Students Use Different Study Habits

How do SIU students study for mid-terms?

You put two or three items on the mirror and by the end of the day you know them."—Michael Cooksey, a sophomore from Iowa who is majoring in geology says this is one method he uses to study for exams.

When Cooksey needs to remember a formula he writes it on his mirror. Looking at his mirror causes him to memorize the formula. He says this method also works for other courses, such as history.

Vlad Tochuchango, a senior from Kenya who is majoring in mathematics insists that "cold memorization" is the only way to study for many exams.

He buys most of his textbooks and underlines the important ideas while studying. When an exam is scheduled he skims the book for material he doesn't know and notes the passages he has underlined.

He believes "interest makes good grades."

Some students have given up the method of cramming for exams.

"I usually try to keep up with my daily assignments," says Ardell Albers, a senior studying accounting from Evansville, Ill.

Robert French says "to keep up with his assignments too, but if you get behind, he says, "you'd have to cram a little."
Water Problems Improved, Not Alleviated

By David Chester

One of the constants of nature is that all living things need water to survive. And Carbondale's residents are no exception. During the summer the city water department processed nearly four million gallons daily, according to Ruth C. Craig, superintendent of the water and sewage department.

In July, help for the community more than four million gallons of processed water might be consumed. Craig said this is because of recently increased swimming and other outdoor activities that cause filtering plants to exceed that amount. And what is looked upon as a good day has to be made up for at night and on week-ends.

"68 Forecast

Johnson, Nixon Top Contenders

(Continued from Page 1)

"I'm a Democrat, and while I don't like Johnson, he is the only man the Democrats can run," Davis says. "He'd be better than the man we had before," and he would appoint people who were "good for the area," he added.

"I think it would be a closer election if Wallace would stay out," Davis says. "But I don't think he would be approved of Johnson's administration if he ran someone else, and that would mean a sure win for the Republicans or at least a strong showing for the Republicans who would be glad to have the vote."

Politics in the area is "very important to me," Davis says, and he would like to see the Democratic party win, but "I don't think it's going to happen."

"The use of water depends partly on the weather," he continued. Normally August is the hottest and driest month. In Carbondale, however, water consumption doesn't vary as much as might be supposed. Craig explained that even through the winter it averages about 3.5 million gallons each day, while summer use is limited to an average of four million gallons, five million gallons capacity of the system. This situation in the past has necessitated placing restrictions on watering lawns and other consumption.

"Our main concern," Craig said, "is not to place restrictions on the use of water, but it is a matter of maintaining an adequate reserve in case of fire. People have to ask themselves which is more important, their lawns or their homes."

"Of course we hope to get by this summer without restrictions," he added, "but we can't say for sure yet." One of the bright spots in the picture is a new filtering plant expansion which will double the present capacity to eight million gallons. The new facility is scheduled to begin operation by September 1.

Craig said one thing about the new expansion is misunderstood. "We're not going to blow away until we reach the eight million gallons a day production, simply because of a deficiency in supply. It all boils down to one thing, you see. We have increased the pumping capacity as well as developed more storage areas. In September we'll have the filtering capacity, but you have to get the water to the plant. That's the problem now."

Two future developments which will bolster the present Crab Orchard Lake Supply system, according to Craig, are in the works. One is the proposed Cedar Creek Lake project; the other is a side channel reservoir on Crab Orchard Creek. The Crab Orchard development, though without a completion date, is definitely in the planning stage.

"Even today we're having to refuse interests which want to expand their operations and need more water."

Craig believes the eight million gallons production, when reached, will be quickly absorbed by such expansions.
Activities

**Concert, Art Show Scheduled**

The U.S. Navy recruiting team will be in Room H of the University Center from 9 a.m. to 4 p.m. today.

The Student Government Organization Committee will meet from 10 a.m. to 1 p.m. in Room E of the University Center.

Summer musical tickets will be on sale from 1 to 5 p.m. in Room B of the University Center.

Tournament Week will continue from 7 to 10 p.m. in the Olympic Room and the Bowling Lanes of the University Center. Bridge, bowling and table tennis, the games being played in these tournaments. The meeting will be held at the student center. The student association will meet from 7 to 9 p.m. in Room C of the University Center. The Indian Association will meet in Room C of the University Center.

**Jewish Students**

To Meet Today

Members of the Jewish Student Association will meet at 7 p.m. in Room D of the University Center. The Action Party will meet in Room E of the University Center.

A faculty recital featuring Warren Van Bronkhorst and Wesley K. Morgan will be held at 8 p.m. in Davis Auditorium. A Music and Youth at Southern concert will be held at 6 p.m. in the Morris Library Auditorium.

**Allied Breakthrough in Italy**

**Slated on WSIU-TV Today**

"Battle of Cassino," the heroic story of the Allied breakthrough in Italy that paved the way to the liberation of Rome in World War II, will be reported by Walter Cronkite on "The Twentieth Century" at 8:30 p.m. today on WSIU-TV.

Other programs:

- 4:30 p.m. What's New: "Waterway"
- 8 p.m. Passport: "Bold Journey"
- 9:30 p.m. Film Classics: "Jeeves"

**Baptist Student Union**

**Slates a Guest Speaker**

F. H. Hadley will be the guest speaker at chapel services at the Baptist Student Union, July 24 to July 28. Hadley will conduct a Bible study on the Book of Genesis.

**McDonald’s® Gives You a Good Shake!**

You get shakes at McDonald’s like you can’t get anywhere else! And we weigh every shake before it’s mixed. So, you always get the same generous shake. Our shakes are triple thick. So thick we provide special oversized plastic straws. We blend our shakes so thoroughly, they stay triple thick down to the last chocolate, strawberry or vanilla sip. You couldn’t make them better if you made them at home!

Open 11 a.m. to 11 p.m. Weekdays and 11 a.m. to 12 p.m. Friday and Sat.
Early Cinderella Translation Permanently Foul Up Story

By Hal Boyle

NEW YORK (AP) - Things a columnist might never know if he didn't open his mail. This may come as a blow to your children, and the glass industry. But, however, the Cinderella wore to the royal ball were made of fur, not glass. The English translator of the original 17th century French version of the fairy tale mistook the word "verre," which means "verre," which is glass.

Psychologists say that the poorest time for a saleman is... Hippos Merely Ignore Problems

The hippie message appears to be that there should be more love and less hate, that violence is bad, but our society spends too much time and energy on anything other than pursuing truth and happiness. None of this is new, they say, we've got that much. That most people with a philosophical bent fully agree with it.

Moreover, the hippies represent an extreme one to the violence that has come to play such a big part in American life. Who isn't tired of the riots, the soaring crime rate, the shooting and stabbing and car-graffiti that seems to take up most of the television time? That's left over from the commercial.

What annoys us about the hippies is their answer to these problems, which is to turn around and run from them. Their main goal seems to be retreating into a world of infallible dependency, with the help of marijuana or LSD. And much of their philosophy seems to be aimed at creating one unpleasant fact along with others: That dependency on drugs is a weakness, and that a mind-crippled, life-crippled habit is no better a problem, but a refusal to face it.

We believe the problems of society are going to be solved by men and women, not by free-floating individuals who have mistaken aimlessness for freedom.

—Chicago's American

*Mercenary? I thought he said missionary*

Cincinnati, Washington Star

In view of the numerous motorcyclists killed in the past year or two involving SIU students, it has been evident that something should be done to curb them. Measures have been taken in the form of legislation but adherence to certain unfor- cial rules has not been followed. Actions should be taken to some things in mind to drive safely, according to James Aaron, said. Many individuals attempt to make the transition from an auto- mobile to a motorcycle without proper training, he explained.

Certainly this is true. A cycle rider is familiar with the vehicle on lightly traveled roads before going on the highway.

Aaron also recommended that motorists avoid positioning themselves in motor- ois's "blind spot" while following a car that is traveling within the highway. If the cycle rider stays on the left rear of the car he usually remains known.

One of the most dangerous actions a cycle rider can take is to make a wrong turn in the moment. The Illinois General As- sembly recently passed legislation regulating the number of riders and passengers to wear protective headgear. This legislation is supposed to reduce the number of injuries in motorcycle accidents.

 automatically, almost, all riders and passengers to wear protective headgear. This is supposed to reduce the number of injuries in motorcycle accidents.

Naturally, anyone who rides a motorcycle should be careful to head injuries. When the camps' victims is catalogued and becomes a human missile, his head of- ten bears the brunt of the impact. Another feature which may reduce the number of motorcycle deaths in the future is, therefore accidents connected

We be lieve the problem of this is that there is a major job to be done in the past year or two involving SIU students, it has been evident that something should be done to curb them. Measures have been taken in the form of legislation but adherence to certain unfor- cial rules has not been followed. Actions should be taken to some things in mind to drive safely, according to James Aaron, said. Many individuals attempt to make the transition from an auto- mobile to a motorcycle without proper training, he explained.

Certainly this is true. A cycle rider is familiar with the vehicle on lightly traveled roads before going on the highway.

Aaron also recommended that motorists avoid positioning themselves in motor- ois's "blind spot" while following a car that is traveling within the highway. If the cycle rider stays on the left rear of the car he usually remains known.

One of the most dangerous actions a cycle rider can take is to make a wrong turn in the moment. The Illinois General As- sembly recently passed legislation regulating the number of riders and passengers to wear protective headgear. This legislation is supposed to reduce the number of injuries in motorcycle accidents.

Automatically, almost, all riders and passengers to wear protective headgear. This is supposed to reduce the number of injuries in motorcycle accidents.

Naturally, anyone who rides a motorcycle should be careful to head injuries. When the camps' victims is catalogued and becomes a human missile, his head of- ten bears the brunt of the impact. Another feature which may reduce the number of motorcycle deaths in the future is, therefore accidents connected

with them, is the revision of the Illinois motorcycle regulations. These regulations now place the registration of motor- scissors on the same basis as cars.

The American Motorcycle Association has published a pamphlet called "Two Wheels" which covers the two recommendations on how cycle riding can be made safe.

The cyclist should wear leather clothing, if possible, because it "is ideal for saving your skin" in case of an accident.

The rider should always check his vehicle before and while it is running before driving it.

It also offers tips on when and how to apply the brakes when turning corners and when following and passing another vehicle on the highway.

The organization advocated wearing of protective headgear and full motorcycle legislation was passed.

Robert W. Allen

Free Advice To the Editor:

With all the respect deserving the president of a major university to report, I share the following observations and suggestions which have been molded by a five- year career at SB.

When Kyle W. Morris thought about the charge brought up, he ought to have considered the facts, and now that exists can be attributed to him and fantastic ability to obtain a guess, that's been the key so far, but now it has reached the point where it takes more than that.

Morris' thoughts about being able to personally understand every problem of each of the 25,000 students on two campuses is a fine one but it simply doesn't work. I feel that he should realize this and make the Office of Student Affairs an effective ear for students instead of a pawn channel.

The statutes provide for a university-wide familiar- enment, the only organization officially representing the students' welfare. That is the number, but how many of the student re- commendations ever get to Morris' desk? And when they do, how many of them are considered? We have seen that our president should either give more of his time to making sure that every equally savvy someone to the student body, but think that Morris has no concern whatever for our student body. In our case, there would be no need for SU.

The charges in question were opinions on certain administrative actions that are usually held to be true...or not. The problem is in- tegrational. It is obvious that such actions by the administration do encourage a free-exchange of ideas.

4. Contrary to Mr. Reyn- olds' opinion KA has not been suspended until the ed- ucation of the Incorporated contributors. It has been suspended because the Pres- ident of the University does not want it published during the summer....even though approval was given to it. The depen- dents governing bodies and ad- ministrators involved (except, of course, Mr. Morris),

Mr. Reynolds claims that KA is the playing of a few students. This is obvi- ously false and a person who does not appreciate the democratic contribu- tors each week can easily re- fuse the charge. I wonder, however, if Mr. Reynolds has never written to KA to express his opinion.

Bard Gross Current Editor-KA

K A Replies

To the editor:

Re: Mr. Reynolds' letter to the editor concerning the sus- pension of KA.

1. The American Society of Newspaper Editors Code which Mr. Reynolds quotes fall short includes letters to the editor such as those pub- lished in KA. Therefore KA does not violate it.

If Mr. Reynolds would check some reputable newspapers as St. Louis Post Dispatch or The New York Times he would find that KA does not violate it. If KA did not meet certain standards of the organization, it has not been written to KA to express his opinion.

Bard Gross Current Editor-KA

Letter to the Editor

Don't you think it's about time you tell the Arabs a worst? Since the outbreak of the Arab-Israeli conflict, se- veral issues of the DAILY EGYPTIAN has contained at least one cartoon mocking the Arab people.

Such humor is funny in small doses, only a steady diet of the same thing becomes unappealing and tiresome.

**Quality Impresses, Not Size**

By Holim Kim

Dr. Martin Van Brown, a member of the SIU Board of Trustees, is not impressed by Southern's enormous physical growth.

Its quality, however, does impress him.

Dr. Brown was named to the board last month for a second six-year term.

Looking back on his last six years, he said, "I put last the increase in students and physical facilities."

Dr. Brown, a Carbondale dermatologist, is a busy man. However, when he was offered a second term on the board, he regarded it as an honor and accepted it.

Frankly, he concede that the job is time-consuming and, at times, thankless.

"I don't know why you do this; I guess it's an honor and a responsibility," he said, "but I tell you, it's work.

He once spent a whole Sunday afternoon reading a 1,400-page report on a civil service employee who was dismissed from the University. Sitting on the Southern Illinois Merit Board, which oversees the University civil service system, is a job that comes with the trusteeship.

"The University is now accepted as the people's university of Southern Illinois," he said.

"Probably the greatest of all the goals for the near future is the introduction of new programs and the upgrading of the faculty," he said. "I put last the increase in students and physical facilities.

Dr. Brown, a Carbondale dermatologist, is a busy man. However, when he was offered a second term on the board, he regarded it as an honor and accepted it.

Frankly, he concede that the job is time-consuming and, at times, thankless.

He once spent a whole Sunday afternoon reading a 1,400-page report on a civil service employee who was dismissed from the University. Sitting on the Southern Illinois Merit Board, which oversees the University civil service system, is a job that comes with the trusteeship.

Variety of jobs and paper work, however, are not new to Brown, whose checked and colorful life includes teaching school and a career in the Navy, from which he retired as a rear admiral.

A native of Southern Illinois, he attended Southern when it was still a teachers college. His father, William O. Brown, was a long-time professor of education here. Brown Hall is named after the professor.

Grading with the class of 1925, he taught school in Mascaroth, It didn't last long, so he wanted to be a doctor.

In 1930, with his graduation from medical school, he joined the Navy. He retired after 24 years with the two-star rank, having seen worldwide duties, including diplomatic missions to China, the Philippines and Brazil.

He returned to his old college town to live when a position was offered in the Carbondale Clinic. Soon he was drawn into alumni activities, making tours and speeches. He became president of the Alumni Association in 1959. Two years later he was asked by the governor to sit on the board.

'Carousel' Needs Ushers for Show

Summer Music Theater is appealing for 12 persons to be ushers for the forthcoming production of "Carousel," according to Alfred Erickson, business manager for the theater.

Those interested should sign up in the main foyer of the Agriculture Building. "Carousel" will open at 8 p.m. Friday and run through Sunday and again Aug. 5.

Make-up examination period for students whose petitions have been approved by their academic dean:
9:30-11:20

General Examination Information

Examinations for one and two-credit-hour courses will be held during the last regularly scheduled class period prior to the formal final examination week. Three, four, and five-credit-hour courses will meet at the times listed above. Non-credit courses which give examinations will follow the same schedule as outlined for one and two-credit-hour courses.

A student who finds he has more than three examinations on one day may petition, and a student who has two examinations scheduled at one time should petition, his academic dean for approval to take an examination during the make-up examination period on the last day. Provision for such a make-up examination period does not mean that a student may decide to miss his scheduled examination time and expect to make it up during this make-up period. This period is to be used only for a student whose petition has been approved by his dean.

A student who must miss a final examination may not take an examination before the time scheduled for the class examination. Information relative to the proper grade to be given a student who misses a final examination and is not involved in a situation covered in the preceding paragraph will be found in the mimeographed memorandum forwarded to members of the instructional staff at the time they receive the formal final examination week. Three, hour courses will be held during

Six-Day Parcel Delivery Due in Carbondale

Starting Monday, delivery of parcel post in Carbondale will be expanded from five days a week to six, according to Acting postmaster Ervin Sullivan.

The boundaries of the expanded service include Mill Street, Oakland Avenue, and Willow Street west of the Illinois Central Railroad; Walnut Street, Wall Street and Willow Street east of the Illinois Central Railroad, Sullivan said.

This is in line with a recent directive from Postmaster General Lawrence F. O'Brien following the recent signing of the Post Office Appropriation bill by President Johnson. The legislation contains a $5.5 million item for restoration of the six-day a week delivery which has been cut back inasmuch as carriers on vehicles can deliver parcels of any size.

Customers living on routes have been receiving six day deliveries all along. They were not covered by the 1964 cutback inasmuch as carriers on vehicles can deliver parcels of any size.

posted customers served by “motorized” letter carriers have had to wait a week or more for their deliveries. Sullivan said.

The expanded delivery will be effective Monday and will be followed by a full expansion of the delivery service in Carbondale in the near future.

Herrin

Urban Unrest Set An Inscape Topic

"The Long Hot Summer," a discussion of unrest in large urban areas during the summer, will be conducted by Elmar Johnson, assistant director of the Center for The Study of Crime Delinquency and Correction.

The discussion programs will meet at Dome 6 at the lake-on-the-campus at 5 p.m. Sunday.

A free picnic supper will be provided.

Six-Day Parcel Delivery Due in Carbondale

Starting Monday, delivery of parcel post in Carbondale will be expanded from five days a week to six, according to Acting postmaster Ervin Sullivan.

The boundaries of the expanded service include Mill Street, Oakland Avenue, and Willow Street west of the Illinois Central Railroad; Walnut Street, Wall Street and Willow Street east of the Illinois Central Railroad, Sullivan said.

This is in line with a recent directive from Postmaster General Lawrence F. O’Brien following the recent signing of the Post Office Appropriation bill by President Johnson. The legislation contains a $5.5 million item for restoration of the six-day a week delivery which has been cut back in May, 1964, as an economy measure.

Nearly 6,000 cities are affected, Sullivan said. He noted that the improved service will remove an inequity for many business and residential routes.

Postal customers served by “motorized” letter carriers have been receiving six day deliveries all along. They were not covered by the 1964 cutback inasmuch as carriers on vehicles can deliver parcels of any size.

Customers living on routes serviced by foot carriers have received larger parcels from Friday to Sunday. A free picnic supper will be provided.

Jet Crash Kills Navy Secretary

HENDEESVILLE, N. C. (AP) - A Piedmont Airlines jet carrying 78 persons, including the newly named secretary of the Navy, exploded after colliding in flight with a smaller plane Wednesday, and all aboard apparently were killed.

Three persons aboard the smaller plane also died. The flaming wreckage of both aircraft showered down in an area two miles northeast of this summer resort city of 10,000 in the foothills of the Blue Ridge Mountains of western North Carolina.

The Boeing 727 confirmed that John T. McNaughton, 46, due to become secretary of the Navy about Aug. 1, was aboard the airliner along with his wife and his 14-year-old son, Ted, 11. They were on route to Washington from Asheville, N. C., where the boy had attended a summer camp.

The airliner, a Boeing 727 that left Atlantic less than an hour before the crash, had left the Asheville airport minutes before the in-flight collision occurred.

Witnesses said the smaller plane exploded on impact with the larger aircraft, and the craft flew on for a short distance before crashing and breaking up. The wreckage came down on a slight incline in a small, thinly wooded area of the Blue Ridge Mountains. The area is fairly heavily populated, but not struck by the falling wreckage.

One explosion rattled windows in downtown Hendersonville, two miles away.

Sheriff's deputies, finding no signs of survivors, said bodies were strewn over a wide area. One body from the larger plane was plowed through the roof of a house. The smaller plane was Flite 232.

It had left Atlantic at 10:40 a.m. It carried a crew of 5 and 73 passengers, 52 of whom had boarded at Asheville only moments before the collision. The flight was to have ended at Washington at 12:57 p.m. Piedmont serves the Charlotte area and the District of Columbia on 7,000 miles of routes. This was the third fatal crash in its 18-year history.

The Boeing 727 had gone into service for Piedmont only about two months ago. It was being leased by Piedmont from Boeing at $1,000 a day.

ROB DAMAGE--This two acres Bulk Oil plant was destroyed by fire recently after a gasoline fire bomb was hurled by Negro rioters in Cairo.

In Plainfield, N.J.

Disaster Emergency Declared

PLAINFIELD, N.J. (AP) - An armed takeoff force of police and National Guardsmen made a house-to-house search of a riotous Negro neighborhood Wednesday, seeking sources of weapons. They met no resistance, despite an earlier warning of "vicious retaliation" against any invasion of the 112 square block district sealed off after a white policeman was shot and wounded by a Negro gang Sunday night. They found no weapons. Their special object was to ascertain if military rifles from a nearby munitions factory and believed hidden in the trouble zone.

Negroes who stood on sidewalks to watch the searchers shouted at the Guardsmen. "Man, you're ripping up the place," one young Negro called. "You're tearing it apart." 

A white newswoman who followed the searchers heard frequent complaints they had overturned furniture and strewn clothes and personal items in the living quarters in their quest for weapons.

Rusk Reoffers Vietnamese Bombing Halt

WASHINGTON (AP) -- Secretary of State Dean Rusk said Tuesday that the United States is prepared to stop bombing North Vietnam "if anyone anywhere can show us it would be a step toward peace."

Rusk also said a news conference that the Communist Viet Cong and North Vietnamese "are fighting very, very badly" in the war. But he made it clear that it in spite of this result, which he portrayed as military progress for the United States and South Vietnam, the Reds have given no sign of interest in such a policy.

At the same time he warned Red China and Asian Communists "not to be seduced" by any "comfort" from the British announcement of a step toward de-escalation of the war. He said he had no sign of interest in such a policy. He said countries in that position by the United States determined to defend their freedoms, and added they have the help without any sign of militarily smaller plane Wednes-

Reliable sources said that the Vietnamese and Iraqis had strongly urged Moscow to push up their arms support to the Arabs. They are impatient to reclaim the land lost to Israel in the June 5-10 war. Neither Moscow nor Cairo made public the Soviet reaction to this request, save for a statement declaring the Soviet backing of the Cairo report to help the British in the coming elections. President Nouredin Azhari, who previously was reported at the series of meetings, President Nourredin Azhari of Syria apparently left early.

SIU Athletes to Participate in Pan Am Games

One present, future and past SIU athlete will participate this summer in the upcoming Pan American Games in Winnipeg, Canada.

The present athlete is gymnast Donna Schaezner, who won a place on the women's team two weeks ago in Minneapolis by placing fourth among the six qualifiers.

Miss Schaezner, a three-time Saluki captain, was the 1967 collegiate all-around champion. She was voted outstanding performer by her teammates, on a squad that has never lost a meet in any type of competition.

Her coach, Herb Vogel, expects Miss Schaezner to come up with one of her top efforts at Winnipeg as a member of what he considers to be the best United States women's Pan Am gymnastics team ever assembled.

In the Majors

The future SIU athlete is a Vencenzian, Vincent Capriles, a recent recruit of swimming Coach Ray Eslick. Capriles is a backstroker and has already established himself as one of the best young swimmers around by defeating U.S. Pan Am backstroker Chuck Goostache of Yale in a Chicago meet.

Capriles is the prime candidate for his country's top backstroke position in the 1968 Olympic team, according to Eslick. Capriles will enroll in school next fall and begin practice with the Saluki frosh, provided he scores adequately on his foreign language entrance examination.

Former Saluki wrestler Larry Kristoff is a member of the United States squad. Kristoff, generally acknowledged as the No. 1 United States amateur heavyweight, earned his position on the team by recently defeating Curly Cup of Arizona State.

Kristoff hopes to make the United States Olympic team again next summer and obtain a longstanding goal, that of becoming the first American heavyweight to ever win a gold medal.

Mets Sweep Twin Bill From Houston: Tom Seaver Sets Strikeout Mark

NEW YORK (AP) - Tommy Davis' grand slam home run and Ron Swoboda's two-run blast helped the New York Mets tie together two big innings for a sweep of their doubleheader with the Houston Astros Wednesday, 8-4 and 7-2.

Davis' homer came off losers Dave Gliusti in the first inning of the second game after the Astros had roughed up winner Tom Seaver for two runs in their half of the inning on a single by Joe Morgan and doubles by Rusty Staub and Eddie Mathews.

A single by Bud Harrelson and two Houston errors preceded Davis' blast, the fourth grand slam of his career.

Ed Kranepool and Swoboda homered in the sixth inning, chasing Giusti and Seaver, the Mets' fine rookie, rolled on to his ninth victory, striking out 12 to tie the club record. He fanned Dave Adlesh four times.

Looking for a new car?

...but a little short on cash?

Sometimes it's rough for students in a college town to get credit - especially for something like a new car.

Vic Koenig has the answer: Though special arrangements Vic can offer long term credit to qualified SIU students.

You can buy a new Chevy Corvair, or Camaro this month, with no payments due until Sept. 20. Stop by and see any of the friendly salesmen at Vic Koenig today for more information.

Tests May Decide Hornung's Future

HOUSTON (AP) - Paul Hornung checked into a downtown hospital 45 minutes late Wednesday and began a new series of tests he hopes will prolong his professional football career.

The tests at Baptist Memorial Hospital are being supervised by Dr. Henry Witters, a brother-in-law of John Mccem Sr., father of the owner of the New Orleans Saints.

Reports on similar test made earlier in the Mayo Clinic were being mailed Wednesday to Witters. Another examination will follow within a few days at the Scripps Clinic at La Jolla, Calif.

"I'm optimistic, but I'm going to wait until all the results are in," Hornung said at a news conference. "There is doubt in my mind or I wouldn't be here."

Hornung has been exercising with 20-pound weights since a jogging trick received during a Green Bay-Chicago Bears game last October caused temporary paralysis to his left arm and shoulder.

Baseball Game

Tickets On Sale

Tickets are presently on sale at Student Activities Office for the trip to St. Louis Sunday for the Cardinals-Bruins baseball doubleheader.

The bus will leave the University Center at 10 a.m. Sunday and return immediately after the doubleheader. All persons interested are asked to sign up immediately.
