**Menard Riot Kills 2 Guards**

CHESTER (AP)—Menard State Penitentiary officials said rioting prisoners gave up their last two hostages at 8:07 Tuesday night after an uprising that lasted almost four hours and claimed the lives of two guards.

Before surrendering, 30 prisoners had been barricaded in the prison kitchen after fatally killing two guards.

Two hundred prison guards and 100 state troopers and sheriff's deputies surrounded the prison kitchen, in which the rioters retreated with their hostages.

The prisoners allowed a doctor to give one injured hostage, guard Tom Gross, a blood transfusion through the bars. Later, they released the 52-year-old Gross because his condition appeared to be serious.

Prison officials said Lt. Lewis Paul and Lt. Arthur Kissro, both guard officers, were stabbed fatally in the riot that erupted during the dinner hour at the sprawling, 46-year-old prison near the Mississippi River in southern Illinois.

Most of the prison's other 2,470 inmates were locked in their cells. Prison uprising was said to be led by a prisoner who once escaped from Menard. "When it's over, I think we will find only five or six involved at the bottom of it," Warden Max Faye said.

Letters in the melee were John Russell, 49; George Wilson, 62, and Clinton Alstip, 39. They were taken to a Chester hospital.

The riot started with a commotion in the dining hall, Paul was stabbed in the heart almost immediately. Kissro was stabbed in the battle that ensued. Deidre Faye said some of the demands of the rioters included more food, longer recreation periods in the afternoon and improvements in the food and medical treatment.

Rose Randolph, long-time warden of Menard and a state director of public safety earlier this year, told reporters that she went to the prison and helped Faye negotiate with the prisoners.

**Student Week Jobs Are Open**

New Student Week Leader applications for employment are now available at the information desk of the University Center.

Applications must be submitted by Monday, Keith G. Phoenix, chairman of the winner orientation program said.

**Thanksgiving Vacation to Start at Noon**

**Holiday Schedule Set on Campus**

Thanksgiving vacation starts at noon today, and most SIU offices and buildings will go on a modified schedule.

All buildings except Morris Library will be closed Nov. 23 and 24, Thursday. However, others will be operated on a part-time schedule the rest of the week.

Civil Service offices at the university will maintain their regular schedule throughout the vacation, with the exception of Thursday, according to the Personnel Office.

The University Center will observe a normal schedule.

The building will be open until 5 p.m. today, closed all day Thursday, open from 9 a.m. to 3 p.m. Friday, from 9 a.m. to 7 p.m. Saturday and from 9 a.m. until 11 p.m. Sunday.

The Information desk will be open during the same periods.

The book store will be open until 5 p.m. today and closed until Monday.

The bowling alley will be open until 5 p.m. today, closed through Saturday, and open from 9 a.m. until 11 p.m. Sunday.

The Olympic Room will be open until 5 p.m. today, closed through Saturday, and open from 9 a.m. until 11 p.m. Sunday.

The Oasis will be open until 4 p.m. Monday through Thursday, from 3 to 10 p.m. Friday, closed Saturday and open from 11 a.m. to 10:45 p.m. Sunday. The Roman Room cafeteria will be open until 11 p.m. Monday, today, closed through Friday, open from 7 a.m. until 9 p.m. Saturday and open for lunch from 11 a.m. until 2 p.m. and from 4 to 7 p.m. Sunday.

Morris Library will be open until 5 p.m. today, open from 9 a.m. until 5 p.m. Tuesday and from 10 a.m. to 5 p.m. and 10 a.m. to 5 p.m. Sunday.

**Gus Bode**

Gus says Thanksgiving is the one day he doesn't mind getting the bird.

Power Shut-Off Set for Friday

There will be an interruption of electrical power Friday affecting some of the buildings on campus, according to John S. Rendleman, vice president for business affairs.

The interruption will begin at 7 a.m. Friday and continue for 15 hours so that three transformers can be replaced in Transformer Vault No. 3. The buildings which will be affected are Old Main, Shryock Auditorium, Parkinson Laboratory, Browne Auditorium, Allyn Building, Altgeld Hall, Women's Gym and Wheeler Hall.

Hamlet's '65 Soliloquy

To enroll or not to enroll: that is the question.

Whether 'tis nobler in the mind to suffer

The bullets and booby-traps of outraged Cong.

Or to protest against a sea of troubles,

And by talking end them. To registers to enroll;

Once more: and by paying our fees to say we end

The heart-ache, and the thousand natural shocks

That 18 1/2 to 23 year olds are heir to; 'tis a success

Devoutly to be wish'd. To enroll, to study;

To study: perchance to graduate: ay, there's the rub;

For after that deformation what quotas may come.

When we have taken off this transparent armor,

Must give us pause: there's the respect

That makes grad school of so long life;

For who would bear the red and blue marks of readers,

In loco parentis, the Registrar's contumely,

The pang of unauthorized love, the meal's delay,

The insolence of bicyclists, and the spurns of AMYETS,

When he himself might his quieter make

With a bare ballpoint? Who would these fardels bear.

Thus fear does make cowards of us all,

And thus theivy hue of learning

Stilted o'er with the pale cast of yellow,

And undertakings of great pit and number

With this regard their currents turn away

And lose the name of consensus. Soft you now!

The unfair Madame Butifully, in thy orisons

Be all our sins remember'd.
Mahler's Works Broadcast Slated for 8:30 p.m. Today

"The Composer" will present Gustav Mahler's "Das Lied von der Erde" and Symphony No. 4 in G major at 8:30 p.m. today over WSIU Radio.

Other programs:
2 p.m. How They Work: Henry W. Remander, architect.
2:15 p.m. Men and Molecules: A weekly summary from the world of science and medicine.

Ronald Centanni

Mayor Welcomes Student Delegate To City Council

Ronald P. Centanni, SIU's newly appointed city relations commissioner, was given an official welcome Monday night by the Carbondale City Council when he attended his first meeting as the student body representative.

Mayor D. Blaney Miller told Centanni, "I'm sure this is going to be a great help to both the City Council and the SIU student body. This should fill a gap between the students and the people of Carbondale."

Centanni's appointment resulted from a recent suggestion that SIU students be represented at the council meetings to foster better relationships between students and the city.

The suggestion was approved by both the City Council and the Carbondale Campus Senate. Centanni will represent the students at the council meetings and will report to the Campus Senate on council proceedings.

Centanni said that he welcomed any communications with SIU students concerning suggestions or problems which he believe should be presented to the City Council.

He also said he will continue to keep the Student Government Office informed on any student news.

Business Graduate Program Explained to Missouri Group

The Zeta Omicron chapter of the Alpha Kappa Psi, professional business fraternity, from Southeast Missouri State College visited the chapter at SIU Saturday to discuss Southern's graduate program in business.

Greet ing the visitors were Robert L. Holcomb, dean of the School of Business; Fremont A. Shull, chairman of the Department of Management; Paul M. Hoffman, chairman of the Department of Marketing; Michael P. Litka, assistant professor of management; and Don C. Friman and Gary L. Lindley, SIU chapter members.

Welcome to Missouri Group by Prof. B. Amin, dean of the College of Business; John M. Goodrich, assistant professor of management; and Gary L. Lindley, SIU chapter member.

Religious Group To Meet Today

The Board of Directors Christian Fellowship will meet at noon Monday in Room B of the Center of Excellence.

The James Reitz Study Club will meet at 8 p.m. in Room C of the University Center. The Splunksing Club will meet at 6:30 p.m. in Room D of the University Center.

The Student Government Elections Commission will meet at 9 p.m. in Room E of the University Center.

A free bike loan is available at the Student Union. The bike can be borrowed for the weekend.

The Student Union is open 8 a.m. to 11 p.m. Monday through Sunday.

BEINGS, OR NOTHINGNESS
a satire by thomas thorpe

Once upon a time there existed a mighty nation of sorcerers. They called their nation the Labyrinthian nation. The sorcerers were endowed with a power of mind far beyond anything which the common people had ever called their power Synapsis. With it, they could inflict or exert the size of a tennis ball or swell it to the size of a cow. They could do these things beyond their power. So at first, they caused no trouble to dwell among them.

Though the nation of sorcerers was mighty in power, it was weak in numbers. To correct this deficiency, they invited a tribe called Beings to join them. In return, the sorcerers promised to train the Beings in the use of Synapsis. From that time on, there was a vast migration of Beings into the Labyrinthian nation. Before the Beings had been nomadic and had never learned the art of herds. Because of this, they were slow in learning how to use their new powers. The sorcerers were displeased. The Beings, instead of providing the help they had depended on, became a source of dishonor to the sorcerers. It was not bad enough that they were slow to learn. They discovered that they wanted to make innovations in the standard methods of concerning the care and feeding of cattle.

And so the problem raged. From one end of the nation to the other, the Beings were a scourge to sorcerer. Some favored the Beings. Some favored the sorcerers. Others took a more moderate position. No matter how the sorcerers looked at it, Synapsis, no matter how they determined. They could agree on no common approach to handling the cattle of the Labyrinthian nation. Before the Beings had been invited, the Beings had not heard of the sorcerers. The Beings had just heard about the sorcerers, and the sorcerers had heard about the Beings. The Beings and sorcerers were on trial. The Beings were on trial.

They walked in on what the newspapers were calling a fifty-nine year old man, Charlie Moline, and asked to be released in the community. The police department had not heard of the Beings, and the Beings had not heard of the police department. The police department was overjoyed with the Beings, and the Beings was overjoyed with the police department. The sorcerers sent for the Grand Dragon. The Grand Dragon was a man who had been a police officer, and asked to be released in the community. The police department had not heard of the Beings, and the Beings had not heard of the police department.

The blame for Carbondale's police inefficiency is on the shoulders of the city government. The city administration is, from all appearances, trying to cover up the situation and they should be encouraged for doing so.

However, how well these processes move too slowly, the citizens must take the problem in their own hands. They must make every effort to provide for the community the minimum of safe standards. Hopefully they will try to provide more than the minimum. Carbondale, at the present time does not meet even the minimum.

There are three factors ever present in the Carbondale Police Department. It is to improve the present condition. The first of these in education. More and more communities are raising the educational requirements of their police departments. It would take Carbondale some time to reach the level of the Berkeley police department where all members have a B.A. or B.S., and more than half have master's degrees. A higher education is essential if the police are to deal with the increasing complex problems of administering a modern police department. Higher salaries will be necessary to attract better officers.

The second factor is that of facilities. What does Carbondale have to offer? Four police cars? What condition is the city, the city administration, the ILIAN presents an accurate picture. An SIU student, who spent some time in the jail described it as a "rat hole." Inadequate and filthy facilities certainly are not positive factors in trying to deter criminal or "ruff de corps." Let alone considerate treatment of prisoners. Better conditions should help to create a more conscious police department.

The third factor is public attention to the problem. Paying taxes, bringing in police for treatment to the eyes of a "public interest," is a support for the police department, and constant observation of police activities is a part of this attention. The public should no longer tolerate the type of police department that allows such conditions to exist. The one listed above. Tomorrow it may be you or your brother, sister, or your father who is arrested for intoxication. It may be your son who is arrested for intoxication. It may be your daughter who is arrested for intoxication. It may be your sister who is arrested.
In our society individual needs are linked to collective needs by society's law that the individual's income or ability to fill his own needs with the resources of society is affected to a large degree by the collective needs of society. An individual's ability to help fill the collective needs of society is affected to a large degree by the individual's education. Education also helps to meet the need for an educational system which allows people to follow their noses. Universities are presently set up in such a way that they meet the needs of society in an indirect way. The educational system is set up so that problems are not being solved, but that instead people are learning a defined mental skill.

Society also has a need for an educational system which allows people to follow their noses. The educational system is set up so that problems are not being solved, but that instead people are learning a defined mental skill. The educational system is set up so that problems are not being solved, but that instead people are learning a defined mental skill. The educational system is set up so that problems are not being solved, but that instead people are learning a defined mental skill. The educational system is set up so that problems are not being solved, but that instead people are learning a defined mental skill. The educational system is set up so that problems are not being solved, but that instead people are learning a defined mental skill.

The educational system does two things: it trains people to perform defined mental skills, and it labels them as able to perform these skills.

As a result it is possible to hire somebody who is thought to be able in a particular field in one way you would specify a test to fit a given bolt. The developing ability of computers to perform defined mental tasks means that defined collective needs will increasingly be filled by machines. A program has been developed at MIT which enables a computer to design the entire plumbing system for an office building if it is given the floor plan. This ability to make machines which can perform defined mental tasks in increasing individual mental productivity so much that the linkage between an individual's need to fill collective needs and his ability to fill his own needs will be modified. A revolution in the way to think of society is taking place to fill the collective needs of society. The necessity for an individual to perform defined mental tasks will decrease in proportion to the increase in our society's ability to make machines which can perform these tasks.

One of the university's basic functions has been to train people to perform defined mental tasks. This function should decrease in accordance with the decrease in society's need for people to perform defined mental tasks.

Other changes in the function will also be caused by the development of computers. I think the function will change primarily to problems only to the extent that they are one is able to solve problems in undefined solutions. Solving these problems will involve working on them as problems with their own inherent solutions, not to situations to which the questions of individual disciplines can be applied. It will also probably involve self-direction based on enjoyment and therefore sensitivity to the problem. This is in opposition to the educational direction most universities give now to the students enrolled in them.

Second, assuming learning is an enjoyable experience as students are told it is, people will probably want to spend some of their free time (time during constant learning) learning. This also implies a change for the educational system. The Latin root of the word "education" means to lead out. Perhaps the difference between education and learning in the education system being led is a decrease in the size of a system which provides an opportunity for learning. Society has a decreasing need for a system in which people must be led by the nose because it has a decreasing need for people to come out of school having learned a defined mental skill.

The rapid development of computers means a need for a learning system of this kind which is needed. The system would have to be designed so that it could either solve problems without being restricted by the different disciplines and contemporary problems is decreasing, yet the student who wants to get the social accreditation to be able to begin to deal with contemporary problems must first train for a long time in training in one of those disciplines. That training is often not only a waste of time, but also a perceptible increase in defined mental problems, without being restricted by the different disciplines' definitions of those problems. Unless society makes this kind of development there will be an increasing gap between people's backgrounds and the problems which will be difficult to deal with. The change in the educational system will essentially be a change in the role of the people in it. Students will no longer be in a comprehensive system, i.e., will no longer be under pressure from society to learn, but will be in a social one, i.e. will be learning because of their own desire for information. The question will no longer be what people ought to learn, or should learn, but what they want to learn.

The need for a learning system of this kind, which is needed. The system would have to be designed so that it could either solve problems without being restricted by the different disciplines and contemporary problems is decreasing, yet the student who wants to get the social accreditation to be able to begin to deal with contemporary problems must first train for a long time. Ho Chi Minh Squeezes Viet Peace Talk Hopes

TOYOKO (AP)—President Ho Chi Minh of North Viet Nam has reassessed a demand that all U.S. troops withdraw from South Viet Nam as a condition for settlement. He thus appeared to have destroyed all hopes that the Communists might move toward a compromise which could bring the conflict to a conference table. Ho Chi Minh, in a speech to the National Assembly last week, had renewed his demand that all U.S. troops withdraw from South Viet Nam.

New Weapons in Use

New Red Attacks Hit Viet Outposts

SAIGON, South Viet Nam (AP)—The town of Tuy An was attacked last night by the Viet Cong, in a battle that shifted attention from the central highlands to the central coast.

Aided by a U.S.-Navy bombardment and U.S. Air Force raids, Tuy An stood off attacks from a guerrilla regiment, estimated up to 2,000 men.

Communications were lost, however, with two government posts and three militia positions hit Monday night.

No Rhodesian Embargo Alone, Wilson Asserts

LONDON (AP)—Britain will impose an oil and trade embargo on Rhodesia unless white government join to make it effective, Prime Minister Harold Wilson declared Tuesday.

"We are not going to do it on our own," he told an uncomplimentary audience of the House of Commons.

Wilson spoke at a time of increasing violence in the continent colonies which brought its first fatality—the death Tuesday of an African demonstrator from police gunfire in Bulawayo. Africans discounted a mass walk-out from their jobs in industry and commerce.

Another African was badly wounded in Que Que.

Wilson's statement sparked angry responses in the House of Commons. At one point the prime minister did not finish his speech while the speaker cited Wilson's inapposite remarks.

Opposition Conservative legislators are strongly opposed to what they call punitive sanctions against Rhodesia, such as an oil embargo, and the leader Wilson's administration in giving in to foreign pressure by acting in favor of the embargo resolution in the United Nations Security Council.

Wilson heartedly denied this and said the British government does not regard the resolution as mandatory.

"The fact is that it was Wilson said, "the effectiveness of the measures be applied."

He said his government still considers that sanctions are a crisis to be primarily a British responsibility. But he warned that Britain must take action to avoid having "that responsibility recognized by the hands of others, by possibly by methods which would involve lasting damage for Rhodesia, and indeed far beyond Rhodesia."

"What is at stake here is the future of our multi-racial society. Why it is that our future at stake—has been at stake—in the possibility of our national isolation at the United Nations," he said.

Wilson alleged an outlawing of British troops to overthrow the Smith regime.

In Oslo, the Norwegian government announced it had banned all trade with Rhodesia.
Snowstorms Assault Europe; Wolf Packs Fall on Villages

LONDON (AP) — Snowstorms raged across Europe Monday night and early Tuesday, bringing in heavy snows of the year. One pack killed a mule while herding by a farmer blinded with a rifle to drive off another pack attacking his cattle.

A wave of cold air sweeping from the Balkans brought snow to Belgium, Denmark, France, Germany, the Netherlands and Switzerland.

Train, Ambulance, Helicopter Used To Transfer Ike to Walter Reed

WASHINGTON (AP) — President Eisenhower was back in good spirits — traveled by train, ambulance, helicopter and car — to Walter Reed Army Hospital Tuesday morning after suffering a heart attack he suffered two weeks ago.

Behind Ike's ambulance ride away from the train was a five-starred Army helicopter waiting to fly Eisenhower to the big hospital complex in northwest Washington.

There he was taken to the executive suite on the top floor of the three-story hospital. Mrs. Eisenhower spent the day with him.

"I'm feeling fine," Eisenhower said from his wheel chair and he smiled from the ambulance which took him to the waiting helicopter that whisked him off to the hospital.

An Eisenhower doctor said a six-hour operation to ease his heart's problems went well, and that he expected to recover.

Downtown Carbondale Hotel To Be Remodeled

CARBONDALE (AP) — The three-story Cray Plaza Hotel, a midtown landmark since 1874, is being sold and will be remodeled as an office building, its owners said.

The owner of the hotel has announced plans to sell the building, its owners said today.

Harold Wilson Scheduled For Meeting With Johnson

JOHNSON CITY, Tex. (AP) — President Johnson has added British Prime Minister Harold Wilson to his schedule of official visitors. Johnson and Wilson will meet Dec. 17 to discuss a wide range of world issues, the Texas White House announced Tuesday. They last met in Washington last Dec. 7. Wilson will visit Johnson on Feb. 23 to visit of West German Chancellor Ludwig Erhard.

The meeting of the two leaders has been announced, but they are expected to be either in Washington or at the LBH Ranch near here.

Johnson has put out the welcome mat for Prime Minister Harold Wilson of Britain and President Mohammed Ayub Khan of Pakistan, but no arrangements have yet been made for either of these leaders to come to the United States.

Johnson is understood to feel that the next move is up to Wilson.

Wilson will speak at the United Nations in New York the day before he meets with Johnson.

The meeting of Johnson and Wilson are expected to talk over inclusion of Britain in the Western Hemisphere Defense Treaty, in superintendents at the U.S. Military Academy at West Point, the present superintendent, Maj. Gen. James D. Lampert, 51, is being promoted to lieutenant general and assigned to the Pentagon as deputy assistant secretary for manpower, a post today.

Eisenhower and Ayub have continued to discuss Kashmir and the divided Himalayan state claimed by both nations and where India and Pakistan fought a war in September.

The United Nations then obtained a cease-fire.

Shastri said he had informed Ayub in response to a letter from the Soviet premier he received two days ago, having talks, Ayub wants to discuss Kashmir, the divided Himalayan state claimed by both nations and where India and Pakistan fought a war in September. The United Nations then obtained a cease-fire.

Bleak Job-Camp Holds Promise; Its Goal Set as Best in Nation

By John Epperheimer

The Breckinridge Job Corps camp, operated by SIU under contract to the federal Office of Economic Opportunity, at first presents a bleak and depressing sight to the visitor. Entering the main gate and driving up the entrance road, the visitor is struck by the lack of activity on the huge base. Acres of deserted barracks cover the ground, their paint peeling and their foundations crumbling. A few are painted and stand out from the rest. The Job Corpsmen, about 600 of them, live in these. Some office buildings have a coat of white paint and secretaries pop in and out of these, incongruous in the khaki setting.

The parking lots of the Army motor pool are dotted with weeds. The few cars used by the service station training building stand alone in one corner. The 600 Job Corps trainees walk in small groups across the huge camp, which housed 40,000 soldiers in World War II. In one corner of the camp, staff members play around the golf course located in the one well-kept corner of the grounds.

But if one looks closely there are many signs of real life at Breckinridge. In front of the mess hall a group of Corpsmen play ball with the small son of a staff member. Four trainees take turns jogging up and down one of the many roads on an old swayback horse. Corpsmen point with obvious pride to a mock auto parts shop they have organized and manage daily. Service station trainees run out eagerly to wait on customers at the site of the old Army motor pool.

Instructor Jim Schoch tells of five boys he took to the National Outboard Association world championships in New Orleans in October to serve as his pit crew. They won two third-places. Corpsmen point with obvious pride to a mock auto parts shop they have organized and manage daily. Service station trainees run out eagerly to wait on customers at the site of the old Army motor pool.

Instructor Jim Schoch tells of five boys he took to the National Outboard Association world championships in New Orleans in October to serve as his pit crew. They won two third-places.

Trainees stare at Congressman Kenneth J. Gray's garish attire and large cigar and whisper to each other about "the senator." A resident fellow in a dorm which is proclaimed by a banner as "The Cleanest Dorm on Street One" points proudly to the neatness of the quarters. Boys talk excitedly to newsmen about the camp newspaper and seek their advice.

Most often the boys ask what SIU is going to do about the camp and wonder what their future will be. The staff seems apprehensive and uncertain, even afraid.

He tells them the problem of school drop-outs, in the "greatest social evil" ever to confront this country and that he wants to make Breckinridge the best Job Corps camp in the country.

He announced that more trainees would be sent to the camp and promised more personal involvement from the vice presidents and himself.

He concludes by saying they are receiving one of the real rewards of life, a greater reward than most teachers receive.

Their applause shows they believe him, Breckinridge is not so lonely and desolate and lifeless now.

The Job Corps facility at Camp Breckinridge, was opened in June, 1965. The enrollment of the camp reached a total of 600 by Aug. 20, when a riot erupted, injuring 13 persons.

Frataternity Pledge Class Gives Children Thanksgiving Party

Twenty-four youngsters from Attucks Elementary School were guests at a pre-Thanksgiving dinner and party given Monday by the pledge class of Alpha Kappa Psi, professional business fraternity.

The children were served a turkey dinner, entertained by a series of Walt Disney movies with a package of candy as a going-home present by the pledges.

In addition to the children and pledges the dinner at the LBJ Steakhouse was attended by various actives and a number of the School Business faculty members, including Dean Robert Hill.

The party was planned and paid for by the pledges as a class project. And as a reward they have a note, written by one of the children, which reads: "Fen Brown likes everybody here at my table."

HOLIDAY FABLE

Original Italian Thanksgiving Perpetrated by Plymouth Paisans

This Thanksgiving when you and yours are crowded around the festive holiday board for a gout-busting feast with a 50-pound fowl, remember...

Remember how it was back in Massachusetts on that first day of Thanksgiving.

Remember be thankful that you live in the 20th century, an era of peace, tranquility and good will. Oh, yes.

Let us not be cynical. We have much to be thankful for: electricity, TV, running water, indoor plumbing, Ed Sullivan, TV dinners, automatic toothbrushes, ad infinitum.

These days it is no mean trick for a young housewife to whip up a festive holiday dinner in a matter of hours... or minutes if the freezer is well stocked.

But back in the days when the hardy Pilgrims had just gotten a foothold on this great continent things were tougher.

Uncle Bertram went out early, about 4 a.m., nice and nippy, to hunt up a feathered fowl for the dinner table. If he was lucky he bagged a fat wild turkey or a brace of partridges.

But that was just the beginning. The bird had to be plucked and gutted and baked in the outdoor oven or roostet on a spit over a fire. The fire was built by Momma Pilgrim and the kindling was rounded up by the playful Pilgrim urchins. All the trimmings that went with it were the fruit of arduous toil and care during the growing season and subsequent harvest.

But on the great day of Thanksgiving all the families pitched in to create a sumptuous dinner and they even invited some of the friendly redmen who were their neighbors.

Let us go back a few hundred years to the first celebration which took place after the first winter at Plymouth. Back to the simple, uncomplicated, noncommercial world of our forefathers as the Pilgrims prepared for the great feast.

We will sit in with the Gorgonzola family recently immigrated from Rome by way of Reutano and Cleopatra, as they prepare for the feast.

Arturo: Hey Angelina, we gonna stuff our bellies with feed those tree Indians your stupid bother invited us to eat with last Thanksgiving.

Arturo: You wrong, Angelina. We eat tocchino—we eat pizza.
SIU Varsity Defeats Freshmen 72-50
Displays 'Old Style' in Subduing Spirited Frosh

By Bob Retincke

It was last year all over again. Southern's varsity veterans showed the same good shooting to go along with sticky defense as they overran the freshman 72-50 on Monday night to catch a glimpse of what the coming season holds for area cage fans.

The crowd should have left delighted as the varsity displayed the same style of play that carried SIU to a 20-6 season last year and a second-place finish in the NCAA college division.

One of the most delighted was Southern's usually reserved coach, Jack Hartman, who said it was "exactly what we thought it would be." "I don't think the boys were too far off their usual ballgame. They looked good for this early in the season.

Hartman also praised the freshmen, who showed the fans they could play some pretty classy ball themselves.

"One of the things I'm hoping to have a ball club. They can run, jump, shoot, and they're good in the cornerball division," said the varsity coach who has guided Southern to five straight wins in eight games his first three years here.

As the game itself, Hartman said he thought it was good experience for both teams.

"There's no question that it was of value to both. The freshmen gave us a good workout, they were good, and we knew that before we played them," he pointed out.

Down in the varsity controlled the game from the opening tipoff. They jumped out to a 7-0 lead at the start, and the lead never came within five points the whole way.

The yearlings were, however, within striking distance even into the early stages of the second half.

Down in the Motor Griffin was high-point man for the frosh with 14 points. Following him was Jose de Oliveria of St. Louis with 10. Forward Leon Brown scored only three points.

Guard Dick Garrett also looked good in the freshman line-up.

Brown scored only three points but added five rebounds.

Garrett connected for six points from the field.

Center Chuck Bensom, a 6-4 native of Atlanta, Ga., was impressive at times even though playing most of the game in foul trouble.

The varsity both outshot and outscored the freshmen, hitting 30 of 66 from the field and 12 of 19 from the free throw line, and collected 31 rebounds. In comparison, the freshmen shot a cooler 14 of 53 from the field and eight of 20 from the charity line, with only 16 rebounds.

Both teams will now go back into practice for the coming season. The varsity opens Dec. 2 with Northeast Missouri, and the freshmen Dec. 10 with Paducah Junior College.

Ross E. Love, the lightning quick sparrup of Southern's defense, got the Saluki fans into the early stages of the game from the opening tip-off.

Boyd Love, with the ball near the start, and the ball near the start the whole way. The yearlings were, however, within striking distance even into the early stages of the second half.

Love, the lightning quick sparrup of Southern's defense, got the Saluki fans into the early stages of the game from the opening tip-off.

Stovall alternated with O'Neal at the pivot, drew "ouches" from the crowd with his rebounding, as he pulled down the game high of 10.

Griffin was high-point man for the frosh with 14 points and paced his team with six rebounds.

The Motor City frosh was impressive all around with his speed and poise. Right behind him was Creston Whitaker, a Jack­ sonville native, who hit for 10 points and had nine rebounds on the second half.

Forward Leon Brown and guard Dick Garrett also looked good in the freshman lineup. Brown scored only three points but added five rebounds.
