Name Five To Seek New Graduate Dean

New Chairman

**Appointed For Food, Nutrition**

Anna Light Smith, formerly head of home economics at the University of New Hampshire, will become the new Director of Food and Nutrition Department this fall.

The SIU campus of philosophy degree in nutrition and dietetics was engendered by the Reading Hospital and at the director of the School of Home Economics as well as education at Pennsylvania University. She held a dietetic internship at Pennsylvania Hospital the following year.

She completed the master of arts degree at Columbia University in 1939 and the doctor of philosophy degree in nutrition, institution management and education at Pennsylvania State University in 1950.

Until 1950, when she entered the teaching field, first at New York University, then at the University of New Hampshire, Smith was engaged in hospital work.

She was therapeutic dietitian and nursing educator at Reading Hospital and at Harrisburg Hospital in Pennsylvania; educational director at the Indiana University Medical Center, Indianapolis; and assistant director of the dietary department in institutions in dietetics, Department of Internal Medicine, University Hospital, and Medical School.

**Music Man Tickets Go On Sale Today**

Tickets to “The Music Man” have been received from the printers and will go on sale today at the Information Desk in the University Student Center.

The musical, being produced by the SIU Summer Opera Workshop, will be presented Aug. 2, 3 and 4 in Shryock Auditorium. It was postponed in October for fall term students, then closed by the renowned music Professor Hosley, chairman of the SIU Department of Music.

TOWER TO LEARNING - Construction equipment and supplies for the addition to Morris Library are hauled up in this tower on the roof of the new library. Morris said the tower is necessary to avoid possible accidents from falling debris during the day when the sidewalk below is crowded with students.

**Fall Quarter:**

The SIU Housing Office has had enough applications to fill every facility on Campus since Jan. 20.

The exception to the above is Small Group Housing which will be filled by Fall.

On-campus facilities can take 3,099 students. That breaks down into room for 225 married students and 2,834 singles.

The number of accommodations available to students was increased slightly as the Fall House will be available to students on the same condition as Thompson Point.

There is the traditional shortage of women's off-campus housing but this is not expected to be too severe.

Students at SIU have much to look forward to as dormitory construction, both on and off-campus, has increased more this year than it has in several years.

On-campus, students can expect the new University Park Buildings which are planned for completion by September of 1965 and will house 1844 students.

J. Albin Yokie, Coordinator of Housing, said: “We have seen more efforts on the part of householders to improve and upgrade their housing as a result of the new housing rules than we have in the last four years.”

“We see no relationship between the new housing rules and the shortage of off-campus women's facilities, Womans' House prefers on-campus,” she said.

In many ways, the shortage of women's accommodations has a reputation of lacking accommodations for its students,” Yokie said.

Yet in the years that I've been here we've never had to turn away a student because of lack of facilities of the student was willing to let us assist him put a little extra for into seeking housing.”

**Communications Dean Is Chairman Of Group**

The appointed task of finding a new man to head the Southern Illinois University Graduate School has been undertaken by five members of the Faculty. Chairman of the group is C. Horton Talley, Dean of the College of Communications.

Hold Up Rulings On 2 SIU Petitions

Rulings have been withheld by Jackson County Judge Peyton Kuykendall on two petitions by SIU to condemn farm land south of Carbondale.

The land in question is 160 acres owned by Tony Kriss toff Sr., Makanda, and 140 acres owned by Tony Kriss toff Jr., Makanda, near the Giant City Blacktop Road.

Attorneys for the Ksiffs have filed motions to dismiss the two petitions.

The land sought would be used for research purposes by SIU, according to Neil Hosley, chairman of the SIU Department of Music.

Judge Kuykendall said he wants time to study Supreme Court rulings offered by the University to support its petitions.

**SIU On-Campus Housing Full; Upgraded Housing Off-Campus**

Prison Bureau Boss Here For SIU Documentary

"Mr. Prisons," was on the University campus today.

Possibly "Mr. Corrections" would better describe the 16th District D.C. Bureau of Prisons since 1937, it would encompass the substantial role in seeking correction of persons who "in Benjamin's word," are "rebels against society."

He visited to SIU and its Crime and Corrections Center included work on a 15-minute SIU Crime and Corrections Roundup which will describe the development of a prison—the new Marion institution.

Myrl E. Alexander, director of the SIU center, said the documentary will be the first of its type. Bennett also toured the new institution and in the evening met classes of Alexander and Dr. Benjamin Frank, assistant director of the SIU center.

What's the future hold in corrections work?

Bennett said he expects to see more use of probation and parole, a breakdown of racial stratification in institutions, more inmate classification systems, more stress on "souls aside of" law" programs to prepare both youths and adults for release to society, and closer cooperation between corrections institutions and courts and police with "all working towards a single objective." Bennett said "if there won't happen, he cautioned, But relatively speaking, the number of commitments is decreasing or holding its own, despite population increases, greater temptation, and more susceptibility to committing crimes, Bennett told the group in the University Center, "I'm quite hopeful," he said.

He said there is some basis for an argument that the nation is experiencing a degree of moral breakdown, as evidenced by statistics of divorce, unwed motherhood or delinquency, but relative to these, he contends the corrections system and law enforcement agencies are doing a better job. In balance, Bennett also cited the decline in activity such a position has had in recent years.

Progress is being made in the preventive fields, more and better education being built, more skilled help is becoming available, safety belts are here, and problems of education in the challenge of this kind of work is facing us, that has never been, Nothing quite gives you the thrill of seeing some fellow you didn't think had a chance, making the grade," Bennett declared.

Prison Bureau Boss Here For SIU Documentary

President Delyte W. Morris asked the 15-member Graduate School committee, a panel of 15 from which he has selected five to make up the search committee.

David T. Kennedy, assistant dean of the School of Business, said the group responded to the request immediately since the Committee had expressed a hope a new dean may be named by Sept. 15.

President Morris talked to the Council about the urgent matter at a July 1 meeting. The committee will be guided by the suggestion that three be nominated with at least one from the SIU faculty and at least one from outside, Kennedy said.

This means that as many as two may be nominated from the local faculty and one from some other institution, or one and two, according to what the committee finds.

Those to assist Talley are Robert A. Harper, chairman of the Department of Geography; and Walter J. Willis, chairman of the Department of Agricultural Industries; all from the Carbondale campus.

Also from the Carbondale campus, Leo Cohen, professor of Business Administration; and Eric Sutley, assistant dean of Science and Mathematics.

The need for a new dean was made known at the June 28 meeting of the University Board of Trustees. At that time, the Board appointed Swartz for his experience and international students at SIU.

He will continue to serve as dean of the graduate school until his successor is selected, Kennedy said.

**72 Student Teach**

Seventy-two SIU students in education are teaching during the summer term at University, the University's training school for new teachers.

**Gus Bode...**

Gus says he takes a dim view of the five-cent-an-hour student pay increase. As hour just isn't time enough to figure out all the ways to spend a nickel.
Susceptibility

FRI, Welch farmers are cutting, stacking and burning brush, the smoke from the burning contains the oil and can cause poisoning.

Or, Welch continued, an owner of a dog may find himself exposed by man's best friend. This is particularly true if the dog is a long-haired type; the more the hair, the more of the poisonous oil the dog can pick up. Pet Fido and the worst can happen if Fido has been romping in the ivy.

Welch said poison ivy can occur anywhere in Southern Illinois. He pointed out his office window at several nearby trees where he has seen the vine climbing these trees bordering campus sidewalks.

He took the reporter on a brief tour to the edge of Thompson Woods, and the ivy was seen on a tree adjacent to the entrance walk. Welch pointed out examples in both vine and shrub form all around the path only a relatively few feet from the edge of the woods.

Furthermore, he described examples of poison ivy growing perhaps six feet in height in the form of a small bush. He told of seeing one with a stem four inches in circumference.

If one is asked about "killing out" poison ivy, this, he explained, takes repeated applications and he poses this question; "Can you kill it all?" Susceptibility to the poisonous effects may vary within a person from year to year. Welch doubts anyone is immune to poison ivy. It can be an occupational hazard to botanists whose quests for certain specimens might bring them to a position where there is no choice but "wade through" in order to obtain the desired specimen.

Welch said he has waded through poison ivy from Ohio to San Francisco, but has never had the poisonous effects. He considers the worst effects of exposure can be those that occur accidentally. The standard treatment, Welch said, is to bathe all exposed parts as soon as possible after exposure. A bath with strong alcohol rub should follow either the bath or shower. If the person showers, he should rinse, and then soap again, and an alcohol rub should follow either the bath or shower.

Anyone who is highly susceptible to poison ivy should bathe after a picnic, Welch said.

What does a botanist do if he wants poison ivy specimens? He generally picks the desired specimen with a pair of tongs, Welch added. One of the biggest problems involved can be seen in the desired specimen after the blisters break, he said.

What are the effects of exposure to poison ivy? The typical effects of exposure can be those that occur accidentally. The standard treatment, Welch said, is to bathe all exposed parts as soon as possible after exposure. A bath with strong alcohol rub should follow either the bath or shower. If the person showers, he should rinse, and then soap again, and an alcohol rub should follow either the bath or shower.

Any one who is highly susceptible to poison ivy should bathe after a picnic, Welch said.

Interested in spending a day with Lu Taylor?
If so, there's a bus leaving for St. Louis Saturday at 9 a.m. Roche published articles about "Cleopatra." The cost for the round trip is $1.

There are still seats available on the bus. Tickets for the trip may be obtained at the Office of Student Affairs in the Center. Theater tickets are available at the St. Louis box office for $1.50, $2.00, and $2.50. Students going to the opera will leave at 4 p.m. from the University Center. The "Cleopatra" bus leaves the Center at 9 a.m.

Deadline for registration is noon Friday at the Activities Department, SIU Center, 104. Activities scheduled today include the weekly square dance at the Boat Dock at 7:30 p.m. and a public lecture, "Basic Ingredients of Agriculture Faculty Publishes Articles"
Several members of the SIU School of Agriculture have published articles about their work recently.

Weinstein, Plass, Forester at the Forestry Research Center, is co-author with Alan W. Williams of the U.S. Service of a Central States Forest Resource Engineering Research Paper, "Preplanting Treatments for Brushy Old Fies in Southern Illinois."

Technologist Glenn Cooper of the Forestry Research Center, has written a public cation, "Spindle Guard Makes Shaker's Job Easier and More Efficient," appearing as a Station Research Note.

Tears Down Goals; Put On Probation
A 21-year-old freshman transfer student has been placed on disciplinary proba tion through the fall quarter for overturning basketball goals at the Campus Lake boat docks in the early morning of July 4.

He was also ordered to put 20 hours of work in the area under the supervision of William Bleyer, assistant co-ordinator of student activities. The disciplinary action follows an earlier order to the student to pay for repairs to the damaged goals.

NSF Gives SIU $15,908 Grant
SIU has been awarded a $15,908 National Science Foundation grant for use in support of scientific research. John O. Anderson, co-ordinator of the SIU Research and Projects Office, said the grant is of a type which serves a broad function.

Similar grants in the past have been used to support national projects as electron microscopy, Anderson said, and have allowed the University to carry out some projects not otherwise possible.

Steinbeck's 'Tortilla Flat' Shown On WSIU-TV Tonight
John Steinbeck's "Tortilla Flat" starring Spencer Tracy will be shown on WSIU-TV tonight at 7:30 p.m.

This World: Film traveling feature, 6:30 p.m.; What's New; Repeat from 5:00 p.m., today, 7:00 p.m.

Summer Playhouse: "Tortilla Flat" and "The Classics" 6:00 p.m.

Dr. Poskin's Giants: "William Roegen" This is the story of the man who discovered X-rays.

8:00 p.m.

Antimony For You: "Mini Members of the Solar System" This program presents the major planets, asteroids, comets and meteors of our solar system.

8:30 p.m.

Summer Playhouse: "Tortilla Flat" and "The Classics"

Portz To Attend Allfaba Meeting
Herbert L. Portz, farm crops specialist and assistant dean of the School of Agriculture, will attend the Mid-South Allfaba Breeding and Management Conference at Kaiser, Ark., Monday and Tuesday.

Portz, a native of Waukeha, Wis., has been on the SIU faculty since 1954.
Legends & Lore of Southern Illinois

John Allen's Heartwarming Sketches Make The People And Places Of Southern Illinois History Come Alive

JOHN W. ALLEN

John W. Allen's "Legends and Lore of Southern Illinois," published by the Southern Illinois University News Service Division and scheduled to go on sale August 5, is carried by Irving Dillivar, widely-known newspaperman, historian and lecturer.

For more than 10 years John Allen has been writing a weekly column for Illinois newspapers, telling of the history of the southern area of the state, its folklaws and its colorful individuals—good and bad—who were influential in their time. The book is a compilation of these columns, arranged by categories.

There is need to introduce Legends and Lore of Southern Illinois. That was the word of John W. Allen's early writing on regional history and folk lore. His columns first began to appear in those newspapers of Little Egypt whose editors thought good as well as good things they saw. But still there is a big good use for this space once. That is to tell about John Allen which he would have set at nothing himself. For his author is a modest man, in all his books, the reader will find almost no reference to John Allen's origins, to his background, his parentage, his family, his personal experiences—where he has been, what he has seen, why he has lived the kind of life he has lived.

A lot of people know John Allen's rugged

The book is in history and local color.

In the pages of commerce and topical, and its storied past people. De Soto, Marquette, Washington, and Fort Charles are part of the past.

It is 1800 and there is no need to introduce John Allen's book, there is ample reason to talk about its author for a while. While he is busy on his next column which the Southern Illinois University Information Service is sending out to the great editors, we take twice advantage of his preoccupations with legends and lore.

John Willie Allen comes naturally by his concern for other days and ways. He is born in a log cabin in southeastern Illinois, near the Village of Broughton, Hamilton County, Illinois. His family is of the English ancestry, a heritage of Little Egypt as well as they shall, Hamilton County records with Gallatin County whose seat of government is the historic Old State Farm of Shawntown. The Hamilton County seat is McLeansboro. The event of John Allen's log-cabin birth was not officially recorded, since the county's first antebellum records were of vital statistics. It was from the published remains that the date was 1813, 1814, or 1815. His father was Benjamin Owen Allen and his mother the former Rhoda Tyler. The families were from Virginia by way of Tennessee and Kentucky. John Allen line went back to Green Mountain pioneer Ethan Allen and his family. Indeed, the connection with the Green Mountain Boys is a part of the history of the United States, and one convicted horse thief.

Allen had been born and reared in the Civil War on the side of the North. His story belongs not in the Southern Illinois regiment that "disorganized." He participated in the war to the end and endeded the war with a military record and evening a career under General Benjamin H. Grierson before that he had ever enlisted in the Mississippi from La Grange, Tennessee, to enter his name on the veterans list of 1861.

This Allen was a melodious folk singer. He knew a seemingly limitless repertoire of ballads and the songs they sang at her log-cabin cheer. She sang them, too, as she skinned or sewed or by the fireplace at night. Sprinkled through the family relationships were other ballad singers, fiddlers, several cagatious drunkards, a gypsy and two or three preachers of the Hardscarbale country gallop.

Allen was a man of hard work and he labored frequently in the Rector Bottoms, Saline County. The move was a log-cabin one from the city west to the town in the southeastern part of the state. Allen moved to the county town of Hamilton and west to Gallatin. The county seat is Herrin. From the front of the Rector Bottoms cabin John Allen looked out toward Aah Pond when flood waters were rising. Aah Pond is a natural where turkeys come to feed with the chicken. During the Civil War, the family was in the pioneer home of a prominent family in Gallatin County, John Allen, line. In 1867 he was the teacher. In 1868 he received his first orange and a little red apple to give to his teacher. At age 20, when he graduated from the college, he drowned an overabundance of Kittnens, the school was held, the neighborhood when the weather was held on the fourth of July. This is the event of General John A. Logan's Decoration Day.

From the Douglass house they went into a log-cabin home in the vicinity of Texas City, also in Gallatin County. This was Allen's first redwood, the pet woodpecker bird was a common visitor. A first marriage, Allen's two-legged wheel cart that passed their place. A second marriage, the head of a man was about level with the past.

Before John was six years old, the Allen family moved to a log-cabin home, a house, lived in the front of the house, had a log-cabin home in the vicinity of Texas City, also in Gallatin County. This was Allen's first redwood, the pet woodpecker bird was a common visitor. A first marriage, Allen's two-legged wheel cart that passed their place. A second marriage, the head of a man was about level with the past.

Sophomores Are Backbone Of SIU Opponent

BOWLING GREEN HERE FOR OPENER SEPTEMBER 28

Doyt Perry has more rebuilding and will have to depend more on sophomores than any time in his consistently successful (60-7-5) nine years at Bowling Green University.

Bowling Green will play at SIU's McAndrew Stadium in the Salukis home opener September 28, Carmen Picconi's Salukis are still searching for their first victory in five outings against the Bowling Green Falcons.

Only 15 letterwinners are available, two of them regulars—second-team All-Mid-American Conference halfback Jay Cunningham and center Ed Bettridge.

Graduation swept away 16 of the top 22.

But, Perry still has sufficient talent to make a down-to-the-wire run for a fifth MAC championship.

"Leading ground gainer Don Lisbon graduated, but Cunningham, 5-feet 9 inches, 175 pounds, should be better as a junior. He gained 314 yards and averaged 4.1 per carry as a sophomore and added 259 yards on 13 pass receptions.

Harry Weaver, 175 pounds, with 170 yards in 1962, probably will be the other halfback, John Moyer and Tom Reicosky will be experienced redshirts.

Jim Goings picked up 274 yards for the Falcon freshman team and could push the seasoned veterans for a position on the squad, Tom Wright and Jim Burkardt are the promising sophomores at FB.

Jim Wisner (195) is the lone letterman at fullback, but probably will play defense, since junior Evan Moyer, redshirted and proven and Perry has great hopes for sophomore Bob Pratt.

High School Science Student Studies Animal Burrows Role

The role of animal burrows in hillside water runoff is under study in a summer project conducted by a high school student from Florida.

Using a system of metal channels to direct the flow of water into glass jars, the project is designed to measure amounts of water absorbed by burrows of various kinds and the loose earth surrounding them.

Scientists' measurements are made to determine how much water flows off the same slope without interference from the animal dens. The study could point out possible robotic effects of wildlife on water and soil conservation.

Coordination of the study is Murray Brown, a tall, blond student from Edgewood, Fla., his work is supervised by Howard J. Stains, associate professor of zoology at SIU, and Don Turner, a graduate assistant.

Brown is among 72 prep students from 31 states selected by SIU faculty members for a special National Science Foundation-sponsored summer program. The third held at Southern, it drew more than 1,700 inquiries from all over the nation.

After spending the morning in class—original reeled in college-level courses—Brown and five other students majoring in animal ecology spend each weekday afternoon in fields and woods near the SIU campus conducting their research.

The students are working on such projects as insect damage to corn, use of salt solutions to attract and count animals and use of nesting material samples to measure animal movement. All their work is conducted under the watchful eye of Turner.

Other students in the NSF program are majoring in anthropology, chemistry, experimental psychology, mathematics, microbiology, physics and physiology. All take courses in three subjects and conduct supervised research in one.

Turner said he is amazed at the interest and ability of the students under his direction. "Many of these kids are conducting original research," he said. "Not only will they get a lot out of their work, but we will benefit a great deal by working with them."
Associated Press News Roundup:

Test Ban Talks Continue; East Germans Arrive in Moscow

MOSCOW

A Communist delegation from East Germany put in a surprise appearance in Moscow Wednesday to give the test-ban talks a new realm of speculation.

The Russian news agency TASS said the Germans appeared to discuss "foreign policy questions of interest to both sides," but did not elaborate further.

East German sources said there was "nothing dramatic" about their visit. They would have no role in the signing of a nuclear-testing treaty but they would have a connection with a non-aggression pact which Premier Khrushchev has called for as a condition to a test-ban treaty with the West.

Foreign Minister Andrei Gromyko met the East Germans before opening Wednesday's session with British and American negotiators. Three days of talks resulted in a communique which announced progress in drafting some of the provisions" of a treaty banning nuclear tests in the atmosphere, outer space and under water. It tended to confirm diplomatic reports that things were going smoothly.

The communique also said: "Views were exchanged on other matters of mutual interest."

In Washington, President Kennedy said the talks are proceeding "in a businesslike way." Any agreement will be sent to the Senate for its advice and consent, he said, but he said not other matters are under negotiation at the Moscow talks.

WASHINGTON

An unexpectedly drastic overhaul of the operation and self-policing of the nation's major stock exchanges was recommended Wednesday by Securities and Exchange Commission investigators.

The report, calling for outright abolition of floor trading, was sent to Congress by the SEC chairman without an official endorsement of any of the dozens of specific changes proposed by the investigation team following its two-year study.

CHARLESTON, S.C.

State troopers were ordered to Charleston in the wake of racial disturbances, and National Guardsmen, troopers were alerted.

Police dispersed 750 Negroes early Wednesday in an exodus of violence. Six Charleston policemen and a fireman were slightly injured in the first disorder in the month-long Transformer Plant

At Ordill To Close

MARION, I11.

Supreme Transformer Corp. said its Ordill division, employing more than 120 persons, will be closed by September or October.

It plans to transfer production to Chicago facilities. The firm said it is unable to find proper facilities for expansion in the Ordill area.

Bruce Shanks in Buffalo Evening News

Tampa, Fla.

Sabotage cut off telephone service to the entire community of Plant City, served by the strike-bound General Telephone Company.

In a separate incident, the FBI announced arrest of two telephone employees on charges of sabotaging a repeater box in Tampa July 12.

GARDEN CITY, N.Y.

Newsay said Wednesday Gov. Nelson A. Rockefeller

Ready Rail Report For President

WASHINGTON

Secretary of Labor W. Willard Wirtz screened President Kennedy's special fact-finding panel yesterday to prepare the preliminary draft of a report to the President on the railroad-union showdown over jobs.

The six-member panel, which has been consulting with both sides in the four-year-old railroad work rules dispute since last week, promptly began its writing chores.

Meanwhile, there were new signals indicating that only Congress will be able to avert a nationwide rail strike, which is expected to be completed by this evening, will be showed to carrier and union representatives for comment and criticism before it is put in final form and sent to the White House Friday.

have the effect of contributing to disunity in the Republican party."

TOKYO

Communist China announced the crash of a Soviet jet airliner last Saturday at Irkutsk in the Soviet Union.

A New China News Agency broadcast monitored in Tokyo said the remains of seven Albanians and three Chinese were brought to Peking for funeral services.

Among those killed were the wife, son and daughter of the Albanian ambassador to Red China, Radio Tirana, in Albania, had announced the crash early Wednesday but gave no casualty totals.

WASHINGTON

The budget deficit for the fiscal year ended June 30 was $5.2 billion, President Kennedy reported Wednesday.

It was a $2.6 billion improvement over his estimate of January. Kennedy said the cash deficit was $4.1 billion, also much less than predicted.

He said the most urgent economic business before the nation is the tax cut he has recommended. He said it is needed to wipe out "excessive unemployment" and stimulate economic growth.

NEW YORK

Nine executives and eight companies pleaded innocent in federal court yesterday to charges of conspiring to fix prices in the $75 million-a-year steel castings industry.

Judge Edmund L. Palmer delayed scheduling a date for trial of the indictments handed up July 2.

Those named as corporate and individual defendants include General Steel Industries, Inc. of Granite City, III., and Howard F. Park Jr., vice president for sales.

CHICAGO

Authorities started an investigation of fires that broke out minutes apart in two swanky Gold Coast hotels Wednesday morning.

More than 1,000 guests of the Drake Hotel and the Knickerbocker fled to the street as 125 firemen fought the blazes. Twelve firemen were overcome by smoke.

Fire Commissioner Robert J. Quinn said, "The nature of the fires, the places where they started and the time of day all leave questions." The owner of the Drake estimated damage at $500,000.

WEATHER FORECAST

Partly cloudy and not much temperature change was forecast for Southern Illinois today, with scattered thunder-showers mostly in the extreme south. High temperature forecast was 86 to 93.

Anna Plant Closes, 275 Out Of Work

ANNA, III.

International Shoe Co. announced yesterday its Anna division will be closed in about three weeks. The firm has been closing several plants and is consolidating production in St. Louis.

The closing will mean job losses for nearly 275 employees, two-thirds of them women. The plant has provided this city of 5,000 persons with an annual payroll of $800,000.
