Fee usage, but not cost, may change

By Rick Davis
Daily Egyptian Staff Writer

Subcommittees of the Student Fee Study Committee will make recommendations this week which would not substantially change the total costs of fees paid by SIU students but would drastically alter their use.

The subcommittee reports must be completed by Wednesday and turned over to the committee. The committee, headed by Dean of Student Services Wilber N. Moulton, meets Friday and can change or modify the subcommittee recommendations.

A final report on changes in University fee usage is scheduled to be completed before Feb. 1, Moulton said, and sent to Chancellor Robert G. Layer.

Major recommendations coming out of subcommittee meetings this week include lowering the $10.50 activity fee to $6, establishing a separate mandatory $6.7 Health Service fee, raising the University Center fee from $5 to $10, and dividing the $10 Athletic fee equally between a development fund and athletic operations.

Other recommendations are to keep the Student Welfare and Recreation Building Trust Fund Fee (SWARF): $15 and to eliminate several incidental fees.

Activity Fee

The Activity Fee subcommittee recommended lowering University athletics ($80,300 allocated in 1976-77, Student Medical Benefits (Health Services, $277,000), Leadership Training Committee (LTC) $7,000, Women's Intercollegiate (

Scherschel demands Trustee resign

By Chuck Hutcheson
Daily Egyptian Staff Writer

Tom Scherschel, SIU student body president, demanded the resignation of Board of Trustees member Martin Van Brown, of Carbondale, Tuesday, and said the board has done more than anyone else to “obstruct the freedom of speech, freedom of the press and the freedom of others to happiness.”

Scherschel, speaking to a crowd estimated at 125 persons in the annual state of the Car-

Scherschel also spoke of several projects started by the student government such as the co-op stores and the free medical clinic.

Since last May’s disturbances, Scherschel said, there had been “a need for a new direction of priorities.”

He commended Bruce Vec- tor, a doctor who volunteers his services to the free medical clinic, as “a man truly dedicated to helping people. Scherschel said the student government has been working

hard on such matters as voters registration and the fight against tuition increases.

The tuition increase was recom- mended by the Illinois State Board of Higher Education, despite petitions, letters and advertisements of students and their parents, had political im- plications, Scherschel said.

If the tuition hike is passed by the General Assembly, he said, “the dream of making education a right instead of a privilege will be ruined.”

City seeks grant to train workers

By Dave Maraman
Daily Egyptian Staff Writer

The Carbondale City Council Tuesday night authorized City Manager William Schladt to apply for a grant from the U.S. Department of Labor to conduct a Public Service Careers (PSC) program.

The grant would provide the city with funds to train disadvantaged persons to acquire job skills for employment or advancement as city employees.

If the city’s application is approved it would receive $163,000 to conduct the program.

The city would be responsible for paying the salaries of those trained.

Robert Metzler, city’s director of public service and director of the PSC program, said the help of other Federal grants, the city could obtain $144,000 worth of manpower for a $89,000 ex- penditure.

The city however is not committed to a specific amount until the application is reviewed by the Department of Labor.

In other action, the Council established a non-profit commis- sion to prepare a new non-profit ordinance. The current ordinance which dictates the city’s master zoning plan has caused considerable confusion for the Council in past months. The commission will be dissolved as soon as the new or- dinance is written.

Block, bridge club to have speaker
By University News Services

William Kammle, SIU associate professor of animal industries, will speak at the meeting of the SIU Block and Bridge Club 7:30 p.m. Thursday in the Agriculture Building Seminar Room.

Kammle, a member of the SIU animal industries faculty since 1954, spent most of the 1968-70 academic year as a Fulbright Professor at the University of Novi Sad in Yugoslavia, working primarily in area of beef cattle production improvement.

Vets aid deadline
set for Jan. 25

Joseph D. Zimny, coordinator of Student Work and Financial Assistance, has announced that Jan. 25 will be the final deadline for students who are receiving benefits from the Veterans Administration to have their official class schedule verified.

Zimny said that if students do not have the schedule verified they will lose the benefits.

Yugoslavian student says, home builds love for theater

By John Houghton
Student Writer

Love of the theater begins at home. Or at least in the hometown.
That's where Dasa Dradic, a graduate student in theater at SIU, placed credit for her interest in theater; her upbringing in Belgrade, Yugoslavia.

"Belgrade is small—about a million people—but it is rich in spirit and cultural life," Miss Dradic said.

Miss Dradic, 24, was born in Zagreb, and attended high school and college in Belgrade.
Belgrade has art exhibitions, theater houses and youth centers where high school students compete in writing plays and poetry. Miss Dradic said:

"When I started high school I chose the acting class to work on the cultural happenings in Belgrade." Belgrade theater companies perform in factories and small towns, she explained.

You won't find a high school student there who doesn't go to the theater at least once a month, she said.

Miss Dradic has been a busy woman since she received her B.A. from Belgrade University in American literature and English in 1968.
That was also when she started working for a Belgrade publishing house, and taught English in the People's University, a working-class school with many night school courses. In her spare time she translated English and American theater criticism.

When Miss Dradic received a Fulbright assistanship to study theater, she also landed a job as research assistant to Prof. Herbert P. Marshall in the Center for Soviet and Eastern European Studies at SIU. She is compiling an archive of Yugoslavian plays and critical essays, and translating several of them from English. She is also writing a retrospective review of Belgrade theater, which recently had a 100-year anniversary.

Besides English and Serbo-Croatian, her native tongue, Miss Dradic speaks Italian, "a little French," and understands Slovenian and Macedonian, the other two main languages in Yugoslavia.

Miss Dradic finds the same trends in European theater as in American or English theater. "Especially now, at the gates of the 21st century, I don't believe in separating theater by countries," she said.

"The problems, the conflicts, the dilemmas are the same. This leads to similar ways of working..."
Opinion

Gardiner case: instant replay

The SIU Board of Trustees has done it again. During their meeting last week, the trustees made a little clearer what many SIU students and faculty members already know: academic freedom does not really exist at SIU.

In complete disregard of a faculty grievance committee's report and Chancellor Robert G. Layser's recommendation, the Board unanimously approved a motion denying a pay raise for C. Harvey Gardiner, research professor of history.

Why?

Because Gardiner has criticized the University, of course. Not that a single Board member publicly made such a statement. The trustees learned last quarter, in a case involving another outspoken faculty member, that they cannot come right out and say such things. But the fact that Martin Van Brown, the trustee from Carbondale who made the motion, refused to comment on the reasons speaks for itself— as does the list of Gardiner's activities.

Gardiner has been an outspoken critic of the Center for Vietnamese Studies. Last spring he labeled former SIU president Dwayne W. Morris "out of step" with the times. He called for the resignation of Board members for similar reasons.

And so, as Board chairman Lindell Sturgis said last quarter in a case suspiciously similar to Gardiner's, "The Board felt it was in the best interests of the University not to have people of that caliber (outspoken critics) on the faculty.

Sturgis did not get his way. This time the faculty member in question retained his contract. Using slightly different words, the Board might have won this one. Denied a raise, Gardiner might tire of a school which measures his salary against his beliefs and leaves.

And academic freedom is once again mocked at SIU.

Letters to the editor

Faculty member urges voters to oppose plan

To the Daily Egyptian

I write this letter to urge all campus voters and my faculty colleagues in particular to vote against adoption of the plan now before them from the Joint Task Force.

It would be possible to put forth serious run in my opinion, final criticism of the Task Force plan on the basis of a close analysis of its provisions. However, I consider the fact that this has been done quite adequately by several speakers at the various meetings held on campus, called for the specific purpose of discussion. Instead, I shall only mention what, to me, are fundamental and far reaching errors on which the whole proposed scheme of governance is based.

Implicits for the validity of the proposed scheme is the assumption that in the making of general policy decisions for the University, wisdom is to be found in the taking of major votes over a representation of all the University's constituent bodies. There is no basis in fact or theory for this belief. In the ad

New fashion

The numerous construction sites on campus and the wet Southern Illinois weather have caused a new fashion trend at SIU: the muddy mitt.

Student government has a big job to do

To the Daily Egyptian

The Student Senate voted to postpone the referendum on the proposed University Senate from Dec. 18 to Jan. 27 through 29. The reason for this action was to provide adequate time to inform the student body on the content of the Joint Task Force on Governance proposal.

However, it may not increase the vote turnout but it affords the Student Senate an opportunity to represent its constituency.

Let us hope that the Student government will live up to its word on an issue as important as this.

J. Michael Manno Co-chairman Joint Task Force on Governance

Liquor license rejection makes student marvel

To the Daily Egyptian

I could only marvel at the fact, reported in the Jan. 14 Daily Egyptian, that three local merchants blocked the Penney's liquor application with such alacrity.

Mr. Landers: concern for our children is admirable but I'm surprised he hasn't condemned party house and UMSL Applicant magazines on the same grounds. The Board's executive displayed the finest instincts in his concern for a competitor's security and profit margin. Mr. Palmer should be commended for his high opinion of Carbondale's citizens. Perhaps his broader associations put him in a knowledgeable position. Thank heavens we live in a time when men's actions are no longer governed by gross commercial interests.

Strangely enough, malt beverages may be sold in Vermont ONLY by food retailers and, for that reason, one finds gas stations and bookstands which have added a grocery section. They apparently have survived waves of nervous children and have been thwarted under control.

We certainly wouldn't want any Carbondale merchant to gain a competitive advantage. That might actually drive food prices downward.

Opinion and Commentary

EDITORIALS - The Daily Egyptian encourages free discussion of current issues through editorials and letters on these pages. Editorials - labeled Opinion - are written and signed by members of the student news staff and by students enrolled in journalism courses and represent opinions of the authors only.

LETTERS - Readers are invited to express their opinions in letters which must be signed with name, classification, address, telephone number. Letters must include typewriter, and their length should not exceed 250 words. Letter writers should respect the generally accepted standards of good taste and are urged to make their points in terms of issues rather than personalities. Acceptance for publication will depend upon the limitations of space and the timelessness and relevance of the matter. Unsigned letters will not be accepted, and authorship of all letters must be verified by the publication. All letters for publication will be typed, double spaced, and will not be returned. The Daily Egyptian will determine content of the opinion page. Other material on this page and in the paper is not an official reflection of the Daily's opinions and is not a function of the Daily Egyptian. Letters representing the opinions of the Daily Egyptian are not acceptable to other publications, syndicated columns and articles, and other political or opinion articles authored locally.

Police chief stresses involvement

By David L. Mahoney  
Daily Egyptian Staff Writer

Communication and more involvement in the community were the keys in Police Chief Joe Dakin's plan for building a more effective police force in Carbondale.

Dakin, who began his duties just a month ago, said there has been a lack of communication between police, students and student leaders and that he has begun to attack this problem by speaking to student groups individually. He said he is willing to speak to any group of students, regardless of who they are or what political philosophies they uphold.

"I've always been able to talk to students. I see no significant differences between their concerns and mine," said Dakin, who once directed a law enforcement program at Michigan's 14,000-student Macomb Community College.

"My door is open to anyone. If I'm tied up, I'll make an appointment," Dakin said.

"I'm very community relations oriented," the police chief said. He emphasized that, by community relations, he does not mean public relations, which he said infers trying to sell a service. Community relations, Dakin said, means creating an understanding between police and community of each other's problems.

Sessions develop sensitivity

Sensitivity training is one method for accomplishing this understanding, according to Dakin. Carbondale police officers participated in two community sessions last year sponsored by the Illinois Human Relations Commission. Police and community residents met together at these sessions and tried to better understand one another under the direction of a commission psychologist.

"We are going to try to continue these sessions. It is one of many things we can do. I hope to attend myself sometime," Dakin said. The next session will be held in Vandalia Feb. 11-14. Dakin said such as the sensitivity sessions is needed to professionalize the police department. He said his men have been very responsive to such training and he hopes to take advantage of any training sessions available.

"The problem here, which I feel is a plus factor. Many of the men aren't in the over-30 group," said Dakin, who is himself only 32 years old. He said that, because the men are young, they need training and experience.

Functions change drastically

Dakin said the public also needs training in the functions of the police department so they may understand some of its problems.

He said the functions of a police force have changed considerably in the past 10 years.

Dakin said that an officer is expected to be a "jack of all trades." He must be a psychologist, sociologist, legal counselor and law enforcer, and often little more than a high school education.

What kind of world?

State Department never popular

By Harry S. Ashmore  
Los Angeles Times Syndicate

The Department of State could never have been identified with any American institution in the frontier days the country's diplomats were largely ignored and, in the long period of political isolationism from the Civil War to World War II, they were generally lampooned.

Ambassadors were depicted as overt or self-designated aristocrats and in popular legend career foreign police men were cast as effete country cousins. They excited little more than derisive laughter from the ebullient, hard-hitting Americans who were prevailing life style of the nation with their preoccupation with the internal affairs of their own country.

The tradition of popular suspicion of those who dare to do romance was continued in the 20th century since the United States, the only major power emerging with intact resources from World War II, was preoccupied with building up the Pax Americans.

The once strict foreign service has expanded enormously and has acquired all sorts of specialized appendages (economic, intelligence, information, scientific). And some secretaries (Acheson, Dulles and Rusk) have become popular villains-heroes as the cold war polarized American politics.

But the fact is that even with all its new panoply the Department really hasn't amounted to much. The condition is attested by a special report that in a self-inflicted wound the leaving press of a year long survey by 250 career professionals who concluded that throughout this quarter century of expansion the foreign service apparatus has been affected with "interdepartmental affairs.

The hard-nosed outside critics could hardly expand upon the summary judgment of the 13 departmental task forces.

With the exception of an active period at the end of the '60s, the department and the foreign service have languished as creative organs bummed and helplessly chewing on the cud of daily routine while other departments, especially the State's White House staff--made more innovative contributions to foreign policy. It's a stark, authoritative testimony to the militarization of American foreign policy. It bears out the old saying: "The State Department's job is to maintain peace and the Defense Department's job is to make sure when we have peace it is maintained.

This is stark, authoritative testimony to the militarization of American foreign policy. It bears out the old saying: "The State Department's job is to maintain peace and the Defense Department's job is to make sure when we have peace it is maintained.

The State Department effectively went out of the foreign policy business when it was decided to forge a line of military containment around the Soviet Union from Western Europe to the Middle East. This policy was later expanded into Asia to apply similar pressures against the Communist Chinese. In some 26 countries we established bases for our missiles and aircraft and these we have continued to man with American forces. As a result, we have de facto forged bonding mutual assistance pacts with nations spread clear around the globe.

For good reason these American garrisons have long been called 'trip-wire' forces. If they were attacked, the whole might of the American military in clashing his atomic arsenal would be triggered in retaliation. Thus the host country was automatically assured of massive countermeasures capable of nullifying whatever weasels the diplomat might write into the formal treaties.

Basketball coach
Profile: in action
Paul Lambert

There's a new face at the SIU Arena. It belongs to Paul Lambert. He is expansion basketball coach.
Lambert also brought a different kind of basketball to SIU. The Salukis used to be known for their deliberate, controlled style of play. Lambert's team runs and shoots more than Arena fans have been accustomed to.
And Lambert also brought something different in sideline behavior.
He hollers. He gestures. He bounds from the bench to wave and shout encouragement or to vent frustration. And he lets the officials know when he thinks they've made a bad call. And that has cost the Salukis technical fouls a couple of times.
Lambert is what you'd call an 'active' coach. Colorful is the word.

'If you gotta hit 'em...'

'Cheap foul...'
The Black American Cultural Resource Center has begun a series of Black Week seminars for students in dormitories, according to Milton Hill, administrative assistant to the director.

The seminar for Thompson Point area began Tuesday in Levit Hall, while the remaining ones are scheduled for the Oak Room of Brush Towers Thursday and the basement of Egyptian Sands South Monday.

Hill said the seminars will continue to be held at the same time and place on those days at 7:30 p.m. weekly for the remaining of the quarter.

"We won't be attempting to politicize anyone, but to talk to the students to find out their interests, and the concerns they may have about the campus," Hill said.

Hill said that he and Ron Brathwaite, coordinator for the Cultural Resource Center, will do their best to solve any problems the students may have.

We will also be bringing Future Farmers group plans business meeting

By University News Service

The Collegiate Future Farmers of America chapter at SIU will hold a business meeting and program at 7:30 p.m. Wednesday evening in the Agriculture Building Seminar Room with newly installed doors in charge of.

Speakers in these seminars will be able to help them directly, such as representatives of the Student Work and Financial Aid Office, the Ombudsman and a representative from Powell's Farm Service.

"Serious question

Ruling on firearms delayed

Circuit Court Judge Everett Proctor Monday delayed making a ruling at the preliminary hearing of two Chicago men charged with illegal possession of firearms. The two are Robert Camer and Thurler Wilson, both 21.

They were arrested in Carbondale last Nov. 13 after police allegedly found ammunition on their persons and a .45 caliber and a .2 caliber revolver in the U-Haul van they were driving in.

Presence, who said there was "serious question" about the probable cause of Carbondale police stopping the van in the first place, said he would make a decision in a memorandum opinion to be handed down Jan. 25.

Camer and four Carbondale policemen involved in the arrest testified during the hearing. Wilson was not in court.

Carbondale Sargeant Gerry Reno, superior officer in the arrest, testified the van was originally stopped because it was traveling in an "irregular route" in the northeast section of the city.

Under questioning by Jef feroy R. Haas, attorney for the defendants, Reno said Wilson and Camer were not questioned about their alleged route before they were searched.

Jackson County State's Attorney Richard E. Richman said probable cause for the initial stop was established by the generally tense situation in the community, the fact the van had New York license plates and the driver had "no apparent destination."

Dames Club will meet today

The SIU Dames Club will meet at 7:30 p.m. Wednesday in the lounge of the Home Economics Building. The club will hear representatives of the Jackson County Family Planning Service.

Other items on the agenda include plans for the upcoming Mrs. SIU contest. The annual event is planned for Feb. 27.

The Mrs. SIU contest is open to all married SIU students. The contestant need not be sponsored by any particular group.

Marsha Gustafson, president of the club, said that applications for the contest will be available at the meeting or from Mrs. Emily McNeil, chairman of the event. There is a $1 entry fee for the event.

Foreign policy lecture set

Howard Jacob, visiting professor at SIU, will lecture on "Specials Abstraction and Foreign Policy," Thursday, 4:15 p.m. in the Agricultural Building Seminar Room 221.

The speech, sponsored by the Department of Government, will provide a critical analysis of American foreign policy emphasizing U.S. policy in Vietnam.

Trivers, who received his Ph.D. in philosophy at Harvard before entering the Foreign Service in 1961, has held top posts on Eastern European Affairs in Berlin, and on Soviet Bloc analysis.

The Foreign Consult General in Zurich, Switzerland, joined SIU in 1969.

LOW LEAD GASOLINE!!

Lower Priced Than Regular?

Yes! This week's Low Lead gasoline is even less per gallon than regular priced gasoline at LARRY'S SERVICE

FACULTY: DO YOU UNDERSTAND?

Believing that knowledge and understanding of the contents of the proposal, and the implications of the proposed amendments are important, the editors of the Daily Egyptian have not included all the names of university faculty members who have not signed the document, we offer the following questions for faculty study.

Do you want a University Senate or a Faculty Senate? Do you realize that this document proposes a Senate for the University? Do you know that more than a year ago the Board of Trustees received from a diverse faculty committee a resolution for a Faculty Senate? And that the Board, on August 3, 1970, indicated the document should be used as a guideline in reorganizing? Why has there been no continued public discussion of that document?

Do you want a proposal that increases the advisory relationship between important groups of the university campus? (p. 7, para 1; p. 2.1; p. 3.1) (page numbers refer to document dated November 20, 1970.) Are you willing to reduce your current 100 percent responsibility and authority and deliver majority control to a University Senate which is only 42 percent faculty? (p. 4)

Do you believe a workable system can be established for handling student actions rather than the printed contents of the document? (p. 2.1) Are you not interested in important matters clearly stated or even included in the proposal?

Is political action to be a primary job responsibility of the Faculty Senate? Are you interested in teaching and research? Will political action be left to the students? Are you willing to devote the time to participate meaningfully in all the proposed services of the Senate's standing committees, ad hoc committees etc. (p. 6.15.) Can you speak for your academic tasks and research or for being a scholar if not, who will run the show? The campus' scholastic? The non-scholar? Just how will you divide your time?

Can the university be educationally effective when academic proposals favored by general faculty, undergraduate students, graduate students, and professional staff, representing six of the 'constituency bodies,' (p. 3) can be defeated (p. 4) by the non-academic employees and the administrators?

Can you accept a proposal in toto and without the right to amend that statement (p. 2) provision will be made for inclusion of those faculty members who have not yet been requested to decide this issue have not yet been identified? Can you accept a proposal that omits details of the amendment that states (p. 3) this provision will be made for inclusion of those faculty members who have not yet been requested to decide this issue have not yet been identified?

Can you accept a proposal that a flow chart showing the travel of any proposal through the maze of possible and alternative routes? (p. 15) Have you observed who determines the routes and how? Have you noted the power of the Screening Committee? (p. 12) Do you think this system will produce better products? Greater speed? More efficiency? What are the possibilities of the faculty representatives being predominantly from certain colleges or departments as is true now? Where are the safeguards against this?

Should not representation be apportioned among the various professional areas of the faculty?

If you are a member of the graduate faculty can you simultaneously represent the general faculty? (p. 2.4)

Is there any provision for recall or referendum? Is there any provision for the time when you have decided which amendments to ratify at least by the 'constituent bodies'?

How can you believe that this proposal will not affect the operations of departments, research agencies, etc., when Standing Committees will consider planning and review of course structure, appointment research, publication and facilities, conditions of employment etc. (p. 1.7) And when the Governing Committee of the Senate will monitor the functioning of the entire university structure and evaluate its operational procedures to changes to the proper organizations and constitutions. (p. 7, last para.) And when the amendment to the Standing Committee of the University, has only three faculty members among the nine proposed? (p. 7)

Can you believe the system does not deal with academic affairs normally handled by departments, when there are Standing Committees on General Studies, Undergraduate Education, Policy and Graduation Education Policy? (p. 17)

What is the reason for having a lesser number of faculty members on the General Studies Committee? (p. 17) Are others deemed more competent?

Are you willing to share equally with non-faculty you who are responsible for undergraduate educational policy? (p. 17)

What is the function of a student or staff on the Research Policy Committee? (p. 17)

Is division with the Board of Trustees a most urgent and significant matter? Why is it "left open at this time." (p. 19)

Has anyone ever been able to hold a committee accountable? In the absence of a person responsible for a function, who can be held responsible? How is redress obtained? Is it "left open at this time." (p. 19)

Has anyone ever been able to hold a committee accountable? In the absence of a person responsible for a function, who can be held responsible? How is redress obtained? Is it "left open at this time." (p. 19)

Do you know of any major productive organization that is being managed by committees? Or organizations that do not hold individual or departmental results for the success or failure of certain operations? Do you know that the Standing Committee on Senate Ad Hoc Committees, has no power exceeding that of the chancellor but without direct accountability either to the chancellor or to you?

Do you believe the cumbersome and intricately variable procedures partly outlined in the proposal will decrease the current disaffection with bureaucratic systems? Are the suggested procedures too often simply additional layers of bureaucracy?

Does the proposal really provide for decentralization and more faculty responsibility? Or centralization of power in the hands of a few? And decreased faculty participation? Will a minority control by default be possible?

Do you believe the proposal was developed in a thoroughly democratic fashion? Did you participate in choice of the members of the Task Force? Did you have any opportunity to make suggestions? Were there meetings for discussion before the paper was deemed to be inevitable and unopen to easy amendment? Why were the constituent bodies that considered the proposal prior to the vote not permitted to suggest amendments or alternative clauses? Have you received straightforward and informative answers from the members of the Task Force? Or have you been asked to rely on your intentions and assurances on important clauses in the proposal and on important matters not in the proposal? Are you going to vote in good faith and in complete confidence in the pending voting to accept those provisions that you have known worthwhile and workable at Southern and to reject the remainder?

Do you think a system of voting on alternate provisions would have been more democratic? If so, who does not have an opportunity to hold in this manner the development of an acceptable proposal?

Do you think certain of the provisions make it possible for administrators to avoid their responsibilities and their accountability?

How does this proposal cure or relieve the real or imaginary problems, the currently associated supporters of Southern. Or within the greater community which the University community resides and operates? Should not these 'constituent bodies' be recognized and involved in the benefit of all concerned?

Is there any limitation on the energy or time drain on a willing faculty member? On how many senators and committees can a single person serve? May he serve on as many senates, committees and councils as he can be elected or appointed to? What is the system to decentralize or further centralize campus power already in the hands of the university? In the absence of limitation in the best interests of the faculty member the students and the university as a whole?

Considering the relatively small percentage of individuals of certain constituencies that voted on this document earlier, do you believe it is possible for these and other groups to elect individuals responsive to the wishes of the majority of their constituencies? Is it reported that no more than 3 percent of the graduate students voted in the December referendum? It is also reported that the graduate students who did not vote there are to be permitted to vote in the final election procedures? Will they be continued in the final elections necessitated by the proposal?

Would it not be better to vote down this all or none document? And begin anew, with full participation to build a sound governance structure beginning with a Faculty Senate that will be educationally effective and significant?

However you may react to these questions, please take time to study the proposal before voting. It may just be that the major segment of the faculty asking these questions is right.

Please vote. Let us not begin by abdicating another of our fundamental responsibilities, however we may operate in the future.

Costs of this notice were borne by individuals, not by any instructional, research or administrative unit of the University.
Schereschel summarizes programs

(Continued from page 1)

Schereschel criticized the Illinois Bureau of Investigation for its undercover activities on the SIU campus. "I will now condemn these parasites who seek out the trust of the students," leaving behind "paranoia" and mistrust.

The co-op store, still being planned, will provide personal care items that students can't buy in Carbondale, in some instances without a mark-up of 100 per cent, Schereschel said. The student government, he said, has done everything it could including a consumer price survey and has pointed out which merchants are overcharging.

He said plans to have the co-op store in operation by the end of winter quarter and locate it in the University Center. Regarding the University Health Service, Schereschel said he doesn't question the "knowledge and expertise" of the Health Service faculty. But he said three doctors are not enough to provide adequate medical care to a community of 30,000.

John McCaffrey, student body vice-president, and Nick Fera, administrative assistant to student body president, both pointed out the progress of this year's administration. McCaffrey said that next week a recommendation will be made to the Student Senate to form an ad-hoc committee to work for the annexation of the rest of SIU to Carbondale.

Richman says he will not seek re-election

State's Attorney Richard E. Richman said Tuesday night he will not run for reelection in 1972.

Richman made the announcement at a meeting in the University Center sponsored by College Democrats. Richman said he is "tired of sending people to the penitentiary" and he would like to be a defense lawyer again. By 1972 he will have been State's Attorney for eight years. He said, and he wants a change. Richman was selected State's Attorney in 1964, and reelected in 1968 to 1970. In 1970 he ran unopposed for state senator 56th District.

Graduate club to meet tonight

The Graduate Singles Club will meet at 8 p.m. Wednesday in the conference room of the Married and Graduate Student Office, 415 S. Washington.

The Graduate Singles Club is a student group which plans and implements activities for single graduate students, according to Dick Kalina, adviser for the group. Kalina said any single graduate student is eligible to join.

Show getting good response

By John O. Toomey
Daily Egyptian Special Writer

"The response is overwhelming. It builds more and more each year," said Bob Hearn Tuesday in describing people wanting to enter the Fourth Annual Kappa Alpha Psi Talent Show.

Hearn, chairman of the event, said it is scheduled for 8 p.m. Friday in Shryock Auditorium, admission will be 50 cents.

"There will be a variety of talent grouped into three categories," Hearn said. "We have a single, group, and special category.

"There will be a variety of talent grouped into three categories," Hearn said. "We have a single, group and special category. The special category consists of instrumentalists, dancing, skits and comedians. We also have several acts from the community," Hearn said.

Ron Clayton, co-chairman of the talent show, said trophies will be awarded for first and second places in each of the categories. "There will be approximately 20 acts and also a choir competing," he said.

"We are holding the talent show in conjunction with the Reunion Weekend and the Sweetheart Ball. The Reunion Weekend is held for the fraternity brothers who graduated from this chapter to come back to SIU and celebrate the 80th anniversary of the founding of the chapter," Clayton continued. "We want to emphasize that the talent show is not restricted or limited to any particular race or group, but is open to the public," Clayton said.

The Sweetheart Ball will start at 9 p.m. Saturday at the Travledge Motel in Marion. "We usually have the talent show and Sweetheart Ball as separate events, but this year we combined them since many of the brothers have not seen the talent show," Hearn said.

The Association of Creative Artists, a group of musicians from the SIU campus, will furnish the music for both events, Clayton said.

Committee may recommend change in fee usage

(Continued from page 1)

$27,000 possible increases in University Center fee and cut-backs in tuition waivers may increase next year's athletic budget need by $100,000.

Hammond said his recommendation would provide more money for operations ($3 in 1976) and leave the University with a flexible course of action for the future. The decision is being made on a football stadium.

The University has not decided whether to remodel McAndrew Stadium, build a new separate stadium, or combine a stadium with a physical education department. The Recreation Building complex north of Bloch Towers, available information shows, $12 million in a stadium development fund. The Auxiliary fee, was instituted in 1968.

University Center fee

The University Center fee subcommittee will recommend that the center fee be increased from $5 to $10 per semester. Dean Elwood Dougherty, Center Director, said increased bond debits caused by Phase II Center construction and in-
creasing operational deficits make the increase necessary.

He said the Illinois Board of Higher Education has expressed concern over the amount of tuition used to retire bonds and meet expenses. SIU students now pay annually $1,000 in tuition and $400 in Center fees to help retire center expenses.

Dougherty said the fee increase is recommended to make the fee more reasonable to the students in the future.

That possibility has been discouraged by the Graduate Student Council (GSC), which conducted a fee study. The GSC said present Illinois statutes do not prohibit the use of tuition money for such purposes.

Health Service fee

The Health Service fee subcommittee, headed by Dr. Walter Clark, director of the Health Service, is recommending a mandatory $6.77 Health Service fee. The subcommittee will probably propose to the whole committee Friday a compulsory health insurance plan.

The fee will be $4.00 for all students without health insurance.

If the present fee structure, $4.15 out of the $10.30 activity fee goes to the Health Service.

Clark said an increased health service fee would provide the same year's Health Service deficit of $86,000 and provide enough funds to pay two additional doctors.

As for health insurance, Clark said a small percentage, 1,300 out of 24,000 students are enrolled in the University's health insurance plan which costs $12 per quarter. A compulsory fee would lower the costs of health insurance for students he said.

SWARF fee

The Student Recreation and Welfare Building Trust Fund SWARF, subcommittee will recommend that the fee remain $5.

Public Relations Club will meet Wednesday

The SII Public Relations Club will meet at 7:30 p.m. Wednesday in the Communications Building. Students interested in public relations are invited to attend this informal coffee hour to meet other members of the club.

Campus Senate to act on new bills on agenda

The Senate will consider two bills, one whereby the Senate is to allocate an honorarium of $200 to members of the College Foundation (SCF) guest speaker program. The other adds the Senate to cover room rental and food fees to an SCF benefit dance.

The $200 honorarium is to be distributed to the SCF guest speakers and the Senate is to cover all room rental and food fees to the Senate.

The Senate is to assist the SCF in drafting counseling program.

The other measures include a mandate authorizing the Health and Welfare Committee to organize a campus-wide health awareness directed at the Illinois General Assembly concerning abortion legislation. Another mandate requests the new Health and Welfare Committee to recommend a disease named after Martin Luther King Jr.

Kosinski is also presenting a bill providing support from the University for student facilities and a bill to expose people who suspect of being helpers persons.

Batteries not included

The group will also recommend that, at SIU, $7 million in SWARF funds be used for construction of a proposed Recreation Building complex and that SWARF funds not be committed to building the Recreation Building. Funds are not available for current campus recreational needs.

Incidental fee

The incidental fee subcommittee recommends that the fee remain $5.

Any changes in the University fee system have to be made by the SIU Board of Trustees.

Tuition hike: flight to coordinate statewide

By Cathy Spengle
Daily Egyptian Staff Writer

The Student Advisory Committee at SIU decided Saturday to increase the amount to coordinate the financial efforts of students opposing the proposed state Medicaid program. The finance committee of SAC was designated to serve as the coordinating body for student groups working against the proposal. SAC's committee was also charged to study the budget and make recommendations to the Tuitions and Financial Aid Subcommittee. SAC is composed of student representatives from Illinois colleges and universities who present student recommendations to the state board.

REGINALD JAMES, student from Eastern Illinois University and chairman of SAC, suggested that student government officials in Illinois universities investigate activity fees and review their use.

James said results from these studies could be used to fight the tuition and fee increase. "We don't have a tool now to fight the increases, but the investigations could serve a purpose," he said.

In other action, the position of press officer was created by the SAC. The press officer will secure press releases to student newspapers on Illinois campuses, informing them of actions taken by SAC. James said a press officer could facilitate the familiarization of the individual student with the business of SAC and encourage greater loyalty.

Tom Kelley moved that all meetings of SAC after Feb. 27 be held permanently at the University of Illinois in Champaign. Kelley said meetings at the University of Illinois would be more convenient for students.

NISON NAMES COUNCIL TO COORDINATE ECONOMICS

WASHINGTON (AP) — President Nixon named a council Tuesday to top-level council to coordinate international economic policy and appointed a Midwest camera firm executive, Peter G. Peterson, as its executive director.

The President, who announced the new council personally in a briefing for newsmen, said the council's prime purpose is to provide coordinated economic policy.

Nixon himself will be chair-
man of the new body, formally named the Council on International Economic Policy.

Greenhouse blooms with flora under constant care

By Marian Kovarich
Student Writer

Robert James, chief gardener at the University of Illinois, doesn't have an M.D., but he cares for his plants as a doctor would his patients.

James said of the plants in his care, "If anyone of them gets sick, we try to medicate them where they are if they can be treated." He said that a 21-year employee at the greenhouse, indicated several plants, both domestic and tropical, which were prone to common diseases.

"We're going to smokebomb in here, tomorrow, to treat those," he explained, pointing to a row of disease-redden snapdragons. "Sometimes we use a sprayer on the outside, but we only do that about twice a week when we have to use gas masks."

The plants and flowers, start-
ted from seed or purchased from specialized importers, are placed in controlled environments in the greenhouse. The miniature orange trees, cacti, sweet almond trees and the banana shrub, which gives off an odor only in the afternoon, are kept in the 40 degree wing. This room also shelters an abundance of grafts, shoots or parts of a plant surgically transplanted into another plant, and is used to crossbreed, along with force-bloomed flowers, which flower with the use of light, heat, and a change in soil and water.

The 70 degree room, the largest wing of the greenhouse, is a professor of lowering rubber plants and dried coffee beans, and among other unusual flora. The chenille plant, which has the texture of cattails, resembles a convention of bright pink craposhurals while the paper plant looks like someone's origami project. In the garage is a dirt pile where plant bulbs are buried. They have been taken in for the winter because of their sensitivity to cold weather. But due to leakage from a nearby potato plant, the bulbs have bloomed, providing for an unexpected indoor garden.

The greenhouse, built in 1965, contains, in Mr. James estimation, from 3000 to 5000 plants. It is operated by a staff of gardeners, who check each plant daily for disease or malnutrition. There are also student workers who are "learning through experience."

The more operation is overseen by William M. Marbery, assistant professor of botany, who is the greenhouse director.

Flowers from the greenhouse, alone or in arrangements, are used by the University for graduation, Honoray Day and other S.I.U. events. However, flowers are not sold to the public.

Hall, that is

Board relocates in Forest

By University News Services

The staff of SIU's Board of Trustees has begun Monday into a former private residence all but one block north of the campus.

The board staff will occupy the main floor of Forest Hall, a new, $300,000 building under lease by SIU. The ground and top floors of the 23,000-square-foot building will be reserved for other SIU offices to be designated as central to both the Carbondale and Edwardsville campuses, according to Rino Bianchi, assistant to the chancellor.

James Brown is chief of the board staff. Other main staff officers are Richard Gruny (legal counsel), David B. Hands (academic officer), Clifford Burgner (budget) and Robert Galley (treasurer). Also scheduled to move into the new staff quarters are

Music education head to lecture at convention

By University News Services

Catherine McHugh, the School of Music's specialist in electronic music, announced Monday that she will be lecturing at the Illinois Music Educator's Association Convention in Peoria, Thursday through Saturday. Her lecture, "Instructional Television as a Tool in Music Education," will be entitled "Instructional Television as a Tool in Music Education."

SIU Foundation gets jet prototype

By Rich Schumacher
Student Writer

The latest addition to SIU's aviation technology program was the result of an "involved" acquisition by the SIU Foundation, according to Kenneth R. Miller, executive of the foundation.

The plane is now on public display at the Southern Illinois Airport.

The British-designed mock-up, "complete, except for engines and wings, is similar to the Lear executive jet," Miller said.

In 1988, Handley Page Ltd. constructed the $140,000 mock-up and sent it duty-free to the International Jetstream Corp. in Chesterfield, Mo. "For promotion and sales purposes at aviation conventions and airports.

Then, several months ago, Handley Page Ltd. went bankrupt, the temporary two-year importation bond was close to expiring and so the Bureau of Customs declared that the mock-up must be totally destroyed and rendered to no commercial value," Miller said.

At this time, E. A. DaRosa, chairman of the aviation technology department, learned of the about-to-be destroyed ownership mock-up and decided to try to save it. DaRosa and Miller contacted International Jetstream Corp. which agreed to give the craft to SIU.

DaRosa then went to Washington, D.C. and solicited the aid of Congressman Kenneth G. Gray, D-West, who, for several days did nothing but obtain necessary signatures and approvals authorizing the transfer of the mock-up to SIU for educational purposes and to be available as a permanent exhibit for public inspection," Miller said.

The craft arrived here last November after necessary arrangements had been completed.

DaRosa called it "a fine piece of training equipment, very impressive and very useful in teaching interior inspection and care."

"It has a complete plush interior and cockpit with full instrumentation and controls. It will be extremely valuable to the graduating and up-date our program," DaRosa said.

Incidentally, Miller said that DaRosa "has talked with executive vice-presidents of five major American airlines and all have said that the SIU is one of the top five aviation technology schools in the country."

"DaRosa has also personally secured over $2 million worth of material for the SIU Foundation on his own time," Miller added.

Mobile Museum open public exhibition today

SIU students, faculty and staff can view the formal opening Wednesday of the 1971 traveling exhibition of the SIU Mobile Museum.

The Mobile Museum van will be located on Circle Drive south of University School from 1:30 to 3 p.m. Wednesday. This year's exhibit will highlight the SIU School of Business and School of Agriculture as part of their contributions to the University Centennial according to Basil C. Hendrick, University Museum Director. After the exhibit's stay on campus Wednesday through Friday, it will begin a year's tour of public schools.

A special feature of the 1971 exhibit will be a demonstration of how computers work, how they store and analyze information, and how the information is used in practical applications.

Through the cooperation of General Telephone Company of Illinois, and the Service Bureau Corporation, a subsidiary of IBM, a DataTel terminal installed in the mobile van will be linked by direct telephone wire with an IBM master computer in Cleveland, Ohio. The computer has been programmed with a business game which gives the players a choice of management decisions in operating a fictitious company known as "Mike and Joe's Burger Corp." As the decisions are fed into the DataTel unit, the information is relayed immediately to the computer in Cleveland. It is analyzed and returned in a matter of seconds to show which combination of decisions earned the most profit for the company.
Salukis on the right 'track' for grabbing relay records

By Ken
Daily Egyptian Sports Writer

The west concourse of the SIU Arena is not the best practice track in the world, but Southern's homeless indoor track has been the scene of a daily week getting ready for the season opener just three days away.

The Salukis open Saturday at the Chicago-based Indoor Track Meet.

At other times, the Salukas are not on the concourse but on their new all-weather outdoor track in McAndrew Stadium— their home during the outdoor season in the spring.

"The all-weather track is helping us a lot," said Audrey Dooley, who assists Lew Harrington in coaching the team.

An all-weather indoor track was replaced last summer.

"Now we can run regardless of the weather or the forecast, bundle up, but we can still get the track work in," the assistant coach said.

With hard work and luck, we could place among the top ten in the NCAA indoor track championships this year.

Indoor tracks vary in size from 160-yard tiled tracks to 228-yard tracks with flat surfaces.

"Size and the type of the track, the number of times in the runner's lanes," he said.

"Faster times usually occur on bigger flat tracks with not many turns to run.

The high jump looks pretty complete according to Dooley; Sophomore Mike Bernard, who jumped 7 ft. 4 in. in Omaha last month, leads that field for SIU.

Briet and Greg Miller are a consistent 6'4-6'6 jumper who are a part of the SIU track meet.

IM basketball contests today

The following basketball games have been scheduled for the SIU Arena.

8:30 p.m. Bison Squad vs. Check's Chuggaluggers, court one
6:40 p.m. Co-Eds vs. Phat Aces, court three
7:45 p.m. Bay Area Bombers vs. Northern Illinois, court one
8:55 p.m. Lafayette vs. Specials, court four

"Quite frankly, we don't have anyone now really qualified to teach the course in the spring. We had one, but he was draf ted," Wilkinson said.

The University is expected to invest in the sport with new equipment and will later expand the course to include archery.

The women's physical education department offers a similar course.

Archer hitting SIU

William Tell proved apples and archery go quite well together.

Therefore, it isn't surprising that archery is rising in popularity in Southern Illinois—in fact, for its apple archery.

Several archery clubs have popped up in the area's countryside in such towns as Mt. Vernon, Elkville, Marion and Murphysboro.

"Archery used to be just a small part of a college's physical education program," said Floyd Cox, president of the Shawnee Bow Hunters club in Murphysboro. "Now it is a major sport at many schools and even approaches major status at some.

"I think the fact that it will be in the 1972 Olympics is an indication of its growing popularity."
Campus wolves don’t howl quite so loud

ANNOUNCEMENTS

Daily Egyptian, January 20, 1971
Cards bow to Salukis, 79-77, on Hawthorne’s free throws

By Mike Klein
Daily Egyptian Sports Writer

Jim Regenold gambled twice and lost both times Tuesday night. Consequently, gutsy Ball State went down to defeat 79-77 in the SIU arena.

Nate Hawthorne sank two free throws with five seconds remaining to win the game which finished in a wild flurry after Southern had trailed by 13 points at one point.

Regenold gambled the first time with one minute remaining and the score tied 75-75. Missing a steal attempt on a pass for Greg Starrick, he flattened the Saluki guard. Starrick then sank two free throws, giving SIU a 77-75 lead with 18 seconds left.

Southern was in a stall, waiting for the last shot. After Starrick’s charity shots, Ball State called a time out but it was obvious what coach Bud Getchell would do — get the ball to Regenold who already had 28 points.

The plan didn’t work as Regenold missed a fall away jump shot from the right-side baseline as Hawthorne came down with the rebound, he was fouled.

His winning two charity shots made Ball State’s final basket by Corby Sheffield meaningless.

SIU, which was both pitiful and brilliant, retained its hold on the Midwestern Conference lead with a 34-0 record. The win, second in a row following an upset victory over Indiana State, evened the season mark at 5-5.

The Cardinals dropped to 0-3 in a loss play and 3-11 overall.

It took a second half comeback to preserve victory as the Salukis were down 44-38 at halftime.

Getchell’s Cardinals were plenty “psychod” in the first half as they attempted to upset the new conference leaders.

Southern never led until 5:27 remained in the first half when L. C. Brasfield scored two of his 15 first half points on a one-on-one jumper, breaking a 22-22 deadlock.

That basket represented part of a long uphill climb as Paul Lambert’s team had been down 24-24 to the lowly Cardinals.

Getchell’s crew roared to its early lead with flawless shooting. With 12:10 remaining and the score 22-22, Ball State had not missed a field goal attempt, hitting nine.

At one point, they were still 11 of 12 but cooled to 17 of 31 for a still excellent 348 first half field goal percentage.

Regenold, Midwestern Conference scoring leader with over 32 points per game in league play, was the culprit. He hit 16 first half points and was well supported by Randy Frederick who had 16 Regenold’s 38.

Good for game honors and Frederick finished with 18.

Hawthorne was high for Southern. 24 points, while Starrick finished with 13 and Marvin Brooks 14.

Starrick fouled out, leaving the late rebounding shots to Brasfield who had nine and Hawthorne with 16.

During the critical first half comeback, Southern outshot the suddenly cold Cardinals 14-2.

Brooks had five points in the sport. Hawthorne six. Powies and John Garrett one.

That brought Southern from a 24-4 deficit to 26-23 disadvantage.

SIU, but except for Starrick who was one of 10 from the field in the first half, kept it going and was finally able to pull out to a 24-30 lead in baskets by Brasfield and Powies.

Then Ball State got hot again, outscoring SIU 12-4 in the final 4:33 of the first half for its 44-38 halftime lead.

Hawthorne got hot in the second half, hitting five of eight from the floor.

As predicted, Lambert stayed with his zone defenses, used for the first time against Indiana State.

When Ball State was hot, the zone got burned from the outside but the Cardinals couldn’t pull the big rebound away from Hawthorne when the go got tough at the very end.

Garrett didn’t start and scored only seven points, but piled up six assists, evidence of his excellent offensive playmaking.

"Too tight, too fine"

All of which brings us back to the highway. As Staufer stopped pacing he looked up against a training table, took off his hat and looked at the floor.

If anything, we might have been too tight. tried to be too precise.

But this owner of a 157-75 career coaching record had no reason to come to some very modest conclusion.

‘Everybody I talked to had already sold SIU down the river Hell, this was our 18th ballgame. SIU’s ninth. They’ve got a real good ballclub, no doubt about the way they’re no selling this club down the river.

That’s why the Salukis will be very ready for SIU on Feb. 13 in Terre Haute.

Mike Klein
Second Thoughts

Something went wrong

Gordon Stauffer was pacing nervously in the hallway outside the SIU Arena dressing rooms. “I’m everybody on the court,” he said. “Somebody will.

It hadn’t been a good night for Stauffer, head coach of Indiana State’s Sycamores. His team had been beaten 84-80.

He was obviously a very unhappy man. And didn’t seem especially interested in facing another sportswriter who might ask sports what the turning point of the game was. So we didn’t. Wouldn’t have, anyhow.

Stauffer had had many more pleasant days since he became head coach at Indiana State in the 1967-68 season. His first team was 23-4 and made it all the way to the NCAA’s College Division finals.

But that Stauffer had a Cinderella team his first year. Duane Klee had didn’t have a bad job the previous two years.

His clubs won 43 games over that span.

In 1968, he lost twice times fell on the hardwood from Terre Haute as it compiled a 13-13 mark, lowest during Stauffer’s tenure.

Last season, the Sycamores were 16-18, including a split with Southern. SIU took a 90-81 decision in the Arena after dropping one 42-73 on the road

Good Purdue 84-82

Indiana State started their current 11-4 campaign in fine

fashion with an 84-82, laking of Purdue. Purdue And Stauffer said said that Purdue men’s basketball was the same without Rick Mount who has since vanished into the untrackable depths of the American Basketball Association.

They made it a 2-4 with a victory over the division power Southwest Missouri.

Then came three losses—North Texas State, Memphis State and Tulane. That last one really hurt. a 109-66, overtime decision.

Sitting not-so-price with a 2-3 record, predictions by sportswriters and coaches that the Sycamores would finish no better than third in the Midwestern seemed relatively safe.

But up in Terre Haute, “We just sat down, had a good heart-to-heart talk and got everything set,” he said.

It worked. The revitalized Sycamores made their big push over Christmas, winning six and capturing the Las Vegas Invitational Tournament.

By the time it reached Carbondale, Indiana State was making a shambles of the Midwestern Conference. Seniors Southem held trailed for one point.

They were favored to take home a fifth conference win but then something went wrong. The Sycamore ran into a zone and lost to SIU 79-77. And that was enough to give them a lowly .533 shooting percentage which equalled defeat.

Fast-moving Racers down freshmen, 97-72

By Ken Stewart
Daily Egyptian Sports Writer

Six Murray State players scored double figures as the Racers rolled over ease over the SIU freshman basketball team. 97-72. Tuesday night in the SIU Arena.

Big Murarceus Starks and Steve Bowes were high-time in the Racers, with Starks scoring 37 with 22 and 21 points. Starks also grabbed 17 rebounds.

The shooting percentages — that was the game — said SIU coach Paul Hepworth. Starks and Bowes had a good effort on the backboards and stuck with a much taller Racers team.

New with a 2-7 record, the young Salukis shot at a low 20 percent against a tough man-to-man Racer defense that was responsible for 18 Southern turnovers. SIU went down the Racers’ shooting percentage in the second half after Murray State made 70 percent of their attempts shots before the half, Southern was able to steal the ball from the Racers’ run-and-shoot offense 14 times.

David Burt was high scorer for SIU with 38 points while two other Salukis, Edie James and Ralph Escheber, also made the double figures with 18 and 11.

Charles Brown was high man for Murray State, with 29 points. Brown also grabbed 17 rebounds. The 6-4 forward also made eight points. Jay Beene scored seven points and Kenny Sand came in the second half to grab four points. Tommy Elliott and Donald Hoffman made two apiece.
