THE RELIGIOUS ISSUE IN POLITICS

It has long been considered by many a tradition having almost the force of law that a Catholic would never be elected president of the United States. This belief was so well established that many erroneously thought that there was a legal or constitutional obstacle. The present election has called forth a considerable number of books discussing the question of whether being a Catholic should in any way disqualify a man for the presidency. The books on this subject are uneven in quality but vary little in the material they discuss. Charles C. Marshall's book1 is the first to be considered being a continuation of the controversy he began in the Atlantic Monthly over this question. His book is moderate in tone and he tries to be fair. He discusses chiefly from historical and doctrinal grounds the clashes in the past and the possible clashes in the present and future of the Church and the state, emphasizing particularly the twilight zones which can neither be classified as wholly spiritual or wholly secular. He quotes chiefly Catholic authors in support of his contentions.

Another such book is by Theodore Schroeder.2 He speaks more bluntly than Mr. Marshall bringing up the historical and the theological disputes. After reading his book one feels that a great many points concerning the questions of the relation of church and state ought to be clarified.

Most books of this type seem to make a false impression on the question of what is meant by the "temporal power" of the church. Much of the controversy over this referred to the States
of the Church and at present refer to their claims to this which is now Italian territory rather than as often supposed to sovereign rights in other countries. The question as to the Church's right to the Papal States in reality dates back to a time when this claim was for centuries undisputed. Whether one would consider the Pope's sovereignty as inherent in the office of the papacy or as a mere personal union between the sovereign of the patrimony of St. Peter and the supreme pontiff is purely academic. The discussions as to the rights and wrongs of the Pope's quarrels with the sovereigns of the middle ages such as King John of England or the Emperor Frederic II and others, while they are important as furnishing precedents it would be interesting if some student of church and state politics would write a discussion of this question entirely from the events and documents of the present generation.

In the United States there has been considerable discussion in the last few years of bringing religion into politics. The offenders, however, have chiefly been from the Protestant side. And their activity has been less to gain recognized sovereign rights than to compel the state to accept and support their theological doctrines with the force of law. The Catholic Church has gained much sympathy in the last few years from many of our liberals and it would be interesting if some book could fully discuss the Catholic relations with the state as compared with those of the various other churches. These books under discussion although they may tend to increase the controversy under discussion may help to clarify and bring the issue to a head. The book we would like to see written on this subject has, however, not yet appeared.
THE PHILOSOPHICAL REVIEW

Edited by

WILLIAM A. HAMMOND AND FRANK THILLY

Of the Sage School of Philosophy, Cornell University

September, 1928

Clarke's Ethical Philosophy (II) ...................... Ernest Albee
Objective Uncertainty and Human Faith ....... David F. Swenson

"SCIENTIA"

INTERNATIONAL REVIEW OF SCIENTIFIC SYNTHESIS

Published every month (each number containing 100 to 120 pages)

Editor: EUGENIO RIGNANO

18 THE ONLY REVIEW the contributors to which are really international.
18 THE ONLY REVIEW that has a really world-wide circulation.
18 THE ONLY REVIEW of scientific synthesis and unification that deals with the fundamental questions of all sciences: the history of the sciences, mathematics, astronomy, geology, physics, chemistry, biology, psychology and sociology.
18 THE ONLY REVIEW that by means of enquiries among the most eminent scientists and authors of all countries (On the philosophical principles of the various sciences; On the most fundamental astronomical and physical questions of current interest, and in particular on relativity; On the contribution that the different countries have given to the development of various branches of knowledge; On the most important biological questions, and in particular on vitalism; On the social question; On the great international questions raised by the World War), studies all the main problems discussed in intellectual circles all over the world, and represents at the same time the first attempt at an international organization of philosophical and scientific progress.
18 THE ONLY REVIEW that among its contributors can boast of the most illustrious men of science in the whole world. A list of more than 350 of these is given in each number.

The articles are published in the language of their authors, and every number has a supplement containing the French translation of all the articles that are not French. The review is thus completely accessible to those who know only French (Write for a free copy to the General Secretary of "Scientia," Milan, sending 12 cents in stamps of your country, merely to cover packing and postage.)

SUBSCRIPTION: 10.00, Post free Office: Via A. De Togni 12, Milan (110)

General Secretary: Dr. Paolo Bonetti.

SCIENCE PROGRESS

A QUARTERLY REVIEW OF SCIENTIFIC THOUGHT, WORK, AND AFFAIRS

Published at the beginning of JANUARY, APRIL, JULY, OCTOBER

Each number consists of about 192 pages, contributed by authorities in their respective subjects. Illustrated. 6s net. Annual Subscription, including postage, 25s, 6d.

SCIENCE PROGRESS owes its origin to an endeavor to found a scientific journal containing original papers and summaries of the present state of knowledge in all branches of science. The necessity for such a journal is to be found in the fact that with the specialization which necessarily accompanies the modern development of scientific thought and work, it is increasingly difficult for even the professional man of science to keep in touch with the trend of thought and the progress achieved in subjects other than those in which his immediate interests lie. This difficulty is felt by teachers and students in colleges and schools, and by the general educated public interested in scientific questions. SCIENCE PROGRESS claims to have filled this want.
