MISCELLANEOUS.

CURRENTS OF THOUGHT IN THE ORIENT.

BY B. K. ROY.

Count Okuma Attacks Socialism.

Writing on "Japan's Struggle with Finance" in the Japan Magazine (Tokyo) for November, Count Okuma takes occasion in this succinct paper to attack the socialist theory of state ownership of industries and public utilities. The master statesman of Japan argues thus:

"Our authorities at present are giving too much attention to protecting a few industries at the expense of other and smaller enterprises; and the government itself monopolizes some of the more important and necessary national undertakings. Private management of industries, in my opinion, always does more to excite national activity and competition than government management; it induces the people to cultivate an enterprising and independent spirit, which is very necessary to national development and general progress. Popular industry is even more beneficial and effective in promoting national efficiency than official industry, however well manipulated and managed. Whatever the people take in hand they can do, and do with more lasting and universal benefit to the nation than what the government does; and if the people once undertake to reduce our great national debt, it will be done. Then the government will be more free to devote its attention to education and other important subjects of national welfare, which are now only too much neglected. It is more important that the people shall prosper than that the government should have ample revenue; for the government can never really be wealthier than the people; and it is only as the people are permitted to cultivate and promote all forms of legitimate industry that they can be able to support the government and enable it to meet its obligations."

Whether Count Okuma is right or wrong or both as regards his championship of the rights of the people against governmental encroachment, we leave for the experts and the critics to decide. But the following sentence of the Count admits of no controversy: "Certainly a government that prospers at the expense of the people is doomed."

The Returned Students and the Chinese Revolution.

The part the students of different American and European countries have played in bringing about revolutions or radical reforms is too well known to warrant any comment here. Like the students of Russia and Italy, America
and Turkey, the students, especially the foreign-educated students, of China and Japan have played a noble part in the making of these two great countries.

Mr. Y. S. Tsao, writing in the Journal of Race Development for July, gives an outline of the work accomplished by these "semi-foreigners." He says:

"When the students returned from America in the early eighties, they were despised, suspected and watched by the officers of the Manchu government. For the first few years they were given a thorough drilling in Chinese literature so as to win them over to the conservative attitude of looking at things, and when sufficiently purged of their revolutionary ideas, they were left to shift for themselves, for the government had no use for such 'semi-foreigners.' But beginning with the reformation after the China-Japan war, a number of reformers from the old school went to court as advisors and not a few returned students from America were given appointments by high officials. However, it was not until after the Boxer uprising that a number of them through the recommendation of Yuan Shih Kai were given responsible positions in the government."

On the intellectual activities of the returned students Mr. Tsao says:

"While the handful of returned students from Europe and America were busy occupying themselves with official life, teaching and engineering, a few of them translated the works of John Stuart Mill, Huxley, Spencer, Darwin, Henry George and other modern writers. The doctrine of the survival of the fittest has been on the lips of every thinking Chinese, and its grim significance is not lost on a nation that seems to be the center of struggle in the East. However, the greater part of the modern ideas came from Japan through the students there who after a few months of training could transcribe Japanese translations of Western books into Chinese. The rapid multiplication of patriotic newspapers and magazines helped immensely to disseminate modern political ideas along with scientific knowledge throughout the length and breadth of the nation. The biographies of such statesmen as Washington, Bismarck, Metternich and Gladstone, such leaders as Napoleon, Cromwell and Lincoln, such patriots as Mazzini and Garibaldi were literally devoured. The doctrines of Rousseau, Montesquieu and Voltaire were expounded, and a weekly known as 'The People,' based on the principle of 'Young Italy,' was started. It had a circulation of 150,000 before it was finally suppressed by the Japanese government upon the request of the Manchu government."

Students' Work in India's Social Revolution.

While the other Oriental countries, helped by their young students, are marching on in the path of progress, democracy and self-realization, the young students of India are not at rest. They too, beside other things, are taking a prominent part in bringing about a social revolution in enslaved and caste-ridden India. The following quotation from London India, of October 10, will tell its own story:

"While young Anglo-India is behaving so badly, the middle-aged variety of the type is beginning to discover that the Bengal youth is not the villain which the Yellow Press has painted him. An 'Onlooker,' who is evidently an Anglo-Indian employer of labor, writes to the Englishman (Calcutta) to warn the European community in India, and particularly in Bengal, that it has not
been paying sufficient attention to the new spirit of enterprise and adventure that is now evident amongst the student class in Bengal. He writes:

"I have had an opportunity of personally witnessing the daring, self-sacrifice, and disregard for comfort shown by not one but many parties of Bengali students from Calcutta who have visited the flooded districts [devastated in the recent Damadpur floods] with relief in the way of provisions and medical comforts. Before I saw these boys, I entertained the common idea that Bengali students were for the most part short-sighted youths without physique and spiritless, entertaining a tremendous opinion of themselves, full of perversely hatred of the British Raj, and very contemptuous of their illiterate countrymen. These preconceived opinions of mine have now received a rude shock. Inquiries I made showed that the majority of the students were not only of a respectable class, but of the most respectable class, sons of Zamindars, of well-known professional men, and of government officials, just the boys who could have most easily stayed away. I think that this phenomenon, if I may use the word, deserves attention for it means that the youth of Bengal is growing very fast in physical and moral directions, and that we will in a few years be faced by a community which in character and spirit will be equal to the best that Europe can produce. In this flood relief business, the thought of caste seems to have dropped entirely. [Most of the victims of the flood were poor pariahs.] That alone is an indication of a coming break up of vast dimensions.... Obviously the European must be greatly affected by the coming changes. He is here not because he is superior to the Indian in brain, but because he has grit and character. If the new generation of Indians also displays grit and character, what excuse will there be for bringing out Europeans to govern the country and control industrial enterprise? However, I do not wish to harbor what may seem a very selfish view. If the Bengal turn out better men than we are, so much the worse for us."

We are exceedingly sorry for our panic-stricken Anglo-Indian friends. But judging from the reports that we receive from Indian papers and magazines it seems easy to foresee that a great many more surprises and "ruke shocks" are in waiting for the British in India.

---

**BOOK REVIEWS AND NOTES.**

**Taoïsme: Tome I, Le Canon Taoïste; Tome II, Les Péres du Système Taoïste**

Dr. Wieger is a Jesuit missionary of Tientsin, China, where he has improved his opportunities to make a careful study of Chinese language, literature and thought. Besides text-books in the Chinese language and a large volume on Chinese folk-lore, he has written a summary of Chinese history from the beginning to 1905, a volume of 2173 pages including the Chinese text. He has also done valuable work of high scholarship in preparing a series of philosophical texts which he intends to comprise a summary of Chinese philosophical ideas from the beginning of their literature until the present. He has completed the study of Confucianism in an illustrated volume of 550 pages. His work on Chinese Buddhism and Taoism is not yet complete though two large volumes of each of these are finished. The introductory volume on Chinese Buddhism treats of monasticism and the second, which
comes from the press almost simultaneously with this number of The Open Court, treats of the Chinese lives of the Buddha.

The volumes of Dr. Wiegler's in which we are most interested are those on Taoism. The first of these, entitled Le Conou taoiste, is a very complete bibliography of Taoist literature consisting of an index of the Taoist Tripitaka, the collection of sacred literature made by the monks in the sixteenth century, the "patrology," as Dr. Wiegler prefers to call it, rather than the more usual but less exact "canon"; then follows an index of the official or private lists of Taoist writings prepared by the lamy at various times from the first to the seventeenth centuries. These two indexes exhaust Taoist bibliography. Before entering upon these bibliographical details, Dr. Wiegler thinks it well to sum up concisely the principal features of the evolution of Taoist doctrine and history in order especially to explain the connection between the apparently disparate elements of Taoist patrology, its arrangement, its divisions, its terminology, etc. A translation of the doctrinal portion of this introduction is given on another page of this issue, accompanied by a reproduction of the cover illustration of the book. Dr. Wiegler's second volume (1913) contains text and French translation of the extant works of the three Taoist fathers, Lao-tse, Lieh-tse and Chwang-tse. All have the same message to proclaim, the two latter simply developing the teachings of Lao-tse to which they undertook to convert Emperor Huang-ti, the founder of the Chinese empire. The book contains a subject index and an index of names.

---

This work on the text of the New Testament in its oldest attainable form has recently been finished after a labor of sixteen years conducted by Dr. H. von Soden, of Berlin University, supported by forty-four collaborators. It was made possible through the liberality of an interested patroness, Miss Elise Kühns. About 165 manuscript codices containing the gospels and apostolos, i.e., the rest of the New Testament writings, 1240 gospel codices, 244 apostolos codices, besides 170 gospel apostolos, and 40 apocalypse-commentary codices with text were collated and examined. The last volume (the preceding volumes giving the investigation, prolegomena, etc.) of this work contains the text of the New Testament on the upper half of each page, while on the lower half the various readings are classed in three groups, the first taking in the textual problems not yet definitely solved, the second, defending substantially Von Soden's text-form, the third giving the variants occasioned accidentally by transcription. This volume makes it possible to get as near as can be to the first text of the New Testament writers, and also to check the oldest text on the principles laid down by Von Soden, so that it is no longer necessary to go through thick and thin with the Vaticanus, Sinaiticus and Alexandrinus, the infallible authorities thus far. This brief résumé is based on a comprehensive review in the Protestantentbblatt (Berlin) of September 24, which fails to give the price, the total number of volumes, or whether the last volume can be obtained separately.

THE
Mechanistic Principle
AND THE
Non-Mechanical
An Inquiry Into Fundamentals With Extracts From
Representatives of Either Side

By PAUL CARUS

Pp. 128 CLOTH $1.00

What the Book Contains:

Mechanicalism and Teleology—A Contrast
Motion and Movement
The Will
The Non-Mechanical
Time and Space
Causality
The Significance of Form
The Universal and the Particular
Mark Twain's Philosophy
What Is Man
The Mind an Independent Machine
Spiritual Decision
All Credit Belongs to God
La Mettrie's View of Man as a Machine
La Place Believes in Absolute Determinism
Cause and Effect "Do Not Even Touch Hands"
The Spirit in the Wheels
The Mechanism of the Universe as Seen by a Theist
The Machinery of Life
In the New View there is no Room for "God"
The Melancholy Teaching of Today

Open Court Publishing Co.
CHICAGO LONDON
THE
Principle of Relativity
in the Light of the
Philosophy of Science

By PAUL CARUS

Pp. 109 CLOTH $1.00

What the Book Contains:

On the Absolute
Tricks of Cognition
Comstock on Relativity
The A Priori
On Absolute Motion
Absolute Space
Ernst Mach
Objectivity
Primary Concepts

Some Physical Problems
of Relativity
The Principle of Relativity
as a Phase in the De-
velopment of Science.
Appendix: The Rev. James
Bradley on the Motion
of Fixed Stars.

Dr. Carus here gives the history of the growth of this theory, his belief in its
transitory character, its significance in present day physics, and the views of its
most prominent representatives. The appendix contains a letter addressed to the
astronomer Dr. Edmond Halley in 1727 by Prof. James Bradley of Oxford, the
forerunner of the relativity physicists of today.

For a compendium of Dr. Carus's philosophical views read his

Philosophy as a Science
(sent free on application)
which may be had also in German and French translations.

JUST PUBLISHED—New and Enlarged Edition of
Prof. Ewald Hering's Classical Essay:

On Memory, and the Specific Energies of the Nervous System

Fourth Edition, containing additional chapters on the Theory of Nerve Activity

CLOTH $1.00

The investigations of Ewald Hering, Professor of Psychology at the University of Leipzig, have been largely accepted by his colleagues, and his Essay on Memory has become classical.

THE ENCYCLOPEDIA BRITANNICA, Vol. XIX, page 22, says:

"If the ingenious speculations of Hering are finally put into demonstrated truth, such should be brought face to face with the fact that the mere act of building up or the mere act of breaking down affects the condition of protoplasm in other ways than the one which has hitherto been considered. . . . If Hering's conception be a true one (and the arguments in favor of it, if not wholly conclusive, are at least serious), it is probable that future inquiry may lay the foundation of a new molecular physiology,"—PROFESSOR MICHAEL POSTER, Cambridge University.

Books on Memory and Related Subjects:

Double Consciousness, by Alfred Binet. Cloth 50c., paper 20c.

Contributions to the Analysis of the Sensations, by Ernst Mach. Cloth $1.25.

Diseases of Personality, by Theo. Ribot. Cloth 75c., paper 30c.

First Book in Organic Evolution, by D. K. Shute. Written especially for the use of students. Illustrated. Cloth $1.25, paper 60c.

Examination of Weismannism, by George J. Romanes. Cloth $1.00, paper 40c.

THE CABALA and THE TALMUD

in relation to

Judaism and Christianity

Two interesting small books by BERNHARD PICK, Ph. D., D. D.

The Cabala: Its Influence on Judaism and Christianity—Cloth, $0.75.

"The origin of the Zohar or Book of Splendor in the 13th century forms the climax of the history of the Cabala, a book of Jewish mysticism. It played an important part in the theological literature of both Jews and Christians during the Middle Ages."

Jesus in the Talmud: His Personality, His Disciples and His Sayings—Cloth, $0.75.

The attitude of Judaism toward Christianity at the time when the Talmud was in a state of formation was extremely hostile; but it must be remembered that the hostility was mutual. Many passages, offensive to Christians, have been removed from late editions of the Talmud. These passages have been collected and are here offered as a matter of historical interest.

Other Books by the same Author

Paralipomena; Remains of Gospels and Sayings of Christ—Boards, $0.75.

"A little book of extraordinary interest, containing more of the extra canonical 'sayings' than have ever before been brought together in English."

—London Spectator.

"Students of the beginnings of Christianity will be grateful for this collection of materials from other sources than the New Testament."

—Unity, Chicago.

The Apocryphal Acts of Peter, Paul, John, Andrew, and Thomas—Cloth, $1.25.

"A picture of Christianity towards the end of the second century; the book is carefully prepared, convenient and provided with abundant bibliographical references."

—Historical Review, Vol. 90; 1912.

"We grant that Mr. Pick has acquitted himself well in his task, and performed it according to the best scientific methods."

—Catholic University, France.

The Devotional Songs of Novalis—Cloth, $1.00.

"Christian hymns of great merit, equal in rank to Schleiermacher's 'Discourses on Religion' in regard to spiritual feeling and enduring worth."

Carlyle says in his famous Essay on Novalis in 1829:

"As a poet, Novalis is no less idealistic than as a philosopher; his pure religious temper and his heartfelt love of Nature—bring him into true poetic relation both with the spiritual and the material world."

Books on Nietzsche

Nietzsche and other Exponents of Individualism.
By Paul Carus. $1.25. (Just published.) Illustrated with portraits of Nietzsche. Cloth, $1.25.

A well-balanced presentation of Nietzsche's philosophy. Principal Contents: Anti-Scientific Tendencies; Extreme Nominalism; Ego Sovereignty; Philosophy of Originality; and the Principle of Valuation, including a review of Nietzsche's predecessors and disciples.

A reliable introduction to a study of the philosophy of Individualism.

Nietzsche: Dionysian Spirit of the Age.
Some account of his life and writings, by A. R. Orage, Fcap. 8vo, quarter buckram, with portrait, net 75c.

Nietzsche in Outline and Aphorism.

"Mr. Orage's selection from Nietzschean aphorisms and his statement of Nietzsche's position are just what is needed."—Pallian News.

Who Is to Be Master of the World?
An introduction to the Philosophy of Friedrich Nietzsche by Anthony M. Ludovici. Preface by Dr. O. Levy, author of "The Revival of Aristocracy," etc. Cr. 8vo, 200 pages, $1.25.

The Gospel of Superman.

The Open Court Publishing Co., Chicago
"This handsome and elaborate volume by one of the greatest of the French materialists, is a credit to editor and publisher."
—Princeton Theological Review.

"The volume is distinctly entertaining."

"La Mettrie lived at a time when many of our modern scientific ideas were taking shape and Descartes and Locke were the authority to be reckoned with. The rendering is spirited; the notes are full; the index ample."
—Boston Transcript.

"The service which the Open Court Publishing Company is rendering makes accessible, in good English, many of the important works of early modern philosophy."
—University of Chicago Press.

"A useful addition to the philosophical library issued by the Open Court Publishing Company. La Mettrie for his relation to English Deism and French Materialism has considerable historical interest."
—The Nation, New York.

"In science, as in literature, there are many indications that the thought and style of the eighteenth century, too far disparaged, is coming to be appreciated at a higher value than has been normally placed upon them in the last 50 years, as seen in the publication of this little classic book."
—Bookfellow, Australia.

"La Mettrie, most daring of the earlier French ‘Philosophes’ of the eighteenth century, curiously anticipated some of the teachings of Haeckel."
—The Churchman, New York.

"This famous French philosophical classic is issued in a worthy form by the one American publishing house not afraid of embarking on the hazardous venture of publishing low-priced books of philosophy."
—The Continent, Chicago.
PRESS OPINIONS, Continued

"The book is a specimen of scholarly work in translation and notes."

"It is well to familiarize ourselves with the clearest statements of materialism; its best refutation is its bald statement."
—Biblioteca Sacra.

"The Open Court Company has supplied for ready use an excellent edition of La Mettrie's Man a Machine, which provides one with material for studying this brilliant and interesting example of the materialism of the eighteenth century."
—Hartford Seminary Record.

"La Mettrie's speculations as to the mechanism of instinctive actions has been borne out by recent experiments made by Dr. Loeb. In other places he comes into curious contact with Dr. Alexis Carrel's late demonstration of the independent life of organs. The book has a strangely modern air."
—Evening Sun, Baltimore.

"La Mettrie's work is a landmark in the development of materialistic thought."
—New York Call.

"Among the books that are regarded as standard references in the discussion of the soul as an elemental and eternal 'vitality' is Man a Machine, by La Mettrie."
—The Examiner, Chicago.

"Most men love wealth; some love power, some few love wisdom, and, though least in number, the thinkers come to dominate the world. All who really think try to give an interpretation to life and things in general, and these fall naturally into two classes—materialists and idealists; they offer a mechanical theory or an ideal; a material or a spiritual. Thought as a mode of action has fascinated every materialistic thinker from Heraclitus' day to ours."
—Baltimore News.

"I am very glad to see this famous and representative piece of eighteenth century mechanistic materialism and sensationalism made available not only in a convenient form, but with much serviceable supplementary material. In the series of text-books of this sort which your house has published you have done a substantial service in facilitating the first-hand study of the history of philosophy in our American universities."
—Arthur Lovejoy, Department of Philosophy, Johns Hopkins University, Baltimore, Md.

ISIS

REVUE CONSCARÉE À L'HISTOIRE DE LA SCIENCE

BUT.—Etudier la genèse et le développement des théories scientifiques, en tenant compte de tous les échanges d'idées et de toutes les influences que le progrès de la civilisation met constamment en jeu. Réunir tous les matériaux nécessaires pour cette étude et perfectionner ses méthodes et ses instruments de travail.—Il est à peine besoin de faire remarquer que cette œuvre de synthèse n'intéresse pas seulement les historiens de la science, auxquels elle est plus spécialement destinée, mais aussi les historiens proprement dits, les savants, les philosophes, les sociologues, en un mot, tous ceux qui désirent mieux comprendre l'évolution intellectuelle de l'humanité.

PLAN.—Chaque fascicule de la revue contiendra: 1o une chronique; 2o un éditorial consacré à la critique des méthodes, ou à la philosophie de l'histoire, ou à la coordination des résultats acquis; 3o des contributions originales à l'histoire de la science; 4o des revues générales sur différentes parties de l'histoire de la science, et sur les disciplines connexes que l'historien de la science doit connaître au moins superficiellement: histoire de la philosophie, histoire des religions, histoire de la technologie, histoire des beaux-arts....; 5o des notes archéologiques et iconographiques; 6o des analyses critiques des travaux récents les plus importants; 7o des notes bibliographiques rétrospectives sur les ouvrages anciens fondamentaux, et des articles de haute vulgarisation consacrés à l'examen des sources et des instruments de travail indispensables à l'étude d'une question ou d'une époque déterminée; 8o la bibliographie complète de tous les travaux récents relatifs à l'histoire de la science.

ORGANISATION.—Isis sera publiée en français, en anglais, en allemand et en italien, et paraîtra chaque trimestre, en fascicule de 10 à 13 feuillets in-8o environ. Quatre fascicules formeront un tome de 640 à 800 pages, avec figures et planches hors texte, s'il y a lieu. Le prix de souscription, par tome et par année, est de 30 francs, payables après la publication du premier fascicule.

ADRESSES.—Tout ce qui concerne la rédaction et l'administration d'Isis doit être adressé à M. George Sarton, à Wondelgem-lez-Gand, Belgique.

NON-EUCLIDEAN GEOMETRY
A Critical and Historical Study of Its Development
By ROBERT BONOLA
Authorized English Translation, with Additional Appendices, by H. S. Carslaw,
Professor in the University of Sydney, N.S.W. with An Introduction by
Federigo Enriquez, Professor in the University of Bologna.
Cloth; pp. 268. Price, $2.00.

NOTES AND REVIEWS

"For simplicity and elegance of treatment of a subject which was
a source of confusion to mathematicians for centuries, Robert Bonola's
'Non-Euclidean Geometry' leaves little to be desired. The English
translation, by H. S. Carslaw, now renders this book accessible to an
extensive class of readers. . . . The subject is taken up mainly in
the order of historical development, beginning with the attempts of
the Greeks and Arabs to prove Euclid's famous Fifth Postulate, and
tracing the history of this postulate and the theory of parallels until it
was finally shown that postulates which contradict the Fifth Postulate
may be used as a basis for a logically consistent geometry. . . .
Three such (Non-Euclidean) geometries are given particular attention.
. . . Numerous references to the literature of the subject make the
book particularly valuable to the thorough student of geometry." —

"The author traces in admirable fashion the gradual development
of Non-Euclidean geometry. The clear and concise way in which the
subject is treated and the large number of references given make this

"The recent untimely death of Professor Bonola lends unusual
interest to this book. . . . In a review of the original Italian
edition which appeared in the Bulletin in 1910, I spoke of the desira-
bility of having 'an English edition of so valuable and interesting a
work.' This want is now well supplied by Professor Carslaw's transla-
tion . . . which is a very readable and satisfactory English
version of the best historical introduction we have to the elements
of Non-Euclidean geometry." —Arthur Rank, Bulletin of the Ameri-
can Mathematical Society.

Chicago
AESOP AND HYSSOP

Fables adapted and original, in a variety of verse forms. Cloth $1.50

A clever critic in THE NEW YORK TIMES describes this contribution to Nonsense Literature as a "Unique and Delightful Folly by a Professorial Vaudevillian." He says:

"One never knows what a Professor will do. They are the most whimsical class in the world. The learned William Ellery Leonard, for instance. Not content with being a successful pedagogue and a respected scholar, he has pilfered for himself crowns of poetic laurel and of critical bay. Modesty forbids the naming of the leading review wherein his articles have, of late, delighted the elect; but we may recall the praise which Mr. Kilmer, in these columns, bestowed on his poetry a fortnight ago. And now that we have beheld him on the stage of the day in these eminently proper roles, behold he appears again, like a Proctor vaudevilling, with cap and bells, a clogging stop, and a mask, with the slightest twirl of irony to the smiling lips."

OTHER BOOKS BY THE SAME AUTHOR:

BYRON AND BYRONISM IN AMERICA. $1.06 postpaid. A study in literary backgrounds before the Civil War.
THE FRAGMENTS OF EMPEDOCLES. $1.08 postpaid. Translation in blank verse with introductory study and explanatory notes.
THE POET OF GALILEE. $1.08 postpaid. An examination of the sayings of Jesus from the point of view of literary criticism.
THE OREGON TRAIL OF FRANCIS PARKMAN. 45 cents postpaid. Edited with introduction and notes.
GLORY OF THE MORNING. 40 cents postpaid. One act Indian play in poetic prose.
THE VAUNT OF MAN, AND OTHER POEMS. $1.35 postpaid.

Ready for the Press

LUcretius. A blank verse translation of the entire six books.

Open Court Publishing Co. 122 S. Michigan Ave., CHICAGO
Dr. Paul Duessen's Classical Work

THE SYSTEM OF THE VEDANTA

Has just been published in an authorized translation by

CHARLES JOHNSTON

INDIA has been the classical land of Psychological investigation. As the Jews developed religion, the Greeks art and science, so the sages of India, psychology. Professor Duessen, who is both a philosopher and a most prominent Sanskrit scholar, has devoted his life to the Vedanta, and in this great work he has collected all pertinent material.

PRESS NOTICES

American Review of Reviews, New York—"This is a rare and wonderful book that is chiefly concerned with the science of the soul . . . in the Vedanta you will find the seeds of all known philosophical systems . . . Emerson's lofty thought was merely the philosophy of Brahma filtered through a marvelous Western Mind."

Boston Transcript, Mass. —"Dr. Duessen is a recognized authority in everything pertaining to Hindu philosophy. This book is a systematic exposition of that Hindu philosophy known as the Vedanta. The volume is like a combination of a work on metaphysics, theology and practical religion. The book is not only the work of a great scholar, but that of a man who knows how to make things clear."

The Continent, Chicago—"This is perhaps the most comprehensive and best balanced presentation we have had of the Hindu system of religious philosophy, called the Vedanta."

Springfield Republican, Mass. —"The author has attempted and accomplished an enormous task . . . an immense amount of material is collected and compressed into the space of the volume. The quoted portions of the Vedic text are clear and effective and the comments more than commonly readable for even the lay reader."

The Expository Time, London—"Professor Paul Duessen of Kiel is one of the great students of Indian literature. His Upanishads has had a wide circulation."

In this book the name of Vedanta is applied to the theologicophilosophical system, founded upon the Upanishads which may be called the Dogmatics of Brahmanism. The translation makes easy reading and yet it is reliable.

Send us the name of your book dealer and we will send a copy, postpaid, for examination on a 10-day return privilege.

RATIONALIST LITERATURE

HISTORY OF PSYCHOLOGY.
By Professor J. Mark Baldwin. 2 vols., 320 pp. and illustrations; cloth 50c each.

A RELIGION OF THIS WORLD.
Being a Series of Positivist Addresses given at the London Church of Humanity. By Philip Thomas, Minister of the Church. viii + 138 pp.; cloth $1.25.

WHAT ARE WE TO BELIEVE?
By C. R. A. xii + 138 pp.; cloth $1.00 net; paper cover, 60c net.
The task of the author of this little work has been mainly to collect and to analyse the interpretations given to the Gospels by men who have spent their lives in this branch of study. He speaks much less with his own voice than with those of distinguished scholars. His book will therefore enable even a hasty reader to realize exactly how things stand as regards the evidence for Christianity supplied by the New Testament and by history.

ESSAYS TOWARDS PEACE.
By John M. Robertson, M. P., S. H. Swinny, Prof. Ed. Westermarck, and Norman Angell. With Introduction by Mrs. H. Bradlaugh Bonner. 92 pp.; fcp. 8vo; cloth 50c. net; paper cover, 30c net.

THE IDEA OF A FREE CHURCH.
By Henry Sturt, M. A. Cheap edition; xiv + 312 pp.; cloth, 50c; paper cover, 25c.

"No one can read the very able chapter entitled 'A Historical Criticism of Christianity' without being impressed by the extraordinary freshness and vigour displayed throughout in handling what might have seemed an exhausted subject. Let me be content with warmly recommending the whole work to all who are interested in the double process of carrying life into ideas and ideas into life."—A. W. Benn.

WAR AND PESSIMISM; AND OTHER STUDIES.
By George Chamier. Cheap edition; 128 pp.; paper cover, 50c.

A SHORT HISTORY OF CHRISTIANITY.
By John M. Robertson, M. P. xx + 354 pp.; cloth, $2.25.
This is a considerably revised and amplified edition of one of Mr. Robertson's most popular works, and is issued uniform in price and get-up with Christianity and Mythology, Pagan Christ, and The Evolution of Status.

OBSCURANTISM IN MODERN SCIENCE.
By Edward Clodd. 20 pp.; demy 8vo., paper cover, 10c.

Open Court Publishing Co. 122 S. Michigan Ave. Chicago
A History of Japanese Mathematics

BY

DAVID EUGENE SMITH

AND

YOSHIK MIKAMI

Price, Cloth $3.00 Net

This work sets forth, in a style that the non-mathematical will have no difficulty in following, the history of the native mathematics of Japan. It traces the development of the science from the earliest period, when the influence of China was only slightly in evidence, down to the nineteenth century when the mathematics of Europe finally replaced the ancient wason. In particular it tells the interesting story of the soroban and the sangi, the abacus and computing rods of Japan; it relates the history of the rise of higher mathematics in the sixteenth and seventeenth centuries; it sets forth in a non-technical manner the work of scholars in the field of the yenri, the native calculus of the country; and it shows the nature of the problems that were studied, problems that display the same patience that is seen in the intricate ivory carvings of the Japanese artisan.

Professor Smith’s interest in the history of mathematics, his first-hand acquaintance with Japan, and his large collection of books and manuscripts on the native wason, fit him peculiarly to write upon the subject. Mr. Mikami’s numerous contributions in European journals, his two published works in Oriental mathematics, and his association with Endo, the greatest of native historians of the science, in the library of the Tokio Academy of Sciences, make him an ideal collaborator.

The work is profusely illustrated with facsimiles from important books and manuscripts in the collection of Professor Smith.

This valuable contribution to the science of mathematics is in preparation. It will be published in October. Advance orders may now be sent in through your local book dealer.

The Open Court Publishing Company is at all times pleased to send advance information concerning its publications, and sample copies of its two periodicals. The Monist, quarterly, and The Open Court, monthly, may be obtained upon request.
