The internal budget for the fiscal year will be the main item on the agenda to be considered by the Southern Illinois Board of Trustees in their meeting July 30.

The meeting will start at 9:30 a.m. on the Carbondale campus.

The budget will be based on a minimum appropriation recently approved by the state legislature. This is the first budget for SIU and other state supported Colleges and Universities, which went first to the newly created State Board of Higher Education. Acting as an advisory board to the legislature, the Higher Board made suggestions and recommendations to the legislation.

Also to be considered by the Board of Trustees are construction contracts for two new building projects. These are the University Park Housing on the Carbondale campus and a science building to be built on the Edwardsville campus.

There will also be the usual matters of personnel changes at SIU for the Board to consider Tuesday.

A tentative date of August 13 has been suggested by university officials for the August meeting. It was originally set for Commencement day, Aug. 9.

The scheduled delay is to arrange a meeting at the earliest possible date after a specified waiting period, in order to advance the new building program as rapidly as possible.

McCoY Recovering

SIU Director of Libraries Ralph E. McCoy is recuperating at his home following surgery.

He is expected to be in Tuesday or Wednesday.

The executive board of the national John Dewey Society is meeting on the SIU campus today. It is meeting at the Dewey Project headquarters on Carbondale Avenue at 809 S. Elizabeth Ave.

George Axtell, SIU professor of Educational Administration and Supervision, is president of the Society.

The eleven board members attending the session came from the University of California, University of Illinois, University of Florida, Indiana University, New York University and Columbia University. Mrs. Donald Boydston of SIU is secretary-treasurer of the group.

Primary function of the John Dewey Society is publishing yearbooks and monographs and presenting lectures. It is about 30 years old.

The Society has nearly 500 members, mostly scholars in the field of education. About 15 to 20 people on the SIU campus are members.

The business of today’s session will include planning of future publications, making for the Dewey Project in Chicago in February, and other nominations and committee work.

The Dewey Society was founded by John Dewey as a form of publication. A famous speech by George Counts, now a distinguished visiting professor at SIU, to the National Association of Superintendents about 1933 stimulated the formation of the group. The SIU chapter was known as “Dare the Schools Build a New Social Order?”

SIU-Carbondale Study Plan

Putting University In City

Mayor Miller Says Agreement Near

Officials are now closer to reaching an agreement on a plan to annex SIU to the City of Carbondale than ever before, according to Mayor D. Blaney Miller of Carbondale.

City Attorney Edward Helton and John Rendleman, SIU general counsel, have been working together for the past couple of months to develop plans for the move to such a move, he said.

There has been talk of annexing the campus to the OK $12,255,806

For Southern

A bill, authorizing $12,255,806 in capital improvements for SIU was signed into law by Gov. Otto Kerner Thursday.

One of the major items in the budget is the $4.1 million for a new physical sciences building on the Carbondale campus.

In total, the bill is $6,155,806 for movable equipment for buildings financed under the Illinois Universities Building Board.

Other items include $1.5 million for land acquisition at the Beardstown, and other campuses and $350,000 for architectural planning and engineering studies.

The SIU improvements are among some $60 million in projects authorized in the state.

Another bill still awaiting the governor’s signature would appropriate $800,000 for another power plant addition on the Carbondale campus and $1.5 million for rehabilitation and renovation at both campuses.

Cool, Clear Water — A look at the bubbling fountain at the entrance to the University Center is enough to make one feel cool — even briefly — on the hottest day. For a report on how the giant Center is kept cool in 90-degree weather turn to page 5.

Education Group:

John Dewey Society Board Meeting On Campus Today

The first of June was payday day on the SIU campus in Carbondale.

Checks were prepared in the Personnel Office for 1,854 full-time employees — all members of the Carbondale faculty and administrators.

The checks were made out to 764 full-time non-academic personnel employed at the University in Carbondale, and to 29 part-time employees.

Finally, there were included checks for 2,642 students who are employed part-time while attending school.

The payments were for the services involved in operating a university in a community of 14,670 persons. For the month of May, the checks totaled $1,369,310, in rounded figures.

The records of the Personnel Office show the faculty-administrative payroll for the month of May was $897,748 for full-time and $9,766 for part-time persons.

The non-academic classification totaled $308,000 for full-time and $9,990 part-time, and the student payroll for the month was $64,359.

These are concrete figures that are available to provide an indication of the economic impact of a major university on the community in which it is located.

Each student on campus who does not originate from the Carbondale area represents certain resources brought from other parts of Illinois, or from out of state. These funds can represent past or present earnings of parents, of the student himself, or from numerous other sources.

The incidence of Student Affairs estimates the basic cost per student at SIU about $100 per month, not including tuition. How far this ranges from a basic figure depends upon the individual student, his means, his conscientiousness, and the other factors through which individuals make economic decisions.

One such student kept 40 percent of his expenditure “to the penny” for the winter, spring and fall quarters of 1962. When he totaled up the end of the year, his spending totaled $1,821.

He resided in Carbondale in off-campus housing, its primary expenses were $400 for room and board and $140 for miscellaneous expenses.

The student expressed surprise at his spending “on little things.” His list included items such as $120 for laundry, $68 for cigarettes, about $120 for entertainment, and $87 for what could be called “refreshments.”

Looking back on his $1,821 figure for 1962, he added this new factor: “That was before I kept a car.”

The impact of the University on the community is both real and measurable. It is a $2,500,000 annual figure, the student’s $1,821, and indirect, they are considered in the general census is an example.

In 1950, the population of Carbondale was 10,000. Ten years later, it had increased $2,500,000 a year. The Board according to the World Almanac tabulation.

This is a direct bearing on the state’s distribution of

A combination of school and tourism is offering a very rewarding experience to nine SIU students who are studying in Germany this summer.

The group, led by Carl Schweinfurth of the Government Department, is getting a six-week crash course in German Government at Hamburg University.

Most of the days are spent listening to lectures and touring various places. "The students are alert and very interested," reports Schweinfurth.

Switnfurt himself was a student in the first group of the project four years ago which was led by Orville Alexander, chairman of the Government Department.

"Here in Hamburg, the University has provided us with many lectures, including one by Professor Fritz Fischer, a world renowned expert on German history," Schweinfurth reported in a letter.

On July 2, the group went to Berlin, and on July 17, it was in Bonn, capital of West Germany, where German government officials explained to them the working of the German government.

Among places of interest which they have visited are

- Bismarck's tomb and the Bismarck Museum, To facilitate transport, Schweinfurt rented a Micro-bus in which he drives with his students for sightseeing.
- Alexander commented that this class will be much better off than the previous ones because of the added facilities.
- On Wednesday, July 17, was quite a busy day for the group, according to Schweinfurt. Here is what they did: 9 a.m., was a lecture by Doctor Boskowski, dean of the English Department, on the 'Future of German Democracy'; then at 11:30 a lecture by Dr. Fischer on history; then at 2:30 a lecture by Hanno Jochimsen, who turned the tables on me and took me to his home for dinner.
- The students get eight hours of credit shovelled in six weeks of class, says Alexander, "however, they do as much work as those doing a normal two terms of twelve weeks each at SIU.
- Alexander feels that a professor with a group of students in a foreign country has greater responsibilities for his students because 'over there I think of my students all the time, while over here, I am not accountable for them after they leave my class.'
- Schweinfurt reported a temperature of 78 degrees in Hamburg which Alexander thought was 'very unusual.'
- "I wore a top coat everyday in summer (in Hamburg) and the temperature was usually around 55 degrees," said Alexander.
- The course will end on Aug. 10, then the group will spend three weeks touring various parts of Europe, including Paris, Vienna, Florence, Venice, and probably Rome and the French Riviera.
- They will then board a ship from Rotterdam for the US, and at least arrive home about the middle of September.
- The group includes two sons of a deceased professor of the Language Department at SIU. They were studying at Hamburg University, and they joined in Schweinfurth's group and will come to SIU next fall.

On-Job Training:

Snack Bar Used to Train Blind Southern Students

Experience being gained this summer in a snack bar at SIU Southern Acres campus is expected to aid development of a unique training program for the blind.

The program is designed to train sightless persons to operate food stands in Illinois. Some of the initial features include a braille cash register, a burn on sandwich oven, and the honor system.

William Hickerson of Galesburg is pioneering the training, under the direction of Dr. O'Shaugnessy, business enterprise director in the Office of the Bield. He is also small business majors.

The stand is open during the summer term at Southern Acres. The operation serves not only as a job training, but an opportunity to study equipment and design requirements which are related to the program's aims.

New freshmen and transfer students at SIU will be eligible for the fraternities and sororities fall rush this year, according to new rules for fraternities and sororities.

The new rules, which provide for a deferred rush, mean that a student must be regularly enrolled for one term at SIU, excluding summer term, before he is eligible for rush. This means that new freshmen and transfer students will not be able to rush until winter quarter this year.

Another new rule that goes into effect this year is that of the required grade point average for eligibility. A student must have an overall average of 3.0 for fraternities and sororities, and 3.2 to rush a sorority.

Authorities stated that there will probably be a rush in the fall but because of the new rule only upperclassmen will be eligible. Most of the groups are planning their big rush for winter term since the incoming students will then be eligible.
Highlights of today's activities on the Southern Illinois University campus are the photographic contest at 7:30 p.m. in the Magnolia Lounge and the "Summer Madness Party at Boat Dock Tonight." The latter will feature records and a dice jockey. The photographic contest is open to all students interested in photography. They have until noon today to submit slides, which must be 5 by 7 inches or larger. The Southern Illinois Activities Development Center is accepting entries.

The funeral train of Abraham Lincoln slowly made its way through town and city, past soldier and preacher, amidst tears and bitter words. More than 7,000,000 people saw the shrouded figure of Lincoln as the train made its way to its last stop—Springfield, Ill. This journey was relived in a choral reading held Friday morning by high school members of the communication workshops.

Students in radio-TV, speech, and theater presented Millard Lampell's "The Lonesome Train" in Furr Auditorium. The production of Maurice F. Lokensgard, graduate assistant in speech, was the students' first performance of a major feature in the University Center.

During a trip to Ferne Clyffe State Park Sunday, Aug. 4, "help" was on hand, as the volunteers helped to keep the park. The park hosts various activities throughout the summer, including picnics, hiking, and a variety of nature walks.

Ferne Clyffe State Park

Daylight Saving Time

The change from daylight saving time to standard time will take place Oct. 27. The time will be set back one hour at the stroke of 2 a.m., and the clocks will run for the winter season.

Ferne Clyffe State Park will be open to visitors on weekends and during the week when weather conditions permit. The park offers hiking trails, picnic areas, and a nature center.

Ferne Clyffe State Park is located on the southern end of the Garden of the Gods area of the Shawnee National Forest. The area is known for its beautiful natural scenery, including waterfalls, cliffs, and hardwood forests.

Ferne Clyffe State Park is a popular destination for those seeking a peaceful escape from the hustle and bustle of daily life. The park offers a wide range of activities, including hiking, fishing, and birdwatching.

Ferne Clyffe State Park is a wonderful place to spend a relaxing day with family and friends. Visit the park today and enjoy the beauty of nature!
Associated Press News Roundup:

**WASHINGTON**

The proposed limited nuclear-test ban treaty faced strong opposition in the U.S. Senate Friday, after President Kennedy's TV-radio address to the nation Friday night.

Democratic leaders set out Friday to muster support for the initial treaty and quick ratification.

But Chairman John Stennis, D-Miss., said a Senate defense watchdog group will examine in detail the proposed new agreement.

His announcement was interpreted as an indication there might be some delay in the administration's effort for a quick ratification.

Stennis said his seven-member Armed Services subcommittee wants to know "whether this agreement fully protects our national security and whether any risks which may be involved in it are truly acceptable."

Sen. Barry Goldwater, R-Ariz., a member of the panel, previously announced his opposition to "the degree of ratification."

But Chairman John Dirksen, R-Ill., a member of the panel, said Friday he might enter the Senate race for governor in 1964.

President Kennedy Friday night said he would sign off-limits areas to the armed services Friday for the first time in his Administration.

He previously announced his opposition to off-limits areas.

**CARBONDALE, ILLINOIS**

"Whether the gimmick is 20-seconds or an extra minute of airtime to put on cable, the encompassing 14-miles of cable television may be a device to keep America free," Sen. Everett M. Dirksen, R-Ill., said Friday, explaining his position on the cable television bill.

Dirksen, checking the appearance of the cable television bill on Friday, said the Senate Republicans who said Friday they are checking the validity of the bill are close to the point where they have a gimmick or flaw in the proposed nuclear test ban treaty.

Dirksen said a new breed of space community was launched Friday.

"It is Syncom 2 and it is designed to 'over' the same area of the earth. At its planned altitude of 20,200 miles, it would be within range of more than one third of the globe's face. Only three of them, properly placed, would provide continuous worldwide communications coverage."

**NEW YORK**

Four major aluminum producers and the United Steelworkers Union agreed Friday on contract extensions providing 10 percent raise every five years.

All eligible employees will get 10 consecutive weeks of vacation, with 13 weeks' pay, every five years.

The plan becomes effective next Jan. 1.

**SPRINGFIELD, III.**

Edward Prey Jr. of Springfield, legal aid to Illinois House Speaker Frank M. Jordon, said Friday he might enter the governor race for governor in 1964.

Prey said he would sound out party leaders throughout the state within the next 30 to 60 days before announcing his decision.

Prey, 44-year-old attorney, will be the guest of honor at a reception in Mound City Saturday night.

**BELGRADE, Yugoslavia**

A Yugoslav city of 270,000 population was hit by a violent earthquake Friday.

Tanjug news agency reported possibly 1,000 persons were killed and thousands injured.

An estimated 80 percent of buildings were destroyed or damaged; fires broke out; earth was thrown into the streets in panic.

**HARRISBURG**

Three Indiana men are being held under the ICC,

**SPRINGFIELD, III.**

Gov. Otto Kerner has signed a bill requiring all beauty culture establishments in the state, a bill also applicable to tattoo artists and body piercing artists who practice their trade in the state or on a temporary basis in Illinois.

The bill was signed last week.

**JFK's Rail Plan "Unacceptable", Union Official Tells Senators**

WASHINGTON

Roy E. Davidson, head of the Brotherhood of Locomotive Engineers, told the Senate Commerce Committee that President Kennedy's plan to settle the rail labor dispute is "wholly unacceptable."

He said he has no doubt they would be kicked out of his job as head chief engineer if he went along with the plan to turn the issues over to an interstate commerce commission for judgment.

Davidson said he was told off by the Brotherhood in presenting their first reaction to Congress on the President's proposal.

He told a reporter he is certain each of the four major groups of on-train workers involved in the dispute opposes the plan for dealing with proposals by the carriers to end the new nationwide strike now disrupting the rail transportation network.

**CHICAGO**

Sen. Everett R. Peters, R-Ohio, said "reconciled to the fact" he no longer is chairman of the Senate Foreign Relations Committee, he has held the post for six years.

Peters made his remarks before a closed meeting of the Senate Foreign Relations Committee Tuesday night, at which time Peters asked the question about the future of the committee.

The committee, Peters also is chairman of the Senate appropriations committee.

**WASHINGTON**

Air Force Lt. Col. John A. Powers, controversial member of the American Astronauts, is losing his job. Sen. Barry Goldwater, R-Ariz., a member of the panel, said Friday he might enter the Senate race for governor in 1964.

"There is a slight variation in the reports, but what we are told is that a Republican, William J. Scott, a Republican, is running among the 50 states in the nation who are not employed by 10,000 people, "the will be in public affairs," Scott said.

In Chicago, a member of the panel, said Friday he might enter the Senate race for governor in 1964.

Sen. Everett R. Peters, R-Ohio, said he is "reconciled to the fact" he no longer is chairman of the Senate Foreign Relations Committee, he has held the post for six years.

Peters made his remarks before a closed meeting of the Senate Foreign Relations Committee Tuesday night, at which time Peters asked the question about the future of the committee.

The committee, Peters also is chairman of the Senate appropriations committee.

**WEATHER FORECAST**

Considerable clouds over northern Illinois. A cold front moving across Illinois. Only minor temperature changes with a high today of 85 to 90.

**SPRINGFIELD, III.**

Gov. Otto Kerner has signed a bill requiring all beauty culture establishments in the state, a bill also applicable to tattoo artists and body piercing artists who practice their trade in the state or on a temporary basis in Illinois.

The bill was signed last week.
By the touch of a knob, engineers can control the atmosphere for both winter or summer conditions from the central control panel.

Each square of ceiling tile has five slits from which cool air enters the room. After all systems are closed, it takes 48 hours to cool the rooms.

**Complex Machines:**

**Keep University Center Cool**

*Pictures by Keith Hackleman*

The condenser and chilled water circulating pumps are used to pump the condenser water to the cooling towers on the roof.

The six-hundred ton carrier absorption machine is the basis for the complete operation. By the use of lithium bromide, it can cool 1440 gallons of water per minute from a temperature of 56 F to 46 F.

Water used in the steam absorption process must be chilled to 54 F. Four large fans, each measuring eight feet in diameter, used to expedite cooling, are on top of the building.

The electrical distribution panel, which is a 440-volt switch panel, controls the fan motors on the air handling units automatically.

be gasoline tax. After certain relaxations for administration and grade crossings, Illinois ties receive $2 per cent of the price per mile of track improvements. This decreased the rate to 1 per cent from 1.5 per cent the previous year.

Another indicator of economic impact is found in the report of the Illinois Department of Revenue. The data is based on the state tax alone, and do not consider the half-cent or municipal levy at the state collection and refunding. For 1959, the state rate was 1.5 per cent of the first half of the year, and 3 per cent the last half. On this basis, 275 taxiing units in the Carbondale report to state tax receipts of $578,375.64.

In 1962, with a state rate of 3.125 per cent, 333 taxiing units reported sales tax receipts of $925,107.76, in sales in Carbondale. This indicated an increase, in Carbondale, of just under 50 per cent.

State-wide, the collection from 143,769 taxiing units in 1959 was $345,239,600.69; in 1962 figures from 160,517 taxiing units were $491,923,81.81.

While Carbondale's dollar collection was increasing by nearly 60 per cent, the state-wide increase was about 43 per cent.

This growth indicator has been paralleled in real estate valuation, The Jackson County clerk's office showed the Carbondale (city) valuation totalled $177,217,335 in 1959. In 1962, he figure was $29,796,345, in increase of over nine per cent.

The office said the increase represented growth and new businesses. The Division of Gibbonsdale Township valuation increased in as much as all but their 15 townships combined, Carbondale Township, which includes the city, represents about a third of the entire valuation of Jackson County, he office reported.

Jim Dupree, former SIU athlete and now a member of the Los Angeles (Calif.) Striders, is running today in Warsaw, Poland where the United States is meeting Poland in a dual track meet.

The event is the 100th, in the ultra-modern, 100,000 seat Ninth Anniversary Stadium on the grounds of the K. Background, and the Carbondale (city) valuation inARBondale Township, which represented the evaluation of Jackson County, he office said.

High school biology teachers, addressed by all SIU professors to do their work with simplicity and little sophistication.

"First we must return to simple, matter-of-fact observation." Dr. John C. Downey, associate professor of zoo-logy, said Thursday night, "This is our enthusiasm for the subject itself."

The title of the lecture was "Class of Wine, Butterfly Net, and Thiol."

To illustrate his point, Downey used slides, maps and samples to show how, with equipment simple like a butterfly net, did his research work on butterflies and evolution of insects."

"One look is worth more than a thousand words," he said.

7 London, personal observation is a must in scientific studies."

If a teacher brings a dog or cat into the classroom for living demonstrations, he can imagine how students will be inspired and get motivated, Downey said.

Surveying the present day situation in teaching, Downey challenged his audience; "The equipment and much enthusiasm is my motto for biological teaching."

Publish Study Of Evanston Licensing

A detailed analysis of municipal licensing in the city of Evanston, designed to serve the needs of both students and public officials, is being published by the Public Affairs Center.

Written by Evanston City Manager Wayne F. Anderson, the manual is in the second edition of a series of publications by the University's Center for exploring in detail a particular aspect of municipal government, among governmental, the manual's material comes from a report written when he was director of finance at Evanston. The publication outlines the legal and practical limits of municipal licensing powers, with analytical comments on specified fees.
Do You Have -

Pneumonoultramicroscopicsilicovolcanoconiosis

What's the matter with you?
Do you have Pneumonoultramicroscopicsilicovolcanoconiosis?

If you do, you have a Pneumonoultramicroscopicsilicovolcanoconiosis, which is caused from the inhalation of too much quartz dust, and occurs especially in miners (the or kind).

It is a handy word to have around if you can find a place to casually mention it, but where could you find room for it?

The above practically unpronounceable word happens to be the longest word in the English language according to the 1963 edition of Webster's dictionary.

It might be a handy word to use if you have enough time to learn to pronounce it. You could probably use it quite well to completely astonish professors, girlfriends, or bosses.

Many people insist that the 564,000 word Antidisestablishmentarianism with 28 characters is the longest word, but our new word has 45 characters making it the undisputable champion.

Don't ask us what a Pneumonoultramicrosilicovolcanoconiosis is, we haven't looked that one up yet,

ALBERT BORK

SIU Grads Serve:
Peace Corps Makes The World Neighborly

Modern transportation has linked the United States with the most remote nations and made this world a small one indeed, but the Peace Corps has gone a step further and provided an almost neighborly aspect to foreign travel.

At least, this is what A.W. Bork, director of the SIU Latin American Institute found in his South American travels recently.

Three former Southern Illinois University students are at work with the Corps in South America, and Bork learned that two others are preparing to spend two years in Peru.

Gary D. Robinson of Palatine, who was doing Latin American studies while here, is in Bague, Departamento de Toluca, Columbia, Bork said.

Daniel E. Gleason of Murphysboro, is at Xique, Estado de Baja, Brazil, Gleason received the B.A. in Latin American Studies in 1962, and Sauerbrun finished in archaeology in 1962.

Roger and Joan Lintault, who both studied art at SIU, are at the University of New Mexico preparing for their stay in Lima, Peru. There they will work at the Art Center and in outlying areas helping to improve methods and production of ceramics.

Speaking of Robinson, Bork said he was taking a degree in Latin American Studies when he left SIU but plans to return and eventually do graduate work.

Robinson is working with the Food for Peace program helping to organize cooperative kitchens for the preparation of school lunches and other food projects.

Bork said, "I met him in Bogota and he showed me around the town. He's found the Peace Corps work very worthwhile and an interesting experience. When I talked to him in May he was planning to return to school when his two years are up in the fall."

Gleason is teaching at a new university Cajamarca in Peru.
"One of the things he has done is get some of our used textbooks and establish a library," Bork said.

He added that Gleason also plans to return to school and do graduate work in Latin American literature.

Sauerbrun recently finished his preparatory training at the University of New Mexico and has been assigned to a community development project in one of the backward areas of Brazil.

The Art Center at Lima where the Lintaults will work is directed by John A. Davis, brother of Mrs. William Simeone, who is the wife of a member of the SIU English faculty. Lintault was an instructor in the SIU Art Department and Mrs. Lintault was a graduate assistant, Bork said.

The Institute director feels that Peace Corps work is a profitable experience for anyone interested in undertaking such a program.

"From everything I've been able to gather, the two years are extremely valuable, no matter what a person plans to do, but especially if he is interested in social and welfare work, archaeology or languages."

"Aside from the cultural, social and welfare aspects, if a person is interested there are all kinds of commercial opportunities available to him," he said.

While the work is hard, Bork added, it does offer men and women the opportunity to broaden their experiences.

Young Farmers To Meet Here

An Illinois Agricultural Association young farmers conference and an I.A.A. policy development forum are scheduled Wednesday and Aug. 6 respectively, according to William Struck, Jackson County Farm Bureau organizations director.

Nearly 100 young Farm Bureau members in the southern one-third of Illinois are expected for the Wednesday evening dinner meeting beginning at 5:30 p.m.

Kenneth Cheatham, Bloomington, I.A.A. director of young adult activities, will be in charge of the meeting, a training conference for future Farm Bureau leaders.
