City crisis threatens

City gets a taste of Cedar Lake

By Dave Ibata
Daily Egyptian Staff Writer

Carbondale residents drank their first glasses of water from the new Cedar Lake last Sunday. The lake was filled by three pumps pressed into emergency service for the parched city.

But earlier Friday city officials remained uncertain whether the pumps would be activated in time to stave off a water shortage and consequent rationing.

“We believe that the crisis will pass within the next 18 hours,” City Manager Fry said 10 a.m. Friday. “If it doesn’t, we’ll have to go to rationing.”

To save water during the crisis, University has stopped sprinkling and is looking into curtailing or even shutting down its water-cooled air-conditioners, according to Bill Boyd, director of public works. Citizens can help by not washing their cars or watering their lawns, Boyd said.

The decision to activate the equipment comes after Cedar Lake with the Carbondale Reservoir was made Thursday. The city is critically low water levels at the reservoir and in) the clear- holding tank at the city water works, Bill Boyd, director of public works, said Friday.

Since July 6, the city has sold more water than it received, Boyd said. The water level at the reservoir lapped at the bottom of the intake portal, and the water level in the clearwell fell from 12 feet on July 1 to 2.5 feet on July 18 Boyd said.

Four feet in the clearwell reserve is the minimum level of the Carbondale reservoir.

Since 9 p.m. Thursday the pumps at Cedar Lake have sent on to the reservoir 15,000 to 17,000 gallons. Weights have been drawn off its first water from Cedar Lake.

This water augments that presently drawn from Crab Orchard Lake. Boyd expressed the hope that by Monday the water level in the clearwell will rise above eight feet. At this point the crisis will have passed, he said.

The water system, once we have this raw water on the line, should serve for the next 30 years,” Boyd said.

Originally the city refused to accept two of the three Cedar Lake pumps because they did not perform up to design standards, Fry said. All three pumps are operating as an emergency measure.

“This will be a test, and after 30 days on the line the pumps may run in and come up to design specifications,” Fry said. If they pass the retest, everybody will be happy.

Part of the crisis is due to the low level of water at the Carbondale reservoir. In the spring city engineers drained the reservoir so that a new pipeline to a city water treatment plant could be installed.

After the completion of the project a dry spell hit the area. The water level in the reservoir remained low, according to Boyd.

SIU hopefuls ‘on reserve’ for students

Students interested in meeting prospective SIU presidential candidates should leave their names with the Student Body President Dennis Sullivan announced Friday.

Workers in the office on the third floor of the Student Center will notify registered students of the time and place of the visits of each possible candidate.

Sue Coonen, executive assistant to Sullivan, said it is uncertain whether each responding student will get to meet all visiting candidates.

Willis Malone, chairman of the committee searching for a president for SIU, told the Board of Trustees in July that his committee plans to bring from seven to ten outside potential candidates to SIU for “as wide exposure to campus utilities as possible.” Malone said he is hopeful of recommending a new SIU president by September.

Gas Bode

Gus says he’s going to sign up and meet the president-for-a-.term.
Two Franklin County jail escapes managed to elude police Thursday night after a high speed chase ended when their stolen car overturned and the two men escaped on foot, police said Friday.

Police said Friday the chase began on East Grand Avenue about 7:30 p.m. Security officers spotted a car that had been reported stolen.

When police took up the pursuit, the escapees, Richard Maero, 25, and Tonya Steele, 30, picked up speed and headed east on Old Rt. 13, police said.

The escapee's car turned off Rt. 13 onto a gravel road just east of 13. The car was abandoned after the escapees took a chance to change their clothes and drive off. They turned to a hunt on foot.

Police said they're trying to determine whether a vehicle they ruled out earlier actually was used in the robbery. The escapees were bound and gagged when police caught them.

Lightning strikes ended the motor search to find the escapees holed up in their car.

Police added that they are armed with a shotgun and are considered extremely dangerous.

Robert Schulhof, special assistant attorney general for consumer fraud in Southern Illinois, said the Carbondale office of Consumer Fraud and Protection Agency will handle about 1,900 cases of consumer fraud this summer.

Schulhof said more cases can be handled because of an increase in consumer awareness.

By noon Friday, the aircraft search ended and the motor search was reduced to a skeleton crew, police said. Police were skeptical as to whether the two were still in the area.

In Congress, Gray is a member of the committee on House Administration and a high-ranking member of the Committee on Public Works.

At noon Friday, the chase was described as healthy. A large number of police were on foot.

Gray said he and West Frankfort area citizens organized the rally so the 24th District could show its appreciation for Gray's 20 years of service to the area.

The "Welcome Home Ken" rally in honor of retiring Congressman Kenneth J. Gray will begin at noon Sunday at West Frankfort City Park.

Originally scheduled for 2 to 4 p.m., the rally time was changed to accommodate food service for the 3,900 people expected, Wayne Delap, rally chairman and resident of West Frankfort, said.

Gray, who has served as representative from the 24th Congressional district 10 terms, attributed his retirement decision to "poor health." The congressman was hospitalized for six weeks last summer for what he said was high blood pressure.

Delap, a long time friend of Gray, said he and West Frankfort area citizens organized the rally so the 24th District could show its appreciation for Gray's 20 years of service to the area.

In Congress, Gray is a member of the committee on House Administration and a high-ranking member of the Committee on Public Works.

Beginning at 3 p.m., state dignitaries who have been invited to attend the rally will be seated on the welcoming platform. House Minority Leader Clyde Choate of Anna, Illinois, will act as master of ceremonies and will introduce each dignitary and invite him to make a short welcome home speech.

Although the rally committee had "little idea" Friday which dignitaries will attend the welcome home party, Delap said Paul Simon, Democratic candidate for Congress, is expected to attend. Simon is brother to Gray's former seat this November.

Entertainment and drawings for prizes are planned. Funds for the prizes, which include a portable television, will be taken from the ticket money, Delap said.

The event will include a Democratic rally, but Delap said he hopes "everyone, regardless of party, will turn out to honor our congressman."
Corn wilting under hot sun
(Continued from Page 1)
Customers reached near-record levels last week. The increase in energy consumption can be attributed to a step-up in the use of air conditioning. Poe said, and an increase in water consumption has taken place because of more bathing and clothes washing brought on by the hot weather.

Poe suggested the following ways to beat the heat while conserving energy and water:

Cool down oven-like attics by installing reflector insulation and exhaust fans;

Close drapes and window shades during the day to reduce heat gains by as much as 50 per cent. Awnings are also helpful, and keep your car off the street, preferably left in place during hot weather help keep it cool;

Keep tree limbs, shrubs and grass trimmed away from the exhaust of coolers, refrigerators and air conditioners;

Save moisture-making jobs (dishwashing, laundering, bathing) for the cooler early morning or nighttime hours;

Turn off lights, television sets, radios, cooking units and other heat-producing appliances when they are not in use.

50 locals of teachers okay pact
By Gary Houy
Daily Egyptian Staff Writer
The resolution of the Southern 45 teachers' movement was signed off by 56 out of 70 participating locals of the Illinois Education Association (IEA). Robert Barga, chairman of the Southern 45 said Friday.

Representatives of the locals met in Salem Thursday to report on results of discussions concerning the Southern 45 concept.

The Southern 45 is a movement in Southern Illinois counties than are active in participation in the organization. Barga said. Of the 56 to 55 locals reporting Thursday, about two months have gone. Twenty other locals were not represented. Barga said he did not know whether those 20 could not attend the meeting, or whether they would adopt the resolution.

The resolution provides that the teachers and the Southern 45 would help each other in negotiations. "If a local can't agree to a contract with the district board, and forced out, other locals will go on strike," Barga said. "No one would return to work without all negotiations are settled." It also provides that locals that have already settled will help others with sympathy strikes, personnel and money. But at the same time, locals will continue to have a voice in what to do at any part of the game," Barga said.

The last thing the Southern 45 wants is a battle between the locals and the organization. The main goal of the organization is in doing away with costly and time consuming negotiations between each local and each board, he said.

"Teachers are standing up today for their rights," Barga said. Of the Southern 45's efforts, "we're here now, and we'll be here next year." The Southern 45 will hold an informal meeting after the IEA leadership conference August 6-8 at Macomb.

Council to face hiring issue
The council will discuss buying advertising space in the Daily Egyptian, the Daily Egyptian solution, and a spot commercial on WCIL to announce council agenda.

Distinguished homes on Walnut

By Marion Mitchell
(Eleven in a Series)

In 1887, Dr. Daniel B. Parkinson and Professor Hull purchased the building where St. Francis Xavier Catholic Church now stands. Dr. Parkinson took the east half of the block and his share immediately started work on a large two-story house. His architect, Isaac Rapp, designed a beautiful house in the then fashionable Queen Anne style.

"There was a stained glass window on the landing of the new kind of stairway and colored glass over the front door, pieces of the brightest glass in the plater decorating the large front piece . There was no water or electricity in town, so there were plenty of hanging lamps. An elaborate mantle around the grate, and big base-burner stoves, and a coal cooking stove to heat the kitchen. A pump for the cistern was on the back porch. Immediately back of the house was an equally well-built house which contained a very comfortable furnished plastered servant’s room. A board walk under a grape arbor led past a well equipped shop with bench & tools, to the outdoor toilet. It was plastered and painted. A curtained window. Two regular seats with a rag rug on the scrubbed floor.

On the other side of the building was a room for coal and behind it, under the same roof a place to store wood, and benches for the wash tubs where the laundry was done except in real cold weather.

Behind this building was a barn for the horse and cow and a pump over a well. There was an adequate horse lot for a nice garden plot and a cold frame early lettuce and starting tomato plants, etc. They planted peach tree and apple trees all about (the house).

Within a decade after the Parkinson house was built, running water and electricity were both to become available in Carbondale. Consequently, Or- nate changes were made in the lighting and heating systems, and a bathroom was added. A furnace was installed in the basement and another bedroom was built. By now, Parkinson was the president of S.I.N.U. and, as such, expected to do a good deal of high-powered entertaining—often of overnight guests. Receptions and dinners were commonplace, and so the house was enlarged.

"The (Parkinson) house at 401 West Walnut was never owned by anyone but Professor Parkinson and his daughter (MRS. D. E. Fretvich)" —McIolson

The home at 511 West Walnut is another house of some prestige. It was built by Dr. Allyn briefly before he moved into his remodeled home at 305 West Walnut.

The beautiful columned mansion at 605 West Walnut was built about 1900 by another distinguished S.I.N.U. instructor. It was the renowned Southern Illinoisan historian Dr. George Washington Smith who was responsible for its construction. According to the memory of some old-timers in the vicinity, it cost the monstrous sum of about $1,500.00 to complete. And so it was that West Walnut Street grew into the prestigious neighborhood which, to a great extent, it still is.

The Faner Building just doesn’t compare to the other beautiful brick buildings scattered around campus. I thought the inside might be nice, but it has the same bleak look.

Throwing looks aside, it is really hard to find your way around in the Faner Building. Allow plenty of time to find a room or a teacher inside, because it is a real maze once you get inside.

With these exterior marks against it, I hope the Faner Building will be used to its full intentions in the betterment of the University and the students. I guess it’s hot what’s on the outside that counts, but what the intentions on the inside are.

Letters

Bomber not needed

to the Daily Egyptian:

In the recent flurry of public concern about Nixon’s summit in the USSR, prominent people expressed worry about the security of the United States being "sold out." Perhaps people are more appropriate to worry that our human needs are being "sold out" to make dubious contributions to national security.

A case in point is that of the B-1 bomber. In early June, Sen. George McGovern met with the administration about the appropriation for this arms development program was defeated. Had there been more public exposure and debate about the subject, the argument might have been passed. I hope with this letter to make the B-1 bomber program and its consequences more visible.

The B-1 bomber is designed to replace the aging and obsolete (as say the B-52 and B-62 bombers. It will be used for both conventional (Viet- nam-type) and nuclear purposes, carrying twice the bomb tonnage of a B-52 and a possible "lath-ray." The military-industrial complex sees development of the B-1 as essential to the world’s high-powered logic flexibility, deterrence and superiority with regard to the USSR. In addition, the B-1 is regarded as another "barren chip" in the Star Wars armament Talks.

The current $450-500 million that is being asked for B-1 appropriations, is to be spent just to see if the B-1 can take off and land without falling apart. The intricate and expensive electronic equipment is not to mention the armaments, for the bombers will not be available or even tested until 1976—while Congress will be asked to approve production of the bombers in 1975. Nor will the B-1 be used in war until 1977 or 1980. The B-1 program may well become the most expensive weapons system in history—being anywhere from $43 billion (Air Force estimate) to $78 billion (Princeton University study estimate).

Consider also the B-2, the B-3 and the B-4 operational for 20 or more years—according to both a Boeing Corp. survey and the House Appropriations Committee. The B-1 may be obsolete before it is built—if its sole use will be to bomb empty missile silos or population centers. It is also significant that the twisted priorities of the U.S. government; the Congress is being asked to buy B-1 bombers, when the cost of six B-52s would be enough to provide nutrition programs for the elderly, maintain and support 20 monthly needed centers, and provide a good education for the 12 typical high schools. Not only will the B-1 be designed for war, it is being built for defense, but it will undoubtedly perpetuate the arms race.

I urge the citizens of the Carbondale and SIU community to write our congressmen and to have community groups take a stand on the B-1 project. It is not just a case of a cutting of funds, but a complete curtailment of this wasteful and unnecessary program. As Sen. William Proxmire has stated: "the fact is that among intelligent defense experts, the B-1 is a joke. It is a public works project for the aerospace industry rather than a needed weapon for the defense of the United States.

Consumer awareness needed

to the Daily Egyptian:

This is in reference to "Ignorance of False Baiting" appearing in the DEC on July 17, 1974. The author points out the lack of knowledge on the part of the consumers. The author also felt that the Federal Trade Commission is not justified in taking actions against Sears, Roebuck & Co. for using the illegal "bait and switch" tactics.

The truth is, consumers are an ignorant group! They lack awareness of their rights and responsibilities, as well as, product qualifications, and business tactics, with which to figure finance charges and check accuracy of bills and charges. This ignorance and lack of awareness is due to the prevailing ignorance and lack of awareness on the part of the consumers. The author also felt that the Federal Trade Commission has no jurisdiction over the consumer. How to lure the consumer in the store.

Most consumers have little chance for any formal education or training. Many of the consumers are those that have learned through experience, observation and often through advertising. Until the time comes when ALL consumers are thoroughly informed, we must rely on others, like the Federal Trade Commission, the Better Business Bureau and individual business tactics, like "bait and switch" and advertising. As of now the marketplace is a tournament—professionals (business people) versus amateurs (consumers).

Flowering

Gardeners will get a look Sunday at the brilliant colors of summer flowers at the annual summer Flower Garden Open House of the SIU plant and soil science department. Checking some of the flowers that will be seen are departmental chairman Gerald D. Coorts (left) and Robert L. Holmes, assistant superintendent. The open house will be from 1 to 8 p.m. at two locations. One will be near the entrance at the former Federal Smalls Foods Station one-fourth mile south of Chaetauqua Road, about a mile west of campus. The second will be at the Horticultural Experiment Station near the university entrance on West Chaetauqua Road. (Staff photo by Steve Sumner.)

Coach-administrator named at school despite objections

By Gary Hoy
Daily Egyptian Staff Writer

Two Carbondale Community High School board members have questioned the judgement of the CCHS administration in recommending combination of the positions of assistant principal and head football coach.

By a 5 to 2 vote, the board approved the nomination Thursday of Thomas O'Boyle as the school's assistant principal and head football coach.

The board approved a motion made by chairman of the board Roy Weshinsky and Board President Charles Hinderman that three years must be served by the chairman of the board. The motion was made by Charles Hinderman and Board President Charles Hinderman.

The board approved a recommendation by Comptroller Cecil Hulins to make an engineering study of CCHS to get the fund under the safe guard program. Much of the school's plumbing is held together by wood planks and pipes. The board said he hoped to have an engineering program ready in the next 40 days.

NEW YORK (AP) — Another dose of double digits inflation turned the stock market weak and listless Friday.

The Dow Jones average of 30 industrials lost 12.1 to 747.44 and losers edged up gains 673 to 651 among the 1,745 issues traded on the New York Stock Exchange.

Big Board volume was up 11.98 million shares.

The NYSE's composite index of all its listed common stocks was down at 88 at 43.

Inflation knocks stocks for loss

By Robert L. Holmes, assistant superintendent.

The CCHS administration is in agreement with labor, minimum wage laws, taxes and federal regulations.

Hugh Muney, president and chief executive officer for the Illinois Retail Merchants' Association (IRMA), will meet with retail merchants of Carbondale and Murphysboro at 10 a.m. July 11 at the Carbondale Ramada Inn.

M.E. Van Metre, executive vice-president for the Carbondale Chamber of Commerce, said the meeting will give local merchants an opportunity to ask Muney about sales tax on a state and national basis and Muney's viewpoints on where the state and federal legislatures are going.

Topics to be discussed include the new lottery legislation, minimum wage laws, taxes and federal regulations.

Van Metre said there are only seven members of IRMA in Carbondale. He said IRMA does a lot of lobbying, spends a lot of time with legislators and observes wage laws that effect retailers. Van Metre said.

The meeting is sponsored by the Carbondale and Murphysboro Commerce. Van Metre said it will be informal and open to the general public. He said membership in IRMA or local Chambers of Commerce is not required.

City expects Illinois Grant to finance Cedar Lake ramp

Fishermen may be launching boats from a city ramp at Cedar Lake next week.

The city expects to receive a $10,000 grant in the next two weeks from the Illinois Department of Conservation, City Planning Director James Rayfield said Friday.

The boat launch will be the first of many projects proposed at the lake.

"As soon as we have the zoning ordinance behind us, the development of a recreational and land use plan for Cedar Lake will be a top priority," Rayfield said.

The City Council has voted to allow fishing boats with up to 10 horsepower motors to use the lake. Swimming and camping facilities are in the long range plans, Rayfield said.

Development of the lake facilities will be spread out over a 10-year period, he said.

Social security head lists 1973 payments

At the close of 1973, social security benefits were being paid to 4,640 Jackson county residents at a total rate of $9,000,000 a month, according to Paul Shearouse, social security acting manager in Carbondale.

Shearouse explained that although most social security beneficiaries are older people, about one out of every four is under age 60. In Jackson county, 1,520 people under age 60 are collecting social security payments each month. Nearly 900 are too young to be eligible for retirement benefits because a working father or mother dies or becomes disabled or receives social security disability or retirement benefits.

Most of the 206 beneficiaries in Jackson county between age 18 and 22 years of age are receiving student's benefits under a provision in the social security law permitting the children of retired, disabled or otherwise unmarried social security beneficiaries to receive benefits under the children's benefit section.

Also, some of the recipients in the 16-22 age group, Shearouse said, are children of retired, disabled or deceased workers who became disabled or deceased before they reached age 62 and, because of the age limits, are not eligible to work and become self-supporting.

The monthly benefits of these young people are generally too small for physical or mental disabilities, he continued.

Since December, 1973, Shearouse said, social security benefits have increased 11 per cent, with seven per cent of the amount payable in March 1974, and four per cent payable in June 1974.

SIU graduate students in geography, forestry and geology have been working since spring on possible land use plans for the 700-acre lake.

Rayfield said he hopes the Planning Division of Planning Commission can work out a proposed plan for the council to act on by late fall.

He said the Planning Commission probably would schedule public hearings to get suggestions from Carbondale residents about recreational uses of the new lake.

Helter's terrace is a landmark for the road leading to the lake located about a mile off Route 13 three miles south of Carbondale.

Redemption of Cedar Lake is scheduled for early September at the pumping station on the east side of the lake.

Tank car explosion injures 100

DECATUR, Ill. (AP)—A string of tanker cars carrying large cargoes of flammable materials were engulfed in flames in a Decatur railroad yard Friday night, injuring more than 50 people, causing extensive damage and widespread evacuation.

Three women and two children were treated and 15 were admitted. No deaths were reported.

Three victims were rushed to a burn center in Springfield, 40 miles west of Decatur, a community of about 100,000 residents 200 miles south of Chicago.

Windows were shattered several blocks from the blast site and some buildings were reported extensively damaged. A high school gymnasium under construction collapsed.

The first explosion at 5:20 p.m. in southern blocks of the city south of the railroad tracks was 36 miles northeast of the area closed early as a precaution.

Danger appeared almost immediately and tank cars exploded at least 15 times.

Tank car explosions almost get blown out of your life or threaten your home if you go near them.

The owner of the administration building, said.

Spokesman said.

Calfee who had no estimate of damage.

Firemen from Decatur and a dozen outlying districts fought to restrain the flames from reaching boxcars loaded with dynamite and other flammable material.

Gov. Daniel Walker toured the damaged area and by plane and on the ground and asked at noon, "The danger appears to be isolated at this time. There is little further threat to life or property.

As the fire burned and the damage spread.

Two specialists from the state Environmental Protection Agency were dispatched to check air samples for possible toxic fumes.

They also checked the water supply from Lake Decatur.

School budget will be displayed.

The budget for the 1974-75 school year for the Carbondale elementary schools will be on display at the district's Administrative Office on Aug. 15.

Superintendent Lawrence W. Martin said Friday he could not give details as to what changes the budget will be as the 1973-74 budget until the state has time to work on the figures suggested by the administration.

A board work session to discuss the budget is scheduled for Aug. 5.

Physiology class offered in Marion.

A course on "Special Problems in Physiology" will be offered at the St. Anthony Hospital beginning this fall, according to Dr. Richard H. Willhite, acting chairman, continuing education at SIU.

The course, called "Physiology 501," will be geared toward practical personnel and will include topics in practical human physiology such as body compartments, body water, body relations and control, nutrition, and function and regulation of the human nervous system.

Further details will be announced by the Division of Continuing Education.

Daily Egyptian

Weekly newspaper editors elect first woman president

The International Society of Weekly Newspaper Editors wrote this new page in its 38th year history Thursday by electing Mary Jane Schneider, editor of the Baytown (Tex.) Times, the ISWNE's first woman president.

The new chief executive, who was a Democratic candidate for Congress in the spring, was installed in office for a one year term at a banquet Thursday night at Pere Marquette State Park near Grafton, site of the ISWNE's 38th annual conference.

Although Schneider is the society's first female president, there have been women in the organisation and on its governing board since it was formed in 1934.

Carroll Ray, editor of the Littleton (Colo.) Independent, was elected vice president. Wendell O. Gilley, editor of the Journal of Journalism faculty member, was retained as acting secretary-treasurer.

Elected to the board of governors were: Rick Friedman, editor of the Timely Post (Ill.), Ralph Kolb, editor of the Milwaukee (N.H.) Journal, and William Reese, editor of the Bloomington (III.) Post.

Phil McLaughlin, of The Miami (Fla.) Republican, was named at the banquet as winner of the ISWNE's 1974 Golden Quill Award for an editorial he wrote taking the state governor to task for defending Kansas as a tourist attraction.

Elder Trevor and Ralph Johnson, School of Journalism faculty and judges for the award, said they had expected McLaughlin to be a winner, agreed, grey-haired newspaper editor.

Carole Mann fires par 72 to tie U.S. Women's Open tournament

By Jerry Liska

LA GRANGE (AP)—Ready golfer under a broiling sun carried former champion Carol Mann and Curtis Cupper Debbi Massey into the first-place tie for the hole-in-one prize at the U.S. Women's Open Tournament reached the halfway mark Friday.

One of the early finishers as the field of 198 pros and 41 amateurs struggled over La Grange Country Club's stub-born course, Miss Mann, the 1966 open champion, was one of a handful to match par 72, while Miss Massey's 72 also gave her a 36-hole total of even par 144.

Miss Ahern, who opened Thursday with a 73, fired a second-round score of 71 to take over the lead at 143. Miss Sifford, who opened Thursday with a first-round total of 70, and still is the only golfer under par, was tied with Miss Massey at 143.

Carol Mann fired a 72 in the second round of the U.S. Women's Open as Miss Mann and Miss Massey reached the halfway mark at 144.

A penalty drop alongside the tent left Miss Patterson with a tough pitch over a tree and she made a double stroke on the other side of the green. Miss Mann also gave her a disappointing 77 and a halfway total of 165.

The U.S. Women's Open is the world's only major professional women's golf championship and is considered the most prestigious event in women's golf.

The tournament is played on the par-72 course at the La Grange Country Club, a private club in the suburbs of Chicago.

The tournament is a 72-hole event, with the first two rounds played on Friday and Saturday, and the final two rounds played on Sunday.

The field is limited to 198 golfers, with the top 75 advancing to the final two rounds.

The tournament is a stroke play event, with the winner determined by the lowest total number of strokes played over the 72 holes.

The U.S. Women's Open is one of the four major championships in women's golf, along with the U.S. Women's Amateur, the U.S. Women's Mid-Amateur, and the U.S. Women's Amateur Championship.

The winner of the tournament receives a large trophy and a cash prize, with the purse for the 2023 tournament expected to be over $6 million.
