary increases, but a 5 percent increase seems more realistic," he said.

Dunn said the difference between what is budgeted for salaries and what is actually going to be paid could amount to a $63,000 savings. Any savings would be added to left over funds at the end of the fiscal year.

Currently, the center's budget shows a left over fund balance of $446 for the fiscal year.

Senate debate over the Recreation Center fee increase was focused on finding funding alternatives.

Minority programs director appointed

Statewide office based at University

By Robert Molina
Student Writer

and Dan Wallsenberg
Staff Writer

A new administrator has been chosen to head a statewide program for minority graduate students based at the University, the associate dean of the graduate school said.

"We have demonstrated a track record with minority education, especially at graduate level," Carroll said.

Two programs, the Illinois Minority Education Incentive Program and the Illinois Cooperative Government Educational Opportunity Program, are combined under this position, Carroll said.

Johnson will administer the programs, supervise the number of minority faculty and professional staff at Illinois higher education institutions.

The programs give financial assistance to minority pursuing graduate or professional degrees and minorities who intend to seek careers in state colleges, universities or governmental boards.

In a telephone interview, Johnson said, "It's a challenging position and I'll work hard to move the program or enhance it the best that I can."

"I'll start by talking to faculty, staff and people at large to discover the weaknesses of these programs and discover the weaknesses of the fourteen areas they cover."

The minority graduate program was established at SIU-C during the 1985-86 school year. Carroll said. The educational opportunity program began one year later at Illinois State University in Normal.

Two programs have received nearly $1 million in funding from state, federal and private funding was necessary for effective administration, Carroll said. The two programs were combined under one administrator this semester.

Irani offers $1 million bounty for killing of 'Satanic' writer

LONDON (UPI) -- Iran offered a bounty of at least $1 million to anyone who kills British writer Salman Rushdie, as outrage over his novel about the Prophet Mohammed grew around the world yesterday.

A French publisher suspended publication of the "Satanic Verses," bowing to pressure from Muslim fundamentalists, including an unprecedented decree that "prohibits any Irani spiritual leader Ayaftollah Khomeini," to kill the book's author and publishers.

In New York, police reported a bomb threat at the offices of the novel's U.S. publisher, but officers searched the building and found no explosives. A Viking Press spokesman said the firm had received several threats recently but would continue publishing the book.

Rushdie, 41, an Indian-English naturalized British citizen raised as a Moslem, could not be reached for comment.

Less than 24 hours after the book was banned, the U.S. State Department canceled a U.S. tour to promote his novel and said it was 'particularly disturbed because of the death threat, the Associated Press reported.

"The news is shocking," a Repubal National News Agency spokesman announced the cancellation of next week's tour.

"If he executioner is a foreigner, it's $1 million, but if he's an American citizen, it's $5 million," the agency-quoted Rajshah, Iran's diplomat, head of an Iranian charity called the 15th of Khorram Relief

46 killed, 27 injured during parliamentary polls

COLOMBO, Sri Lanka (UPI) — Millions of voters ignored polling booth attacks, bombings and assassinations to cast ballots in Sri Lanka's first parliamentary polls in about a dozen years, officials said. At least 46 people were reported killed and 27 injured. Officials overseen election security reported violence in all eight provinces on the Indian Ocean island.

Of the 46 deaths, 45 were blamed on attacks by ethnic Sinhalese rebels of the leftist People's Liberation Front, which vowed to derail the voting and kill participants.

Battle for control involves army, millitiamen

BEIRUT, Lebanon (UPI) — Christian units of the Lebanese army, led by Christian militia in and around Beirut Wednesday with shells crashing near the hilltop U.S. Embassy, police and diplomats said. At least 45 people were killed and more than 100 others were injured in the inter-Christian battle for control of east Beirut, security sources said.

Textile plant labor strikes spread in Poland

WARSAW, Poland (UPI) — Labor unrest spread Wednesday in Poland, where 2,700 textile plant workers were on strike for higher wages and less drivers paralyzing public transportation in several cities, a Solidarity activist said Wednesday. All 2,700 workers at the textile plant in Ozerkow in central Poland went on strike Wednesday despite a court order for a moratorium on such protests by the 22-member Solidarity National Executive Commission (KSW).

Dutch tanker, jetty collision leaves 27 dead

ALGIERS, Algeria (UPI) — A Dutch tanker slammed into a jetty in the northeastern Algerian port of Skikda during a storm Wednesday and sank in deep water, leaving at least 27 crew members missing and feared dead. The tanker had arrived from New York on Tuesday and was crossing Skikda when an accident occurred about 1 a.m. local time (6 a.m.), the official Algerian Press Service said. A Dutch Foreign Ministry spokesman said the tanker sank in a storm.

Human rights champion rejects nomination

MOSCOW (UPI) — Human rights champion Andrei Sakharov turned down a nomination by Moscow residents as a candidate for the new Soviet parliament and will not run in the election because the Academy of Sciences reverses an earlier decision and nominates him, new camps in Moscow and Canada said Wednesday. The 41-member presidency of the Academy of Sciences failed to nominate Sakharov last month even though 60 scientific institutes married the renowned physicist, but scientists said they were looking for ways to change the decision.

Scientists on new track to attack AIDS virus

WASHINGTON (UPI) — Scientists said Wednesday they may be able to attack the AIDS virus on a new front by directly targeting drugs against an enzyme vital to the virus's power to infect cells. The scientists, from the Merck Research Laboratories in Raritan, N.J., and the U.S. Army Chemical Research Laboratories, also said they determined the precise structure of an enzyme that builds the outer coat of the human immune deficiency virus, which causes AIDS.

Youth's slaying points to Mandela bodyguard

JOHANNESBURG, South Africa (UPI) — Police stopped a van carrying black activist Winnie Mandela Wednesday, they returned from a visit with her imprisoned husband and briefly detained one of her bodyguards, witnesses said. The bodyguard was believed to have been taken into custody in connection with the abduction and slaying of a 14-year-old boy. A police spokesman refused in Pretoria said he could not immediately confirm the arrest.

Artic ozone depletion similar to Antarctic

TORONTO (UPI) — The same destructive process that opened a hole in the Earth's protective ozone layer over Antarctica is operating in the Arctic, the head of Canada's ozone research team said Wednesday. Wayne Evans, the chief of the experimental studies division of the government department Environment Canada, said there was a "crater" of ozone depletion over Scandinavia during the first week of February, larger and deeper than a crater discovered in 1986.

Oriental acrobats, magicians coming to Shryock Feb. 24

The artistry of Oriental acrobatics will take center stage Feb. 24 when the Chinese Golden Dragon Acrobats and Magicians of Taipei perform as part of Shryock Auditorium’s spring Celebrity Series.

This will be the first time an acrobatic group of this magnitude has played Shryock since the Peking Acrobats sold out in 1987.

Times & Tickets

Date: The Chinese Golden Dragon Acrobats and Magicians of Taipei will perform at 8 p.m. Feb. 24 at Shryock Auditorium.

Tickets: Tickets are available at the Shryock Auditorium box office from 10 a.m. to 6 p.m. weekdays. For details, call 453-3378.

Prices: Reserved seating — $10 and $12.

The Taiwanese troupe includes a cast of 33 dancers, acrobats and magicians who perform feats of balance, juggling and tumbling, along with magic and Kung Fu. Having existed in China as early as 208 B.C., acrobats are once again sponsored by the Chinese government to preserve the ancient art. The Chinese acrobats are family-trained from their earliest years. Director of the company is Danny Chang, whose father, grandfather and other forebearers all were acrobats.

Formal lessons began at age four or five. Children spent some four hours a day practicing at the three schools for the arts in Taipei, so that by age 15 their art has become a part of their daily living.

Acrobatics is second nature to Yu-Ching Chang, who performs one of the show’s highlights, the “tower of chairs,” in which he places four champagne bottles on a table.

Teachers get answers via computer system

By Doug Toole
Staff Writer

High School teachers can get instant feedback to their questions through a new program at SIU-C.

"Master Biology Teachers Research Experience Program" was established by SIU-C and the National Science Foundation. Through the program, Biology teachers attend seminars at SIU-C to learn about new material for their classes.

The program was expanded with a computerized "bulletin board." Teachers can have their questions answered 24 hours a day through their high school’s computers.

The program ran into problems when the science foundation refused to allow its $400,000 grant to be used to buy telephone modems required to connect the computers to the "bulletin board.

Waller Sandberg, associate professor of botany and assistant director of the program, went to John Green, GTE’s customer service manager for the southern Indiana section, to obtain the funds for the phone modem.

Green agreed to give the program $5,100 to purchase the modems. Green said he liked what the programs would do for high school teachers.

"We felt it was a good match, with GTE being a technology leader in telecommunications and its involvement in the sciences, especially at the high school level," Green said.

The "bulletin board" started this fall. Currently, 50 high school teachers participate, including teachers in Batesville, Ark. and Wickliffe, Ky.

Thomas M. Wahlund, the program’s high school liaison, said teachers can get almost instant feedback from other teachers when questions are put on the "bulletin board."

"I used it for one question, and I had 30 answers in two days," Wahlund said.

Time is short for teachers during the school year, Sandberg said, and little time is available for teachers to learn new material or operate new uses.

Byline: "Cool Hands Luke" to be shown tonight

"What we have here is a failure to communiticate."

Classic words from a classic film, spoken by one of the 1960’s most bizarre character actors, Bruce Dern, will present teachers.

"Cool Hands Luke," the 1967 Academy Award winner starring Paul Newman in the title role of Luke, will play at 6:30 and 9 tonight in the Student Center Auditorium as part of SPC Films’ spring presentation.

The film mixes religious symbolism with existentialism as Luke is sentenced to hard labor on a chain gang in the South for ripping the head off a parking meter.
**Special admissions needs an evaluation**

If the University wants tougher admission standards it also must think about quality education, especially for students in the special admissions program.

For these students, who are already starting out at a disadvantage, quality education should be an even greater concern.

SIU's special admissions program admits students who do not meet all of the requirements for regular admission. A composite of 15 on their ACT (700 SAT) and a ranking in the upper half of their class, or a 19 on their ACT (810 SAT) rate a student for admission.

The transcripts of special admissions students are reviewed by the admissions office, which looks at the course work that the student took in high school—whether they were low or high level courses and whether the student improved in the last year.

When admitting these students, more weight is given to their transcripts than to test scores, because the transcript is the best indication that a student has improved over the last three-and-a-half years or work, while the test is only a few hours.

But the admittance procedure is not the issue. The problem is to help these students get where they are going. What does the University do to help them succeed?

Students in the program are given a pattern test, and those with low scores are required to take University 100, a course in basic skills. But they are not required to take every other remedial course, which in some cases are probably needed.

The University needs to take a close look at this program and determine if, in its current state, it is really an asset to the University and the students participating in it.

As SIU Trustee William Norwood said in last week's board meeting, SIU has always prided itself on a liberal admissions policy, but an age of tightened budget SIU must decide, by determining the number of eventual graduates from the program, if it is worth the price.

There is no data that shows statistics on the graduation rate of student in special admissions, it is difficult to tell. But if this program allows students to get a weight of knowledge and help them along with their studies, then there is no question as to its worth.

The University needs to evaluate the quality and success rate of students in the program to be sure.

**Women should have choice to make decision on abortion**

For five years I've attended SIU, read the DE and watched the issues come and go. I have always thought it my duty to keep my thoughts on abortion to myself until Nancy Kissel, Mrs. Kissel and her family were victimized in the worst possible way by anti-choice activist John Short.

Those of you unfamiliar with this case should read yourselves to the Feb. 8 and 9 editions of the DE. I don't intend to talk about it here.

Sure it's easy to say that I was wrong. But I still stand by my convictions. own a wolf who is capable of more compassion, love, kindness, respect for life and decency than any of the "Christian" anti-choice activists I've seen hurl obscenities at emotionality and physically weakened women. These people could not find Christ in themselves or look into a microscope.

It is remarkable to me that so many of the same people who call themselves "pro-lifers" also advocate the death penalty. With this piece of hypocrisy I have to wonder that George Bush seems to be at the head of their movement for the moment, having himself been a pro-choice right short years ago.

3. Pro-choice advocates who pretend a fetus isn't really a life are also kidding themselves. The fetus is, however, the mother for life support during the first six months in the womb and is the subject to the desires of its mother.

4. I am tired of hearing comparisons of abortion with the murder of a 4- to 6-month-old child who exists outside and completely independent of its mother's body. It is not the same thing.

5. I have never known a woman who takes the idea of abortion lightly, or who would give it a little more consideration and if faced with that decision. Women who seek an abortion are not a herd of bloodthirsty animals. This is a decision only she can make.

6. As the most important in the world of life, it is sad to see women forced to abortion. - Thea Veulta Karch, student, AM

**Law school should stay with GPSC**

As law students we have been exposed to the debate over the Graduate and Professional Student Council. To our dismay, the issues originating during my time in the student organization, a frenzy of finger-pointing, blaming and personality attacks. This frenzy may or may not be a deliberate attempt to isolate strong candidates to the law students' cause, but whatever the case, the Ranzo-style handling of the debate is an embarrassment to the law school.

The original issues are the following:

1. Due to the physical isolation of law school as well as the difference in curriculum and needs, a more efficient representation of student concerns could be made.

2. As a whole, the law school can not do without its own student body. A large body of students are not GPSC enough.

3. The students want quick access to a law school and a minimal bureaucracy.

The above tactics of a few law students have generated these issues to isolate loyalty to the law school. The law school can not do without its own student body.

1. Poor management of Board of Trustees.

2. Law students are so much smarter and more concerned.

3. GPSC is non-responsive to student needs.

**Editorial Policies**

Signatures appear, unless otherwise noted, below the editors' names. Letters to the editor, if signed, may be published. Letters to the editor that cannot be published will be returned to the writer.

Letters to the editor may be submitted by mail to the Daily Egyptian, 410 W. Main St., Carbondale, IL 62901. Letters to the editor may also be submitted by e-mail to de@duke.edu, phone (618) 453-6021.

Letters to the editor should be 150 words or less. The Daily Egyptian reserves the right to edit letters to the editor for clarity, length and content.

Letters to the editor should include the author's address and telephone number. Letters for which verification of authorship cannot be made will not be published.

**Opinion and Commentary**

**St. Louis Post-Dispatch**

The oil spill off the coast of Antarctica is an event of national concern. That it is not true not for the amount of oil lost to the arctic environment or the region left uninhabitable by the oil spill — the standards by which oil spilling, the spill of 250,000 gallons of oil is measured — but the way the waters is trivial — but for the damage it does to the arctic environment, which will have on fish, birds and mammals.

The team counted nearly 30,000 seabirds, 2,000 other birds and 239 mammals, mainly seals, in the area of the oil spill. Liefshard Island, declared a protected area under the Antarctic Treaty because of its unique species, was closed.

Though one might be tempted to think that the animals and plants that live in the harsh climates of Antarctica are not damaged "hardy stuff, nothing could be further from the truth. In fact, the extreme cold of the region makes the impact of the oil spill — scientists say that pollution would remain in the waters for 100 times longer in Antarctica than in other parts of the world.

As signers of the Antarctic Treaty consider a new draft agreement that would open up the issue of mineral exploration, they should bear in mind the impact that the inevitable accidents attending such activity will have. In the last 15 of a few days or months' supply of oil or the area's resource worth risking Antarctica's fragile life forms? That may well be the price of the life of the world.
Soviets leave Afghanistan; end nine-year military reign

KABUL, Afghanistan (UPI) — The Soviet Union ended its nine-year military reign in Afghanistan Wednesday, leaving behind an Afghan regime backed by Moscow rebels and witnessing the collapse of an impeding bloodbath.

Gen. Boris Gromov was the Russian commander in Afghanistan, walking across the Afghan border into Soviet territory with a tearful word of remembrance and a broad smile of relief. "We have fulfilled our duty," he said.

Only minutes before Gromov's vehicles made the exit, vehicle convoy carrying the last 800 soldiers based in Kabul was en route to Soviet soil.

The Soviets, who lost 15,000 soldiers during the war, left behind thousands of wounded, and 800,000 refugees. The regime that diplomats predict will fall within months in U.S.-backed Moslem rebels.

Kabul was quiet Wednesday, with none of the usual sounds of outgoing artillery and rocket fire. Key court and government positions in the jangled snow-covered mountains that encircle the mile-high metropolis were deserted.

"We expect heavy fighting," Soviet source said Moscow had halted its airlift of food to the capital because authorities expected heavy rocket barrages on the airport by Moslem guerrillas.

The U.S. State Department said it was "surprised and disappointed" by the departure of Soviet troops.

The day's developments of Soviet people have waited for has come," Gromov said at a formal review of Afghan soldiers Thursday. "In spite of losses and sacrifices, we have fulfilled our duty."

Gromov then said he would leave Afghanistan.

The Soviets, who lost 15,000 soldiers during the war, left behind thousands of wounded, and 800,000 refugees. The regime that diplomats predict will fall within months in U.S.-backed Moslem rebels.

JOHNSON, from Page 1

school year because of their similarities and for better coordination.

The programs' advisers made the request to the Illinois Board of Higher Education and acquired faculty support for the proposed position, Carroll said.

A study advisory board will decide on the amount of money each individual college or university will get, private and public, will get from the grant, Carroll said.

Johnson is the coordinator of the Minority Science Program at Purdue and has been a year's salary if it is offered.

Saniee said the killer was a 20-year-old Iranian, who would receive the death penalty.

Saniee is a relatively low ranking cleric of a low-level agricultural college in a northern province.

Saniee said his była was a relative of the Iranian revolution.

The Iranian news agency also reported more than 10,000 angry demonstrators burned statues at the embassy windows but there were no casualties or damage. An escalation of anti-American 4 anti-British sentiment triggered by the novel considered blasphemous by many Moslems, Iranian Foreign Minister Ali Akbar Velayati urged the closure of cultural centers in Islamic countries belonging to nations "allowing insult against Islamic sanctities."

Velayati's call at a meeting of Moslem countries in Tehran appeared directed at British and American Persian Gulf states and in countries with large Moslem populations such as India and Pakistan, where two days of sollen against the release of the novel left six people dead and 180 wounded.

Countries that publish the novel, including the United States, "would face a floor of hatred from the Moslem nations and governments," he said.

Iran's elite Revolutionary Guards proclaimed their readiness to carry out Khomeini's order and President Khomeini also called for Rushdie's assassination. "We have to kill him," said a Moslem militant in Iran in mourning for "six killed in Pakistan and India.

NORTH, from Page 1

scattering any or all of the 12 criminal counts against Nevin... No one knew who the killer was. There was no information about the suspect's vehicle.

The trial was scheduled to resume March 25.

Thorburn said Walch's plan provided the administration with a "substance of what we have been seeking all week," an agreement on a means of stopping the case if the student-body secret court would be exposed.

6:10 p.m. U.S.T. Wednesday at Thorburn's direction, Acting Solicitor Atty. General William Bryson delivered to the Supreme Court a motion to discontinue the trial. The order to stop the trial from proceeding was granted last Sunday by Chief Justice William Rehnquist until the full Supreme Court could consider an appeal at its next session on Friday.

Justice Department spokesmen said the administration expected to file a similar petition with the U.S. District Court of Arizona for the District of Columbia on Thursday. The jurors, who were selected last week but have yet to be sworn in, have been told to call the courthouse each afternoon to learn if there is a need to report the next day.

The agreement appeared to end a week-long legal drama.

USG, from Page 1

"No options were ever given" to students... "I find it hard to believe there are no funding options," Carroll said. However, Dunn, in reply, said the state's position regarding auxiliary facilities, such as the center, are left to be supported by students.

Fabian continued to question Dunn over operations and the number of students who use the center's facilities.

Currently, part-time students pay only a fraction of the full fee, but get the same rigors to use the center as those who pay the full fee.

Dunn already had made recommendations for cuts, ranging from operation cut-backs to what he labeled "draconic alternatives," among which include charging for court time and eliminating tax breaks for sport clubs.

Though the senate did delay the on-campus insurance fee, McVay said an increase for the on-campus health fee will be considered next year.

McVay said he is looking forward to changing the stipulation in the student off-campus insurance fee that reduces the amount covered if a student is injured while out of the Carbondale area.
McCoy collection includes material from 17th century

By Scott Smith
Staff Writer

People have memories of what they have accomplished. A plaque on the living room wall commemorating an achievement at work. A McCoy has the McCoy collection includes material that chronicles press censorship in England and other countries since the 17th century.

The collection is referred to as the McCoy Collection. It includes censorship in printing (books, magazines, pamphlets and newspapers), motion pictures, radio, television and too lesser extent the theater.

McCoy started the collection in the 1940s while working on his dissertation concerning literary censorship in Massachusetts. "The SIU Foundation bought the collection for roughly what I spent on it over the last 30 years," McCoy said. "It filled a whole floor of my house."

McCoy was dean of Morris Library from 1965 to 1997. During his tenure, the library moved into its present building from Wheeler Hall and the law and medical school libraries were built.

Since retiring from SIUC, McCoy has been interim director of libraries at the University of Georgia and Rutgers University, and interim executive director of the Association of Research Library in Washington, D.C.

In 1968, McCoy wrote a bibliography, "Freedom of the Press." He has written a ten-year supplement, and a second supplement is due to be finished in 1991. The bibliography lists and annotates censorship materials since the 17th century.

The McCoy collection continues to grow with material dating back to the 17th century by library purchases. McCoy also donates material to the library.

"I've bought things from the catalog from antiquarins (book dealers) and from meetings with them in the United States, Ireland, England and Scotland," he said. "Almost every week I get an offer or a letter telling me of an item I might be interested in."

McCoy said the most expensive item in the collection was a pamphlet published in 1644 by John Milton, "Areopagitica," a first edition.

"The first is extremely valuable because it was issued during Milton's lifetime," McCoy said.

Wilkes was imprisoned after one of the copies reached a political leader and then it became a controversial trial, McCoy said.

He purchased the Wilke's essay from a widow of a member of the House of Lords in England.

There is a partial collection of 19th century periodicals from two sisters, Virginia Woodhull and Tennessee Claflin, who espoused radical views of the time such as feminism, socialism, anarchism and free love, McCoy said.

The McCoy Collection is available in the Special Collections Library on the second floor of Morris Library.
Researchers trying to create livestock feed from ethanol

Method involves using leftovers of grain alcohol

By Lisa Miller
Staff Writer

The Department of Animal Science at Southern Illinois University is currently working on a four-year project to create a balanced diet that includes meat, fish, and poultry out of ethanol, the corn leftovers after making grain alcohol.

The research is part of the ethanol feed now is that it contains 60 to 80 percent moisture, Anthony Young, associate dean for research, said.

The feed can either be dried before it is stored, which is a very expensive project, or it must be fed to the animals quickly before it spoils, Young said.

The researchers' goal is to develop low-moisture feed pellets that are nutritionally satisfying to animals and can be stored for long periods of time.

"If this project works, we will have a completely satisfying diet for animals that contain all the essential nutrients and will store for indefinite periods of time," Young said.

The project is being tested on the animals and the results should be in within three to four weeks.

The Illinois Corn Marketing Board is contributing the grain to further the research and the federal agriculture and energy departments are helping fund the project, Young said.

University is lending some researchers to help with this large project, but the original idea and effort is mainly SIU-C's.

"This work will be a great benefit not only to commercial purchasers of the feed products, but it may also provide new breakthroughs in technology for the nation’s ethanol industry," Young said.

"This project is the first of its kind."

The University does not plan to market this project, Young said. It will be used for information and technology in the ethanol industry when it is completed.

Debate team captures first at tournament

SIU-C took first place at the University of Missouri at Kansas City's debate tournament Feb. 11-12. Varsity debaters Mark West and John Lapham, Ill win first place by defeating Kansas State University. Third-place honors went to SIU-C's team of Michael Koroc and Kevin O'Leary.

"It was a keeper," DoMano Christoff, assistant SIU-C coach, said. "We worked hard and we won by 20 points. It wasn't the hardest tournament we've done this year, but a lot of good teams that are not used to losing did.

West was named first-place individual speaker. Koroc took fourth, and Lapham placed eighth.

While varsity squads traveled to Kansas City, SIU-C coach Jeffrey Bile sent a junior varsity team to Missouri Southern State College's tournament in Joplin. Oklahoma's Southeastern State University won the tournament, defeating SIU-C's Christopher Carey and T.J. Wolfe in final action.

Carey's strong performance captured him in individual speaking awards. Wolfe placed ninth.

Lecturer to depict black ancestry at Student Center

"Black History Through Arfiful Eyes," will showcase the artistic talents of Camille Yarbrough at 7 p.m. in Student Center Ballroom D as part of SIU-C's cultural offerings for Black History Month 2000.

Yarbrough will present "Tales and Tunes of an African Princess," a two-hour program of original songs, poems, monologues and dramatized scenes.

Yarbrough, a native of Chicago, is a multi-talented lecturer and performer who has performed extensively with the Katherine Dunham Dance Company. Her theatrical renditions remind her audiences that everything the ancestors of black Americans expressed has meaning and purpose.

Origin debate causes audience to examine view

By Doug Teols
Staff Writer

The argument concerning whether human beings came from monks or the handwork of the Almighty was debated in front of a near-capacity audience at Shryock Auditorium.

The "Evolution vs. Creation" debate Tuesday night was sponsored by the Chi Alpha Campus Ministries and featured George Fraunfelter, professor of paleontology at SIU-C, who defended the evolution standpoint, and John Morris of the Institute for Creation Research, who explained creationism.

Fraunfelter began the debate with an hour-long lecture on the organic theory of evolution. This theory states that all living things have evolved by a naturalistic, mechanistic, evolutionary process from a single living source, which evolved by a similar process from a dead, inanimate world.

DESPITE FRAUNFELTER'S approach, his voice was barely audible and difficult to understand. In addition, the audience had to struggle to see the small, out-of-focus information he put on the overhead projector.

The only time he seemed to get any positive reaction was when he produced one of Gary Larson's "Far Side" cartoons to explain the theory of giraffes.

Fraunfelter closed his argument by stating that no evidence has disproven evolution, and there have not been any improvements on the theory.

MORRIS PRESENTED his scientific evidence and theory with no reference to the Bible.

"I love rocks. I even talk to rocks; but I have yet to have a rock talk to me."

—John Morris

Morris began by suggesting that between the two of them — evolutionism and creationism — all the possibilities of explaining life on earth had been exhausted. He said evolution was a process of time, chance and natural processes, while creation favored a plan, purpose and special action.

Morris said most people have a bias for evolution because it is the only theory of life taught in most schools. He asked the audience to keep an open mind throughout the debate.

"My goal is to convince you that creationism is a valid theory." Morris said.

MORRIS SAID there is no proof that evolution has occurred. Paleontology, the study of fossils, has yet to produce an "in-between form" of any animal, he said. Morris even quoted Stephen Gould, a famous geologist and evolutionist, as saying that new species always appear at once and fully formed.

"I'm just don't see fish gradually changing into amphibians or birds," Morris said.

There was a ten-minute break before rebuttals began. Afterward only half the audience returned. People were constantly walking out of the auditorium.

Fraunfelter said religion had to be separated from science. He admitted there is no clear evidence in paleontology for gradual evolution, but said it was easy to be mistaken when dealing with fossils.

"It's tough to tell a tiger from a panther just from its bones." Fraunfelter said.

MORRIS SAID paleontology is an exact science that requires a lot of guesswork.

"I'm a geologist. I love rocks. I even talk to you, but I have yet to have a rock talk to me," Morris said.

"There have been no major evolutionary changes in history," Morris continued.

THERE IS little question that Morris presented a better argument than Fraunfelter. Unfortunately for Morris, most of us have been brought up believing that evolution is the only scientific explanation for life on earth.

After the debate, a small group of people were talking about which version they think about the validity of a creationist theory of life, so in that respect, he won.

A Review

Charles Darwin's original Evolution Theory

Morris came across as a much better speaker. He also had a "Far Side" cartoon to show, but Morris managed to keep the audience interested in his specific points as well.

Poshard relishing diligent life

By Daniel Wallenberg
Staff Writer

U.S. Rep. Glenn Poshard said he is starting to enjoy his life as a congressman as representative of the 22nd Congressional District.

Poshard was in Carbondale Wednesday taping a television show for cable as part of a visit to the 22nd District.

Poshard said he was still having trouble with the communications office in Washington offices but is getting along, staying organized and having some fun.

During the show, Poshard said the prime of U.S. Congress was very long and not as much relative social affairs as many people think.

He said his day as a congressman begins with a 6 a.m. breakfast, usually with a delegation from his home district. Then he returns to his office to meet with his staff at 9 a.m. to discuss constituent concerns and business of the day.

At 10 a.m., Poshard begins his committee meetings that usually last until about noon. Poshard is a member of one standing committee, the Education and Labor Committee, and three subcommittees: the Elementary, Secondary and Vocational-Education Committee, Higher Education Committee and the Human Resources Committee.

At 12 p.m., Congress goes into session usually lasting until 2 p.m. After the congressional session ends, Poshard said he meets with various constituents and lobbyists and attempts to remedy the nearly 100 problems constituents bring him daily.

From 7 to 10:30 p.m., Poshard said he attends receptions, usually four or five a night, given by delegations from the 22nd District who come to Washington and him with them to discuss upcoming legislation and concerns.

He then returns home to watch the 11 o'clock news and go to bed.

Poshard said the long schedule is rough on his family and himself.

Poshard said his family is adjusting to the time difference while he is in Washington.

Poshard said he tries to get his wife Jo, his son Dennis and his daughter Kris to Washington at least once a weekend a month. He also comes home every other weekend to see the needs of the district. On these return trips he leaves Washington on Thursday at 5:15 p.m. and spends Friday, Saturday and Sunday working. But Sundays are for his family.

Poshard said being a Congressman is a big responsibility but not so big that it should dominate the time spent with his family.

Baker: Soviet Union should assist with reconstructing of Afghanistan

BRUSSELS, Belgium (UPI) — Secretary of State James A. Baker said Wednesday the Soviet Union should participate in the reconstruction of Afghanistan now that they have left the country, in a televised interview.

"The last 18 years of Soviet aggression in Afghanistan are a tragic chapter in that nation’s history," said Baker in a taped interview shown on Belgian television.

"I think it is appropriate to now call upon the Soviets to take part in the reconstruction of Afghanistan."

Baker said in Moscow, in the middle of a weeklong tour of 14 European NATO capitals, made the comment during his stop in Madrid, after a meeting with Prime Minister Felipe Gonzales.

"The last 18 years of Soviet aggression in Afghanistan are a tragic chapter in that nation’s history," said Baker in a taped interview shown on Belgian television.

"I think it is appropriate to now call upon the Soviets to take part in the reconstruction of Afghanistan."

After a meeting in the Portuguese capital from Madrid, Baker held brief talks with Portuguese officials, then flew to Brussels, Belgium, to continue his NATO tour.

Firms destroyed in spite of efforts from fire station

TAMPICO (UPI) — Firefighters Wednesday were unable to save several businesses that caught fire, even though the buildings were right next door to the fire station, authorities said.

Tampico fire chief Wayne Cooper said officials were called at 8:30 a.m. about a fire at Joe’s Flowers and Flrich Home Heating. Firefighters from Tampico and two other area fire departments fought the blaze.

FDA declares improper lens cleaning causes blindness

WASHINGTON (UPI) — The government warned Wednesday that improper use of homemade saltwater cleansing solutions can damage their vision and even cause blindness.

FDA said homemade salt solutions can be safely used in the heat disinfection of contact lenses or just before heat disinfection, but the high temperature treatment kills any germs that may be in the salt solution.

If a contaminated solution is used as a rinse, wetting agent or preservative, the FDA said microbes can enter the eye and cause serious infections. Homemade salt solutions should also not be used with chemical disinfection of the lenses, the agency said.

Bloom withdraws from Chicago mayoral primary

White aldermen give support to Mayor Sawyer

CHICAGO (UPI) — Alderman Lawrence Bloom, who had been tutting his campaign as the only one with black-racial support, withdrew from the Feb. 28 Democratic mayoral primary.

Bloom, who sharply criticized Mayor Richard Daley's largely black support and State's Attorney Richard M. Daley's mainly white ethnic backing, said he was pulling out because he was unable to raise adequate campaign funds.

"I have had to depend on the news media to get my message across," Bloom said.

The white alderman then endorsed Sawyer.

"Mayor Sawyer was there when Richard Daley was not," Bloom told reporters. "Mayor Sawyer was there when the press was not. During those campaign appearances I saw the mayor grow in stature.

"Rather than simply being a 'Me, Too' candidate, he is capable of standing out and continuing the campaign. I had given up support for Mayor Sawyer.

The Chicago Board of Election Commissioners said, however, Bloom's withdrawal came too late to remove his name from the ballot.

Sawyer had been "excited" about gaining the Bloom endorsement.

"I'm excited about campaigning with Larry Bloom," he said. "The endorsement is significant because it gives my campaign a big boost. The campaign is about a dead heat now, and the endorsement will move a lot of people, particularly the undecided, throughout the city.

Bloom's withdrawal came as no surprise to political observers.

The alderman, who ran on a platform of reform and claimed he was the only one of the candidates whose support was evenly divided between the city's black and white communities, failed to gain significant ground on Daley and Sawyer in the polls and was also having trouble raising campaign funds. Both Daley and Sawyer have managed to raise campaign war chests in excess of $3 million each.

The latest poll commissioned by Sawyer indicated that Bloom is running significantly behind on Daley's lead in the nomination. The poll was taken right after the candidates' Feb. 7 debate and showed Daley still the front-runner with 57 percent, followed by Sawyer with 33 percent and Bloom with 20 percent.

The poll showed 60 percent of Sawyer's support coming from the black community and 40 percent of Daley's support coming from white voters.

"We're ecstatic," Sawyer campaign manager Reymond Roehm said of the poll. "We were at 9 points (behind) in January. Now people have seen Daley and his lack of experience, lack of knowledge on the issues and they're making their decision. We'll get what we need to pass Daley in the next week."

Soil in most parts of the state recharged, ready

SPRINGFIELD (UPI) — There's good news for farmers concerned about spring planting — the soil in all but the very westernmost part of Illinois is at or close to its moisture capacity, the state's climatologist said Wednesday.

Wayne Wendland, state climatologist at the Illinois State Water Survey, said soil moisture overall statewide is substantially better now than it was either last year at this time or last fall.

Precipitation for the state was above average in September, October, December and January, but statewide growth for November was 500 percent above normal, he said. That precipitation has not been evenly divided across the Illinois, however, with the line of crops continuing above normal and the northern sections continuing drier than average.

"Wendland said a mild January eliminated frost on the ground and helped the soil to drink in moisture.

"When planting starts in the area east of a line from Moline to St. Louis, the soil will be at even better moisture levels this year than it was last year," Wendland said.

Dry crops do not require field capacity to grow, but it helps them get off to a good start, Wendland said.

Still, Wendland is setting this season will be better for farmers than last, noting that precipitation records show that only once in the past 111 years was severe drought followed by another. That occurred in 1963 and 1964, but the second year was not as dry, he said.

EDS also has outstanding opportunities for experienced Information Processing professionals.

Opportunities for Programmer Analysts, and

Automotive Customer Assistance Professionals

Jump into an entry-level career that will take you places at EDS.

In an EDS developmental program, your career potential can reach new heights.

You'll gain the experience and skills you'll need to move your career years ahead — experience you can only gain from the world leader in the computer and communications services industry.

EDS is looking for candidates who can help make things happen. If you are interested in applying your talents in the information processing services industry, you won't find a better place to grow than EDS.

Our entry-level developmental programs are nationally recognized as models for the industry. They provide technical challenge, professional expertise and the business savvy you'll need to become one of the industry's best-prepared professionals.

Systems Engineering Development

- 4-year college degree (any major) with a 3.04.0 overall GPA preferred

- Demonstrated technical aptitude

- GPA 3.0 and above

- Interest in a customer or management service center

- For interviews February 21st, 22nd and 23rd, sign up at the Placement office.

Automotive Customer Assistance

- 4-year automotive technology degree or related discipline; or an associate's automotive technology degree combined with a bachelor's degree (any major)

- Interest in a customer or management service center

- For interviews February 21st, 22nd, and 23rd, sign up at the Placement office.

All positions also require: excellent communication skills, a strong record of achievement and the ability to relocate.

An EDS representative will be on campus to provide students with information on our Systems Engineering Development and Automotive Customer Assistance Programs.

We are sponsoring an EDS Information session at the university's career opportunities on Tuesday, February 21, 1969, from 7:00 p.m. to 9:00 p.m. in the Mackinaw Room of the Student Center.

EDS has already been conducting on-campus interviews February 21st, 22nd and 23rd (see the schedule in the above descriptions). If you want to get a jump on campus, contact the Placement Office for sign-on. Or send your resume to:

Two schools in Decatur set to close

DECATUR (UPI) - A Decatur public school official Wednesday announced declining enrollments and a lack of funding caused the city's school board to close two elementary schools.

The schools, Criville Spencer Elementary and Pershing Elementary, will be closed at the end of the current school year following Tuesday night's decision by the board.

Another Decatur school, Mary French Elementary, will be converted to a magnet elementary school in a year or two and will draw enrollment from the entire city.

Jahala DeBoe, director of research for the Decatur public school system, said closing Spencer would save the school district about $100,000 a year in salaries, maintenance, utilities, overhead and insurance costs.
Controversy over origin date of Shroud of Turin continues

WASHINGTON (UPI) — Even as researchers reported "conclusive evidence" the Shroud of Turin only dates back to the Middle Ages, another group of scientists charged dating tests did not consider possible radiation from Jesus' resurrection.

In an article in the British Journal Nature, three prestigious laboratories officially released results of radiocarbon dating tests on the shroud — a piece of cloth 14 feet long by 3 feet wide that appears to bear the scored image of a crucified man — which some believe was used to wrap Christ's body.

ALTHOUGH THE Roman Catholic Church has never declared the shroud to be authentic, it has been widely venerated by generations of believers.

The results, which were generally discussed last year, "provided conclusive evidence that the linen of the Shroud of Turin is medieval," most likely dated from between 1260 to 1390, the researchers wrote. The radiocarbon dating generally agrees with the shroud's first appearance in the 1380s in Lirey, France, where a knight presented it to the local church. It was brought to Turin, Italy, in 1578.

In 1987, church officials finally permitted scientific tests to be run on a small piece of the shroud, leading to the report published by Nature.

BUT IN a letter published in the same journal, a Harvard University physicist sought to keep the controversy alive by suggesting the scored image on the shroud may have been made by energy emitted from a resurrecting body.

Thomas Phillips a researcher with Harvard's High Energy Physics Laboratory, contends if the shroud was Christ's burial cloth, it would have been present "at a unique physical event: the resurrection of a dead body."

Phillips speculated such a resurrection could have radiated light, heat or even neutrons, which are atomic particles that could change the chemical make-up of the shroud and upset the accuracy of radiocarbon dating methods.

BUT OXFORD University's Robert Hedges, who was part of the dating efforts, criticized Phillips' scenario as "exceedingly remote." "If a supernatural explanation is to be proposed, it seems pointless to modify any scientific measurement on the shroud at all," said Hedges.

PHILLIPS CLAIMS the radiocarbon tests are the first results from years of scientific investigation to indicate the shroud is not authentic. He said no scientist has been able to explain how an artist could create the three-dimensional image and other studies have shown that most of the pollen on the linen shroud came from "around Jerusalem."

As early as 1390, however, French Bishop Pierre d'Arcis reported to Pope Clement VII that the shroud was a forgery and the artist who had created it had confessed.

PHILLIPS SAID he thinks further tests should be done to test his theory of neutron radiation, preferably using cloth taken from a different area of the shroud.

He said while he personally believes Jesus rose from the dead, he added he would not be bothered if further tests would disprove his theory about the shroud.

But, he added, "There are those scientists who operate the assumption that there is one resurrection. The question is whether they could imagine how religious doubts about the authenticity of the Shroud could be resolved."

February frenzy
If history repeats itself in 1990, the Shockers may be close to celebrating a Valley title.

Under coach Eddie Fogler, Wichita State has a history of peaking down the stretch, shown by a 16-3 mark in the month of February since Fogler's arrival in 1986.

Steve Grayer, the Shockers sixth man, has graduated from his bench spot to replace preseason Player of the Year Sasha Raduovich at center. Over the last six games, Grayer has averaged 13.3 points and 8.5 rebounds.

Raduovich is averaging just 5.7 rebounds per contest and has slipped out of the MVC's top 20 in scoring.

Shockers senior Dwight Praylow has captured national attention with his three-point shooting. Praylow has amassed 44 of 96 shots from the 19-fo0t line for a 45.8 percent, good for fourth in the country and tops in the MVC.

Winning ways
Illinois State head coach Bob Donewald is closing in on another milestone this season. The 11-year Redbird coach, who captured his 200th career victory earlier this season, is four wins away from tying former Kansas coach Phog Allen for eighth place in all-time wins as an MVC coach.

Donewald has 165 career wins in the Valley. The Shockers boast Drake tonight.

No. 1 x 3

Bradley's Anthony Manuel continued his play of the Year-like pace. The senior is still on track to become the first player in MVC history to lead the league in three statistical categories. He leads the Valley in scoring with 22.5 ppg per game, 8.5 and steals with 2.9.

Dana Thurman received the nod as Player of the Week. The junior transfer, who along with SIU-C's Freddie McSwain is a top contender for newcomer of the Year honors, scored 15 points, grabbed 27 rebounds and hit 18 of 30 shots from the floor for 60 percent in three games.

111 Washington 529-3808
The Dallas Mavericks Wednesday traded Mark Aguirre to the Detroit Pistons in exchange for Adrian Dantley and the Pistons' first-round draft choice in 1991.

Aguirre, 29, a 6-6 forward, is the Mavericks' all-time scoring leader with 12,930 points in eight seasons. He holds virtually every team scoring record, including most points in a game, 61, in a 2001 game against the Miami Heat. Aguirre said he was sorry he would have to leave the Mavericks and said, "I love (owner) Donald Carter. I'll die for him." Aguirre said, "The chance to play in the Eastern Conference is something I needed to do, but in my heart I will always be a Maverick. I feel very close to Mr. Carter and many people in the organization and I can't get rid of that." Aguirre said he was "misunderstood by the press and in different situations," but said "the fans were great here. I had a good relationship with them.

He added: "I'm going to get out of here as soon as I can. I'm gone.'

Greg Yarbrough, Mavericks' general manager, said the trade of Aguirre was a strategic decision. "We have some wonderful memories of Mark's offensive contributions and we're looking forward now to adding some of those memories to Adrian Dantley's fit into a pretty solid team," he said. Dantley, in his 13th NBA season, helped Detroit reach the 1988 NBA Finals, in which the Los Angeles Lakers prevailed in seven games.

COLUMBUS, Ohio (UPI) — Jay Burson, leading scorer on Ohio State's 1988 ranked basketball team, suffered a fractured colon Saturday during the Buckeyes' loss to Iowa Monday night, and his availability for the rest of the season was in doubt.

"If he asks my opinion, I would say he's out for the rest of the season," said Buckeye's head coach. "But that's something he's probably not going to ask me about at this time, Ward and Dr. Walter Peters of the university's athletic department's office said.

"We're hoping for a quick recovery," said Ward. "But that's about all we can say.

Burson's injury may end career

COLUMBUS, Ohio (UPI) — Jay Burson, leading scorer on Ohio State's 1988 ranked basketball team, suffered a fractured colon Saturday during the Buckeyes' loss to Iowa Monday night, and his availability for the rest of the season was in doubt.

"If he asks my opinion, I would say he's out for the rest of the season," said Buckeye's head coach. "But that's something he's probably not going to ask me about at this time, Ward and Dr. Walter Peters of the university's athletic department's office said.

"We're hoping for a quick recovery," said Ward. "But that's about all we can say.

The coach was expected to remain in the hospital another week to 10 days, the doctors said. They said the results of laboratory analyses of the cancerous material removed during the surgery were expected within two to three days.

Stewart's doctor advising early season vacation

The Dallas Mavericks trade Aguirre to the Detroit Pistons for Dantley and 1 plan to

The Pistons play at Sacramento Friday, and Aguirre will join his good friend Isiah Thomas.

"I'm going to Detroit to play basketball," he said. "Ish and I had always talked about being on the same team since grade school."

Aguirre drew the Maverick's management several times during the season.

In one instance, some observers saw giving an obscene gesture to the media; in another, he was handed out of a game during the warmups, claiming his ankles were too sore.

Last week in Portland, Aguirre scored only seven points in the first half and looked so listless he was yanked by coach John MacLeod. However, Aguirre bounced back and played two games in a row before the trade Wednesday.

If the Mavericks participate in the 1988-89 Western Conference playoffs, the Pistons will also receive Cleveland's 1989 first-round draft choice (obtained by Dallas in June 1988 in exchange for Mark Price and Mavericks' 1991 second-round draft choice.

"The trade of Mark Aguirre from the Mavericks to the Pistons is important to us to attempt to replace his scoring because when Mark's game is on, he's a very effective scorer both from the floor and post outside."

This is the second time I've looked up with Adrian. He was the rookie of the year for the '78-'79 season and I joined the Buffalo Braves as president/general manager. He's been one of the truly incredible scorers in NBA history.

"We've have some wonderful memories of Mark's offense and we're looking forward now to adding some of those memories to Adrian Dantley's fit into a pretty solid team," he said.

Dantley, in his 13th NBA season, helped Detroit reach the 1988 NBA Finals, in which the Los Angeles Lakers prevailed in seven games.

**Men facing must-win in league showdown**

By David Gallianetti

For Rich Herrin and his Salukis, the race is about to begin. At 7:35 tonight SIU-C will invade the Omaha Civic Auditorium, a massive 13,739-seat building, to take on the Blue Jays, who with Wichita State own a share of the Missouri Valley Conference lead. The Salukis are tied for third with Tulsa at 5-3. The Blue Jays are also tied with Western Illinois and Creighton for first at 6-3.

"We feel we control our destiny now," Herrin said. "We have won four straight league games, but the toughest part is yet to come. We need to come up, because we face all upper division teams. If we're going to finish strongly we need to set the momentum now."

Nothing would be easier. After Creighton, listed by ESPN as one of the seven biggest surprises in the nation, the Salukis must deal with Tulsa, now tied with Wichita State in order to claim the Valley title.

SIU-C's 70-59 win over Creighton last week, its third of the season, was its only MVC crown in 1977 when they shared the trophy with New Mexico State. The Salukis also remain alive for the third-place post, a 26-win season, which would be the first since 1975-76 when SIU-C won 27.

The Salukis last season appeared was also in 1975-76, when then-coach Paul Landry's team defeated Arizona State 81-77 and fell to Wake Forest 84-61 in the NCAA Southwest Regional.

The Blue Jays nailed SIU-C in their first meeting Jan. 25, 84-78 at the Arena. Sophomore guard Bob Harstad, who leads the MVC in rebounding with 9.8 game, and is second in scoring with 17.6 points per game, scored 24 points and banked the game's momentum.

"I feel we are better than Creighton," Herrin said. "They got us at home so it gives us some incentive to play. They are coming in with some momentum after dropping two league games."

Herrin is referring to the Blue Jays' loss to Drake, 71-62, and 66-62 loss to Wichita State. In the Tulsa loss, Harstad was held to five points and did not score.

Creighton head coach Tony Barone said the big key to the Blue Jays success is senior point guard Chad Barone.

"He handles the ball 90 percent of the time," Barone said. "He's our distributor. He's the reason Porter (Moore) gets (three-pointers). He's the reason Chad (Gallagher) and (Harris) get the post-up plays.

The Blue Jays lead the MVC in defensive field goal percentage, allowing their opponents 44.2 percent from the field per game. SIU-C also leads the league in fewest turnovers (13.6 per contest) and blocks (3.5 per game). Freshman Tony Harvey tops the conference with 2.1 per game.

The Salukis are second in the MVC in scoring, averaging 80.3 points per game.

Despite the pressure and anxiety with the Valley race, Herrin said he thinks his team can more than hang with the Blue Jays at the Arena.

"All of them have been on top of their game. They are a very good team," Herrin said.

• SIU-C is coming off a 78-62 victory over Wichita State, the team in third place behind Creighton and the Salukis in the Valley.

**Salukis eyeing Tulsa game as Hurricane hosts Wichita**

By David Gallianetti

With less than two weeks of the Missouri Valley Conference schedule remaining, the top spot is up for grabs.

With a 66-62 victory over Creighton Monday, Wichita State is playing interesting by pulling into a first-place tie with SIU-C and Tulsa for third at 8-3. SIU-C and Tulsa are dead tied for third at 6-3 each.

The Blue Jays' 24-point increased pressure on all four teams today. The Salukis travel to Creighton, attempting to dump Tony Barone's team a third straight time, and Wichita travels to Tulsa, a game coach Rich Herrin and the Salukis will have their eye on.

"The Blue Jays are having an eight-game home court win streak against tonight's action. The Golden Hurricane is 10-0 when leading at halftime this season.

**Searching for No. 1**

With the end of the MVC season drawing near, candidates for Player of the Year are making the minds of Valley coaches.

Salukis' Kai Nurnberger received a vote last week from Illinois State coach Bob Donwiler, after news he was named Player of the Week.

Bradley's Anthony Manuel is among the contenders, as he is closing in on finishing the top of the three statistics categories: scoring, assists and steals.

Creighton sophomore Bob Harstad leads the MVC in rebounding with 9.8 per game and is second to Manuel in scoring with 17.6 per contest. But Creighton coach Tony Barone is pointing to senior guard James Farr for the honor.

"You'd have to be on drugs to think he's not," Barone said. "He's the absolute reason we're winning. He's not flashy number-wise, but he keys everything we do defensively, as well as getting in.

**OMAHA QB bail set at $10,000**

By Troy Taylor

With the University of Central Missouri quarterback's arrest, which came on the heels of several other unsavory incidents and alleged criminal activities on the part of Souer football players and coaches, created an uproar off and on campus.

The editor of the student newspaper in a column Wednesday called on Coach Barry Switzer to clean up the football program or resign. If you are not going to do anything about it, get out," wrote Ron Whitmer. "Take responsibility for your own actions."

**OKLAHOMA CITY (UPI) — Oklahoma quarterback Charles Thompson, who tested positive with selling cocaine to an FBI agent, appeared in court Thursday before a magistrate who set bond at $10,000 and ordered the player to stay away from his mother.

Thompson was freed about two hours after his appearance when relatives posted the 10 percent of $10,000 required for release.

Thompson's release was delayed because relatives brought a personal check for $1,000 rather than cash or a money order.

Thompson, who was expected to be the Sooners' starting quarterback the next two seasons, waived his right to a preliminary hearing and government prosecutors withdrew their request for detention.

The player responded "Yes, ma'am," several times when Robin Caubron, the U.S. magistrate, asked if he understood the proceedings, but made no other comments.

Thompson, who appeared in a black suit and tie rather than the orange coveralls assigned to prisoners, faces up to 30 years in prison and $1 million in fines.

Thompson's arrest, which came on the heels of several other unsavory incidents and alleged criminal activities on the part of Sooners football players and coaches, created an uproar on and off campus.

The editor of the student newspaper in a column Wednesday called on Coach Barry Switzer to clean up the football program or resign. If you are not going to do anything about it, get out," wrote Ron Whitmer. "Take responsibility for your own actions."
