GSC statement blasts administrators

By Ken Temkin
Daily Egyptian Staff Writer

The Graduate Student Council (GSC) executive committee released Thursday afternoon, a four-page statement accusing University administrators of taking a "paternalistic" attitude toward students' rights and desires.

The action followed separate passage, Wednesday evening, by the GSC and the Student Senate of resolutions criticizing President Warren Brandt's recent attempts to gain voting control of the board of directors of the proposed students' attorney program.

The GSC executive committee's statement read: "When will University administrators realize that students are no longer content to let their money be spent without meaningful student input as to how it should be spent?" The GSC feels that the time has come for students to assert their right to control the manner in which their money is spent. No longer should we allow expenditures of student money by paternalistic administrators who think they know what it is that students desire.

The statement also assessed University administrators' attempts to solicit student input into the expenditures of students' fees as being "more illusory than real."

"Students now have no voice in how money is spent in intercollegiate athletics," the document said. "Yet, each of us pays $20 per semester for the various athletic programs, or a total of approximately $600,000 per year (exclusive of summer fees). The list, unfortunately, goes on and on," the document read.

The document proposes, as a possible solution to the problems the "establishment of a not-for-profit corporation which would collect and distribute all student fees."

Each organization which requested student activity fee monies would be required to justify its requests before that organization would be funded, the document states.

"Surely," the document reads, "let each and every penny of student money be spent by and for the students."

At the GSC meeting Wednesday evening, the council passed a resolution "saying in part: 'if the board of administrators allows President Brandt to increase his appointments to the student attorney program board of directors, the GSC will remove its support of the program and support any graduate student in the refund of their fees."

The resolution, which passed 26 to 7 with one abstention, was the subject of a heated speech by Ellen Schandle-Haskins. Several GSC members accused Brandt of perpetuating the paternalistic attitudes which have caused the latest of a series of administration-student disputes—the student attorney program.

According to the student attorney program proposal, the student councilors were supportive of the program until the recent bargaining vote 'trend' of collective bargaining out numbers voting by only 50 votes. The statement reads, however, "While the result was close, it should be recognized that we are in a period of change. The trend is moving very markedly toward pro-collective bargaining sentiment rather than toward opposition."

Donow said CFUT has to start pushing to get more people to sign up for membership in the union.

CFUT is considering the hiring of a part-time staff to begin making telephone calls and other contacts with prospective members.

The union is also considering conducting a survey to determine the reasons why faculty members voted in opposition to collective bargaining.

In its statement, the CFUT said it "recognizes that it has a good deal of work to do in informing people about collective bargaining and building its strength on campus. But our efforts have met with encouraging success thus far. This positive vote indicates that we are getting closer to a 'contract.'"

Donow said after the results of the referendum, faculty members are now more willing to make their individual votes. He said there are union members and are "coming out of the closet."

He said if the referendum were held again today, the results would indicate even greater support for collective bargaining.

Representatives of CFUT and the SIU chapter of the American Society of University Professors (AAUP) will meet next week to discuss possible concerns.

CFUT and AAUP may form a temporary coalition to work toward collective bargaining.

The SIU faculty will be asking for a referendum to vote on the proposed collective bargaining agreement.
C. Harvey Gardiner, a former faculty member who won an out-of-court settlement of $7,251 for violation of his constitutional rights, has nothing to applaud about the recent SIU court ruling in his rights suit.

Gardiner, retired research professor of history, was out of work during the Vietnam War and the SIU Center for Peace and Social Justice had agreed to pay him $1,500 a year for life as part of a $7 million settlement in a class action suit brought by the Board of Trustees in 1972 against the university. He was denied renewal of the contract last year after he was accused of having sex activities.

The University denied the story.

The SIU granted new hearing in sex discrimination suit

By Mary E. Gardiner

A new hearing was granted Wednesday in the sex discrimination suit of Marisa Cant-Amorosi against SIU, John Huffman. University legal counsel, said Thursday.

The Illinois Fair Employment Practices Commission ordered another hearing at its regular meeting in Chicago that a new hearing on the case be held as soon as possible. A date was set for the hearing, Huffman said.

Howard M. Rubin, chief administrative judge of the commission, ordered the new hearing after finding that almost all the hearing examiner could read transcripts in a case that included questions of whether the examiner did not get the full emotional impact of the testimony nor see the demeanor of the parties which are necessary to determine whether or not the Board of Trustees would have been justified in its finding that Olmstead, a SIU professor, was guilty of sexual harassment.

The Fed. in announcing final regulations said they will allow creditors to choose whether to receive a regular statement of their accounts or a summary one.

The Fed. in announcing final regulations said they will allow creditors to choose whether to receive a regular statement of their accounts or a summary one.

Brandt skirts job plea for disabled

By Lenore Sobota
Daily Egyptian Staff Writer

Representatives of Wheelchair Action met with President Warren Brandt Wednesday to seek his support for placing a petition to the Affirmative Action Office in the university's mail, but he declined to take a position.

If the petition is not signed by a disabled person to work in the Affirmative Action Office, it will not be processed, as no employees are there because there is no disabled person working in the office.

Brandt told the group he felt they were in the wrong office.

"These types of problems don't get solved at the Personnel Office," Brandt explained.

Walter said however, Wheelchair Action representatives had already met with Bruce Swinburne, vice president for student relations, to ask if disabled students are employed in special services.

Walter said the Affirmative Action Office and Specialized Student Services personnel are fully aware of the situation, but that the handicapped, students are not employed.

"We are fairly well exhausted all our channels. We felt we needed to come to you," Winter said. "We wanted to make you aware of our problems.

"Winter said disabled persons are being discriminated against by the University and that a disabled person would help end that discrimination.

Brandt said the Affirmative Action Office is not responsible for filling vacancies.

"All this office does is check to see if active recruiting is done not to do the recruiting," Brandt explained.

Brandt suggested that the group try to work with the Personnel Office to get the disabled students made aware of job openings.

Brandt said if the Wheelchair Action representatives also discussed transportation problems of the handicapped.

The two vans operated by the University for handicapped students are in insufficient, he said, the group agreed. The University is experimenting with the use of the Campus Transit for disabled students, but Winter said the experiment is "a waste of money." Because the University has no wheelchair facilities the two vans cannot go to the campus.

The students also expressed concern over the possible transfer of Ibrahim Khatib from the Office of Specialized Student Services.

Mark Karner of Wheelchair Action said, "We rather very well to handle them.

Disabled student rebuts counter petition

By Ray Urcelh,
Daily Egyptian Staff Writer

Jules Hernych, a handicapped student who presented a petition to President Warren W. Brandt requesting changes in the Office of Specialized Student Services last week, said respondents to the petition indicate trend to teachers union

(Continued from page 1)

that the students are not employed in Specialized Student Services.

The petition also requested that Specialized Student Services be placed under the auspices of the Student Personnel Office, rather than under the dean of student services.

Hernych said if Vice President for Student Affairs Bruce Swinburne transfers the students' group, SIU Travel Service, to the the Office of Student Personnel, he will request that the University Affirmative Action Committee hold hearings before the students' group are transferred.

Brandt said the Affirmative Action Office in adjudicating grievances.

The committee's functions will aid the office in complying with the vocational rehabilitation regulations governing the handicapped.

Ideas suggested by the committee must be approved by the University Affirmative Action Council before they become a part of the total University affirmative action program, she said.

Gasser believes the committee will perform a positive change that will increase employment opportunities.

Gasser said she asked the committee to help her identify such opportunities and suggest places to recruit handicapped people.

"I'm just not totally aware of what is out there—that's why I need help," she said.

UECH will prepare an information brochure to show the rotation of the earth. The ghost-like effect was caused by using a time exposure and strobe light. The phenomenon, set up by the Department of Physics and Astronomy, shifts its arc in relation to the movement of the earth. It is on display in the west side of the Necker Building. Control the CIA

By Jim Ridings
Editorial Page Editor

It is time that Congress and the President took a closer look at the Central Intelligence Agency. The CIA has overtaken a part of the White House.

Time and time again the CIA has proven themselves to be the masters of bribery, blackmail, burglary, manipulation and murder. The CIA has plotted and executed the overthrow of several foreign governments, supplied arms and money to many right-wing organizations around the world, helped set up and support dictatorships and has plotted assassinations of many foreign leaders and influential people.

Created in 1947, the CIA’s purpose was to coordinate and analyze intelligence for the President. No mention was made of covert action anywhere in the CIA charter or in the National Security Act, which officially established the CIA.

Harry Truman, president when the CIA was established, later said, “For some time I have been disturbed at the way the CIA has diverted from its original assignment. I never had any thought when we set up the CIA that it would be injected into peacetime cloak and dagger operations.”

The list of illegal activities and crimes committed by the CIA would fill many volumes. In Cuba, the CIA总算ized the ill-fated Bay of Pigs invasion to overthrow Castro, and has regularly sponsored overthrow of the government of Allende was trying to nationalize the banking system. Rockefeller paid for this and has had a hand in politics there ever since.

In Equador, the CIA used extensive covert political intervention in the early 1960’s to destabilize two civil governments, which lead to military rule. Also in the mid-1960’s, the CIA trained guerrilla warfare in Peru. In Bolivia, CIA insurgents fought the government. Castro’s revolutionary military dictatorship in Brazil was established following a coup instigated by the CIA.

In Chile, the freely-elected government of Salvador Allende was considered a threat as a coup set up by the CIA, resulting in a brutal military dictatorship. The CIA has had a hand in politics in Uruguay throughout the last two decades.

Zaire (Congo), South Africa, Somalia, Angola, the Philippines, Indonesia, Tibet, Iran, Cambodia and Laos are other places where the CIA has had a hand in trying to destabilize and overthrow or manipulate.

The overthrow of the Diem regime in Vietnam and the overthrow of a number of other regimes in Africa and Southeast Asia was due in a large degree to CIA involvement.

Closer to home, it has been reported by both the Ford Foundation and the National Commission investigating the Watergate affair, that the CIA has done extensive spying and accumulating data of political figures and public figures at home.

The latest report from the CIA indicates that the CIA maintained two separate programs to install and eliminate heads of state. In one program, there were over 13,000 files on 7,300 American citizens and 1,000 organizations. Some 300,000 names were indexed in a CIA computer.

The CIA also provided funds, training and advice for the overthrow of governments in Europe.

The CIA has had a hand in the disintegration of the former Soviet Union. The collapse of the former Soviet Union was invasion by the CIA, and in the end makes the U.S. little better than the evil forces it alleges to oppose.

Dismantling the CIA and the dirty tricks operations would be the first step to restoring the credibility of President Ford and Congress. Although the CIA is due to disappear under President Ford, the pressure to maintain and expand the role of the CIA is likely to continue.

The responsibility of President Ford and Congress, although it may be a political liability, must take significant action. CIA actions, which have intended to bolster America’s defense and promote America’s interests, have had just the opposite effect. America’s image has never been lower in the eyes of the world. Fighting tyranny with invasion is hypocrisy, and in the end makes the U.S. little better than the evil forces it alleges to oppose.

The little man is losing again.

If the current moratorium on solicitation permits continues, available alternatives for a bite to eat on campus (excluding dorm food), will be narrowed and limited to a virtual munchie monopoly run by Interstate United Vending Service, the company which operates the Student Center Food Service, Moody Hall cafeteria, the concessions in McAndrew Stadium and the Arena and all the vending machines in University buildings.

Reggie Stills, “Grandma” of Grandma’s Kitchen, has been informed that her permit to run her homemade food stand will not be renewed this winter. Barbara and John Berliner, who started Dragon Fruit Stand in front of Famer last spring, expressed no surprise that they too will be thrown off campus when their permit expires in November.

Sandwich trucks on campus roads will also be driven away if the policy is to be enforced fairly.

The policy is not a new one, but simply one that the administration understood for a long time that the free enterprise food vendors threatened a few pennies of profit being made by the one big food business on campus. The decision to create a standard, sterile food market is based solely on profit potential.

Board of Trustees policy states that solicitation permits are only for student organizations and is the only exception to this. Prospective students, students working their way through college as in John Belcher’s case, fulfill the requirement more than the corporate interest of Interstate United. A university should encourage initiative and effort by its students instead of selling them out for a share of company profits. Interstate United profits have risen from a 14 per cent commission of gross sales from its vending machines, according to Karen Daggar, Interstate representative.

Bruce Swenson, the president for student affairs, noted some “discrepancies” between existing policy and the foodstands, and authorized the Committee to study Solicitation Permits. The group has the responsibility of finding formal ways to explain why the permits are now being denied and why they were granted in the past.

A subcommittee was then established to set guidelines for issuing the permits. Allegations have been made that Interstate United has voiced opposition to the foodstands, but the press release issued from the subcommittee meetings and the reasoning behind the moratorium on solicitation permits remains unknown.

James Sheppard, assistant director of the Student Center and a member of the subcommittee, said the meetings were closed because expressed “Opinions and ideas could be misconstrued, misrepresented or taken out of context by the press.” It’s also true that greedy motives would not make good publicity.

Objections have been voiced concerning the possible threat of a flea-market, carnival-type atmosphere being created by allowing vendors to set up their wares indiscriminately. The threat is unrealistic, since campus vendors are a tradition dating back to the first days of SIU, and barker and hustlers haven’t gotten out of control yet. The spirit of the Yankee peddler adds a little atmosphere to the learning environment.

The system of free enterprise provides for competition. Only those vendors which served the people profitably would stay in business.

A zoning ordinance could be imposed if the need arises, with a designated number of vendors in a certain area on a first-come, first-serve basis. The system would be a much more democratic arrangement than the monopoly proposed by the complete ban on solicitation.

Food stands losing to campus ‘munchie monopoly’

By Diana Cannon

The little man is losing again.

If the current moratorium on solicitation permits continues, available alternatives for a bite to eat on campus (excluding dorm food), will be narrowed and limited to a virtual munchie monopoly run by Interstate United Vending Service, the company which operates the Student Center Food Service, Moody Hall cafeteria, the concessions in McAndrew Stadium and the Arena and all the vending machines in University buildings.

Peter Hoffman
Handicapped make great progress

By Lucky Leo Ogasfar
Daily Egyptian Staff Writer

The Governor's Council on Handicapped make great progress. The Problems of the Handicapped has bestowed awards to the City of Carbondale and SIU in appreciation for efforts to refine the handicapped in our community.

Both the city and SIU have come to recognize disabled people as assets and not liabilities. It has not been easy for disabled people to bring public awareness to the fact that they are productive citizens.

As we off our hats to Carbondale and SIU for their good work, certain problems are pertinent. What are some of the problems the disabled people have to face on their daily round?

Newspaper headlines of the world have a lot of problems. These problems are not only physical, but psychological.

As they push their wheelchairs—their second legs—along the streets, sweat trickling down their brows, and the sun burning down on them, strangers to the situation stare right into their eyes. When their eyes meet, the resultant embarrassment is never a fleeting thing. Little do they know that it is only the beginning of it. Hardly do they think that the worse is yet to come.

It takes guts for the disabled to take on the idea of being treated as an object. It doesn't matter how long they have been in the wheelchair. It never gets easier to be treated as objects by fellow human beings.

Nothing makes disability more intolerable than dehumanization. An object is a thing that eats the disabled through like the wheel of good government

Radical feminists don't speak for the whole movement

To the Daily Egyptian:

You are a delusional, Mary G. Gardner, how little you know about the goals and ideals of the Women's Liberation Movement as a whole. If you had actually studied the movement in its final hour, it was dealing with rhetoric of a very few of the most radical feminists just as it wasadults, and the remaining were always shocked when strangers to the situation stare right into their eyes. When their eyes meet, the resultant embarrassment is never a fleeting thing. Little do they know that it is only the beginning of it. Hardly do they think that the worse is yet to come.

It never has the intention of the Women's Liberation Movement to turn into an object. It doesn't matter how long they have been in the wheelchair. It never gets easier to be treated as objects by fellow human beings.

Nothing makes disability more intolerable than dehumanization. An object is a thing that eats the disabled through like the wheel of good government

Get involved, become active or don't complain

To the Daily Egyptian:

I, Doug Cooper, of sound mind and body, do hereby turn myself in for prosecution for crimes which I have committed as a legal citizen of the United States and the State of Illinois, as follows:

I have failed to attend public meetings. I have stood in silence as injustices were performed on fellow citizens without my alderman, congressman, or senator ever being asked.

I failed to vote in the last city, state, and national election. Because of the aforementioned crimes which I have committed, I hold that the movement disdains is to live and act as a human being.

The goal is to see each human being, whether male or female, left free to make her or his own decision to express our opinions regarding legislation, injustices, and anything else affecting our environment.

It's no wonder that you, the average citizen, are so often taken advantage of. Your lack of participation in government is taken for granted by politicians, corporate lobbyists and special interest groups. They don't concern themselves with the needs of the common man, because there is never an organized attempt at citizen input.

You and I can differ, but never engage in a coordi- nated effort at citizen participation.

Redirect your energies toward the vital matters which affect your environment. If you don't, you won't be able to present your case the same way a corporation would.

Doug Cooper
Junior Design

Student attorney valid

To the Daily Egyptian:

Students who have attended The American Liberal Law School may have had the opportunity to provide legal assistance to students for a variety of complaints dealing with their civil rights as citizens.

During the past few months The American Liberal Law School has been asked to provide legal assistance to students for a variety of complaints dealing with their civil rights as citizens. These include illegal searches of their premises, including those in university-approved housing, arrests without a warrant, illegal travel violations, and unwarranted towing fees, racial and sex discrimination, and unauthorized searches of persons.

The ALCU is limited in its resources and has not been able to provide legal assistance to students for a variety of civil rights violations that have come to its attention. If students can now have recourse to their own legal counsel, the American Library Law School may then be able to devote its resources to other cases that seem to be problems in this community.

As students of the ALCU will lend its support and counsel to student complaints which, in its opinion, involve infringements of civil rights, by coming to the attention of the American Library Law School, these cases.

Can ban sought by students

By Donald Hoffman
Daily Egyptian Staff Writer

SIU's Student Environmental Center has filed a proposal with the Illinois Pollution Control Board (IPCDB) calling for strict regulation of beverage containers, said Roger Freiburg, member of the environmental group.

Freiburg said a petition with 200 signatures calling for a ban on bi-metallic cans, a ban on the use of detachable flip-tops, the certification of beverage containers and a graduated mandatory deposit for all containers was sent to IPCDB headquarters in Chicago yesterday.

Dennis Adameczky, graduate student in Political Science who headed the committee that drew up the proposal, said the IPCDB is now legally required to hold at least two hearings on the proposal in the near future.

"The measure is similar to an Oregon bottle act which has proved to be effective and constitutional," said Adameczky. "In Oregon, the Environmental Protection Act of 1972, established recycling regulations and provided that the board must consider proposed regulations accompanied by the signatures on a petition."

The proposal calls for a ban on all bi-metallic cans. Freiburg said most cans are made of two metals, aluminum and tin. The flip-top lid is made of aluminum and the rest of the can is made of tin. Freiburg said current recycling methods cannot separate these two metals, therefore making recycling impossible.

"Have you ever stepped on a flip-top tab? I've stepped on them all over the place," Freiburg said. "People flip the top off and just fling it. He believes that by banning flip-top persons can save resources and prevent the danger discarded flip-top presents."

The proposal also calls for the certification of beverage containers. Freiburg said that all beverage container hot sellers will be classified as such. "We're not interested in food containers right now," said Freiburg. "People drink in their cars and when their on the move."

He said their group is starting from the bottom and that beverage containers are the most basic problem.

The mandatory graduated deposit means that all beverage containers must have a deposit and that deposit will be determined by the mass of the container, said Freiburg.

For example, Freiburg said a 6-ounce glass container will have a greater deposit than a 16-ounce container.

Adameczky said the IPCDB does have the power to make laws concerning the recycling of materials. He also said the Environmental Center's proposal is as comprehensive as a recycling bill currently before the legislature.

He said the benefit of presenting the proposal to the IPCDB is that the opinions of many people can be presented rather than the three pen and pencil arguments that will be presented to the General Assembly.

Adameczky said that when the IPCDB does hold hearings, one of them will take place in Carbondale, because it was here that the proposal originated.

**Young Socialists set up literature table**

By Mary L. Boone

Daily Egyptian Staff Writer

A two-person team from the Young Socialist Alliance (YSA) has set up a display table of books, brochures, newspapers and magazines in the solicitation area of the Student Center to distribute information and answer questions about socialism and the YSA organization.

The team, one of 18 teams across the country which visit colleges or predominantly college cities to promote socialism, is based on St. Louis, Mo., and covers the Kansas, Missouri and Southern Illinois area. Team members in Carbondale are Diane Groth and Mary Smith.

Groth said the group has three main reasons for being in Carbondale. First, she said, they are promoting the two Socialist Worker party candidates for president and vice president in the 1976 elections. Candidates are Peter Camejo, a white male, for president and Willa Mae Reel, a black woman, for vice president.

The second reason is to build interest and promote the 15th Young Socialist Convention scheduled for Dec. 30 to Jan. 1 at the University of Wisconsin at Madison. The convention will discuss the student, black, women and farm worker movements, cutoffs in education funding and international developments.

Groth said the third goal is to discuss the struggle against racism and other problems faced in our society today and how socialism could help alleviate these problems.

“Socialism won’t take place until the majority of people in our society see it (socialism) as something worth fighting for and struggling for,” she said. “We refer to the party’s stance of problems of unemployment and inflation.”

She stressed that the YSA is not too the violent overthrow of the established government, but “We will defend ourselves against attack. We want to organize peacefully and legally, not pick up the gun,” she said.

The party and the YSA believe in “equal pay for equal work” and include women and minority groups. She also believes that “women won’t gain independence until a socialist revolution” occurs.

Students on the campus have displayed a “list of interest,” she said and estimated she had talked with “hundreds.” The national YSA organization has about 2,000 members, though this is just an estimate, she said.

The literature displayed showed a wide range of topics including racism, feminism, students, gay liberation, religion and the Equal Rights Amendment. Material was also available on Malcolm X, the Attica Prison riots and the socialist party in the world.

Also scheduled by the group is a meeting and discussion on the changes taking place in the working class, including students, racism, socialism as a party and the student movement. The meeting is scheduled for 7:30 p.m. Friday in the Student Center Mackinaw Room. The public is invited to this free meeting.

**Installation of radar unit aids airport operations**

The radar was donated to SIU by Ward Montgomery of Olive Branch, Ill. Montgomery has his own business of sales and service of electronic equipment on tugboats that operate on the Mississippi River. The radar provided him with an operating unit by which to test other equipment prior to going out on various tugboats.

The radar unit has been installed in the weather room of Airport Operations and provides a full 360-degree scan of weather that is approaching the area. Weather can be detected on radar up to a 50-mile radius of the Carbondale-Murphysboro area. This unit will have the capability of detecting turbulence, and severe weather approaching this area.

The Southern Illinois Airport Authority, along with the SIU Safety Center, Carbondale Civil Defense and Jackson County Civil Defense have expressed an interest in the support of this unit.

The Southern Illinois Airport in cooperation with SIU and Air In-Flight and Service have completed the installation of a weather radar unit.

Design students prepare rafts for annual Current River float

By David Reader
Student Writer

One hundred and ten design students Saturday will float 34 miles on homemade rafts down the Current River in Missouri as part of a class project.

This optional project, in its sixth year, is a part of Design 110. The three-day and two-night trip will begin Friday morning. Participants will drive about 225 miles to Big Springs State Park, Buren, to camp Friday night. Saturday morning the rafts will be put in the water and the trip will begin. The rafts will move in silence, giving the navigators a chance to observe the sights and sounds of the river. They will reach their destination at Deer Leap, near Donavan late Saturday. They will camp just north of the Arkansas-Missouri state line Sunday morning the rafts will be loaded onto the cars and the group will drive back to Carbondale.

The trip is part of the creative problem solving process that Design 110 aims to emphasize, according to Larry Busch one of the instructors.

"You can't teach someone to become creative," Busch said. Because situations constantly change, "We don't know what problems students will run into. If we knew, we could help solve them, but we don't."

Students also learn to work together planning the trip. "You've got to start to work on the navigation far in advance," Busch said.

The biggest anticipated obstacles will be wilderness and changing weather branches.

Part of the design problem is putting things together in new and useful ways. Steve Pelloin and Paul Cassidy, seniors in design, will use plywood, truck inner tubes and flotation buoits to build their two-man raft.

In the past students have used styrofoam, milk cartons and "almost anything that will float," according to Busch. Some rafts have cost under one dollar he said.

The class has been warned to expect rain and to plan on falling in the lake. In addition to life jackets, which are required, Cassidy and Pelloin will pack wool sweaters, heavy clothes, and rain coats on their raft. The rainfall isn't forecasted.

"You've got to be prepared for anything," Busch said. "Busch said that the Rangers have been extremely helpful by seven-foot raft has taken 24 man-days to complete. Making the raft float is only part of the problem. Pelloin said, "Another part of the problem is getting the raft to the lake about 225 miles by car."

In the past five years the trip has been undertaken no one has been seriously hurt, although last year one raft flipped end-over-end three times within 90 minutes. None of the three girls aboard were hurt, and they all finished the trip after recovering their supplies and drying out.

Busch has taken a raft each trip, but this time he will be in an outboard motorboat. If a raft over turns, he will be able to help retrieve supplies.

Last year's trip was the first encounter with local authorities. When the group arrived at their destination Saturday night, they discovered their cars had been towed by the deputy sheriff's towing service. Towing charges were paid and the group returned home. Within a few days, people from Donavan called Busch to express regrets about the towing, and offered private property for parking.

This year the problem will be eliminated by stopping a few miles upstream on federally owned property. In the past Busch said the Rangers have been extremely helpful.

Technology gets accreditation

The Department of Technology at SIU has received accreditation by the National Association of Industrial Technology, according to Leon Deering, chairman of the Department of Technology.

"The accreditation is important to us because it constitutes a positive evaluation of our program by representatives of the national association," said Thomas B. Jeffers, dean of the School of Engineering and Technology. "It lets people know that the program meets national standards."

An inspection team visited the Technology Department for two days last April and accreditation was granted for four years the longest term of accreditation granted by NAIT effective this fall.

The industrial technology curriculum leads to a bachelor of science degree, and trains its graduates to work in the planning, control and technical aspects of manufacturing production.

School to sponsor organ fest

SIU's first Organ Festival, sponsored by the SIU School of Music and held in conjunction with the Tri-state Annual Organ Workshop, will feature full recitals by concert artists Mark Bower and Bowman. Pauly, professor of music at Indiana University, will present a complete performance of Olivier Messiaen's "Meditations sur le mystere de la Sainte Trinite" at 8 p.m. Nov. 7 in Shryock Auditorium. Considered the foremost authority on North American organ works of Messiaen, Holloway has played and performed Messiaen's works under the composer's supervision on the organ at the Church of the Trinity in Paris.

Bowman, assistant professor of music at Alabama State University at Montgomery, will present a combination of performances of Marcel Dupre's "Stations of the Cross" at 8 p.m. Nov. 8. The Saturday workshop (Nov. 8) will be open to interested organists, who will pay a $3 admission charge. Pre-registrations are being taken by Marlene Web of the SIU School of Music.

Student hunters have storage for weapons

Signs of autumn include falling leaves, nippy weather and the return to part of fall season. Many persons the most important sign is the annual migration of ducks and geese, signaling the start of hunting season in Southern Illinois.

Many students are avid hunters, but a problem arises concerning the keeping of guns or compass, said Lt. Marvin Brasewell of SIU Security. Guns and bows are prohibited from being kept in students' rooms, the office provides free storage.

Technology gets accreditation

The Department of Technology at SIU has received accreditation by the National Association of Industrial Technology, according to Leon Deering, chairman of the Department of Technology.

"The accreditation is important to us because it constitutes a positive evaluation of our program by representatives of the national association," said Thomas B. Jeffers, dean of the School of Engineering and Technology. "It lets people know that the program meets national standards."

An inspection team visited the Technology Department for two days last April and accreditation was granted for four years the longest term of accreditation granted by NAIT effective this fall.

The industrial technology curriculum leads to a bachelor of science degree, and trains its graduates to work in the planning, control and technical aspects of manufacturing production.
Camera-making shows creativity

By Keith Tuckhorn

Daily Egyptian Staff Writer

Has you 1br rowne gone stale? Your Land Office says "the dust! Your Instamatic quickly fuzled? Have you thought of it with a flash? Or a cigar box? Or a can?"

Some cinema and photography students have had the idea, and their labors can be seen in the side photo booth in the Communications building.

The offfest cameras, made out of materials not normally used in camera-making, were built by students in Cinema and Photography. 420. "Experimental Camera Techniques." "They are the results of the class' first assignment given to them by instructor John Bowman."

Before the building of the cameras, Bowman spent several class periods discussing feasible designs for them. The students were then given free reign on their projects. "I wasn't expecting such enthusiasm over the project as I got," Bowman said.

The difficulty in making the cameras depends on how complex a student wants to make a camera and how skillful one is with his hands, according to Bowman. I won't insist on a perfect camera from a man who did the best he could.

Almost all the cameras work. Bowman said. He said they will work almost all the time as long as the distance between the light openings, or apertures, is of the right proportion.

The exhibit of the cameras and some of the pictures taken by them will remain on display through next week.

Other topics to be covered in Bowman's class this semester include such subjects as the use of fillers, matting and diffusion techniques, and multiple exposures in the camera.

Research bureau revamped

The Public Affairs Research Bureau (PARB) has been transmogrified from the Department of Political Science to the College of Liberal Arts.

The bureau, now called the Social Science Research Bureau (SSRB), is a meeting place for projects and proposals and helping the faculty with research that is primarily quantitative.

Holland Hawkins, from the Department of Sociology, is director, and Roy Miller, from the Department of Political science, is assistant director.

Search committee to view two more library candidates

By Mark Wesley

A committee searching for a new SIU Dean of Library Affairs will view two more candidates for the position, according to committee chairperson Elizabeth Eames.

Eames, a professor in the Philosophy Department, said the candidates have been invited to the campus and will be here next week. Two other candidates have already been to the campus for interviews.

The two candidates who will meet with SIU officials next week are Allen Vener, currently heading the bibliographic section of the Fordham University library, and William McGrath, library director at the University of Southwestern Louisiana.

They will meet with the search committee, the staff officials, Vice President for Academic Affairs Frank Horton, President Warren Brandt and other groups and individuals.

The other two candidates who have been interviewed on campus are Donald Hendricks, director of the library at the University of Texas, Health Science Center, and Dr. Kenneth Peterson associate director of the University of Virginia Library.

Horton and Brandt will make the final decision on who will be selected for the position, said Eames. She said that the 12-member search committee decided to try an open search procedure in the library dean search, following guidelines of a proposal submitted to the SIU Faculty Senate.

"We feel happy about the open search procedure, but of course the final list of the procedure is when you get a new Dean of Library Affairs and he works out right," Eames said that the open search procedure included allowing interested parties to study dossiers submitted by prospective candidates and release of candidates' names to the public.

"This position is uniquely important in that the library and all of its facilities are important to every faculty member and student doing research and study on the campus. This is important both that all constituencies be involved in the search and that the person selected have a wide range of capacities and talents," Eames said.

Eames said that the new dean will replace retiring Dean of Library Affairs Ralph McCoy. McCoy is presently serving on a half-time basis until his successor is hired.

The search committee has narrowed the list of candidates from 100 applicants to four.

Liberty Hall parking lot

FOR YOUR HEALTH

No smoking allowed! No smoking allowed!
Dorm schedules casino night

The first floor of Abbott Hall will be transformed into a casino Sat., Nov. 1, when residents of the hall present the Second Annual Abbott Hall Casino Night.

From 6 p.m. to 1 a.m. gamblers will be able to try their luck at roulette, poker, blackjack and craps at the homemade casino. Players can buy ten $1,000 bills of fake money for 25 cents to play the tables.

At the end of the night, winners can cash in their money for prizes that were donated by local merchants. Among the prizes will be free pizzas from Paglia’s and Quazzo’s, four free smorgasbord dinners from Das Fans and albums from various Carbondale merchants.

“Tentative plans are to have a Chicago band band in the basement,” said Frank Kracker, president of Abbott Hall. “Although there will be no admission price to enter the casino, there will be a cover charge at the entrance door if we are successful in securing the tables.

Refreshments of Kool-aid and pizza will be sold. No alcoholic beverages will be allowed. All proceeds will go directly into the dorm fund. Last year the casino night provided enough funds for the dorm to have a combination fry-keeper. Kracker said.

Bikecentennial seeks leaders

Bikecentennial, a non-profit, charitable organization, is seeking 1,400 leaders to run the inaugural tours in 1976 of the first training camp. American bicycle trail.

Leaders will receive food, lodging and normal tourist services. The training sessions for the tours include classroom and field instruction in bicycling technique, safety, repair and special bike and camping skills. The four

Students who complete the four-year Air Force Reserve Officer Training Corps (AFROTC) course must serve six years as officers on active duty after they graduate.

The two and four-year courses offered by AFROTC fulfill elective requirements for all majors, according to Capt. Bob Ross of aerospace studies. The first two-year portion of the program is an introduction to military training.

Students in the “Professional Officer” course receive $100 per month and 35 hours of free flying in

major training centers are located in Oregon, Colorado, the Midwest and Mid-Atlantic regions.

Bikecentennial tours vary in length from 12 to 82 days, covering up to 4,500 miles of America’s most historic and scenic regions. The establishment of the bicycle trail is the beginning of a commitment by Bikecentennial to develop a network of long distance bicycle trails crossing the U.S.

SUNDAY NIGHT SERIES

Robert Bresson: The hasard Balthazar

Acknowledged by everyone as great French filmmaker to be the greatest French filmmaker, Bresson is known for creating a paradox that may well be his greatest film.

“L’Amour, transgressant, balthazar effacent a kind of perfection

The perfect Beesor

Greenwich, N.Y. Town

Balthazar was a man who chose to use one of the finest prosthetics of artificially enhanced emotional experiences

Sarris, Village Voice 12/24 (79)

A superb, poetic and compassionate awareness of the physical universe that makes large demands upon his audience, and it returns fewer emotional rewards in exactly emotional meaning in New York

The film is probably the most enduringly sought film since Keaton’s The Cameraman. That film probably more frequently enters into memory than is fully justified. The movie is about so much and it is presented in a way, so effortlessly, so effortlessly, that it isn’t hard to make more of it. It is a gift to watch, only afterwards, don’t one realize what a truly immense, deeply emotional, universal experience it was — and that is a probable Bresson’s greatest film.

There are at least five protagonists — none, if you count Balthazar among them are characterized more of the feelings of humanity. Balthazar himself, the dorky whose life and death provide the film with its formal structure, is not just another — he exists on to many levels that he assumes human proportions. Marie, the girl whose name parallels Balthazar’s, in one of the most complete abundance ever encountered on the screen, and Balthazar discovers her with a grace and last seen. Balthazar himself is perhaps the greatest Catholic artist of this century, yet BALTHAZAR cannot be taken at any critical analysis.

—Ch. Museum of Modern Art, 1970

Absolutely magnificent film — which will be seen even by those people who only go to the movies once a year, to see Chaplin or Tol. Everyone who sees this film will be astonishingly affected. This film is a really the world in an hour and a half

—Jean-Luc Godard

‘Prude’ nude model believes all art students should pose

By Tim Le Gear
Student Writer

"Actually I’m a prude and a con-
averse in many ways," said the nude woman standing on the plat-
form. "But I feel comfortable in what I do."

Blonde, blue-eyed Mary Lemer, a junc-
tion in general studies and a model for the School of Art, said she
feels every art student should model at some time or another.

"Normally, I feel exhibited if people are not enrolled in the art depart-
ment are in the room," Lemer said. "Because they might feel I’m an ex-
hibitionist, but modeling for artists is a contribution to their work
and mine."

"My mom knows I’m a nude
model and she thinks it’s fine," she
added.

Lemer began modeling in 1973
while attending Eastern Kentucky
University in Richmond.

"I was offered $50 per hour and all
the beer I could drink by two seniors
pursuing a fine arts degree," she
explained. "And because they were
close friends and serious students, I
accepted."

"But when it came time to pose,
my closest girlfriend had to per-
suade me with clever psychology,
pop talks and a number of glasses of
beer," Lemer laughed.

She insists that embarrassing
moments are infrequent while she
models. "There have been times
when unsuspecting friends will en-
ter the class and I’ll feel uneasy," she
said, "but I don’t really panic un-
less a guy I’m dating sees me."

Professional models are generally
well-paid, but EKU student models
receive the same minimum wage as
other on-campus employees.

Models agree that money is the in-
centive for what they do but each
must enjoy the work to continue.

"I was told that I enjoy modeling
because it’s a look-bul-don’t-touch
situation," Lemer said. "And I’m in-
clined to agree because it’s a very
satisfying feeling."

"But there are also times when
I’m flattered by the artist’s rep-
lication," she said, "and other
times when I wish I’d never entered
the field."

STC legal students form association

Jackson County Legal Secretary and SJU’s School of
Technical Careers are forming an
association to help legal secretary
students develop an interest and
pursue a career in the legal
profession.

The Association of Legal Students
(ALS) will hold its first
organizational meeting at 8 p.m.
Monday in the Home Economics
Lounge. ALS will be working on
its by-laws and constitution at that
time a nominating committee will
proceed for the first office at the
meeting, said Sharon Holmes, ALS
adviser.

Holmes said the organization will
attempt to provide members with a
background and to promote un-
derstanding in the legal secretarial
field.

ALS, which will adopt a formal
name at Monday’s meeting, is the
second such group of this type in
Illinois. A total of three groups of
legal students was formed at Har-
per Community College near
Chicago.

To form this sort of association, a
group has to be sanctioned by the
National and Illinois Associations of
Legal Secretaries, find a local spon-
sor in this case the Jackson County
Legal Secretaries and have 10 ac-
tive members. Holmes said.

Holmes said 35 students signed up
for the association at an ice-breaker
held Oct. 6.

Non Sequitur magazine to be on stands Monday

The non Sequitur magazine, a
student-operated news magazine,
will be distributed on campus Mon-
day.

Student managing editor Jim San-
tori says that non Sequitur is a new
journalism and literary magazine.

"We are striving for the new jour-
nalism and traditional news," San-
tori said. "We also like to deal with
longer articles and ideas which
aren’t normally accepted by
traditional press.

"Funds have been a problem for
Non Sequitur. It was previously fun-
ded by Student Government, but the
funds ran out. Now the magazine is
funded by advertisers and the stu-
dents’ own money. Non Sequitur is
currently printed by the Daily
Egyptian.

Four full-time workers are em-
ployed by Non Sequitur and all the
material is written by students.
although Santori urges everyone to
submit articles and display his
writing talents.

Santori said the magazine will be
published quarterly, but if more
funds are raised it could come out
more often. Non Sequitur will be
available by the Daily Egyptian
booth and also will be distributed
individually.

The Radio-Television Department, in conjunction with the Career Planning and Placement Division, will offer aid to students in preparing resumes in a seminar, beginning at 9 a.m. Friday in the Calibre Stage on the second floor of the Communications Building. Individual help sessions will be available in the afternoon.

The Masters of Business Administration Association will meet at 5 p.m., Oct. 23 in the Student Center Missouri Room. The program, which is sponsored by the Divine Information Center in Carbondale, is free and open to the public.

Carl Hebeler, a close disciple of Guru Maharaj Ji, will speak about the meditation called “Knowledge,” at 7:30 p.m. Monday in the Student Center Missouri Room. The program, which is sponsored by the Divine Information Center in Carbondale, is free and open to the public.

The Council for Exceptional Children will sponsor a picnic from 11 a.m. to 4 p.m. Sunday at Crab Orchard Lake. Area One: Food, drink and activities will be provided free. Everyone is welcome to attend.

WSIU TV’s “Ebony Accent” will feature interviews with the cast of the road production of “Don’t Bother Me, I Can’t Cope” at 6:30 p.m. Tuesday. “Inspection,” a local band, will also be featured on the program.

Emily J. Harris, instructor in the Department of Specialized Student Services in Madison, Wis., will be a special guest on campus from 2:30 to 4:30 p.m. Friday in the Faculty Lounge in Illam.

Joe H. Jones, plant and soil science, was honored by the Murray (Ky.) State University Agriculture Alumni Association Oct. 3 with its outstanding Agriculture Alumni of Murray State University award during the group’s homecoming dinner meeting. He is a 1949 graduate of Murray State.

The Vets Club has scheduled a meeting for 12 p.m. Sunday, at Evergreen Park, shelter 6.

Alpha Phi Alpha will hold a dance from 9 p.m. to 12:45 a.m. Friday in Student Center Ballroom C. Contestants in the Miss Ebones contest will be announced at the dance.

Eight students and two faculty members from the Department of Mathematics attended the regional meeting of the Pi Mu Epsilon mathematics honorary fraternity Saturday, Oct. 11, in St. Louis. Attending the meeting were Carl G. Townsend, associate professor, Joseph C. Wilson, professor, Emery E. Ackerman, graduate student, James N. Bellinger, senior, Kent G. Carroll, senior, Joseph T. Gibson, junior, C. Gordon Huff, graduate student, Benjamin J. Hall, graduate student, Steven R. Lemery, senior and Mary M. Williams, junior.

Lions schedule pancake days

The Carbondale Lions Club’s 13th annual pancake days are scheduled for Saturday and Sunday, said George H. Jessop, club treasurer.

A large checkered tent in Central Plaza Square, at Main and Washington Streets, will house the feast, Jessop said.

Tickets costing $1.50 for adults or 75 cents for children less than 10 years old can be purchased from Lions Club members or at the tent, he said.

The tent will be open from 6 a.m. to 9 a.m. Saturday and 6 a.m. to 1 p.m. Sunday, Jessop said.

Auxiliary moves to Barracks

Auxiliary and Service Enterprises, the home office for 10 campus service departments, has moved from its temporary summer quarters in Blue Barracks West to Washington Square B.

Before moving into the blue barracks in late May, Auxiliary had occupied offices at Park Place South for seven years, Director of Auxiliary Carlton Ranche said.

Fiscal supervisor at Auxiliary, Alvin Hooton, explained that the move from Park Place South was necessitated when the University gave up its lease of the Park Place buildings.

Temporary quarters were needed, he added, as Washington Square B, Auxiliary’s scheduled relocation site, was not vacated by the Office of Student Work and Financial Assistance until after the lease termination date.

Eight of the 10 service offices under Auxiliary are located on various parts of the campus, Ranche said.

These offices are laundry, vending, intercampus bus, military property, travel service, campus mail, transit-transfer and printing-duplicating.

Smokestack scrubber project
exhausts its available funds

By Doug Dorris
Student Writer

Gov. Dan Walker switched on SIU's Physical Plant smokestack scrubber system last October and much publicity and talk of SU and the region was generated as a result of industrial and environmental engineering students at the university’s steam plant smokestack. Talk is an experimental project, capable of handling five per cent of the smokestack emissions.

Such a system was tested because SIU’s Physical Plant is violating federal Environmental Protection Agency (EPA) emission standards for sulfur dioxide gases. A scrubber system would be able to remove 90 per cent of sulfur dioxide gases by removing the scrubber from stack emissions.

Significant findings of the project, according to Howard E. Hedrick, SIU associate professor of environmental and occupational health and a designer of the system, include:

- Emissions from high-sulfur containing Illinois coal can be scrubbed to bring emissions within EPA clean air standards. Hedrick called this the most important single finding of the project.

- The Illinois plant can handle up to 10 per cent of the scrubber system.

- Over 96 per cent of sulfur dioxide gases can be removed by the scrubber from stack emissions.

Although the pilot plant is shut down, it is not totally inactive. Week samples, which are the hydro- products of the scrubbing operation, were accumulated in the latter days of operation and are now being analyzed. A practical use of the sludge is being sought.

Hedrick said the system might be turned off if it becomes available from other sources. According to Hedrick, the federal EPA showed great interest in continuing funding of the operation, and university requests came after available funds were allocated for the coming fiscal year.

Foundation elects officers, establishes grants, loan funds

The board of governors of the SIU Foundation elected officers and approved the report of the Living Endow- ment program at its meeting Tuesday.

Re-elected as officers were James A. King, president; Jerome Glassman, vice president; Clyde Maulding, Murphyboro, chairman; and Richard Arnold, Carbondale, executive director and John Huffman. Carbondale, legal counsel.

Also re-elected to serve for three years were the board were Richard Arnold, Carbondale; R.A. Bonfield, West Frankfort; Fred Jacobson, Sparta; and Mrs. Anne West Ziemet.

J. C. Garavalia, director of the SIU Physical Plant, submitted a report to the Board of Regents for the spring semester, which includes a list of new facilities and improvements, a comparison of costs and the report on the progress of the new buildings.

The following programs are scheduled Friday on WSIU-TV.

Channel 8

3:30 p.m. — Weather; 4 p.m. — Sesame Street; 5 p.m. — The Evening Report; 5:30 p.m. — Mister Rogers' Neighborhood; 6:30 p.m. — Book Beat; 7 p.m. — Washington Week in Review; 7:30 p.m. — Chicago Tonight; 8 p.m. — Black Perspecte on the News; 9 p.m. — WSIU Report; 9:30 p.m. — Viewpoint; 10 p.m. — WIDB Wide.

The following programs are scheduled Friday on WSIU-FM.

8 a.m. — Today's the Day; 9 a.m. — Trade Winds.

The following are programs scheduled Friday on WIDB Radio.

11:00 a.m. — WSIU FM Stereo 92.

2:00 p.m. — Take a Music Break.

4:00 p.m. — The Student Hour.

6:00 p.m. — WSIU Expanded News.

9:00 p.m. — WSIU Expanded News.

The following programming is scheduled for Friday on WIDB Radio.

Stereo 1050 on Carbondale; 160 AM.

Current progressive music, all day: news at 40 minutes after the hour; 9:46 a.m. — WIDB Sports Review; 6:40 p.m. — WIDB Sports Roundup; 11 p.m. — The Best of Peter, Pramton and Humble Pie.

Bilingual grad student assists professor in research project

By David Henin
Student Writer

Early in 1974, Herbert Marshall, director of the Soviet and Eastern European Studies Department, began a search for a student who could assist him with his research project on World History of Jewish Theatre.

The student would have to understand Yiddish, Hebrew, Russian, and English which was a tough bill to fill. After sending out letters to many universities inquiring about such a student, the search ended at Hebrew University in Jerusalem, Israel. Ivan Burke, now Marshall's graduate assistant while earning a Ph.D. in theater, was suggested and Marshall extended the invitation for him to work on the project.

Burke accepted the invitation and came to NU in February to begin her work.

She was born in Odessa, Ukraine, in the Soviet Union, and lived there till she was 11 years old.

The Burke family left the Soviet Union in 1950, spent a year in Poland, then moved to Jerusalem. Burke earned a masters degree in Soviet Studies at Hebrew University, and also did some student teaching.

Burke is now gathering materials on Jewish theater and studying Marshall's numerous volumes on the subject.

"Professor Marshall is very proud of the project, and it will take many years to complete," Burke said. "My part is very important. By the time I leave NU only a few chapters will be completed. Then another student will take my place."

Burke said her research centers around the Jewish theater after 1917, which she considers the golden age of Jewish theater.

She spends much of her time sending letters to Moscow, Hungary, Amsterdam and the Yivo Jewish Library in New York to collect as much material as possible about the subject. She then compares the new materials with the information she already has and decides what will be used for the project.

College life in Carbondale is much different than the style Burke saw at Hebrew University. She said, "The classes here are much less formal, but the departments are much more developed."

"The student here gets more involved, and is more active. It seems like the student is allowed a more liberal education here. Things are much stricter in Jerusalem, because they stress professions at all times."

Burke said the students in Israel are much older, too, because most of them serve time in the Army before going to school.

The social life of an American is not that much different than that of an Israeli, she claims.

Ballot petitions available for fall senate elections

Petitions for application to be on Student Government. Senate-run election ballots this fall are available in the student government offices at the Student Center, according to Lenny Swanston, student government elections commissioner.

The petitions, which must be signed by 50 officially enrolled students of the senatorial districts for which the candidate wishes to run, are due no later than 5 p.m. Oct. 24 at student government offices.

Swanson said more than 15 senatorial seats are up for contention in all six senatorial districts. He said he urges students interested in running for a senatorial office submit petitions in early.

Arena books Merle Haggard

Country and western great Merle Haggard will appear in concert at the Arena at 8 p.m. Nov. 14. The concert will be performed in the Arena's Focus II concept designed to seat 11,000 people.

Haggard's own life reads like a country and western song. Born in a converted boxcar, his widowed mother milked cows for a living while her son Haggard did drifting.

In 1968, Haggard released perhaps his best known song, "Okie from Muskogee." The song proclaimed "we don't smoke marijuana in Muskogee," and Haggard felt the song was "aimed at the people he knew best—people struggling for the simple things."

Tickets for Haggard's performance go on sale Tuesday. They are available at the Student Center Central Ticket Office, the Arena Special Events Ticket Office, STC Student Center, Penney's in Carbondale, Sears in Cape Girardeau, Tempo and Bootright Electrics in Marion, Montgomery Wards in Mount Vernon and Gallatin's in Pekin.

Agriculture fraternity holds public meeting about soybeans

By Linda Henness
Daily Egyptian Staff Writer

Alpha Zeta, honorary agriculture fraternity, held Wednesday the first in a series of public meetings in the Thuban Room of the Student Center. The meeting was sponsored by the Illinois Soybean Operating Board and executive secretary of the Illinois Land of Lincoln Soybean Association was the special guest at the meeting.

The topic is the illinois. Tiberend said. At harvest farmers are waiting anxiously to find out in the price their crops will bring. This revenue has a great effect on the economy of the state. Tiberend maintained the contribution soybeans have on the economy.

"Last year soybeans surpassed corn as the largest cash crop for the second year in a row. There was an 186 million bushel surplus of soybeans produced last year, and we are expecting an even larger surplus this harvest," Tiberend said.

"Soybeans were also the largest exporting crop last year. We exported 8.8 billion of soybeans, and there is no reason why this figure can't be increased. We have a real agriculture product with soybeans. They are a very important crop. They are the most widely used protein supplement," Tiberend said.

Tiberend said farmers spend about $4.96 to produce a bushel of soybeans but receive about $4.70 per bushel. He said simple arithmetic tells anyone that prices can not continue.

"We can not continue to produce soybeans when corn is getting the bulk of the market," Tiberend said. "The government is making it hard for the soybean farmer to survive. We develop overseas markets for soybeans, and then the government steps in and puts holds on our product."

Tiberend cited the general world wide embargo on soybean sales previously imposed by the federal government as evidence of the damage done to the international soybean market.

"Legislators process more soybeans than any other city in the world," he said. Soon a little city in Illinois will be the greatest acre producer," he said.

"I'm going to happen because we put an embargo on our soybeans and the Japanese depended on us as their source. They are afraid we will do this again. Now they are spending millions developing their own source of soybeans in Brazil.

Tiberend concluded by saying that Illinois is one of the largest soybean producing states. He said through research the largest exporting crop in the United States will grow in importance.

"We've got things backwards in this country. We have the capabilities to produce and export soybeans in greater amounts. We have to develop this export crop to its fullest potential so the soybean farmer will see some profit," Tiberend said.

Selection of university head stirs protests among students

AUSTIN, Tex. (AP) - Dr. Loren Rogers, president of the University of Texas, switched as black balloons drifted over the football game.

Anxiously students had released the balloons as part of their dwindling protest against the 61-year-old biochemist as head of the university.

Their three-day classroom boycott began the day before the game against Alabama, which is expected to be the largest in the history of the school. The two teams are playing for the national championship. The game was to be played on Dec. 31. And only 31 and 10,000 students said they would. It is said Rogers and they said she was not about to roll over.

Did the balloons and other gestures ever get to her? "No, I don't let it bother me," she said Rogers insisted on being listed on the vote Sept. 11, with Lady Bird Johnson among those who voted "no."

In a 1970 Texas A&M, when the qualifications were not at issue, a dissertation was filed. But there was no question whether she had the support of teachers and students after serving in a faculty member for a year.

A faculty student advisory committee had unanimously rejected her four times in considering votes to pass on to the regents. Protesters contended the university was being run by bankers and businessmen with little or no consideration for education. They said the regents' rejection of the idea was an attempt to silence a committee in an attempt to ease staff and students.

"The only way we can have academic freedom at the university is to have academic running it," Rogers said. "It is a faculty member at a poorly staffed institution."

But according to the protests, including those of a 10,000 students on Sept. 11 and 10,000 in March, by 2,000 on Rogers's group Allan Ayers antiabolition home two days later, were some objections to Dr. Rogers herself.

Some present signs called her a "puppet" of the regents, who have a reputation for selecting U.T. Austin, then discarding them a few years later.

Foremost among the objections is an alleged "enemies list.

Seven professors, all of them vocal in campus affairs, received similar letters. They said they had recommended the committee had recommended the president and those federal court suit said Dr. Rogers cut back the raises are to punish them, violate their constitutional right of free speech.

"We have made her look bad," said Professor Phillip White. "She has punished us because we dared to challenge the president's prerogatives of the."

"I have a bull horn," said another professor, "I could raise my voice in a federal court suit."

But Rogers responded that it was "ridiculous" to assume she had singled out those seven for punishment, when she had cut back raises recommended for more than 70 teachers. She said the cutbacks were designed to equalize salaries of those who had not received most raises in the past few years with those who had.

Wildler play discovers 'inventor of first wheel'

Thorton Wilder answered a question that has been stumpng anthropologists for generations. He discovered the "see and only inventing wheel" in the Amazon basin of George Anroufe.

"The Players, a production of Wildler's communication, 'The Skin of Our Teeth' follows the history of George Anroufe and his family. They are threatened with all the catastrophes that have affected mankind through the ages. The family fights its way through Noah's flood and a world war. In their spare time they battle with dinosaurs and the Devil. Through it all their smiles remain intact."

The play will be presented at 8 p.m. on Oct. 24, 25 and 31 and Nov. 1 in the University Theatre. Admission is $1.50 for students and $2.25 for the general public. They are currently on sale at the University Theatre Box Office.

The world could use a few good miracles along about now.

Builders lack material, work on garage delayed

Construction on SIU’s 308-space parking garage has been delayed until Oct. 28 because the firm working on the structure has been unable to obtain materials needed for the project.

Lee Robinson, president of J. and L. Robinson Construction Company, said that his firm has been working since July for present concrete forms from Stone Concrete Co. of Dexter, Mo.

The garage, which is being built between the north end of McAndrew Junior and the Panzer Building, was originally marked for completion last month. It is now due for completion in March, said Rino Bianchi, director of facilities planning.

The garage will accommodate faculty parking only.

Robinson said that Stone was to deliver the concrete forms of the first week in September, but a delay in the approval of the garage’s shop drawings, which are needed to make the forms, forced the company to take another job ahead of the SIU project.

Shop drawings were done by Carl Walker and Associates of Edin. No reason was given for the delay in the drawings.

Representatives from J and L. Robinson confirmed last wee at the delivery of the concrete forms for Oct. 28. Robinson said “no more MediNet course speakers slated

Subjects and speakers have been scheduled for the completion of the “Meditation and Human Potential” course, according to program coordinator of the Student Christian Foundation.

The subject and dates are: Zen Buddhism, Oct. 18: Evolution of Human Consciousness, Oct. 23: Sonic Meditation, Oct. 30: Medieval Christian Mysticism, Nov. 6; Thomas Merton and Christian Mysticism, Nov. 13: Meditation and Human Potential, Nov. 20: The meetings are at 7:30 p.m. at the Wesley Foundation. 814 S. Illinois Ave.

The course is sponsored by the Student Christian Foundation and the Wesley Foundation in conjunction with Free School.

Company displays bus made for handicapped

By Lenore Sobota
Daily Egyptian Staff Writer

Three disabled students were treated to a free ride Wednesday in a $63,000 specially-equipped bus for handicapped people.

The special transport was brought to SIU for demonstration by Frank Chandler, a representative of FM Transportation Equipment, but chances are slim that the University will buy one of the vans.

Bruce Swinburne, vice president for student affairs, said, "I would like to purchase some additional transportation vans for handicapped students but obviously we have a budget problem."

Swinburne said his office has looked at several vans and is considering buying one when money can be found.

Bradon Khattab, transportation supervisor for Specialized Student Services, said he would be willing to give up one month's salary to help purchase one of the 36-foot transports.

"If there is no money to buy this bus, we can give contributions-faculty, staff and students. Together we can do something," Khattab said.

Mark Karner, junior in music, said, "I think this bus would be exactly what we need."

Karner said the special bus would allow more recreational activities to be scheduled for disabled students.

The bus can accommodate four wheelchairs and 16 people. Despite its size, the van can maneuver well in small areas.

Chandler said the bus can run 11 to 12 hours of service and will accommodate three times as many students as the vans presently operated by the University.

Steve Creque, sophomore in sociology and social welfare, said he was amazed by the ability of the bus to make sharp turns.

Creque said the bus would be practical for taking students to and from classes but would be perfect for taking handicapped students on trips. He said it was ideal for handicapped students to get out to many places, such as Giant City State Park.

Dennis Frazier, freshman with a special major, also said the bus would be ideal for handicapped students because of its special features including a motorized elevator for students in wheelchairs.

Steve Creque, sophomore in sociology and social welfare, and Mark Karner, junior in music, leave FMC Corporation transit coach in front of Woody Hall after a free ride around campus. The specially-equipped bus, which is 36-feet long and cost $63,000, was at SIU Wednesday for a demonstration. (Photo by Lenore Sobota)
Student escapes man
by jumping from auto

By Scott G. Banner
Daily Egyptian Staff Writer

An 18-year-old St. Anthony woman was
snapped by a police officer
Wednesday night after
she jumped from an auto
on the west side of Carbondale.

The woman said she was
walking on University Avenue
when a man at a male auto
light blue or beige Volkswagen screen
and said if she needed a ride.

When she said no, he reportedly
got out of the car and pushed her
into the car and forced her inside.
She said she drove to Pleasant
Harbor, where she
where she
drove the car.

The woman described the suspect
as a tall black male in his mid-20s

"I'm not sure if there was
anything wearing a yellow jacket and blue jeans.

Jeffrey A. Turck, 800 W. Mill St.,
rushed to the police Wednesday,
who somebody fired a window open and
an entrance into his apartment.

Turck reported a 35-mm PFA
camera on a 300, a 50-300
Sundown camera mount, a three-pound Tela
Sundown Belouga Cannon 35, a
Honeywell auto strobebar 300, one
Craig Sierra tape player and a

Commonsense ideas can save money on trailer heating bills

By Pat Cernoran
Daily Egyptian Staff Writer

Heating and insulating trailers isn’t easy, but trailer owners and power companies sometimes use some simple, commonsense things that can heat trailers without raising the student’s budget to install the improvements.

Underpinning the trailer and installing storm windows are two major factors in reducing heating costs. But they are simply too high-priced for the renting student, and getting them requires a sympathetic landlord to install them.

A Central Illinois Public Service (CIPS) employee said the highest demand for heating gas comes in November through February. Trailers without underpinning usually use $30 to $50 more in gas for each of these months.

The student can go to a barn to find underpinning. Straw, at 10 to 15 cents a bale, is a cheap and effective substitute.

‘Operation Venus’ airs Friday night

Friedrich Durermann’s radio drama, ‘Operation Venus,’ will be aired at 9 p.m. Friday on WSUI-FM radio.

Durermann, recognized as a notable 20th century dramatist, uses scientific fiction to question modern man’s ability to cope with the atomic age that already upon him. ‘Operation Venus’ is produced by Earlap 75 and the British Broadcasting Company.

Straw bales, piled two-high around the trailer will block the wind and keep it from chilling the trailer’s floor, a major source of heat loss. The time saved in the first month will pay for the straw investment.

In the spring, the bales can simply be removed to allow ventilation. The broken bales can be spread over the ground since straw is biodegradable and makes a good compost.

Windows are a special problem in trailers because they are usually poorly fitted. Without storm windows, a cheap substitute is clear, heavy plastic taped on the inside. Plastic taped on the outside has a life expectancy of one week, if the wind doesn’t blow. Tacks will hold the plastic on longer but most landlords frown on holes being made in trailer sides.

Doors can be handled with heavy tape around the threshold. Experience has shown trailer doors do not fit well either. The back door of the one used least should have rolled-up newspaper stuffed in its cracks and then taped shut. This does not block the door for emergency use but does keep most winds out.

Keeping windows open on sunny days allows the sun to shine in and warms the rooms. Temperature differences between rooms with and without draftstops open can vary as much as 10 degrees.

If all the steps are taken and the thermostat is set at 68, the trailer renter will at least avoid suffering from frostbite and pocket-book pain during the winter months.
Ringmaster, tiny circus performs for students

By John Roschek
Student Writer

The Royal Lichtenstein Circus, which claims to be the smallest in the world, gave a free performance Wednesday in front of the Home Economics building.

More than 160 pre-school and young grade school children viewed the hour-long show along with SIU students and teachers. This was the second performance of the circus at SIU in two years.

Nick Weber, ringmaster and founder of the circus, tells himself as the "only performing Jesus in the U.S."

"Weber said his circus is a big production. He said members spend five hours setting up for the one-hour show and feeding and caring for the animals daily.

The animals include a baby bear called Dorothy and "the smallest performer in the world" named Oldilio. Weber said the circus travels and averages 40 miles a day and is on the road approximately 32 weeks a year.

United Nations Association schedules week of activities

By Peggy Sapon
Daily Egyptian Writer

The Southern Illinois Chapter of the United Nations Associations of the United States of America (UNA-USA) held its annual activities in observance of United Nations Week this week.

The UNA is a nationwide organization of 200 local chapters and divisions and over 150 cooperating national organizations said Beverly Goeldie, president of the Southern Illinois Chapter of the UNA.

Goeldie and Frank Klingberg, SIU professor of political science, will speak on the significance of local activities for the U.S. on Oct. 13 at 3 p.m. on the program. Also on the program will be Edith Spence, assistant professor of Child and Family who will speak on "Camping Out," who will talk about the World Health Organization, and "Who, and Oliver Caldwell" will talk about the International University.

William Wickersham will speak on "Camping Out" Sunday at the United Methodist Meeting House.

Goeldie said Monday will be a talk at the meeting house at 10:30 a.m. on Oct. 26.

A U.N. Day luncheon will be held at noon that day in the Southern Illinois Chapter of the U.S. U.N. Student will be held at noon that day in the Southern Illinois Chapter of the U.S. U.N.

The luncheon will be held at noon that day in the Southern Illinois Chapter of the U.S. U.N.

Student art display decorates Faner

The work of undergraduate art student Ken Segen, part of a new rotating art show, are on display on the second floor of the building. In the center, the Liberal Arts office Segen considers himself a "humanism" artist in intent and action. The exhibit contains 12 prints and two drawings, all for sale.

The display has been instituted through the efforts of Ken Shelby, dean of Liberal Arts, and George Novelino, art director. Each individual's works will be displayed from four to six weeks.

"The purpose of the program is three-fold," Shelby said. "We want the artist to have a chance to show his work, the students and faculty to enjoy the display, and for the public to improve the visual atmosphere of the building.

Dinner will be held from noon to 3 p.m. Saturday in the Student Center, and on Monday in the Southern Illinois Chapter of the U.S. U.N.

The theme of the luncheon this week will be "getting young people interested in the work of the United Nations through a media presentation." An interested person must contact either Goeldie, Charles Speck, chairman of the consumer committee of the UNA, or Goeldie, who will make arrangements for the audience.

The purpose of the U.N. is to get people of the world working together through cooperation, rather than confrontation, to solve their mutual problems," Goeldie said.

"The idea is that each person contributes what he can according to his ability," the said.

Goeldie said her main concern is getting young people interested in the work of the United Nations through a media presentation. 

"We want the artist to have a chance to show his work, the students and faculty to enjoy the display, and for the public to improve the visual atmosphere of the building.

Dinner will be held from noon to 3 p.m. Saturday in the Student Center, and on Monday in the Southern Illinois Chapter of the U.S. U.N.

Men volleyballers average loss

By Scott Burnside

Daily Egyptian Sports Writer

Utilizing the women’s time, in an organized game, the Volleyball Club through a 3-2 victory in a Wednesday in a scrimmage at Devine Gym Saturday.

Both teams used the scrimmage as a contest within the team. The Volleyball Club needed the victory to average another loss to the women.

The first game was the closest as the Club edged the women, 25-23. The Club had a 11-5 lead, but the women regrouped behind the accurate serving of Sue Schaeffer and good net play to tie the game at 12. Cortini, Laura and Pearl Konwaki to finish back to 13-13.

Another Schafer ace gave the women a one point lead, but a soft hopkins named player-of-week

Leonard Hopkins, SIU’s senior quarterback from West Franklin, has been named the Missouri Valley Offensive Player of the Week.

Hopkins, a 6-foot 2, 200-pound rusher for 64 yards and completed 11 of 18 passes for 174 yards and scored one touchdown in last Saturday’s 17-17 tie with Illinois State.

Hopkins beat out a couple of running backs who also had good performances over the weekend. Drum was 100 yards rushing on a 21-yard performance. The junior Bulldog rushed for 122 yards against Northern Iowa and led the conference with 860 yards in five games.

The full back Carlisle Canzler topped the 100-yard mark for the second straight week. Telephone Steve Largent accounted for 101 yards on one game against Cincinnati.

Hopkins ranks second in the Valley in total offense with 124.6 yards per game average. He has gained 502 yards on the ground and 461 in the air.

BC Moore has been his main target and Moore ranks third in the valley with 14 receptions and 297 yards.

World Series tension starting to build

CINCINNATI (AP)—Sparky Anderson was taking a stride through the downtown section of this city Thursday morning when a male fan walked up to the manager of the National League champions.

"The guy stopped me," said Anderson, "and said he didn’t know what a cross set was."

The Grand Touring Auto Club is holding a contest to name the championship Sunday at the SIU Arena. Registration begins at 12 noon. There will be a total of 600 entries this fall.

Each participant must own his or her best four finishes in the competition for the championship trophy.

Going into Sunday’s event, Jim Keetle in a firebird, is the leader in the “A” division. Tom Fox in a capri, is the leader in “B” division. In the “C” division, driving a Volkswagen to the top pack is Dennis R. Verlaine.

In 15-car class, sports cars, Bob Bates sits on top in an Austin Healey. Bates’ ordering has led to an overall in advance of Sunday can contact Dennis Verlaine at 640-2375.

Lame Salukis head north for Huskies

By Dave Wieczorek
Daily Egyptian Sports Editor

Salukis are beginning to drop off one by one.

Every week the SIU basketball team loses another game and come Monday morning, the team has fewer members than it started with at the beginning of the fall.

The players are not quitting because of the miserable 4-14 record. Guys are just getting put out of commission every game. Last Saturday against Illinois State, SIU lost two defensive backs who will not be in the lineup Saturday when the Salukis travel to Northern Illinois (2-3) in DeKalb for the Huskies' homecoming.

Paul Benenato, Rick Lewis, the defensive backs, probably will not return the rest of the year. Benenato is out for sure with a broken leg and coach Doug Weaver is not counting heavily on Lewis' return, who is out with torn ligaments.

The team can not afford to lose two starters in the already weak secondary and SIU could pay for the misfortune. "They have an excellent passing attack," Weaver commented Thursday afternoon. "They do a lot of passing and have a big, strong quarterback in Golsteyn (Jerry)."

"I hope we can force them to pass, but it suppose Northern will just start running. They have wide open formations and they wouldn't use them unless they were going to pass," the coach said.

The Salukis will run several different offensive formations at the Saluki defense, including the 'I', split backfield, pro set and the straightforward 'T' formations.

"On offense they are big and fast," Weaver said of NIU. "Our defense will use in the straight 'T' with an unbalanced line. You don't see much of that anymore."

Something else the Salukis have not seen is the defense that NIU uses. It is called the Tech Formation and is a combination of the standard "4-3" defense with an inside nickel. Weaver said the Huskies have improved on defense since last year and can expect "a lot of pressure in the first half."

The Salukis have made little changes for this 23rd meeting with the Huskies. Quarterback Leonard Hopkins, who was named offensive player-of-the-week for his performance against Illinois State, will start along with halfbacks Andre Heerlein and John Ostmolk and fullback Wash Henry.

Should this backfield falter, however, Weaver indicated he will go with other players. He said reserve fullback Joe Holgewre will probably get more time.

The key now for SIU is to cut down on turnovers and make the most of their opportunities.

Phil Robins, another backteer still competing for the SIU, is also an Olympic hopeful. Right now he is trying to recover from surgery on his knee, but will have to undergo further surgery to clean up some complications.

Hartog said Robins should be back strong in about nine weeks and will definitely have thoughts of Montreal. Almost a sure bet for the U.S. team in gymnastics, Robins has a wrist last year just before the national championships that is recuperating nicely. He is regarded as one of the top gymnasts in the nation.

The Spirits are scheduled to start Barnes and Girard at forwards. Both are seniors and had 17.6 and 15.8 points per game respectively. Doug Collins, a Benton and Lincoln graduate, will start at the guard positions with Don Barnes and Fred Carter, who is averaging 17.6 points per game.

Harvey Catchings, who has started all five games at center will probably be in that spot. He is leading the team in rebounds with 41 and is second in field goal percentage and a 91.2 percentage at the foul line.

Collins also leads the team with a 6.7 field goal percentage and a 91.2 percentage at the foul line.

Collin's runningmate at guard will probably be Fred Carter who is averaging 11 points per game. Harvey Catchings, who has started all five games at center will probably be in that spot. He is leading the team in rebounds with 41 and is second in field goal percentage and a 91.2 percentage at the foul line.
