Bakalis: Let legislature control tuition

By Mark Peterson
Student Writer

Democratic candidate for governor, Michael J. Bakalis, has quasi-Gov. James Thompson’s proposal that the General Assembly relinquish control of tuition and make it unaccountable to the citizenry of this state.

Speaking to a political science class, Bakalis, state comptroller, said that if Thompson’s proposal is enacted, higher education would be left unaccountable to the voters of Illinois.

“At least now the people of Illinois can vote out of office any legislators that they feel are managing higher education issues,” Bakalis said.

Thompson has said he has not decided who should head the final word on tuitions, but would designate such an agency in his bill.

Currently, universities can approve tuition hikes, but only the legislature may release the funds raised under the higher rate.

Bakalis has said that he questions whether politicians should be involved in the tuition business.

Lecturer: Righteous noises hurt S. Africa

By Bill Collins
Staff Writer

No solution to the racial problems in South Africa will be reached if the United States continues making “rigid noises” and demanding changes, said a visiting assistant professor in mathematics who taught in South Africa.

Ralph Wilkerson, who was lecturer in mathematics at the University of Witwatersrand in Johannesburg, South Africa, for four years, said economic sanctions by the United States will only add to the already mounting unemployment problem in South Africa.

Wilkerson spoke at a University Forum program on “The South African Question,” in the Morris Library Auditorium.

“The South African black is economically better off than his comrades in other parts of Africa. If the United States was to stop trading with South Africa he would be the first to lose his job,” he said. “There are more than one million blacks out of work now.”

Wilkerson said the independent countries around South Africa should be forced not to force South Africa to utilize its black labor force.

This would also give the black African more of an economic voice, he said.

“If we keep acting negatively we are going to create a revolutionary atmosphere and a lot of people are going to die,” he said.

Congressman fears violence

Simon opposes injunction to force miners to work

By Bruce Redman
Staff Writer

Rep. Paul Simon, D-Carbondale, who has about 10,000 miners in his Southern Illinois district, opposes the use of Taft-Hartley Act to end the 77-day-old nationwide coal strike.

Simon, however, agreed in principle with Rep. James Oberstar’s plan to make “definite action” to end the strike in the next week.

Delays in the Carbondale office Monday, Simon said, “I hope definite action doesn’t mean the Taft-Hartley Act. The miners are not going to be pleased going back to work under the old contract, which is what Taft-Hartley would do.”

Calling the act a “one-edged sword,” he said injunction could lead to violence.

Simon told President Carter in a telegram that a court injunction, under Taft-Hartley, “could precipitate violence in the coal fields without replenishing our dwindling national economy.”

He called the miners “strong willed men who might react strongly to any attempt to force them back to work.”

About 160,000 members of the United Mine Workers have been on strike for 77 days.

Negotiators have concerned proposed health insurance deductions, individual company pension funds and penalties for wildcard strikes.

Two other alternatives mentioned by the White House would be a settlement imposed by the federal government through binding arbitration and nationalization of mines.

The Illinois congressman said he would “wait and see if those are the only alternatives and whether there are some other choices.”

Simon, who held office hours throughout Southern Illinois Saturday and Monday, met with a dozen miners in Virden.

“I think I’m reasonably trained to what their thinking is,” he said. “Miners are a different breed because they’re facing danger all the time.”

Asked about federal efforts to end the strike, Simon said, “I would have preferred the White House move more aggressively and sooner.”

Gus says Big Jim shouldn’t figure that if he’s been one Mike, he’s been beaten ‘em all.

No safeguards planned after jail disturbance

By John Jenkins
Staff Writer

No extra precautions are being taken to secure the Jackson County Jail following a disturbance that caused about 30 inmates to escape.

The hour-long disturbance Thursday afternoon ended peacefully after Jackson County Sheriff Don White agreed to consider several demands of about 30 inmates held in the lockup.

“I was at the jail within five minutes after the disturbance started and was talking to the prisoners,” White said.

Two of the main demands were for longer visits for persons who traveled long distances, longer time on the phone and more activities.

The county sheriff said he will allow the prisoners 10-minute calls each week, White said.

The disturbance was caused by an inmate who was upset that he hadn’t seen his lawyer and blandishments.

The group started the disruption about 1 p.m. by breaking water lines to show they were in need of more drinking water and the water service has been repaired.

The Illinois Department of Corrections is investigating the incident and will probably make some further recommendations, White said.
Pension manager named to Council

The Board of Directors of the American Management Association has appointed James D. Conley, assistant to the executive vice president, as manager of the American Management Association's pension fund, which has an aggregate value of $100 million.

The pension fund, which was created in 1951, is invested in stocks, bonds, and real estate. Conley will be responsible for overseeing the fund's investments and ensuring that it meets the retirement needs of the Association's employees.

Conley has been with the American Management Association for 15 years and has held various positions in the organization. He was previously a managing director of the Association's investment department.

He replaces Charles E. Goodwin, who recently retired from the position.

Conley is a member of the American Society of Pension Consultants and the American Academy of Financial Management.

New York (AP) - The battery of Apollo's lunar module will exceed 2,700 pounds, the weight of a small automobile.

"This will be a very large module," said John M. Young, the Apollo 16 commander. "It's bigger than the Saturn V rocket." The Saturn V was used to launch the Apollo 11 mission to the moon.

"The module will be about 22 feet long and 14 feet in diameter," Young said. "We'll be able to carry up to 10,000 pounds of cargo, including two astronauts, equipment for experiments, and supplies for a 7-day mission to the moon."

The module will be launched from Cape Kennedy on April 11, 1972, and will land on the moon two days later.

U.S. military contractors doubtful of German reunification

"We doubt the reunification of Germany will take place any time soon," said Robert J. Mitchell, president of the American Society of Military Contractors. "The Germans are divided on the issue, and there's a lot of opposition from the Soviet Union." Mitchell is a member of the American Society of Military Contractors and has worked on military contracts for over 20 years.

"We've seen this happen before," Mitchell said. "In 1955, the Germans were divided, and it took until 1990 for them to reunify. We don't expect it to be any different this time."

The American Society of Military Contractors is a trade association that represents companies that provide military services and supplies to the U.S. military.

Thompson dubs new trading firm

"This is not a good time for South Africa," said John D. Thompson, president of the South Africa Investment Corporation. "The sanctions imposed by the United States have hurt our economy, and the political situation is unstable."

Thompson is a member of the South Africa Investment Corporation and has been involved in the South African economy for over 15 years.

"The sanctions are hurting our businesses, and it's difficult for us to do business in the United States," Thompson said. "We hope that the situation will improve soon, but until then, we'll have to find new ways to do business."
Rats: Rodents key to research on human brain, nerves

The rat has long been a burden to man in his environment. Pandering a fifth of the world's grain supply, carrying dangerous diseases, and even attacking men, this rodent has redeemed itself in the eyes of scientists as a laboratory animal.

Some 18 million rats in the United States will be used in medical and psychological studies this year.

The domestic rat is used more than any other animal in laboratory research for a variety of reasons. Factors of convenience such as size, ease of housing and cleanliness aid scientists.

The rat also possesses body tissues and feeding habits similar to man's. In one laboratory study, rats subjected to stress started drinking more. And when caged the rat spends much of its time grooming.

The first attempts to domesticate the rat are traced back to the early 17th century when a pastime known as rat bousing was very popular. In the event, spectators would wager how fast favorite terriers could kill rats that were thrown into a pit. When an occasional albino was found, the rat breeders kept them as pets.

While rats once found their way into mazes, problem boxes and in revolving drums when scientists attempted to study their behavior.

In a report on the use of rodents in behavioral research, David Ehrenfreund, an SIU professor in psychology wrote, "Since then (the turn of the century), laboratory rats and behavioral scientists have been reinforcing each other, changing one another's behavior and contributing to each other's environmental, social, intellectual, professional, and economic welfare."

The use of rats in research at SIU takes both physiological and psychological forms. Some students of the psychology department are conducting experiments involving basic research on behavior.

Using equipment such as the straight alley and the Skinner box, researchers and students hope to gain insights into human behavior from their experiments. Students in the life science also use the rat to learn about the physical aspects of the brain and other systems.

Research on the rat has contributed more to the cause of human illness than that of any other animal. Dr. Carl Richter of Johns Hopkins University expressed his feeling for this species in a statement to National Geographic magazine.

"Rats have the power to create an ideal lab animal," Dr. Richter said, "I could not possibly improve on the Norway rat."

Hal Powers alleged opposing the national bottle bill in the Feb. 18 D.E. was overly generous to the beverage and bottling industries.

Powers said it's time to pass the proposed social deposit as a "positive measure designed to promote the marketing of beverage containers by active consumers." There is nothing negative about the deposit, which is refunded upon the return of empty containers. The deposit amount also must be at least 10 cents, which covers the cost to the consumer, unless of course he lacks the initiative and contains it anyway and returns his containers when empty. Deposits, rather than being a tax, are actually an aid in reducing roadside litter. The experience in Oregon has been that deposit fees act as an incentive for persons both to return containers they do purchase, plus to pick up and "cash in" returnable containers which have been discarded on the roadsides by those with more dollars than sense. This reduces the amount of tax money spent to clean up this litter.

Some observers noted that other litter than just nonreturnable beverage containers is found on roadsides. This is true, but irrelevant. Other litterizers can be unstated to attack this problem. The bottle bill narrows its scope to one of the major ingredients of the litter, nonreturnable containers. It does so with great success, as is evidenced by Oregon's 74 percent decline in roadside litter and 48 percent decline in garbage.

Third, Powers finds that the best advantage to be derived from the bottle bill is "a start to cleaning up parks and highways." The bill has other advantages:

• Savings will result because it takes less energy to manufacture returns and less money to collect the fewer tons of garbage they produce each year.

• "Major labor upheavals" are not inherent in a changeover to returnable manufacturing. It takes labor to effect that changeover, and it takes labor to man the additional returnable lines once in operation. It takes labor to handle the additional transportation and storage of empty returnables.

The issue is not about the number of aluminum and glass returned.

Viewpoint

The scarce and unreturnable resource base, which is squandered in a "disposable" economy, will be conserved.

The costs of cubic miles of trash will not have to be buried in landfills already eating up precious land.

Fourth, Powers provides an alternative to the bottle bill in the form of a tax on all bottles and cases, which will be distributed to the industries to help "effect a smooth shift to returnable containers." This measure would certainly not have the disadvantage of the bottle bill, that is, being discriminatory against the glass and can industry. Rather, this clever subsidization program would have other advantages:

• The tax, unlike the deposit on returns, would be money lost to the consumer, a real "penalty," used only to subsidize the industry in question. Rather than paying both for a tax increase: 1) for its resultant subsidization—which includes the necessary bureaucratic machinery for its supervision—it is simpler, more effective, and more appropriate to have the beverage consumer pay a price which directly reflects the cost increase to the industry. Deposits may be legitimate and immediately—return to the consumers and be tax money filtered through countless channels, an inefficient way to pay industry that may be directly financed through price increases.

As a beverage consumer, I am willing to pay the expressed deposit for returnable containers and such product cost increases as are necessary for the changeover in the industry. The ends and benefits of the bottle bill far outweigh the minor monetary inconvenience to the consumer. I endorse the national bottle bill, and encourage others to do likewise.

Condense code to blanket policy of nondiscrimination

Why then a person folds a piece of toilet paper in... of crumpling it before use could eventually prevent a person from getting a University teaching position, or so one might infer from the proposed code for SIU.

Actually, toilet paper usage isn't spelled out in the nondiscrimination code proposed in so many words, it could be said, at all.

How? The proposed list what qualifications cannot be used to discriminate among applicants, including race, sex, religion, color, handicap, national origin, veteran's status or age. The last could grow to include age discrimination as well.

There is another danger in the proposed hiring code. For example, the personal characteristics the university may not use to discriminate among applicants, all traits not mentioned may, through some occasion, presumably be used for discrimination.

To correct these flaws, the proposed non- discrimination hiring code should simply state, in part: "In accordance with the laws of the State of Illinois and the United States, the Board is committed to a policy of equal opportunity for all qualified persons.

If the board voted to accept this code, it could avoid the precarious position in which it now finds itself. If it continues to be a factor in hiring, Jim Grandone proposed that nondiscrimination policy include marital status and sexual preference. Richard Goodwin said he was "not so sure" by Grandone's proposal. Without explaining the reasons for this statement, which Goodwin did not elaborate upon, Grandone pinned its vote on the new code until March 9.

Why? If the board accepts that hiring a person because of his marital status or sexual preference is not discrimination and holds that such discrimination is wrong, it shouldn't be allowed to hire on the basis of his sexual orientation and married persons in the proposal. Such characteristics are irrelevant as race, sex or veteran's status.

There isn't any conclusive evidence that married teachers teach better or other "better role models" for students. Nor does a board have any legal duty to hire one group and not the other to encourage autos to become gay. Along the same ludicrous lines, a black Puerto Rican female who was unable to vote via motorized wheelchair from Russia where she fought to overthrow Carlos Nichols as a black student may be no more qualified to teach than a "WASP" male.

The Board of Trustees should stop deliberating such a proposal, which is unnecessarily complicated. Get to the ground for discrimination. It should, instead, consider the code into a blanket policy of non-discrimination.

Failing that, the board should adopt Grandone's proposal, and include sexual preference and marital status in the code.

Benefits of bottle bill outweigh hazards

By Scott Ellis
Associate Editor, Page Editor

I've learned to respect Muhammad Ali as the greatest heavyweight boxer I've ever seen. If his defeat to Leon Spinks Wednesday night doesn't reduce that respect at all.

My father, however, had quite another view. He hated Ali and everything he stood for. His dislike began in 1964 when he bet against the Louisville Lip in his fight with Sonny Liston. I think he lost $100 as a result of Ali's 7th round TKO.

Dad didn't bet against Ali anymore after that and from then on we always tried to watch the fights at a distance to minimize the "bodily harm." I've watched Ali torture Floyd Patterson, ever since he saw his "Achilles Heel" Henry Cooper to shreds and burn Karl Mildenberger into hamburger in 1968.

But through all Ali's victories, Dad would usually say "I hope that damn Ali gets the Crown to effect the revenge" before every fight. And Dad's 16-year-old son was rooting against Ali too.

While Ali was fighting in the mid-1960s I was in grade school. I, of course, mimicked my dad in condemning Ali—Ali was anti-American, a poor influence on black kids, a public menace and trouble; he was a symptom of what was wrong with America.

Now I don't forget how Ali's Black Muslim religion, his name-change and refusal to serve in the military enraged the establishment of Vietnam era America. It took years for the country to that that his "conscientious objectors" stand against the war was not so evil after all.

As I grew up, the country grew up a little too. And Ali came back, giving us some of the greatest heavyweight boxing matches in history. The "fight of the century" between Joe Frazier in 1971 which he lost by blowing away with a round, the uneventful Frazier bout he regained the title against George Foreman in 1974; and the best Ali fight I've ever seen—the "Thrilla in Manila" in 1975. Ali was the king again, and I liked him.

Ali has beat, no heavyweight could match him. Even then. Even today. But one thing he still has is his mouth. Already it seems like Ali is beginning the process of retiring from the ring. By "ringing the bell with his best skills as a boxer never been better."

With the Shavers and Spinks fights and the last Norton bout, it's clear that he no longer has all those skills. But one thing he still has is his mouth. Already it seems like Ali is beginning the process of retiring from the ring. By "ringing the bell with his best skills as a boxer never been better."

Whether he can (or should) try a comeback for the third time, against Spinks, is uncertain. But whether he has left his best skills as a boxer never been better. Would have been a complete Leon Spinks—somehow, the title just doesn't sound right without the name "Muhammad Ali" in it. I think even Dad would agree.
Campus roads need some attention

With all the talk lately of spending money on various things at SIU, which is all very fine, I think it's time the university add some things to the list—the roads on campus. I personally speak in reference to two roads: the roads leading into the high rise dorms (Neeley and Schnieder) (both current and former residence halls).

When a driver makes a southbound turn from Grand Avenue by the railroad tracks, it is not only bad for our cars, it is also dangerous for the pedestrians on that street. Drivers are constantly driving in an erratic manner trying to avoid the holes and cracks on the road. Sometimes they drive completely out of the road and across the pedestrian area, which also looks bad for the Rhodesian government.

The proposals would mean a peaceful change ensuring a prosperous and flourishing transitional economy and government based on the American model. It could and will prove to be a useful lesson for the South Africans. But so, Mr. Young wants some credit and he will go on as negotiating with a bunch of cold-blooded murderers who have all to gain on the battlefield and nothing to gain at the voting booth. Face it Mr. Young, you've been had by these terrorists who have little backing in Rhodesia.

Surely his views and actions as ambassador are surely reason enough to terminate him from his job. I ask for his resignation because every article in Mr. Smith's collection.

Arrest of Iranians an assault on freedom

On January 19, six activists of the Committee for Artistic and Intellectual Freedom in Iran (CAIFI) were arraigned by campus security officers at Bryan Hall in Carbondale. The arraignment was followed by a rally of the campus'沸ed police, which included the successive release of a letter by the CAIFI supporters

Shryock brings culture to area

By Michael Ganseman
Staff Writer

Few people realize the time and work involved in bringing a professional production, such as a Broadway show, to the Southern Illinois area.

So Mack, director of Shryock Auditorium, realizes the work involved. She should, because she plans each production from concept to curtain call.

"The agency in New York handling the type of activity we're interested in,contact us as soon as they sign a particular artist or show," Mack said.

A board composed of two or three undergraduates, graduate students, faculty and people from the community meet with Mack. They decide whether bringing a certain show to Shryock is worth the expense.

"The people on the board are interested in the art and have seen many productions," Mack said.

"We have a good cross-section, and I think the process is very democratic," she added.

Before bringing a show to Shryock, the board must decide on three things. "First, we have to find out if the show will remain in our budget. And if it does, we have to know if it is a Broadway show," Mack said.

Many orchestral events scheduled for Shryock by the School of Music cannot be missed. However, they do make their schedule a year in advance.

To compile all this information, these old dogs do try to figure it out -- as well as a balanced

ESTABLISHED 1938
‘Julia’ adapted faithfully

By Alan Thickeber
Sports Writer

It is usually a mistake to compare films to the literary work they were adapted from. Quite often the two have nothing to do with each other, and there are reasons why they should— they are completely different. But occasionally a film comes along that invites comparison with its original, in which the film’s makers seem to have concentrated more on faithfulness than creativity, and literature more than film.

Such is “Julia,” now playing at the Varsity Two Theater. The basis for Julia is a story from Susan Hoffman’s memoirs, “Dreams of a Bride,” about her husband’s estranged Lithuanian life, which could be one of the saddest stories of recent times.

Briefly, the story recounts the relationships of two gypsy friends and the people with whom their lives converged over the years. As Lillian Hoffman grew into the Thirties, embarking on her very successful literary career, she was still

feeling of conviction and honesty—exactly what is needed to support Lillian Hoffman’s breathless self-revelation.

As Mrs. Hoffman, June Fonda is absolutely convincing. As the hard-drinking, dream-making young writer with Danbeck Himmell (Elson Roberts), she is almost in the background. But as the Redgraveist world, she is also very very true to nature. Hoffman makes the strength she eventually shows all the more admirable.

The character of Julia comes off less well. Redgrave’s performance is adequate, but the same scenes once or twice from the original, presumably to give Julie more motivation. And the scenes with two young doctors for Lillian and Julie are more cute than seems necessary.

But overall, “Julia” is worth seeing. Not because it is a great film, but because it tells a great story, faithfully.

PHILADELPHIA EXHIBIT

PHILADELPHIA (AP)—Forty-five works of art are shown in “The Art of the Frame,” an exhibit which will be on view here through July 3.

A Selection of Recent Acquisitions—The Pennsylvania Academy of Fine Arts here.

The exhibition features oil paintings, watercolors, drawings, and works on canvas and stained glass windows, by artists such as Charles C. Lederer, the late and Parrish. Closing date for the exhibit is April 15.

A Review

continuously in touch with her old friend, Julia. Julia had rejected her family’s advice, opened up a medical school in Oxford, and moved to Vienna, hopefully to study with Freud. Since in Vienna, her strong socialist leanings led her into political activity, and economic trouble. She soon became involved in a political movement. It was in this desperate cause that she called on Lillian Hoffman, who at this time was a very dangerous one. The carrying power of the novel is the dramatic care of “Julia.”

This novel is written in “Free Verse” and gradually in a series of vignettes, often separated by essays. Fred Zinaman’s novel—plays the samesuite with music and poetry. And it is appropriate for the style of the film in that each one begins and ends with a sense of fear and hope. Hoffman has written a novel about a man who is now, and was the music. The multiple flashbacks of the story filled Fred Zinaman’s dry, hanging style very well. For all the dramatic intensity depicted, each episode seems posed as a series of still photographs, faded and slow by the film’s time.

Zinaman is perhaps more a director of beloved of many such films as “A Man For All Seasons,” “High Noon,” and “The Jolson Story” having more or less a script, a script, a scene, and a scene. But as much as the novel, in “Julia,” Zinaman’s novel gives the film a

feeling of conviction and honesty—exactly what is needed to support Lillian Hoffman’s breathless self-revelation.

Zinaman is perhaps more a director of beloved of many such films as “A Man For All Seasons,” “High Noon,” and “The Jolson Story” having more or less a script, a script, a scene, and a scene. But as much as the novel, in “Julia,” Zinaman’s novel gives the film a

feeling of conviction and honesty—exactly what is needed to support Lillian Hoffman’s breathless self-revelation.

As Mrs. Hoffman, June Fonda is absolutely convincing. As the hard-drinking, dream-making young writer with Danbeck Himmell (Elson Roberts), she is almost in the background. But as the Redgraveist world, she is also very very true to nature. Hoffman makes the strength she eventually shows all the more admirable.

The character of Julia comes off less well. Redgrave’s performance is adequate, but the same scenes once or twice from the original, presumably to give Julie more motivation. And the scenes with two young doctors for Lillian and Julie are more cute than seems necessary.

But overall, “Julia” is worth seeing. Not because it is a great film, but because it tells a great story, faithfully.

PHILADELPHIA EXHIBIT

PHILADELPHIA (AP)—Forty-five works of art are shown in “The Art of the Frame,” an exhibit which will be on view here through July 3.

A Selection of Recent Acquisitions—The Pennsylvania Academy of Fine Arts here.

The exhibition features oil paintings, watercolors, drawings, and works on canvas and stained glass windows, by artists such as Charles C. Lederer, the late and Parrish. Closing date for the exhibit is April 15.

A Review

continuously in touch with her old friend, Julia. Julia had rejected her family’s advice, opened up a medical school in Oxford, and moved to Vienna, hopefully to study with Freud. Since in Vienna, her strong socialist leanings led her into political activity, and economic trouble. She soon became involved in a political movement. It was in this desperate cause that she called on Lillian Hoffman, who at this time was a very dangerous one. The carrying power of the novel is the dramatic care of “Julia.”

This novel is written in “Free Verse” and gradually in a series of vignettes, often separated by essays. Fred Zinaman’s novel—plays the samesuite with music and poetry. And it is appropriate for the style of the film in that each one begins and ends with a sense of fear and hope. Hoffman has written a novel about a man who is now, and was the music. The multiple flashbacks of the story filled Fred Zinaman’s dry, hanging style very well. For all the dramatic intensity depicted, each episode seems posed as a series of still photographs, faded and slow by the film’s time.

Zinaman is perhaps more a director of beloved of many such films as “A Man For All Seasons,” “High Noon,” and “The Jolson Story” having more or less a script, a script, a scene, and a scene. But as much as the novel, in “Julia,” Zinaman’s novel gives the film a

feeling of conviction and honesty—exactly what is needed to support Lillian Hoffman’s breathless self-revelation.

As Mrs. Hoffman, June Fonda is absolutely convincing. As the hard-drinking, dream-making young writer with Danbeck Himmell (Elson Roberts), she is almost in the background. But as the Redgraveist world, she is also very very true to nature. Hoffman makes the strength she eventually shows all the more admirable.

The character of Julia comes off less well. Redgrave’s performance is adequate, but the same scenes once or twice from the original, presumably to give Julie more motivation. And the scenes with two young doctors for Lillian and Julie are more cute than seems necessary.

But overall, “Julia” is worth seeing. Not because it is a great film, but because it tells a great story, faithfully.
Language to be topic of conference

Linguistics experts from throughout the United States, Canada and Europe are expected to participate in an international conference Thursday through Saturday at SIU.

All sessions of the Second International Conference on Proficiency in Language Proficiency and Dominance Testing will be held at the Student Center.

The theme of the conference will be current methods in language testing and language acquisition skills according to James Redden, professor in linguistics and conference coordinator.

Robert Gagne, a nationally known educational psychologist and author of a widely used text ("The Conditions of Learning") will be a featured speaker Thursday.

Alar Pen, director of a University of Texas at San Antonio program on bilingualism and bilingualism, will keynote a program Friday dealing with language in bilingual children.

Gagne's and Pen's talks will begin at 6:30 a.m. in the Student Center Auditorium.

The conference includes a registration fee.

SiU expert on national panel

An SIU scientist was one of 11 experts from across the country who took part in a recent National Academy of Science panel on soil as a mineral resource.

William D. Kilmer, director of the Cooperative Wildlife Research Center, and other experts in such areas as soil science, agricultural economics, environmental chemistry, mining and geology attended the planning session in Washington, D.C.

Sponsored by the National Academy of Science National Research Council's Board on Mineral and Energy Resources, the panel-two-day meeting examined the need for future research on soil as a mineral resource, especially in relation to fossil fuel.

The whole program breaks down like this:

—Up to 100 jobless trainees will be taught how to fabricate Fiberglas products ranging from bathtubs to car bodies.

—Next to coal mining, Fiberglas manufacturing is the fastest growing industry in Southern Illinois, Reynolds said. Most midwestern production is centered within 200 miles of Carbondale and the combined product output of Illinois, Indiana and Missouri tops all other states combined, according to Reynolds.

During the 17-month long program, trainees will learn Fiberglas technology and operations at the STC Mammower Skills Center, located in the Caroll Industrial section of the Crab Orchard National Wildlife Refuge. After they've finished shop and class work, they'll get on-the-job experience.

Forty disadvantaged young people will go into a nine-month program designed to find out their job aptitudes and interests, steer them in a career choice and then train them in fields they want to get into.

The Rehabilitation Institute counselors will screen the students for job interests and attitude. In addition to Manpower Skills Center training, they'll be encouraged to get into junior college courses or two-year degree programs at SIU in such skills fields as auto body work, food services or auto mechanics, shop trades. STC will try to find jobs for them, Reynolds said.

—Some 25 rural high school dropouts will learn the ins and outs of home improvement and "winterization" so they can be "energy advisors" to homeowners. The project will be run by a four-person team of instructors headed by Richard Archer at the Department of Comprehensive Planning and Design.

Archer said students will work in the department's classrooms and laboratories and will then test their know-how at their own homes by doing installation jobs.

Archer said another part of the training will include designing and building low-cost solar heating units. The free rides, housing and day-care options are limited to the two STC-sponsored projects.

"We wanted to open up the training to as many people as we could," Reynolds said. "People who need it often can't take advantage of it because they live too far away, can't afford to travel or have to care for children while classes are offered."

WASHINGTON (AP)—A radio disguised as a clothes hanger as an electric cigarette holder for people who need to be checked into holding the habit were among the thousands of gimmicks and gadgets that received U.S. patents last year.

A total of 77,980 new ones were patented last year, but the Patent Office protected about 3,000 other widowed fantasies of imagination.

Any hope that some of the clothes hanger raider's presumably would have in aim for a rather unusual market—people who want room in the closet or those who don't mind walking around with clothes hangers held to their ears. There were plenty of gadgets last year aimed at helping smokers stop smoking or at helping re-smokers stop breathing secondhand smoke.

The electric cigarette holder may be the ultimate in aids for those who want to stop smoking. It is a tube connected to a six-ounce nail battery. When the tube touches the lips, a puff of smoke would come out of it.

For those smokers whose smoke is annoying to the family or office workers, patents were awarded for something called the Smoke Detector for Cigarette Smokers, a gismo about the size of a cigarette package that covers the lid and end of the cigarette. Also, there is the Nicotine Removal Process for taking the nicotine out of tobacco.

A wide assortment of brainstorms is available for the agreeably lazy, such as No. 4,418,573, a 'Universal Cigarette Smoker.' The automatic gadget not only cooks the egg, it separates the eggs from the white.

And for the scientific mind in the kitchen there is the Carrier for Articles Such as Eggs, a 'two-handled shaped gripper' suitable for handling "an article having its longitudinal axis oriented substantially horizontally"—that means it's shaped like an egg. But wait, gang, there's more for the kitchen crew.

How about a disposable chef's hat? Or the Automatic Burner? The latter item is a pan with a tube positioned above the item to be boiled. Water drips from a "plurality of holes" into the tube.

And since there is already an abundance of dental hygiene instruments to brush, pick, spray and do away with everything but pull teeth...

---

**There's oil in them there Hills**

BEVERLY HILLS, Calif. (AP)—There's oil in Beverly Hills, where riches and beauty already abound. Oil may make the place richer, but it won't do much for its beauty. And that, in this town, is a dilemma.

The school district wants to put a 130-ft. drilling tower on the Beverly Hills High School campus, boasting above 28 acres of palm trees, lawns and six tastefully designed buildings where 2,500 pupils—many the children of film stars—learn about the world outside.

The well would pour money into the 5,700-student district and the town, and into the pockets of several hundred residents. But it won't be pretty, and it probably won't smell good.

"The contract with the driller provides for screening and sound baffling and all that sort of thing, but no matter how you slice it, it's going to be ugly," says Mayor Richard Stone.

"There's just no way to make an oil well beautiful." The city of Los Angeles, which surrounds the independent city of Beverly Hills, has long been familiar with such eyesores.

The city was built above a pool of oil, and wells sprout in many back yards and empty lots visible from its freeways.

But Beverly Hills is something else—a traditional home to movie stars, where a more familiar sight is a Rolls Royce, maybe two, in the driveway. Until now, the school district's oil drilling has been confined to three small wells that since 1939 have been quietly sucking oil from an out-of-the-way spot on the campus athletic field.

A few wells have also been drilled around the perimeter of the city, but that money went to Los Angeles and several oil companies.

Officials say surveys of the school oil field indicate it could contain oil worth from $60 million to $150 million. "We might have gushers," says Dr. Ruben Cordova, assistant superintendent for business of the Beverly Hills Unified School District, and jokingly.

AN OUTSTANDING OPPORTUNITY TO
STRIKE UP A MEANINGFUL RELATIONSHIP
Watts here and there add up

By Leslie Cast
Associated Press Writer

How much electricity did you waste today? Before you start feeling guilty about your electric toothbrush, you should learn which items in your home are the energy users—and wasters.

Because of the miners' strike, it is particularly important to lower electricity consumption right now in areas where utilities depend on coal to produce power. But anybody, anywhere who is trying to save money can benefit from conservation.

Residential customers use only a fraction of the electricity consumed by business and industry. But their efforts can make a difference, particularly for utilities with a big proportion of individual homes in their areas.

"A little saving means a lot when you aggregate it," said Jim Smith of the federal Department of Energy. Jim Harris of the Columbus and Southern Ohio Electric Co. agreed. "If people reduced demand by 25 percent every three to four days they could save us any day of coal," he said.

The company normally uses 12,900 tons of coal a day and now is down to a 46-day supply. It takes one pound of coal to produce one kilowatt-hour of electricity—equivalent to burning a 100-watt bulb for 10 hours.

Reducing electricity use by 25 percent means different things to different people. Because individual living patterns vary so widely, experts interviewed said it was impossible to provide a formula for conservation. You can get an idea of how to save, however, by looking at where the energy goes.

Smith said studies have shown that 18 percent of all the energy consumed in the nation is used to power 13 major appliances in the residential sector. By comparison, 10 percent goes for automobiles.

Pumpkins consume just over half the energy used in households. Hot water heaters use 8.7 percent; "cooking energy used to produce hot water for clothes and dishwashers"; refrigerators and refrigerator-freezers use 8.1 percent; clothes washers, 4.3 percent; kitchen ranges and ovens, 2.7 percent; television sets and central air conditioning systems, 2.1 percent each; freezers, clothes dryers and room air conditioners, 2.3 percent each; dishwashers and space heaters, 1.2 percent each; humidifiers and dehumidifiers, 0.8 percent; and lighting and miscellaneous appliances, 7.5 percent.

The electric toothbrush, says the Edison Electric Institute, takes 1 kilowatt-hour a year.

Smith could not say how much of the energy used is in the form of electricity. Furnaces, for example, might use oil or gas as the basic heating source, plus electricity to run the fan.

He did, however, offer average annual consumption figures, in kilowatt-hours (kwh) for specific items.

Other ways to save include using cool tap water for laundry and using less hot water elsewhere in the house. Take showers instead of tub baths. Spend less time under the spray. Don’t shave with or wash dishes in running water. Use a basin. And repair dripping faucets.

Although lighting accounts for a relatively small portion of energy use, it is an easy area in which to cut back. Replace incandescent bulbs with fluorescent ones, for example. If you replace five 60-watt incandescent bulbs with five 15-watt fluorescent ones, you’ll get more light.

Engineers to hear national officer

By University News Service

Delbert Schoen, executive director of the Little Rock, Ark., Port of Aging, will be the guest speaker at SU’s annual Engineering Week banquet at 5:30 p.m. Wednesday at the Ramada Inn.

The talk by Schoen, president of the National Society of Professional Engineers (NSPE), is one of several activities planned by the School of Engineering and Technology for National Engineering Week, which ends Saturday.

The University’s engineering and technology laboratories will be open to the public from 9 a.m. to 4 p.m. Friday. Several hundred area elementary and secondary students are expected to participate in open house activities.

Exhibits on solar energy, underground mining, electronic communications and computers have day.

The General Tire and Rubber Co., IBM, the Illinois Department of Transportation and the Illinois Mine Service have also scheduled open house exhibits.

Announcing

"SMILE TODAY ADS"

What is a "Smile Today" ad? It’s not really an ad. It’s a way to tell your friends that you care about them.

Do you remember the last time you sent a birthday card? Wasn’t it a lot of trouble to find just the right card?

Now you have an alternative. Just stop by the Daily Egyptian office and place your "Smile Today" ad. Then you will see how easy it is to tell someone that you care.
Chemists will visit Eastern Europe

A group of chemists from SIU will go to Eastern Europe late this spring for a four-month series of lectures and seminars.

The trip is part of a specific exchange package being developed by SIU and universities in Eastern Europe, particularly Poland's Technical University, which now has joint programs with SIU.

Trip costs will be covered by the U.S. State Department.

E. L. Muttertites heads Midwest meeting agenda

Carbondale's United Way has passed its campaign goal for 1977-78. The United Way, which helps fund 16 local community organizations, has gathered nearly $87,000 since last year. That surpasses the 1977-78 campaign goal of $120,000 established by the United Way board of directors.

"Carbondale citizens have demonstrated that they understand the true meaning of the United Way," campaign chairman John Cherry and Monday.

The United Way is sponsoring a brunch-frap from 8 a.m. to 2 p.m. Wednesday at the Southern Illinois Airport to honor volunteers who participated in the campaign this year.

Community services represented by the United Way are: Better Boys, Better Girls; American Red Cross; Boys & Girls Clubs, Carbondale; Community Action Agency; Boy Scouts; Carbondale United Women's Service Corps; Carbondale Junior Women; Egyptian Association for Mentally Retarded Children, Hill House, Alcohol Research Center, the Humane Society, the Senior Citizens Council, Great Scotts, Telegram, YMCA, USO; Women's Center, Youth Services Bureau and Planning for Parenthood.

WOMEN ATTEND WORKS ON KIBLAT

NEW YORK (API)-An exhibition of works by 180 prominent women artists ranges from tiny jewelry pieces to precious metal and sacred life pieces of holy relics.
WSIU Radio making plans for 20th anniversary year

By Beverly Lemonds

Bloomington, Ill. 2/17

To celebrate its 20th anniversary, WSIU radio this year will feature special programs, interviews and remote broadcasts.

WSIU, which began operating on Sept. 1, 1954, will broadcast programs of music and classical composers of 1954, music first performed in that year and several artists who died in 1954.

Also featured will be programs by one-act artists, who don't die and were never heard from again.

Later in the year, programs on jazz music, country music and social and political events of 1954 will be broadcast.

"We have some rather splashy things in mind," Tom Peterson, program director for WSIU and coordinator of the anniversary, said.

The WSIU staff is contacting alumni from 1954 to do station identifications, Peterson said. Celebrities, classical musicians and politicians are being contacted, Peterson said.

Tickets go on sale through September; the station plans to do remote broadcasts.

---

Campus Briefs

The Southern Illinois Association for the Education of Young Children will hold an in-service training program called "Preschool Phonemic Development: When to Refer" at 7:30 p.m. Tuesday at the Park Lane Child Care Center.

Stephen Blachowicz, from the Department of Speech Pathology and Audiology, will give a talk and answer questions. A proposed by-law revision of the Illinois AEYC will also be discussed. For a ride, call 332-1551.

A Lenten discussion focusing on personal beliefs will be held at 7 p.m. Tuesday at the Wesley Foundation.

A program on the rights of homeowners will be held at 7:30 p.m. Tuesday at the Women's Center, 402 W. Freeman. Eugenia Hunter, an attorney from Hunter and Schwartz, will be the guest speaker.

Don Menken, a senior in fine arts, will have his work on exhibit in the Alley Building, Alley Gallery, from 10 a.m. to 4 p.m. Tuesday through Friday.

Triangle Fraternity will hold a Bubble Gum Blow for Cystic Fibrosis from 7 to 10 p.m. Tuesday in the Student Center Railways. A $3 minimum donation sponsors one kiss. Sponsor forms are available at the Student Government Office.

Peoples Voice of the Arts, a non-profit communication and arts organization, will meet at 6:30 p.m. Tuesday in the New Life Center, 913 S. Illinois Ave. More members are needed.

Dave Rochelle, director of the SIU Broadcasting Service, and Tom Olszewski, director of programming for WSIU radio, attended the annual PBS Program Conference in Nashville recently. The meeting served as a preliminary for the start of the next Cooperative Program (SCP) February. The annual SCP bidding process determines the national PBS program schedule for the following year.

The Student Environmental Center has scheduled a meeting for students and members of the Student Government to the proposed golf course at 7 p.m. Tuesday on the third floor of the Student Center.

Seminars who are considering graduate school and who have at least a 3.4 grade point average are invited to submit an application for the Phi Kappa Phi Graduate Fellowship, which will award $500 a year. Interested students should contact Mrs. M. Hendrick, Graduate School, 600 W. Main, by Wednesday.

Dempsey signs four more recruits

By George Coash
Bad Weather
Four future high school seniors signed national letters-of-intent to play football for the Mike Roy
Dempsey announced Friday. The Wakefield High School football trio signed with other high school seniors in the fold of the U.S. on February 1.

Charles Allen, 14-2, 335-pound quarterback and receiver, signed with Notre Dame. Mark Bump, 17, 160-pound running back at St. Louis, signed with Purdue. And Mark Humbel, 16, 180-pound receiver from St. Louis, signed with Colorado. Allen, Bump, and Humbel have been recruiting targets since the current high school season ended. They still aren't finished.

"They're trying to get six more players to sign," Dempsey said. "But I'm really happy with the recruiting." Dempsey added that he lost a few players to other schools, including a Southern Illinois recruit and a running back to Purdue.

"We've been trying to use some of the kids, but we've got darn good football players. There are no deadwoods in any of them. We feel confident about all of them."

Heading the list of "blue-chip" signings is a running back from Carbondale, Illinois School District 159, Malachi Carter.

The 6-4, 205-pound Carter was heavily recruited throughout the country. Other sought-after recruits signed the same day included Tom Ward, a 6-4, 225-pound defensive end from Independence, Chicago and Glenn Harvar, a 6-2, 217-pound receiver from St. Louis.

"Weissman and Brown is going to get both of them pretty bad, but they were impressed with our school and program," Dempsey said.

Dempsey analyzed the recruits by phone, which he said "we've got more speed and size in our backfield and we'll see what we can do on both sides of the ball. Our offensive line is bigger which is what we needed and the defensive line has been good and strong, so I'm pretty excited about the way things are shaping up."

The good recruiting thus far has made Dempsey optimistic for next season and beyond.

"The signings have enabled us to have a great recruiting day and we'll see what we can do on both for the next season," Dempsey said. "We're hoping there will be no more recruiting and this is our next recruiting."

Roundball Line

Last week's results

SU 77, New Mexico State 72
Monmouth 58, SU 53 (womens)
West Virginia 77, Florida Atlantic 46
DePau 72, Loyola 63
Florida State 79, Southern Illinois 70
Minnesota 77, Purdue 73
Minnesota 72, Louisville 71
Kentucky 75, Kansas 73
Missouri 70, Illinois 62
Ohio State 86, St. Louis 70

Dempsey arrived at the training camp of the Rams in July into the lockers in.

It's going to be a good situation. "I've been encouraging as far," Dempsey said. "I would like to get the other six players, though. My coaching staff has done a great job in getting the players to come here. We want to make sure that we're 6-1 all right."

The Rebels begin spring drills March 31. Dempsey said: "The Rebels from last year's 9-3 team have been working out since the end of the season. Scrimmages will begin the first week of drills."

Dempsey's recruits will be transferred that Dempsey and his staff landed last week will participate in the drills. They include Mike Coleman, 6-11, Hobgood, back from Lawrence, Kan.; Tyrone Henry, a 6-11, Hillcliff back from Miami, Fla.; and Steve Freda, a 6-5, pound linebacker from Nassau, N.Y.
Matmen lose two weekend matches

By Jim Nelson
Staff Writer

There was good news and bad as the men's tennis team traveled to Missouri for dual meets.

The good news was that the Saluki 15-pounder Voni Vintz posted two victories to improve his record to 10-0.

The bad news was that the Salukis lost 15-4 to Indiana State and 6-4 to Cal Poly San Luis Obispo (SLO) in two of the Commodores' eight weekend matches.

SLO 9-1 and A&M 6-1.

Three days after the Commodores' win, Saluki tennis won 9-0 at the University of Illinois and 15-4 against SLO.

Saluki tennis won 15-4 at the University of Illinois and 15-4 against SLO.

In the feature bout of the SLO-Indiana match, Roam Smith defeated SLO's best player, Paul Hines, 2-6, 6-0, 6-3. Kansas finished second in the NCAA 14-5 round in both matches.

SLO 9-1 and A&M 6-1.

Against Indiana Friday, Greg Allen won the doubles and Vintz and Eric Jones won by default. The Salukis' singles were

Fang Yiu 5-2 at 11 pounds to earn two team points.

Vintz beat Mike Mausbacker 6-2 to score all of his points in the third period. Vintz earned a three-point upset, barely missing a shot.

Jones scored two reversals, a take-down and a three-point near fall in his 114 win against Jeff Gordon. Jones is 5-1.

Netters win two dual meets

By Steve Carson
Staff Writer

The men's tennis team won two of three matches over the weekend to move its record to 3-0 despite playing with just five players. SUI will meet Tech, 7-5, and lost 5-4 to Eastern Kentucky, who was playing all three meets shortened.

When the Salukis were about to leave for Richmond, Va., to compete against the four-team invitational, they found out that Mark High had an illness and wouldn't be able to make the trip. This forced the Salukis to forfeit their No. 6 singles and No. 3 doubles matches in every meet. This put extreme pressure on the rest of the team as it had to win five out of the remaining seven matches to win.

"The problem has been that we have to go, so much for the courts, that we can only afford to practice for 1 1/2 hours per day for three days a week," coach Dick Leckworth said. "We have a lot of meetings.

"The only way we can try to work in two junior college tennis players," said Leckworth, "is to have them in January but one has the flu and one has a hip injury.

The Kentucky meet was the closest match of the day. The Salukis won four of the six singles against the Bears, but one of those matches in doubles competition was won by the Bears over their opponents.

"The Bears played well, but we had the Lions beat," said Leckworth.

Jones and Vintz dominated their opponents, coach Lane Long said. "They made their opponents not want to play any longer.

"Overall I think we dominated the matches style. As a team we looked very good and wanted to get the job done more than we did."

Cal-Poly 6-0 and 9-0.

Against Indiana Friday, Greg Allen won the doubles and Vintz and Eric Jones won by default. The Salukis' singles were

Fang Yiu 5-2 at 11 pounds to earn two team points.

Vintz beat Mike Mausbacker 6-2 to score all of his points in the third period. Vintz earned a three-point upset, barely missing a shot.

Jones scored two reversals, a take-down and a three-point near fall in his 114 win against Jeff Gordon. Jones is 5-1.

"We are the best in the conference," coach Dick Leckworth said. "I believe we've met every team that we've ever met."

"I think we handled Cal-Poly's style better than we thought we would," Long said.

Long said the winners have to be at their best in the matches by learning from their mistakes.

"If we take it from a positive point of view then it can be worthwhile," Long said. "If you don't let the losses affect your confidence and react all then you'll be okay.

"Another factor in the Salukis' defeat was that four of its players were competing at a higher weight than normal. Gros and Page, who played in the doubles competition, regular Russell Raskin, who missed with an injury.

Long said when a wrestler is competing at a higher weight his muscle mass is compensated. He said a wrestler might be able to make more mistakes and not hurt at a lower weight. He added that a weight change isn't the only explanation, however.

"It really was the same problem. We've had all year—a lack of fundamentals and a lack of experience."

"You've got to have a constant effort.

"It's a natural situation."

Women cagers stopped in upset bid

by Bud Vanderslice
Sports Editor

The Kimsburg and Glen-Coe's Dancing Machine should have been there because there was a "Glow Shoe" atmosphere described from Saturday night. The Unknowns were presented with a 'suck and shoot' basketball team known as a "Suck Park Attack" by the Missouri Tigers.

In keeping with the spirit it looked as if the women cagers had tightened every movement of geeing Missouri right out of the contest when they led the 1930 ranked Tigers 21-18 at halftime. The celebration never materialized, however, as the women from Columbia earned a perfect score in the second half and held on to a 38-33 win over the Tigers.

Lioness intensity apparently record to 35-4 and it prevented the Sabrinas from making a clean sweep of their three-game weekend schedule. The women bombarded Eastern Illinois 66-48 Friday night at Du's Gym after facing Illinois 74-33 Thursday night at Champaign. The cagers now have a record of 8-0.

Popcorn and soft drinks were the refreshments being dispensed Saturday night. The SIU trains were doing a steady business in the lobby where at least five ballels were huddled by the fans. Scott said that Champaign as an effect on the team's fastness in their play as more than three or four minutes at a time.

The team as a whole was struck by another Illinois early in the second half when effective and defensive play started to be set in. The Sabrinas couldn't seem to do anything right in the first 10 minutes of the second half when Missouri entered their halftime deficit and raced to a 15-point lead before the Sabrinas staged a comeback that fell five points short.

Scott said her team would have won if it had played at its best. "good basketball" instead of 30.

Our play the first 10 minutes of the second half was pathetic," Scott moaned. "Our offense was just bad. We may have tried to force the game too much, but our perimeter passing was not good either. Overall we played well considering we were sick. But we really need to win the game.

One that did please Scott was that her team did not quit when it fell behind by 13 points. The Sabrinas went into a half-court zone press and forced the Tigers into turnovers that resulted in SIU baskets. Missouri was able to take the throwaway. However, as the Tigers cashed in those home mistakes late in the game to hold off the Sabrinas.

SIU made 15 field goals in the game compared to the 24 shots the Tigers converted 10 of 22 for three of the Sabrinas and three of four attempts.

Susan All, a 4-9 career, led SIU with 10 points while Julie

ANNOUNCEMENT OF UNDERGRADUATE ADVISORY JIT AND REGISTRATION APPOINTMENTS FOR SUMMER/FALL 1978.

ADVISMENT APPOINTMENTS - AGRICULTURE.
Will begin issuing appointments on Feb. 23 for Seniors. Feb. 24 for all other students.

BUSINESS & ADMINISTRATION
Will begin issuing appointments to first-term students on Feb. 27. Mass advisement for all continuing students begins March 13.

COMMUNICATIONS & FINE ARTS - Appointments for President's Scholars. Feb. 20. Will issue all other appointments Feb. 23.

EDUCATION
Appointments for Juniors and Seniors will be issued on Feb. 22; all others on Feb. 23.

ENGINEERING & TECHNOLOGY

Individual advisement appointments issued March 17.

GENERAL ACADEMIC PROGRAMS
Will begin issuing appointments on Feb. 24.

HUMAN RESOURCES
Fast track advisement begins March 13. Pick up info sheet in Hec 128 for details. Regular appointments will be issued Feb. 22. Admin. of Justice students should report to their advisement office for info.

LIBERAL ARTS
Will issue appointments Feb. 22 to Seniors and President's Scholars; all other students on Feb. 23.

SCIENCE
President's Scholars and student workers on Feb. 23. All others on Feb. 27. Graduating Seniors, see receptionist immediately.

TECHNICAL CAREERS, ASSOCIATE PROGRAMS - Advisement begins March 13.

TECHNICAL CAREERS, BACCALAUREATE PROGRAMS - Appointments issued beginning Feb. 27 at 908 South Wall.

REGISTRATION APPOINTMENTS - The Registration Center will begin issuing registration appointments for under-graduate students on Feb. 27. A registration appointment will be required for the first six weeks of advanced registration for Summer/Fall 1978.

ADVANCED REGISTRATION DATES -
Advanced Registration for Summer begins March 13 and ends May 12. Advance Registration for Fall occurs March 13 to May 12 and June 19 to Aug. 4.

Women's women's gymnastics team has been the best Saturday night all season, but was Penn State's Ann Carr who turned out to be the star of the show. Carr took first place in all four events to help her team in an impressive 145.60-140.65 victory over the Sabrinas.

Carr, a 1980 Olympian and 1977 AIAA all-around champion, used the Sabrinas' largest crowd (4,000) for a year's worth of technique and artistry in three different exercises on the balance beam. Beating these Sabrinas is not easy, as five Sabrinas were checked off by the three judges at the Sabrinas' season-high in score. "This was a pretty good performance, but I think the girls are about to panic," Scott said. "Next year we just need to get more confidence."
Saluki win paves way for tourney bye

By Ed Vandermeid Sports Editor

Horace Greeley, you were right all along and on behalf of the SIU basketball team, Coach Paul Lambert would like to thank you. The Salukis followed your advice to "Win West," last weekend and as a result, their fate in the Missouri Valley race is strictly in their hands.

The Salukis' 77-71 win over New Mexico State improved their Valley record to 1-0 and cleared the sweep of their two-game western road trip. It also put them in an enviable position. The scoreboard watching is over and there is no need to put an ear next to the radio to catch other conference scores.

It is quite simple. If the Salukis defeat Bradley and Creighton at home this week, they will draw the bye into the finals of the Valley Tournament for the second straight year. That possibility has Lambert singing the praises of his ball club.

"At the start of the season, we thought we would be a good team by the end of the year, but we never thought this team had made has outstanding," Lambert praised. "This has been a satisfying season from a coaching standpoint. We may not end up getting the bye again, but the fact that we can still control our own destiny is late in the year is something we'll all be proud of when it's all over."

Lambert must also have been proud of the way his team came from 13 behind against the Aggies. The Salukis were behind 13-29 with 8:25 left in the first half when Lambert called a timeout. In the next 1:17 the game was played mostly at the free-throw line, as the Salukis made eight charity tosses, six by Gary Wilson, to take a 29-25 lead.

The Aggies regained the lead at 32-29 but a basket by Wilson gave the Salukis a 30-29 lead they never relinquished. Wilson finished the game with 31 points, 19 coming in the first half on five of nine free throws. Lambert said the offensive strategy depended on the defensive setup of the Aggies.

"In the first half we felt we could get the ball to Gary," he said. "In the second half they played behind Gary and the defense sagged. We were tough to get him the ball in the second half, but that opened it up for Milton (Huggins), Wayne (Abrams) and the others."

Huggins took advantage of that by scoring 16 of his game-high 22 points in the second half. The 6-5 junior guard was 8-12 from the floor, including six of seven from the free-throw line. He made six of seven free throw attempts.

When the Aggies beat the Salukis 77-71, they were in the Arena, they literally controlled the backboards. The official statistics show Saturday night had New Mexico State ahead in rebounds 46-38, but Lambert was quick to point out that his team battled the Aggies even on the boards for the first half.

"Early in the game they were really hitting the boards hard," he noted. "I felt like they were going over our backs and in next meet started for the Salukis to be technical (1:24 left in the first half). In the second half we held our own." In recent years the Salukis have had a history of scoring more field goals than their opponents but losing games at the free-throw line. That trend was happily reversed Saturday. New Mexico State made 31 baskets to SIU's 26, but the Salukis cashed in on 27 of 34 free throw attempts while the Aggies made 10 of 13.

Huggins and Wilson received scoring help from Barry Smith, who both reached double figures with 13 and 18, respectively. The Aggies had five players in double figures, led by slab Jones and Notie Fate with 14 each. Guard Greg Webb added 10 points. The Aggies chances were not aided when Jones, who also had 16 rebounds foud out with 6:14 left in the game and his team behind 61-41.

"Score Time in the Valley" opens Thursday when the Salukis travel to the Armour Activity Center. The Braves are led by Roger Piegener, the nation's fourth- leading scorer. The scoring-leading Creighton Diplomas then come to town Saturday for a regionally televised shotout at 1:00 p.m. WING-T, Channel 4, will show the game on a tape-delay basis at 3:05 p.m.

Swimmers qualify medley relay team

by George Coakle Staff Writer

Bob Steele made a last-minute change in Saturday's dual swim meet against Cincinnati that led the Salukis to a 117-90 victory and a 2-0 record in the Valley. The Saluki coach inserted Ray Rosario into the 400-medley relay team in place of Dean Ahmad, who has been bothered by a sore leg.

After the 1-second win in that swimming event, the Salukis added a 73-40 victory over the Bearcats to run SUU's career mark against Cincy to 14-5.

"I couldn't believe it," Ahmad said. Other first-place finishes included the 100-yard backstroke, with a Saluki lead by 2.4 seconds; the 200-yard freestyle, with a Saluki lead by 1.7 seconds; and the 400-yard medley relay, with a Saluki lead by 3.6 seconds.

"I weakened our last relay, but Ray just blew them out," Ahmad said.

The Salukis placed first in every event except the 500-yard backstroke, the 50-yard freestyle and the 200-yard breaststroke. Bob Samples set a pool record in the 50-yard freestyle with a Saluki time of 21.8. His time was just 1.5 off the national record.

"Bob had been having trouble with his start, turn and stroke," Steele said, "but he swam a super race."

Samples seems to be peaking at this point in the season. Last year as a freshman, he got psyched up before meets and wound up in the water in most of the events.

Another guy who has taken ill since then, Steele said, is Ahmad. Steele has had to substitute Ahmad in the 100-yard breaststroke, 100-yard backstroke and 200-yard medley relay.

"It was a little tough to get him to the meet," Steele said. "In the last meet before the meet began and I changed the leadoff spot and put Ray (Rosario) in the leadoff," he said, "I think I made a mistake but the coaches didn't think so."

The Salukis are beginning training for the National Independent meet at the Recreation Building pool March 4.

The team will be a national qualifier if they can beat the record.

"In the next week we'll have to push very hard for the record," Steele was quoted saying. "Our chances will be better that the Salukis will qualify for NCAA meet."

Saluki Dan Muenz goes through his pummel horse routine during the team's victory over Penn State. Muenz set personal, career-high scores in all six events in leading the team to its NA, nest score of the year. (Staff photo by Marc Gelessam.)

Muenz leads gymnasts' win over Lions big throught

By Steve Cocon Staff Writer

Sophomore Dan Muenz's career high all-around total of 54.84 led the men's gymnastics team to a season-high score of 198.18 and a victory over Penn State Saturday night in the Arena.

The Salukis came up with 15 performances of 9.0 or better (on a 10.0 scale) and nearly every one of them as the Nittany Lions.

"I was really pleased and appreciated the crowd," Coach Bill Meade said of the 1,024 who showed up on the season's last competition. "They are what make the difference. We hope they enjoyed the meet!"

The men's gymnastics meet was extremely close, throughout and not until the final routine of the night did the Salukis come out on top. The meet began with the pummel horse routine and the Salukis scored 36.80. Another event which included the horizontal bar, rings and parallel bars.

It was 7-0 after the first three events, but the Salukis were down 9-7 after the floor routine. However, the Salukis came to lead after the last event when Muenz, who tied for first with a 9.5 on the horse vault, and captured the meet, which was decided on the floor exercise.

"Our rings score (19.15) was probably our highest in two or three years," Meade said.

Muenz came up with 36.80 in vaulting but Penn State countered with 37.30 to cut the Salukis' lead to 128-125. Excellent vaults by Dan Muenz, 19.41 Jeff (Bauter, 19.25) and Kevin Muenz (19.15) were not enough to keep the Salukis from losing ground in the event.

The Salukis took the meet away in the parallel bars event as Adams, Dan Muenz and Kevin Muenz took the top three places in the event.

"That did improve our rings and floor exercise. Kevin (Muenz) and Warren (Bauter) were both scoring under the weather and we weren't sure how well they would perform."

The Salukis won by a point in the horizontal bars event as Adams, Dan Muenz and Kevin Muenz took the top three places in the event.

"That did improve our rings and floor exercise. Kevin (Muenz) and Warren (Bauter) were both scoring under the weather and we weren't sure how well they would perform."

The Salukis scored a perfect 10.0 in the parallel bars event as Adams, Dan Muenz and Kevin Muenz took the top three places in the event. "That did improve our rings and floor exercise. Kevin (Muenz) and Warren (Bauter) were both scoring under the weather and we weren't sure how well they would perform."

The Salukis lost the meet in the parallel bars event as Adams, Dan Muenz and Kevin Muenz took the top three places in the event. "That did improve our rings and floor exercise. Kevin (Muenz) and Warren (Bauter) were both scoring under the weather and we weren't sure how well they would perform."
