Faculty to sue, protest fine procurement

A group of SIU faculty members and civil service employees, protesting the University's plans to deduct parking fines from their paychecks, announced an extended protest that will file suit, Tuesday if the University goes ahead with its plans.

The committee includes Michael L. Bartlett, staff member in data processing, Herbert Donow, assistant professor of English, Richard Blackweiler, professor of zoology, Lee L. Lipman, professor of art, Evan M. McHose, professor of psychology, Donald L. Perry, assistant professor of marketing and Rodolfo F. Xauw, staff assistant at Washington Square.

Donow, spokesman for the protesting faculty and staff, said the preliminary plans are to ask for a court injunction to restrain the University from deducting the fines from paychecks, to seek compensatory damages and possibly punishment for the administration.

Donow said the group is also concerned that the plans are collected from students. Students are not permitted to register for the following quarter if they have unpaid parking tickets.

He said, however, the students would have to file a separate and different type of suit if they were to enter the parking fine protest.

The group has retained David W. Watts Jr., an attorney from Murphysboro, to handle the legal matters. Donow said he expects about 10 more names to be added to suit as plaintiffs before Tuesday.

VTI housing faces probe after survey

By Chuck Huchtenrath

Following a preliminary survey of living quarters at Vocational Technical Institute, Samuel Rinella, director of Housing, Building and Grounds, said that a portion of the future of the co-op apartments, such as those that burned last Friday, will be evaluated.

Rinella said he will request the University Architect's office to submit preliminary estimates on the costs of replacing electrical and plumbing systems and structure.

The survey was sanctioned by Chancellor Robert G. Laver during a meeting Saturday with student government and VTI representatives.

Rinella has asked the VTI Executive Council to submit to him a list of priorities concerning immediate problems that can be taken care in the near future.

He said he will continue to upgrade facilities in the same proportion as the last four years. He said $5,000 has been spent annually for the past four years for maintenance and upgrading of residence halls at VTI.

During the survey, Rinella said he didn't find too many basic problems in the "Southern Acres Residence Hall" or "Playboy Hall." He has formed, though, a list of problems that fall under building like those which had electrical systems, loose fire alarms, faulty doorknobs and radiator leaks. A university committee for installation of carbon dioxide fire extinguishers.

Rinella said he was not aware of any serious problems in some of the co-op apartments.

Happy Illinois' Democratic senator, Adlai Stevenson III, was in Carbondale Thursday to address the 60th Anniversary Banquet of the Greater Carbondale Area Chamber of Commerce. In another session, Stevenson answered questions from students and the press.

Stevenson undecided on withdrawal plan

By Paula Muto and David Mahnman

Daily Egyptian Staff Writers

"The United States is deeper in the quagmire of Southeast Asia than ever before," Illinois' junior senator told a crowd of 200 Thursday night in the Home Economics Building Lounge.

Sen. Adlai Stevenson III who spoke at a press conference sponsored by the College Democrats, told the group that he has not yet made up his mind on the proposed McGovern-Hatfield amendment, which would set specific dates for U.S. withdrawal from Southeast Asia.

He said that an "orderly withdrawal" is the only solution to the war, but added that he has "grave reservations" on imposing a strict timetable for that withdrawal. He said, "If the amendment won't pass in Congress."

Stevenson said that Secretary of Defense Melvin Laird's suggestion that the draft could be ended by June, 1973, is "unrealistic." as long as the United States maintains current troop levels throughout the world. He said that he favors a volunteer army, but that it is not feasible until there is a drastic reduction in troop levels in Southeast Asia and Western Europe.

"I wasn't very surprised," Stevenson said in answer to an audience question on the recent incident of American air- men on the ground at a Phnom Penh airport. The senator said that he did not know if the situation was an isolated incident, but said that it is clear that there is significant U.S. involvement in Cambodia.

Stevenson also discussed topics closer to Carbondale, specifically tuition increases and dormitory rentals allegedly due SIU students after the University closed last Spring.

Letters received from SIU students for government reform are being studied by his staff. Stevenson said. He added, however, that this seemed to be a difficult case to solve within the framework of the U.S. Senate. He said that he would take another look at the letters when he returns to Washington.

Stevenson spoke at the 60th Anniversary Banquet of the Carbondale Chamber of Commerce following the press conference.

He told Carbondale businessmen that government reform is the number one priority on the national agenda. He said reforms were needed on all levels of government covering everything from public disclosure laws to curbing flak, voters in the Senate.

On the question of revenue sharing Stevenson said the administration's proposal to give states and local governments money is that they please raise serious political questions.

"To give states large sums of money without strings attached invites waste, irresponsibility and weaker state and local governments," Stevenson said.

Stevenson said revenue sharing would cause states to lose more money than it would gain.

Court refuses to drop SIU from rent suit

Circuit Court Judge Peyton H. Kunce refused to allow SIU to withdraw from the pending court case involving the alleged failure of two Carbondale landlords to grant rent refunds to residents after the early closing of the University last spring.

The ruling was in answer to a series of complaints and motions by John C. Ferch, attorney for Benning Real Estate and Plans Leasing Co. Inc. and Charles Renz, attorney for SIU.

Ferch filed a motion in late October seeking to have SIU remand Benning and Plans for any money the court might require them to pay out. Renz then filed a motion attacking the legal sufficiency of the complaint. In remarks on court Wednesday Ferch said that these suits were against the University and the rent suits, and Ferch and the court held that SIU is not a party to the contract between the students and Benning and the suit is mainly a landlord-tenant dispute.

In his ruling, Kunce said the issue between the landlords and the University would best be resolved during the actual trial rather than in preliminary motions.

An attempt to set a definite trial date was unsuccessful but Kunce and other attorneys agreed that it should be before SIU closes spring quarter.

Senate vote termed 'heavy'

Voting on the Joint Task Force on University Governance proposal by faculty and students is expected to be "heavy" Thursday by Roland Keene, assistant to the students vice-presidents.

Keene said that the counting of ballots would begin Friday for the faculty, which includes general faculty, graduate faculty and nonvoting faculty.

The student government elections commission, he said, would count the undergraduate ballots on a matter morning.

Results of the University Senate referendum may be available Monday.

Keene said:

Faculty have until noon Friday to return ballots to the Chancellor's office.

The undergraduate referendum will close at 4 p.m. Friday. Voting places for undergraduates are open from 9 a.m. to 4 p.m. in the Division of Student Affairs Hall in Thompson Point, Trueblood Hall in University Park, Student Union, Barfield Towers, Morris Library and the University Center.

Hitchcock films add macabre to weekend

David Daly
Daily Egyptian Staff Writer

This weekend there is really a fine selection of film entertainments to choose from, or just enough to pass some time.

This is the weekend that lovers of mystery and murder can enjoy.

All three free films in Davis Auditorium were directed by Alfred Hitchcock, master of the macabre.

Friday at 8 p.m., "The 39 Steps" film features Ingred Bergman and Gregory Peck in a fascinating mystery that will keep you guessing right up to the twist ending. With the help of Carroll, John Finn and Rhonda Fleming.

"September," a Saturday night feature, is a top-notch espionage tale with Cary Grant and Ingrid Bergman mixed in some nifty gadgetry on South America. This 1948 mystery has an amazingly suspenseful climax that is real mind-boggling stuff.

Sunday's "Hitchcock" is "Rebecca," the 1940 Academy Award-winning film starring Laurence Olivier, Joan Fontaine, George Sanders, Judi Harris and Nigel Bruce. This adaptation of Daphne du Maurier's tale is about a young woman haunted by the memory of her husband's first wife. The middle-aged man, the ghastly presence in the shadow of Judith Anderson's chilling portrait of the housekeeper makes "Rebecca" an engrossing film.

The pay films in Parr Auditorium are also of interest. "No Way to Treat a Lady" will be shown Friday. This song needles 1968 film stars Red Singer, Lee Remick and George Segal. A psychological thriller played in a trashy manner with a detective, an engraving middle-aged woman and inhabited the palace to report the location of the painting. With this gritty and intense adaptation of William Goldman's novel, alliance Red Singer is to see six different Augustus.

On Saturday, W. C. Fields and Mae West go at each other in "My Little Chickadee." Both wrote their own material for this comedy-western farce but the filming is more funny-ha-ha, than anything else. Nevertheless the film is flat in pace but camp itself in performing verbal humor on such a level. And, with "Chickadee" is a 1933 Fields short called "The Barber Shop" in which Fields, as barber Corned Ham, goes up against with a gentleman. With both the free films and pay films scheduled for two showings, 7:30 and 10:00, it is possible to see all of the weekend's offerings.

The Wesley Foundation's (10th South Illinois Ave.) free "Monday Night of Conscience" film series begins again at 7:30 p.m. Sunday at "Cold Hand Lake." Paul Newman stars in this striking 1967 film of a man who must daily deny himself which seeks to link his personal freedom. Newman won an Academy Award nomination for best actor for his role in "Laurel, the chain-gang prisoner whose actions cause his guards to feel they have a "relief to communism." George Kennedy won the award for best supporting actor, "Cold Hand Lake" has a lot to say.

Other films to be shown in this weekly series include John Daven's "Up Tight," "The Angry Silence," and "FoolsOI Face," the Academy Award winner of Best Foreign Film of 1960.

Hamburger inflation

Cafeteria hours cause price increases

By Paula Mene
Daily Egyptian Staff Writer

The hamburgers are the same, but the prices are bigger.

In order to console the hungry, the University Center Oasis priced SIU students with higher prices than guests. The service charge for students is now 30 cents, but is still labor, according to Clarence G. Dougherty, director of the center.

Since July the center has lost $124,850 in service sales. This is a direct loss of the center, since the food service charge for guests is paid a set fee by the center and is not labor.

The center losing money, he said, is a commercial business such as MacDonald is making money on their 25 cent version of the hamburger.

“The peculiarity of operation on campuses is that it is so difficult,” said Ron Rodgers, manager of Industrial Relations.

The food service might do $20,000 in business one month only to have the amount drop to $20,000 the next month. Rodgers said it is not fair to blame for this fluctuation and the price of a hamburger must allow for this.

Campus activities coming up

Friday

Student Activities Film "Tremors," 7 p.m. Davis Auditorium, Admission free

Interpretor’s Theater Film: "No Way Out," 7-10 p.m. Pary Auditorium. Admission free

Delta Sigma Theta Dance 9 p.m. - 12 a.m., Auditorium Ballrooms

Civil Service Psychological Information and service for those people with emotional crisis. Call 433-1269, 8 a.m. to 5 p.m

Vocational or Educational Concerns for Students. 202 S. Washington

Germantown Informal Lecture: "Levels of Awareness in Kafka and Shakespeare," by Dr. Durer Pitzer, 7:30 p.m. Home Economics Conference Room

Laboratory Recreation 2 p.m. - midnight, Pulliam weight Room, 1 p.m. - midnight, Pulliam pool

Fuzzy Bottom Coffee House Entertainment. 9 p.m. - 1 a.m. Newman Center

Celebrity Server "Chadwyck," 7 p.m. Sherry Auditorium

Paul Newman in COOL HAND LUKE Repression and the human Spirit

Lou Rawls show adds Baron, Sunday’s Child

Singing group Sunday’s Child and consultant Sandy Baron will appear in the Lou Rawls concert at 8 p.m. Feb. 12 in the SIU Arena.

Sunday’s Child has appeared on several national television shows including the Flip Wilson and the Dvork Cavett Shows and will make a guest spot on the Gien Campbell Show at 8 p.m. Sunday.

Three young girls makeup the group which began singing in churches and clubs. Members of the group are June Anderson, 16 years old, her sister Mary Lou, 14 years old, and their cousin Renee Wood, 13 years old.

Baron has made name for himself appearing on stage, screen and television and authoring his first book "The Sports Age"

Features do not fall in the minimum wage category.

The managers of the University Center make certain that the weekly crowded conditions for cutting down on cash which normally get up profits. The new center cafeteria, which will not allow release of the space problem, is due for continuation quarter.

However, the prices are more than just down. As Sherry said, "Although we are not making much money, the prices are still not where we can feel comfortable about the charge."

He did not mean they were too low.
Opinion

The need for help

Each book stolen from Morris Library costs SIU money and time and peace of mind. Apparently the only effective method of stopping book thefts is an electronic detection system. The cost of such a system is high but the cost of not having effective library security is even higher.

The number of books "lost" at Morris Library each year has been estimated at 2,750. Ferris Randall, director of Morris Library, said the average cost of replacing one volume is $10, which means that $27,500 a year is spent on book replacement.

An electronic detection system costs over $50,000. Although this cost would not be offset by the cost of replacing books every three years, long-range advances in improved security must be considered. Furthermore, no price can be placed on the frustration caused by not finding a needed book.

Library officials have been fighting for the needed money for some time. Now it is the time for those touting the purse strings to realize that they are not saving money by stalling on an appropriation for electronic book detection.

The heart of any university is its library. If SIU's heart must be kept alive, the education of those who use Morris Library will continue to be crippled.

Letters to the editor

Musto, Scherschel need to learn facts

To the Daily Egyptian

I would like to suggest that Paula Musto, Tom Scherschel and a few others who are of like mind learn a few facts of life before they leave the sheltered confines of a university and enter the practical world of industry. Should they use the language and tactics they now so strongly uphold, they will not be denied a pay raise or tenure; they will simply be fired.

Chemistry

Channel 8 deserves praise for programs

To the Daily Egyptian

In these times of cynicism and anger, there is still room for praise and gratitude. This praise, unexpectedly, comes from a disappointment.

One evening I was studying in the library and, as the watch hands moved steadily towards 4:30, I began thinking it was time to leave. At 4:31 I raced out, drove home, turned the TV on to Channel 8 but only an old movie filled the screen. Where was the First Churchills? I called the station only to learn the program was off due to co-ordinations beyond their control.

Missing this show is disappointing, meaning that Channel 8, PBS, and the BBC deserve great praise for broadcasting and producing such programs that "will be enjoyed. Channel 8 has shown some great series in the last two years. The Forsyte Saga, great series in the next. First Churchills, Civilization and now... . The Civilization probably deserves the greatest program ever seen on the tube. All three series prove that when the BBC decides to produce a show it does an excellent job.

Channel 8 also broadcasts other artistic productions such as plays: The Ideal Husband a week ago and Maryl Sade earlier this year: opera and ballet. These are only a few of the many programs that Channel 8 offers us programs that appeal to every interest. So a big "Thank You" to the SIU station. Some areas of the state are not lucky enough and not willing to put out the necessary money to receive the PBS network.

Library's low salaries hurt efficiency of work

To the Daily Egyptian

When I came to Carbondale, I was surprised to find that even though I had been promoted to a higher classification in the Civil Service system I had to take a noticeable pay decrease in my job as a Library Clerk III. This is a relatively technical position and requires library experience but, because of the library's high turnover rate, the University maintains low wages and is assured of a constant flow of new student wives who have no choice but to take ridiculously low salaries for such positions. Low wages and a high turnover rate affects the efficiency and quality of work in the library because of the time and expense used in constantly training new personnel. With tuition and prices increasing at rapid rates, salaries for library employees remain at an all time low. If the library would raise the salaries of those Civil Service employees to meet the costly expenses of the University and Carbondale, the turnover rate would decrease and the efficiency and quality of work in the library would definitely improve.

Kay Brunswik
Student Wife
Library Clerk III

Prospety

As I walked my dog down South Illinius last week, I saw a store front sign reading "Promperty: Cleaners." And I walked further south, thinking about Carboudale prices, I saw "Prosperity Pizza: Prosperity Dress Shop: Prospery Shoe Store: Prospery Bookstore: Prospery Furniture: Chuck Hitcheschi."

No one can say that I do not prosper. Cheers.

Right on!

Monorail could bring own problems

By Sue Red
Daily Egyptian Staff Writer

The proposed monorail rapid transit system may be the solution to SIU's parking problem. But there are those who doubt it could be introducing its own set of problems.

John Loneragan, associate architect at SIU and originator of the plan, said he hopes to have the details of the project worked out within the next couple of weeks for presentation to SIU's Traffic and Parking Advisory Committee. From there it goes to the chancellor. Board of Trustees and Illinois State Board of Higher Education.

Under the present plan, monorail stations would be physically separate from the buildings they serve.

Loneragan said, "But my whole hope is that buildings be adapted to the use of the rails," perhaps with the track running inside adjacent enclosed halls, eliminating the necessity of going outside the building to catch the monorail.

Recent cutbacks in state and increased in student fees have caused financing of the monorail to be questioned. Loneragan has estimated the cost of the monorail at under $10 million. This includes three million for the 12,000 car parking lot and $2 million for 48 monorail cars and about a mile of double track from the lot to the campus. An additional $2.3 million would cover the cost of the track for the inner campus monorail loop.

State funds appropriated to the University cannot normally be used for parking. Loneragan said, but under a special plan the state might finance half the cost of the project as long as a decision is made to provide "a workable system for parking" by 1975.

Ed Hammond, assistant to the chancellor for student relations and member of the parking committee, said he understood the time limit for this aid to be 1976 and emphasized the need for responsible action to be taken soon.

1968 report gave other solutions

John Loneragan, associate architect, said three solutions other than the monorail were suggested to the SIU Board of Trustees in a 1968 report on Carbondale campus transportation by George Ansellevicus, member of the SIU architectural board of consultants.

The report dealt with expanding surface lots, building a system of high-rise parking garages and setting up a perimeter parking lot with shuttle bus service.

Loneragan said the parking garages were rejected not only for $21 million and that the bus system was undesirable because it would require three shifts of drivers, one a maintenance cost and would interfere with car and pedestrian traffic. Hammond said the surface lot "wouldn't work" if a special road were constructed for it but that the system "is extremely costly and the problems of drivers and maintenance costs would remain."

Loneragan said he plans to present the proposal before the Board of Trustees by July of this year, or at the latest by September, as a portion of the system would take about a year.

All students would be assessed a yearly fee of $30 to cover the cost of the loop and each user of the perimeter parking lot would pay an additional $15 per year. Under this plan, the cost of the loop lot would be amortized in 18 years. Loneragan said.

Brian McCaskey, assistant to the chancellor for donot al and funds, said the University might finance an additional 10 per cent maintenance fund and a $1 million year replacement cycle included in Loneragan's proposal.

McCaskey also pointed out that students will be forced to pay the $30 fee whether they use the monorail and that this fee may be subject to increase. Loneragan agreed, said costs may fluctuate but said he did not expect the $30 student fee to be increased by more than $5.

Tom Karchel, a graduate student in design, said he thinks more definite and financial investigation is needed before the plan is approved "so students will not be stuck with paying off a bond issue for a monorail they may not be using."

Karchel said he thought there was a lack of detailed study concerning many aspects of the monorail. "I don't think the strengths of the University are being used to the fullest in exploring this and other solutions to the parking problem."

Karchel pointed out that the relative success of the Bay Area Rapid Transit System in San Francisco was greatly due to years of careful planning. He cautioned the University's making a commitment for the monorail before all the facts are known, adding that the main advantages for a monorail are for densely populated urban areas which Carbondale is not.

Utah firm studies system

Loneragan said the Universal Engineering Corporation of Salt Lake City, Utah, has been contracted to make a detailed study concerning the monorail and that he expected to have final reports from them prior to the final presentation of the monorail before the SIU Board of Trustees and Illinois State Board of Higher Education.

Loneragan said he questioned whether solutions used by other universities had been considered in developing a solution for SIU, mentioning the parking garage plans at Berkeley and a central parking lot and shuttle bus system at the University of Wisconsin as examples.

Loneragan said he has received "less than glowing reports" concerning the Wisconsin system and that the problems there were different than those at SIU if only because of SIU's greater enrollment.

Karchel said he thinks studies made by private consulting firms have not been fully considered. He said he understood these reports did not indicate a monorail was the solution.

Loneragan said these reports analyzed the problem but were not for the purpose of making recommendations.

Hammond, the chancellor's assistant, said that, proceeding the monorail is favorably received and used, he questions whether its capacity will be sufficient in years to come.

Loneragan said under the present plan, trains would be spaced at two minute intervals, half a mile apart. "This is not much. There is no way we could actually operate safety within 200 feet of each other so performance should be improved, he said.

The perimeter parking lot is to be built west of the Education building where MeLaFerry Roeser & Associates, one of the three companies invited to make the proposal, said it would be more feasible to operate a monorail on a 350-foot block.

Information concerning a timetable for the RT 51 relocation is not available. Preliminary planning has not yet begun, but it should be underway sometime this year, according to Larry Meyer, designer for the State Department of Public Works and Buildings.

Some lots would be closed

Under the monorail plan all campus parking lots would be eliminated except those at the Arena, University Center and the various housing areas.

Loneragan said restrictions upon those who could use these lots would be up to the Traffic and Parking Advisory Committee. But he said the convenience and speed of the monorail would probably gain many more students and faculty belonging to the few remaining spaces.

Possible congestion of the central parking lot and overtaxing of the existing street system from the lot have been pointed out by Hammond and McCaskey.

The existing road structure to and from the lot would be less congested than the road structure leading to the various small campus lots now. Loneragan said, and the central lot would be divided into 20 smaller lots to ease congestion.

Hammond and McCaskey criticized the assumption that students would be eager to use monorail transportation, especially if it entailed driving clear across town to park and face possible delays and inconvenience with the monorail.

Also, under the present plan, monorail track would not offer service to certain parts of campus. Loneragan said the monorail concept can be modified and extended but the initial idea must be accepted first.

He said a coordinated bus system from outlying areas to the monorail could be provided. The issue of additional cost is a factor.

The carrying capacity of the monorail during class break periods has also been questioned. Loneragan said, with the four minute circuit time for the inner loop, a student would have two chances to catch a monorail between classes.

Hammond said the advantages of the monorail may move it to be, in fact, the best solution to the problem but that the technology has not been fully considered. He first, we have to consider whether the costs, inconveniences, and necessary personal changes are worth it.

Student representation on the parking committee has been relatively unresponsive. Representatives were appointed Hammond said, but mass meetings and every "issue new called for" could handle 3,600 in half hour

Fleet could handle 3,600 in half hour

The monorail would provide transportation from a major parking lot on the periphery of campus into a campus area at a rate of 3,600 people every 10 minutes, according to John Loneragan, associate architect at SIU.

A fleet of 48 cars each with a 30 person capacity, would form 15 trains. Loneragan said it would take the trains about 10 minutes to circle the campus and leave the parking lot in peak periods, a train would leave the parking lot every five minutes and make three major stops on campus.

During non-peak periods, one train could make a continuous circuit back and forth from the parking lot in five minutes with the other five trains remaining on the outer campus to back up transport persons between buildings.

Each car has its own propulsion system so if maintenance is required, it will not jam up the rails. Loneragan said.

The other seven cars will simply sit around until it reaches the maintenance station, he said.

Lawyer pleads insanity for Tate trial defendant

LOS ANGELES (AP) — The chief deputy district attorney in the Sharon Tate murder trial asked Thursday to enter a plea of not guilty by reason of insanity for his client, Patricia Krenwinkel.

The judge did not immediately rule on the motion but summoned all attorneys into his chambers to discuss the surprise twist, which came just before the penalty phase of the trial was about to open.

Miss Krenwinkel, 21, was convicted of murder-conspiracy Monday along with Charles Manson and two other women members of his hippie cult.

Attorney Paul Fitzgerald told the court he realized it was "very unusual" to make a change of plea at this point but added: "I made a tactical decision in advance of the trial and perhaps it was an erroneous decision."

He said he previously felt such a plea would amount to Miss Krenwinkel admitting to the charges. "Now, because the situation has changed remarkably," he said, noting the defendant now faces the life-or-death decision of the jury.
Senate censors fraternity for ‘tasteless’ advertising

By Cathy Speagle
and Chuck Hutcherson

Daily Egyptian Staff Writers

The Campus Senate Wednesday night accepted a resolution censoring Alpha Phi Omega, a service fraternity, for advertising described as the “tasteless.”

The advertisements had been printed in the Daily Egyptian and posted on campus, asking “Are you afraid you aren’t an abortion?” The administration said the activities of Alpha Phi Omega are “tasteless.”

The resolution, submitted by Donna Komets, westside dorm senator, and Davae MacKinnon, University Park senator, was adopted by the Senate. The resolution requests that the administration take action to remove the advertisements.

Representatives from Alpha Phi Omega said they had not meant to offend anyone, but were trying to express the “joy of being alive.”

The resolution was accepted by the Senate following a debate where students expressed concerns about the issue.

The Senate also accepted a resolution supporting the Student Community Food Cooperative. A $1.00 honorarium will be given to the students who signed the cooperative.

New Black choir seeking members

By University News Services

A Black Studies Choir, recently organized by the Black American Studies Cultural Resources Center is seeking more student and community participation, according to Ron Blanding, director of the center. The choir, which is the first of its kind in the country, will be meeting at 2:30 p.m. Monday evenings in Dunn Auditorium.

The choir will be accepting new members beginning February 1, with auditions to be held at 4 p.m. on Mondays.

"DOWN BY THE TRACKS"

Page 8, Daily Egyptian, January 29, 1971
SIU grad talks black economics

By John D. Young
Daily Egyptian Special Writer

Warren D. James, a 1967 graduate of SIU, returned to the Carbondale campus Wednesday to speak on "Black National Product" and to give a total picture of black economic progress in America.

St. James, the first student to be graduated from SIU with degrees in economics and government, and a bachelor's degree in education and a master's degree in science.

Recalling his graduation, he said, "They asked me why I wanted to get three degrees, and I told them nobody else had received three. I wanted to be the first student."

While at SIU, he was a member of the cross-country and track teams and later became a high school coach for a team which included comedian Dick Gregory. He is now the President of the Bottomless Coke.

Rinella says no new VT1 housing planned

(Continued from page 1)

Rather than list all of the deficiencies in each of the new apartments, we would like to request the Architect's Office to prepare a preliminary estimate of the cost of remodeling the new apartments to include electrical work, plumbing, structural furnishings, etc.

Rinella said he will also examine into the feasibility of the operation of the center.

He said he "feels there will be any new housing at VT1. The biggest problem, he added, is economics. That is, how much can the students pay. "If anything is built it will cost more than it does now," he said.

Choral group will do classic songs

Early English music will be the subject of a concert presented by the Collegian Singers at SIU at 8 p.m., Feb. 5, in the Lutheran Student Center.

This choral group will perform musical arrangements of the fourteenth and fifteenth centuries, the Tudor and Restoration periods.

The concert is free and open to the public.

IF the Power is to go To Then First, The People m

UNIVERSITY SENATE

A Venture in Shared Responsibility

A proposal to strengthen the existing councils and senates into one system that will allow for joint decision making for this our University Community.

Undergraduate Referendum / January 27-29
Faculty Referendum / January 19-29

This announcement sponsored by Student Government & paid for...
The people ....

just accept The power!

That is the idea of an All Campus Senate.

One Senate that will include all the individual Campus Senates.

It won't take the place of any of those Senates, but it will allow them a chance to all meet together. An All Campus Senate.

But First you have to vote for it. Vote Today

This is the last day you can Vote!

Polling places will be at Lentz Hall in Thompson Point, Grinell Hall in Brush Towers, Trueblood Hall in University Park, the first floor of Morris Library and the ground floor of the University Center.
Proposed monorail system discussed

Additions to the monorail rapid transit system were discussed at a meeting of the Transportation Services Advisory Committee Tuesday.

Under the tentative proposal the monorail would continue as a double track running from campus to a passenger parking lot west of the SIU Arena and approximately two miles west of the former monorail loop.

The cost of the entire monorail system as now proposed is estimated at $15 million by John Lonergan, associate architect at SIU.

One of the changes proposed by Lonergan would relocate one of the tracks landing on the parking lot to campus so that it would run south of Lake-on-the-Campus and back to the inner loop.

Lonergan said this would involve an additional 1,800 feet of track and cost roughly an additional $3 million. If this cost were absorbed the student fee of 55c per campus loop use, this fee would be increased by about 55c, Lonergan said.

"But this would open up a couple hundred acres of additional land in that direction," he said, "and I personally believe that this is something the state might help finance.

Analysis of the proposed monorail

Lonergan said the parking committee had requested information concerning the possibility of this addition and estimated it would add about $1.50 per year on the student campus loop fee.

At this time, Lonergan said he didn't think the monorail would plan to serve "specialized groups like those at Brush Towers because this is not contributing to the primary goal of providing academic circulation for all students."

Two basic methods of constructing the monorail track were also discussed at the meeting. Under the tentative proposal the monorail would run on a continuous circuit. Lonergan said, This method has been questioned as to possible delays of individual cars snagging the entire system.

An alternative would be the construction of bypass spurs of track at each station to allow trains not programmed for particular stops to continue without slowing up for stopped trains.

Lonergan said the continuous circuit would be the least expensive and easiest to control. He said the monorail is programmed to absorb delays of two or three seconds and that additional adjustments in scheduling could be made if necessary.

Twain raps ... smoking to sin

With a fluffy white wig, two paste-up eyebrows, a handle bar mustache and paint of grease, the Broadway actor, Tom Noel, transformed himself into Mark Twain, American author and humorist, for an applauding crowd at Thursday's University Convention.

Performing before approximately 2,000 students, Noel as Twain discussed an entire gamut of subjects from railroad systems, smoking, and man's life on the Mississippi.

The title of the program was "Mark Twain at Home" and the SIU Arena stage was decorated with a piano, an armchair and a piston to convey the feel for Twain's humor and philosophy.

At intervals during the performance, Noel sang several songs that were popular in Twain's time.

After the performance was over and the make-up of Twain had been removed and put back in the box, Noel discussed his impersonation of the famous author.

"I try to keep most of the material I use in the sketches as close to Twain's own words as much as possible. Sometimes he said, "it is necessary to link a sentence or paragraph together."

Noel said he has been doing Twain for about five years and is constantly working to improve the quality of the make-up. During his own make-up, he said, "it takes between 90 minutes to two hours to put it on."

Noel makes his home in New York City and has appeared in recent motion pictures such as "Funny Girl" and "The Boston Strangler."

Parent Relations

seeking members

Members are being recruited for the Parent Relations Committee, a part of the Student Government Activities Council, according to John McAlear chairman of the committe.

The Parent Relations Committee, formerly the Parents Weekend Steering Committee, is a new group that concentrates on informing parents of SIU news throughout the year instead of one weekend.

McAlear said he said the committee also works with the Parents Relations Club as well as with parents of SIU students.

Interested in working on the committee should attend a meeting at 8 p.m. Tuesday in the Student Activities Conference Room on the second floor of the University Center or contact McAlear at 457-2772.

That's what reading should be. Like watching a movie, for example. Its pace should approximate reality. In a word, reading should be Dynamic.
To over 450,000 persons, reading is already dynamic. They're the graduates of Evelyn Wood Reading Dynamics. In 8 short weeks, each person mastered the technique of reading. And now, each reads at least 4.7 times faster with equal or better comprehension and recall.
To them, there's nothing uncommon about reading an average novel in two hours. Or finishing off textbook assignments of 50 to 75 pages in an hour. Or reading a newspaper in a matter of minutes.
That's easy reading.
And you can learn how to become an easy reader by attending one of our free one-hour introductory lessons this week.
We've scheduled them for your convenience. At various times, in various locations near your home or job.
They're absolutely free. You're under no obligation whatsoever. Besides that, they're fun. You meet a lot of great people like yourself.
People who want to get more out of life.
Starting today.

**SIU professor to talk in Utah**

By University News Service

Kieran D. Jud, director of the Utah School for Emotionally Handicapped Children at SIU will speak Feb. 5-6 in Utah as consultant and speaker.

Jud will be consultant Wednesdays to the Granite School System in Salt Lake City as a Title III program and will speak to teachers and administrators. On Thursday he will be consultant to the Department of Elementary and Secondary Education and deliver an address at Utah State University. On Feb. 5 he will serve as consultant to the Hillside Living Center for seriously emotionally disturbed adolescents in Logan. The final day Jud will participate in an all-day workshop of Utah, Idaho and Utah teachers and administrators of the Utah Division of Children with Behavioral Disorders. There he will address the topic, “Self-Knowledge as an Attribute of Teachers of Seriously Emotionally Disturbed Children."

Jud, who also directs the SIU training program for teachers of the emotionally disturbed in the new secretary of the national organization of Directors of Training Programs for Teachers of Emotionally Disturbed Children."

**Research will outfit biological arsenal**

WASHINGTON AP — President Nixon has announced that the biological warfare facility at the Pine Bluff Arsenal in Arkansas will be turned into a national research center to investigate the harmful effects of chemicals on man.

The National Center for Toxicological Research, as it will be known, will be operated under the direction of the Food and Drug Administration. The FDA, in turn, will begin occupying the facilities as they are phased out by the Army.

 Destruction of germ warfare agents at the Pine Bluff Arsenal will be required at least a year. The laboratories and biological production facilities are expected to be vacated entirely before June 30, 1972. White House said.

You must be honest about drugs, says ex-addict

By John Chalmers

SPRINGFIELD, Ill.—See Bill White, 38, and you would never guess he was a former dope addict, seeing a typical biped—haired to his shoulders, Levi's, beanie, dark glasses.

But White is actually an employee of the Illinois Department of Mental Health, a former addict who is now a counselor at work in the local drug culture. White likes it like it is.

"Most of the educational programs in the schools aimed at drug abuse that I've seen do more to get kids up to go on drugs than all the posters I know," says White. "I see the kids that use drugs by showing them movies with scenes of wild parties, flashing lights, swirling colors, nice-looking chicks and acid rock music—that's enough to make anyone turn on.

"The 28-year-old White, a magna cum laude graduate of Illinois Eastern College with majors in sociology and psychology, has been with the department full time for the last year, and for two years before that as a student worker.

"He has had special training at Gateway House, a rehabilitation center in the Chicago area run by former drug addicts, and at a mental health center in Decatur. White is a member of an "outreach" team, groups which are accepted and trusted by young addicts who have turned off the rest of their world.

"Outreach teams work from within the drug culture and also serve as links between drug addicts and community services available to them that they often don't use for fear of arrest or parental involvement.

"He talks freely of his own drug experiences, gotten for over two years on amphetamines.

"We were taking pills in college to stay awake. We were too sophisticated for upper-class dope freaks. We got our straight A's, but we paid the price. I started walking like a zombie, couldn't rap with people, lost coordination, spilled coffee. I had confidence in myself so long as I had the pill, but without them, nothing. Who wants to pay the price?" White's basic tenant is "You've got to be honest with them kids. One big reason a kid goes from sniffing glue to sniffing ether is because somebody has lied to him and said it won't be any trouble. He'll be knocked or psychiatric if he smokes it just once. And the kid doesn't even know it and it's just ripping off a couple cans of his dad's beer and the kid thinks, 'I don't feel so good, may be I'll go get some or anything...it's not that bad.'"

"So thanks heroin can't be as bad as they say either."

"White demonstrates his approach at a high school classroom session. Defining "ice cream" or weekend heroin addiction that costs about $1 a day, and the "super habit" which costs $80 to $100 a day, he asks, "How, how do you support this habit?"

"And, he adds, the kid's got to steal or push or sell for it.

"He talks about marijuana, likely to be the younger's first drug experience. He doesn't feel it should be legalized until research proves it safer, even though present penalties are far too severe.

"On speed he tells the kids, "I've been working with kids who are on pure speed--crystal Methedrine. Half the circuits in their brains are blown. Speed can make you sick or make you a vegetarian."

"But heroin, "It's almost impossible to leave it--say you regularly take a trip at the back of your arm. What do you do? You shoot it in the back of your leg, your neck, under your skin. The chances are you're dead before you kill yourself. You'll get infections and hepatitis from the needle."

"He has suggestions for parents, for schools and communities for dealing with what he calls "the nationwide drug abuse epidemic."

"He urges parents to start by cleaning out medicine cabinets, removing the amphetamines, diet pills, barbiturates and tranquilizers, since most high school kids get their drugs at home anyway.

"Parents who discover their child using drugs must panic, he warns. "Follow through in a calm and rational manner as possible and explore all facets of your child's life with you. Drug experimentation does not exist in isolation from other serious problems."

"Sachs, he feels, should impress the quality of their drug abuse program and community should evaluate their medical and legal abilities to deal with young addicts. Sachs should also implement new "outreach" programs, but should insist the temptation to establish treatment resources at the cost of community programs for other adolescent programs."

Job interviews posted by Placement Services

Food stamps available, but hundreds haven't applied

By Ray Madeo
Associated Press Writer

EDWARDSVILLE - (AP) - A Madison County welfare caseworker, in a delegated rental house, is out of work and says his 2006 veteran disability benefit is "really isn't enough to live on."

"I wish I could get those food stamps," he said.

He has turned hundreds in Madison County who could apply for the food stamp program, but for various reasons, haven't. Last week it was reported that 1,000 students at Southern Illinois University Edwardsville have enrolled since last September.

An Associated Press survey last week showed students at other colleges across the nation are turning to food stamps to help with the costs. Some administrators disapprove, saying the program was not established for college students.

And some Edwardsville residents worry that the students getting free food.

"Do you think they are privileged characters?" asked a professor.

But it doesn't bother Bart. "A lot of these students probably need help," he said.

His house is on an unpaved highway, but he eats in a pitiful poverty pocket of Neoga in Edwardsville. He has no running water, no telephone, no television and cooks on a hotplate.

Once Bart walked to the food stamp application office but the waiting in line and registration process "made me upset and I kept the hell with it."

A neighbor, Mrs. Maude Davis, 72, gets food stamps when she can get a friend to drive her up for her at an office in Alton. "I may quit," she said. "It's hard to find a way."

Maureen Harris, director of the Madison County office of economic opportunity, said that in the last 18 months her office has helped 300 percent enroll in the food stamp program.

One of his caseworkers, Mrs. Ruth McCallion, said, "There are thousands more who are eligible, but many resist because of the stigma."

Ted R. Funkhauser, II, director of the county's public aid department, said the students began enrolling last September after learning that Food stamps had been broadened to make them eligible.

David Smith, editor of Alton's, the county's newspaper, said an article on the food stamp program published in September might have spurred interest among students.

"I think I share the view of most students that it's not welfare. It's more like a government subsidy to people who need it. No one plans to be on it permanently," Smith said.

Participants are allowed to have a top income of $300 a month and they can get as much as $20 a month in food. They pay from 50 cents to $10 to buy the stamps, which are redeemable at stores.

The new eligibility of people on strike, such as workmen of Union Electric Co. and Alton Box Co., has also drawn some resentment.

Funkhauser said Funkhauser sees the food stamp program as an extension of Social Security, providing help to those in need.

SIU hurdler eyes Olympic bid

By Ken Stewart
Daily Egyptian Sports Writer

As agile and almost as fast as a Sakko dog, hurdler Ron Frye appears to be on the right track for a berth in the 1972 Olympics.

For the 6-3 trackman has been endowed with a 170-pound frame and built for a hurdler.

"With my progress now," said Frye, "I should increase my time, and by the time I get to the nationals, I should be at seven flat on the 60-yard low hurdles.

"During the outdoor season, I should cut the time down even farther, I hope to run in the next Olympics. That's my biggest ambition." Frye tied the school record in the 60-yard hurdles set by Herman Gary during the 1964 season in 7.4 seconds.

Although his father was track coach at Oak Park High School in Laurel, Miss., Frye didn't become very serious about track until he came in contact with Ralph Boston, a standout on his father's team.

Boston went on to break the broad jump record in the 1960 Olympics as a Tennessee State trackman.

He began to share some of his secrets with his coach's son although young Frye wasn't at joining level yet. He showed me some personal techniques and workouts to do. Frye said, such as exercises to better techniques for the hurdles and how to stretch my legs.

Frye said he thinks jumping hurdles is harder than running because of techniques needed as a hurdler.

As a sprinter, you need quick starts. But "Some hurdlers have good speed, while others may have good techniques.

"I think a person of normal weight who is in real quick can be a good hurdler. Height has a lot to do with it, too. Taller persons have a slight advantage."

Frye moved with his family to St. Louis and he joined the track team at Beaumont High.

When he caught SIU's eye, the University had no trouble getting him to come to Saluki country.

"I had been wanting to come here before, but I hadn't been given any thought about running track. I just wanted to come to SIU. Coach Hartung notified how tall I was when I was working out one day and he urged me to get into hurdles.

Police book horse

BLOOMINGTON — At a horse that broke loose from its tether and damaged a fence was bailed out police records as an offense.

The horse, owned by Ron Donaldson, was seen behind a service station when it made its break.

Crackups stop bobsled trials, U.S. in trouble

CERVINIA, Italy (AP) — A series of new spills, one of them seriously injuring a British nobleman, forced cancellation of trials Thursday for the world four-man bobsled championships, and the United States found itself reduced to a single sled.

"We will enter only one sled—I have no alternatives," Pat Martin, the U.S. team manager, said in Dimarco that his team had already been splintered by injuries and the refusal of three members to slide.

The most serious of the latest mishaps occurred near the end of the 1,540-meter track which already has claimed one death and a number of injuries.

The sled, driven by Britain's Prince Michael of Kent, overturned as it came out of the great labyrinth bending toward the fastest sector of the icy chute. Three members of the crew fell out but the prince was caught with both legs inside and his body hanging out. He was dragged 200 meters.

He was taken to Lasa Hospital where doctors said he suffered shock and cuts on the face, hand and left elbow.

The prince, a cousin of Queen Elizabeth, was eliminated from competition.

Georgia Tech game
not shown locally

The SIU Georgia Tech game will be broadcast, but you're going to have to get a ticket if you want to see it.

Because, while there is an official blackout by Southern Illinois University, none of the stations normally covered in Carbondale will pick up the broadcast. In a matter of fact, the only station in Illinois to broadcast the game will be WMVP in Chicago.

The nearest station to pick up the game will be in Terre Haute, Indiana where Indiana State—Miamiwestern Conference member—is located.

Terre Haute is 180 air miles from Carbondale which makes breaking the unofficial blackout rather difficult.

There have been situations where a special coast-to-coast antenna on top of a large building or tower has been able to break blackouts in the past but 180 miles is a long way.

According to SIU sports information director, Fred Huff, this game will be shown on the same network which carried the UCLA-Notre Dame game last weekend and former NBA star Cliff Hagen will do the color while Gene Kibby will do the commentary.

One of the reasons that no local station will carry the game is that they are committed to certain conference's game of the week.

WLII in Harrisburg is committed to the Big Ten game of the week and WYES in Paducah, Ky. picks up the Southeast Conference game of the week.

KYVS, at Cape Girardeau Mo. will be running a number of programs which include the Saturday cartoons.

This marks the third time an SIU basketball game has been regionalized. The school will receive something in the neighborhood of $2,000 for the game.

The game will start at 12:45 to accommodate the TV people and will be followed by a gymnastics meet with the Chicago Circle campus of the University of Illinois.

Gymnastics double-duel
Huskies, Falcons meet SIU

By Fred Wiesberg
Daily Egyptian Sports Writer

Northern Illinois University is billing Friday night's double dual gymnastics meet between SIU Northern and the Air Force Academy at DeKalb as "the finest gymnastics attraction ever presented in Illinois.

That may be debatable since the Madison Open meet was held in a sub-basement of Chicago, but it's almost getting to the point where the SIU gymnasts rate billing whichever they go.

Not 1-1 this season in dual meet competition, the Salukis look like at least an even bet for the NCAA championship and while maybe Jimmy the Greek wouldn't put his money down a bet like that, a lot of SIU partisans would.

The Salukis shouldn't have a great deal of trouble downsing Northern. The Huskies recently set a school record by scoring 133.50 against Georgia Tech while SIU has tapped the 130 mark four times and are averaging 100.30 despite a sub par performance against Memphis State several weeks ago.

The Air Force Academy was an independent representative to the NCAA competition last season finishing fifth.

Last year, the Falcons lost to SIU 124-150 during the regular season. SIU has won all six meets it has had with the Air Force Academy.

SIU coach Bill Metzle will use Tom Linder, Nick Woolf and Frank Remenich as his all-round men in the meet.

Linder has now won four all-around championships this season and has the highest average in the individual with 9-43 in the horizontal bar.

One of his all-around wins was against Iowa State's Brent Simmons in the only SIU team loss of the season. He had never beaten Simmons in six tries. Linder's best score of this season has been the horizontal bar in the Iowa State meet.

Woods and Benesh have been performing well for the Salukis all season as all around men. Freshman sensation Gary Moravos will work as an all-around man due to a lingering shoulder injury which he sustained in a December auto accident.

Moravos will, however, work five of the six events as a specialist. He'll be entered at the floor exercise, high bar, vaulting parallel bar, and the horizontal bar.

Other specialists will be Tim French in the floor exercise, mounting half horizontal bar; Steve Duke in the still rings and parallel bars; and Charles Roginsk in the still rings. Roginsk is averaging a 10-63 in the rings which is second to Linder's horizontal bar average for the highest individual average.

Northern is coached by Robert Dun who was a member of the gymnastics club before the sport was elevated to intercollegiate athletic status and taken over by the athletic department.

The Huskies are an all four meet winning streak which includes three wins on a road trip down south against Georgia Southern and Georgia Tech. Most of the Northern squad is from the suburban Chicago area and is primarily a freshman and sophomore team.

The Salukis will fly home after the double dual meet in DeKalb, top-downly get a few hours sleep and go against the Chicago Circle campus of the University of Illinois Saturday afternoon immediately after the 12:40 p.m. SIU-Georgia Tech basketball game. If everything goes according to the schedule as did the meet against Iowa State after the Illiana State basketball game the meet should start at 1:30 p.m.

Saluki swimmers to meet Cincinnati Bearcats tonight

By Ernest J. Schwest
Daily Egyptian Sports Writer

If the SIU swimmers victory over the Ohio State Buckeyes last Saturday is any indicator of things to come, Rick Easack and his counterparts could be in for a highly profitable weekend.

The activities will begin Friday night in Cincinnati as the Salukis take on the University of Cincinnati while returning to University School pool Saturday for a contest with the University of Oklahoma.

As the records show, Southern beat the Buckeyes 65-63 before returning to University School pool Saturday for a contest with the University of Oklahoma.

The record of the Bearcats squad is set by Rick Goll, Jim Mayer and Steve Blyse.

Goll is the one Bearcat the Salukis will be looking at as the 300 yard butterfly has been one of the most consistent performers this season. The record in the distance events is handled by Mayer and Pyle, while Bob Creevy, Jerry Schelly and the less fortunate Bearcats last to the same team, 76-27.

Coach Roy Laggard's squad also lost to the University of Oklahoma 82-31.

Those are the only two black marks against the Bearcats as they have the most three-meet winning streak by beating Bowling Green, Western Michigan and Western Michigan Conference member Indiana State, to bring their season's dual meet record to the 3-2 level.

The Bearcats don't boast a squad anywhere near as powerful as the Salukis but they should be very strong in the diving events.

This event will be handled by Glenn Drickeben and Tom McLaughlin. The duo has been competing in the recent win streak and should provide Saluki divers Don Cashmore and Leren Walker with another stiff challenge.

The remainder of the Bearcat squad is set by Rick Goll, Jim Mayer and Steve Blyse.

Rings specialist has shot at NCAA title

Meet Charles Ropiequet, SIU gymnast

By Fred Landig

-Daily Egyptian Sports Writer-

"Charles, this gentleman is here to talk to you," said assistant gymnastics coach Jack Biesterfeld.

"This is the guy who said I'm 411, huh," said Charles Ropiequet.

"No, I'm 5-2. Correct it, will you?"

You know, Sablot Shorts or something, Ropiequet kidded.

OK let the Daily Egyptian stand corrected. Charles Ropiequet may look a bit on the short side, but he still rings specialist stands 5-2.

But that's not what the writer was there to talk to Ropiequet about.

Of all the SIU gymnasts, Ropiequet has the second best average in an individual event with a 9.36 on the rings. And of all the SIU gymnasts, Ropiequet is the only one who works one event. And, of all the SIU gymnasts, Ropiequet is the only one who showed up four years ago for practice without ever having competed on a gymnastics team in his life. In other words, a walk-on.

They didn't have a gymnastics team at my high school, Bond Park," he explained. "All they had was a gym club. I'd always had an interest in it, though."

He worked out during the summer between his senior year in high school and his freshman year at SIU and hung up his scholarship. Right now, he's the second best collegiate rings man in the United States— at least that's what the statistics sheet says.

Dave Seal of Indiana State won the NCAA title, after Ropiequet did a perfect routine, but with a not-so-perfect dismount in the finals which earned him a 9.4.

His highest score has been a 9.55, but he says that he can do a 9.7 or 9.8.

"I'm ready for it," he said. "When I get out of the board room, I know I've got it when I bobble it a little. It's still good sometimes, but it's not as good as it could be."

As a specialist, Ropiequet doesn't quite get the coverage that a top all-around man like Tom Lindner gets.

"I've told him, "You've got to go out and kill this man,"" he answered quickly. "I work on it all the time. I warm up on the floor exercise for about half an hour every night before I work on the rings."

"I started on the parallel bars here in my first year but then coach Meade said why don't I work on the rings so I switched."

Ropiequet will not be eligible for any international competition because he only works one event, but he thinks he could do well if he was allowed to.

"Even if I could, though, he says he wouldn't."

"After this year, this is it," he said. "I'm not going into graduate school. I won't be able to work out here. I hope to be going into the Peace Corps in Latin America. Maybe I could get into a place where I can use my gymnastics skill—or a physical education position, but I'm not going any further in gymnastics."

"What about going to a Spanish major and hopes to use the language in his Peace Corps work?"

"He thought about going into coaching," he said. "I think I'd be a good coach. I have the skill but I don't have the patience to get it across," he said.

"I'd like to do to go into an international relations thing—possibly in my major—but I've got a lot of organization if possible."

But rings specialist says he spends most of his time now practicing and studying.

"I said before setting it that he has about a four point average, "but this sport is always on my mind. I'll be sitting in a class and thinking about gymnastics. And when we're on the road, well, it's a constant thing."

Charles Ropiequet

This is Charles Ropiequet, one of SIU's threats for an NCAA national championship. He's from the same college as a gymnast, only four years ago and finished second in the still rings national competition last year. (Photo by John Lopinot)

Carlton Frazier supplied for the 1967 Sablots his vote for the finest college players in America.

When Georgia Tech meets the Sablots at 1:30 p.m. Saturday in the Carbondale Arena, Yunkus will be coming "home" for the first time since he left Georgia for Benton for an outstanding career with the Yellowjackets.

Recruited heavily by Southern, it wasn't the basketball program that kept Yunkus from staying close to home, according to SIU assistant coach George Lattan. Yunkus wanted to major in engineering and that's why he ended up with the Ramblin' Wreck.

Since his departure from the Southern Illinois prep ranks, there's been little but success for the 6-6 1/2 All-Americans.

As a junior last season, he was named Georgia College Player of the Year, received Press International favorable mention status, was a third team Associated Press All-American and was named to the All-National Invitational Tournament. The Yellowjackets made an unsuccessful run at the NIT crown, won by Al McGuire's Marquette Warriors.

Yunkus finished sixth in major college individual scoring last season with a 31.0 average and is tenth on the latest official statistics, scoring 38.1 per game.

His biggest asset is exceptional score potential from anywhere on the floor. He's much quicker than most 6-6 college players and his coach, John Hysler, says strength is Yunkus' biggest improvement since last year. He's been averaged over 11 rebounds per game.

Yunkus has better speed and reaction time than any one in the country. Had Nate Hawthorne grown a few more inches, the problem might not be such a problem today. He's got speed and strength.

Unfortunately for Lambert, his team and problems and until recently, Brooks was reluctant to mix it up under the Southern Illnui State banner. But he had been good from a rebounding standpoint during the season, although, had he called, especially against Powell, left something to be desired.

That will hurt because Yunkus draws fouls easily. He's already attempted 142 foul shots and more than Greg Stairck who leads the nation with a 52% completion percentage.

Saturday's game ends the five-game homestand which must be termed unsuccessful because SIU cannot finish it with a winning record. The best mark Southern could take into Craggad next Wednesday would be 6-7.

Homeland victories were notched over Indiana State and Ball State while Kentucky Wesleyan and Texas were victorious in the Arena.

Offensive boards a problem

Southern needs two main things to make the current season a success and possibly hold onto it's Midwestern Conference lead—offensive rebounding and a consistent play from Brooks.

With his present group, Lambert will always have trouble getting offensive rebounds. L. C. Bradford is too small. Powell seems plagued with foul problems and until recently, Brooks was reluctant to mix it up under the boards. If Southern has had as good from a rebounding standpoint as Yunkus, he is the best rebounder of the group but at 6-6, he's got a definite disadvantage.

Playing hard has been a problem all season as Lambert has switched from a run-of-the-mill team to a slightly more conservativive variety.

Throughout it all, however, no one has been more to blame than the Tar Heels. A player anyone is to blame for that. Great leaders are hard to find.

I still wonder does take charge, it's going to be the man of the off-season after all. SIU displayed against Texas.

When Lambert went to his "big man" lineup, John and Jerry Cruice were bench and it's been awfully hard keeping them with that man at center.

And don't assume Saturday's game is already lost. SIU teams in all sports have been in situations like this before. The best. Lambert's crew is due for a good one and this could be it.
