Fall semester schedule still in limbo

By Miguel Alba
Staff Writer

A decision concerning the University's fall break schedule is expected to be made in about a month, University President John C. Guyon said.

Guyon said the question at hand is whether or not to have a fall break, adding that there are good psychological and academic reasons in favor of having one.

Recalls of an Undergraduate Student Government referendum on the fall break issue show that students voted against two different fall break schedules, one developed by the administration and another proposed by the USG.

The administrative fall break schedule calls for the University to close down the Friday before the Halloween weekend and reopen the following Thursday. The USG proposal would have a week break after fall break.

Under both of these proposals, the Thanksgiving break would remain as scheduled.

The schedule for the upcoming fall 1989 semester would remain unchanged.

Guyon said the USG referendum results show that students voted against two particular alternatives, adding that there are many alternatives from which to choose.

Guyon, who supports eliminating the Halloween festivities, said scheduling a break over the Halloween weekend would act as a strong incentive against cheating.

Guyon said he will consult with all constituency groups to determine whether to make the fall break a regular posting or a discount on housing for those days the students are gone.

Hall speculated students may actually perceive the proposal of fall breaks as one of the added expenses in having one.

The USG has yet to adopt a stand on the fall break issue.

Housing turns on air a week earlier

By Lisa Miller
Staff Writer

Because of unseasonably high temperatures, University Housing will turn on the air conditioning in residence halls one week earlier than planned.

Thomas Guilldele, supervisor of residential custodial operations, said air conditioning will be "on full force everywhere in the residence halls by Wednesday of this week."

There is no set date each year to turn on the air conditioning. Guilldele said, "We try to set a date two weeks before beginning of each academic year to turn the air on. This year, it was May 11." Guilldele said the air conditioning gets turned on depending on when temperatures get high. "When the weather gets hot, we'll turn it on," he said.

The air conditioning is working completely in Thompson Point, Guilldele said. But, in Brugh Towers and University Park the system is not being inspected to make sure air flows cleanly, he said.

According to the report, 47 percent of the firms surveyed have a drug testing policy and 7 percent plan to initiate one in the next 18 months.

Thirty-nine percent test employees if they are under reasonable suspicion and 44 percent would re-test if a drug test was positive, the report said.

Six percent of the firms surveyed, drug testing is in

Employee drug testing becoming widely used

By Daniel Wallenburg
Staff Writer

Students leaving college could find drug testing by their employers more prevalent in the years to come, officials at the University Placement Center said.

Patricia Bassett, University Placement Center director, said the use of drug testing will increase the amount of drug testing by major employers. In that incident, the captain of the Exxon Valdez oil tanker is believed to have been under the influence of alcohol when his ship ran aground, spilling millions of gallons of oil.

Liabilities have grown so much that some firms can't afford not to test for drugs, Bassett said. Most of the Fortune 500 firms test employees for drugs, she said.

Mike Murray, Placement Center counselor for the College of Engineering and Technology, said most firms that test for drugs have contracts with the federal government or are dealing with the "public trust."

Utility companies were to have the public's trust, Bassett said. The people need to have faith in their lights, water and gas, Murray said.

Bassett said when students who have used drugs find out a firm has a drug-testing policy, they usually look for alter native employment.

911 system funding, location debated

By Richard Nunez
Staff Writer

Jackson County officials questioned the feasibility of a proposed 911 emergency telephone system at a meeting Tuesday at the Jackson County Courthouse.

Ad Hoc 911 committee members discussed matters of funding and location for the 911 system, which could be submitted for referendum in the November elections if the debate on the funding and practicality of the system is resolved.

David Conrad, committee chairman, said funding the system would be provided through Jackson County funds and a surcharge that would be placed on individual telephone bills.

Conrad said funding must be provided for a $9,274 Public Safety Answering Point (PSAP), a terminal to receive all emergency calls, and $149,608 for network and database, which includes computers and terminals, installation, training and salaries of the employees.

Hogan said the dispatchers will have to be "pretty bright" people to work at the center, and to require extensive training in dispatching the correct emergency departments and in discussing

Computer bug found at WSIU

By Megan Heuck
Staff Writer

A computer virus detected last week in the Macintosh computer system at WSO Broadcasting Service could threaten the programs of several other Macintosh systems within the University, electronic media director Matt MacCrimmon said.

MacCrimmon estimated about 79 percent of the computer disks at WSO Broadcasting Service were infected.

The virus is capable of infecting other Macintosh systems by lodging itself into a computer's memory bank from an infected disk and infecting a clean disk inserted into an infected computer.

Communist leaders resign; 'serious regrouping' occurs

MOSCOW (UPI) — Nearly one-third of the Soviet Communist Party Central Committee, including former President Andrei Gromyko, resigned Tuesday in a move considered a major political victory for Soviet leader Mikhail Gorbachev's drive for reform. "This is a serious regrouping of the forces of the party and in society as a whole which is dictated by the new tasks," Gorbachev said in a speech to delegates quoted by the official Tass news agency.

Earthquake strikes Mexico City, Acapulco

MEXICO CITY (UPI) — A strong earthquake rocked Mexico City and Acapulco Tuesday morning, cracking walls, breaking windows and sending panicked residents running into the streets. One man was reportedly killed and two people seriously hurt in Mexico City. The quake hit at 9: 29 a.m. and measured about 60 miles southwest of the capital and 40 miles east of the Pacific resort city of Acapulco, which is popular with American tourists.

It was felt in the southwestern Mexican states of Oaxaca, Guerrero and Puebla.

Transcripts show captain tried freeing tanker

VALDEZ, Alaska (UPI) — The captain of the Exxon Valdez tried to rock his tanker free for more than an hour despite gashes in the hull and oil spilling into the water, according to radio transcripts released Tuesday. "Captain (Joseph) Hazelwood reported his craft was turned up and in 50 degrees and he had no forward movement," according to the transcript.

Cheney presents defense budget to Congress

WASHINGTON (UPI) — Defense Secretary Dick Cheney brought the administration's proposed $115 billion cut in the defense budget to Congress Tuesday, seeking a reduction in the peace dividend by $18.6 billion and a 6% increase in base budgets.

"The budget request calls for more than an 8% reduction in the fiscal year 1992 defense budget, a reduction of $11 billion and a 6% increase in base budgets," Cheney, a former House member who took the job just over a month ago, was given high marks for candor from the House Armed Services Committee before, and he signaled his clear understanding that the budget proposal now is a subject to the whims of Congress, which may rearrange his cuts to protect pet projects.

Authorities threaten crackdown on protesters

BEIJING (UPI) — Authorities Tuesday warned college students protesting for the second week that continued protest would not be tolerated and threatened a crackdown to protect national stability. The warning came as students throughout the city boycotted classes for a second day and directed their campaign for democracy at average Chinese in street-corner appeals that prompted unusual displays of support and mounting donations from crowds of Beijing workers.

Soviet ambassador threatens rebel retaliation

KABUL, Afghanistan (UPI) — The Soviet Union will retaliate against the U.S.-armed Afghan rebels the next time they fire rockets at Moscow's embassy in Kabul, Soviet Ambassador Yuli Voronenkov warned Tuesday. "Our action is going to be swift and very decisive," he warned during a one-hour interview with U.S. News International in the Soviet Embassy five days after a rebel-fired rocket exploded near the administration building of the heavily fortified compound in western Kabul.

Call for more action leaves three Arabs dead

JERUSALEM (UPI) — Mashed assailants killed three Arabs with knives and axes this week after the clandestine leadership of the Palestinian uprising called for more action against suspected criminals and collaborators with Israeli, Palestinian sources said Tuesday. In the Israeli-occupied territories soldiers clashed Tuesday with Palestinians, killing one Arab and wounding at least 22, Palestinian sources said.

Moslems, Christians break no-fighting truce

BEIRUT, Lebanon (UPI) — A weeklong truce was shattered Tuesday when Moslem militiamen backed by Syrian gunners, exchanged artillery fire with Christian forces in and around Beirut, police said. The latest three-day cease-fire lasted only the United Nations called on the warring factions to end six weeks of bloodshed, and on the eve of a conference of Arab foreign ministers in Tunis, Tunisia, on solving the conflict.

Greek life on display this week

By Nora Bentley
Staff Writer

Chariot races, barrel throwing, and an eating contest are only a few of this year's Greek week events.

The week, entitled "Paint the Town Greek," began Sunday and will continue until Friday night with Fred's Barn Rock, an Interfraternity and Alpha Gamma Rho party.

Erika Landorf, Alpha Gamma Delta, said she has been going to the events because "I'm on the committee and I want to see it run smoothly."

"I like seeing the on-campus and the off-campus Greeks get together. I also think it will make more people want to join a house when they see the fun we really have," Landorf said.

A member of the Tau Kappa Epsilon, Smilo Chronopoulos, said he is there to help in his fraternity's participation, to win and to have a good time.

Kirsten Pristo, Delta Zeta, said, "It's a nice time to get all the Greeks together and compete for fun prizes."

Dennis Spies, Intergreek Council President and member of Alpha Gamma Rho, said, "The Greek week chairs are doing excellent." Chariot races for the week are Megha Johnson and Alex Elphing, both of Alpha Gamma Delta, and Kent Groh, Delta Xi.

Today's events are as follows: Men's softball tournament at 3 p.m.; women's powderpuff football tournament at 4 p.m., both at the Arena top fields; Sigma Kappa Ugly Man Contest at 7 p.m. in the greek row courtyard; and painting of the rocks by the Recreational Center at 8 p.m.

On Thursday, events start at 4 p.m. with the chariot race, barrel throw and eating contest, all at the fields by Brush Towers.

At 3:30 p.m. on Friday, also at the Brush Tower's fields, the obstace races, car stuff, tricycle race and the announcement of the greek god and goddess will take place.

The week will end Friday at Fred's Dance Barn with the Interfraternity and Alpha Gamma Rho Fred's Barn Rock from 8 p.m. to 1 a.m.

History of eliminating football at SIU-C

By David Gallianetti
Staff Writer

The Graduate and Professional Student Council will vote at its 7 p.m. meeting on a resolution to support the elimination of the football program.

Trudy Hale, GPSC president, said she was not exactly sure whether the council would support the resolution.

"I'm not 100 percent sure, but it is a possibility," Hale said. "If it is not passed, I'm sure it will erupt into some interesting dictate."

The council has had guest presentations by anthropology Professor Jerome Handler, who is campaigning for the elimination of football, and Athletics Director Jim Hart.

"The general attitude is athletics in general are treated better than the academic programs and there is a resentment to that," Hale said.

Handler's proposal has received some support from University groups.

In an April 7 School of Medicine faculty meeting, members voted 25-3 in favor of cutting the football program.

The Faculty Senate voted 8-1 in favor of passing the issue along to its executive committee.

Faculty Senate President Donald Paige said the executive committees would probably form a group to study other universities that have cut their football programs, others that have retained successful programs.

Crime problem can be solved by improving economics, goals

For several years we have heard about closing crime rates and prison overcrowding. Across the land one stage or community after another grapples with the issue of new encouraged prisons and jails, early release, etc.

Recently and employee of the FBI was quoted in a "Department of Corrections was . . ." SNF campus and shared his views on those problems. And what were his solutions? Expand prisons, put four prisoners in each cell, incarcerate only the property offenders, etc. (April 20 DE)

Public Radio also has dealt with the issue and recently mentioned the possibility of setting up prisons on military bases. So why not try to get at the root of our crime problem instead of thinking only in terms of more prisons?

The same DE article noted that prison populations have more than doubled across the country and declared that there is more than a cause to think that the Reagan years -- when all social programs have been cut, social services have been cut, the economy has gotten richer while the poor visibly dropped deeper into poverty.

These are the years during which we must change our foreign policy to one that is consistent with our domestic policy. By backing off of our conventional arms, by improving economics, and channeling it toward nonessential programs.

We must change our foreign policy again for the reason is that the Reagan years were a nuclear accident or exchange within a few years.

Small wonder that our young people found it hard to take themselves or their future seriously. Why study hard if all or bother about health, AIDS, responsibility, etc. if there may not be a future.

How can we solve our crime problem?

We must change our foreign policy to one that is consistent with our domestic policy. By backing off of our conventional arms, by improving economics, and channeling it toward nonessential programs. This letter is in regards to the proposed elimination of the football program at SIU-C, and more specifically, in regards to certain views expressed in the previous Football Program Standpoint.

In that article, Dean Stock notes that several academic programs are at the University, and that there are more cost money than they make and suggests that if the football program was to be eliminated on the basis of it being a big loser, then perhaps those programs should also be dropped. I sincerely hope that he was making that suggestion in jest, but if not, we are left with no other choice for this is a big loser.

We think money is money and ought to be treated as such. Even though it is supposed to be for wage earners, it also is right for shareholders and depositors, who usually are better off than the average worker whose earnings are subject to withholding.

Student Government proposed, might allow the Halloween event to be imposed a fall break during that week. The city could have the streets as they did when Halloween began.

-End of October also is a long time to go without a break. Students would benefit from a break co-better in the semester, such as after midterm, as USG has proposed.

DRUGS, from Page 1

cuded in the physical examinations without informing the ap-

praisal. The report said 1 percent of applicants refuse to take the drug test and 4 percent fail to pass administered drug tests.

Curt Clendenin, junior in chemistry, said he had a choice between working for a full time drug testing company and not doing anything for one that didn't, he would work for the one that tested.

Knowing that other employees were drug free would be a good testing, Clendenin said. "It's good to have on your conscience that you are working in a drug-free environment," he said.

VIRUS, from Page 1

according to MacCrimmon. The cycle of infecting clean disks then duplicates in other computer systems and continues.

"The strain attaches itself to any systems file and programs such as a virus and duplicates itself rapidly," he said. "It was a virus," he wrote. It takes up computer memory. It looks like it's in the computer's memory.

MacCrimmon said the disadvantage of this strain is that it is un-predictable.

"If you don't know what it's doing in the future," he said, "it can erase or scramble files, or it can do something harmless like flash messages on your screen."

A computer virus could range from two to three dozen lines of computer instruction, "code," to several hundred lines, MacCrimmon said, and "it does things that aren't user friendly - much like a human virus." A program used to combat increasing virus problems by searching for such six strains of the virus, was used in the Maristock system at WSU of its virus, MacCrimmon said.

The program, called DMS, scans the user the exact date, and type and version of virus infecting the system.

"The virus was first detected March 7," he said. "It stays undetected for over six months but remained dormant because it didn't have the opportunity to produce.

"There was a lot of virus activity in March," he added.

A program used to isolate the public domain library of the Macintosh Users Group of Southern Illinois, located in Carbondale.

BREAK, from Page 1

Officials expect the needed shock to the fall break during Halloween, exactly what Guyon wants to hear.

Trudy Hale, graduate and professional student, council president, said the results of a GISP referendum show graduate and professional students voting down a fall break. Hale expects the council to support a recommendation based on the referendum results.

Hale said she thinks this type of legislation to be proposed at the last USG meeting of the semester.

Trudy Hale, graduate and professional student, council president, said the results of a GISP referendum show graduate and professional students voting down a fall break. Hale expects the council to support a recommendation based on the referendum results.

"From what I'm hearing, we're not improving emergency dispatch, we're only extending it and slowing it down," Hogan said.

Pat Lestig, committee member, explained that the system will handle all emergency calls and be able to detect exactly where the call is coming from. Employees will be able to immediately

911, from Page 1

emergency and non-

emergency calls.

Hogan estimated the start-
time for training of the dispatchers to be at least $15,000. For Carbondale County will be required to hire at least five dispatches, Hogan said, the salary per year would be at least $10,000 annually.

"I don't think anyone in Jackson County is prepared to pay that," Hogan said.

Various emergency departments, such as police stations and fire stations, now handle emergency calls through individual telephone lines. Hogan and Everett

Air, from Page 1

"This warm spell has lasted for longer than I expected," said A pattern of above-

normal temperatures is expected to continue through April." Norman L. Gibbs, re-

frrigeration mechanic, said air conditioning should have been turned on in all campus buildings Monday.

Harrel S. Lerch, superintendent of building main-

tenance, said the cost to the university to run the air conditioning can't be determined at this time. "We'll have to wait and see how much cooling liquid we need before the costs can be calculated," he said.

Like the residence halls, the weather also determines when the air conditioning goes on in the classroom and office buildings, Lerch said.

Rushing, chief of the Car-

bondale Fire Department, questioned whether the proposed system would help dispatchers or relay them to the proper stations.

"From what I'm hearing, we're not improving emergency dispatch, we're only extending it and slowing it down," Hogan said.

Pat Lestig, committee member, explained that the system will handle all emergency calls and be able to detect exactly where the call is coming from. Employees will be able to immediately

dispatch the correct depart-

ments and relay further pertinent information, such as the name and address of the residents, Lestig said.

Lestig said the time the dispatcher receives the call to the time the emergency department receives the dispatch would be about 15 seconds.

"I don't think 15 seconds is too awful bad," Lestig said.

The proposed site for the PAP is in the Jackson County Jail, but Hogan suggested that a system be considered for the Carbondale Police station.

Accuracy Desk

The Daily Egyptian has established an accuracy desk. If readers feel they can 536-3311, extension 223 233 or 236.

Undergraduate students voted down both fall break proposals on the Undergraduate Student Gover-

nmental Council. The proposed information was provided by SIU Student Trustee Darrell Johnson and reported in Tuesday's Daily Egyptian.

Coal development office receives new director

By Jeanne Bickler
Staff Writer

Karen A. Witter, director of the Illinois Department of Energy and Natural Resources, announced Kim Underwood as the new head of the Office of Coal Development and Marketing. Underwood, who started Monday in the position, replaces John Mead, who recently became the director of the Coal Extraction and Utilization Research Center based at SIUC.

"Kim Underwood was chosen by the director from a number of candidates," Nancy Ebbert, ENR spokeswoman, said.

According to Ebbert, Underwood’s responsibilities include managing the Office of Coal Development and Marketing and working on the technology demonstration program, which uses state and private funds to demonstrate how to clean coal.

He also will manage research projects on removing sulfur and other pollutants from coal.

One of his major responsibilities is the marketing of Illinois coal to the rest of the United States and worldwide, Ebbert said. He will deal with state policies concerning coal and coal legislation.

"Under the leadership of Gov. Thompson, we will be working with the Illinois congressional delegation to explain our policy on acid rain legislation and protect the Illinois coal industry," Witter said.

More than $100 million has been committed through the Illinois Coal Development Board in past years in support of projects designed to burn coal more cleanly and efficiently. He has been credited by his former employee, Richard Sheekley, for developing training programs that have put Illinois ahead of other coal mining states, and for reorganizing the state’s mine rescue system and mine inspection system.

Kennedy adviser to lecture on political cycles in the U.S.

By Doug Toole
Staff Writer

Heartr M. Schlesinger Jr., political adviser, historian and writer, will deliver a free, public lecture at a tonight in Strzejek Auditorium.

Schlesinger, who talked on “Cycles of American History: The Kennedy Legacy” as part of the University Honor Program’s Charles D. Tenney Distinguished Lecture Series, will lecture from his recent book, “The Cycles of American History,” which supports the theory that America’s political philosophy runs in 30-year cycles. He said periods of interjection alternate with periods of extravagance and that America may be entering another era of public action, such as that seen during the John F. Kennedy administration.

Fredrick Williams, director of the Honors Program, said Schlesinger often quotes Frank Klineberg, emeritus professor of political science at SIU-C, in his book as one of the original proponents of cyclical politics.

Williams said this probably did not have any effect on Schlesinger’s decision to lecture in Carbondale.

“It’s just another happy accident of the small world we live in,” Williams said.

Schlesinger has written Pulitzer Prize-winning books on Andrew Jackson and John F. Kennedy, and served as an adviser during the Kennedy and Lyndon Johnson administrations.

Williams said Schlesinger was invited to lecture at the University both because of his wisdom and because of his connection with a politically important period in history.

“One can only speculate how many ideas, which became national policy, originally came from his mind,” Williams said.

Hospice to recognize fundraisers

By Tracy Sargeant
Staff Writer

Monetary awards will be presented to the top fundraisers of the “No Foolin’... We Care!” campaign of the Hospice of Southern Illinois.

The first prize of $300 will go to the Alpha Gamma Delta sorority for its participation in the Day event on April 2 at McAndrew Stadium.

The Alpha Tau Omega fraternity came in second with a pledge total of $500 dollars and will receive $200 for its efforts.

Patrick Jung, senior in advanced technical studies and spokesman for Alpha Tau Omega, said that the group planned to donate its prize money back to the Hospice of Southern Illinois.

“This is a vital program to the area and a worthwhile cause,” Jung said.

A $100 prize will go to the third place sorority of Tri Sigma for raising $20.

“We had a lot of people participate. I was happy about that,” Phyllis Koukol, chairwoman for Tri Sigma, said.

“It was a lot of fun,” she added.

Tri Sigma also will receive a pizza party, sponsored by Qatoos and the Johnson, Mitchell, Hughes Funeral Home in Herrin and Marion.

The Silver Star Trophies will be awarded to the top fundraisers of the University Honor Program’s Charles D. Tenney Distinguished Lecture Series.

Tough ozone control sought

WASHINGTON (UPI) — Environmentalists urged the Bush administration Tuesday to advocate tougher steps to protect Earth's ozone layer, saying the government has admitted current chemical controls are inadequate.

Four environmental groups cited new Environmental Protection Agency findings showing controls imposed on the use of ozone-depleting chlorofluorocarbons by the Montreal Protocol, an international treaty signed by 27 nations, will still allow a drastic worsening of the problem.

The groups said the administration must press the world community to impose new controls on two industrial chemicals — methyl chloroform and carbon tetrachloride — if the ozone layer is to be stabilized.

Chlorofluorocarbons, or CFCs, chemicals widely used as refrigerants, machinery cleaners and foam-blowing agents, have been viewed as the major cause of ozone depletion, contributing the largest share of ozone-depleting chlorine from human emissions to grow to three times higher than current levels over the next 50 years.

"According to the EPA data, restoration of stratospheric chlorine levels to the 1986 level will require not only a CFC phase-out, but also phase-outs of carbon tetrachloride and methyl chloroform coupled with stringent controls to ensure the ozone-depleting potential of CFC substitutes is minimal," the groups added in a report, "As the World Burns: Documenting America's Failure to Address the Ozone Crisis."

EPA officials confirmed their new findings Monday. However, the groups said new EPA computer analyses show that, "The Montreal Protocol agreement would allow stratospheric chlorine levels from human emissions in the next 56 years to increase to a level 4.5 times higher than the level that existed before the Antarctic ozone hole developed in the 1970s."

Increasingly pessimistic analyses of the ozone depletion problem recently prompted President George Bush and European leaders to call for toughening the Montreal Protocol to require a complete phase-out of CFCs by the end of the century. The treaty now allows for a 36 percent cut in CFC use by 1996.

But the environmental groups said "a CFC phase-out by itself would actually allow stratospheric levels of chlorine from human emissions to grow to three times higher (current levels) over the next 50 years." According to the EPA data, restoration of stratospheric chlorine levels to the 1986 level will require not only a CFC phase-out, but also phase-outs of carbon tetrachloride and methyl chloroform coupled with stringent controls to ensure the ozone-depleting potential of CFC substitutes is minimal," the groups added in a report, "As the World Burns: Documenting America's Failure to Address the Ozone Crisis."

EPA officials confirmed their new findings Monday.

Tough ozone control sought

WASHINGTON (UPI) — Environmentalists cite EPA report noting continued depletion

WASHINGTON (UPI) — Environmentalists urged the Bush administration Tuesday to advocate tougher steps to protect Earth's ozone layer, saying the government has admitted current chemical controls are inadequate.

Four environmental groups cited new Environmental Protection Agency findings showing controls imposed on the use of ozone-depleting chlorofluorocarbons by the Montreal Protocol, an international treaty signed by 27 nations, will still allow a drastic worsening of the problem.

The groups said the administration must press the world community to impose new controls on two industrial chemicals — methyl chloroform and carbon tetrachloride — if the ozone layer is to be stabilized.

Industry urged to focus on acid rain solutions

WASHINGTON (UPI) — Sen. Robert Byrd, D-W.Va., has urged coal, utility industry and state officials to put the acid rain debate behind them and focus on "constructive and efficient solutions" to the problem.

"Don't doubt it for a minute — new legislation is coming. I think it is inevitable. The Bush administration will push for new legislation, and there are undoubtedly majorities in both houses of Congress that will vote to enact acid rain legislation," Byrd told members of the Clean Coal Coalition Monday.

"It is time now to focus on constructive and efficient solutions to the acid rain problem and related environmental concerns," Byrd said.

Byrd also urged the coalition — formed to advance the demonstration of clean coal technologies — to respond strongly in the U.S. Department of Energy's upcoming request for proposals for the third round of Clean Coal Technology projects.

To date, 29 Clean Coal projects have been selected for funding under the federal program, including two in West Virginia.

Byrd encouraged the group to help negotiate an acid rain control bill that is reasonable and fair.

WASHINGTON (UP) — Industry urged to focus on acid rain solutions.
The Nerd makes hit on laughs

By Wayne Wallace
Entertainment Editor

"The Nerd" came highly recommended to me and now I get to return the favor. This screwball comedy, played by playwright Larry Shue's usual assortment of nuts, goes for the gut and hits its target sharp more often than it misses thanks to some very perceptive comic performances.

Theater Review

By Wayne Wallace

Jim Crowner, emeritus professor of special education, directs the community theatre effort the next two weekends at the Stage Company, 101 N. Washington St.

Crowner and his cast dish up some mildly anarchic moments, namely a hilarious version of everyone's favorite childhood game, "show and tell," and the climactic pig-pig moral ritual. Don't ask.

Yet these hilarious moments of absurd slapstick should have been offered more by a better handling of the plot and verbal humor, those more subtle moments of characterization defined and the plot is developed.

It's no great feat to make an audience laugh when your characters are wearing shopping bags on their heads. The most difficult scenes to direct in "The Nerd" seem to have been those obligatory moments of characterization which are vital to much of the humor misfires.

It's no great feat to make people laugh when your actors have shopping bags on their heads.

The cast generally plays it too broad, especially Mark Kopilash as Axel Hammond, the protagonist's best friend.

Granted, Hammond's role in the play is that of a Greek chorus, as he makes numerous wisecracks aside to the audience with setting humor that usually stings some of the characters.

Kopilash, however, delivers his lines in the same tone of voice, playing up the role, smart-assed side of his character. His delivery is very appropriate for some lines, but not so for others.

Many of his lines might come off funnier if they are underplayed rather than announced so brusquely. The character needs range, otherwise Hammond appears to be a one-dimensional loudmouth.

Kopilash could take lessons in subtlety from Bryan Smith, who plays architect Will Cubbert, the bewildered lead character.

Smith's performance is funniest whenever his harried character starts to lose control of the events in his life, especially as he handles his T-square as a weapon and contemplates the murder of "the Nerd" in an appropriately glib tone.

Rather than do a lot of screaming and overtacting during his character's predicament, Smith endows Cubbert with a sad sort of passiveness to the whole mess.

Eric Billingsley, left, junior in film and radio-TV, is Rick Steadman, the title character in the Stage Company production of "The Nerd." Kopilash, right, sophomore in speech communication, is one of the nerd's hapless victims.

By Eric Billingsley, in the play's single funniest performance, is the monstrous title character that comes to Terre Haute, Ind., to visit army-buddy Cubbert, whom Steadman snatched from death on a Vietnam battlefield.

Since Cubbert feels he owes Steadman his life, the young architect cannot bear to throw the ominous visitor out on his ear, which is exactly what he longs to do.

Most of the play's comic situations revolve around the outrageous attempts made by Cubbert and his friends to get rid of this nerd, who concludes each day by performing the national anthem on the ambulance.

Billingsley's performance is frighteningly real, the kind of house guest everyone dreads. How convincing is Billingsley? You want to throttle him halfway through the second act.

Micki Ruting, fresh from appearing in "Thirty," a one-act play performed at IU-C's Lab Theater, takes the stage for another wonderful performance in "The Nerd" as Tanny McGinnis, Cubbert's girlfriend.

Aside from young Howard Thomas' unconvincing performance as a screaming, spoiled brat, there are no major acting problems with the rest of the cast.

Grover Leech -- that's an actor, not a character -- is forceful as Cubbert's hardnosed boss, and Pat Coulson is funny as Leech's wife, a picture-perfect teacher on the verge of a nervous breakdown.

Another of the production's flaws is Crowner's slow pacing in the inauspicious and long pig-pig god scene.

The Cellar's final show to be Midas humor

By Kathleen Delb
Staff Writer

John Midas, the "Midas touch of comedy," will give the Comedy Cellar's last performance of the season at 9 tonight in the Student Center Big Muddy Room.

Midas, a 10-year veteran of stand-up, said he has quails about the future of quality comedy.

"Comedy is a boom industry right now. That means it's uncovering a lot of funny people, but also the level of mediocrity has risen. More comedians can make money just being OK. When I started, people were doing it because they really wanted to," Midas said.

Midas said he has been doing comedy almost all his life. "I was funny in grade school. When comedy clubs were getting started, I started going," he said.

Midas began his career at his high school's annual talent show, and went on to try his luck at Chicago nightclubs while still a senior. "When I started, there were about 12 clubs in the whole country. It would be a lot easier to make a living right away. I was doing stand-up for years before I made any money," he said.

Midas is from the Chicago area and does not recognize his humor, he said.

"I do probably have a Chicago style. In L.A., the comedians are washed and laidback. In New York, they are a little sarcastic. Chicago is pretty straightforward," Midas said.

Midas said he plays mostly clubs, but performs at colleges as often as he can. He once attended a junior college for five weeks, but it took up too much time, he said.

"I was working at Jewel and performing at night. Jewel paid me well, and I wasn't going to give up comedy for college," Midas said.

Midas said it took him some time to get rid of the "New Wave" image.

... Back to the Nerd."
One Last Pop Quiz

Q. What's the difference between a PS/2 bought before graduation and a PS/2 bought after?

A. A great student discount.

Here's one quiz you'll definitely want to pass. Because buying an IBM* Personal System/2® before you graduate means saving a lot of money. And saving money is a good start for your future.

Another good start is the IBM PS/2.® It can help you write and organize your personal notes and letters, produce high-quality graphics to make all your work look sharper, and lots more. And there's a good chance that IBM will be the computer you'll work with in your career.

So get an A on this quiz, and you'll get an IBM PS/2 for less.

Contact the Technical Support Center in the basement of Wham at 453-6283 for discounts greater than 40% on selected PS/2's.
CIVIL SERVICE Bargaining Organization will have a membership meeting at noon today in the Student Center Illinois Room.

Photo certification program to begin

By Marylin Ridgway
Student Writer

A 20-hour certification program has been scheduled to begin on May 16 as part of the photographic production technology program in the College of Technical Education for those who want to be up-to-date in the latest photographic developing techniques, according to John White, director of SIU-C Photo Service.

Student will be trained on state-of-the-art equipment in the photography lab products.

North American Corp. the world's largest manufacturer of professional lab equipment, has donated new mini-lab system to the University, White said.
The photographic development equipment has been installed at Photographic Services at 306 East Pearl St.

Graduates of the workshop will work for Technicians in the Laboratory Operator Technical Training Support Program better known as LOTTs.

White, who also is coordinator of Photo Production Technology at SIU-C, said, "The LOTTS certification program will provide photographers with training in mini-lab technology."

Only 25 students are admitted to the photo production production each year, and the mini-lab program will teach production operations, quality control and maintenance of the new laboratory equipment.

The Illinois State Police Crime Laboratory has committed to use the program as has Osco Drugs and CPI Laboratories.

CPI owns the world's largest photographic mini-lab processing centers.

Further, the workshops are $100 per student. The program is partially underwritten by Eastman Kodal. The photography industry donates between $5,000,000 and $10,000 worth of equipment per year to SIU-C, according to photography department instructor Jerry Courvoisier.

"Other manufacturers want to donate more equipment, but we don't have room for it," Courvoisier said.

Photography is taught in 1989 school year in North America, according to White, but only six are accredited by the Society of Photofinishing Engineers and Photo Marketing Association.

"Other programs on campus, photo production technology gets more grants from industry," White said.

"The industry wants students to learn basic skills in a mini-lab so they will continue to use them after graduation and when they enter the photography business," White added.

Graduates of this program earn associate degrees in photographic production technology from the College of Technical Education and typically receive five to seven job offers upon graduation.

Faculty Senate positions taken in vote

By Jeannie Bickler
Staff Writer

Donald D. Paige was unanimously voted faculty Senate president for the 1989-90 school year. Paige was voted the new vice president at Tuesday's meeting.

Cheryl Hanley-Maxwell will be the new secretary.

These members have recently been elected to serve:

-wither one or three year terms.

The one-year term members are: David S. Clarke Jr., Morten全景Doshandshoos, Phillip V. Davis, Walter C. Hennon, James S. Leming and Harris E. Rubin.

Under new business at the meeting, Vice President for Academic Affairs and Planning, Benjamin A. Shephard, was named director-coordinator for the Back American Studies program and possibly some faculty members will visit factories and students before the end of the semester.

Shepherd asked for the senate to feel free to call him about the candidates.

Advice To The Drug Worn

Dr. Buzz's

Dr. Buzz: People in my residence hall are starting to talk about "Meth" or "Crack, what is it?"

Crack is a method of smoking cigarettes. The drug can be bought with or without a prescription. The drug is mixed with a grain of coffee, and this makes the drug very potent for a very short period of time.

If you are a drug user, you may suffer from hallucinations, delusions, paranoia, and amnesia. You may also suffer from depression, anxiety, and sleep disorders.

If you are a drug user, you may suffer from an increase in heart rate, blood pressure, and body temperature.

If you are a drug user, you may suffer from an increase in blood pressure, and body temperature.

If you are a drug user, you may suffer from an increase in heart rate, blood pressure, and body temperature.

Film about divorce funny, sentimental

Remarriage shown through eyes of widow, divorcée

By Kathleen Orallo

Most divorce films are about the divorce. "See You in the Morning" is about remarriage.

It is sentimental, not surprising, but its humor saves it from sappism. Jeff Bridges plays a divorced psychiatrist who falls in love with a widow, played by Kie Griffin. Parthi Pawar plays Bridges' ex-wife. Any film about a divorced man and a widow giving love a second try is expected to be emotional. Yet, the film is saved from gooby maudlinness by a heavy dose of situational humor.

For example, Bridges surprises Krieger by dressing himself like a statue of Cupid, complete with white body paint, and standing in a niche in a wall of Krieger's house. The most humorous part of the film is when Krieger's kids come home early and call the police because they cannot find Mom and Dad. Mom and Dad are making love in the bedroom closet.

Linda Lavin, who plays the mutual friend who brings Krieger and Bridges together, has most of the few remaining moments in the film. Her consciousness-sharing comments about her husband's sperm count are a little silly. Her character is rather obnoxious.

She makes remarks that are supposed to be witty, like "Sometimes I think all that terrific male equipment just hangs there by a thread."

Bridges one main fault in this film is that he has none. Lavin introduces Krieger to Bridges by telling her he is a jerk, but that is never shown in the film. Bridges is an understanding husband and stepfather.

Bridges knows Krieger's kids better than she does. When Cathy, played by Dyne Barrymore, shoplifts, we

knows she is rebelling against being treated like a kid. Maybe Bridges has been remarkable insights because he is a psychiatrist. His understanding and perception seem too perfect for a realistic novice stepdad.

Lukas Haas, who has made a strong juvenile career playing sensitive children in "Lild" and "The Lady in White," is once again the vulnerable little boy. It is not exactly a stretch for him, but he does a fine job, as do the other actors.

The only problems with this film are minor ones. Humor, heart-warming situations and dialogue in this film well worth seeing.

**Calvin and Hobbes**

When is 9:10 Iggy Hobbes doing this?

Even after time people.

This would be a lot worse than if Hobbes was here. I only believe we left him at home.

I have met one. What is he called to eat? He doesn’t seem to want any food out, and well, let’s get him at home.

I think I’ll let him go. It would be starting.

Baseball commissioner doing best in Rose case

CINCINNATI (SHNS) — Consider this scenario: A former baseball commissioner A. Bartlett Giamatti is questioning Ron Peters, who used to be Reds manager Pete Rose. Peters, who never denies much, maybe. Peters doesn't want to be the guy responsible for Rose being suspended. Peters believes maybe. Maybe Peters simply does not feel competent to even see in the case of Giamatti's gumshoes. Maybe Peters wants to know what's in for it. And Peters also offers Peters offers Peter's type of incriminating evidence.

But what can be offered? Giamatti says he'll write a letter to Peters, explaining his court case explaining how cooperation with the commissioner in baseball's investigation of Rose.

Why not? What does Giamatti have to lose? The judge should get the letter away, anyway, for what does baseball's investigation of Rose have to do with Peters' court case? This is not part of some calculated bargain in which Peters' charges are reduced or dropped because he's testifying against Rose in another legal matter. (Which, by the way, is not unusual.) This is baseball, for crying out loud — the Cincinnati Reds, not L.A. Law.

Naturally, Giamatti will ask that the letter not be published until the commissioner's investigation is complete, for who needs to know about this, anyway? There will always be those who will misinterpret Giamatti's actions and see him as meddling where he doesn't belong, as going beyond his jurisdiction to an accused criminal. There will be those who will misinterpret Giamatti's desire to throw his credibility and will suggest that he be resign his jurisdiction over the Rose investigation.

Isn't such a scenario possible? Isn't it likely? In fact, it is, the most logical explanation to the letter sent by Giamatti. This is not a stupid man. He does not want to put himself above the law, only uphold the orders of his sport — and that means finding out all he can about the antics of Peter Edward Rose. That the letter has gone public should not be a big deal. That the judge, Carl B. Rubin, should be "somewhat disturbed" over the letter is a little issue. That Rose's attorney, Reuben Katz, should suggest Giamatti divorce himself from the Rose case should not surprise. That we should be concerned about his ability to render a fair and unbiased judgment is unnecessary and completely unfounded.

Giamatti and former commissioner Peter Ueberroth a little letter for more evidence of wrongdoing before acting. It shows that a better sense of justice prevails over today's game, that baseball's autonomy has adopted some of society's standards. Granted, the game is temporarily soiled by the bold and ugly wait for a verdict, but baseball is a Scotchgard product. When this is over, the sport will carry on — if not good as new, at least improved.

Still, the wait is excruciating, every day and every story and every rumor dissected like an earthworm in biology class. Conclusion jumping has become the latest rage. Some are unwilling to match Giamatti's patience. So, now they twist the truth, and they lash out at him. They see Giamatti as Black Bart and Rose as The White Knight because of a meaningless letter that might have helped uncover the truth about Rose.

Giamatti is not the villain, the hero. Again. He demonstrated foresight and leadership in suspending Rose for 30 days last year after the manager twice showed up late to games. Pauline. Good. Quick and strict. Giamatti proved that he would not allow even the legendary Rose to push around the law of the game. His patience in ensuring that the same Rose is treated fairly is equally exemplary.

Giamatti could make a name for himself simply by suspending Rose for his associations and then completing his investigation of Rose. Instead, Giamatti is continuing to make a good name for himself in his quest to find the truth.

Listen, Bart Giamatti hasn't brought all this attention upon Pete Rose. Pete Rose did it himself. As evidenced with the reports and allegations, Rose was an investigation waiting to happen. Nobody wants to believe the performances, but how credible is Rose when he purposely lies about winning a Fitz Six? Does Katz really think there's a vendetta, or is he trying to cover Rose's butt?

All we want is the truth. Same with Bart Giamatti. Not a bad price for a meaningless letter, wouldn't you say?

Jackson finding life after baseball difficult since retirement from pros

By Marty York

More than 18 months since his final at-bat in the major leagues, a single middle-aged against the Chicago White Sox — Reggie Jackson still keeps trying to hang it up for baseball on a daily basis. "I listen to games on the radio, I imagine being up there in front to it," Reggie said. "I enjoy listening to games more than going to them. I just can't bring myself to go to the ballpark anymore. I just don't feel welcome here."

Jackson is Oakland. And you know who Reggie is because he was one of the few athletes in their lifetime who so renowned, so charismatic and, yes, so good, that a surname for identification became superfluous. If you really felt Reggie was for you to ask: Why could you always address him with the singular Reggie? And so it is more than a trifle sad that baseball's marquee name of the '70s and '80s cannot even find a home in the minor leagues. And it's more than a trifle disconcerting that Reggie is an ex-pensioned from the front office and the coaching staffs of their clubs.

It's downright shameful. This isn't just another somebody-done-something-wrong song. This is about Reggie Jackson. And if you're not perusing the bios of every day and every story and every rumor dissected like an earthworm in biology class. Conclusion jumping has become the latest rage. Some are unwilling to match Giamatti's patience. So, now they twist the truth, and they lash out at him. They see Giamatti as Black Bart and Rose as The White Knight because of a meaningless letter that might have helped uncover the truth about Rose.

future. I don’t think anyone outside can know how difficult a financial situation the athletic department is in. “There were a couple people who were very much in favor of eliminating football completely — thought all programs seem would be solved. As you can see there was no recommendation to do that!”

Cherry said dropping football would place a financial burden on men’s basketball to support the remainder of the athletics department. He also said “funding raising could go down because football fans would no longer contribute to the athletics department and justification of the $30 student athletic fee could become an issue.

Despite an initial shock if the programs were cut, Allen said eliminating football is what the department needs to survive. “The budget crisis requires some kind of drastic action, and the only one that can go is football,” Allen said. “That is the one major sport where the potential for support is not in this region.”

Allen said the basketball program could carry the burden if it accompanied cutting football. “They (the athletics department) aren’t facing reality it seems to me,” Allen said. “If we had a football program that could compete at their level, then it would be OK. We do have a basketball program that can compete at their level. They almost did this year.”

Don Boydston, athletics director from 1957-72 and health education chairperson in 1989, said in a written statement found in the report that continual financing of football was foolish. “The problem is that there has been a movement for the last eight years to make the football program at SIU-C something it can never be — a gigantic revenue sport that will be some kind of athletic Messiah able to ‘save’ from a financial standpoint, the men’s and women’s programs at SIU-C.,”

Boydston said he sticks behind his now 9-year-old comments, saying he was only doing what the commission asked him to do.

“The budget crisis requires some kind of drastic action, and the only one that can go is football.” — Howard Allen

“Football is my favorite sport,” Boydston said. “However, when they asked me my opinion, I had to give my honest opinion and that was football was hurting the total program. “I support and back my statement completely, but that doesn’t mean I go on record supporting cutting football now. If he supported Handler’s argument or if he wouldn’t support cutting football now, Boydston declined comment.”

Boydston said the elimination of several athletic programs that in the 1980s was something he feared when he wrote his opinion.

“I feel more strongly in 1989,” Boydston said. “I saw a number of things happen that I thought would happen. “The point is, if you’re a pragmatist and look at the situation of what has happened over the last nine years, and what will happen before the year 2000 if football is relied on I do not see a totally bright future for the athletics department.”

Seymour Bryson, assistant to the president in charge of Affirmative Action and a commission member, said the conversation surrounding football was not so much of eliminating the sport.

“It was more structural,” Bryson said. “Where should the program be located. I don’t think it was any of those holy-deba-speaking issues.”

A part of Handler’s overall argument includes a social improvement portion where he says football at SIU-C advances “racial inequity and views of African-Americans in non-leadership roles.”

Bryson said the argument does not do much for Handler’s reputation in dealing with minority affairs.

“I think Dr. Handler has a good track record in being sensitive to minority issues,” Bryson said. “I don’t think that statement will strengthen his reputation in that area. That is one of those value arguments. “It seems he is trying to quantify its value, which seems to me very difficult if not impossible to do. In my opinion, it is worth pursuing, if you are truly concerned about the status of blacks why restrict it just to football?”
By Troy Taylor
Staff Writer

Missouri pitcher Mike Murco was four outs away from a no-hitter. SIU-C's Kurt Endebrock broke the freshman righthander's spell with a sixth-inning single.

Even so, Murco did not let the base hit faze him, completing the full seven innings for the 7-1 one-hit victory in the first game of Tuesday's doubleheader at Abe Martin.

"The guys on the team were rapping me (about the no-hit bid) from about the third inning on," Murco said. "I was just hitting all my spots. I thought I had everything today."

The Missouri defense was flawless in backing up Murco, who recorded only one strikeout.

"I was surprised to get seven innings out of him," Missouri coach Gene McArdor said. "He threw well early in the season in long relief and then had some tough times. I'm pleased to see him bounce back."

In the preseason, Murco was not even looked at as a starter. But at 3-0, he has a victory for each of his starting appearances.

The Salukis went through two pitchers - Ryns McWilliams and Dale Meyer - before Saluki coach Itchy Jones put reserve first baseman Mike Kirkpatrick on the mound in the fourth.

Kirkpatrick went the rest of the way, getting the win and the only two unearned runs on four hits. McWilliams (4-2) got the loss.

Missouri right fielder Tim Hawkins was relentless on all Saluki pitchers. He went 4-for-4, including a home run, and had four RBIs.

**Olympic Committee hoping drug rule catches on**

BARCELONA, Spain (UPI) - The International Olympic Committee Tuesday approved an anti-drug manifesto it hopes will become universally accepted.

The International Agreement on Doping is likely to receive the full backing of the International Summer Sports Federations at Thursday's joint meeting with the IOC Executive Board.

Prince Alexandre de Merode, Belgian president of the IOC Medical Commission, has been a longtime advocate of a unified policy on drug abuse in sports.

Worldwide interest has been triggered by Canadian sprinter Ben Johnson's disqualification at the Seoul Olympics and the government inquiry being held in Toronto.

"I believe some basic principles unifying all procedures and rules are necessary," the prince said Tuesday.

"We must have a unified list of banned drugs, a unified policy for testing and a unified stance in the fight against trafficking in drugs. It must be the same with sanctions against offenders."

De Merode was optimistic of some headway from the international federations.

"They understand the need for unification," he said. "Now it is time to have it written on paper."

Also included in the agreement is a provision for testing athletes outside their competitions. De Merode said the authorities accredited by the IOC to conduct the tests.
Jay Edwards pleads not guilty to battery charge

BLOOMINGTON, Ind. (UPI) — Jay Edwards, an All-American basketball player who helped Indiana to the Big Ten basketball title, pleaded innocent Tuesday to two misdemeanor battery charges that could put him behind bars for up to a year.

Edwards, who quit school earlier this month, appeared in court to answer charges of battery and disorderly conduct filed by two women.

The incident took place at a party Saturday night at Jackson Heights Apartments, over the Indiana University-Bloomington campus. The incident involved an alleged minor altercation. According to law enforcement, Edwards, who said he did not know Irish, allegedly threatened two women with a beer bottle.

Edwards said he was slapped across his face by one woman and then punched at least once by another.

The incident was reported to police by one of the women.

The problem would be accepted by your own pleasure and the police were investigating.

Edwards, who said he did not know Irish, was arrested and charged with battery and disorderly conduct.

Edwards said he was slapped across his face by one woman and then punched at least once by another.

The incident involved an alleged minor altercation. According to law enforcement, Edwards, who said he did not know Irish, allegedly threatened two women with a beer bottle.

Edwards was charged with battery and disorderly conduct.

Edwards quit school earlier this month, saying he was being threatened by threats that drugs would be planted on him and the police notified. He had returned home to Marion but returned to the campus for the weekend celebration.

Edwards was named to the UPI first-team All-America squad for the season for his heroics with the Hoosiers. He sank three critical last-second baskets to secure triumphs for coach Bob Knight's club. Edwards was reinstated after undergoing drug rehabilitation therapy. His scholarship, revoked for poor academic performance by Knight over the summer, was reinstated once Edwards returned and passed the drug treatment center.

Marion High School won three Indiana state high school titles with Edwards scoring the squad. He and Jones were Indiana's top recruits in 1987.

Edwards was named the Big Ten Freshman of the Year in his first season at Bloomington, leading the conference in free throw and three-point shooting percentages.

United Press International

The merchandising of college athletes grows grubbier.

Bill Frieder's contract to coach Arizona State's basketball team included incidences of sexual harassment and academic misconduct.

Educators and academic results of this behavior have been documented.

Frieder can earn four times more for NIL deals and get away with it by enforcing player rules if each makes Phi Beta Kappa.

South Alabama has put a $5,000 value on star forward Gabriel Estaba, who transferred from a junior college and helped lead his team to the NCAA Tournament, where they earned more than $500,000.

Estaba has been ruled ineligible by the NCAA for further play, but South Alabama is offering $5,000 in information that can help Estaba win an appeal. The appeal involves the outside endorsements of NCAA.counts.

Georgia Tech is trying to sell its athletic contests to sponsors to generate $75,000, an individual or should be an individual or should be an individual, to prevent college football or basketball programs from turning pro before their classes graduate. Someone could tell the Louisiana senator slavery has been abolished.

Tyson college athletes are supposed to have a right to lead their lives as they wish.

Not surprisingly, Johnson's infectiousness is sold.

He said he would propose the bill to keep Louisiana State out of the NCAA Tournament, where they earned more than $500,000.

"We're making a great start toward the NIT double. They will play at home against North Carolina A&T in a first-round game Nov. 15. A&T is the weakest of the 16-team field.

Frieder and partners are Ohio State at DePaul, Texas-El Paso at California, Loyola Marymount at Nevada-Las Vegas, Richmond at N.C. State, Southern Methodist at LSU, and Alabama-Birmingham at Kansas.

UNLV, which won the pre-season NIT in 1986, and St. John's, which are invited, may appear favorites since both are expected to be highly ranked.

Mike Tyson receives honorary doctorate degree

WILBERFORCE, Ohio (UPI) — Heavyweight champion Mike Tyson received an honorary degree Tuesday from Central State University and himself happy despite his recent troubles.

Tyson, who received an honorary Doctor of Humane Letters said in a press interview: "I was asked to receive the degree from a historically black institution.

"There is no greater pleasure than to be accepted by your own people," he told a news conference after the con-"
Sports

1980 commission examined football

By David Gallianetti and Stephanie Wood

Anthropology professor Jerome Handler’s push to eliminate Saluki football is not the first effort made at the University to cut the fall sport.

In 1949, a 16-member commission, formed by President Kiram Les, collected data and input from the University community in putting together the Report of the SIU-C Commission on Intercollegiate Athletics.

The Dec. 1 report, in its recommendation to the university’s administration, said that football is no longer a "vital" sport at SIU-C and expressed the need for other sports at the university to take over the role of football.

The report, signed by "The Review," said that the football team, which had won the Missouri State championship in 1954, had lost its "vital" position in the minds of many students and alumni.

The report also said that the football team had become a "cash cow" for the university, and that other sports, such as basketball and baseball, were "less important."
