Slater Contract Won't Be Renewed

**Morris Says Four-Quarter Plan Pays Off**

- Operation of SIU on a four-quarter, year-around basis is proving to be a bargain for the taxpayers, according to President Delyte W. Morris.

  More students are taking more classes at less cost to the state per unit of study.

  "What is even more important," he added, "the University is keeping faith with the younger generation which has had legislative promise of a chance at higher education."

Southern is one of the few state-supported schools where high school low-achievers are given their chance, via the summer quarter, to demonstrate their latent abilities, Morris said. "This is possible only because our facilities are used full-time."

"Instead of limiting crowded campuses to the top-ranking high school graduates on a two-year basis, our academic administrators and councils have worked out a unique graduated admissions policy that is particularly suited to our year-around operations."

"Enrollment figures for the past four summers show an ever-increasing number of freshmen are seizing what may be their only opportunity to try college level work."

In 1963 the summer quarter enrollment at the Carbondale, Edwardsville and Vocational-Technical Institute campuses was 7,756, of which 1,430 were freshmen. In the 1964 summer term the total enrollment is 18,000.

(Continued on Page 2)

Saluquarama Scheduled Saturday

The fourth annual Saluquarama will be held Saturday at Lake-on-the-Campus. The Saluquarama, which makes use of all the lake's facilities, will be held from 1 p.m. to 5 p.m.

Teams from residence halls, off-campus living areas, clubs or just friends, will compete in swimming races, boat and canoe races, and a "watermelon rescue." Children's contests will also be held.

The "watermelon rescue" is a summertime version of a grease pig contest, with two teams vying for possession of a greased watermelon.

Entry forms for the competitive events have been posted at the Beach House and at the Student Activities Office. Teams must sign up for the events they wish to enter before the event starts.

Awards and trophies will be given to the first place team and to winners of individual events.

Water sport demonstrations and water safety instructions will be given during the afternoon. The boat dock will be open for swimming between 1 p.m. and 3 p.m. and again from 5 p.m. until 7 p.m.

A dance will begin at 8:30 p.m. The Bushmen will provide music for the dance. The trophies and awards will be presented at that time.

Center to Seek New Applicants

"The existing contract with Slater's Food Service for operation of the food service in the University Center will not be renewed," according to W. Morris, director of the University Center.

Dougherty said that catering services and food management firms included in Slater's will present proposals to the University for consideration.

Slater's has operated the food service for four years. The firm has been running under a yearly contract since Aug. 1, 1964 with options to renew each year.

In commenting on the decision not to renew the contract, Dougherty said that the present contract with Slater's has not been "advantageous" for both parties.

The Slater contract expires on Monday Aug. 1, but the company will continue to operate the food services at least until Sept. 2, when the summer quarter is over.

The arrangement was made so there will be no interruption in the food services during the transition, Dougherty explained.

ARA is a subsidiary company of Automatic Retailers of America Inc., the sixth largest food service company in the nation. Twenty-one of its branches are college and universities.

ARA also holds the contracts for vending machines on campus, but the two contracts are separate.

In addition to operating the food service in the Roman Catholic Hospital, ARA's operates the concessions at the Arena and McAndrew Stadium.

Since the concessions are under the authority of the University Center, Dougherty pointed out, the food service contract includes their operation.

Gus Bode

Gus says Bye Birdie... beg your pardon, Slater Food Service.
Morris Says 4-Quarter Plan Benefits Students, Taxpayers

(Continued from Page 1)

creased 20 per cent, to 9,380, of which 1,453 were freshmen, an increase of 29 per cent.

During the 1965 summer quarter the total enrollment was 11,173, up 19 per cent, while the freshman contingent numbered 2,757, an increase of 25 per cent.

"What a difference can there be in allowing a physical plant worth $120,000,000 to lie idle throughout the summer, or be peopled only by a handful of school teachers taking eight weeks work toward advanced degrees?" Morris asked.

"Year-around utilization allows older students to accelerate their educational progress toward profitable employment; beginning freshmen to find their study habits; and graduate students to study and practice their acquired knowledge in a full-quarter, full-credit atmosphere. Research projects can continue on an around-the-seasons schedule."

Morris said faculty members who teach four full quarters volunteer for the assignments. "Many summer quarter teachers are members of faculties of other universities who welcome a change of scenery during the summer. In some instances our own faculty members would rather teach during the summer quarter than during the winter or spring terms."

With its scheduling of classroom use on a 48-hour week basis—weekdays and Saturday classes during the traditional academic year, plus conducting a full length summer quarter, "Southern Illinois University is doing everything in its power to meet enrollment pressures without denying any Illinois boy or girl a chance to achieve all of the education of which he is capable," Morris said.

"It is on this basis we go to the taxpayers, the legislature, for funds for fully effective operation of the University."

NEwSPAPER TALK—George Carson, promotion director of the St. Louis Globe-Democrat, speaks at the first day's session of the Newspaper in the Classroom Workshop which opened on campus Monday. The workshop is designed to show teachers how to effectively use the newspaper as a classroom teaching aid.

Newspaper-in-Classroom Sessions Open; Workshop Sponsored by Journalists, SIU

The Newspaper in the Classroom summer workshop, which is designed to serve teachers in high schools, junior high schools and the upper elementary grades, started Monday and will run through Aug. 3.

Under the direction of Howard R. Long, chairman of the Department of Journalism, the workshop will include lectures, discussions and participation in a group project. Derry D. Cone, education editor of the St. Louis Globe-Democrat, is the associate director.

The workshop is being presented by the Department of Journalism, the Extension Division, the Globe-Democrat, Missouri Press Association and the Southern Illinois Educational Association.

Why the newspaper is an important teaching aid to teachers in the elementary and secondary schools was discussed by George W. Carson, promotion director of the St. Louis Globe-Democrat, at an opening session on Monday.

Today's class will begin with a talk by George A. Kilenberg, managing editor of the Globe-Democrat, on reading the newspaper. The group will visit the Daily Egyptian office and printing plant.

Current problems in state government will be discussed Wednesday by Max M. Sappenfield, associate professor of Daily Egyptian government. In the afternoon John Gardner, managing editor of the Southern Illinoisan, will lead a public forum on the editorial page.

Jones Taking Part In Writing Project

David L. Jones, associate professor of geography, is in Canon City, Colo., for several weeks participating in a writing conference.

The group is developing and revising textbooks, laboratory manuals, teachers' guides and reference materials in a nationwide high school earth science curriculum project conducted by the American Geological Institute under National Science Foundation grants.

Jones has been participating in the project since the first experimental materials were produced at the 1964 summer conference.

Today's Weather

Considerable cloudiness with a chance of showers. High in the 80s. According to the SIU Climatology Laboratory, the high for this date is 106, set in 1930, and the low is 51, set in 1911.

[Advertisement for the Newspaper in the Classroom Workshop]
**WSIU-Radio Science Show**

To Discuss Jets, 'The Pill'

Topics ranging from reduction of jet engine noise to the effects of contraceptive pills on liver disease will be discussed on "Science Magazine" at 7 p.m. today on WSIU-Radio.

Among the other topics under discussion will be thyroid disease in the tropics, how to prevent absorption of Strontium 90 in the body, and the part played by pollen and molds in allergies. The speaker will be Dr. A.W. Frankland, director of the allergy department at St. Mary's Hospital in London.

Other programs:
- 8:07 p.m.: Business Review: Congressional hearings on the draft law and the draft's effects on the nations economy.
- 10 a.m.: Pop Concert: Classical and semiclassical music.
- 12:30 p.m.: News Report: Weather, business and farm news.
- 1:30 p.m.: Vienna and Broadway: Music from operettas and Broadway productions.
- 2 p.m.: This Week in the United Nations.
- 2:30 p.m.: Masterworks: From France.

‘Virginia Woolf'? Sick, Sick, Sick

By Jenkin Lloyd Jones

Alan Jay Lerner not long ago told a Connecticut audience that he was sorry he had nothing to do with the type of drama that "concerns itself with little people doing little things..."

Maybe that's our problem. For two hours the other day I sat through the movie, "Who's Afraid of Virginia Woolf?", and what a shock it was. That's what's wrong about the talk or the action. It is how far a film can say of great events looked by an audience of an entertainment business.

The Aldrich's "I'llad" didn't. Caesar's legions shunted into obscurity at the defenders of Gaul. But Caesar's "Commentaries" concerned itself with the picture of sweeping empire.

Are Americans becoming afraid of nobleness? Are we uncomfortable with heroes who are not half-evil? Have we really bought the movie moguls' idea of the ideal American heroine—the noblest character in the leading saloon?

It is strange while man struggles, often unsuccessfully, against plague, famine, and marauding bands of butchers, he could keep his eyes on the stars. His literature was shaped by bowing characters and high aspiration. And here is modern America, rich with precedent, healthy without precedent, mighty beyond the dreams of emperors, and yet steeped in crime, confused in values, and beginning to rationalize and excuse human behavior, reminiscent of a culture created by poverty.

Doctor Zhivago rises splendidly above bloodshed. Longer and longer are the pro­ fessor and his wife in "Virginia Woolf."" and face no survival problems, sink to the level of animals, is there any defense...

George Jean Nathan once described great dramas as the "reflection of great doubt in the heart and mind of a great good, gay man."

What are we getting instead. Little people doing dirty little things.

Acronyms Present Daily Word Game

By Elbert A. Talley

Know what an acronym is? Perhaps not, but it's a good bet that you've used one or more in the last two days. Acronyms are what you get when you make up of initial letters of a group name, and usually used as a substitute for the longer phrase. The newspapers and woods are full of them.

I suppose their popularity comes from the fact that people feel they are getting a shorthand way to refer to the smaller units of the wonder drugs, the Nobel prizes, the fields of knowledge, of departments, of schools, of clubs, of groups. The acronyms are endless.

Our habit of referring to these abbreviations in alphabetical abbreviations made the popularity of acronyms inevitable. So groups, organizations, the news media want a shorter term to refer to them.

Acronyms can make a problem to newspapers, actually two problems. How often do you explain what the acronym means, and do you write it out ACTION or Action? There is no standard rule, You have to make your own mistakes in some cases.

LASER, for instance, is the acronym for Light Amplification by Stimulated Emission of Radiation. Originally, newspapers carried it as a capital and explained it. As it became a part of the language, "Laser" was used, without explanation. And without explanation.

SCUBA is another one. Self- Contained Underwater Breathing Apparatus. It has grown to lower—case statute and in this, misused to refer to the snorkel outfit many persons use in swimming pools. Properly, it refers to an outfit including oxygen for underwater breathing.

One of the wonder drugs of a few years ago, ACTH (adrenocorticotropic hormone) is often used in this way and sometimes as a substitute for the longer phrase. The newspapers and woods are full of them.

By the way of a philosophical point, if a word is made up of initial letters of a word group, the group name is usually a combination of the initials of the first letters of each word in the group. Sometimes, the initials of the word group are used directly, as when NASA was created.

If I could do "one thing," I would be...
Lost Cause Before Steely Obstetrics

By Mike Schwebel

If soft drink dispensers can think, and it seems that they can, they must feel a great deal of pride in themselves. My trouble with them all began with programs. In the old days, if a coin proved indescribable to one of the machines, a good hard fist would cough up the coin for another gambler.

Now, cases of hard-luck losers are popping up all over the nation. In one case I made for today's machines, I found the world to be a hard hand. Nothing short of a dozen sticks of dynamite can make today's machines give up the fight and play fair.

The change makers also add to the difficulties. All too often, after pouring your drink into a nice unwrinkled paper cup, the machine apparently thinks it is worth a 15-cent tip, and simply hangs onto the quarter it has gathered up.

I ventured to say that if my bank account were half as large as the amount of money the drink machine had in stock, I would buy them all and quickly deport them.

I then went to the machines, chained, and saw to it that their owners came up with the idea first—in the form of canned soda. They then charged an additional nickel to go along with the convenience of being able to well blow up one's hair at the opening of the canned soda.

If any consolation may be taken in the fact that their development, it would have to be that you get a bargain if your baseball excursion planned for Sunday

A trip to see the Dodger-Cardinal baseball game Sunday in St. Louis is being sponsored by the Activities Programming Board.

A bus will leave the University Station at 10 a.m. Sunday for the trip to Busch Memorial Stadium.

Transportation and a reserved seat ticket will cost $3.25. Those who desire the trip will be taken on a first come, first served basis. Deadline for signing up for the trip is noon Saturday in the Student Activities Office.

14 YEARS OF RESEARCH

In 1959, after 14 years of dedicated research, the first practical whole word reading machine, Reading Dynamics, was taught in Washington, D. C. Included in this study were 400 students who were some of our nation's most promising college students such as Senate and Congressional leaders, major corporation executives and school officials. All students learned Reading Dynamics that were taught in these early classes in 1953.

Your time has come, and you can now learn Reading Dynamics. Not only will you learn to read faster, but you will learn an easy way to remember what you read.

How long did it take you? The AVERAGE Reading Dynamics graduate can read this in less than 22 seconds.

Values to $14.99—NOW Only

$288 $88 $788

Since 1959, approximately 250,000 people from all walks of life, have completed this revolutionary reading improvement course.

Graduates of Reading Dynamics now include people from many of the nation's leading organizations such as IBM, DuPont, A. S., A., and International Telephone and Telegraph. Graduates also include students from many outstanding universities and colleges, such as Harvard, Columbia, UCLA, the University of Texas, Washington University, St. Louis University and University of Missouri.

Reading Dynamics is not just a "speed reading" course, but a very comprehensive reading improvement program. Even though the program does indeed achieve extraordinary reading speeds, much emphasis is placed on building comprehension and recall ability as well as developing rapid and high efficient study techniques.

SOUTHERN ILLINOIS INSTITUTE

Once again in Southern Illi­ nois and Evelyn Wood Reading Dynamics will be of­ fered to the students at SIU. Classes will meet twice a week for 5 weeks ending the week before Thanksgiving.

In the last 12 months, in the Southern Illinois area, approximately 1,000 people have com­ pleted the Reading Dynamics course. These 1,000 people had an average beginning reading speed of approx. 270 words per minute and an average comprehension level of 745. These same people, after completing the Evelyn Wood Reading Dynamics course, had an average reading speed of 1,750 words per minute with a comprehension level of 93%. This represents an increase in reading speed of over 600% and an increase in comprehension of 93%. These results are typical of those obtained in Reading Dynamics Institutes throughout the nation.

RESULTS GUARANTEED

So consistently positive are the results of Reading Dynamics that the program categorically guarantees a minimum increase in reading speed of three times with equal or better comprehension, or the entire tuition fee is refunded.

FREE DEMONSTRATION

The results that have been achieved and the techniques that have made them possible have been demonstrated and explained in the lounge of Building 604 in University City. 

If you cannot attend the free public demonstration, further information may be obtained by calling the Southern Illinois Reading Dy­ namics Institute at 457-2469.

Considering these facts, can you afford to be ignorant? What Reading Dynamics can do for you?
Green Beret' Chief Is Missing
On Flight Enroute to Honolulu

SAN FRANCISCO (AP)- Brig. Gen. Joseph W. Stilwell, son of World War II's "Vinegar Joe," the famed Burma Road general, was feared down at sea Monday in a plane missing since one of its two engines failed Sunday.

The aircraft carrier Yorktown, three destroyers, Coast Guard cutters, merchant ships and 20 planes pressed a massive search 700 miles out into the Pacific for the general who trains the Army's Green Berets, now fighting in Viet Nam.

Stilwell, 54, commander of the Army's Special Warfare Center at Ft. Bragg, N.C., flew out Saturday night for Honolulu as copilot with two other men on a DC3 being ferried to Thailand's air force. He got permission to fly as far as Honolulu so he could increase his instrument rating as a pilot.

At 3:45 a.m. Sunday, 525 miles out over the Pacific, pilot Hal Grimes, 45, a veteran World War II flier, radioed that one engine had been shut off and he was turning back. The plane has not been heard from or sighted since.

Searchers looked for a 10-man inflatable liferaft carried by the missing plane, a type of aircraft which has a good record for ditchings in the water.

The Coast Guard said Monday there had been no sightings and no trace of any wreckage. The missing plane's fuel supply would have been exhausted.

Stilwell's mother, widow of "Vinegar Joe," said at her Carmel, Calif., home: "I'm waiting and hoping. Young Joe has come through so much before that I can't give up hope now."

Stilwell fought with his father in the China-Burma theater and has a son, Capt. Joseph Warren Stilwell, now on his way to fight in Viet Nam.

The general has had several close calls.

He was often under enemy fire as a regimental commander in Korea. He and two other generals were trapped by Viet Cong machine gun fire for an hour in Viet Nam's Mekong River delta in March 1963. Later he helped carry out the wounded.

The following December, Stilwell was wounded by Communist ground fire while in an Army helicopter over the delta region.

The Senate Committee on Labor and Public Welfare met in closed session to consider a bill proposed by Sen. Wayne Morse, D-Ore., which would pave the way for a back-to-work order and set up a mediation panel to seek a permanent settlement in the dispute between the machinists union and the five airlines.

Sen. Jennings Randolph, D-W.Va., stepped out of the closed committee room and told newsmen he believed the bill would be approved and sent to the Senate for a vote today.

Morse had proposed a bill that would have the government run the airlines while the contract dispute is settled but he scrapped that measure and put in his new bill Monday.

Earlier, Senate Democratic Leader Mike Mansfield said Congress—not the White House—is going to have to act if the government is to halt the strike.

Mansfield made the statement as Republicans demanded that President Johnson call representatives of the five grounded airlines and the AFL-CIO International Association of Machinists to the White House and seek to persuade them to settle the dispute.

Bus Falls Off Bridge
In Belgium, 34 Killed

LIMBURG, Germany (AP)—A bus carrying Belgian school children home from a holiday trip plunged off a bridge today and police reported 34 persons perished.

They said 30 boys and girls, aged 10 to 17, and four adults, including the driver, were killed in the crash, which one police officer called "the most horrible accident ever on this stretch of Autobahn" west of Frankfurt and Cologne. All 10 of the survivors were badly hurt.

"AH DECLARE, PADRNER, SOMEBODY OUGHTA DO SOMETHING ABOUT THIS!"
Indonesia Has New Cabinet

JAKARTA, Indonesia (AP) — A new cabinet was named Monday by the military-civilian Big Three that has guided Indonesia’s destiny since March. The new cabinet, which is the result of a power struggle between President Sukarno and his former strong man, remains an issue of debate.

Witnesses for 29-member cabinet. At this Big Three that has guided Indonesia, Sukarno was emptied from the presidency. Adam Malik and Economic Minister Sultan Hamengku Buwono, their authority over political and economic affairs greatly increased.

Informalists said the new cabinet was shaped almost single-handedly by Sukarno although empowered by the recent Congress, but this was disputed by legal authorities, to help in naming it.

But apparently Sukarno was able to win compromises on only a few minor positions in this cabinet, cut down from the 100-member one he used to control. A portion of those who might be pro-Sukarno are cut off from direct contact with the president.

In an obvious attempt to isolate Sukarno further, the cabinet announced the new cabinet will deal directly only with a five-man presidency headed by himself Malik and Buwono.

State Gathers Witnesses for Speck Case

CHICAGO (AP) — Prosecutors announced Monday for a grand jury that will be asked to indict Richard Speck, 24, on charges of murder, attempted murder, and kidnapping.

Among the first to appear at the office of State's Attorney, Daniel Willig was Miss Elizabeth Chan, director of nursing at South Chicago Community Hospital, where the eight victims were studying.

Speck, a seaman and odd jobs man, is in jail hospital recovering from self-inflicted wounds.

The state has charged him with murder in one of the killings. Through the Cook County (Chicago) grand jury, it is seeking indictments against him of all eight.

Miss Corazon Amurao, 23, of Chicago, a Philippine nurse who escaped death by hiding under a bed during the massacre of July 14, will be the chief witness before the grand jury.

A spokesman for South Chicago Community Hospital, where Miss Amurao has been living since the tragedy in a dormitory, said Miss Amurao was not thinking of leaving the hospital today.

Doctors in the jail hospital reported Speck's condition as satisfactory.

Johnston Gets Word on Pilots:

Hanoi Not Planning for Trial

WASHINGTON (AP) — President Johnston has received word through diplomatic channels that there are no immediate Communist plans to try captured American aviators as war criminals. But the White House said Monday that "We aren't exactly sure what this means."

"We are watching it very closely and beyond that I can't go," said Bill D. Moyers, the President's press secretary.

Moyers told newsmen that the information from North Viet Nam reached Johnston while he was on a speaking tour of the Midwest last Saturday.

The press secretary did not go into details, but said the intelligence convinced to Johnston through diplomatic sources "is consistent" with what the Columbia Broadcast System Network said.

CBS received a four-word cable Sunday from North Vietnam's Ho Chi Minh saying: "No trial in view."

Ho's message was in reply to a CBS inquiry of last Thursday day, asking whether he had decided to place the captured Americans on trial. Johnston declined to identify the diplomatic sources through which Johnston received his information.

Marines Hunt Enemy

On Run Near Border

SAIGON, South Viet Nam (AP)—With support from B52 bombers and the 1st Air Commando, U.S. Marines hunted along North Viet Nam's border Monday for trails of the Viet Cong. Though Vietnamese army division believed shelled and mortared their own rear sanctuaries back north Monday, and in Laos to the west.

A force of about 450 Communist regulars, that mauled a Marine company with shelling fire out of thick jungle, covered Sunday, vanished into the countryside. The Marines are back about 71 wounded men—nearly half the company—and an unreported number of dead from the sharpshooting fight yet in Operation Hastings’ 11 days of action.

While the action along the border dwindled, the Viet Cong, prodded by their leadership last week to fight harder, struck within earshot of Saigon, picking off a U.S. Air Force F-101 jet fighter 20 miles outside the capital and opening up machine gun and mortar attacks on a string of nine lightly manned government supports in a coastal gulf 25 miles to the south of it.

Governors of South and North Viet Nam have since reported no casualties among the defectors. Another guerrilla unit attacked a camp for Communist defectors, wounding several of their ex-comrades.

The downing of the Air Force jet brought to 118 the number of U.S. Air Force planes lost in South Viet Nam. The pilot parachuted after the plane was hit and was rescued. Flying weather over North Viet Nam was poor but U.S. Air Force and Navy planes flew 82 Sunday missions against fuel dumps, supply lines, trucks, barges and bridges. Conventional ground fire dropped a U.S. Navy A4 Skyhawk into the Gulf of Tonkin but the pilot was rescued in 20 minutes. It was the 308th U.S. plane lost over North Viet Nam.

TV Repair Fraud

Charged to 13

CHICAGO (AP) — Illinois' attorney general has accused 13 Chicago area television repair firms of defrauding customers by misrepresenting work needed on sets and by overcharging.

The suit, brought in Circuit Court under the consumer fraud law, resulted from a six-month investigation, Atty. Gen. William G. Clark said.

An electronics professor working with investigators in checking eight vendors discovered each set with an easily discernable fault, then reexamined them after they had been repaired by the firms, Clark said.

 Parsons Booster Leads Issue; SIU-Lincoln Game Postponed

While SIU faced a Sunday postponement of the nonleague game with Lincoln College, Parsons College continued to pad its league lead.

The Wichita's took a Saturday doublet win from the last-place St. Louis University Billikens by 2-1 scores. A Friday evening game ended in a tie when the game was called because of darkness.

The double victories Saturday, with the Sunday twinnl scheduled for the series, gave Parsons a 13-3-1 mark for the summer.

St. Louis, after Saturday's Intramural Softball Teams

To Begin Tourney Today

Ten games are on tap for intramural softball teams competing in the summer tournament.

Tournament play opens today with the Allkies taking on the Ag school team.

Other games are:

Wednesday: Saluki Hall vs. Allen Animals.
Aug. 2: Allkies vs. Saluki Hall.
Aug. 4: Ag School vs. Saluki Hall.
Aug. 8: Allkies vs. Allen II.
Aug. 10: Ag School vs. Allen II.

Pro Dies in Flames

Aviation Officials Seek Clues to Lema Crash

LANING, III. (AP)-The riddle of a golf course plane crash which killed internationally famous golf pro Tony Lema, his wife and two other persons, was probed Monday by federal aviation inspectors.

Lema, 32, the 1964 Open champion who was known throughout the world as Champagne Tony, died in the flaming wreckage of a small twin-engine chartered plane that crashed Sunday evening at the edge of a lagoon near the seventh hole of the Lansing Sportsman's golf course.

Also killed were Lema's wife, Betty, 30, a former airline stewardess; the pilot, Doris Mullen, 45 of Joliet; and the copilot, Dr. George Barnes, 34 of Kankakee.

The Lemas charted the two-engine Beechcraft Bonanza after the 49th annual Professional Golfers Association tournament at Akron, Ohio, in which Lema tied for 34th place, and were en route to Crete, Ill., where Tony had planned to play in Monday's $12,000, one-day Lincolnshire Open.

The plane was to have landed at Chicago-Hammond Airport near Lansing.

Mrs. Mullen's husband, Dr. Wylie Mullen, who was waiting at the airport, said the plane made a swing around the field, with no indication of trouble, but one or both engines cut out as it glided low over the nearby golf course, then re-started briefly.

A witness, Bud Dorton, said that as the engines died it was apparent the pilot would attempt a landing on the course, but the pilot swerved to avoid a group of people standing in the plane's path. The plane tore up turf and bounded into the edge of the lagoon just beyond the seventh green, and burst into flames.

Lansing firemen extinguished the flames. The bodies of the Lemas were being sent to San Leandro, Calif., for their home.

Lema's manager, Fred Corcoran, said that the couple chartered the plane from Mainline Aviation, Inc., Joliet, after another plane had failed to turn up after the Akron tournament.

Mrs. Lema, the former Betty Cline, was a stewardess for American Airlines based in Dallas when she met Tony. They were married three years ago. She formerly lived in Oklahoma City.
