FLORIAN CAJORI
February 28, 1859-August 14, 1930

In the death of Professor Florian Cajori the world has lost one of the best-known of its recent historians of science, not merely in the domain of mathematics but in the contiguous domains of physics, geodesy, and to a certain extent astronomy.

Not only was he a writer of books, but he was an indefatigable contributor to scientific journals in this country and abroad. The number of these journals and of his monographs is impressive and his numerous articles will long be looked upon as material from which historians will draw.

Born in Switzerland, coming to this country at the age of sixteen, educated at the University of Wisconsin (B. S., 1883) and Johns Hopkins (1884-1885), he began his teaching as assistant professor of mathematics at Tulane University in 1885, continuing at Colorado College (1889-1918). In 1918 he was called to the University of California as professor of the history of mathematics, doubtless the first man in the world to hold this title and be given the privilege of devoting all of his time to the subject. It was a great opportunity and the appointment was fully justified in the twelve active years that remained.

As to his work in these institutions, as to the academic honors bestowed upon him (Ph. D., Tulane, 1894; L.L. D., University of Colorado, 1912, and Colorado College, 1913; Sc. D., Wisconsin, 1913), and as to his membership and official positions in various learned societies it is not possible, in the space here allowed, to speak in detail. Suffice it to say that his work was faithfully performed and the honors were worthily bestowed. Standing as the leading historian of mathematics in this country, his loss will be deeply felt by all who knew him, whether personally or through his contributions to the subjects of his major interest.
SOCIAL problems will be separately analyzed in special issues of the Journal during 1930. Within the province of this publication lie both the central field of ethical knowledge and practice and the bordering fields of law, politics, economics, literature, and religion. The first of these related topics is Law and the Community.

IN THE APRIL ISSUE—the ethics of law enforcement analyzed.

INTERNATIONAL REVIEW OF SCIENTIFIC SYNTHESYS
Published every month (each number containing 100 to 120 pages)
EDITORS
F. Bottazzi - G. Bruni - F. Enriquez

IS THE ONLY REVIEW the contributors to which are really international.
IS THE ONLY REVIEW that has a really world-wide circulation.
IS THE ONLY REVIEW of scientific synthesis and unification that deals with the fundamental
questions of all sciences: the history of the sciences, mathematics, astronomy, geology, physics,
chemistry, biology, psychology and sociology
IS THE ONLY REVIEW that by means of enquiries among the most eminent scientists and
authors of all countries (On the philosophical principles of the various sciences; On the most funda-
mental astronomical and physical questions of current interest; On the contribution that the differ-
ent countries have given to the development of various branches of knowledge; On the more impor-
tant biological questions; On the great economical and sociological international questions, studies
all the main problems discussed in intellectual circles all over the world, and represents at the same
time the first attempt at an international organization of philosophical and scientific progress.
IS THE ONLY REVIEW that among its contributors can boast of the most illustrious men of
science in the whole world. A list of more than 350 of these is given in each number.
The articles are published in the language of their authors, and every number has a supplement con-
taining the French translation of all the articles that are not French. The review is thus com-
pletely accessible to those who know only French. (Write for a free copy to the General Secretary
of "Scientia," Milan, sending 12 cents in stamps of your country, merely to cover packing and
postage.)

SCIENCE PROGRESS
A QUARTERLY REVIEW OF SCIENTIFIC
THOUGHT, WORK, AND AFFAIRS

Edited by Lieut.-Col. Sir RONALD ROSS

Published at the beginning of JANUARY, APRIL, JULY, OCTOBER

Each number consists of about 192 pages, contributed by authorities in their respective
subjects. Illustrated. 6s net. Annual Subscription, including postage, 25s, 6d.

SCIENCE PROGRESS owes its origin to an endeavor to found a scientific journal
containing original papers and summaries of the present state of knowledge in all
branches of science. The necessity for such a journal is to be found in the fact that
with the specialization which necessarily accompanies the modern development of
scientific thought and work, it is increasingly difficult for even the professional man
of science to keep in touch with the trend of thought and the progress achieved in
subjects other than those in which his immediate interests lie. This difficulty is felt by
teachers and students in colleges and schools, and by the general educated public inter-
ested in scientific questions. SCIENCE PROGRESS claims to have filled this want.
