Better Mouse Trap

$500 Million in Food Destroyed Annually
Project Studies Control of House Mice

By George Kennevry
(Third in a Series)

A wise man once said that the world will bow to the man who invents the better mousetrap.

While a "better mousetrap" is not the goal, a research project at SIU is concerned with the control of house mice which could lead to the discovery of such a mousetrap.

"Our basic objective in this study is to come up with ideas that will improve the control of house mice," said Willard D. Klimstra, director of Cooperative Wildlife Research, who is heading the study.

"The control of house mice is the food industry's most pest problem," Klimstra said. "The loss of foodstuffs to rodents is $500 million per year. Water isn't necessary for house mice so there is no need for them to come indoors. The main thing is that the rodents will contaminate and eat only one house mouse to contaminate a warehouse." The basic problem with the control of house mice, said Klimstra, is that "If they won't eat the bait, you don't control them."

"A major concern is not with the toxides themselves, but attracting mice to the toxides, whether it be by odor or some other means."

The project has been divided up into two basic parts. The first part was reviewing literature to develop a background for the research, and the study of house mice themselves.

For the first part, a survey of 278 publications was compiled, with a 65-page annual report last year the final product.

The study of the house mouse itself is being conducted in a house located just off-campus. One room of the house is for wild mice, another for a breeding colony.

"This is a temporary set-up," said Klimstra. "The upland mouse is the one on the edge of town will eventually be used."

"The project is being conducted in conjunction with the National Pest Control Association, which is providing $3,000 a year for the research, SIU is also putting in money."

"Two years of the project are almost completed," said Klimstra, "and we are virtually assured of three years of research, and could go as long as 10 years."

The members of the association contribute to sponsor research such as this in universities.

SIU is conducting this study of house mice to provide a service to the association, but in doing this, is able to support a graduate student by contributing to his dissertation, and they also are doing something that interests

90 Pct. of Fall Contracts Have Been Completed

The rent for residence halls will be increased from $25 to $250 for a term. Group housing will be raised from $125 to $150.

90 per cent of the on-campus housing units filled for the fall quarter, according to Sam L. Biville, coordinator for on-campus housing. "We think we'll have no trouble filling the other vacant units," he said.

The increases were approved in February by the Board of Trustees.

Toward a Better Mousetrap--Research at SIU covers a range of subjects, and the one illustrated here deals with the house mouse.

Gerald Gaffney, graduate assistant in this research, lifts a box in which mice nest. Gaffney is assisting Willard D. Klimstra, director of Cooperative Wildlife Research, in the SIU project.

Seer denies July 4 Tornado Prediction

In Carbondale, Area

DAILY EGYPTIAN
Southern Illinois University
Carbondale, Illinois
Wednesday, June 28, 1967
Volume 48
Number 167

By Wade Roop

Have you heard? Carbondale is going to be destroyed by a tornado on July 4.

As windy as the tale may sound, it has been circulating around campus and picking up velocity as it goes. It reportedly wasn't caused by any near as much as a concern if the Carbondale-Murphysboro area were no called "tornado alley" A if the predictions needed men more from someone other than Jeanne Dixon.

"I can't just say no and an once was said, "It's an ill wind..."

"More emphatically, "It certainly is not true," Jeanne Dixon, Weather Bureau, secretary said Tuesday.

The I have been foretelling the future made no such prediction, her secretary said. Saturday, she has not even made any weather predictions for the immediate future anywhere.

"So there you have it, rumor or no rumor how this tale got started is rather questionable, although some SIU students have heard that they heard the Dixon prediction on a late evening television program recently."

"It's always possible that with such a concentration of educated minds found at SIU there is the possibility the students are practicing a little extrasensory perception on their own. However, none of the students has come to light.

A representative of WOSD-TV in Paducah said Tuesday that a similar tale surrounding a snow storm supposedly predicted for Kentucky was heard."

Corrections Given On Check Pickup

Faculty and staff who pick up payroll checks at their departmental banks Monday morning at their banks, may have received checks Monday, not Sunday as erroneously reported Sunday in the Daily Egyptian.

John Barnes, payroll officer for the Carbondale campus, said checks may not be delivered to department offices on Saturday because the banks are closed. For this reason deliveries will be made Monday morning.

Checks will be mailed Friday to home addresses and banks. Checks will be available in the Personnel Department for those who regularly pick them up.

(Continued on Page 8)

Approved Housing

Needed to Register

According to Joseph F. Zaloski, assistant dean for off-campus housing and undergraduate motor vehicles all single undergraduate students are required to reside in facilities which are classified as "Accepted Living Centers."

Listings of approved housing are available at the Office-Campus Housing Office at 701 S. Washington St.

Gus Bode

Gus says that was a right powerful rumor that made the rounds, and he plans to bug out on July 4th anyhow--just in case.
Tour begins off to England study at famed Oxford University for a month of study as 38 students from the Carbondale campus of SIU accompanied by four faculty members and their wives. The group, left St. Louis June 21, also will tour France, Germany, Austria, Switzerland, Belgium and Holland before returning August 15.

SIU Participates in Talent Search

A search for talented but out-of-school youths in the rural areas of downstate Illinois has been launched by SIU and 12 other Illinois colleges. The project has received a $5,000 grant from the U.S. Office of Education and the talent search will get underway immediately, according to coordinator Leslie Chamberlin, admissions director at SIU.

The objective will be to seek out persons who wanted to go to college but didn't, and then to help them fulfill those ambitions. Chamberlin said the focus will be on "exceptionally needy and educationally capable" youth. In some cases they will have dropped out of school before getting high school diplomas.

Chamberlin couldn't estimate how many out-of-school college material exists in the 59 southernmost Illinois counties to be covered in the project. But a 1965 survey showed that only 42 per cent of the high school students in the representative counties planned to go to college.

A Talent Search Center will be set up and the SIU Data Processing and Computing Center will assess electronic information for the effort, a full time supervisor will be hired, with an office probably to be located on the SIU Edwardsville Campus.

Information gained in the Talent Search will be made available to high schools in an attempt to stop drop-outs, the federal grant will carry the project for its pilot year and Chamberlin said additional funding will be sought beyond that time to make it a continuing effort.

Other schools involved, and represented by their admissions officers under a project called the Southern Illinois Area Colleges Advisory Council, are: Blackburn College, Kaskaskia Junior College, Illinois College, MacMurray College, McKendree College, Millikin College, Monticello College, Mount Vernon Community College, Olney Community College, Wabash Valley College, Principia College and Quincy College.

Skunks Cause Increase In Rabies Cases

"There has been a definite increase in the number of cases of rabies in small animals in the Jackson County area," according to John Hawkins, a microbiologist in the Carbondale State Health Department.

"The vast majority of cases is in the large skunk population," Hawkins said. "Although there have been isolated instances of domestic animals, there have been no reported cases of rabies in dogs or cats for some years," he said. There was one case of a rabid horse on the SIU farm. The horse was believed to have been bitten by a skunk, however.

"The increase is nothing to be concerned about," Hawkins added, "because the disease tends to run in cycles and is self-limiting."

A rabid animal will not act the same as a healthy one, and usually is not shy, according to most reports. Hawkins stressed that if a person is bitten by an animal, "He should get the animal either dead or alive,"

"However," continued Hawkins, "Do not kill an animal unless it is completely necessary."

Radio Program Will Discuss Book by Sir Harold Nicolson

Radio Program will discuss "Diaries and Letters, 1930-1939" by Sir Harold Nicolson. The work of Sir Harold Nicolson will be discussed on "Book in the News" at 9-9:07 a.m. today on WSU Radio. Other programs:

7:30 a.m. Hall of Song: "The End of an Era" music from the last performance of the Metropolitan Opera Company.

10:30 a.m. News.

11 a.m. Moonlight Serenade.

Fall Appointments Available for CS

General Studies appointments for advisement for fall quarter are being given to students currently enrolled at SIU. Students may pick up appointments on the second floor of the University Center on Monday through Friday from 8 a.m. to noon and from 1 to 5 p.m. The Saturday hours for advisement appointments are 8:30 a.m. to noon.
Proposed Automobile Tax
Unfair to Unhappy Owner

The Illinois House of Representatives has adopted an amendment proposing a one-cent gasoline tax to raise $30 million a year. If the measure becomes law, gasoline tax will total six cents a gallon.

Democrats and Republicans in the House seem to disagree as to how much additional revenue the extra tax will bring.

Republican floor leader William Pollack of Chicago claims the extra one-cent would raise the tax from $49 million a year.

Democratic floor leader, Clyde Cholate of Anna, contends that one-cent isn’t enough, Cholate who claims the budget will go over $513 million a year.

Retained in the gasoline measure are specific proposals Illinoisans aren’t aware of—provisions such as requiring an automobile to be licensed to a flat $24 annually, with fees ranging from $22.50 based on horsepower.

Anti-Flag Destruction Law
Unlikely to Curb Extremists

In the melee of the more extreme passions over U.S. policy in Vietnam, a few persons seeking publicity have burned our American flag. Such actions triggered a prediction that flag burning would be accompanied by more violence. A law must be enacted against flag-burning and like misconduct, Now the House has voted such legislation, but with an amendment, the U.S. Capitol “burning” was dropped from the bill pending a flag over amendment.

If the Senate is so disposed, the flag law could be considered as a part of the post-war response to the present threat of war. But this legislation would be as pernicious to some extent, All

What’s Fair?

Roscoe Drummond touched on part of the problem about free air time in his column the other day.

Mr. Drummond pointed out that the new ruling of the Federal Communications Commission that radio and TV stations must provide equal air time to candidates for public office would be hard to enforce. Free air time, especially on narrow-cast stations is not possible for all candidates, he said. It would be unrealistic for citizens who listen only to the national networks to expect equal time for all candidates.

This is all true enough, but the essential issue is even more important: if you believe in the free press, you must also believe in the free people. If a radio or TV station have to support a candidate, the station is not free to reject a candidate who is willing to buy the station’s time.

The announcement that Red China has exploded a hydrogen bomb makes it clear that the Chinese are perfectly able to produce these awesome weapons far更快 than most Western experts anticipated.

Climbing Peking’s militant attitude is fully as ominous as the conflict it is threatening to others.

The fact is there was only a three-year gap between the Chinese-A bomb test and the hydrogen bomb explosion, a matter of seven years in the United States and four years in the Soviet Union.

This put an end to any fanciful thoughts about the lack of Chinese capability which too many so-called experts have discounted in the past.

Furthermore, we must not indulge in any delusion about China’s ability to deliver the bomb. The can’t do it now they can’t do it ever.

Red China is undergoing fast internal changes. Nobody inside or outside that country can say how many more years might elapse.

The outlook is bleak. The late President Kennedy foresaw this more than four years ago when he told the country that what particularly alarmed him was the feeling that by 1970 “there may be nuclear powers instead of four and by 1975, perhaps as 20 unless a workable disarmament treaty could be achieved.

The responsibility of world leaders to find an effective arms limitation formula is greatly intensified by this latest bomb test.

So far their efforts have been futile. The task is made immeasurably more difficult because Red China has boycotted the Geneva talks.

The Chinese know the realities of war and the frightful destruction that could come in retaliation for any rash act by Peking.

Peking Joins Race
Chir u’s H-Bomb Detonation Proves Nation’s Capacity

Nevertheless, no matter how one regards this latest hydrogen bomb explosion there is one inescapable factor, It adds to world unrest, tension, and danger. The risk of a possible nuclear war is a bitter struggle on China’s doorstep in Asia.

Kids Need Lessons in Hands Off

There is increasing comment on the growing crime wave across the nation. You read of pitched battles of various groups with police in the streets or on college campuses.

It is now reported that children in the 11 to 16 age group commit half of all property offenses, and of all criminals arrested the most frequent age is 14.

According to an AP dispatch from Los Angeles, a judge has recommended for women on an arrest ranging from a six inch hank to a der­ ringer for use in protecting their lives and property. Of course, you cannot carry them concealed, the judge said. Of course, a hank cannot be considered a concealed weapon.

Meanwhile, the President is urging federal and local authorities to take action to combat the alarming rise in teenage crime.

While all this is going on, it is time for parents to take their children in hand and to begin to teach them to keep their hands off other people and other people’s property. The same thought can be repeated at the opening of school classes each day. This simple little admonition could eventually save untold suffering and grief for children, parents and the public.

Chairmen Blamed for Ineffective Faculty

By Margaret Perez

The once-controversial Coleman report blames the faculty for much of the student failures, and Willis E. Malone, assistant to the vice president for academic affairs, now blames chairman of the various departments for the ineffective faculty.

The Coleman report, first published in its entirety last month, is concerned with student rights and the role of the University in society. At least five of its 31 recommendations deal directly with faculty and faculty-student relations.

Section 8A of the report states, "The average faculty member has no respect for the student's moral or aesthetic values as he does for his non-college contemporaries." Other sections in the report state that the faculty is too free from the students, and that too many of the faculty members lack experience in research and area service projects, not with the students, and that the faculty does not lie with the faculty members themselves, but with the heads of the departments that recommend them for tenure.

"If the department head pushes for research and publication, then that is what the faculty strives for," he said. "This is why the chairman emplases good, effective teaching, then that is what the faculty will push for." Malone, as assistant to vice president Robert W. MacVicar, interviewed every individual who is recommended for a faculty position.

"I ask myself how this person compares with others people as a possible faculty member," Malone said. "As a basic guideline, I am interested in young people who have just completed a doctor's degree, and I am interested in research-oriented faculty. Malone explained that with younger people on the faculty, promotions will come easier. They will not have as much resistance from older, more experienced professors. He feels that with less experienced people, the faculty can spend more time on the actual teaching.

"However, I have no way of knowing the effectiveness of this person as a teacher in his insular field," he said. "This is up to the head of the department. I am not in a position to lend a hand." Malone explained the process for hiring a faculty member. He said an individual is recruited by the faculty, promotions, defining areas of discount and making recommendations to alleviate it. The group deals with some of the central issues of demonstrating the need for internal representation, student-faculty relations.

In addition, the commission was given a broad task of defining what the university is, and what it is supposed to do in contemporary American society.

When the report was published in early May in its final form (one part of the report was released last year), there was not much positive reaction from the university, on the other hand.

Some L.U. faculty feared the report would set academic standards of depressively low levels. Some felt that it would be another blow to the already eroded university, on the other hand.

The Coleman Commission was an unbalanced mix of specific recommendations for practical solutions, on the one hand, and a serious statement on the purpose of the university, on the other.

Some L.U. faculty feared the report would set academic standards of depressively low levels. Some felt that it would be another blow to the already eroded university, on the other hand.

Some L.U. faculty feared the report would set academic standards of depressively low levels. Some felt that it would be another blow to the already eroded university, on the other hand.

On practical solutions, even, some griped about the relative lack of recommendations on many of the recommendations. Many of the 27 recommendations, with smaller, were in the nature of calling for further studies.

If most of the recommendations are carried out, the students will definitely be the greatest beneficiary. They will have decreased representation in many of the decision-making bodies of the University and benefit from many mechanisms for air- discount.

Before, however, before they are carried out, the recommendations must be studied and approved by the Board of Trustees, the highest governing body of the University.

It is up to President Morris to report them to the Board, and he hasn't said a thing about what he believes in with the report. The agenda for the next Board meeting Thursday does not list the topic.

"We have tried hard to present an accurate summary of student and faculty feelings, but it will be up to the Board of Trustees to put our recommendations into action," said Coleman.

The report represents the labor of 23 persons working over a one-year span. The research, analysis and compiling of the report was handled in such a way as to promote maximum reflection of student and faculty opinion and to minimize bias, Coleman said.

Among the experts consulted by the commission were: Charles Muscatine of the University of California, who had represented L.U. in the 1950-51 campaign; Dean E. G., Williams of the University of Minnesota and, Del Appley, professor of psycholog, at the University of Chicago.

Some of the major points of the report are:

- The student should be expected to be represented on a decision-making bodies of the University, including the University Council.
- "The student's learning loads should be adjusted so that he should be set aside every week as the faculty-student visiting hour to promote greater rapport between faculty and students."
- "Students should have an independent newspaper."
- "The advisement procedure should be changed; a return to advisement by the regular faculty is recommended."
- "The weekday Freshman convocation should be changed to monthly and its attendance made voluntary."
- "Students over 21 should be given greater freedom of action, i.e., they should be expected to choose their own housing and to make other adult decisions concerning their personal life."

Needs Trustees' Approval

Coleman Report's Fate Still Unknown

By Holim Kim

The fate of the Coleman Report is still in doubt nearly two months after it was made public, on the University of Minnesota's campus, according to a statement of principles regarding the university's role and a series of recommendations on how to make the university an independent institution.

A group of university members and students headed by President Deyto W. Morris in 1965 in the wake of the RATM (Racial Action Movement) demonstration.

The Coleman Commission was given the task of defining university as an institution, and of making recommendations to alleviate it. The group dealt with some of the central issues of demonstrating the need for internal representation, student-faculty relations.

In addition, the commission was given a broad task of defining what the university is, and what it is supposed to do in contemporary American society.

When the report was published in early May in its final form (one part of the report has been released last year), there was not much positive reaction from the university, on the other hand.

Some L.U. faculty feared the report would set academic standards of depressively low levels. Some felt that it would be another blow to the already eroded university, on the other hand.

Congress Investigation

Of ABC-ITT Merger

Termed Essential

(St. Louis Post-Dispatch)

A bare majority of four members of the Federal Communications Commission has taken an unreasonably obdurate course in reaffirming approval of the American Broadcasting Co. merger.

Chairman Hyde and Commissioners Lee, Wadsworth and Loevinger outrightly opposed and apparently puzzled the three other commissioners by what they believe to be a "relentless adherence" to the merger with National Telephone and Telegraph "to make the serial number for the merger that will be responsible for the public."

Congressman Robert Johnson said that the "time the application was filed, the outcome has been a foregone conclusion."

If the commission majority had made up its mind before hearing the argument pro and con, its reason for having done so may well be the most important of all.

Whatever the reason it would be a scandalous abuse of the commission's powers, Commissioner Johnson calls it "the most carefully and highly questionable merger, the public must be much more so.

A searching examination into the functioning of the commission in the case is imperative, Commissioner Johnson said that from the time the application was filed, the outcome has been a foregone conclusion."

But whether he does or not, a full-dress investigation in Congress is essential. Congress alone possesses the powers and latitude to probe into every nook and cranny of this mystifying case, valuable as a Justice Department appeal could prove toward clarifying it.
**Storm in House**

**Filibuster Started to Pass Open Housing Legislation**

SPRINGFIELD, ILL. (AP) -- With state police standing by, angry Negro demonstrators launched a filibuster in the Illinois House Tuesday in an eleven-hour effort to pass an open housing legislation.

The filibuster was launched in protest of Speaker Ralph Smith's refusal Monday night to call an open housing bill from amendment stage to passage stage.

Five uniformed state troopers were summoned to the House chamber by Smith and other Negroes whose bill filibuster plans.

"Your ruling has dismayed and disappointed us," Washington told Smith.

Debate was adjourned and much shouting occurred as the Negroes hollered for recognition from Smith during the filibuster.

When Smith accused Smith of "deliberately ignoring me" until he was recognized by the Speaker.

At one point, an unidentified member from the Republican side shouted at the Negroes to "shut up."

The filibuster was begun by a typist, tractive employee in the Illinois General Assembly, a demand that bills be read toll as required by the Constitution.

This requirement ordinarily is ignored with consent of the Speaker and bills are read by tally tape.

But Washington also called for verification of the read call.

**Policy Discards**

**Weekly Drills For Reservists**

WASHINGTON (AP) -- The Pentagon said Tuesday that military reservists who have served in a combat zone or active duty generally will now be exempt from having to make weekly drills in the ready reserves.

The new policy may mean the release of thousands of men currently required to attend weekly meetings of the active and ready reserves of National Guard units.

Norton said the Defense Department "must find a way to handle another 100,000 or 150,000 reservists from the list of reservists.

**March on Weston**

Dubuq County rights advocates are planning marches into Weston recently as they protest the failure of the Illinois Legislature to pass a statewide open-housing law this session. The demonstration was against the small town, the proposed site of a new federal atom smasher.

(AP Photo)

Havana (AP) - Soviet Premier Alexei N. Kosygin's visit to Cuba was cloaked in secrecy Tuesday, amid speculation his private talks with Cuban leader Fidel Castro might spread over most of the week.

Diplomatic sources said there was little doubt the main goal of the Kosygin-Castro talks would be to smooth out differences, particularly over policy in Latin America.

Castro criticized the Soviet Union in a speech March 13 for conducting trade talks with Columbia, a target of Cuban propaganda.

Referrig to Columbia and other governments, Castro declared that anyone who traded with them undermined the Cuban-supported guerrilla movement in Latin America. Diplomats expect the Russians to argue in the talks that the way to export revolution is by example and not by arms.

That Latin American problems being discussed was evident from the fact that Kosygin brought along to Havana Monday the chief of the Latin American section of the Soviet Foreign Ministry, Lev Mendelevich.

The official Communist Press reported Kosygin's arrival in front-page stories and pictures but gave no hint of what the two men would talk about.

Informed sources said there were increasing signs Kosygin would remain in Havana for a three to four more days, at least.

**Government Dictates States' 13 Driver Safety Standards**

WASHINGTON (AP) -- The federal government told the states Tuesday the standards they must meet to qualify for federal financial help in the national assault on highway traffic hazards.

Secretary of Transportation Alan M. Boyd described the standards as "national guidelines for the states are expected eventually to result in the national standard."

The 13 standards are drawn generally in broad terms but they go down to specifics as prescribing safety helmets and footrests for motorcyclists and their passengers.

And they tell drivers who might have a few drinks how much is too much alcohol to found in their bloodstream.

It is the first time the government has set the kinds of driving adjectives in a major traffic safety program, the lawman estimated there 25,000 individuals mandatorily attached to ready reserves who will be eligible for release, if they so desire, by D-Day.

Unspecified numbers of Navy and Air Force reservists also are involved.

The policy was laid down in a memorandum to the services by Deputy Secretary of Defense Cyrus Vance.

U.N. Troops Ordered to Withdraw

UNITED NATIONS, N.Y. (AP)—In a white paper Tuesday, Secretary-General Thant defended his action in ordering withdrawal of the U.N. Emergency Force at Egypt's request. He rejected contentions that removal of the force caused the Arab-Israeli war.

Thant issued his report as Secretary of State Dean Rusk scheduled a followup talk tonight with Soviet Foreign Minister Andrei A. Gromyko on major issues, including the Middle East crisis, passed down from the Glassboro summit sessions.

Rusk met with Tham in advance of the meeting with Gromyko.

Debate continued at the emergency session of the 122-nation General Assembly with Iraq Foreign Minister Adnan M. Pachachi charging the United States with taking "implacable hostility to the Arab nations."

"Our people are now convinced more than ever that the United States will always use its vast power to serve the side of Israeli aggression against the Arab countries," he declared.

Thant's actions in complying promptly with Egypt's demands for removal of the force have been criticized by President Johnson, as have others making similar criticism included Canadian Prime Minister Lester B. Pearson and Israeli Foreign Minister Abba Eban.

But Thant in a report issued to members of the assembly said the criticism amounted to a "superficial and oversimplified approach" that ignored dangerous elements in the situation prior to the Egyptian demand for removal of the force.

The Rusk-Gromyko meeting was given little chance of producing any quick agreements.

Ringing Bells To Celebrate Independence

Bells will ring throughout Carbondale July 4 to commemorate the anniversary of the signing of the Declaration of Independence.

Local religious, civic and patriotic groups will join with the Carbondale High School band, school and church bells, just as the Liberty Bell announced the nation's independence in 1776.

Bells will begin ringing in Carbondale at 1 p.m., on July 4 and will continue pealing for one minute.

Carbondale Mayor David Keene has called on citizens "to take note of this observance by planning special programs that will consist of bell ringing."

As part of the nationwide celebration to commemorate the nation's birth, Mayor Keene has proclaimed July 4 as "Bells of Independence Day."

Fish Removal Set At Refuge Pond

Again this year officials at Crab Orchard National Wildlife Refuge are allowing the public to remove surplus fish from a waterfowl management pond.

Public including removing most of the water in the 50-acre pond to permit aerial seeding of wild Miller for waterfowl that arrive in the fall.

The public may enter the area Tuesday and Wednesday between 8 a.m. and 5 p.m. Dip nets, seine, spear, rod and reel and bow fishing will be permitted.

Game fish will be returned to Crab Orchard Lake which lies adjacent to the pond.

Fishing signs will be placed at various intersections marking the route for vehicles. Signs will be placed at the first blacktop road south of the lake on June 14. Information may be obtained at the refuge fire station on Rte. 146.

Home Economics Staff

To Teach Programs

Two faculty members from the department of Home Economics Education will teach in short programs elsewhere this summer.

Mrs. Lucille Campbell will return to the staff of the Canadian Craft School at Elliot Lake, Ont., from July 16 to 22, and Dorothy Keenan will teach in a two-week workshop at Central Michigan University, Mount Pleasant, Aug. 14-25.

THE SEARCH—Steve Lewis, a graduate student in education, examines books in the campus-located Bookmobile as librarian Harold R. Studt

bacher looks on. Part of the Shawnee Library system, the Bookmobile serves the southern 18 counties in Illinois.

Tribal Expert Going Home

Wearing a topknot, Maori Mead says he can see no future in America.

New Zealand Maori Mead is a talented linguist of the American Indian.

Anglo-Saxon officials, Mead said, "are trying to preserve their traditional way of life. At the same time, they are also making efforts to break into activities of the I.C. Society. In the longer run, they are probably a threat to Indians in Southwestern New Zealand."

Mead is married to the former June Walker of Ruatoria, Rangi, and is the father of two children.

Mead is a professional and social anthropologist, attempting to solve problems.

Mead said he had no future in America. They traveled extensively and made many friends.

"I intend to go home to rejoin the Maori studies group at Auckland University," Mead said, "I suppose I prefer to give something back to my own people in the form of research and teaching services, making contributions to New Zealand as a whole."

Mead is married to the former June Walker of Ruatoria, Rangi, and is the father of two children.

Mead is a professional and social anthropologist, attempting to solve problems.

The obvious question does arise and that is what would Kilisma do if he would come up with a sure-fire mouse catcher.

"I would patent it myself," he said, "and retire."

Deadline Friday For Paying Fees

The deadline for paying delinquent fees for summer quarter is Friday, according to the Registrar's Office. Any student who fails to pay by that date will be withdrawn from school.

Friday is also the last day to withdraw from school and be eligible for tuition and fees refunds.

Eight-week classes must be dropped by July 7, and twelve-week classes must be dropped by July 14 to receive no letter grade.

Music Department Offers Tutors

By Noria Jones

Would you like to learn to play a musical instrument? If you plan to be an elementary or kindergarten teacher or are majoring in music, then the SIU Department of Music will teach you.

But most SIU students are left out of these classifications.

The department has to take music majors first, Roderick Gordon, chairman of the division of music education, said. If there is any room left over, the department will take others, he added.

"But we are usually bulging at the seams," Gordon said.

The opportunities for others to learn are limited because of a limit of instruments and teachers, Gordon added.

The department usually starts with only enough classes to fulfill the needs of its students. The department usually has a rough estimate on how many students will need a certain class, and the department hires enough teachers to take care of only that many, Gordon said.

The number of students is necessarily limited in order for the department to do its job.

"Just think what it would be like to open classes to all students who would like to learn to play the guitar," Gordon said.

"Why, we would have 5,000 students enrolled in that class alone,"

Graduate assistants also tutor students in playing a musical instrument, Gordon said. This private instruction, which has been paid for, is used only for the better players, Gordon added.

A student can study privately but the fees would not be paid for, Gordon said. The student would have to pay the tutoring charges on his own.

"We do not prohibit students from learning to play an instrument," Gordon said. "If a student has a sufficient background in music, they can qualify for the music education courses."

The department doesn’t get many complaints, many students are disappointed if they cannot get into a class but they usually settle for a music appreciation course instead.

Most students who now apply for classes which teaches one how to play a musical instrument would like to become specialists of the instrument because they know that is where the jobs are, Gordon said. This course would be used more than just an elective.

The department teaches three divisions of students how to play musical instruments. The divisions are for those students who are majoring in the musical instrument itself, a primary classification consisting of music education majors, and a secondary classification consisting of kindergarten and elementary teachers, students who are majoring in a single musical instrument such as piano are preparing themselves to teach others how to play the piano, or who will play professionally in concerts or recitals, Gordon said.

The music education majors, the primary classification, must be able to play a number of instruments adequately in order to instruct others, Gordon said. They will become band, orchestra, or choir directors.

Students who will become kindergarten or elementary teachers, the secondary classification, learn to play an instrument so it can be used as a tool to accompany others in singing, Gordon said.

"We will examine the minority child in the urban setting, look for common denominators and significant differences among economically deprived groups, consider the economic influences upon children's learning and motivation."

In addition to home economics to others and students, the work shop has attracted directors and staff of nursery schools and day care centers, he said.
Kaline Tops American-League All-Star Team

NEW YORK (AP) — unless Hank Aaron opens with a Chicago pitcher, the league-leading Sox won't have a representative in the starting lineup for Tuesday night's American League All-Star game, a sentiment repeated by the 10 managers and coaches of the American League, which will be represented by the Chicago Cubs and the Detroit Tigers.

Manager of the world champion Baltimore Orioles, who will designate the pickers and the rest of the 25- man squad, may very well settle on Joe Horlen, Gary Peters or Tommy John of the White Sox. Each of the 10 teams must have at least one player on the squad.

At Kaline of Detroit was the top pick with 242 of possible 247 with the Tigers excluded because no- body can vote for his own teammate. Frank Robinson of the Orioles had 239 of the possible 247 votes.

The infield had a strong Minnesota side with Killebrew in first base, and rookie Red Carew at second. Ricc Per- relli of Boston was the shortstop and Brooks Robinson of the Orioles was the catcher.

The National League's eight starters will be announced Thursday by Commissioner William Veeck, the league offices then will re- lease as different dates the names of the pickers and the rest of the 8 selections by the two managers.

Weight Room Closed Following Foul Play

The weight room in the McAndrew Stadium has been closed indefinitely because of a number of break-ins, which the move. The weights will be stored and the arrangements made to be opened to a new room.

Cubs Pennant Thinking Team Makes National League Tight

CHICAGO (AP) — Add a lot of spirits. Leave out the bit- ters. Mix in some old and new vingees. Square off in some discards. Stir with some luck. Shake well by Manager Leo Durocher.

That's the Chicago Cubs, cocooned 8-1 out in the pennant-thinking trip.

Cardinal writers are searching the archives. They are bringing up such things as the Cubs' last National League flag, in 1945. The team leaped from fifth place to first on July 8 and never got off the roof until they clinched the title in Pitts- burgh the weekend of Sept. 30. But they hadn't finished the first division since a year ago when they were 23 games out of first at this time.

The deficit attitude was the first thing they had to eliminate," says Lee. "They were trying to get along on something they got to expect that's where they belonged. Another thing, it took me a while to get to know these players and it took them time to understand us."

Ed ZastrofTo Get Oakland Tryout

Ed ZastrofTo, 1967 Saluki guard, will try out with the Golden State Warriors and the Milwaukee Bucks of the American Basketball Association.

Oaks expressed interest in ZastrofTo for his ball handling, passing and defense.

The six-foot playmaker broke into the Saluki starting lineup early in the season after spending two years on the bench.

He helped fill the void left when George McNiel and Mike Quon were drafted by Coach Jack Hartman as the team's two guard positions.

A series of break-ins, resulting in damage and stolen equipment, has necessitated the move. The weights will be stored and the arrangements made to be opened to a new room.

In Accepted Living, Enter 1968

That's the Chicago Cubs, cocooned 8-1 out in the pennant-thinking trip.

Cardinal writers are searching the archives. They are bringing up such things as the Cubs' last National League flag, in 1945. The team leaped from fifth place to first on July 8 and never got off the roof until they clinched the title in Pitts- burgh the weekend of Sept. 30. Trampoline Ban Hurts Gymnastics

By Bill Kindt

Recently the Executive Committee of the NCAA voted to ban the use of the trampoline in collegiate gymnastics. This means that instead of seven events in gymnastics meet there will now be six.

The Executive Committee voted, 4-2, to ban the trampoline. According to Bill Mead, the NCAA women's gymnastics coach and manager for the 1968 United States Olympic team, the Executive Committee reached their decision for three reasons.

The first factor was the safety factor. The trampoline is a dangerous apparatus and many trampolines have been injured in the past from falls while doing their exercises.

Still, it can be argued that there are other events in gymnastics that have a higher ratio than does the trampoline. The high bar and still rings are two.

Meade said the second factor was financial. He considers in that a trampoline will cost approximately $700,000. This sum of money was deemed too much for an event where only one country is represented. Also, since most college gymnastics have in that they work almost exclusively in the trampoline, the team would be wasting money on a trampoline which only a limited number of people would use.

The third, and probably the most pressing of the factors, is the fact that the trampoline isn't an Olympic event and the NCAA gymnastics program is now concentrating on Olympic events and Olympic competition.

The reason for this is quite clear. The United States gymnastics team hasn't done well in recent Olympic games, and this move would be an attempt to change its focus on Olympic events, in the past four years the Elevated team has out two events from gymnastics competition. In 1963 the trampoline was eliminated, and now the trampoline. Both of these events aren't Olympic events.

Meade thinks that the trampoline may become an Olympic event in the not too distant future. To back up this line of thought, there are already international tournaments just for the trampoline. The World Trampoline Championship is held annually in England.

After the Executive Committee voted the Rules Committee of the NCAA also had a vote on the trampoline and their vote was 4-2 in favor of keeping the trampoline.

"This really doesn't mean anything. The trampoline will still be banned. They (Executive Committee) won't change their minds," said Meade who is a member of the Rules Committee.

This would mean the six events next year in college gymnastics would be free exercise, side horse, high bar, long horse vault, still rings, and parallel bars.

Without their trampoline points the Salukis would have finished behind Iowa and Penn State in the 1967 NCAA championship instead of capturing the team title.

The trampoline team was made up of Horch Dvorak, Dale Hardt and Joe Dupree. Dvorak has graduated leaving only Hardt, Dupree and Skip Ray. Hardt is equally adept at the long horse vault and may be able to work free exercise as well.

Meade also indicated that he would give Ray a chance to work in as free exercise man.

Dupree seems to be the only Saluki really damaged by the banning of the trampoline.

In Meade's words, "Dupree will just have to go into an early retirement."

Ralph Ettinger had a very good day Monday and Knicks coach Dick McGuire was pleasantly surprised with the former Saluki star's outside shooting.

"We didn't know how good his outside shooting was, but he had a very good day Monday," McGuire said in a phone conversation with the Daily Egyptian.

Frazier carried an 18 point average through his first collegiate year but was better known for his playmaking, passing and defense.

McGuire said, "Frazier has a very good chance to make it into one of the guard positions. We have felt so all along."

With a low stock of guards. Dick Barnet, Emmett Fryar and Dick Van Arsdale, in addition to Frazier and Bill Bradley, who was signed for approximately $900,000, Bradley will not report until Jan. 1. The Rhodes Scholar is finishing his studies in England.

"We made think that the trampoline would be a good event for the Salukis, and the other trampoline" said Frazier.

Bradley will not report until Jan. 1. He is a Rhodes Scholar and is finishing his studies in England.

"We made think that the trampoline would be a good event for the Salukis, and the other trampoline"

Bradley will not report until Jan. 1. He is a Rhodes Scholar and is finishing his studies in England.

The Knick's are well stocked with everyone trying out for guard and it will take some time to decide who will make the move," he said.

"It will take some time to decide who will make the move," he said.

Frazier will spend three or four days a week in the Carthage Mountains along with other Saluki's. He still has the ability to conduct youth clinics and get into shape, according to McGuire.

McGuire said, "Frazier has a very good chance to make it into one of the guard positions. We have felt so all along."

Frazier's attitude is reflected in his outside shooting. He is an excellent outside shooter and the coach has given him a chance to show his talents.
