SIU May Aid US Study Of Kaskaskia River Basin
Conference Opens On Campus Tomorrow

A conference to explore the possibility of joint research between SIU and the U.S. Corps of Engineers will be held on the SIU campus this week. The matter under discussion will be commercial development of the Kaskaskia river basin.

Robert A. Harper, chairman of the Department of Geography, charged by President Delroy W. Morris with organizing the meeting, said four main planning chiefs of the Lower Dismal Swamp Project, Mississippi River Commission, U.S. Corps of Engineers, would arrive on campus at noon Wednesday.

These men, the district chief for the Lower Dismal Swamp, at Vicksburg, Memphis and St. Louis, will meet with ten representatives of SIU academic departments.

According to Harper, the Corps members will set down objectives of river basin planning, water floods, land resource development, and identification and possible solutions of problems at a Wednesday afternoon session.

On Thursday morning the College of Education for the Detroit Association will be held on the campus.

The role of education as the key to combating unemployment will be the theme of a lecture tonight by Morton Wheeler, associate executive of Industrial education for the Missouri State Department of Education.

Wheeler will speak at 8 p.m., in the auditorium of the Missouri Library. He is at SIU for a two-week workshop which is exploring developments in industrial education.

Wheeler's lecture will be sponsored by the Lambda Sigma, honorary industrial education fraternity, according to John H. Erickson, faculty advisor and chairman of the Department of Industrial Education.

On July 8, the fraternity will sponsor another public meeting to elect future president, assistant director of vocational education for the Detroit public schools, who will speak at 8 p.m., in the library auditorium.

Alumni Association Elects William Bracy President

Clemon T. Bracy of Herrin was elected as new president of the SIU Alumni Association Saturday. He was graduated from SIU in 1949 and was retiring first vice-president of the association.

Other new officers elected Saturday include Walter B. Young, Jr., of Carbondale, past president; Bert Casper of Cobden, vice-president; and Dave D. Kenney of Carbondale, secretary.

Young, as president elect, will become president of the association next year. He was retiring second vice-president of the board of directors.

Bracy, secretary of Bracy Insurance and Bracy Realty Co. of Herrin, has been Herrin city treasurer, president of the Rotary Club, president of the Herrin Junior Chamber of Commerce, national director of the Illinois Alumni Association, and Illinois vice-president of the Jaycees.

Robert O'Daniel of Carbondale was reappointed executive director of the Alumni Association, He held the position since 1955.

The Association maintains its headquarters in a former residence on Harwood Avenue across the street from Anthony Hall.

Developments in elementary education will be discussed by educators from Washington, D.C., Springfield and Champaign as the 13th annual Summer Education Conference held here today and Wednesday.

The conference, sponsored by the College of Education and the Office of University Extension, will be held in cooperation with the University School. Seventy-five hundred educators, chiefly from southeastern Illinois, will attend.

J. Murray Lee, chairman of the Department of Elementary Education, said that today Richard Miller of Washington, associate director of the National Education Association's project on instruction, will discuss new developments in elementary education he has seen in his visits around the country.

Earl D. Patton, assistant superintendent of the Champaign Public Schools who will become superintendent of schools at Carlinville, Centralia, July 1, also will speak today on "New Developments in a Public School System."

Wednesday Paul F. Blackwood of the U.S. Office of Education will speak on "New Developments in Elementary School Mathematics."
First Group Now Training

In Data Processing At VTI

Training of the first group of students majoring in data processing has been started at VTI. The training reflects a whole new field of job opportunities in the growing use of data processing and electronic computers in modern business and industry, according to James A. Robb. He joined the VTI faculty last December to start the course of study. The first group of students majoring in data processing already has started training, and others who have completed one major field of business study and want added training and computer programming; and others beginning this summer. Robb already has started, he said. He expects to have the staff and facilities to handle up to 40 beginners starting in the fall term.

VTI has added a two-year curriculum in data processing and computer programming, it meets the standards suggested by the U.S. Department of Health, Education and Welfare and the course leads to an associate in business, or an associate in technology, degree from Southern.

Robb is a former high school teacher and administrator who has spent the last eight years in data processing work. He was on the education staff of International Business Machines for nearly six years and was senior systems analyst at the McDonnell Automation Center in St. Louis for two years before coming to SIU.

Rehabilitation Workshop Planned Here August 18-30

A two-week workshop for leaders in various fields of rehabilitation will be conducted by the Rehabilitation Institute Aug. 18-30.

Guy A. Renzaglia, Institute director, said emphasis will be upon the scope of rehabilitation services available to the handicapped, skills inherent in the rehabilitation process and methods of mobilizing professional and community resources to meet the needs of the disabled.

Cooperating with SIU in the program will be the Illinois Division of Rehabilitation, the Illinois Tuberculosis Association, the Illinois Department of Mental Health, the Illinois Public Aid Commission and the Illinois State Employment Service.

School Of Technology Expansion Shows History Of Growth At SIU

Education, industrial technology, engineering technology, applied science and engineering workshops are being filled by men educated in and familiar with the various fields.

The dean said technology has been a part of the educational picture since 1968, when courses in manual arts were offered primarily for those preparing to teach. In 1945, the technical college saw its first summer school, then was the College of Vocational and Professional, later renamed the School of Technology.

A variety of technical and professional training sequences are available in each of the major areas-industrial education, industrial technology, engineering technology, applied science and engineering workshops.

"Many human activities which formerly developed on the initiative of political, financial or military leaders now do so on the initiative of technically trained men, who can effectively influence more positions of leadership in industry and government.

Friday Deadline For
St. Louis Bus Trip

Students interested in a trip to St. Louis and a visit to the Art Gallery and business district Saturday have until noon Friday to register.

A spokesman at the Activities Development Center said Monday only 40 seats will be available on the bus, which will leave the University Center at 8 a.m. Saturday.

Last Saturday's St. Louis excursion, the first of a series offered this summer, was sold out, the spokesman added. Students attended Muni Opera's "Carnival." Fee for this week's excursion will be $1.

A Health and Audio-Visual Aids Conference for student teachers will be held from 10:30 a.m. to noon today at the Studio Theatre.

Iota Lambda Sigma, industrial education organization, meets at 7:30 tonight in the Library Auditorium.

And the Sports Parachute Club meets at 7:30 in Room E of the Activities Area of the Center.

This week's outdoor movie offering, to begin at 9 p.m. Wednesday at McAndrew Stadium, is "Please Don't Eat the Daisies.

Also scheduled Wednesday is the opening performance of "The Guardman," produced by the Southern Players. The play, a comedy farce by Austrian playwright Ferenc Molnar, continues through Sunday at 8 p.m. each day at the Playhouse.

Vavra Receives
$2,000 Grant

The Phillips Petroleum Co., Bartlesvile, Okla., this week provided a $2,000 grant-in-aid to SIU to support studies of greenhouse ammonia loss from fertilizerized soils.

Joseph Vavra, soils scientist in the School of Agriculture, will conduct the research.

It is the sixth and largest annual grant from the firm for soil fertilizing studies by Vavra. A good portion of the funds will be used to provide a fellowship for a graduate student assisting Vavra in the research.

A member of the agriculture faculty since 1951, Vavra has been teaching courses in soils science, soil fertility and they have extensive research in soil fertility and soil moisture. He received his master's degree from Michigan State University and his doctorate in soil chemistry from Purdue University.

45 Citizens Of Edwarsdale
Visited SIU Campus Sunday

More interested citizens than the scheduled bus could accommodate, came to Carbondale with Edwarsdale city officials Sunday to see the counterpart of their future SIU campus.

President and Mrs. Delyte W. Morris and other members of the University staff hosted 45 from Edwarsdale on a tour of the campus and answered questions.

Mayor and Mrs. D. Blanney Miller of Carbondale were unannounced at the request of the mayor of Edwarsdale. Mayor and Mrs. William Eaton represented the Carbondale city officials.

Five came separately by car after the bus was filled, a spokesman said.

The groups studied buildings and land use, the effects of zoning on town and university, and cultural opportunities.

Ground has been broken for the first buildings which will comprise the new Edwarsdale campus of Southern Illinois University.

The buildings are a general classroom building and administrative offices and a library building. Others are expected to be started in the near future.

Stamp Out Hunger:
Old Stamps Give Aid
To Hungry Overseas

Helping to stamp out hunger among displaced orphans overseas is a worldwide hobby of James Nordberg, an unusual stamp collector, who commutes to summer school from Chester.

He saves them by the thousands, then gives them away to benefit the needy. It doesn't matter what kind of postage stamps they are, he just wants cancelled stamps.

He has been told, will obtain food and milk for displaced orphans overseas.

He sends them to nuns at St. James Hospital in Chicago Heights. From there, the nuns to Nobelberg, they are sent to Catholic Missions. Stamp collectors in other countries then buy the stamps to sift through them for their collections.

The money derived from these sales goes to help the children.

Nordberg, a native of Sparta who is working on his master's degree in guidance and counseling after obtaining his bachelor's degree here in 1950, is picking up disposed envelopes in a number of Southern Illinois University offices and removing the stamps from them.

A teacher in the Park Forest, Ill., elementary school system, Nordberg was a patient letter writer to St. James Hospital, where he learned all about saving postage stamps.

He started his project in a small way by giving the stamps from his get-well cards to the nurses. Last Easter, when he was able to return to teaching, he got the pupils of the fourth, fifth and sixth grades interested in collecting cancelled stamps for him and by the time school was out he had 30,000.

One child even brought a lot of trading stamps.

"I got the idea of collecting postage stamps on the campus when I saw a big stack of envelopes in the Registrar's office," Nordberg said.

LITTLE MAN ON CAMPUS

Starlight Concert
On WSIU-FM

Starlight Concert, scheduled at 8 o'clock tonight on WSIU-FM, features Bach's "Suite No. 2 in B Minor for Flute Solo, Strings and Continuo.

"Antigone" Highlights
WSIU-TV Schedule Today

"Antigone", Jean Anouill's adaptation of Sophocles' tragedy, will be telecast at 8:30 p.m. today on WSIU-TV.

Dorothy Tutin in the title role, with Sigourney Weaver as Creon, who has assumed the throne of Thebes following the death of King Oedipus and the killing of each other by his two sons.

Creon orders a hero's burial for one of the sons, and commands that the other's body be left to rot. This is the Theban punishment for treason.

Other programming highlights:
5:00 p.m.
What's New, "Wildlife and Regrets" discusses the life of the Bighorn sheep. "Space Age" tells how to figure distance in space; and "Folk Music" travels to the Philippines. This show is repeated at 10:30 p.m.

5:30 p.m.
Encore; Prospects, "American Conservative".

7:00 p.m.
American Album, "Growing Up" begins with Abraham Lincoln at the age of 14 and ends on his 21st birthday, when he leaves his family to start a life of his own.

8:00 p.m.
Reflections; Basic Issues of Man, "Return of Prometheus" is a study of the scientific aspect of mankind's existence as it leads to an understanding of the principles of science, the place of science in our civilization, and its relationship to ethics, politics, and the arts.

Sign-off is at 10:06 p.m.
Kennedy, Adenauer Agree On Nuclear Force

WASHINGTON
Brad Shanks in Buffalo Evening News

Bruce Shanks in Buffalo Evening News

President Kennedy and Chancellor Konrad Adenauer of Germany agreed Monday "to use their best efforts" to bring into being a multinational nuclear force to strengthen the defenses of Western Europe.

Their communiqué also announced agreement to exert every effort to strengthen common defense planning and joint operation of the North Atlantic Treaty Organization defense forces. At a prior news conference, Kennedy reminded the NATO allies that the United States has borne a major burden of European defense for 18 years, and he expects them to consider this in shaping their economic, trade and monetary policies.

The President avoided any direct criticism of President Charles de Gaulle of France, but much he said, and the communiqué, was in conflict with De Gaulle's aims.

Kennedy told reporters that time and changing events may yet bring about the reunification of Germany, but he saw no immediate solution to the problem of divided Germany. The communiqué came near the end of Kennedy's two-day visit to West Germany as the capital at the start of his swing around Western Europe.

Atlantic City, N.J., appeared to be surging to the front Monday as the choice for the 1964 Democratic national convention, according to Jack Bell, AP political writer.

Atlantic City's financial bid was considered highly attractive, Baltimore, Detroit and Miami-Miami, but he also bidding for the convention. But Maryland's chairman of the NAACP objected to the Baltimore choice until the city and state "accord all citizens and travelers within our borders the equal protection of the law...."

Washingto, D.C., Premier Khrushchev warned Monday that a new world war would kill hundreds of millions of persons and "all of us...will generally call civilization." He said the Soviet Union would continue a policy of peaceful coexistence, Khrushchev did not mention the Chinese Communists by name, but this policy runs directly counter to Peking's ideology. So does his emphasis on the horrors of thermonuclear war, which the Chinese downgraded.

CHICAGO

James R. Hoffa, president of the International Brotherhood of Teamsters, faces arraignment here today in U.S. District Court on fraud and tax evasion.

Hoffa and six of seven other defendants have a court date before Judge Richard B. Austin to enter pleadings in response to a 28-count indictment charging them in negotiating of some $20 million in loans from the pension fund for 177,000 central state teamster union members.

FAIRFIELD, I11.

Charles Black Charlie Harrill, charged with shooting a neighbor, has failed to get Circuit Court to suppress evidence including a gun collection comprising eight pistols, Selection of a jury in the former gangland personality's murder trial, postponed several times since May, is to begin today. It was postponed Friday as the motions for dismissal of evidence were submitted.

Prime Minister Harold Harris' argument that the pistols were taken from his trailer home without his permission, Evidence he wanted suppressed included a portion of license plate and a spent 22-caliber bullet.

The bullet was taken from Harris' arm the day a neighbor, Howard S. Taylor, was found shot to death on a rural road. A 22-caliber pistol was found beside Taylor's body.

WEATHER FORECAST

Fair to partly cloudy weather with no important temperature change is forecast for today in Southern Illinois, with a chance of a few widely scattered afternoon and evening thunderstorms in the extreme south. A high of 85 to 92 is forecast following an overnight low in the mid to upper 60s.

Simon Receives Vocational Ed Service Award

Ernest J. Simon, dean of the Division of Technical and Adult Education, has been given a special service award by the National Association of State Directors of Vocational Education.

The citation was presented to the association's annual meeting in Washington, D.C., May 20 and presented to Simon this week by J.E. Hill, Illinois director of vocational education, for Simon's "distinguished service to the State of Illinois and for his many contributions to the association and to vocational education throughout the nation, for his students since 1950, is former state director of vocational education in Illinois.
The Daily Egyptian Goes To A Campus Songfest

They Sang Songs, Ate Marshmallows
And Danced The Twist In The Sand
President Kennedy's message to Congress offering $400,000,000 to programs for manpower training and expanded social security points up the fact that the federal government is doing only legislating. It is not the fullULATOR power to act because this is one field in which Negroes should be expected to make progress. Fringe benefits, the only strong federal action can succeed only if the states cooperate.

He would establish a federal community relations section to try to prevent the "fires of frustration and discord" from burning hotter, because the federal government is not well suited for the job. He would enact a law stating that the Government is not required to aid any state or unit of local government, to encourage discrimination, to aid private groups that might violate federal practice that might violate federal statute. Mr. Kennedy has already displayed a remarkable understanding that national leadership is now required, and that the civil rights issue does not depend on constitutional power but the willingness to exercise it. He has gone in the people, he has gone to Congress, he has gone to the people. It is now only strong federal action can succeed.

But much of the responsibility now lies with Congress, President Johnson, and the Supreme Court, and specifically with the Republican leadership. If there is no secret that the civil rights bill supporters will need at least 10 percent in order to pass. All of that is now committed. As the President said, the civil rights issue is not sectional, and no doubt a majority of Senators of both parties will agree to that, and the question may come up where a two-thirds majority can be found to stop a filibuster and permit a decision. The answer depends upon a quality of the leadership function by all Americans: a sense of justice.

Academic Freedom At Southern

Willis Moore, Chairman, Department or Academic Freedom, the President, SIU Chapter, American Association of University Professors, writes:

It takes many things to make a great university. Some of these are buildings, c l a s s r o o m s , laboratories, competent staff, eager and well-disciplined students, and a vigorously supporting public. But nothing is perhaps more important than the intangible factor of freedom described in the following article.

Through a continuing stream of freedom of speech in the Southern Alumnus, you have been kept informed of efforts to improve the more obvious components of the University. But you probably did not read it of the Alumnus that in this issue it describes and emphasizes what we have come to believe is of the essential operational principle of a search and teaching institution.

When you are shown pictures of our new buildings and given reports on enrollments and staff additions, you know that your Alma Mater is growing. But what is happening in these tangible respects. This issue of your magazine should cause you to stop and think of what you have come to think of as the essential operational principle of a search and teaching institution.

Jim Dupree Outruns Cornell In 880 At St. Louis

Jim Dupree placed second and Bill Cornell finished fifth in the 880-yard dash Saturday afternoon at the National AAU track and field championships in St. Louis, Mo.

Dupree's second place finish earned him the right to represent the U.S. in meets with other European countries later this summer. The U.S. is scheduled to open its European tour July 20-21 with a meet against the Soviet Union.

Dupree ran in fifth place for much of the race and then with 300 yards remaining started sprinting to finish second behind Bill Crossley's winning time of 1:46.8. This was a new AAU record and tied the listed American record.

Cornell and Dupree finished in a tie for second place in their qualifying heat of the 880 Friday night. Both ran a 1:50.5 half-mile.

Dupree was ruled ineligible last spring by a student activities committee which rules on athletes eligibility. He has no more collegiate eligibility remaining.

Cornell's fifth place time of 1:48.1 was the fastest this season for the junior runner. He previously had run a 1:47.1, but that was with a running start at the Drake Relays.

Cornell has one more year of eligibility left.

Bob Green ran the fastest time of his life Friday afternoon in the semi-finals of the 120-yard high hurdles but it was not good enough to get the sophomore into the finals.

He posted a 13.9 time but that was not enough, Haves Jones, the final winner in 13.4, runnerup Roy Hicks (13.5) and third place Blaine Lindgren (13.5) also ran one-two-three in the heat which eliminated Green.

Green called it the race of his career. He knocked down four hurdles which slowed him down considerably. He also got a poor start in the race. Brian Turner failed to place at the meet but ran well. In the three-mile he ran against some of the U.S. top distance men but wasn't fast enough to place.

Pat Clohessy won the three mile in 13:40.4, Julio Martin, who had won the event at the NCAA one week earlier, could do no better than third place in the race.

Turner finished second to Clohessy at the NCAA two years ago in the three mile. George Woods, SIU's only other entrant, failed to qualify for the finals. All the final place winners put the shot over 60-feet.

Three Saluki Tennis Players On Summer Tour

Bob and Roy Sprenglemeyer and Lance Lumaden will be competing in tennis meets throughout the U.S. and Canada this summer.

The Sprenglemeyer brothers competed yesterday in the Tennessee Valley Invitational tournament at Chattanooga, Tenn.

Also present at the meet were college stars from Northwesterns, Marty Rosenson and Clark Graebener.

The meet Monday was the only the first of a tour which will take the SIU netmen to the major cities in the Midwest, East Coast and Canada.

Other stops are scheduled at Milwaukee, Chicago, Minneapolis (Minn.), Canada and the larger cities on the East Coast.

The tour will last the entire summer.

"We are competing in the tournaments because we want to keep our tennis games sharp," Roy said Sunday morning while practicing.

Bob was undefeated this season in 18 straight matches until he ran into teammate Pacho Castillo at the NCAA College-Division semi-finals. Pacho handed Bob his first loss of the year. Bob later lost again to Rafael Ousnna in the first round of the University Division tennis meet.

Roy advanced to the finals of the College-Division only to lose to the top-seeded Roy Rodriguez in the last match.

Both Sprenglemeyers and Castillo were named to the All-American tennis team on the basis of their showings at the NCAA meet.

Lumaden plans to join the Sprengelmeyers later in the tour. He played the number one singles position all year for the SIU tennis team until he left for Jamaica where he tried to make the Davis Cup team.

Alcohol Board Meeting July 10

The advisory board of the Division of Alcoholism, Illinois Department of Mental Health, will meet July 10 at SIU.

Following a 9 a.m. meeting in the President's Office, the day's itinerary includes a tour of the campus and surrounding area, lunch in the Renaissance Room of the University Center and a visit to the Little Grassy Lake campus.

Also scheduled is a visit to an afternoon session of a workshop in alcohol education now underway at Southern.

Two SIU Athletes Marry Coeds

Rusty Mitchell and Ray Padovan, SIU athletes, recently were married this month.

Pam Powell and Rusty Mitchell were married June 1 in Martin's III. The ceremony took place at the First Baptist Church.

Lenne Pellegreni and Ray Padovan were married June 15 in Decatur. St. Patrick's Roman Catholic Church was the scene of the ceremony.

Padovan will be assistant swimming coach next winter. He will graduate with his bachelor of arts degree August 9.

Mitchell is a gymnast on SIU's gymnastics team.
**May Rainfall**

**Falls Short**

The year's rainfall deficit continued to build up during May in southern Illinois, according to the monthly report of the SIU Climatology Laboratory just released by its director, Dr. Floyd F. Cunningham.

May rainfall totals varied from two and one-half inches and one-half inches in the records for nine of ten area towns included in Cunningham's summary. In general the total was about two inches below the long term average. One exception was Sparta which recorded nearly normal rainfall of a little more than four inches during May.

Although short of normal needs, the rains during May were highly beneficial to crops and other vegetation because most fell as light showers or slow rains with scarcely any loss by runoff. A similar rainfall pattern seems to be developing for June.

The accumulated rainfall deficit for the first five months of this year is averaging about five inches, continuing to remind farmers that moisture reserves in the soil are low for this season's crops.

Although hitting near record high temperatures the middle of the month, May averaged about one degree cooler than average. Near freezing temperature readings on May 1 helped bring the month's average down.

Here is a record of the May rainfall totals as compared to the long-term average for the towns reporting to Cunningham: Anna, 3.18 inches in May as compared to 5.0 inches average; Benton, 3.43 inches (average not reported); Carbondale, 2.38 and 4.42 inches; Chester, 3.01 and 4.47; Du Quoin, 2.83 and 4.15; Harrisburg, 3.63 and 4.01; Marion, 2.96 and 4.58; McLeansboro, 2.42 and 4.13; Mt. Vernon, 3.74 and 4.25; and Sparta, 4.14 and 4.44.

**Merit Award Culminates Honor Student's Struggle**

A 1963 Merit Award of the American Society of Industrial Designers was presented to Donald Musgrave, graduating senior from Fairfield.

One of 24 students from throughout the U.S. to receive the award, Musgrave got it a month late. Arrival of a new student prevented him from attending the award presentations in Chicago May 10.

Musgrave graduated with honors from SIU climaxing a long, hard struggle for his degree. After attending Southern's Vocational Technical Institute for a time, he transferred to the industrial education department to specialize in industrial design.

For two and one-half years, he attended night classes while holding a full-time job with the Universal Match Corp., at their Orbil plant near Carbondale. He was able to become a full-time student only during his senior year.

John Erickson, chairman of the Industrial Education Department, said Musgrave is one of the best students he has ever taught, and one of several scheduled to receive degrees in industrial design.

The ASDI Merit Award was presented to the SIU student as one of the most promising seniors in industrial design in American schools.
