Cancer Studies Make Progress After Setback

Cancer research at SIU is back on its feet and "doing pretty well," Hassan Rouhandeh, associate professor in the Department of Zoology and head cancer researcher at SIU, reported Tuesday than in three to six months all equipment destroyed or damaged in the February accident will be replaced or repaired.

The crippling damage resulted from steam entering the laboratory on the first floor of the Life Science Building through a heating main. The cause of the accident has not been definitely determined.

Items already replaced include three costly incubators used for recording protein levels and bottles of cell lines and tissue cultures. A 15,000 centifuge, essential to cancer research, was badly damaged by steam, but was within repair, Rouhandeh said.

New doors, flooring, lighting and extensive painting were also required.

While lab equipment is nearly back to its pre-accident level, actual research has been set back about a year with the loss of some 600 petri dishes and 15,000 centifuge tubes of tissue and virus cultures and rate virus-carrying cell lines.

Only a fraction of these valuable research tools, some of which Rouhandeh brought when he came from the University of Kansas a year and a half ago, have been replaced. Cultures and cell lines cannot be bought, must be regrown.

The animal cells used in growing cultures and cell lines can be bought commercially, however.

One aspect of SIU cancer research explores the possibility that cancer is produced by a virus.

"The administration has been most helpful in replacing as many of these cells and cultures as possible," Rouhandeh said. "With the replacements, we will carry on experiments interrupted by the accident and also re-establish cell lines destroyed by it."

The SIU administration provided funds and resources to replace a part of the estimated $30,000 worth of cultures lost.

Rouhandeh said that with the help of the administration, his staff has "done pretty well and I am very satisfied with how our lab has progressed since the accident."

Gus Bode

Gus says he too had an accident last spring; what he thought was a she was really a he, and Gus took a trip to the inflammatory.

Student Accident Rate Rose Sharply in Spring

By Kevin Cole

Student membership in the sprained-wrist-and-broken-leg set at SIU jumped to a number nearly double that of fall quarter and more than triple that of winter quarter, according to the findings of the Spring Quarter Accident Analysis.

The spring quarter's accident rate was 700 per cent higher than the female.

The analysis shows that most spring quarter student accidents involved 19-and-21-year-old males, and the male accident rate between 400 and 700 per cent higher than the female.

The purpose of the Safety Office is to inform campus departments of financial and personnel losses resulting from accidents, according to Oliver Halderson, SIU Safety Officer.

Using information provided by police and fire departments, SIU Health Service, the dean of students, the SIU Insurance and Contract Office and other sources, Halderson and his staff have found that most spring quarter student accidents involved 19- and 21-year-old males, with the male accident rate between 400 and 700 per cent higher than the female.

The analysis shows that most students were involved in accidents in the spring, compared to 19 in winter and 32 in the fall. The spring accident rate in female students increased about .04 per cent over the fall, while the accident rate in males for the same two periods fell about .04 per cent.

SIU sophomore Joyce Ann Smith was crowned Miss Egyptian Electric Cooperative for 1968-69 at the annual membership meeting of the electric cooperative Friday. Miss Smith, 18, is the daughter of Mrs. and Mr. Dale Smith, of Rt. 1, Culler, Ill.

Miss Smith will represent the local Cooperative at the State meeting in Springfield, August 20-22. She will compete for the title of Miss Illinois Rural Electric Cooperative, 1969-70.

Runner up in the event was an SIU sophomore, Cindy McGowan, Miss McGowan, 19, of Rt. 3, Carbondale, is the daughter of Dr. and Mrs. John McGowan.

The Egyptian Electric Cooperative Association provides electric power to about 7,500 consumer accounts in six southern Illinois counties.

**Ballroom Converts to Casino**

The University Center Ballrooms will be decorated with gambling posters Saturday night when the Activities Program Board sponsors Casino Night from 7:30 to 11:30.

A stake of play money will be given to everyone at the door. The games will include blackjack, baccarat, bingo, crap, roulette, solitaire (Las Vegas style) and chuck-a-luck.

The Ford Gibson Ensemble will provide live music.

Anyone interested in serving as dealer or game manager for the evening should contact Walter Halama at the Activities Program Board office, 453-3777.

**20 Studying Science Methods**

Twenty grade school faculty members from Herrin are currently enrolled in a three-week SIU workshop in use of a new grade school science program.

This fall the Herrin school will use the Science-A Process Approach. Two principal and 18 primary grade teachers are participating in the workshop, a cooperative venture between SIU and Herrin Unit District 4 that is supported by a $19,150 grant from the National Science Foundation program.

John Newport of the SIU department of elementary education, the workshop director, explained that the Science-A Process Approach curriculum is a new elementary science program developed under direction of the Commission on Science Education of the American Association for the Advancement of Science.

A former chairman of the SIU department of mathematics, John R. Mayor, is the association's director of education.

The SIU workshop is one of 34 programs involving the Science-A Process Approach being conducted this summer in 21 states and the District of Columbia.

Newport said Southern Illinois school personnel interested in possible adoption of the program are invited to contact the department of elementary education at SIU.

**Vatican Newspaper Defends Pope's Birth Control Stand**

**VATICAN CITY (AP)—**The Vatican's newspaper strongly defended Tuesday Pope Paul VI's encyclical condemning artificial methods of birth control as criticism mounted around the world.

An editorial in the daily L'Osservatore Romano pointed out that the encyclical issued by the Pope Monday "does not oppose the regulation of births." But it called artifical contraception "a mental, moral and physical mutilation."

The newspaper said criticism was bound to increase, but added that controversy is fashionable nowadays.

"Pope Paul is perfectly consistent in his new teaching, in harmony with that of his predecessors, will appear hard to whoever does not meditate on it," the editorial said.

"If a few persons don't understand it, it is because they are grown up in a wrong vision of man."

Finding, Designing Play Props
Poses No Problems For Expert

by Sandra Plain

Ever lose something?
Check with Marcia Gilles. She’s becoming an expert in finding things. Antique furniture or 18 flintlock rifles, for instance. And if she can’t find what she needs, she designs and makes it.

Miss Gilles is a 20-year-old theater major from Chicago with a special interest in the technical aspects of theater. Marcia has borrowed or made the properties for a dozen theater productions at SIU in the past two years. She did the sound for “The Visit” and “The Man Who Lost the River” and was the stage manager for “Little Foxes.”

Borrowing properties for plays is not difficult for Marcia. She feels that her attitude is especially important: so she is always friendly and honest.

“People are nice if you respect their wishes, who says, emphasizing the fact that the owner has to feel assured that he is loaning his possessions to a person he can trust.”

In many cases Marcia has been called on to design and create a property. She chuckles about the time she dyed the same tablespoon four times in order “to get just the right shade.” When doing the properties for “Carnival” last summer she ran into special problems in trying to make puppets. It took her quite a while to dye pink fur green.

At the end of the 1966-67 school year she was given the National Collegiate Players award for the “best undergraduate technician” in the theater department at SIU. This past year she was chosen the “Best Southern Player.” Marcia has belonged to the Southern Players for three years and has been the secretary for two years.

Marcia cheerfully admits, “When I started working with the opera ‘Carmen’ I wasn’t sure that there were 18 flintlock rifles in southern Illinois.”

She counts among her accomplishments such things as being able to fill balloon loons that usually burst during the performance, making cotton candy that has a tendency to melt sometimes and creating tissue paper flowers which cost only two cents a piece.

“I enjoy working backstage,” Marcia says seriously, “because I see the finished product.” She feels her job is important for she must design or obtain a property that “the actor can work with comfortably and that fits with the rest of the production.” Marcia, a junior, plans to go to New York after she is graduated from SIU. “I would like to get a job designing properties for professional or community theater,” she says.

At present Marcia is working on properties for “Barefoot in the Park.”

“I try to bring the personality of the character into the set through properties,” she says with feeling. “I like details.”

Marcia firmly believes that “unnatural properties do not fool the audience.” At the same time “the audience does not always give the technicians their just due.”

“For me the technician is really the unsung hero of the theater,” says Marcia. “Imagine a play without a set, lights, costumes, properties and sound. What would be left?”

New Women’s Hours
Looked on Favorably

SIU students seem to agree with the new women’s closing hour regulations.

The change was announced Monday by Wilbur Mondie, dean of students. The change will extend self-determined hours for women students of junior or senior standing, who meet the established requirements.

Seven students interviewed this week said they agree with the new regulations.

One of the students, Ivan Johnson, a sophomore majoring in geology, said it is “about time SIU is catching up with other universities in the country.” Miss LeVan said the University of Wisconsin has not restricted women’s hours for four years.

Raham Munier, a junior majoring in art, said it is “wonderful” that SIU is initially lifting restrictions on women’s hours, but it should also be extended to all women students who are 21 or older and who are maintaining satisfactory academic average, regardless of their class standing.

Patricia King, a senior majoring in special education, said “times are changing” and it is comforting to know that SIU is finally changing with the times.

Nita Jensen, a freshman majoring in physical education, said restrictions should also be lifted from freshmen women because “freshmen men can determine their own hours, why can’t I?”

Virginia Caprio, a freshman majoring in special education, said that as long as a female student has parental consent, she should be allowed to determine her own hours.

Gary Schercher, a freshman majoring in geology, said it was a “good idea” that restrictions were being lifted. “Freshmen and sophomore women should be given a probationary period to determine their maturity in deciding whether or not restrictions should be lifted from them also.”

Need Uniform Sentencing

With the accused killers of Martin Luther King, Jr. and Robert Kennedy coming to trial soon, Americans are again forced to ponder the profound problems and ethics of capital punishment.

An average of the results from several recent national polls in this area, showed that nearly 88 per cent of those interviewed favored the death penalty for the slayers of Kennedy and King. And the accused should be convicted.

This is a sharp contrast with a poll by Gallup that showed only 42 per cent of the nation generally favored the death penalty. It is evident that the emotions of U.S. citizens are high over the assasinations. They are judging and advocating punishment according to their emotions rather than by reason. And reason is a prime requirement if justice for all is to be a fact.

Better standards are needed by which Americans can apply the law more accurately and fairly during times when emotions run high. Laws are the first defense against hyper-emotional decisions which lead to criminal violations. It is only right that the law be made more reflective of a concern for sentencing of violators so that emotions do not sway the judgments of a jury.

Whether the assassination cases will spur enough controversy to make capital punishment to enact new, more hinder-emotional, decisions is irrelevant. The point is that Americans have waited too long already to decide for or against capital punishment or when and to whom the death penalty shall be invoked in all cases.

Sentencing a man to life imprisonment or a death is not a time for indecision; it is a time when firm laws should dictate the usual penalty not the ability of an individual human.

Paris Progress Means Longer Breaks

By Arthur Hoppe

The Paris peace talks are now well into their third month and seem to be indicating that the negotiators find to talk about.

The record's pretty clear on this. Our negotiator, Mr. Averell Harriman, stands up and denounces North Vietnam for an hour and half as Communist aggressor. Mr. Van Thuy stands up and denounces the United States for an hour and half as Capital aggressors.

But between they take a coffee break lasting anywhere from 15 to 34 minutes.

Understandably, world interest has focused on these coffee breaks. Mr. Harriman himself, babbling with optimism, says he has detected several hopeful "winds in the wind" over the Dutch.

And while Mr. Thuy flatterly denies this, claiming Mr. Harriman is merely crying "appease American opinion," it's clear where the holding pattern is.

Thus the following unofficial transcript should prove of interest. It's a transcript not of the negotiations, but of the coffee break.

Harriman: Two lumps, no cream. Right? See, it's just as I told the press. We're getting into a little bit more of what's important in each other's mind.

Thuy: Heavy on the cream, no sugar extra. You're crazy. We're not getting anywhere.

Harriman: That's not so. I distinctly noticed that your 90-minute speech today attacking me as "a bloody-minded Wall Street lackey" definitely lacked some of the fire it had the first 15 times you gave it. But I did wish you'd made it five minutes shorter.

Cyrus (Vance) grinned and caught me with two wings and two jacks.

Thuy: Well, don't think I'm not learning a lot during your regular 90-minute speech attacking me as "a witting dupe of the worldwide Communist conspir- acy." Nguyen Thanh Lee is teaching me to play mah-jong.

Harriman (after a pause): Yes, it's getting to be a bit of a bore, isn't it? (lowering his voice) Confidentially, do you see any hope?

Thuy (lowering his voice): What can you expect when you have an obstinate, mule-headed megalomaniac running the ad for thousands of miles away?

Harriman (surprised): I didn't know you even knew Lyndon.

Thuy: Him, too! I was referring to Premier Ho.

Harriman (grimly): Well, it's good to know we have something in common. But I suppose we'd better get back to the negotiations. Let's see, it's your turn to deliver a diatribe, isn't it?

Letter

Responsibility Stimulus

To the Daily Egyptian:

How is a student able to display greater responsibility and maintain a high grade when he is treated as a child? I am referring to the students of the University of Illinois at Urbana and Mr. Dyers (July 27, 1968; Daily Egyptian), which purported that the student body be treated as an adult, thus giving student body the power to make decisions.

Girls are locked in at night and single girls are under investigation. The University has given the power to the student body to perform these functions. Girls are being watched over and student body is given the power to perform these functions.

The great paradox is that this University which maintains people must learn to be responsible is the same University which sup- presses the rights of the student body. The University has taken away the student body's right to be treated as an adult.

Students are forced to attend classes because the University's policy of proportionately lowering grades with regard to absences.

'New Direction' in Politics

To the Daily Egyptian:

"To do nothing is to condemn the status quo," So said Senator Eugene McCarthy on January 12, 1968 in Milwaukee, Wisc. Those of us who have actively supported Mr. McCarthy or Mr. Kennedy have not been impressed by the "easy nothing" technique of former Vice President Nixon or the stag­ nant clouds of so-called "happy politics" surrounding Vice President Humphrey. Neither Nixon nor Humphrey offers new direction, yet they seem to have the best chance of gaining their party's nomination.

Presently there are two candi­ dates who do offer a new direction--Republican Nelson Rockfeller and Democrat Eugene McCarthy. To those of you who support either of these candidates, I would urge you to write letters to the delegates of their respective conventions in order to express support for these men and hopefully influence the delegates' vote.

During this week there is a table set up in the University Center expressly for this purpose with a complete list of Illinois dele­ gates to both conventions and sample letters.

Why not do something to express your dissatisfaction with the status quo?

Allen Lammers
It was just 99 years ago when a golden spike was driven into the railroad tracks near Ogden, Utah, to mark the linking of the East and West by rail. From that time until well into the present century, the railroad was the crown king of the transportation industry.

The railroad came to enjoy the status of an institution, all but replacing the covered wagon, stagecoach, and riverboat. Suddenly and almost without warning the golden spike has corroded.

In 1939 there were 20,000 regularly scheduled inter-city trains. As 1967 came to an end, there were only 650 inter-city trains operating on 36 railroads. At the beginning of 1968, applications were pending before the Interstate Commerce Commission (ICC) for the abandonment of 108 more trains.

The rail industryNotes 2 note two reasons to explain the problem passenger train travel now suffers.

One reason is progress—no the rail industry itself but in the other innovations in passenger travel. Trains run too long to compete with the airplane and too short to vie with the automobile.

The other reason is economics. Railroad management has found that hauling freight is more profitable than transporting passengers. If this is true, management feels that the practice of hauling freight should be expanded and passenger service cut back.

Taking an apparent defeatist attitude toward passenger service, the rail industry fell into trouble. Trains started running behind schedules, equipment became neglected, prices were raised, and employment attitude turned apathetic.

Such great name trains as the Twentieth Century Limited, Royal Blue, Golden State and the Lark have fallen into oblivion or are not longer the luxurious trains they once were.

The rail industry backs up its actions by saying that the federal government has forced it into the present situation. The industry contends that the government helped other transportation industries more than it helped the railroad. Railroad officials feel that the government choked the railroads by helping pay for larger and better airports and an interstate highway system.

Whether these accusations are true or not, the fact remains that rail passenger business is falling almost all over the country. The problem exists locally as well.

Col. Alexander MacMillan, director of the SHI Transportation Institute, said, "In the east train service is awful, and train officials say, "Why work?"

MacMillan believes that passenger train travel is not completely dead and might come back. The railroad has to stop clinging its sad tale of woe first, he said.

As far as Carbondale and SHI are concerned, MacMillan said, "The Illinois Central is one of the better railroads in the country."

The IC is really interested in improving its present service and has suggested a new plan called the mini-corridor, he said.

MacMillan believes that if the railroad industry adopts new ideas like the mini-corridor, passengers will return. Longer runs may never again be successful, but the shorter runs of under 350 miles can again be controlled by railroad.

Vernon J. Paul, district passenger sales manager for the IC, said the company was hoping to have the new mini-corridor plan in effect by June 15.

"We are definitely hoping to see a come-back," said Paul.

But the IC is still smarting from discontinuance of four of its passenger trains to St. Louis.

Robert Hunt, associate professor of mathematics, headed the Citizens Advisory Committee, a group which studied discontinuance of St. Louis trains. Hunt said his group started in a neutral position and found the public did not want the service stopped.

"I am not a regular passenger," said Hunt, "but my indirect reaction is that service leaves a deal to be desired.

"Cleanliness of trains, time schedules, inconvenient schedules, little and poor service, dropout condition, and general attitude—all these are not good," said Hunt.

He believes a plan like the mini-corridor would bring the public back to rail travel.

Ideal Student Hangouts

Japanese Coffee Shops ‘In’ Places

By John Durbin

TOKYO—"The coffee shop is where the action is," according to a 22-year-old Japanese college student who attends Dokkyo University, located in the Saitama Prefecture.

Isamu Matsumoto, a sophomore majoring in English, said that nearly all college students go to the shops to drink coffee, talk with classmates and enjoy the popular music supplied by live bands.

The large number of coffee shops are usually concentrated in the wards of the city of Tokyo such as Shibuya or Shinjuku where universities are located nearby. This enables students to drop into a shop between classes.

In addition to the coffee shops having live bands, there are also one with joke boxes that provide a quieter atmosphere where a student can study or read a newspaper or novel while sipping a cup of coffee. These shops serve not only coffee, but also tea (green and regular), Coca-Cola and a variety of sandwiches. Some coffee shops also serve beer, but few if any serve any type of hard liquor.

The high quality Japanese coffee and tea cost between 100-150 yen (25-45 cents) per cup. But, as Matsumoto pointed out, after a student purchases a drink he may stay as long as he wishes. "They will never ask anyone to leave, regardless of how crowded it is, how much he has bought or how many people may be waiting to get a seat. Matsumoto said that many times he will go to his favorite coffee shop in Shinjuku, order one cup of coffee or tea, and maybe stay 12 hours listening to the music. "Often times I bring my school books in a novel that I am reading and stay for hours," he said.

The coffee shops offer special deals to the students each day from 7 a.m. until noon.

With the purchase of a cup of coffee or tea, the customer receives, for no additional charge, a couple of eggs, butter, toast and maybe even a bowl of soup.

Coffee shops in Japan have a large variety of beverages on the table. Some coffee shops also serve American food items like hamburgers or sandwiches.

Some students are wary of eating in coffee shops because of the language barrier. For example, at one coffee shop which is near a university, a student who was a non-smoker was politely informed that they do not allow non-smokers. "They said, 'We offer smoking and non-smoking sections,'" said the student.

The coffee shops are much more than just a place to eat and drink coffee. These coffee shops are also, a part of the cultural scene. For example, the coffee shops serve as good places to meet friends and to discuss the latest news.

John Durbin, a junior majoring in journalism, is working as a summer intern on the Pacific Star and is spending his time serving as a correspondent for the Daily Egyptian.

Tells Hanoi to Reduce Fighting

WASHINGTON (AP)—Secretary of State Dean Rusk prodded North Vietnam's leaders Tuesday to say—despite his next day Victory Day—Hanoi would take to reduce substantially the scale of fighting if there should be a total halt of U.S. bombing in the north.

Sharply discounting reports that Hanoi already is showing signs of military restraint, Rusk told a news conference that it is important in the situation is "not what happened yesterday, but what happens tomorrow, next week, next month..."

Rusk's statement appeared to go some way beyond the conditions for a bombing halt entailed last February by Secretary of Defense Clark M. Clifford. There was no mention by Clifford of Hanoi's intentions for the future. Clifford held that "normal" resupply operations by Hanoi in moving men and supplies into the South would not violate the U.S. conditions for a show of military restraint.

Rusk contended that the United States had made a major move to de-escalate the war on March 31, when President Johnson ordered the bombing halted in almost 80 per cent of the territory of North Vietnam where 90 per cent of the population lives.

"We need to have something better than just a blank wall, something better than just committing ourselves to a course of action on our side, leaving the other side with complete freedom of action to move men and arms from North Vietnam into South Vietnam in whatever way they wish," Rusk said.

A newsmen questioned Rusk about the lack of rocket attacks on Saigon in recent weeks. The secretary said that the presence of substantial enemy forces near major population centers and evidence from prisoners, defectors, captured documents and other intelligence "do not suggest there has been an effort to move toward peace by action on the ground,"

He said regrouping and resupply may explain the lull in ground fighting. Allied forces in recent months have captured equipment for more than 40 battalions, he said.

Rusk displayed little optimism over the course of the Paris negotiations. But he called upon the delegations meeting Wednesday for the 13th time to "respond constructively and in a way that will help us move toward peace in Southeast Asia."

As expected, he avoided comment on the confrontation between the Soviet Union and Czechoslovakia on the future course of Communist liberalization.

Rusk said that he had received a reply, not totally satisfactory, from Moscow to U.S. protests against accusations of U.S. meddling in the Czech affair.

House to Vote On Post Office Exemption Bill

WASHINGTON (AP)—A bill to leave the Post Office Department unmoved when the rest of the executive branch cuts its manpower whizzed through a conference committee and the full Senate Tuesday, on its way to probable House passage today.

Postmaster General Martin Watson had warned that postal service would have to be curtailed starting next Saturday if the government-wide manpower rollback reached into his department.

The Senate voted to exempt the Post Office last Friday despite Republican cries of "blackmail," and the House passed a similar measure Monday.

On Tuesday a House-Senate Conference committee agreed on the measure, and the Senate quickly passed the final version by a voice vote without debate.

Congratulations, in passing the 10 per cent tax surcharge recommended by President Johnson, had coupled it to a $6 billion spending cut and a rollback to 1966 levels of government employment.

What that meant the Post Office would lose, under the rollback some 83,000 of its 726,400 workers and would have to scale back its work pace with its growing workload.

House approval, expected today, would send the bill to the White House in plenty of time for Watson to call off the threatened cutbacks in service.

Student Accident Rate Rises

(Continued From Page 1)

Thursday, Saturday and Sunday were days with high fatality rates in the spring, with most accidental student deaths on those days occurring between midnight and 6 a.m. That time also was the most heavily plagued by none-fatal accidents, also.

Thirty-nine of the 59 spring accidents occurred on streets or highways with the victims using private transportation. Slightly more than half of the injuries fell in the generalized bruise or internal injury category.

"The National Safety Council format serves a double function," R.W. Alexander, retired U.S. Army officer and graduate student working in the Safety Office, said. "It combines a substantial amount of information in a meaningful manner and provides the Council and S.I.U. with a standard form by which S.I.U. accident patterns can be compared to those of other schools."

By the beginning of fall quarter, the Office hopes it will have compiled an annual accident cost analysis report. The report will provide a "dollar and cents" picture of the cost of campus accidents, from the bandaide and iodine used to the cost of the doctor's time, the ambulance operating expense and time lost from faculty, student and staff jobs. Though the analysis has in-

Wheelchair Becomes Asset For Para-Olympics Hopeful

By Brian Trench

Most people might think that being confined to a wheelchair is a great setback, but Dave Williamson says "it's just the opposite; a whole new world opened up to me."

Williamson, 22, was stricken with polio at the age of six and has been confined to crutches and a wheelchair ever since. Despite his handicap, he was the president of his high school senior class in Evansville, became a member of the national honor society, and now holds several world records for wheelchair athletes.

Last year he received his bachelor's degree in accounting from SIU and he presently works on a master's degree in administrative re habilitation.

Williamson says that his handicap hasn't halted him any way and that his wheelchair has become "a real asset."

"I don't see life as different and I don't think the world owes me anything. Anything you put out of life you have to work for. A lot of other people have handicaps which aren't visible and those are far worse than mine," Williamson said.

He said he hopes to dedicate his life to wheelchair sports. At present there are nearly 500 participants in wheelchair sports in the United States, but Williamson thinks they are only a fourth of the national number of handicapped persons who could participate in wheelchair sports if there were more facilities and programs available.

"I was always interested in sports, but I realized I could never participate in regular high school sports," Williamson confided. Instead, he entered practive in wheelchair sports in 1961 when he was a freshman in high school.

Three years later, he had set several national records in both events and had become a member of the U.S. team, sponsored by the National Wheelchair Athletic Association.

Williamson said he has competed several times in Europe as a goodwill ambassador for the National Easter Seal Society. Last month he was selected to be a member of the U.S. team being sent to the Para-Olympics for handicapped athletes to be held in November at Teliviv, Israel.

Unfortunately, all U.S. athletes who compete internationally, including wheelchair athletes, must raise their own funds to pay their travel and living expenses. The Car bondale Chapter of Alpha Phi Omega, national service fraternity, has started a "Dave Williamson Fund" to help raise nearly $1,500 needed to send Williamson and another SIU wheelchair student to Teliviv.

With Dave to Teliviv will be Gene Geissanger. Geisanger is the national champion wheelchair archer, and has been competing in wheelchair sports for the last four years. He became the first such athlete to rise to national prominence in such a short period of time.

Williamson said that both he and Geissanger are looking for someone to donate a movie camera and a producer to help them in their training and coaching. In addition, he said that he also needs a new wheelchair, which costs nearly $350 to use in the November competition sponsored by the National Wheelchair Athletic Association.

For sponsored persons interested in the performance of a wheelchair athlete, William son can do the 100-yard dash in 20.6 seconds and the 60-yard dash in 12.7 seconds. He also holds the national N&O record for wheelchair athletes at 240 pounds and the world record javelin throw of 74 feet, 10 inches.

At the Para-Olympics in November, he will also compete in the shot put, discus, club throw, the 240-yard relay team, the basketball team, and the wheelchair slalom. Williamson practices every day on the front lawn of the Ag Building. In addition, each morning he pushes himself around 12 miles, adding an extra 75 pounds to his chair for an added handicap.

"Right now I'm concentrating on form and endurance," he said.

SPORTS FANS

BET YOU DIDN'T KNOW

By Jim Simpson

Do you know if any big league baseball team has ever been able to stay in first place EVERY DAY from Opening Day to the end of the season? Only two teams in history accomplished this. They were the 1923 Giants and the 1973 Yankees.

Did you know a batter in baseball can bat for a run batted in by hitting a PITCH on which he did not know this is possible? Under present scoring rules, a batter gets credit for an RBI when he hits a fly ball on which a runner from third scores after the catch, even though the ball is caught in foul territory?

Here's a sports fact many fans don't realize about Jack Dempsey. Do you know when he was heavyweight champion of the world he was unable to defend his title against Gene Tunney? Dempsey lost his title to Tunney on Sept. 14, 1923, beating Luis Firpo.)

But, you didn't put him up on the line against John L. Sullivan who Gene Tunney beat him.

I bet you didn't know that college graduates have a longer life expectancy — lower death rate and are living five years longer on the average than a non-college man. The lower death rate of college men was partly due to the existence of broader benevolent clubs and proper eating habits in College Life policies. This certainly makes good sense, doesn't it.

Viet War Dissent Main Reason
For McCarthy's Student Support

The Vietnam War, rather than the personal qualifica-
tions of Eugene McCarthy, is the major uniting force which
brought out the strength of stu-
dents supporting him in the
primary campaigns. This is
the conclusion of a study done
by Melvin Kahn, associate
professor of government at
SIU.

Kahn surveyed 1228 volun-
teers, 986 of them college
students, who were working for
McCarthy during the Wis-
consin primary March 29-31.

Increased Grant for Study
Awarded SIU Psychologist

Alfred Lit, SIU psychology
professor, has been notified
of an increase and extension of
a grant he holds from the
National Science Foundation
for research in depth percep-
tion.

The original grant of
$45,700 awarded in June, 1964,
has been increased by $7,700
and extended to December 31,
1968.

The increase will be used
for a project entitled "Effects
of Conditions of Illumination
on Holographic Space Per-
ception." Research will deal
with the effects of the dura-
tion of exposure to light on
depth perception.

It will include experiments
in which stimulation to the
two eyes will be separated in

A summary of his survey is
reported in the July-August
issue of the magazine "Trans-
action." Kahn found the studen-
t were mostly from middle-
class backgrounds, with a me-
dian income of their fathers
about $13,000. There was
some tendency towards a
liberal viewpoint on matters
such as open-housing legisla-
tion and labor. There was also
evidence of a credibility gap,
with 62 per cent of the stu-
dents saying they "rarely," or "seldom," believe what the
administration says.

But the students were deeply
divided on some major issues,
with half saying they thought
public officials were seriously
concerned with what young
people think, and half believing
they didn’t care. The students
were equally divided on whether or not the government
should take action against the
Ku Klux Klan. The lack of
consensus on these and other
issues, Kahn suggests, indi-
cates that most of the stu-
dents are not members of a
"New-Left" movement.

Over half of the students
gave McCarthy’s stand on
the Vietnam war as their main
reason for supporting him.
This was the one factor, Kahn
says, which cut across other
liberal or conservative ideas
and united the students behind
McCarthy.

Frank Paine (left), director of SIU Film Productions, ac-
cepts a blue ribbon trophy for the film, "Albatross."
From Philip Klapp, artist and filmmaker. The presenta-
tion was made during the recent American Film Festival in New York.

Albatross Film Wins
Trophy at Festival

A film produced by the SIU
Film Productions of Harvey
Fishler, chairman of the De-
partment of Zoology, recently
won a blue ribbon trophy at
the 1968 American Film Festi-
val in New York.

The festival is sponsored by
the Educational Film Library
Association.

Glen Daum, alumnus of the
Department of Music, wrote
the score and Loren Cocking
produced the film, "Albatross,"
which is a one of a kind film
told in the festival and was selected
for the best of seven in the nature
and wildlife category.

The 38-minute, color film
deals with the Laylan Alba-
ross of Midwest Abol and
and gives a detailed investigation
of the life pattern of the bird.

Pros Consider Dropping Extra Point Kick

By Paul Corcoran

Copley News Service

The darling of the sports fan, professional football, is going on a short limb to experiment with the extra point.

The pros will see if they can do without another automatic single point placement.

Before anyone gets the idea that something as traditional as an extra point kick is about to disappear, you should add that the National Football League and American Football League is planning an experiment.

Avery Brundage Fears Cancellation

Of Future Winter Olympic Games

CHICAGO (AP)—Avery Brundage, 80-year-old presi­dent of the International Olympic Committee, indicated Tuesday that the future of the Winter Games is at stake because of the anti-Semitism arising in this year’s Olympi­ads at Grenoble, France.

"We have a committee now investigating the future of the Winter Games," Brundage told reporters, "and the committee chairman is Mr. Van Karmbekt of the Netherlands, may make a report at the Summer Olympics in Mexico City in October.

"But there is some question," Brundage said, "and the investi­gation committee chairman is Mr. Van Karmbekt of the Netherlands, may make a report at the Summer Olympics in Mexico City in October.

"He is going to be in Grenoble to look into the situation."

If the findings are serious, the future Olympic Games may not be held in the future.

If the findings are serious, the future Olympic Games may not be held in the future.

The pro extra point opportunity is given to the team after it has earned a touchdown by run­ning or passing the ball over the goal line.

That touchdown was earned the hard, traditional way that makes football interesting. It is the prize one team gets for outwitting or overpowering a rival equally dedicated to the same end. Now the plot thickens.

For scoring three touch­downs in a game, the team scores a total of 12 points, three times, a football team com­bines 21 points. In this hy­pothetical situation, the oppo­sition would have to kick seven field goals to tie it. In effect, the three extra points give the one team scoring equivalent to a field goal.

A field goal can be kicked only once, but the opposition, with even the ball passed back from anywhere within 20-25 yards of the goal line, the pro goal crossbar exced­cover the goal line, making field goals from anywhere within 20-25 yards of the goal line.

And more, pro teams are resorting to passing within short range rather than risk a pass interception and fumble.

Dare to Buy Newsstand, Alex Brown, 193-2077.

Opal literature, 1966 with 9,000 miles.

B8533, 700 W. Freeman.

Wanted: Top level talent.

Let's get back to the team scoring 21 points on three touch­downs and three place­ment extra points. Change the rule, and say that the team scoring three TDs could con­vert only once by passing or running. It now has 19 points. It is conceivable a rival could beat the team on seven field goals four of them from with­in 19 to 25 yards of the goal line.

The "winning" team in that event would not have earned victory in the accepted sense of the word.

In other words, pro foot­ball might think seriously about changing the field goal rules immediately reverting to the college system of placing the goal post 10 yards be­hind the goal line. It is too logical, if not more logical, considering the rule governing extra points.

Baseball Salukis Slighted

By Barb Lercee

SIU's baseball team, although runner-up in the NCAA Baseball World Series, still is not regarded as highly in the minds of the sports analysts.

Eight teams were recently selected to play in the Third Annual National Collegiate Baseball Tournament at Riverside, Calif., in April. According to Frank A. Lindeburg, athletic director at the University of California at Riverside, the teams that play in this tournament are picked primarily on their athletic prestige and regional prominence. Selection is not based on the season record of the teams.

Does this mean that SIU has not acquired a status of an athletic power? "SIU has a very good athletic department and this can be seen in the basketball, baseball, and gymnastic teams that it has turned out in the past five years," Lindeburg said. "But it will take more than one or two years of success ful athletics before everyone will know who the Salukis are." "Illinois and Indiana were picked on the basis that both are well-known big 10 schools and the people will come to see them on their name alone," Lindeburg said.

The prestige of the name Illinois is a good crowd attraction," Lindeburg said. "Whereas, SIU to many in this area wouldn't mean a thing unless they are avid sports followers.

"I'm not trying to offend SIU, because UCR is in the same situation," Lindeburg said. "It takes a college as long as 10 or more years of constant championships in one area of sports or another for a college to establish itself.

Softball Games

Six games have been scheduled for today's intramural softball action. All games begin at 3:30 p.m. Teams and location of all games are as follows:

- Red Birds vs. Psi Stars, field one; Tan Kappa Epsilon vs. Aggies, field two; Leo's Lubes vs. Guzzelers, field three; and, Life vs. My Wonders, field four.
- Sike vs. CGA, field five; Kaline Comets vs. RU, field six.

Magazine Shows Silas As Successful Negro

Sam Silas is portrayed as one of the outstanding Negro football players in a colorful magazine published in the July 29 issue of Sports Illustrated magazine.

Silas, who played football at St. Louis University and is working on his doctorate here, Uleta Co. as onomie&11y. Old that dlsturblOil character, Cardinal. cam of of complex, dormltory and a small one of teammatea, tant.

"Salt on Hean was placed on the reserve list. They were rumored to be people that he owed money to. They were removed because they were free of constant on the area of physics or another for a college to establish itself.

Football Cardinals Cut Eight Players

LAKE FOREST, III. (AP)—Eight players were removed from the St. Louis Football Cardinals camp roster, effective Tuesday, cutting the list to 58. Veteran guards Ken Gray and Dave O'Brien were placed on the irrevocable waivers.

Fullback and Cardinal cardorn-back Abe Woodson, who failed to get back into condition quickly enough after a year's layoff, and five roofies were cut.

When you ask the people in our area if they want to see Southern California, they would say, 'Who the hell?'" Lindeburg said.

The teams that play in this tournament are picked primarily on their athletic prestige and regional prominence. Selection is not based on the season record of the teams.

Does this mean that SIU has not acquired a status of an athletic power? "SIU has a very good athletic department and this can be seen in the basketball, baseball, and gymnastic teams that it has turned out in the past five years," Lindeburg said. "But it will take more than one or two years of successful athletics before everyone will know who the Salukis are." DAILY EGYPTIAN
Jul'y 31, 1968

As a perennial sport power," SIU's baseball coach Joe Lute could not be reached for comment. Even though the Salukis have dominated the gymnastic world for the last four years; won the 1967 National Invitational basketball tournament and were runner-up in the baseball College World Series, it appears that they have a way to go before getting the recognition they are seeking.
