MISCELLANEOUS.

AN IMAGE OF YAHVEH.

In reply to some questions received concerning the January number, we will state that the frontispiece entitled "The Semitic God of Tahpanhes" represents one of the most remarkable monuments of the history of our own religion. Professor Mueller, the author of the article on the subject, has purposely refrained from making any positive and rash statements which he might have to retract. But readers who follow his argument carefully will see at once that we have here a representation of the God of Israel, called in olden times Yahveh and since the days of the Reformation, Jehovah.

People not acquainted with the progress of excavations made in recent years may be astonished that a statue of Yahveh existed at all, for we are so accustomed to the notion that the Jews held all statues and other representations of God in abomination. But of late we know that the Jews with whom we are acquainted through the Bible are one sect only, that there were other Jewish congregations, and that these other ones were really the older, and if faithfulness to tradition means orthodoxy, the more orthodox Jews. Judaism, such as we know it, was prepared by the prophetic movement and definitely worked out in the Babylonian Exile, and this Judaism is the one that alone survived.

We know from recent excavations that in the village of Elephantine, there stood a magnificent Jewish temple, which was older than the second temple of Jerusalem. It was destroyed at the instigation of the Egyptian priests, worshipers of Khnum. Other documents found in the same place reveal to us that there existed a flourishing Jewish colony, which however did not observe the special restrictions of post-Exilic Judaism. They intermarried with the Gentiles and did not look upon Jerusalem as the only place of worship and sacrifice.

We must at the same time assume that they worshiped their God Yahveh or Jehovah under some visible symbol as was done in the time of ancient Israel before it split into the two kingdoms. There are enough indications in the Bible itself to prove that idols were made and unhesitatingly used even by such men as David, and that the bull was the favorite symbol of the deity.

Wherever hostility towards other nations appears, it is purely nationalistic and not religious. Even Solomon was the son of a Hittite woman and we may assume that the Israelites were a race considerably mixed with Hittite, Philistine, Egyptian, Canaanite, and other elements. At the same time their religion resembled that of their neighbors much more than was generally assumed. The nationalistic and vigorously monotheistic spirit of Judaism
is of late origin. It was perfected in the Babylonian Exile and made the Jews what they are to-day. Here too lies the reason of the preservation of the Jews among the Gentiles which has never as yet been plainly understood. It is but natural that this conception of Judaism which had been so hardened in the tribulations of national misfortunes should alone survive, and that the other conceptions of Judaism through their very similarity to other pagan cults, should disappear entirely as if they never existed.

For all these reasons the bas-relief of the Semitic sanctuary at Tahpanhes is of great interest to us and the more we understand the significance of having a presentation of the old Jehovah, the more we shall prize this remarkable monument.

P. C.

BOOK REVIEWS AND NOTES.

A STANDARD BIBLE DICTIONARY. Edited by M. W. Jacobus, E. R. Nourse, and A. C. Zenos. New York: Funk & Wagnalls, 1909. Pp. 920. Price, Cloth $5.00; Half Mor. $10.00; Full Mor. $12.00, all net. Indexed, 50 cents extra; Carriage charges 47 cents extra.

In this publication Funk & Wagnalls have aimed to provide a Bible Dictionary which shall be as standard a work in its line as their English Dictionary has proved itself. The present volume owes its origin not only to the fact that the most modern dictionaries such as those of Hastings and Cheyne were too comprehensive in scope and expensive in price to be of practical service to the general Sunday-school teacher, the intelligent layman and small-salaried clergyman, but also to the fact that such a need has been supplied recently in Germany by Prof. Hermann Guth's one-volume Bibelwörterbuch. It was the publishers' intention at first to make this work accessible to the English-reading constituency by translation, but it soon became apparent that to serve this purpose it would require so much editing that it would be as easy, and eminently more satisfactory to provide a similar work on independent lines. It is noteworthy, however, that Professor Guth occupies an important place on the list of collaborators of the English work.

Accordingly the English world of Bible readers and students now possess a one-volume Bible Dictionary compiled by the best scholarship available, giving authentic information on about 5000 titles taken from the fullest concordances, utilizing the most improved devices for ready reference, and at a price within the reach of any person interested in a library of his own. The book is not a remodeling of any former work but is made entirely new from the ground up. No item is too insignificant to bear the initials of its author, so that the reader may feel perfectly sure where to place responsibility for each statement.

With regard to the critical value of the work, the editorial position may perhaps be best understood from the following paragraph in the preface:

"The critical position to which such a Dictionary is necessarily committed must be one of acceptance of the proved facts of modern scholarship, of open-mindedness towards its still-debated problems, and of conservation of the fundamental truths of the Christianity proclaimed and established in the message and mission of Jesus Christ. The constituency to which the Dictionary appeals is not to be helped by an apologetic method that ignores what a reverent critical scholarship has brought to light regarding the Book of the
MISCELLANEOUS.

Christian religion; nor is it to be served by a radical spirit so enamored of novelty and opposed to tradition that it would seek to establish a new religion on the ruins of the historical facts of Christianity. It can be ministered to only by a clear, charitable, uncontroversial presentation of the results which a century and a half of earnest, conscientious, painstaking, self-denying study of the Bible has secured, to the end that all students and readers of the Book may be led into its more intelligent understanding and its more spiritual use."

It may be needless to add that special care has been taken to have the illustrations so chosen as to be of practical value; the greatest care has been shown to have them printed as clearly as possible. Many of the illustrations are reproduced here for the first time. Another exclusive feature is the maps, many of which have been drawn for this work. Among the thirty-six collaborators, the list contains besides those already mentioned such names as König, of Bonn; Nowack, of Strassburg; Driver and Gray, of Oxford; McCurdy, of Toronto; Denney, of Glasgow; Sterrett, of Cornell; Dickey and others, of McCormick Theological; Pres. Mackenzie and others of Hartford Theological, and Dean Mathews of Chicago.

This work contains material of great anthropological interest with regard to secret organizations among primitive peoples, their initiation ceremonies and their relation to tribal society. The men's house, the puberty institution, secret rites, the training of the novice, the power of the elders, together with the development and functions of tribal societies are in turn discussed, and the decline of tribal societies as the social life develops. A characteristic of the social history of the tribe is the fact that when the social organization has developed to the point of admitting women, this stage inevitably marks the disintegration of the initiatory rites. The last chapter is properly an appendix and deals with the diffusion of initiation ceremonies in Australia, Tasmania, Melanesia, Polynesia, Africa, South, Central and North America. A very comprehensive bibliography is furnished in the form of copious footnote mention of authorities. The index of the book is confined to the enumeration of native terms, but this is very essential as there are ten columns of them.

Very many people will be glad to have this small volume if only for the sake of its opening poem which gives its title to the book. Known as "God" or "The God of Evolution," this poem, which appeared originally in The Open Court several years ago, is one of those inspired expressions of thought that strike home to the hearts of large numbers of thoughtful readers. These four stanzas are sufficient justification for the existence of the book, but the reader will find many a bit of occasional verse in the collection that follows, that will well pay perusal. The author is Professor of German Language and Literature in the University of Kansas, and several of his verses bear German titles, while at the end of the volume we find very successful renderings into German of the old familiar English lyrics "Drink To Me Only With Thine Eyes"
by Ben Jonson, and Thomas Moore's "Oft in the Stilly Night." Professor Carruth also touches on several Biblical parables which he would fain carry out to further conclusions from the traditional one. Such are "A Rhyme of Thomas the Doubter," "The Plaint of the Fruitless Fig-tree," "The Woman Taken in Adultery"; and also "The Brother of the Prodigal Son," who is made to justify his complaint of injustice on the part of his father, so that the father "stands reproved":

"All too lightly I forgot
The temptations of thy lot;
Homely duties fitly borne.
Match the prodigal's return.
Yes, for him who never wandered,
Not less than for him who squandered
His endowment, should there be
Fatted calf and jubilee."

In this study of the "Psychology of the Unbeliever" the author is careful to analyse only types which frankly admit themselves to be unbelievers. He rightly dismisses from his investigation those who make a business or profession of anti-clericalism, convinced that an Auguste Comte was more deeply an unbeliever than a Gaminet. He uses only such sources as are well authenticated and accurate, many of them being unpublished documents. His conclusions are not less interesting for the psychologist and the student of the history of philosophy than for apologists. The unbelievers whom M. Moisant discusses are not merely conventional types but living men whose weakness and strength are brought out in the sincere effort to give a correct presentation. The book is divided into three parts treating first of the scoffers represented by Voltaire; second, the Positivists, followers of Comte; and third, the intellectual class best represented perhaps in France by Renouvier.

This little work proceeds from the premise that all human life is inevitably exposed to discord and misery; that only a firm and sincere religion consisting of faith, prayer, hope and love is able to provide relief; and that natural law imposes this solution of the problem of life upon the world. After treating the subject from the point of view of religious need and religious duty the author proceeds to criticise the principal existing systems of religious philosophy and then draws the attention of students of the subject to certain delicate and important aspects of the religious problem supporting the view of the necessity and obligation of faith, and the necessity of doctrinal authority because of the insufficiency of reason and experience. The last chapter sums up the author's idea of the psychological and moral necessity of mental and physical expression of religious feeling as represented in public worship.
THE SCOPE AND CONTENT
OF THE
SCIENCE OF ANTHROPOLOGY

Historical review, library classification and select, annotated bibliography, with a list of the chief publications of leading anthropological societies and museums.

By JULIUS DIESELORD, A. M.

A thorough-going, painstaking work, in which the author makes an attempt to settle the perplexing question, what anthropology really is, to define its boundaries with other sciences and give a detailed enumeration of its contents as conceived today by the leading anthropologists of the various civilized countries of the world.

The bibliography (50 pages) gives succinct extracts from the works listed, thus furnishing the material on which the historical review and the elaborate library classification are founded.

A most welcome reference book for the anthropologist, and a necessary tool for any library containing anthropological literature.

200 pages, cloth, gilt top, $2.00 net, (8s. 6d.) net.
Also supplied in sheets, $1.50.

The Evolution of a Great Literature

One vol., 5x8 inches, 381 pp., $1.50 net postage 15 cents extra.

Extract from letter of Rev. T. K. Cheyne, D. D.

"I do not know you personally, but you must have transmitted your spirit to me in your book. I give it no epithets of a eulogistic character, because I am sure you need no praise of men. I trust that it may find 'fit audience.' We want such books. The field is large; the aspects under which the subject may be presented various. You have not encumbered your exposition with superabundant detail. I think you have shown much skill."

"In style it is clear and intelligible. Its fundamental postulate that "the Hebrew literature was an evolution and not a miracle," will commend the book to modern layman."—The Outlook.

"One of the most powerful books on the true view of the origin of the Bible has just been published, and is entitled 'The Evolution of a Great Literature.' The author writes with a frankness that is refreshing in these days of compromise and repression of honest conviction. Some will not agree with all his conclusions, but all can admire his candor and the vigor and clearness of his style."—The Springfield Republican.

THE

Foundations of Mathematics

A CONTRIBUTION TO THE PHILOSOPHY OF GEOMETRY

By DR. PAUL CARUS

140 pp., Cloth, Gilt Top. Price, 75 cents net; (3s. 6d. net).

This work is an important contribution to the philosophy of mathematics. Dr. Carus is not a mathematician by profession, but a philosopher, and he is convinced that the problem in hand is a philosophical rather than a mathematical one; that it is the old quarrel (discussed by Kant) of empiricism with transcendentalism, and hence its treatment may well be philosophical. The first chapter reviews the history of non-Euclidean geometry which may justly be considered a search for the philosophy of mathematics. Here is given the history of the parallel theorem, of the so-called metageometry, followed by an account of the various systems in detail, and their exponents,—of Gauss, Riemann, Lobachevsky, Bolyai, their precursors and successors, giving a special tribute to Professor Hermann Grassman of Stettin. “The Philosophical Basis of Mathematics” deals with the problems of thought involved in mathematical science, empiricism and transcendentalism, the a priori, universality, and the fundamental considerations of space. The question of dimensions is discussed in “Mathematics and Metageometry.” This chapter is of especial interest because it contains a practical suggestion by which to represent concretely the relation of the fourth dimension to the third, that is to say, what our space would be like if it were four-dimensional. In his Epilogue Dr. Carus brings out the analogy between mathematics and religion, the ultimate and unchangeable form of being and God.

The Living Age

"LITTELL'S"
Founded 1844

For sixty-five years The Living Age—still known to its attached constituency as "Littell's," from the name of its founder—has brought to its readers every week the most interesting, important and valuable articles from current English periodicals. Its range of selection extends from the stately "Quarterly" and "Edinburgh" to "Punch," and includes all the leading reviews, magazines and literary and scientific journals. It publishes without abridgement the best essays, fiction, poetry, travel sketches, literary, art and musical criticism, historical and biographical papers, scientific articles, discussions of social, religious and educational questions, and papers upon PUBLIC AFFAIRS and INTERNATIONAL POLITICS from the ablest writers, together with an editorial department devoted to "Books and Authors." The variety of sources from which its material is selected enables The Living Age to cover a wider range of authors and subjects than is possible for any other single magazine. Although it gives its readers in the course of a year nearly twice as much matter as is contained in any of the four-dollar monthly magazines, its weekly issue of 64 clear and legible pages makes it light and easy to hold, and enables it to reproduce important articles almost as soon as they reach this country in the periodicals of their first publication. The magazine appeals peculiarly to cultivated Americans who wish to read the best expressions of English thought; and it was perhaps never so nearly indispensable as at the present time, when history is being made so rapidly and Americans are following with such alert attention the course of international affairs. The subscription price of The Living Age for one year—including more than 3,800 pages—is Six Dollars. Special: A Trial Subscription of Three Months—thirteen numbers—One Dollar. Subscriptions may begin with any number.

PORTRAITS OF
EMINENT MATHEMATICIANS

Three portfolios edited by DAVID EUGENE SMITH, Ph. D., Professor of Mathematics in Teachers' College, Columbia University, New York City.

In response to a widespread demand from those interested in mathematics and the history of education, Professor Smith has edited three portfolios of the portraits of some of the most eminent of the world's contributors to the mathematical sciences. Accompanying each portrait is a brief biographical sketch, with occasional notes of interest concerning the artists represented. The pictures are of a size that allows for framing (11x14), it being the hope that a new interest in mathematics may be aroused through the decoration of classrooms by the portraits of those who helped to create the science.

PORTFOLIO No. 1. Twelve great mathematicians down to 1700 A.D.:
Thales, Pythagoras, Euclid, Archimedes, Leonardo of Pisa, Cardan, Vieta, Napier, Descartes, Fermat, Newton, Leibniz.

PORTFOLIO No. 2. The most eminent founders and promoters of the infinitesimal calculus: Cavalieri, Johann and Jakob Bernoulli, Pascal, L'Hopital, Barrow, Laplace, Lagrange, Euler Gauss, Monge and Niccolo Tartaglia.

PORTFOLIO No. 3. Eight portraits selected from the two former, portfolios especially adapted for high schools and academies, including portraits of
THALES—with whom began the study of scientific geometry;
PYTHAGORAS—who proved the proposition of the square on the hypotenuse;
EUCLID—whose Elements of Geometry form the basis of all modern text books;
ARCHIMEDES—whose treatment of the circle, cone, cylinder and sphere influences our work to-day;
DESCARTES—to whom are indebted for the graphic algebra in our high schools;
NEWTON—who generalized the binomial theorem and invented the calculus;
NAPIER—who invented logarithms and contributed to trigonometry;
PASCAL—who discovered the "Mystic Hexagram" at the age of sixteen.

PRICES
Portfolio 1 or 2 (12 portraits) on Japanese vellum, size 11x14, $5.00; both for $8.50.
Portfolio 1 or 2 (12 portraits) on American plate paper, size 11x14, $3.00; both for $5.00.
Portfolio 3 (8 portraits) on Japanese vellum, size 11x14, $3.50; single portraits, 50 cents.
Portfolio 3 (8 portraits) on American plate paper, size 11x14, $2.00; single portraits, 35 c.

"The issue of this fine collection is equally creditable to the expert knowledge and discriminating taste of the editor, Professor David Eugene Smith, and to the liberality and artistic resources of The Open Court Publishing Co."

"The selection is well made, the reproduction is handsomely executed, and the brief account which accompanies each portrait is of interest. Prof. Smith has rendered a valuable service to all who have interest in mathematics, by editing this collection. Wherever mathematics is taught, these portraits should adorn the walls."

PLANT BREEDING
Comments on the Experiments of
NILSSON AND BURBANK
BY
Hugo De Vries, Professor of Botany in the University of Amsterdam

A scientific book in simple language. Intensely interesting as well as instructive. Of special value to every botanist, horticulturist and farmer.

Supplied by your dealer; or direct, on receipt of your order with the mailing price.

"Naturally I have perused the contents of your book, PLANT BREEDING, with intense interest. Therefore I first of all beg you to accept my heartfelt thanks for the exceedingly appreciative and sympathetic representation of the work of our institution here, and indeed of my own part therein. Next I must congratulate you most cordially upon the excellent service you have performed in this standard work. It is simply marvelous! The clear, concise presentation, the consistent, sustained treatment of the whole history of selection in agricultural plants according to your modern theory which now, at last, makes everything clear, the masterful disposition of the rich and manifold material—all unite to make this book decidedly the best which has been accomplished along this line up to now."

Extract from a letter to Professor De Vries by Dr. Hjalmar Nilsson of the Swedish Agricultural Experiment Station at Svalof.

The Fragments of Empedocles
TRANSLATED INTO ENGLISH VERSE BY
WM. ELLERY LEONARD, PH. D.
Author of “Sonnets and Poems” and “Byronism in America”

A conscientious attempt on the part of a lover of literature and philosophy
to present the Fragments of Empedocles in English blank verse that
shall bring out their poetry no less than their meaning; accompanied by
the Greek text of Diels, notes interpreting the ideas of each fragment, and
an essay on the author as man, philosopher and poet.

The only verse translation in English as yet known.

Printed on feather weight paper, large type.
Gilt top. 100 pp. Price, $1.00

Species and Varieties:
Their Origin by Mutation
By Hugo de Vries
Professor of Botany in the University of Amsterdam.

The belief has prevailed for more than half a century that species are changed into new types very slowly and that thousands of years were necessary for the development of a new type of animal or plant. After twenty years of arduous investigation Professor de Vries has announced that he has found that new species originated suddenly by jumps, or by "mutations," and in conjunction with this discovery he offers an explanation of the qualities of living organisms on the basis of the conception of unit-characters. Important modifications are also proposed as to the conceptions of species and varieties as well as of variability, inheritance, atavism, selection and descent in general.

The announcement of the results in question has excited more interest among naturalists than any publication since the appearance of Darwin's Origin of Species, and marks the beginning of a new epoch in the history of evolution. Professor de Vries was invited to deliver a series of lectures upon the subject at the University of California during the summer of 1904, and these lectures are offered to a public now thoroughly interested in modern ideas of evolution.

The contents of the book include a readable and orderly recital of the facts and details which furnish the basis for the mutation-theory of the origin of species. All of the more important phases of heredity and descent come in for a clarifying treatment that renders the volume extremely readable to the amateur as well as to the trained biologist. The more reliable historical data are cited and
the results obtained by Professor de Vries in the Botanical
Garden at Amsterdam during twenty years of observations
are described.

Not the least important service rendered by Professor
de Vries in the preparation of these lectures consists in the
indication of definite specific problems that need investi-
gation, many of which may be profitably taken up by any-
one in a small garden. He has rescued the subject of
evolution from the thrall of polemics and brought it once
more within reach of the great mass of naturalists, any one
of whom may reasonably hope to contribute something
to its advancement by orderly observations.

The text of the lectures has been revised and rendered
into a form suitable for permanent record by Dr. D. T.
MacDougall who has been engaged in researches upon the
subject for several years, and who has furnished substan-
tial proof of the mutation theory of the origin of species by
his experimental investigations carried on in the New
York Botanical Gardens.

Price, postpaid $5.00 (91s.) net. xxiii + 830 pages, 8 vo., cloth, gilt top

THE PAPYRUS

Edited by MICHAEL MONAHAN
A Magazine for the Magazine-Weary

London Academy.—In fact, Mr. Monahan & the PAPYRUS.
Richard Le Gallienne.—I admire your literary articles immensely. They have a real touch, and are full of life and brilliancy.
James Huneker.—I envy you your magazine—it is a pulpit which you possess entirely and fill admirably. O detectable preacher!
Bliss Perry.—Just a line to say I think the latest PAPYRUS uncommonly good stuff. Good luck to you.
WM. Marion Ramsey, (in St. Louis Mirror.)—Michael Monahan, of the PAPYRUS, writes the choicest, best flavored classical English I know of in contemporary American letters.
Chicago News.—The PAPYRUS holds a unique place among the magazines and is always stimulating and interesting.
Leonard D. Abbott (Associate Editor Current Literature.)—I have read the PAPYRUS from the first number and have always read it eagerly.
Putnam's Monthly.—There is sun, wind and rain in Michael Monahan's whimsical fancies.
Troy, (N. Y.) Times.—One of the most unique and controversial figures in contemporary literature.
Kansas City Star.—Inimitable Michael Monahan, master of terse and vigorous English, flavor of shams and conventionalities.
Frederick W. White (in Denver Post) The new PAPYRUS is brighter and better than any similar magazine I know.

I. Introduction.
II. Washington Irving Bishop's Sealed Letter Reading in a New Dress.
III. Test where a Trick Envelope with a Double Flap is Used.
IV. Test where the Medium Secretly Pitches a Letter from the Pocket of the Sitter.
V. The Mystic Oracle of the Swinging Pendulums, or Mind Over Matter—A Rapping Hand—Light and Heavy Chest.
VI. Tests Given in a Large Store Room with Curtains for Partitions, Using Telegraphy, etc.
VII. A Billet Test, Using a Trick Envelope—A Spirit Message Written on a Slate, in the Sitter's Presence.
VIII. Flower Materialization.
IX. The Dark Seance.—A Deceptive Grip.—Mental Tests—Spirit Voices, Tune and Lights.
X. Materialization—Preparation of Luminous Costumes, Method of Presentation, etc.
XI. Tests Given in a Room in a Hotel—Slate-Writing on Slates Selected, Cleaned, and Held by Sitter—Test Wherein the Sitter's Own Slates are Used—Billet Work in Connection Therewith—The Prepared Table.
XII. Reading Sealed Billets before a Company in a Room in which Complete Darkness Reigns.

Mediumistic Readings of Sealed Writings.

I. Introduction.
II. Preparation of the Writings.
III. Reading the Writings—Production of a Spirit Message.
IV. The Secrets Explained.—Slate Trick Requiring a Special Chair.

Spirit Slate Writing and Billet Tests.

I. Introduction.
II. Message Produced on One of a Stack of Slates, First Method—Method Using a Rug or Newspaper.
III. Message on One of a Stack of Slates, Second Method.—How to Pass the Slates from One Hand to the Other.
IV. Message Produced When but Two Examined Slates are Used—Some Expert Maneuvering and the Importance of the "Passes."
V. Message Produced on One of Two Slates Selected from a Stack, Third Method, where the "Pass" and Some Expert Maneuvering are Introduced.—Production of a Message Written with a Gold Ring Belonging to the Sitter.
VI. To Secretly Read a Question Written on a Slate by a Sitter, when a Stack of Slates is Used.—How to Secretly Obtain a Confession or Question Written on Paper and Sealed by the Sitter, when a Stack of Slates is Used.

VII. Message Produced on a Slate Cleaned and held under a Table by a Sitter.
VIII. Slate Trick Requiring Three Slates and a Flap.—The Same Used as a Conjuring Trick—Preparation of the Slates.
IX. Slate Trick Requiring a Double-Hinged Slate and a Flap.
X. Independent Paper Writing.—Two Slates and a Silhouette Flap Used.
XI. Slate Trick with a Single Slate and a Flap, which is suitable for Platform Production.—Methods of Forcing the Selection of a Certain Word.—Methods of Forcing the Selection of a Name of Figures.—The Same Trick, when Three Slates are Used.—The Same When Three Slates are Used, and a Spoken Question Answered, with Words in Colored Writing.
XII. Methods of Obtaining a Secret Impression of the Writing of a Sitter.—A Store-Room Reading where this is Used.—A Test Using a Prepared Book.—How to Switch a Question—Tricks Depending on this Principle.—Tests Given by Various Chicago Mediums—Reading a Message by Pressing It on a Skull Cap Worn by Medium.
XIII. Tricks Where the Sitter Brings His Own Slates.—Various Traps.—Psychometric Tests.—Message on Slates Wrapped in the Original Paper in which they were Purchased—Other Messages.
XIV. Message on a Sitter's Slate Produced by a Rubber Stamp.—Message Produced by an Adroit Exchange of Slates.—Chemical Tricks.—Other Methods.—Means of Securing Information.

The Philosophical Review

A BI-MONTHLY JOURNAL DEVOTED TO THE PHILOSOPHICAL SCIENCES:
LOGIC, ETHICS, METAPHYSICS, PSYCHOLOGY, AESTHETICS,
AND THE PHILOSOPHY OF RELIGION.

VOL. XVIII, NO. 2 (MARCH, 1909) CONTAINS:

I. ORIGINAL ARTICLES:

The Problem of Beauty, - By Professor Hugo Münsterberg
The Idealism of Edward Caird, - By Professor John Watson
The American Philosophical Association, - By the Secretary

II. REVIEWS OF BOOKS:

H. Münsterberg, Philosophie der Werte: by Professor A. E. Taylor.

III. NOTICES OF NEW BOOKS:

IV. SUMMARIES OF ARTICLES.

V. NOTES.

LONGMANS, GREEN, AND CO.

91 and 93 Fifth Avenue, NEW YORK.

Single Numbers, 60c, (3s. net.) Per Annum, $3.00 (12s. 6d.)
TO REVIVE BUDDHISM in India, to disseminate Pali Buddhist Literature, to publish scientific tracts in the Indian Vernaculars, to educate the illiterate millions of Indian people in scientific industrialism, to maintain teachers at Buddha-Gaya, Benares, Kusinara, Sarnath, Madras, Calcutta &c., to build Schools at these places, to send Buddhist Missionaries abroad, the Maha-Bodhi Society asks every good Buddhist to contribute his mite to the Maha-Bodhi Fund.

Donations may be sent to the Hong-Kong and Shanghai Bank, Calcutta, or Colombo, in favor of the General Secretary, Maha-Bodhi Society, or the Treasurer, 30, Hanipooker Road, Calcutta, India. Correspondence invited from American sympathizers of Buddhism.

THE ANAGÁRIKA, DHARMAPÁLA, Gen'l Secretary.

READERS ARE INVITED to send for the new illustrated catalogue of "The Work of The Open Court Publishing Company." A Dictionary Catalogue with biographical sketches, including accurate descriptions of the books published; Mathematics, Philosophy, Psychology, The History of Religions, Biology, etc., etc. An Index of Titles, Classified by Subjects; An Index of Names, Titles and Illustrations; also a list of Important Articles by eminent Scholars. There are 50 full page half-tone illustrations and outline drawings, including many portraits of famous men. Free on request. Bound edition postpaid 50c.
Mr. W. S. Andrews of Schenectady, N. Y., was one of Mr. Edison's trusted assistants in the early 80's of the last century when that great inventor was perfecting his system of electric lighting by incandescent lamps, and he is still taking an active part in the Electrical Engineering field.

During his leisure hours he has given considerable thought to the working out in his own original way the construction of magic squares and cubes of various styles and sizes. The development of these mathematical curios according to regular rules, and by the aid of geometrical diagrams is a novel feature in his work which has attracted the attention of others interested along the same lines, and such contributions on the subject as they have had to offer he has incorporated in this book, making it a most comprehensive presentation of the subject.

The first two chapters consist of a general discussion of the general qualities and characteristics of odd and even magic squares and cubes, and notes on their construction. The third describes the squares of Benjamin Franklin and their characteristics while Dr. Carus adds a further analysis of these squares. The fourth chapter contains "Reflections on Magic Squares" by Dr. Carus in which he brings out the intrinsic harmony and symmetry which exists in the laws governing the construction of these apparently magical groups of numbers. Mr. Frierson’s "Mathematical Study of Magic Squares" which forms the fifth chapter, states the laws in algebraic formulas. Mr. Browne contributes a chapter on "Magic Squares and Pythagorean Numbers" in which he shows the importance laid by the ancients on strange and mystical combinations of figures. The book closes with three chapters of generalizations in which Mr. Andrews discusses "Some Curious Magic Squares and Combinations," "Notes on Various Constructive Plans by which Magic Squares May be Classified," and "The Mathematical Value of Magic Squares."

Subscribers!

The following reductions on longer term subscriptions for either "The Open Court" or "The Monist" are made as an inducement to you to become a permanent reader at the least expense and trouble for yourself and to save us the labor and expense of securing the renewals each year. Changes of address are welcome, as these periodicals are published solely in the interest of the reading public. It will be, therefore, no advantage for us to continue sending the same to an old address. Please notify us promptly of any change.

Subscribers to "The Open Court"

Who wish to remit for two or more years in advance to avoid sending a single dollar each year, will be allowed to deduct from the regular subscription price, when ordering, as follows: thus a

Remittance of $1.75 pays for two years
2.55 pays for three years
3.20 pays for four years
3.75 pays for five years

This rate does not include postage to foreign countries in the U. P. U., which must be added at the rate of 35 cents per annum; nor to Canada, to which the postage is 25 cents per annum extra.

Subscribers to "The Monist"

Who wish to remit for two or more years in advance to avoid sending in two dollars each year, will be allowed to deduct from the regular subscription price, when ordering, as follows: thus a

Remittance of $3.50 pays for two years
5.10 pays for three years
6.40 pays for four years
7.50 pays for five years

This rate does not include postage to foreign countries in the U. P. U., which must be added at the rate of 25 cents per annum.
