ERRATUM.

To the Editor of The Open Court:

In my article on "The Resurrection of Jesus"—printed in the April number—an error is made in a quotation. At the bottom of page 196 the quotation of Mark xvi. 8 should read: "And they went out, and fled from the tomb; for trembling and astonishment had come upon them; and they said nothing to any one; for they were afraid." The statement that "they said nothing to any one," which was omitted in quoting, is the real ground for my comment (at the top of page 197) "that the writer has finished telling what they (the women) saw."

BOOK REVIEWS AND NOTES.

The author of this book, Mr. Louis F. Post, is the editor of The Public, a weekly published in Chicago which is the main and only exponent of the single-tax party there. The book is inscribed to the memory of Henry George of whom the author was a personal friend and disciple. In the Introduction, Mr. Post characterises his book with the following words:

"The opening chapters deal with the ethics of democracy in their bearing upon expectations of human progress. The difference is here considered between spurious and genuine optimism—between that vulgar optimism which is after all nothing but reckless indifference to social wrong-doing or wicked love for it, and the wholesome and effective kind of optimism which abhors and condemns what is wrong and inculcates what is right. . . .

"Out of this application of democratic ethics to individual life there naturally develops a consideration of democracy in business life. That in turn brings forward for examination a variety of economic tendencies and their governing politico-economic principles, through which the democratic ideal lights the way. With the economics of social life grasped, the problems of democratic government are easier to solve; and out of their solution there rises a conception of patriotism the thrill of which no man can know until he understands that the world is his country and all its inhabitants are his fellow citizens.

"The concluding chapter expresses what the preceding ones suggest, the truth that in the moral as in the material universe there is a great order, a great harmony, conformity to which leads mankind upward and onward.

"Out of that harmony the ethics of democracy are evolved. Along with its development the victories of democracy are won."
